Finally, we have a check on implementation of this MOU. A production MOU will be needed in 1993 or 1994 before the plane can be produced. American engines will be needed. Many of us intend to ask GAO to monitor this agreement over the next 4 years and provide us with regular reports. If the development MOU is not properly implemented, I think the next administration will have a very difficult time selling any production MOU to the Congress.

In conclusion, let me ask what is the real alternative before the Senate today.

It is not Japan buying F-16's off the shelf. That is no longer an option. If that were ever to happen, it would need to have happened in 1986 or 1987.

The real alternative is Japanese indigenous production, probably with European assistance. Compared to that alternative the deal before us provides us with 2.5 to 3 billion dollars' worth of exports and the potential technological benefits of cooperating with the other great technological superpower.

We need to learn how to cooperate and how to compete with Japan. This agreement could be a good start on cooperation if it is properly implemented.

The PRESIDING OFFICER (Mr. ROBB). The Chair recognizes the Senator from Illinois [Mr. DIXON].

Mr. DIXON. Mr. President, I yield 10 minutes of my side to the distinguished Senator from Alabama, a principal cosponsor of this resolution and a man who has made a very significant contribution to this good resolution.

The PRESIDING OFFICER. The Chair recognizes the Senator from Alabama.

Mr. SHELBY. Mr. President, I rise today to express my unqualified support for Senate Joint Resolution 113, the resolution of disapproval of the United States-Japanese agreement on the FSX.

I wish to take this opportunity to thank my good friend and fellow member of the Armed Services Committee, Senator ALAN DIXON for his leadership in this effort.

I first wish to discuss a number of questions that I have formulated in my consideration of this agreement. These questions are:

What are the technology transfer implications of this deal as it relates to the recent Japanese record in dealing with our adversaries?

What, if any, new technologies will we be receiving from Japan as a result of the FSX Program?

Why are the Japanese willing to spend so much more money on this deal than seems necessary? Could it be that the driving factor behind this agreement is its commercial applications? What will be the ultimate effect of this arrangement on American industry?

And finally, is this an issue of national security or is it really a trade issue?

Mr. President, a subquestion to the first question posed must be explored and satisfactorily answered before any deal with Japan should be consumated.

Should we be dealing with a company that has been accused of aiding Libya in its production of poison gas?

This question must be asked because it is essential to our security and that of the free world.

I direct my colleagues attention to a recent article by John E. Peterson that appeared in the Detroit News. I believe that my good friend from Illinois has already entered this article in the RECORD. I would, however, like to read from it. The article states, and I quote, "Japan's leading aerospace firm has installed equipment that enables Libya to make poison gas bombs at a chemical complex in the desert south of Tripoli. * * *" The firm that is being referred to is Mitsubishi Heavy Industries, our partner in the FSX agreement.

That article also mentions a couple of old friends, C. Itoh of Japan and Toshiba, and implies that these two Japanese companies may be involved in the manufacture of this poison gas which could be used in terrorists acts against Americans.

We all remember C. Itoh and its role as middle man with the Soviet Union in arranging the sale of sophisticated submarine technology from Toshiba to that nation. In addition, it appears that C. Itoh may have acted in a similar capacity with Mr. Qadhafi.

I am sure that my friend from Illinois remembers this fine organization, for he introduced legislation in the 100th Congress calling for sanctions against organizations like C. Itoh that arrange these types of deals. The second old friend is Toshiba again. This time another subsidiary, the Toshiba Electric Co. has admitted to supplying electrical equipment to the Libyan plant.

What we have here is a clear pattern of disregard by Japanese firms of the security interests of the free world. The Almighty dollar, or in these cases, the yen, takes precedence over all else. Therefore, I ask my colleagues again, can we trust Mitsubishi not to sell technology derived from this partnership, and I use this word loosely, to the Soviet Union?

One must remember that while Toshiba was telling us that the propeller sale was an isolated incident, they were dirty dealing with Libya and possibly other United States enemies.

Much has been made of the wonderful new composite wing and radar technologies that the United States will receive as a result of this deal. We now know that this is not true. A number of us asked the General Accounting Office to review this agreement. GAO has now told us that it is the United States, not Japan, that has superior composite technology and appears to be ahead in radar.

On the other hand, many are saying that the Japanese are receiving old 1970's F-16 technology. Again, this is simply not true. The agreement calls for the United States to send F-16C technology developed in the 1980's. The Japanese are also insisting upon receipt of the source codes that control F-16 computers, as has been debated here.

Now, proponents of this arrangement are singing the praises of Japanese manufacturing techniques. Are they trying to say that the American people do not produce a good product? All one has to do is look at the F-16, the best production fighter aircraft in the world.

In addition, I do not see any great manufacturing techniques that we can learn from the production of a fighter that the Japanese could be buying for a total of $3 billion. Instead, they are going to spend at least $9 billion to develop the FSX. In other words, it ap-

pears as if they are going to spend $30 million more per aircraft than they would have if they had bought the F-16 off the shelf.

This leads me to wonder what exactly is going on here? The Japanese are smart people. They are not dumb. Yet the numbers do not appear to justify this deal. Thus, there must be another reason for Japanese interest. Could it be that the Japanese have a longer-range goal? Could it be that the Japanese would like to develop their own commercial aircraft industry with the much needed assistance of the United States? Could that be the reason why they are willing to pay the higher unit cost to codevelop the FSX? You bet it is. You know it is.

It is common knowledge that the next long-term goal of Japan is to excel in the aerospace industry. As far back as 1980, the Japanese Ministry of International Trade and Industry [MITI], reported in JPE Aviation Report Weekly:

> Although cost and performance requirements for commercial and military aircraft are different, development and production techniques are closely related. Therefore, research and development of commercial and military aircraft should be carried out in tandem.

We all know why they want this deal. The FSX effort will be of invaluable assistance in achieving this goal. It will also be of great value to the Japanese in developing other types of advanced transportation systems, including space transportation systems.

Mr. President, I submit that the United States and Japan assign different meanings to the term national security. To the United States national security means guns and missiles and alliances with our allies; to the Japanese national security is defined in terms of industrial competitiveness. In this case, we bent to the Japanese definition of national security. The United States will not gain any military advantage from the FSX deal, but, the Japanese will be even more competitive, or as some would say, more superior on an industrial level.

The Japanese see this agreement as a means to an end. They are a very patient, goal-oriented people. They focus on the long-term. Their interests are centered on learning methods of developing and integrating sophisticated military systems into the Japanese system. We, in the United States view things differently. We look at the short-term advantages. And the short-term advantage of this deal can be summed up in the "half a loaf is better than none" theory, or in this case 40 percent of a loaf. However, I argued that in exchange for 40 percent of a loaf, we are giving up the oven.

Proponents of the agreement state that if we do not agree to this deal, we will get nothing. The Japanese will turn around and build their own airplane or go to Europe and make a deal with the French or British. Thus, this is the best we could do—we can get forty percent of this deal—so let's sign up to it. Something is certainly better than nothing. But, we do have something—we have the best fighter plane in the world.

Sometimes it is better to have it or nothing. There are times in which we have to stand on principle. In this case the principle is trade. We pour billions of dollars of United States taxpayer money into the defense of Japan. At the same time, Japan is racking up, year after year, a huge trade surplus with our Nation.

In 1988, the United States trade deficit with Japan was around $55 billion. Buying F-16's off the shelf from the United States would show Japanese intent to work toward the goal of lowering this deficit. They would also get the best fighter aircraft in the world.

Let us draw the line here. Let us tell the Japanese that this is your opportunity to act in good faith. We have been paying for your defense for 4 years. The least you could do is buy our planes.

Mr. President, this is a bad deal. We are risking the real possibility of high technology finding its way into the hands of our adversaries. We are risking the virtual sacrifice of our lead in aerospace technology. We are risking the long-term future of our commercial aviation industry. We are risking even greater trade deficits. What do we get for the risks we are taking? I submit, nothing.

Alternatively, we can send our own signal to the White House and Japan: We are not willing to give up our aerospace future for 40 percent of one loaf. We can send this signal by voting for Senate Journal Resolution 113. I urge my colleagues to support the resolution sponsored by the senior Senator from Illinois.

The PRESIDING OFFICER. Who yields time?

Mr. LUGAR. Mr. President, I yield 15 minutes to the distinguished Senator from Missouri [Mr. DANFORTH].

The PRESIDING OFFICER. The Chair recognizes the Senator from Missouri [Mr. DANFORTH].

Mr. DANFORTH. Mr. President, let me explain to the Senate what I think the issue is and what I think the issue is not, as we approach our vote on whether or not to disapprove the FSX agreement.

I believe that the most fundamental issue before the Senate does not have very much to do with whether or not Japan is going to build a new fighter aircraft. That Japan will build a new fighter aircraft is, I think, an accomplished fact.

Japan has said quite clearly that it intends to develop its own aircraft industry. Japan has stated as a matter of Government policy that it has focused on aerospace as a core technology of the 21st century.

Therefore, in the minds of Japanese officials, the model that has occurred with respect to automobiles, televisions, semiconductors, and other products—a pattern of massive subsidies and import protection—is to be repeated in aerospace. Japan intends to develop an aerospace industry, and it intends to compete with the United States and the rest of the world in this field.

Now, we might lament that fact—and I do lament that fact—but to complain about the targeting of aerospace by Japan is not to do anything to stop the targeting of aerospace by Japan. They have made that decision.

Many of us have said that we wish the Japanese would buy F-16's or F-18's off the shelf from the United States. In July 1987, Senator BYRD offered an amendment to the trade bill that was adopted by a vote of 96 to zero urging our administration to press Japan to buy American fighter aircraft off the shelf. That is what we would prefer. That would give some meaning to the concept of comparative advantage, because if there is one thing we can do in this country, it is build aircraft, particularly fighter aircraft. We gave Japan the opportunity to buy this product off the shelf, and they said no. And that is lamentable.

This was an opportunity for Japan to redress some of the persistent trade tensions that we continue to experience, to turn back at least somewhat the surging trade imbalance that we now experience. It was an opportunity for Japan to exercise a leadership role, to exercise statesmanship with respect to international trade. And Japan said no. I lament that, but that is their decision.

With or without the FSX agreement, Japan is going to get into the aerospace business. With or without the FSX agreement, Japan is going to build fighter aircraft. Some believe that the speed and level of Japan's technology development will be accelerated if we do not proceed with the FSX agreement because then they will be thrown on their own devices. Others believe this agreement will give them the necessary leg up to eventualy become competitive. The point is that one way or another, Japan is going to get into the aerospace business.

So I do not think that that is the issue before the Senate now. I think that there is another issue, which involves the trade policy and the policy-making process of the new administration. What is going to be the approach of the Bush administration in dealing with other countries in international trade? Is there going to be a change of tactics between the Reagan administration and the Bush administration?

That is the issue, I think, that is before us.

The original FSX agreement was negotiated during the Reagan administration, and it was negotiated without any input whatever from any department or agency of the Federal Government that concerns itself with the economic and commercial interests of the United States. The original FSX agreement was negotiated by the Department of Defense. The Commerce Department played no role at all; the U.S. Trade Representative played no role at all in negotiating that agreement. It was viewed as a purely defense oriented transaction. Whether the United States was giving away technology and contributing to the erosion of our own competitive position was a matter of little or no concern to the Department of Defense during the Reagan administration.

Then, Mr. President, we had a change in administrations. In comes President Bush and his new team, and the heartening thing that happened with the advent of the Bush administration was that the new U.S. Trade Representative and the new Secretary of Commerce became very much involved in the FSX issue. They went to the President, and they asked the President to revisit the FSX deal before signing off on it, and the President agreed.

Secretary Mosbacher and Ambassador Hills became deeply involved in the details of the agreement, and they were able to clarify certain aspects of the relationship between Japan and the United States with respect to the FSX.

Some people think that these new understandings are of great moment. Other people tend to downplay them and say they are not of much significance. I am not going to debate that one way or another. As a person with zero scientific and engineering skills, I do not feel that I have the expertise to debate whether or not these modifications are of great technical importance.

But the fact is that a new administration had taken office, and it showed a new concern, a new sensitivity to the commercial interests of the United States. It was able to revisit the agreement. And I believe that that is right. I believe that that was the correct approach to take. I compliment Secretary Mosbacher, and I compliment Ambassador Hills for their forcefulness, their aggressiveness in reopening this transaction.

Now the question is, Where do we go from here? Was this exercise a momentary lapse on the part of the new administration, a momentary, casual, fleeting concern for the future of a major American industry? Or does the reopening of the FSX deal indicate that this administration is going to be much more solicitous about American commercial interests than was its predecessor?

We do not know the answer to that question. But I think, Mr. President, that it would be a serious mistake to pull the rug out from under the new administration immediately after it concludes the new negotiations on the FSX deal. Therefore, I believe that voting for the Dixon resolution would constitute a disavowal of the new administration at the very time when it is at least giving some indication of an important change in tactics and a change in policy.

So I oppose the Dixon resolution, but I strongly support the substitute that has been offered by Senator BYRD. The key to the Byrd substitute is that it provides for a key role for the Commerce Department in both the implementation of the current agreement and the negotiation and implementation of the followon memorandum of understanding relating to the production of the FSX.

The amendment offered by Senator BYRD contains language that is very similar to S. 578, a bill which Senator BYRD and I introduced in March. That legislation provides that, as a general rule—not only in connection with the FSX but as a general rule—the Commerce Department is to play a key role in negotiating and implementing memoranda of understanding involving defense-related equipment.

Mr. President, I believe that it is important for the Congress to clarify the role of the Commerce Department because I believe that if we do not, we will very soon slide back to the old days where the State Department and the Department of Defense are our exclusive negotiators in matters involving international relations, even when these matters affect the commercial interests of our country.

I noticed with some dismay an article in today's New York Times. The first couple of paragraphs of this article read,

> As the Bush administration approaches its first major decision on trade policy, the American Embassy in Tokyo is urging Washington to refrain from tough action to retaliate against Japan for its trade barriers.
>
> In confidential cables to the State Department, the Embassy has warned that there could be "an emotional outburst" in Japan if the country is listed under a new Federal law as one of the worst violators of free trade principles.

Mr. President, it seems to this Senator, having watched the players for some 12 years, that the general position of the State Department and the general position of the Department of Defense is that American commercial interests always take a backseat to other considerations, and they are the first things to be given up at the negotiating table. That is exactly what happened when the FSX agreement was initially negotiated. It is my hope that this new administration has truly given us a change in direction, but that remains to be seen.

I hope, therefore, that we can adopt the Byrd substitute so as to codify the new active role of the Commerce Department. If we do not codify that status, I believe that the Defense Department will be back in the controlling position with respect to the FSX deal and with respect to the future of subsequent related memoranda of understanding.

My own position, Mr. President, is that I intend to vote against the Dixon resolution. If we have a chance to vote for the Byrd substitute, I intend to vote for the Byrd substitute.

If that fails, then I reserve the right to reopen my own consideration as to the appropriateness of the Dixon resolution. We will have another opportunity to vote on it. And we will very possibly be voting on the question of whether to sustain or override a Presidential veto on this matter.

Again, I would say that the principal issue before us today is not an airplane. The principal issue is not a Defense Department deal. The principal issue is whether the Government of the United States is going to take a tougher and stronger stance in defending the commercial interests of the United States of America or whether, once again, we are going to let the future of basic industries slide because we care more about some defense arrangement or other foreign policy arrangement with another country.

Mr. President, if I have any time remaining, I yield it back.

The PRESIDING OFFICER. The Senator's time has expired.

Who yields time?

The Senator from Illinois.

Mr. DIXON. Mr. President, I yield 10 minutes from my time to the distinguished senior Senator from Pennsylvania [Senator HEINZ].

The PRESIDING OFFICER. The Chair recognizes the Senator from Pennsylvania [Mr. HEINZ] for 10 minutes.

Mr. HEINZ. Mr. President, this agreement presents a difficult decision for many of us. It is tempting to support the resolution of disapproval for the wrong reasons—reasons that color our view of Japan generally rather than reasons that relate directly to the proposed FSX agreement.

One such reason is my longstanding concern over the dangers of handing over critical technology to trading partners who will have little hesitation in using it to compete against us later on. In a perfect world, technology would flow freely in both directions, but, Mr. President, we do not live in such a world, and the Japanese clearly do not live in such a world. If we are to preserve our competitive edge, we must preserve critical technologies. It is as simple as that, and much of my

analysis of this proposed agreement has focused on determining what technologies, if any, are at risk.

It is also tempting to vote out of the frustration that many in this body share over the continuing unsatisfactory state of our economic relations with Japan—persistent trade deficits that are unresponsive to macroeconomic changes like an effective 100 percent reevaluation of the yen, penetration of our market through unfair and predatory tactics, lengthy but inconclusive market access negotiations, and sectoral agreements broken time and time again.

Until recently, most Americans welcomed Japan's unsurpassed prosperity. But in the last decade, the perception has steadily grown that Japan's success is achieved at the expense of others, especially the United States. The United States deficit with Japan went down only 7 percent in 1988 at the same time our deficit with the European Community went down by half and that with the LDC's was reduced by 20 percent. Most current projections indicate that it will increase once again this year. And this after a 50-percent appreciation of the yen. Last year, Japan accounted for only 15 percent of our trade but over 40 percent of our trade deficit. There is no doubt in the American mind that these numbers demonstrate an unbalanced relationship highly resistant to even very large macroeconomic policy changes.

So, it would be satisfying to cast a vote as a reaction to what has been a one-sided relationship where we are clearly getting the short end of the stick.

At the same time, I am tempted to vote against the FSX deal as an expression of my dissatisfaction with the way our country makes decisions about technology—technology development, technology investment, and technology diversion. There is no permanent, interagency system in place for our Government to make thoughtful decisions about threatened or needed technology, nor about ways to protect or develop it. The absence of an interagency process where trade considerations, as a matter of routine procedure, can be taken into account is one of the reasons the FSX deal is in such trouble right now.

Conversely, Japan handles the range of technology issues exceedingly well. In a sense, our greatest weakness as a government confronted the greatest strength of the Japanese Government in the original negotiations over this fighter. Inevitably, the Japanese got what they wanted in the areas of defense, technology access, and commercial applications. And our side got what it was bargaining for in defense, and in defense only, because that is all our negotiators cared about. We ended up stuck with a bad deal, a real lemon.

When President Bush reopened negotiations, he did the right thing. And the revised agreement he sought reflects his recognition of the much broader scope of issues this sale represents.

Mr. President, you cannot make a silk purse out of a sow's ear, and the FSX agreement is in my judgment, still flawed, despite significant improvement. And it is over the contents of the agreement that the debate must be held and our votes cast.

When I wrote on this subject in the Washington Post on March 30, I detailed three major deficiencies that needed to be repaired to make this an acceptable deal:

First, the absence of any guarantee of the U.S. workshare in the production phase of the project;

Second, the lack of technology transfer safeguards to ensure that FSX technologies were not diverted either domestically to the commercial aviation or other advanced sectors or externally to our adversaries; and

Third, the lack of safeguards against Japanese demands for followon technologies in the future.

As a result of these missing pieces, I called this a bad business deal with the signs of a fire sale written all over it.

Unfortunately, what has happened since March 30 is insufficient to put out the fire.

We now have a figure for the U.S. share of the production process—40 percent. But the word "approximately" appears in front of that number rather than "at least," and I have also learned through our difficult experience with the semiconductor agreement not to trust anything that appears in a side letter instead of a contract.

There is some reassurance on the technology transfer issue. The items of the greatest relevance and usefulness—the source codes—will either be transmitted in sanitized form or not transferred at all, but my concern about putting the technology they will be getting to commercial use continues. The agreement does not prevent that; indeed, it is probably impossible to prevent it short of blocking the agreement entirely.

Followon technology transfer claims will apparently be adequately limited by provisions in the agreement between General Dynamics and Mitsubishi.

Mr. President, these improvements, and there are others besides these, including some changes in the process by which these agreements will be negotiated, simply are not enough to make this deal acceptable.

What these deficiencies mean is that we are entering into an agreement with too few protections and too many dangers.

We are not adequately protected against being cut out of the production phase of this deal. That would mean the transfer of some 7 billion dollars worth of technology in current dollars for roughly $500 million.

There is no protection at all against the commercial exploitation of the technology we are transferring, either for commercial aircraft or aerospace, and we are fools if we believe that possibility has escaped Japanese notice.

There is always the risk of technology diversion to Eastern bloc nations. Procedures have been improved in the wake of the Toshiba case, but they are not foolproof.

Taken together, these add up to considerable downside risk—risk we cannot afford in our current competitive situation.

Mr. President, I think there are also some general lessons we might learn from this episode that I hope will help us handle the next such arrangement more effectively.

First, the role of the Congress has been made more clear. Congress has serious reservations with the agreement, has made those reservations known in a number of fora, and to the credit of the Bush administration, has had some of them addressed. The constitutional responsibility of the Senate to advise and consent is operating in a meaningful way.

Second, the role of economic security interests has properly gained in importance. The FSX deal confronts us with the broadening context of national security beyond what is directly related to military matters. We have entered an era in which economic security interests that touch upon the health of our industrial base must be given as much weight as purely military concerns. If one single lesson emerges from this issue it is the precedent it sets for making sure Defense Department decisions about critical technologies are not made in a vacuum. The views of Commerce and USTR need to be heard, and Congress needs to be confident that interagency procedures are in place to ensure that happens.

We also need to legislate once again to strengthen our export control and technology transfer system. I am convinced now more than ever that our system is fundamentally flawed, and that it is incapable of making thoughful and serious judgments about technology transfer cases. Obviously, simply voting against this agreement will not improve the system. Early next month, however, I will have more to say about my own proposals in this area.

Third, the need for a well-thought-out trade policy has become more clear. In my view, the previous administration had its priorities backward. It first struck a deal with Japan, and

then asked for an assessment of its probable effect on the vitality of the American aerospace industry. As I said before, fire sales are for people going out of business, not for countries wanting to stay competitive.

Fourth, we have learned the desirability of public debate. Secrecy can only go so far. This deal was secret from the beginning, and the results are clear. One cannot fault a country for being reluctant to reopen the negotiations once the two governments signed the agreement. I am sure that Japan would have loved to keep the MOU secret because, as we discovered during the hearings, there were no hard numbers included for the production phase. The Bush administration is to be commended for responding to the public outcry and reopening the negotiations.

Mr. President, up to this point if these comments reflect mixed feelings about this agreement, then they are being accurately interpreted. It is not as bad as it initially was. But it is still a long way from being in our interest. There remains in addition, however, a directly related issue, and that is what we intend to do when other nations target our critical industries for their exploitation with their governments' help.

Mr. President, in other words, we need to come to a conclusion about whether and how we will confront other nations' industrial policy initiatives. It is clear that Japan sees the FSX as a means to bootstrap itself into aerospace industry leadership. And the Japanese Government sees the FSX deal with a United States aerospace leader as the means to learn what it needs to become a world-class competitor in yet another critical industry. The question, therefore, becomes whether we wish not just to acquiesce, but also to become an accomplice to helping Japan into yet another international market, where we have a clear lead, while they continue to keep their markets closed. This Senator does not believe that American Government and shortsighted businessmen should be such accomplices. Therefore, I cannot support this agreement.

The PRESIDING OFFICER. Who yields time?

Mr. LUGAR. Mr. President, I yield 8 minutes to the distinguished Senator from Colorado [Mr. WIRTH].

The PRESIDING OFFICER. The Senator from Colorado [Mr. WIRTH], is recognized for 8 minutes.

Mr. WIRTH. I thank the Senator from Indiana for his kindness, and I thank the Chair.

Mr. President, I intend to vote against the resolution of disapproval offered by my good friend, the Senator from Illinois. This was not an easy decision, and I will in a moment outline my reasons for deciding to support the administration's agreement with Japan on FSX. But first, I would like to discuss the broader context in which this issue is being debated.

Mr. President, we are now in the midst of an incredible transition from the post-war era to a new political, military, and economic order which will define the early decades of the 21st century. Much has changed since the end of the Second World War, and the cumulative effect of this change is manifest daily. New leadership in the Soviet Union has challenged the fundamental assumptions of postwar security arrangements. The emergence of Japan and her East Asia neighbors as world economic players has caused sometimes painful dislocation here at home. In Europe, the pending integration of the EEC by 1992 has redoubled political coordination within Europe, and this coincides with the emergence of a new generation in Germany which, unhampered by direct involvement in the Second World War, is more insistent on asserting German interests.

These events have influenced American power—economic, political, military—as has been chronicled and analyzed by many, including Paul Kennedy in his work "The Rise and Fall of Great Powers." The message I take from Dr. Kennedy's book is not that we are in a kind of superpower free-fall, but rather that the world has grown up around us. The greatest threat we face is the temptation to deny that basic fact, to act as if the world has not changed.

The debate on FSX, Mr. President, contains within it many threads of this much more fundamental debate about America's position in the world. In my view, we cannot stem the rise of other nations, but must instead redouble our own efforts to be competitive and innovative in world markets, to be visionary and astute in guiding political developments in our own interests, to be prudent and thoughtful in providing for the common security.

Several issues have arisen in the FSX controversy. The most fundamental is the argument that Japan should, in order to redress both the trade imbalance and the burden sharing issue, procedure all 130 aircraft off the shelf from the United States. Without doubt, this would help with the trade balance and would represent the most efficient expenditure of Japan's limited defense budget. The problem with this option is that the Japanese simply will not do it, although then-Secretary of Defense Carlucci tried to convince them otherwise. In fact, there is strong Japanese interest in a purely indigenous all-Japanese fighter—an option pushed hard by Japanese industry. Between an all-United States option and an all-Japanese option is the option of cooperative development and production effort. The Senate Armed Services Committee Report accompanying the fiscal year 1989 Defense authorization bill noted that "the Committee regarded codevelopment and coproduction as the next best alternative (to off-the-shelf-purchase)."

An additional concern is that Japan Inc. is determined to challenge America's domination of the world civilian aviation market in the 21st century—and that the FSX represents the laboratory to help them compete with Boeing and McDonnell Douglas. Mr. President, if Japan wants to develop an aviation industry, we cannot stop that development. The issue is how to position the United States in the face of this challenge. Some argue that we should reject cooperation on FSX and force Japan to go it alone—thereby costing them more to develop the aircraft, but also denying ourselves a window on their efforts. The other option is to pursue a cooperative effort in which Japan advances, but we share in the work, jobs, and technology along the way.

Technology sharing is a major concern in terms of what we and the Japanese stand to gain from this arrangement. Some proponents are downplaying the amount of technology the Japanese are to receive—especially pointing to the fact that the source codes—the computer software—will be protected—and assert that there will be significant technology flow-back, especially in composite materials and radar. Proponents also point to the fact that the Japanese will gain experience in integrating the production of aircraft, but that they will not gain the critical design integration experience necessary to become an aircraft manufacturer. Opponents claim that we won't learn much from the Japanese and that we will give up far too much.

A technology transfer risk assessment was completed by the Air Force in March of this year, and that study concluded that the FSX codevelopment agreement would hold the transfer of critical technologies to an absolute minimum and that the agreement did not pose a major risk to the American defense industrial base. I believe that the advantages in this arrangement outweigh the risks—especially when compared to a situation in which Japan develops an FSX alone or with European help.

Following the government-to-government memorandum of understanding signed last November, an industry-to-industry agreement between Mitsubishi and General Dynamics was signed in January outlining the work share of the codevelopment project. The primary concern raised earlier this year focused on the extent to which we would be giving sensitive American technology to Mitsubishi in this ar-

rangement. This concern was exacerbated by the fact that Commerce and the special trade representative had no role in the decision by the State Department and Defense Department to proceed. A letter was sent to President Bush in February urging an interagency review of the FSX agreement—and I joined with many of my colleagues in signing that letter.

In response to this expression of congressional concern, the Bush administration initiated a thorough review of the entire FSX issue—with the active participation of Secretary Mosbacher at the Commerce Department. As a result of this review, the administration renegotiated elements of the original memorandum of understanding with the Japanese and submitted the revised agreement to the Senate.

Regarding the potential threat to U.S. civil aviation industry posed by the FSX agreement, I would like to quote the testimony provided by the Commerce Department to the Senate Armed Services Committee on May 9 by Deputy Under Secretary of Commerce Joan McEntee:

> One of the key questions for the Department of Commerce thus became whether the knowledge transferred to Japan under the FSX project would be sufficient to allow it to narrow the gap with the United States in commercial aerospace production. . . . I can assure you that the agreement in its current form—including the limitations on technology transfer which the interagency review produced—effectively limits the competitive threat to our industry in the future. It leaves the key decisions regarding technology transfer in U.S. hands. Equally important, by making us partners with highly skilled Japanese contractors, it positions the United States to benefit from the technological advances which would be generated in the process.

I believe we have achieved an important and valuable victory in the FSX saga at the level of process: no longer will we allow diplomats and generals alone to make decisions on behalf of the United States which involve critical commercial and technology issues. As a result of the FSX issue, the role of the Commerce Department in the review of all future defense equipment transactions is assured. And the implementation of the FSX agreement will undoubtedly be very carefully monitored to assure that U.S. interests are protected.

The question of substance remains: Is this deal on balance in the interests of the United States? If one accepts the premise that Japan will develop and produce an FSX regardless of whether the United States is involved, logic dictates that a joint program in which the United States has control over the flow of technology to Japan, access to some of the technology being developed in the program, and $2.5 billion in United States contracts is on balance in our interest.

I accept that premise and believe that the Senate should reject the pending resolution of disapproval.

I intend to vote against the resolution offered by the Senator from Illinois, and I hope that my colleagues will join me in doing so.

I thank the Chair.

The PRESIDING OFFICER. The Chair recognizes the Senator from Illinois, Mr. DIXON.

Mr. DIXON. Mr. President, I yield from my time 15 minutes to the distinguished senior Senator from New Mexico [Mr. DOMENICI].

The PRESIDING OFFICER. The Chair recognizes the Senator from New Mexico [Mr. DOMENICI] for 15 minutes.

Mr. DOMENICI. I thank the Chair. Mr. President, I thank my friend from Illinois.

Mr. President and fellow Senators, obviously the new administration has made a bad agreement better. The distinguished junior Senator from Colorado has just said in his closing remarks that this is a close call. He comes down on the side of supporting the agreement renegotiated to some extent by President Bush.

I am not so sure it is a close call, but if it is I regret to say that I come down the other way, and I would like to explain why I am going to support the Dixon amendment.

First of all, I have been told by many people whom I respect that the principal reason for voting for this agreement is that if it is turned down, what we are apt to get is something worse because the Japanese may indeed go it alone with perhaps some European allies.

Mr. President, that probably is a good argument for some. As far as this Senator from New Mexico is concerned, that is not good enough. I really do not believe that will happen. I honestly believe that if this agreement were turned down, it would be a very strong message that this is not the way for Japan to treat—I am going to say this because I believe it—the very best friend they have ever, ever had in their entire history.

The people of the United States of America, albeit some might say selfishly, and not altruistically, nonetheless have provided an environment in this world that permitted this new democratic capitalistic country that borrowed our ideas, encapsulated them in their constitution, all of which should make us proud, to flourish beyond anything they could have ever expected.

While they are giants now on the economic front, they owe a substantial portion of that success to the United States of America. So that no one will think that the Senator from New Mexico thinks that the Japanese are totally responsible for our inability to compete in a world market, let me say right up front I am not one of those because I honestly believe we have many things to do at home with our economy, with our people, with our labor, with our industrial leaders, with our own analysis of where we spend and waste our resources, and that is an American problem. But, Mr. President, when the United States of America has an ally and a friend, and they claim to be—and they are, and we claim to be their friend and we are—when we have provided them with the kind of safe haven for the development and evolution of that democratic capitalistic country to the extent that they are, I venture to say without our defense they would not be where they are.

Without our economy, which is like a sponge, buying up billions and billions of dollars of their products, and I do not quibble with their competitiveness, and the quality of their product, and the genius of American consumers when they buy the best—I submit to you we have to fix our own up.

But I do not believe it is the action of an ally, a friend, a partner, when along comes an opportunity for them to buy an American product which we could tailormake for them, an industry which they know and we know we are superior in, and we are told the best you can get is a half-baked deal, they are going to buy something from us, they are going to develop with us, but instead they tell us they are going to build their own. And we are told if you do not do it this way, they are going to do it another way.

Well, Mr. President, and fellow Senators, it seems to me that the simple message that I want to give is when they are ahead in technology, we buy their product. Are they prepared today, since they are ahead in high definition television, to say, we will share it with you? Of course not.

We are almost frantic about the situation, and I do not blame them for being ahead of us. I merely ask the question. We are unequivocally the world's leader in aerospace, in aviation, engineering technology, and manufacturing. It is a very simple proposition. We are.

Why is it that when we are ahead and could supply what they need that we are told, this is the best deal you can get, take it or leave it?

I submit that is not the way a true partner, one that understands what we have done for them, would treat this situation. The idea that they might tailor-make a fighter here in America to meet their needs was discounted instantly according to what we hear. And there are some who would say the Senator from New Mexico is even wrong on the balance of trade. We may get more out of this than the other way. Well, we may and we may not.

So I submit that this is an opportunity to send a signal, lodge a bit of a protest, and in a very real sense if the agreement fails, to start over.

I want to take my closing minutes to say two things. I support the idea and concepts encapsulated in the Byrd amendment. I believe we ought to do that. I am not trying to add any insult to injury, but I truly believe there is great risk over the next 8 or 9 years that we will end up getting what we think we were supposed to get. I believe this is not totally a defense issue. I think this is a defense and a commerce issue. I truly believe there is commerce involved, and getting into a major market on the civilian side that is part and parcel of the Japanese plan here.

So I will support that if I get a chance, and I hope I do. But my last remarks have to do with anybody reading or listening to my remarks getting a conclusion or drawing a conclusion that the Senator from New Mexico expects the Japanese to refurbish the American economy. I do not. I have just said, and I repeat, that one of the real transition problems for our people, our business, our labor, and our education is to come to the realization that we are living in a brand new world.

We are living in a world that produces goods for the marketplace the same way America did for decades; and we have to do ours better and compete with them; increase our productivity. And I do not vote for the Dixon amendment and against the agreement based upon wanting anything for free from the Japanese. But essentially it appears to this Senator that there is a much different attitude about the relationship between the two countries and the notions that are ours versus the ideas and sensitivities that are theirs. I truly do not believe they understand at all a $55 billion trade deficit even if it is the result exclusively of competitiveness. I am not sure it is all of that; most of it, but even if it is clearly the United States has done very little to thwart that other than to encourage our own industries, our own labor, and our own manufacturing skills to get better.

For a country that has said to the Japanese, we want you to be free, we want you to be independent, we will not exert any influence over you, in fact we want to help you by defending you, it seems to me that when along comes a proposal, an idea on the defense side when they do not say, "Let us go with our ally where they are strong, where they do it the best, and let us buy from them," it seems to me to be a failure to understand the significance of the relationship and the significance of our striving year by year to get better here at home in an open world market and compete.

So I repeat, in an area where we are superior, do they not want to get into that area and become equal? Some would say no. I believe yes. In areas where they are superior, do they want to share with us under some development agreement? I think the answer is "No." One might say it is very different, because one if defense and one is not. I submit this is only part defense, this agreement and this proposal. It is part something else.

It clearly is the beginning of and the evolution of an aerospace and aircraft industry in Japan, and I am not saying they should not have one. I am merely saying that it is not quite the way one would have expected a friend to treat a friend, especially where we spend $285 to $290 billion on defense, part of which goes to the eastern Pacific and keeping peace in the world. And I am not referring to burden sharing. I think I am just asking that we be treated as fairly as we have treated them, especially in a situation like this one, where it clearly could have been done differently, in observation of that fairness, and our sensitivity toward their development, their freedom, and their growth.

I thank the Senator for yielding.

The PRESIDING OFFICER. The time of the Senator from New Mexico has expired.

Mr. DOMENICI. I yield the floor.

Mr. LUGAR addressed the Chair.

The PRESIDING OFFICER (Mr. KERREY). The Senator from Indiana.

Mr. LUGAR. I yield to the Senator from Virginia for 5 minutes.

Mr. ROBB addressed the Chair.

The PRESIDING OFFICER. The Senator from Virginia has 5 minutes yielded to him.

Mr. ROBB. Mr. President, I thank the Senator from Indiana, and I thank my colleague from Illinois who was prepared to take the Chair to allow this Senator to speak in opposition to his amendment. That is a degree of collegiality that may not always be fully understood or appreciated elsewhere, but I want to specifically thank the Senator from Illinois for that courtesy.

Mr. President, today I am going to vote against the resolution of disapproval, as I did in committee and, hence, in favor of the administration's FSX codevelopment agreement reached with Japan. I understand that this issue has aroused some very strong passions among my distinguished colleagues, and I certainly share many of their concerns. There is no question in my mind that they are on the right side, politically.

Indeed, it seems to me that the Japanese Government should take this debate in Congress as a strong signal that United States-Japanese economic and commercial relationships can substantially affect our political and security relationships.

However, after careful review, weighing the broad foreign policy implications of this agreement along with the security and commercial interests, I believe, that it is in the best interests of the United States to proceed with the agreement.

It is important that the American people not labor under the popular misconception that there were easy alternatives.

There was never any real prospect that the Japanese would purchase the American F-16 off the shelf.

They would otherwise adopt a go-it-alone strategy, either developing the plane all by themselves, which is still favored by many Japanese business and political leaders or with European assistance.

Moreover, if after the protracted negotiations, in the last several weeks, the United States were to disapprove this agreement, in light of Japan's internal domestic situation, the Japanese could well end up on the slippery slope toward pursuing increasingly independent economic, financial and security policies.

I would submit that that result would not be in our best interests.

Furthermore, it would send the wrong signal at the wrong time to the Japanese, as well as to our other allies, about our reliability in keeping our commitments.

Mr. President, there are larger dimensions to this debate.

Though Japan may be an economic competitor, it remains an overarching fact that Japan is also one of our strongest and most important political and military allies.

Our treaty agreements with Japan are at the foundation of our strategic and political relations throughout the Pacific.

Our deployment of forces is the key to our forward defense strategy in the region, both as a hedge against Soviet aggression and other contingencies.

Mr. President, America remains the leader of the free world.

One task of such leadership, however, is preserving and managing alliances, especially as they undergo change and stress.

This agreement, in my judgment, will enhance Japan's defense capability, allow Japan to assume a larger share of the common defense burden, and strengthen the overall alliance, in addition to whatever economic benefit it may bring to Japan.

It is this larger consideration that persuades me to support the FSX agreement.

Concerning a few specifics of the agreement:

I am generally satisfied by the administration's assurance that sensitive American technologies will be protected.

It is important, that the administration and the Congress closely monitor the technology sharing arrangements and ensure that they are faithfully implemented.

I am also persuaded by the fact that the United States, did not originally enter into this agreement with the intention of seeking technology from Japan.

Under the clarified terms, however, a framework has been established that will enable the United States to receive technology flowback from the Japanese that results from this project.

This is access that otherwise would have been unavailable.

The Japanese must transfer derived technologies to United States companies, without charge, and they must allow the United States the opportunity to buy any non-derived technologies.

Thus, a new cooperative arrangement has been set in motion that brings benefits to the United States.

Nor should we underestimate the fact that U.S. industry will get 40 percent of the work in the development phase, and approximately 40 percent during production. And fully 40 percent if the Byrd amendment is agreed to.

This means roughly $2 billion for American industry in a program that will be completely funded by the Government of Japan.

I trust this agreement, the first military codevelopment project between the world's two most technologically advanced countries, sets a precedent for what we should do with similar arrangements with our allies in the future.

We must do a better job of tying together our economic and security policies.

And we must exercise the kind of leadership that preserves American and Western security interests while sustaining our alliances wherever possible.

Thank you, Mr. President.

I yield.

Mr. DIXON addressed the Chair.

The PRESIDING OFFICER. The Senator from Illinois.

Mr. DIXON. Mr. President, I yield 5 minutes to the distinguished senior Senator from South Dakota [Mr. PRESSLER].

Mr. PRESSLER. This is somewhat of a painful moment for me, because I love President Bush and support him. I love our Republican leaders in this Senate and usually support them. I must part company today however, because I also love the American farmers and workers, whom I am convinced will be hurt by this agreement. I shall vote for the Dixon amendment, and I shall oppose this FSX deal.

I have the declassified GAO report here today, which says that in fact the technology that Japan is giving us is out of date, and the technology we are giving them is our best technology, the best aeronautics technology in the world.

This is a General Accounting Office report. It is an extremely important report. Every Member of the Senate should read it, and so should our fellow countrymen.

Today's Washington Post has a major ariticle entitled, "GAO Criticizes FSX Fighter Jet Deal With Japan." I intend to insert that article in the RECORD.

Also, Mr. President, I feel strongly that this agreement should be linked to farm exports. I come from a farm State. The fact of the matter is that Japan has broken agricultural agreements with us. Japan refuses to take our beef in. It says it will take our beef, but it inspects and reinspects the beef. Japan refuses to trade on an equal playing field. Our farmers are suffering because of that.

At the same time, the Japanese are coming here to buy up farm land. The New York Times had a major article Sunday in the business section on the agricultural activities of the Japanese in the United States, particularly in California.

This is totally unfair in comparison with what our companies can do there.

Mr. President, I have talked to several businessmen and others who tried to do business in Japan. Their products inspected and reinspected. There are holdups. It is not an equal playing field.

I believe very strongly in the United States keeping its competitive edge.

I am the ranking member on the Science Subcommittee and just today we had a hearing on high-definition TV. The same thing is happening in that area, and I asked today why U.S. companies cannot compete in high-definition TV.

Let us remember that the only VCR's for sale in the United States are those made abroad. There are none made in the United States anymore. All VCR's are made abroad.

That is a dramatic statement. I told my staff to check that because it sounded unbelievable.

We cannot compete in these areas because the Japanese use government subsidies, monopoly practices, unfair pricing practices, cutting the floor out from the small businessmen and women, using trade practices that our own people cannot use, and getting credit in excess of what our own people can get in this country.

I think it is time we send a signal to the Japanese, a clear signal, that the Senate of the United States is tired of this. We want equality.

Our people can compete, if they have an equal playing field, if things are fair.

Mr. President, I wish to submit the New York Times article on Japanese agricultural practices for the RECORD.

I wish to say in closing that we live in a global world. We cannot close things off, but we also cannot give away the aeronautics technology that we have, the one area in which we have a lead. We cannot give away to a foreign power the jobs of American small businessmen, of American workers, or of American farmers. What is happening today in the Senate has a much broader impact than the FSX agreement.

There should be linkage of the FSX agreement to agricultural treaties and to the behavior of the Japanese in other trade areas. We need linkage of some of these treaties, just as we use linkage in arms control agreements.

So, Mr. President, I shall vote enthusiastically for the Dixon amendment, and I shall enthusiastically oppose this FSX deal.

The PRESIDING OFFICER. Does the Senator ask unanimous consent to print some additional material in the RECORD.

Mr. PRESSLER. Yes.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the Washington Post, May 16, 1989]

GAO CRITICIZES FSX JET FIGHTER DEAL WITH JAPAN

(By Stuart Auerbach)

The General Accounting Office yesterday directly challenged assertions by the Bush administration that the United States will gain access to superior Japanese technology by joint development of a new generation fighter plane, the FSX.

The GAO, in a declassified report released on the eve of a Senate vote on the FSX deal, said the United States is "superior to Japan" in the composites technology needed to produce a light but strong wing made of plastics and is probably ahead in radar technology. These are the two areas in which administration officials said the United States could gain technology from Japan.

Critics have denounced the deal as a giveaway of U.S. aeronautics technology that will enable the Japanese to develop their own civilian aircraft industry. But Defense Secretary Richard B. Cheney insists that U.S. manufacturers will gain access to superior Japanese technology through the joint development of the proposed advanced fighter.

"Suggestions that the Japanese have nothing in which we would be interested underestimates Japanese technological capabilities . . . and denies our defense industry the synergistic benefit of technological cooperation," Cheney said in recent congressional testimony.

But the GAO report, which has floated around Capitol Hill in a classified form during the past two weeks, disputes that conclusion.

"Our preliminary observations are that, overall, the United States has superior composites technology and appears to be ahead in radar development," Assistant Comptroller General Frank C. Conahan wrote Sen. Alan J. Dixon (D-Ill.), a leader of the bipartisan congressional effort to derail the agreement.

To defeat the FSX agreement, the Senate and House each must pass resolutions of disapproval and be prepared to muster the two-thirds majorities needed to override an almost-certain presidential veto. The Senate is due to vote this afternoon; the House will not vote on the FSX unless the Senate defeats the agreement, which is considered unlikely.

In its report, the GAO called the Japanese design for an FSX wing made of composites a "high risk" strategy that was rejected by the United States after tests in the 1970s "because of costs and risks." Even if Japan succeeds, the GAO continued, the design presents "potential problems" that could overcome the advantage of reduced weight.

Furthermore, the GAO said American manufacturers possess an expertise in advanced composites for aircraft that is "excellent and superior to Japan" with "a demonstrated and proven capability" in production.

"Should the Japanese prove successful in making an economically competitive wing box [of composites], the U.S. requirement for this technology may be modest," the GAO concluded.

The GAO was less definitive on the question of phased array radar, the other area in which the administration said the United States could learn from Japanese technology. The GAO report cited a paper prepared in March by the Air Force's Wright Research and Development Center that said Japan needs to develop radar for the FSX to catch up with U.S. technology.

"The report stated that Japan appeared to have less radar experience than the United States and lacked vital knowledge in terms of defining module performance. The report stated it was unlikely that any significant technology flow from Japan would result from the FSX agreement," the GAO stated.

It added that U.S. knowledge of Japanese radar technology is limited "because Japanese officals have refused to release detailed test and evaluation data," which "has been identified as proprietary and classified."

[From the New York Times, May 14, 1989]

JAPAN'S NEW FARM BELT

(By Andrew Pollack)

SAN FRANCISCO.—In California's agricultural belt, a meat-packing plant that has been closed for years reopened recently with new financial backing—Japanese. In the same city, Fresno, a Japanese textile company, is building what will be the first cotton mill west of the Mississippi River.

In the Napa Valley, California's famous wineries will soon be joined by a sake factory built by a Japanese brewing company, complete with the obligatory tasting room for tourists.

From the California wine country to the Florida citrus groves and Montana ranches, a wave of Japanese investment is sweeping through American agriculture and food processing.

Much of the investment has been spurred by trade agreements signed last year that opened Japan's market to increased imports of beef, citrus products and other foods. Production costs here are far lower than in Japan, the land of the $25 melon and the $20-a-pound sirloin. To compete against cheap imports, Japanese companies are establishing their own sources of inexpensive food in the United States.

"It's very economical to produce here and export to Japan," said Taizo Sano, a representative here of the Kagome Company, Japan's largest ketchup and fruit drink factory in Los Banos, Calif.

The Japanese investment is generally welcomed, for it is helping revitalize depressed American farm areas and is providing a new market for American agricultural products. In fact, California officials recently completed a trip to Japan specifically to court food companies.

But the trend is also stirring some uneasiness. After similar waves of investment in factories, banks and real estate, even the American cowboy now seems to be falling under Japanese sway. And some feel frustrated that after the United States finally pried open Japan's food market to American food exports, it is the Japanese companies that are positioning themselves to benefit, possibly blocking American competitors.

Some cattlemen, although not many, have raised concern, said Thomas M. Cook, director of industry affairs for the National Cattlemen's Association in Washington, which at its last convention resolved to monitor the situation. "They want to sell them the beef, not the operations," he said.

But Japanese companies argue that they need food production facilities to tailor the products to Japanese tastes. For example, Japanese consumers prefer a fatty, highly marbled beef, they say.

"Our American consumer now is geared to the lean type of beef. They can't really go out on the open market and buy the cattle they want," said Gene Davis, president of Mount Shasta Beef, in Cottonwood, Calif., which is partly Japanese owned.

To be sure, Japanese investment is still in its infancy, and might prove to be as inconsequential as the feared Arab invasion in the 1970's, which led Congress to require disclosure of foreign purchases of farm land.

Altogether, foreigners own only 12.5 million acres, or just under 1 percent of the 1.3 billion acres of privately owned American farmland and timberland, according to the Department of Agriculture, and Japanese own only 218,000 acres, less than 2 percent of that held by foreigners.

Still, after holding steady for many years, the amount of Japanese-owned farmland jumped more than 40 percent in 1988. Japanese made 42 purchases totaling 65,000 acres in 1988, a steep rise from the 15 acquisitions totaling less than 5,000 acres in 1987.

The major purchases in 1988 included the $3.5 million purchase of a 31,000-acre ranch in Colorado by Otaka International and a $54 million stake in the huge 25,000-acre Fellsmere citrus grove in Florida by the Sumitomo Corporation. The Zenchiku Company, a major meat wholesaler, bought Montana's 28,000-acre Selkirk Ranch, but too late to be included in the Agriculture Department's 1988 tally.

Tetsusaburo Hayashi, director of agriculture for the Japan External Trade Organization, a trade promotion agency affiliated with the Japanese Government, said that at least 40 Japanese food companies had some factory or other facilities in the United States, with about half of those in California. But he expects the number to grow rapidly.

"Every restaurant chain and supermarket is forced to think about the possibility in order to compete with other companies or with imported food," said Mr. Hayashi, who is based in Los Angeles. "It's still low key, but below the water many companies are doing research or feasibility studies."

Under a trade agreement reached last June, Japan's import quotas on beef and oranges will be raised each year until they disappear in April 1991. Orange juice quotas will end in April 1992. Quotas on other products, including tomato sauce, apple juice and ice cream will end at various times during the next three years under a separate agreement signed about a month later.

Even with the quotas, Japan has become the largest export market for American farm products, surpassing all the Western European nations combined. But with the quotas being lifted, some analysis say the market for American products, particularly beef and fruit juices, could easily double or triple.

Japanese companies are attracted to the United States in part by the comparatively low prices—raw food products like tomatoes are one-fifth their cost in Japan, where land is limited. But other factors are also important, including the weakness of the dollar against the yen and the lower cost of American packaging materials, like aluminum cans. Those factors make it economical for companies like Kagome to produce and package ketchup and fruit drinks in California, rather than Japan.

So far, much of the action appears to be in beef. Japanese beef consumption is only one-fifth the American level per capita at present, so Japan could become a big market for American beef producers, who are facing a decline in domestic consumption.

Earlier this month, a Japanese company named Stamina Foods and the Marubeni Corporation, a Japanese trading company, announced that they would build a beef-processing plant in Fremont, Neb., to produce special cuts of meat for export to Japan. Japanese companies have also bought the Washington Beef Company, a processor in Yakima, Wash., and half of Colonial Beef in Philadelphia.

In California, Masaaki Tanabe, an exporter, has put together a network of joint ventures with Americans, including a ranch to breed cattle, feeding lots to fatten them and packing houses to slaughter and butcher them into Japanese-style cuts. Mount Shasta Beef, as well as Southfield Beef Packing Inc., which took over the deserted meat-packing plant in Fresno, are two of these ventures. Americans run them and are part owners.

The meat from this vertically integrated network will then be exported by Mr. Tanabe's South Pasadena company, Mercury Overseas, which is partly owned by the Hannan Corporation, a major meat wholesaler in Osaka.

Other food areas are also seeing Japanese investments. At least five California wineries have been bought in the last few years by Japanese brewers and pharmaceutical companies, eager to learn about wine in general and to supply the growing Japanese market, where California wine is starting to make inroads.

Several American bottling companies are already bottling fruit and soft drinks for Japanese companies.

Even rice, the product Japan has given the most protection, is seeing some action. While rice cannot be imported easily, some products made from rice can. A Japanese-owned company called American Sunny Foods, based in Stockton, Calif., began exporting rice flour to Japan last year, mixing it with sugar to skirt the import barriers. The sugar is removed and sold in Japan, and the flour is used to make rice pastries known as mochi, a spokesman said.

The American production of sake, a rice wine, goes mainly to supply Japanese restaurants in this country, but California officials expect exports to begin eventually. The Napa sake factory, which will be the fourth in California, is being built by Kohnan Inc., which is owned by Satsuma Shuzo, a Japanese brewing company. Kohnan also bought a Napa winery, which it has renamed the Silverado Hills Cellars, according to Kojiro (Mike) Iwasaki, its president.

One long-term threat to American food and agriculture companies is that the Japanese will use their United States facilities not only for exports but also to penetrate the American market. Indeed, the Fresno cotton mill—being built by a Japanese textile producer, Nisshinbo Industries, along with Kanematsu Gosho Ltd., a trading company—is aimed at selling to the American market where there are barriers to imported textiles.

Mr. Sano of Kagome said the company was also thinking eventually of expanding its California facility to move into the United States ketchup market, first by producing for American companies. The factory in Los Banos will only use one-quarter of the land the company bought. "We have room to grow," he said.

The PRESIDING OFFICER. The Senator from Illinois.

Mr. DIXON. Mr. President, I am delighted to yield 7 minutes to the distinguished Senator from Ohio, Senator METZENBAUM.

Mr. METZENBAUM. I thank the Senator from Illinois.

The PRESIDING OFFICER. The Senator from Ohio.

Mr. METZENBAUM. I thank the Chair.

Mr. President, I wish to speak not in substance as to whether this is a good deal or a bad deal. I have concluded in my own mind that I do not like the deal and I am going to vote to support the Dixon proposal.

But, I wish to speak for a few minutes about the obsession with secrecy that has surrounded and enclosed this FSX deal.

It is amazing that this deal has become a very secretive kind of matter. Most of the facts on this deal are being kept hidden from the public. Why? I cannot understand why anything has to be secret. Nobody is asking to know the specifics of how you build the plane, or the engines, or the wings. The question is why are the terms of the deal not being made available to the American people? They are entitled to know. A Senator can go look at the document which is about that thick but a member of his or her staff cannot look at it. And the American people do not know what the deal is all about except what they read in the paper or hear on the nightly news.

The memorandum of intent between the United States and Japan, which lays out the terms of the deal, is secret. Nobody can know. Why?

There are secret side agreements between our Secretary of State and Ambassador Matsunaga, according to information this Senator has.

I understand there are secret oral agreements. What are they? To what point do they address themselves?

Is there something there that the American people cannot know?

I have tremendous respect for our President and for our Secretary of State. But I believe that government ought to be conducted in public as much as possible and that the people have a right to know.

Who is insisting on all this secrecy? We do not even know that.

Is it our side? And if it is our side why are we insisting upon it? Is it the Japanese Government? And if it is the Japanese Government why are they insisting upon all this secrecy?

Rumor has it—and I do not know that this is a fact, but I cannot find out the fact—that our Department of Defense has insisted on the secrecy because the Japanese want it.

And you have to say why is our Department of Defense insistent upon protecting the Japanese because they want secrecy? This is a big deal. This is an important deal. I can understand secrecy with respect to classified material. I can understand secrecy with respect to certain intelligence information. But I do not understand secrecy with respect to the matter of building an airplane, and nobody is asking what the details of that construction are. All we want to know is what are all the terms.

If this is such a fair deal, why do the Japanese believe it is in their interest to keep the details hidden from public view?

If it is such a great deal, why is our own side so insistent that it not be made public? Even more important, why is the Bush administration complying with the Japanese request about secrecy?

How does the administration expect to raise public support for a deal, the very details of which are being kept hidden from the American people?

The American people put $7 billion into the F-16. They paid for it. They have a right to know the facts.

It makes me very suspicious. More and more, in recent years, the cloak of secrecy is being used to hide what is either a bad deal, a major cost overrun, or a poorly managed weapons program.

You name it. If it is a bad deal, then we should not be making it. Is that the reason it is blacked out? I do not know.

Secrecy is not an appropriate way for two close allies to operate on a project that requires close cooperation every step of the way.

Secret agreements are impossible to verify, and difficult to implement down the road.

We should have the facts on the table now, before we help Japan gain an edge in yet another high technology industry.

Mr. President, I stand before you and I say that I have concluded to vote against this agreement because I do not think it is right, but if there were no other reason to vote against it, I would be prepared to vote against it because the facts are being kept from the American people.

Mr. President, I yield back the remainder of my time.

Mr. DIXON. I thank the distinguished Senator from Ohio.

Mr. President, I understand from my colleague, the manager on the other side, that the distinguished minority leader will be here momentarily to state the position of the administration as the leader on their side.

So I suggest the absence of a quorum until such time as the minority leader gets to the floor, Mr. President.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legisltive clerk proceeded to call the roll.

Mr. DIXON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LUGAR. Mr. President, I yield 10 minutes to the distinguished Republican leader, Senator DOLE.

The PRESIDING OFFICER. The Republican leader is recognized.

Mr. DOLE. Mr. President, I want to thank my colleague, the distinguished Senator from Indiana, for his efforts on behalf of the administration, and I think efforts in the right direction, to defeat the disapproval resolution.

I certainly know the frustrations. I listened to my friend from New Mexico, Senator DOMENICI, say we ought to renegotiate. Well, a lot of us think we ought to renegotiate the budget agreements, too. Nothing is perfect around here. But I assume some of us will vote for the budget conference report even though we do not think it is quite the way it should be.

I assume that all of us can find fault with the Japanese when it comes to trade, but I think we all know that we are friends and we are allies. Many of our problems are ours and many may have been caused by unfair competition.

We are all upset when we read about the noncompliance with the semiconductor agreement in 1986 that is going to cost the United States a great deal of money, some say as much as $5 billion in sales. And we are upset when we find the Japanese exclude us from the $12½ billion Japanese supercomputer market. We are upset when we cannot get some of our farm products into the Japanese market—cannot get citrus or beef. They do buy a lot of

grain, and of course they pay when they buy.

This Senator was one of the first Members of the Congress to urge our trade representatives to cite the Japanese for failure to abide by the Moss telecommunications agreement. Those violations may have cost U.S. manufacturers a couple billion dollars in sales.

But all those things are trade practices. And that is not before us today. We are going to have a chance when we get into the Super 301 violators and all those things to do a lot of talking about what we should do to make certain we have a level playing field with the Japanese on trade.

Ambassador Carla Hills has indicated she will use every weapon at her disposal to take on unfair trade barriers. Competition is one thing; unfair trade barriers are something else.

What we are considering today and what has been debated on the floor is an agreement—an agreement developed by the administration and signed and sealed by the President of the United States. It has been reviewed time and time again by experts in the Pentagon, the White House, private industry, Commerce, the State Department, and the Halls of Congress. The consensus of those experts is that this is a good deal for the United States.

Mr. President, 2 years ago Japan decided to develop and produce its own fighter jet aircraft. Perhaps we could have convinced them to purchase the F-16. The Byrd-Dole-Danforth sense-of-the-Senate amendment in July 1987 encouraged just such an off-the-shelf purchase. However, that would have been an unprecedented achievement because no other major industrial nation buys advanced fighters abroad.

In any event, that time has passed. So today we can either accept a 40-percent share of the estimated $6 billion in development and production revenues from this deal, which translates into approximately a $2.5 billion reduction in our trade deficit, or we can simply walk away. And several of our allies, I might add, are hoping we take the walk, because they are eager to take our place and make the deal with the Japanese.

Opponents of the FSX agreement argues that the deal will facilitate Japan's entry into the commercial aviation industry. No one denies Japan would like to be competitive with the United States in commercial aviation. If it succeeds and if the FSX agreement is implemented, many will point to this agreement as the reason for Japan's success. Yet many of my colleagues should be aware the Japanese Government has already entered into coproduction agreements with our major commercial aircraft manufacturers.

Moreover, the F-16 technology which Japan will receive under this agreement has only very marginal relevance to civil aircraft. In addition, the use of any technologies which are potentially sensitive, such as fire control or computer source codes, is restricted to the FSX Program. And, again, that was underscored and underlined by the Secretary of Commerce, Secretary Mosbacher, in a meeting with a number of us just about a week ago.

They cannot be transferred to commercial endeavors. That is why all major U.S. commercial aviation manufacturers support this initiative.

Finally, the administration's agreement specifies that Japan cannot enter into FSX production without negotiating a separate memorandum of understanding with the United States. So we are going to have another opportunity. We are going to have a chance to review this all again and review its final terms before production begins.

Under the existing FSX agreement, for example, the United States will supply all engines used during the development phase. When the production phase is negotiated, Congress will be able to ensure that U.S. engines are again included.

Mr. President, the FSX agreement now before the Congress is in the national interest of the United States for sound military and economic reasons.

So it seems to me for all the reasons stated by those who support the FSX—and some are experts in this matter. And I do not profess to be an expert, but I do believe that there is something to be said, as the President told many of us this morning. This agreement was made last November. It is an agreement. It was made by President Reagan. Some people complained about the agreement. It was tightened up by President Bush, but it is still an agreement with the Government of Japan and that agreement ought to be honored unless there is some compelling reason not to do so.

But the Secretary of Defense, the Secretary of Commerce, the U.S. Air Force and others have testified that this agreement will not give Japan what it takes to become an aerospace competitor. Therefore, I see many reasons to support this agreement and none, given the realities before us, to oppose it.

Mr. President, I ask unanimous consent that letters from the Secretary of Commerce, Mr. Mosbacher; the Secretary of Defense, the President's Security Adviser, and the Secretary of State be printed in the RECORD, all of which support the FSX package.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

SECRETARY OF COMMERCE,
Washington, DC.

Hon. ROBERT J. DOLE,
Republican Leader, U.S. Senate, Washington, DC.

DEAR SENATOR DOLE: I have thoroughly reviewed the FSX co-development project with Japan and have determined that proceeding with this agreement is in the best interests of the United States. I urge you to support this project for the following reasons:

The U.S. workshare will be approximately 40 percent for both the development and production phases.

Based on an estimated development budget of $1.2 billion, the U.S. development workshare will be approximately $480 million.

Based on an estimated production budget of $5 billion, U.S. production workshare will be about $2 billion.

The entire cost of the program will be funded by Japan.

The United States will receive from Japan free of charge any technology that is derived from U.S. F-16 technical data.

The United States is guaranteed the right to purchase any FSX technology developed solely by Japan.

The FSX Agreement is now structured to carefully control the flow of sensitive U.S. technologies, including flight and fire control computer software, engine and other sensitive technologies.

To assure oversight of the agreement, a bilateral Technical Steering Committee, chaired by a U.S. and Japanese General Officer, will be established to implement the provisions of the Memorandum of Understanding and to monitor workshare and technology flow issues. A Commerce representative will participate on the Committee.

As a result of the clarifications received from the Government of Japan, my initial concerns regarding this project have been satisfied, and I am confident that co-development of the FSX fighter with Japan is in the economic and security interests of the United States.

Sincerely,

ROBERT A. MOSBACHER.

SECRETARY OF DEFENSE,
Washington, DC, May 16, 1989.

Hon. ROBERT DOLE,
U.S. Senate, Washington, DC.

DEAR SENATOR DOLE: The FSX agreement with Japan has received considerable attention in recent weeks. Unfortunately, in addressing the concerns about the potential impact on U.S. industrial competitiveness, the fact that the FSX is meant to significantly enhance the mutual security of Japan and the United States in the Northwest Pacific seems to have been lost in the debate.

The FSX agreement will provide Japan with a modern support fighter to allow the Japanese Self Defense Forces to better meet their mission of defense of Japan—including the 43,000 U.S. military men and women residing there—and the sea lanes out to 1,000 nautical miles. It will do this by delivering an aircraft with longer range and more effective weapons capability for the envisioned mission than the baseline F-16 aircraft from which it was developed.

The FSX agreement, as clarified by President Bush, builds on and maintains our complementary defense policy with Japan. Failure of this agreement would encourage those in Japan who would like to see a more independent security policy vis-a-vis the

United States, and would vindicate those who advocated development of an indigenous fighter because they felt the U.S. was not a reliable security partner.

Under the leadership of President Bush, economic factors have taken a higher priority in our overall strategic thinking. I assure you that Secretary Mosbacher and I fully understand the desire in the Congress that we consider fully the economic impacts in all future negotiations of this type. We are pledged, under the guidance of President Bush, to make sure that this process reflects the proper concerns of you and your colleagues. It is my firm belief that the present FSX agreement strikes the proper balance between concerns about the future economic competitiveness of our aerospace industry and the need of the U.S.-Japan alliance for a modern fighter aircraft to meet mutual security requirements in the Northwest Pacific.

I would ask that, as you enter the final deliberations on the FSX issue, you keep in mind this balance. Clearly there is a trade imbalance with Japan. This agreement helps correct that imbalance by insuring that American firms will share in over $2 billion in the development and production of the FSX. This agreement is good for the United States, from the standpoint of national security and our economic interests.

Sincerely,

DICK CHENEY.

THE WHITE HOUSE,
Washington, May 15, 1989.

Hon. ROBERT BYRD,
Minority Leader, U.S. Senate, Washington, DC.

DEAR SENATOR DOLE: From my vantage point as National Security Advisor, the most important points in the FS-X debate are: how the FS-X will contribute to the mutual defense in the Northwest Pacific; implications of the FS-X for the American economy; and the precedent set by the FS-X review for negotiating similar agreements in the future.

At U.S. urging in 1981 Japan agreed to take responsibility for defending critical sealanes 1,000 miles outward from Japan. Under the FS-X program Japan will supply 130 advanced fighters for this mission. The FS-X will have performance characteristics not found in current F-16s, including a significantly larger combat radius which will result from extensive use of co-cured composites, an improved engine, larger fuel tanks, and a larger wing. Increased range, combined with improved air-to-surface missile capability, will allow Japan to patrol the sealanes in ways that would not have been possible with current F-16s. Japanese R&D funds, amounting to $1.2 billion, will be used to develop a plane to provide extended sealane defense without recourse to aircraft carriers. When this capability is in place, Japan's contribution to the burden of mutual defense in the Northwest Pacific will have been significantly increased.

The FS-X will contribute significantly to the American economy by providing 22,700 man-years of employment as well as $2.5 billion in relief for our bilateral trade imbalance with Japan. U.S. companies will receive a $480 million (40%) share of the development work and approximately $2 billion (40%) in production work. Sensitive U.S. technology is fully protected and Japan will not receive direct access to the state-of-the-art technology of our latest F-16s. Japan will pay R&D recoupment charges on the baseline F-16, thereby compensating the U.S. taxpayer for part of the original sunk costs of the F-16 program. Japan will also pay a royalty for every FS-X produced.

The FS-X negotiation, thorough interagency review, and subsequent clarifications with Japan have established a precedent by putting U.S. economic interests into the national security equation more explicitly than ever before. This broader concept of national security will be a hallmark of the Bush Administration.

Much of what has been written about the FS-X agreement has been either misleading or erroneous, but after careful review of all of the arguments and the resulting improvments in the terms of the deal, I believe the current agreement clearly represents the best interests of the United States. I urge you and your colleagues to support the President and vote against S.J. Res. 113.

Sincerely,

BRENT SCOWCROFT.

THE SECRETARY OF STATE,
Washington, May 16, 1989.

Hon. ROBERT DOLE,
U.S. Senate.

DEAR BOB: I am writing to seek your support for the FSX agreement and to voice my strong opposition to Senate Joint Resolution 113.

FSX represents not only an agreement between the United States and Japan but a serious effort by the Administration to respond to concerns expressed by the Congress. When the President entered office, he ordered an interagency review of FSX, with particular attention to its economic and technological implications for the United States. That review was undertaken with great care; there was no rush to judgment.

Under the FSX agreement, benefits to American workers and industry are substantial. We will receive 40% of the development work and approximately 40% of production—some 22,000 man-years of jobs and $2.5 billion for US industry over the course of the project, approximately the same return as if Japan had bought F-16's "off-the-shelf." In addition, we have full access to all Japanese technologies in the project, and we have ensured that US technologies which might have application to the civil aerospace industry are not transferred to Japan.

In examining FSX, we also kept in mind the larger dimensions of our security ties and our overall relationship with Japan. The US-Japan Treaty of Mutual Cooperation and Security is the foundation for our political and strategic relations throughout the Pacific. FSX will bolster Japan's defense capability, strengthen our alliance and help Japan assume a larger share of the common defense burden. As the first military co-development project between the world's two most technologically advanced countries, FSX sets an important precedent for future US-Japan cooperative defense efforts.

Having considered all of these factors, the President, Secretary Mosbacher, Secretary Cheney and I concluded that the FSX agreement clearly serves our national interests. I am hopeful that you will agree, and that we will be able to count on your support for the agreement and your opposition to Senate Joint Resolution 113.

Sincerely yours,

JAMES A. BAKER III.

Mr. DOLE. Mr. President, I yield back any time I may have remaining.

Mr. LUGAR. Mr. President, I yield 5 minutes to the distinguished Senator from South Carolina.

Mr. THURMOND. Mr. President, I rise in opposition to the resolution of disapproval. I want to state, however, that I do so with some trepidation. My esteemed colleagues who oppose the agreement to codevelop the FSX are sincere in their disagreement and have presented some very convincing arguments.

Mr. President, many of my constituents and considerable public opinion are against the proposal. In my heart, I understand their concerns. In South Carolina, the textile industry is a prime example of what foreign competition can do to an industry. I am against giving away technology. As my colleagues will remember, I cosponsored legislation to prevent the sale of certain military technology to China. I will continue to oppose any giveaway of technology that has the potential of being used against our country.

I believe, Mr. President, that the concerns of the American public are not only about giving away technology. My constituents and the public are especially concerned about the trade imbalance between the United States and Japan. I am also concerned over this trade imbalance. The President and the Congress have to do better in breaking down the Japanese trade barriers and ensuring fair and open trade between the United States and Japan.

Mr. President, I support the FSX agreement because it is not just a matter of technology, but also a matter of foreign affairs, economics, and defense.

I would like to quote Mr. Brent Scowcroft, national security advisor to the President, regarding the FSX program. I believe it gives the best description of this vital program:

At United States urging, in 1981 Japan agreed to take responsibility for defending critical sealanes 1,000 miles outward from Japan. Under the FSX program, Japan will supply 130 advanced fighters for this mission. The FSX will have performance characteristics not found in current F-16's, including a significantly larger combat radius which will result from extensive use of cocured composites, and improved engine, larger fuel tanks, and a larger wing. Increased range, combined with improved air-to-surface missile capability, will allow Japan to patrol the sealanes in ways that would not have been possible with current F-16s. Japanese R&D funds, amounting to $1.2 billion, will be used to develop a plane to provide extended sealane defense without recourse to aircraft carriers. When this capability is in place, Japan's contribution to the burden of mutual defense in the Northwest Pacific will have been significantly increased.

The FSX will contribute significantly to the American economy by providing 22,700 man-years of employment as well as $2.5 billion in relief for our bilteral trade imbalance with Japan. United States companies will receive a $480 million—40 percent—in pro-

duction work. Sensitive United States technology is fully protected and Japan will not receive direct access to the State-of-the-art technology of our latest F-16's. Japan will pay R&D recoupment charges on the baseline F-16, thereby compensating the United States taxpayer for part of the original sunk costs of the F-16 program. Japan will also pay a royalty for every FSX produced.

The FSX negotiation, through interagency review, and subsequent clarifications with Japan have established a precedent by putting United States economic interests into the national security equation more explicitly than ever before. This broader concept of national security will be a hallmark of the Bush administration.

Much of what has been written about the FSX agreement has been either misleading or erroneous, but after careful review of all the arguments and the resulting improvements in the terms of the deal, I believe the current agreement clearly represents the interests of the United States.

Mr. President, This is not the best agreement. I would have preferred our F-16's over the skies of Japan. This agreement, however, is in the best interest of our Nation and the good relations between the United States and Japan. I recommend that this distinguished body support the agreement.

I wish to express my appreciation to the leaders.

The PRESIDING OFFICER. The Senator from Illinois.

Mr. DIXON. Mr. President, after consultation with the distinguished manager on the other side, I ask unanimous consent that the distinguished President pro tempore be recognized for a period not in excess of 30 minutes, essentially to close for this side, reserving to the two managers 3 minutes apiece for whatever final remarks may be necessary before the vote transpires.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. DIXON. I yield to the President pro tempore.

The PRESIDING OFFICER. The President pro tempore is recognized.

Mr. BYRD. Mr. President, I thank the very distinguished Senator from Illinois [Mr. DIXON].

First, I compliment him on the excellent leadership that he has demonstrated throughout the debate. And I also congratulate Mr. LUGAR, on the excellent leadership that he has shown in support of the agreement.

There are others to be congratulated on both sides.

Mr. President, the basic problem here is systemic. Many others have already talked about it. The fact is that we do not understand our adversary in this instance. We do not understand that Japan is a people who are conservative, they are traditional, they are homogeneous and the emphasis is on the group rather than on the individual.

In the United States of America, the customer is king. In Japan, the customer comes last. In Japan, the emphasis is on what is best for the group, what is best for the nation. And the Japanese associate economic strength with national security.

We have not learned that lesson, apparently. The Japanese are a great deal like our early settlers. They stick together, they work together, they raise the barns together, they fix the wagon wheel together and they circle the wagons and take on all comers, and they win.

We put the emphasis on who has the most missiles, the most aircraft carriers, the most guns, and or economic strength is something separate and aside.

We have not yet come to realize that our economic strength is our national security and that trade is a major pillar of our economic well-being.

I will not go into the litany of the areas in the American industrial landscape over which the Japanese have become supreme. Others have done that. Others have talked at length about it. But we have seen how they have taken over industry after industry after industry: radios, black and white television sets, color television sets, computers, fiber optic cables, steel, shipbuilding.

I was a welder in the last war. I will not have to weld in the next one. We will not be building any ships. They have taken over the financial institutions. They are the leading financier in the world today. Our United States Treasury turns to Japan with knees trembling when we go out to sell our bonds. Will they buy? What are the Japanese going to do?

I do not say this to bash the Japanese. I say it to salute them; to salute them. I say it to bash ourselves; bash ourselves.

So we come, now, to the matter before the Senate. The FSX project troubles me from a variety of standpoints, most fundamentally from the perspective of how we define our national security. If we cannot compete in the world markets, how, then, can we defend ourselves on the battlefield? It is an ironic situation in which the world's largest creditor is defended by the world's largest debtor, and the debtor borrows from the creditor and pays interest on the moneys borrowed. The cart is before the horse. The Omnibus Trade Bill of 1988 made it clear that international military and economic security are two sides of the same coin. That is what we Senators said when we wrote that bill. Yet, as the FSX agreement clearly demonstrated, it is still business as usual for the Departments of Defense and State. Business as usual means deals like the FSX rise or fall on their military merits only, military merits as perceived by negotiators who are not charged with looking after the industrial and commercial interests of the United States.

Despite the congressional attempts to involve the Department of Commerce in issues of technology transfer, the Department of Commerce was not even consulted until after the memorandum of understanding had been completed, and then the horses were out of the barn.

The United States can no longer afford to conduct business in this manner. We must consider military and economic security as one and inseparable. The FSX debate is important not simply because the arrangement arrived at by our negotiators represents what appears to be an unbalanced flow of technology from the United States to Japan. It is the fundamental nature of the United States-Japan relationship itself which is at issue here today.

The debate is healthy because it is surfacing some attitudes and opinions and frustrations on both sides of the Pacific that need to be aired for the relationship to be put back onto a healthy track.

As Mr. James Fallows points out in his current article in the May issue of the Atlantic magazine, an article to which has been alluded many times here, many people think the Japanese-American relationship is so fragile that it is dangerous to talk frankly in public. It appears to me that frank talk has not only not occurred in public, it may not have occurred in our private conversations with the Japanese either. The United States-Japan relationship would be unnecessarily damaged if we continue to tiptoe around our trade problems.

There are fundamental misperceptions on what is expected from each partner in this broad-ranging alliance. We on our side do not believe every arrangement, particularly in the security arena, should be approached as a commercial contest between negotiating teams. Mutual give and take are essential for any alliance to work. From our side, we should not expect the Japanese to give up commercial advantages that are unwarranted, but we do have a right to expect the Japanese to agree to arrangements that further the mutual interests of our security relationship and further to recognize that a strong American economy enhances the strength of our mutual security, and our security is their security.

It is very important and very unfortunate that the Japanese refuse to take the opportunity of the FSX deal to take action which could have been highly beneficial for the broad reach of our relationship and instead chose to use it as one more negotiating forum to get the best deal it could to further its own commercial interests.

As Mr. Fallows points out in his article, in dealing with each other, certain of the Japanese approach this project from essentially a commercial point of view. Had they approached the arrangement as a military problem, there is no question but that they would have purchased F-16's off the shelf.

Everyone agrees. F-16's would be much cheaper than the FSX. Everyone agrees that F-16's would be available to counter the Soviet threat much quicker. Everyone agrees that a straight buy of F-16's would do more to enhance the interoperability of Japanese and American forces, and everyone agrees that purchasing F-16's would be a much more efficient use of scarce Japanese defense resources than spending billions on developing the FSX.

The Japanese also did not enter this arrangement because of a desire to improve relations with the United States. If that were their concern, then once again the logical route would have been to purchase the F-16's. The United States is the acknowledged world leader in the aerospace industry, and we have an obvious comparative advantage. We make the best, lowest cost fighter in the world and purchasing that fighter, the F-16, would have shown a real commitment from the Japanese to reduce the $55 billion bilateral trade deficit which is the source of so much of the tension between our two nations.

Neither military nor diplomatic concerns were the primary impetus for the FSX program from the Japanese point of view. I have to conclude that the primary motivation on the part of the Japanese was commercial. They are determined to build an aerospace industry. That is no surprise. It is no secret. It is the stated goal of the Japanese Government. They want an aerospace industry to enhance their industrial base. They want it to provide an internal market for their computer and electronic industries. Most importantly, they want an aerospace industry that will eventually be competitive in the world market, competitive with U.S. companies who in this field are the best in the world. I am not suggesting that we blame the Japanese for wanting to do these things. I am not suggesting that at all, but we ought to have recognized the reality of what they are doing. At least we ought to do that.

We entered this deal for military and diplomatic reasons. The Department of Defense handled the negotiations, and the very last concern was to get some real piece of the action for American industry. The Reagan administration managed to get the Japanese to compromise and to agree to a codevelopment project. It would not be as expensive nor as time-consuming as an indigenously developed Japanese fighter, and it would provide part of the work for American companies.

So it served the Defense Department's requirements, but the Japanese were negotiating a commercial deal. They kept their eyes on the ball. They know that the strongest economic system is the strongest base for a strong national security. Their perspective was fundamentally different from our own. We should have been talking from a different perspective, a commercial perspective, an economic perspective, as well as from the perspective of balancing the burdensharing in defense. Those considerations should have part of the basis for negotiation.

The Japanese depend on the United States for their defense. The United States has kept the peace now for many decades. The United States has protected the Japanese all through these postwar years. Not only that, but the United States has helped them to build and rebuild their war-torn industries. They spend only 1 percent of their GNP on their military. They rely on the United States' nuclear deterrent to protect them from the Soviet Union. They rely on the United States Navy to keep the oil flowing from the Middle East.

People tend to overlook Japan's economic dependence on the United States. We buy their products. One-third of all Japanese exports come to the United States. There has been talk about how the Japanese have financed our Federal budget deficit and, if they stop investing in the United States, our interest rates would go up.

If the United States stopped buying Japanese products, what would be the impact on the Japanese economy? Do they want to kill the goose that lays the golden egg? The United States has plenty of leverage to use in any negotiation but we tippy toe, tippy toe, tippy toe when it comes to Japan. We tippy toe even after years of experience with getting the short end of the trade deals. We tippy toe after years of having our toes stepped on by a Japanese Government that always puts the Japanese economy first and does not fret so much about the fragile United States-Japan relationship. So we do it. We keep on butting our heads against the wall.

I am reminded of the individual who kept butting his head against the wall and he was asked why. He said because it felt so good when he stopped butting his head against the wall. But we do not want to stop it. We want to keep butting our heads against the wall. When are we going to stop it so we will know how good it feels?

Instead of negotiating from our strength, we approach the talks from the perspective that given the Japanese threat to develop the aircraft alone, a somewhat dubious proposition given the state of their aerospace industry, we should be glad to get a codevelopment program of some kind. So on the basis of that assumption, the negotiators got the best they could, or best they thought they could get. They played defense when what is needed with Japan is a good tough offense.

Mr. President, our negotiators and representatives overseas have to be tough, like the Japanese are tough—what is wrong with that—in promoting United States interests. And so it had to be disturbing—I have heard others say it—to see reports as in today's New York Times where cables have been sent by our diplomatic representatives in Tokyo advocating the Super 301 provisions of the trade bill be in essence gutted. These cables advocate that Japan not be listed by our trade representative as engaging in unfair, market-closing trade practices.

The story is entitled "Embassy Asks Trade Caution Cables From Tokyo Oppose Retaliation."

WASHINGTON, May 15.—As the Bush administration approaches its first major decision on trade policy, the American Embassy in Tokyo is urging Washington to refrain from tough action to retaliate against Japan for its trade barriers.

In other words, if you walk out on the street and some guy starts cuffing you around, do not hit him back because you might make him mad.

In confidential cables to the State Department, the Embassy has warned that there could be "an emotional outburst in Japan" if the country is listed under a new Federal law as one of the worst violators of free trade principles.

That is what is wrong, our wimpy diplomats are saying to the world, "Disregard the laws that are passed by the United States Congress."

The cables from the United States Embassy provide insights into Japanese politics, Japanese-American relations and the Embassy's tendency to protect the local country—

Now get this—

from the full force of congressional displeasure over trading practices. Such consideration for the host country is not unusual among American embassies.

Japan is not the only country that would resent designation as an unfair trading partner. On Friday, Donald P. Gregg, the Ambassador-designate to South Korea, said there would be "demonstrations in the streets" of Seoul if Korea was named.

In one cable, the American Embassy in Tokyo quoted an official at the Japanese Foreign Ministry as saying that designation of Japan as an unfair trading nation, combined with recent disagreements over joint production of the FSX fighter plane, "would poison the atmosphere" for the future economic cooperation between Tokyo and Washington.

Mr. President, we cannot be driven by fear. We cannot be driven by threats of retaliation.

Our diplomatic representatives fear an emotional reaction in Tokyo. That

is spineless. That is what is wrong. We have wimpy, spineless, diplomats when it comes to standing up for the best interests of the United States of America.

We are not saying that we want to force our way into Japanese markets. We want the Japanese to have a choice. Let us be fair. They are supposed to be an ally. Let them act like an ally.

This New York Times article is a report which reaffirms my view that we need a more offensive team, not a team that walks off the playing field because the other team might get emotional. The other team might get emotional.

The FSX proposal is not by itself a horrible deal, although it was badly negotiated because key aspects were not nailed down specifically in advance of production, but it is an important symbol of the problems in our relationship with Japan. Now we must decide whether the FSX proposal should go forward. I think that the United States would be far better off in the long run if we reject the FSX package because that rejection sends the message that we believe the time has come to adjust this relationship.

The United States and the Japanese peoples are friends but friends respect each other's needs. Friends can speak frankly without walking off the field, without rupturing the friendship. The time has come for frank talk and mutual respect before the seeds of resentment that have already been sown take root.

Mr. President, I have referred to wimpy diplomats. We have a lot of brave diplomats. We have a lot of diplomats who work daily and nightly to uphold the interests of the United States, but what we read stories like the one which has already been put into the RECORD, how can we help but feel we have some diplomat's abroad who are looking out after the interests of the host country and who are suggesting that if the law is implemented that the Congress has passed it will cause demonstrations in the streets and we ought to not do it—do not list them, out of fear and trepidation. Mr. President, those are the wimpy diplomats.

The FSX debate is at bottom an inquiry over the state of our alliance with Japan and whether we can act as allies when our national security is at stake with appropriate give and take. I do not suggest that if the agreement were to be withdrawn by the United States, the Japanese would buy our F-16's. I do not suggest that.

I am suggesting that it is time we take a new look at this relationship. Some say, "Well, if we reject it, they'll build it themselves." So what?

It may take some years to build it—years and years and years. I say we should not be bent upon contributing to their becoming a world-class aerospace manufacturer.

They will become that much faster with this agreement than they will if it is rejected. Some say, well, they will go to the French or they will go to the British. Well, let them go to the French and British. Let the French and British protect Japan. Let them look to the French and the British for the protection that they get from the United States. They spend 1 percent. There is a big argument over whether .90 or .95 or .99 of Japan's GNP will be spent on defense. We spend 6 to 7 percent. If we spend 1 percent, we would not have any budget deficits. We would have plenty of money to pass around for the other needs of America.

There is also an inquiry over whether our negotiators of trade and security agreements will do what is necessary to protect and enhance U.S. vital interests because clearly our national security incorporates industrial health as a key element. Rejecting the FSX will be the right medicine to cure misperceptions by Japan over the proper behavior of an ally and refocus our negotiations' attention on what is important for United States economic health.

At some point we have to call a halt. When are we going to do it? If we keep on and keep on, it is almost too late now. Above all, we cannot be stampeded into validating bad agreements through fear of retaliation or rejection. We have to do what is right and let the chips fall as they may.

Mr. President, how much time do I have left?

The PRESIDING OFFICER. Two minutes.

Mr. BYRD. Mr. President, I ask unanimous consent for 3 additional minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BYRD. Mr. President, go out and ask those who have lost their jobs in optic fiber, cameras, computers, radios, black and white television sets, color television sets, shipbuilding, steel. Ask them how they would vote today. You will get an answer, and it will not be a wimpy answer.

Mr. President, the point here is this: We have to send a message to Japan that we are not going to take it lying down any more. And we have to send a message to our own wimpy diplomats and to our own negotiators that we are not going to take it lying down any more.

We have to send a message to the Japanese that if we are going to be allies, we need to work together, they need to be concerned about the budget deficits, and we need to clean up our own house. And I think we are beginning to get that underway. We have a President who has indicated a willingness to work with the Congress in working out budget agreements that will reduce that. So we have our own house to put in order. Again, if there is any bashing that I have done it has been intended for a bashing of our own way of doing things, and our own failure to face up to reality.

Mr. President, I think this is the place to start, here and now. This is a bad deal. And I am not going to vote for a bad deal.

Mr. President—

When you get all you want
In your struggle for pelf,
And the world makes you king for a day,
Then go to a mirror and look at yourself,
And see what that guy has to say.

It isn't your father, mother or wife
Who judgment upon you must pass.
The fellow whose verdict means most in your life
Is the man looking back from the glass.

He's the fellow to please, never mind all the rest,
For he is with you clear down to the end,
And you have passed your most difficult, most dangerous test
If the man in the glass is your friend.

You may be a Jack Horner and chisel a plum,
And think, "Boy, you are a wonderful guy,"
But the man in the glass will just say you're a bum
If you can't look him straight in the eye.

You may fool the whole world down the pathway of years,
And get pats on the back as you pass;
But your final reward will be heartaches and tears
If you cheated the man in the glass.

It is about time we stopped cheating the man in the glass, and now is a good time to start it.

I hope the Senate will support the amendment by Mr. DIXON. I intend to vote for it, and I hope it carries. I urge the Senate to vote for it.

The PRESIDING OFFICER. The managers of each side have 3 minutes to close.

Mr. BRADLEY addressed the Chair.

The PRESIDING OFFICER. The Senator from New Jersey.

Mr. BRADLEY. I ask unanimous consent that I be granted 8 minutes to speak before the managers close.

The PRESIDING OFFICER. Is there objection?

Mr. RIEGLE. Mr. President, reserving the right to object, and I will not object, I am wondering how many additional comments are going to come in here because I have not spoken. I strongly agree with the Senator from West Virginia, and if we are going to continue to debate, I have things to say as well. Is there any understanding at this point as to how much farther we are going to go here?

Mr. DIXON. May I respond to that, Mr. President? The distinguished manager on the other side and I have, frankly, been accommodating to one another during this rather passionate debate. Our relationship has been quite amicable. The fact is, all the

time has been used. There is unanimous consent for each manager to have 3 minutes. That is already an imposition upon the agreement by 9 minutes.

I have no objection to granting additional time to my friend from New Jersey. I have a request from my friend from North Dakota and my friend from Arkansas, each for a minute or two. I see the Senator from Michigan, and there are others here as well. I would like to accommodate everybody for brief moments.

I just want to state what the situation is. I think we could easily conclude it in 15 or 20 minutes in any event. But I would want to indicate to the manager on the other side, the distinguished minority leader, that while I know my friend from New Jersey is speaking against my interest, I have no objection to his speaking.

Mr. RIEGLE. Mr. President, I wonder if we are going to make an agreement, if we ought not make the agreement so we understand how much time is going to be left, and how it is going to be divided up.

Mr. LUGAR. Mr. President, may I respond?

The PRESIDING OFFICER. The Senator from Indiana.

Mr. LUGAR. The agreement is that the distinguished manager, Senator DIXON, and I would both have 3 minutes each. The request is by Senator BRADLEY for 8 minutes. I think that needs to be examined on its merits. I would object to any further extension of time. I think debate has come to a conclusion at that point.

The PRESIDING OFFICER. I have a request for time, and I ask for objection. Does anybody object to the Senator from New Jersey requesting additional time?

Mr. DIXON. May I say, as a manager on this side, I have no problem with his 8 minutes. I recognize the meritorious position of my friends from Michigan, North Dakota, and Arkansas, who would like to take a couple of minutes each. If we are going to accommodate the Senator from New Jersey, I think that their requests should also be heard. I want to make it clear, I do not object to the request of the Senator from New Jersey.

Mr. RIEGLE. Reserving the right to object, and it is not my intention to object, because I want the Senator from New Jersey to be heard, but if we are going to add 8 minutes to the debate on one side of the issue, I want some additional time added to the other side of the debate, and I wanted to be listed as one of the people on the other side of the debate. I am not looking for a lot of time. I would settle for 3 minutes. If we are only going to have one unanimous consent request agreed to and others not, that unbalances the debate, then I am not prepared to accede to that. What I am looking for is some equal measure of time here.

I want the Senator from New Jersey to be heard, but in that case, I want at least 3 minutes myself to express my view.

Mr. PRYOR. Mr. President, the distinguised Senator from Illinois has mentioned that the Senator from Arkansas is requesting time. I am not actually requesting time. I will save the Senate's time. I have just submitted my statement for the record. I thank the Chair.

The PRESIDING OFFICER. I have a request for 8 minutes to the Senator from New Jersey. Is there objection?

Mr. DIXON. Reserving the right to object, and I do not object at this time. I thank the Senator from Arkansas for his usual accommodation of everyone. That has been the history of this great Senator. The manager on the other side said we might give 8 minutes equally divided to the distinguished Senators from Michigan and North Dakota to accommodate this point of view by 8 minutes to the Senator from New Jersey. That would be accommodating from this manager's standpoint.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

The Senator from New Jersey.

Mr. BRADLEY. Mr. President, I offer my apologies to the manager of the bill for coming in at this time with a request, but I had no alternative, and I thank them for their courtesy.

Mr. President, I wish to make a few points about this issue. We have heard that what the Japanese should do is to buy an F-16—that is the answer—and that there are American jobs at stake. Well, the fact of the matter is that if the Japanese bought an F-16, they would not be purchasing an F-16 until 1995 or 1996, because the purpose of the new plane is to meet the fourth generation Soviet aircraft and to protect the sealanes out 1,000 miles from Japan.

So the argument that you should buy an F-16 will produce no jobs in the United States in 1989, in 1990, 1991 or 1992 or 1993 or 1994. That is point No. 1. If you go the F-16 route, no jobs are created in the United States until 1995, 1996 or maybe 1997. So let us put that issue aside.

The choice is between, really, codevelopment of the FSX or the Japanese development of it by themselves. That is the only choice. When the Japanese looked at their needs for the late 1990's, the early 21st century, they saw they needed an aircraft that had a shorter takeoff, greater missile loading and longer-range capability than the F-16. They decided that the F-16 was not a sufficiently capable plane, and that they should develop their own plane not only to meet their own needs but also to meet common needs, identified by the United States, for them to defend their sealanes out to 1,000 miles. So they decided to build their own plane. We then came in and said, "Do not build your own plane. Let us codevelop it with you." The decision was taken to go ahead with codevelopment. That means development in this country and more jobs in this country. To decide no, as the resolution of disapproval, would mean no more jobs. So, Mr. President, let us face the question of jobs up front.

Next, there is a fear expressed that if we go through with this deal, it will mean greater development of the Japanese aerospace industry. Mr. President, I submit that if the Japanese have to go their own way, have to develop all their research and development capabilities themselves, have to go down all those blind alleys that we have gone down from time to time and find out all those things that you find out only when you design a fighter aircraft entirely on your own, that 10 years from now the Japanese aerospace industry would be further ahead than if we codevelop it with them.

So, Mr. President, I argue that the Japanese aerospace industry, 10 years from now, will be further ahead if they develop the FSX themselves that if we codevelop it with them.

The next point: Who in Japan would like to see them develop the airplane alone? I know one company that would, Mitsubishi. In the political debate in Japan they were vociferous in saying that "We want to develop the plane ourselves; we do not want codevelopment with the United States." So here in the U.S. Senate, if the disapproval resolution is approved, we say, "Mitsubishi, you have won, you will be the prime contractor; you develop it yourself. We are out of the ball game." We are not in the room learning; we are not in the room sharing. We are out.

So, Mr. President, the next point: We have heard on this floor throughout this debate that this is a trade issue. Mr. President, the problem is a trade imbalance. The way out of that imbalance is not cutting back imports, but expanding exports. We have a provision in the trade bill, Super 301, that allows us to expand exports to Japan, to get across to the Japanese market. That is the place where we should address the trade issue, not on an agreement that was signed in 1987, delivered in 1988 by one President, reviewed and renegotiated by another President. His Commerce Department, State Department, and Defense Department all signed on the line. We should not reject the President.

Mr. President, one other point: A question has been made about the ability of Japan to protect any technology. Let me submit that post-Toshiba, the Japanese put in an export con-

trol system that is superior to the Germans or the French.

The next point: You have to consider the Japanese political situation. The entire cabinet has resigned; they are in a state of flux, different from any time since the late 1950's. This kind of disapproval on an issue of such high visibility in Japan at this critical time in their political process will have unpredictable results. I am not saying it will be a disaster or there will be a dramatic swing to nationalism. And I am not saying that the die will be cast for the Japan-United States relationship for the next decade. But it will have an unpredictable result, possibly damaging.

Mr. President, the last point I would like to make is this: We have heard a lot of talk about the Soviet Union, about how the Soviet Union might be changing. Well, I think it was Franklin Roosevelt who said that the world was divided between human freedom and human slavery.

Ever since that time we have known which side we were on. We were against Imperial Japan, the Nazis, Communist China, and the Communist Soviet Union.

But, Mr. President, what if things really are changing? What if the threat from the Soviet Union is decreasing? Then we can no longer define ourselves by saying what we are not. We have to begin to say what we are, and I know there are a lot of people in the political process in this country who will find that very disquieting. They will be reaching for an enemy somewhere. I hope that they will not be looking at Japan.

Mr. President, the fact of the matter is, this world will not have as much prosperity, will not have as much democracy, and will have more poverty if the United States and Japan do not develop a workable relationship for the next decade and beyond.

So, Mr. President, I submit that this is a vote about more than jobs, although on jobs the disapproval resolution fails. This is a vote about more than the development of an aerospace industry, although the disapproval resolution would accelerate the longer-term development of the aerospace industry in Japan. This is a vote about more than simply trade, although this resolution of disapproval would clearly exacerbate the environment for opening Japanese markets.

Mr. President, this is a vote about the future of the relationship and the prospect for prosperity and democracy in our world.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. BRADLEY. I thank the Chair.

The PRESIDING OFFICER. The Senator from South Dakota has 4 minutes.

Mr. CONRAD. Mr. President, I want to associate myself with the remarks of Senator BYRD. I believe he hit the nail on the head. I believe America needs to wake up.

One question goes through my mind over and over, and that question simply is what if the situation were reversed? What if we told the Japanese that we will not buy your cars, we will not buy your computers, we will not buy your consumer electronics, but we will allow you to share those technologies with us, and by the way, we will give you 40 percent of the action?

Would our friends in Japan sign on to an agreement like that? I doubt it.

Mr. President, free trade is two-way trade. Free trade requires each partner to purchase from the other when it enjoys a comparative advantage.

Mr. President, I believe it is time to send that message to our friends in Japan.

I yield the floor.

The PRESIDING OFFICER. The Senator from Michigan.

Mr. RIEGLE. Mr. President, much has been said in this debate, and I think many of the sentiments expressed by Senator BYRD of West Virginia are both accurate and they express the sentiments of this Senator.

The idea that we are going to solve our economic problems with this agreement I think is a very, very serious mistake and to have as a recent speaker just did here the argument put forward that because this was negotiated by the last President, who according to a column in the New York Times is about to go over and receive, if the Safire column is right, a $2 million fee for spending a week over in Japan giving speeches around that country, to feel that somehow we are obligated by a deal made by that administration or that President, I think is just wrong thinking.

Japan is taking out of this country right now every month somewhere between $4 and $5 billion net. That is the net balance in their favor out of the trade deficit, and it is running month after month after month, year after year after year, and there is no serious turn in that situation.

They are still the largest country in terms of a trade surplus with the United States, and the predatory trading practices are there in every direction.

It turns out that one of the few areas where we have a trade surplus in our balance of payments is in the sale of aircraft around the world. The people working in MITI over in Japan have seen that. They want that for themselves.

I can understand that. I can understand that kind of an economic impulse.

What I cannot understand is why this country would surrender to it and that is precisely what is being advocated here if this deal is accepted. We are surrendering in that area. And the trade deficit over time will continue to go higher.

Nicholas Brady, the Treasury Secretary, the other day said that in his view the main cause for the stock market crash of 2 years ago was when the Japanese stepped back from buying our Government securities, drove the interest rates up and helped precipitate the market crash. Others have a different view. That is his view, and I think it is a view worth considering.

The fact of the matter is we put ourselves in that position by this enormous trade deficit, and this airplane deal makes that problem worse.

It is time for the United States to stand up against trade cheating that has been going on principally by Japan but being copied by Taiwan and Korea and many others in the months since.

We just had the new Treasury Under Secretary candidate before the Senate Banking Committee. He admitted in public testimony that he has been told he cannot even show up in Korea to discuss this issue because of the fact that the United States is finding itself more and more pressured by our so-called allies who are not allies in the area of the kind of trading practices that we see.

So this country ought to say "No" to this deal and we ought to say "Yes" to developing the economic strength of this country.

There is an enormous amount at stake here in terms of jobs and in terms of just our ability to continue to exercise control over our own economic destiny.

If we continue to bend over backward in these kinds of deals and tiptoe around and give away the strategic strength of this country, we will reach a point of no return, and we are very close to that today.

The New York Federal Reserve Board estimates that as a nation we are going to owe the rest of the world a trillion dollars by 1992, and it is precisely based on deals like this, of caving in to foreign pressure. There is always a reason—political crisis in Japan, deal negotiated by the last administration; we really cannot do anything about it.

We can do something about it. The people of this country expect us to do something about it, and that is why we ought to pass the resolution of disapproval by the Senator from Illinois.

The PRESIDING OFFICER (Mr. CONRAD). The Senator's time has now expired.

Mr. DIXON. Mr. President, would it accommodate my colleague if I went first?

Mr. LUGAR. Fine.

The PRESIDING OFFICER. The Senator from Illinois.

Mr. DIXON. Mr. President, this has been at times a passionate and vitriolic debate.

My colleague on the other side, the distinguished senior Senator from Indiana, throughout the debate in his usual fine sense has been a perfect gentleman. I thank him for the kindness he has extended to this Senator and the many courtesies over the years that I have been here on the Senate floor and dealt with him are brought, I think, into fruition in this debate. He is in every sense a fine Senator, and I thank him for his courtesies.

Mr. President, this deal was a secret deal negotiated mostly in the dark. The debate on it that has dissected the deal shows that it is a bad deal for America. Last year, we had a $54 billion present trade deficit with the Japanese but in the one thing where we have a surplus, a $19 billion surplus, in commercial aviation and aerospace, we want to give it to them on a silver platter.

I say "buy the F-16" and for those who come here and say that horse is out of the barn, for those who come here who say the deal is done, I say if they will not buy the F-16 we will not buy their cars, their cameras, their color TV's, and their telephones, and the other things that are part of an honorable exchange in commerce between two great nations.

This, Mr. President, is a tragically flawed deal for America, and the Lexington Herald Leader of Thursday, May 11, 1989, is right when it says "The 'S' in FSX stands for sucker."

Mr. President, vote for this resolution and send a message to the world that Uncle Sam is tired of being the sucker.

The PRESIDING OFFICER. The Senator from Indiana is recognized.

Mr. LUGAR. Mr. President, I thank the Chair. I thank the distinguished Senator from Illinois for his courtesies and for his strong leadership in this debate.

Mr. President, many of the speeches today understandably have been filled with emotion. The distinguished Senator from Illinois, the manager of this bill, the Senate President pro tempore, Senator BYRD, the distinguished Senator from Michigan, who we just heard, have said let us send messages, send messages to the Japanese we are not going to take this lying down anymore, send messages we are not going to cave in, send messages this is a bad deal made in secret.

In understand the sense of their frustration and their emotion.

Let me, Mr. President, at least as calmly as I can, assess the fact that we have a very serious vote ahead for our country in the next few minutes.

The distinguished Senator from West Virginia [Mr. BYRD] put the issue of the relationship with Japan very well. It was his view, as I heard him, that we are at a crucial point with the Japanese, that this is the time and this is the vote where we make a significant break with our allies.

The distinguished Senator said that in the event we break off on this deal and the Japanese strike a deal with the British or the French, that they should tell the British and the French to defend them. If we break off the deal and they go alone, the distinguished Senator said, let them go alone. Other Senators have suggested that it would take them a long time to go it alone and that it would cost them more money to go it alone. There would be penalties for them down the trail, that we would teach them, we would give them a lesson, we would not cave in again and, in this decisive vote, we will tell them literally where to go; namely, go by yourselves and produce a plane on your own.

Mr. President, this is not the time to reorder the entire relationship with Japan. That is a serious job for the President of the United States, working with the Congress. It is a job that must be done. This particular deal is for an aircraft. It is our opportunity to shape that aircraft deal, to shape that aircraft industry, to stay with Japan, to stay with our ally, and to obtain $2.5 billion of business and the jobs that are attendant to it. Otherwise we get no jobs. We need to continue to impart some confidence in the countries of the Far East that we know what we are about, that we have a sense of responsibility and a sense of mission.

It is a serious vote, Mr. President, about our relationship with Japan. And I, for one, believe the relationship should continue. I think peace in the Far East depends on that relationship continuing. So Senators have an important vote. They can send messages and they can break the relationship and they can tell the Japanese where to go and throw them into the arms of others or to tell them to rely on their own resources. But that, I believe, Mr. President, will be historically a very bad mistake and very shortsighted at a time when Senators want to vent their emotions, as opposed to depending on their intelligence and their sense of statesmanship.

Mr. President, I ask that the Senate reject the motion of disapproval and support the agreement that our President has negotiated.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. DIXON. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficent second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Illinois [Mr. DIXON]. The yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from New York [Mr. MOYNIHAN] is necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber who desire to vote?

The result was announced; yeas 47, nays 52, as follows:

[Rollcall Vote No. 66 Leg.]

YEAS—47

Adams	Ford	Metzenbaum
Baucus	Glenn	Mikulski
Biden	Graham	Mitchell
Boren	Grassley	Nunn
Breaux	Harkin	Pressler
Bryan	Heflin	Pryor
Bumpers	Heinz	Reid
Burdick	Helms	Riegle
Byrd	Kasten	Rudman
Coats	Kerrey	Sanford
Conrad	Kerry	Sarbanes
D'Amato	Kohl	Sasser
Dixon	Leahy	Shelby
Dodd	Levin	Simon
Domenici	Lieberman	Wilson
Exon	McConnell	

NAYS—52

Armstrong	Gore	McClure
Bentsen	Gorton	Murkowski
Bingaman	Gramm	Nickles
Bond	Hatch	Packwood
Boschwitz	Hatfield	Pell
Bradley	Hollings	Robb
Burns	Humphrey	Rockefeller
Chafee	Inouye	Roth
Cochran	Jeffords	Simpson
Cohen	Johnston	Specter
Cranston	Kassebaum	Stevens
Danforth	Kennedy	Symms
Daschle	Lautenberg	Thurmond
DeConcini	Lott	Wallop
Dole	Lugar	Warner
Durenberger	Mack	Wirth
Fowler	Matsunaga	
Garn	McCain	

NOT VOTING—1

Moynihan

So, the amendment (No. 102) was rejected.

Mr. LUGAR. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. DOLE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. Under the previous order of the Senate, the Byrd amendment is now before us. There is 1 hour equally divided under the control of the Senator from Indiana and the President pro tempore.

The Senator from West Virginia.

Mr. BYRD. Mr. President, I thank the Chair. Let me say again, I congratulate both managers. I congratulate Mr. DIXON and I congratulate Mr. LUGAR on the excellent leadership that both gave on the matter in connection with which we have just voted.

I listened to my distinguished friend from Illinois as he closed the debate. Let the RECORD show that this Senator does not propose severing the relationship with our ally. This Senator has

not proposed severing our friendship, but this Senator is saying there is a lot of anger out there in the hills and valleys and plains and plateaus and mountains of America, and the sooner the Japanese recognize it and the sooner our own negotiators recognize it, and start talking frankly and understandingly with one another then the better off our mutual relationship will be.

Mr. President, the amendment I have offered is intended to enhance the protection of vital American technology in connection with the FSX deal to closely monitor the codevelopment project as it proceeds to establish key congressional areas of interest in how the coproduction arrangement is later developed and finally to establish a better system of looking out for American industrial, commercial, and competitive interests when we negotiate and implement transfers of technology for military purposes.

This amendment is intended to be a constructive contribution to the FSX project to strengthen the benefits, hopefully. It is not intended to kill the project, that is for sure. The Senate has already voted on that proposition. It does not require the renegotiation of the memorandum of understanding. It is not intended as harassment of either the administration or of the Japanese. It will not delay the implementation of the project. So it is not a killer amendment. It does not impose any limiting conditions on the parties that have not already been clearly understood.

The debate on the FSX has pointed out not only that it was negotiated without due consideration for U.S. industrial base and competitive concerns in mind, but also that the imprecision and vagueness on key aspects of the deal could potentially lead to future misunderstandings and rancor between Japan and the United States.

There are areas of uncertainty that might well be cleared up now, and it is my hope that this amendment will help to give our negotiators additional leverage with their Japanese counterparts when the crucial details of the future memorandum of understanding is negotiated several years from now.

There is a second MOU that has to be negotiated. That is what we are looking at. I was gratified to see reported on this past Saturday, May the 13th, that our Special Trade Representative, Mrs. Hills, has publicly indicated that the provisions in the omnibus trade bill, particularly the Super 301 provision, have had the salutory effect of giving the administration additional leverage with our trading partners to begin correcting the market distorting mechanisms that are inhibiting American access to their markets, and that is constructive leverage. In the same vein, I hope and intend that this provision on the FSX project will provide constructive leverage for our negotiators.

There should be no illusions about the long and tough negotiations that lie ahead for U.S. negotiators on this matter with the Japanese. That unfortunately is the history of our relationship with Japan on all matters dealing with high technology, whether they are for our mutual security interests and benefit or not.

First, the amendment prohibits in the context of the production memorandum of understanding, the transfer of vital jet engine technologies to the Japanese. We all can sympathize with the American members of the codevelopment team. In such a situation, there begins to develop a team spirit and the members of the team would naturally want the project to succeed. However, in desiring it to succeed, there can be a temptation to transfer technologies to the other side that were not contemplated in establishing the parameters of the deal.

There have been indications that such behavior has occurred in connection with coproduction deals with the Japanese in the military area before. This engine technology prohibition is designed to make it clear that such transfers, which the administration has told us will not be allowed, just will not occur under any circumstances.

In addition, there is a provision in the amendment which would not permit the Japanese to sell or transfer the FSX aircraft or technology to third parties. No one expects the Japanese to turn this system into an export item, and this provision simply makes it impermissible for the Japanese to use the specific systems they are getting from us to enter the international market.

Those two items are mandatory. In addition, there is a provision which makes it the sense of the Congress that, in the MOU for production, no less than 40 percent of the workshare of the aircraft, including the value of the lifetime costs of the aircraft, be allocated to the American manufacturers. Since the development costs are allocated specifically to give 40 percent to the U.S. manufacturers, it seems logical for the production allocation to be the same. Indeed, the United States has long pressed the Japanese to be specific on this point and not to leave the allocation up for future negotiation after the United States has transferred the vital technologies in connection with the aircraft's development to the Japanese. Indeed, Secretary Baker tried to get the Japanese to agree to a 40 percent share in his trip to Tokyo this year, but he was turned down. Even in the so-called clarification of the FSX project in Ambassador Matsunaga's letter, the best we could get is approximately 40 percent of the production work to go to the United States.

What does "approximately" mean? What do the Japanese think it means? They and we do not agree on the definition of the word "open," so perhaps we do not agree on the word "approximately."

This simply invites further negotiation with tenacious and unyielding Japanese negotiations, spelling, in boxcar letters, trouble ahead. I think the Japanese ought to know that the Congress wants a 40-percent floor, and wants a fair allocation of this type to be extended to the whole weapons system, including the highly valuable future market in spare parts. Spare parts have not been addressed specifically in this deal so far, and I think this leaves an important area without needed specificity and certainty.

Mr. President, I am hopeful that congressional involvement in this situation can enhance U.S. leverage in this deal as it is implemented and in connection with negotiating the MOU for production. Therefore, I have included a requirement for periodic GAO reports on the progress of the development project. This is particularly important considering the unique nature of this arrangement. The United States has engaged in numerous coproduction projects over the years with various allies, including coproduction of the F-15 with Japan, but this is the first time we have codeveloped a major weapons system. Codevelopment means significantly closer cooperation and sharing of technological expertise. Monitoring the progress of this arrangement will be extremely important. GAO has already been actively involved and is knowledgeable on the parameters of the arrangement. It has already been reporting to Congress on it, and I would require that it continue to do so.

Last, Mr. President, we have included in the negotiations of these valuable transfers of U.S. technology an institutional way to protect our industrial base. Japanese motives in negotiating the FSX have been discussed at length in this debate. I will not belabor them here, except to say that it would be foolhardy not to be vigilant in protecting our aircraft industry and the vital technologies associated with it. Therefore, I have joined with Mr. DANFORTH in constructing a provision which gets the Commerce Department into the loop on these arrangements. This provision in my amendment is designed to be related specifically to the FSX deal, but I would hope it will be extended, during the debate on the DOD authorization bill this year, to all such weapons transfers. In some cases, the commercial considerations of such arrangements can have such a deleterious effect on our competitive base that it would be foolish to go for-

ward. Many Senators believe this to be the case with the FSX, partly because the deal was negotiated without the participation and knowledge of officials in the Commerce Department who could have raised early red flags on what was contemplated to be transferred. So, as the deal is implemented, this provision gets Commerce into the act.

Mr. President, we have to start asking ourselves some basic questions about our relationship with Japan. How much longer can we continue to subjugate United States interests to Japanese economic hegemony? How much longer can we tolerate these huge trade imbalances? How much longer can we continue to afford to defend Japan or anyone else if we allow our economy and our industrial base to wither? How much longer will the American people tolerate watching American jobs leave our shores? In my view, Congress must continue to take an interest in any agreement which affects U.S. competitiveness and jobs. My amendment intends to contribute to the viability of this deal and future agreements of this kind. This Nation needs to get our economic relationship with Japan on a saner and sounder track. We have to start considering the interests of the United States of America first. We have to go to the negotiating table with a full deck to make sure that the hand we deal ourselves is a balanced one. The amendment I have offered is a step in that direction.

The PRESIDING OFFICER. Who yields time?

Mr. LUGAR addressed the Chair.

The PRESIDING OFFICER. The Senator from Indiana is recognized.

Mr. LUGAR. Mr. President, I appreciate the reasoning of the distinguished Senator from West Virginia as he has presented an important amendment. Certainly the work that he has performed in the drafting of this amendment, the collaboration with the distinguished Senator from Missouri, Mr. DANFORTH, is evident, as are the considerations of the participation of the Department of Commerce. It presents a general overview of what we ought to do in negotiating these agreements. These are points that should come forward in the debate, and they have been well presented.

Let me just say, Mr. President, I will oppose the amendment offered by the distinguished Senator from West Virginia because I believe this amendment and the refinements of these agreements are an unfortunate intrusion upon the negotiating powers of the President of the United States.

I make this point not to be contentious with regard to the specifics of participation by the Department of Commerce in discussion of trade agreements, but simply to point out that the Secretary of Commerce is appointed to his position by the President of the United States. He is a part of the President's Cabinet.

It is the intent of the amendment, as I read it—and I quote—

* * * the Secretary of Commerce may request a review of the agreement. If, as a result of the review, the Secretary of Commerce determines that the strategic commercial interests of the United States are not being served, the Secretary of Commerce shall recommend to the President any modification to the agreement he deems necessary to ensure an appropriate balance of interests.

Then it goes on to say:

The President shall consider the recommendations of the Secretary of Commerce concerning—

(A) the commercial implications of any such memorandum of understanding or related agreement, and

(B) the potential impact on the international competitive position of United States industry,

in determining whether such memorandum of understanding or related agreement shall be implemented or agreed upon.

Mr. President, this may be a subtle criticism of the current administration. Maybe it is general judgment on how Government works. There may be a suggestion that the Secretary of Commerce is so remote from the President of the United States who appointed him that by law the Congress of the United States must mandate that the Secretary have the opportunity to request a review and even stipulate the reasoning of the President in taking a look at the product of that review.

I submit that in a normal executive line chain of command the President of the United States obviously would call upon those who are important in any understanding. He would ask them for their points of view and he would think carefully about what they have to say.

But ultimately, the President of the United States negotiates on behalf of our country. He has done so in the case of the FSX deal with Japan. Two Presidents have negotiated—President Reagan and then President Bush, and we have been debating President Bush's product today.

I submit that the logic of the situation is that after that negotiation is completed, the President of the United States gives formal notification to the Congress. In this case, the President of the United States has suggested that the Congress of the United States ought to consider the product of his negotiation, and that in a 30-day period we have an opportunity as Members of the Senate and the House, if we act upon a resolution of disapproval, to indicate our disapproval. He has furthermore the ability to veto that resolution of disapproval, and thus commit the United States to the negotiations that he commenced, and therefore will complete.

This afternoon we have faced that issue in a very important vote. By a vote of 52 to 47 the Senate of the United States voted down the resolution of disapproval. It approved the product of President Bush's administration. In this case the President was not a distant person with regard to all of this—a third party who did not know about the agreement. The President of the United States actively has asked Members of the Senate to support him in his agreement.

The Vice President of the United States in fact on this very day just down the hallway asked Senators, and when they refused to respond affirmatively to him, in fact argued with them the merits of this. This is hands-on Government with President George Bush and Vice President DAN QUAYLE actively involved in negotiating an agreement.

Furthermore, we know from testimony before the Foreign Relations Committee that Secretary Mosbacker, the Secretary of Commerce; the deputy Secretary of State, Mr. Eagleburger; the Secretary of Defense, Mr. Cheney—all testified that they had not only been involved but they enthusiastically support this agreement that the Senate affirmed this afternoon by a vote of 52 to 47. This is very hands on. In fact, all three sat together in front of the committee at one time. They heard each other's testimony. Members of the committee who were present heard that testimony directly.

Mr. President, there is no doubt that this administration wants this agreement. In fact all of the major Cabinet officials have been consulted, and all have argued and all have affirmed that they want this agreement. And the Senate has voted to support the President's negotiations.

Now we come to an amendment which suggests that somehow or other, additional conditions ought to be applied, or stipulates that the Secretary of Commerce, for one, ought to be involved. And, Mr. President, I suggest this is redundant, and could in fact impinge upon the powers of the President of the United States. The drafting of the amendment uses words such as "sense of the Senate" on occasion so that perhaps one could consider this an editorial comment after the fact, a memorandum for the future but this is serious business, Mr. President.

I suggest that there is no good purpose served by adopting an amendment which comes after the fact of the Senate's action which affirms the agreement the President of the United States, the Vice President, and relevant Cabinet members have all testified they want and have asked personally the Senate to affirm, as we have today. For these reasons, Mr. Presi-

dent, I ask tht the Byrd amendment be defeated. I am hopeful that the slate will be clear as we end the day, that support for the President and his agreement will be absolutely clear, not only to him, the American people, but to all abroad who looked to this body for leadership.

Mr. DIXON addressed the Chair.

The PRESIDING OFFICER. Who yields time?

Mr. DIXON. Mr. President, will my friend from West Virginia yield time to this Senator?

Mr. BYRD. How much time does the Senator wish? Ten minutes it is.

The PRESIDING OFFICER [Mr. SIMON]. The Senator from Illinois is recognized for 10 minutes.

Mr. DIXON. Mr. President, I rise in support of the amendment by my distinguished friend, the senior Senator from West Virginia. This amendment to the Dixon resolution will change the resolution of disapproval to a resolution of approval with very tight constraints.

What this resolution of approval says is that all of the things that were said against this memorandum of understanding are essentially correct. This amendment that would amend the memorandum of understanding guarantees that the United States of America will get 40 percent of the value of all work, not just in the development of the first six airplanes, but all work in the coproduction process that will go on for years and years. That is a very good amendment.

This amendment says that every year the General Accounting Office will report to the Congress on the implementation of the FSX agreement signed on November 29, 1988, and further says that the Secretary of Commerce, who was denied his part in all the negotiations process up until this year, will be part of the process in the future.

I might say to my friend from West Virginia, and to my friend from Missouri who I see on the other side of the aisle and others, that I cannot think of anything more fundamentally important in the future in what we do dealing with the Japanese than seeing to it that the Secretary of Commerce is an integral part of the process at all times.

I will offer shortly when this time has expired an amendment to the amendment of my friend from West Virginia, and I think he is amenable to, that would simply say when the reports are filed on an annual basis with the Speaker of the House for the committees of the House, that in addition to the filing with the Foreign Relations Committee in the Senate, the report should be filed with the Armed Services Committee, the Commerce Committee, and the Banking, Housing, and Urban Affairs Committee which has jurisdiction over the Export-Import Administration Act.

I think that will make this a very strong resolution of approval concerning this memorandum of understanding, and all of the letters of clarification that took place.

Permit me to say this, Mr. President: The administration may in the end, I say, be more compromised by what we do in this resolution of approval with tight constraints that it would have been in the adoption of the resolution of disapproval that received 47 votes because I think it is entirely possible—I congratulate my friend from West Virginia when I say this—that we can receive sufficient support in the U.S. Senate and later in the whole Congress, certainly in the House, to have the necessary two-thirds vote to override an expected veto by the President of the United States. By passing this legislation, the Congress will send the strongest possible message about the fact that this entire memorandum of understanding and the exchange letters, done in the dark, mostly flawed, was against the best interests of the United States of America.

I just want to say this in conclusion: In my support of this amendment, I think we have sent a very strong message. No one would have believed that this Senator's resolution of disapproval would receive 47 votes. I think it is a powerful message to the country and a powerful message to the world, and a powerful message to Japan, that we feel that this is a terribly flawed agreement that our Nation has entered into with the Japanese. I think that when this resolution is adopted with the Byrd amendment—and I believe it will be—that when it goes to the House, it will be strengthened even more, to protect the interests of this country in connection with an outrageous, bad deal, poorly done from the beginning, and against the best interests of our country.

I am delighted to support this amendment. I thank the Senator from West Virginia for his valuable input. I think in the 9 years that I have been here, his speech today was the most magnificent speech that I have heard in this place, a barnburner, by anybody's standards; and I think his contribution on this amendment is an important contribution, to bring about the kind of message here in the Congress that may very well be the kind of message that this administration and our friends in Japan cannot ignore. I am delighted to support the amendment and to offer, at the conclusion of the major debate on this amendment, a perfecting amendment by this Senator that will bring all the jurisdictional committees in the U.S. Senate into the approval process, along with the Foreign Relations Committee.

I yield back whatever time remains.

The PRESIDING OFFICER. Who yields time?

Mr. DANFORTH. Will the Senator from West Virginia yield 3 minutes?

Mr. BYRD. I yield 3 minutes.

Mr. DANFORTH. Mr. President, I strongly support the amendment offered by the Senator from West Virginia. I think that this is very, very important to the trade policy of the United States.

I want to make it clear to Senators on our side, who, when they see the name of the Senator from West Virginia on legislation, say, "Oh, this must be some sort of plot by the other side of the aisle." The core of the amendment that has been offered by Senator BYRD is legislation that I introduced with his cosponsorship some months ago about the whole process of entering into memoranda of understanding.

Mr. President, the question before us is whether the Commerce Department, which should be the guardian of America's commercial and industrial interests, has a place at the bargaining table when we enter into high-tech, very important deals with other countries. The basic problem with the FSX negotiations from the beginning was that this was something that was brought about by the Department of Defense, with zero input from the Commerce Department and zero input from the U.S. Trade Representative—none. It was not until the beginning of the Bush administration that they had any role to play at all.

Now the question is, will they have a continued role to play? Repeatedly, the administration has been asked whether they will agree in a written statement to a continuing role by the Commerce Department with respect to the memorandum of understanding for production. Repeatedly, the answer has been, no, to a formal assurance. Therefore, it is absolutely essential for the Congress of the United States to speak.

The FSX deal is going to go forward; there is no doubt about it. But, Mr. President, we cannot, as a country, continue forever to make significant deals with Japan and other countries, with no one sitting at the table who has any interest in the industrial and commercial future of the United States of America. That is why the Byrd amendment is essential.

The PRESIDING OFFICER. Who yields time?

Mr. ROCKEFELLER. Will my distinguished senior colleague yield me 4 mintues?

Mr. BYRD. Yes.

I thank the distinguished Senator from Missouri, and I also appreciate his cosponsorship and the leadership he has consistently shown.

How much time does my colleague wish?

Mr. ROCKEFELLER. Four minutes.

Mr. BYRD. I yield 4 minutes to the Senator from West Virginia.

Mr. ROCKEFELLER. I ask to be added as a cosponsor of this resolution.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROCKEFELLER. I voted against the resolution of disapproval, as I stated earlier in the debate, because I believe that going forward with the FSX arrangement is a positive and a good idea. It is also in the best interest of the United States that we obtain every possible advantage and clarification that we can. Japan must understand—and surely they will after this debate—that the Senate of the United States is apprehensive about the concept of reciprocity and fairness with respect to trade.

This resolution includes the sense of the Senate that the MOU for coproduction of the FSX should specify that the U.S. share shall be not less than 40 percent. In other words, not approximately, but at least 40 percent. That is a very important improvement.

Secondly, the resolution calls for that minimum 40-percent figure to apply not only to the initial production of the FSX, but also to spare parts and other support items over the life of the entire system. The exchange of letters, on the other hand, between Secretary Baker and Japanese Ambassador Matsunaga, applies only to the production phase. Postproduction procurement will vastly surpass the value of initial production.

We should do everything possible to assure that we secure the maximum sales possible throughout the second phase.

Mr. President, this resolution tasks GAO with periodic reporting on FSX implementation. We are really saying that we will be watching. The Congress of the United States will closely watch the implementation of this memorandum of understanding.

Finally, this resolution speaks to provide a firmer institutional role for the Secretary of Commerce when we negotiate and implement this type of agreement. This is truly critical to our national interest.

I have been appalled by our Government's lack of understanding about the negotiating process with Japan. Reaching a signed agreement, in the American way, is equivalent to completion of the deal; with the Japanese, it is only a first part, a first step. The implementation phase is extraordinarily important. We do not have negotiators that stay year in and year out; ours change. Administrations come and go. The Japanese negotiators, on the other hand, stay year in and year out, and they build up tremendous expertise. We must commit resources of people, attention, and commitment to the implementation phase of this agreement.

Our Government must begin to learn how to deal with Japan. I think the discussion in this body today will help. The adminstration should learn the concerns we in the Senate have, and it should also be useful to the Japanese understanding. They must understand that bilateral trade is an extraordinarily important item on the agenda of the United States Congress.

I commend my senior colleague for his initiative and encourage all my colleagues to join him and join me in supporting this resolution.

Mr. BIDEN addressed the Chair.

The PRESIDING OFFICER. Who yields time?

Mr. BIDEN. Will the Senator yield me 30 seconds for a unanimous consent request?

Mr. BYRD. I will be glad to.

Mr. BIDEN. Mr. President, the FSX deal that we have been asked to support by the administration is fundamentally flawed, and has been from the very start.

It is fundamentally flawed because is is based on a faulty premise: That if we don't agree to the FSX deal, Japan will go off and develop a fighter on its own, possibly with the assistance of the Europeans.

Starting from that premise, I suggest to my colleagues, placed us in a losing position from which we could not recover. Any leverage we might have had went out the window, and the advantage in the negotiations shifted to Japan.

This is a bad deal, both from an economic and military standpoint. And it raises fundamental questions about the United States-Japan alliance which I believe are worth examining.

AN OFF-THE-SHELF DEAL—WAS IT POSSIBLE?

The Bush administration contends that this deal is much improved from the original FSX agreement signed by the Reagan administration. That may be so. But even if it is, the question remains, why are we doing this in the first place?

When this issue first arose, the United States attempted to sell American fighters off-the-shelf to Japan, which required a successor to its F–1.

Indeed, it was logical for us to do so, since we make the best fighters in the world at the cheapest price. In fact, we are the world's leader in the aerospace industry, which last year had a $17.8 billion surplus.

But Japan rejected this approach, and insisted on domestic development of its own aircraft. In doing so, Japan sent a very strong signal to the United States: Our market is not open to your finest products.

The administration now contends that an off-the-shelf purchase was never a likely option in the first place, arguing that most industralized nations develop their own fighter aircraft, and thus it was not realistic to expect Japan to buy ours.

But most nations, to be sure, do not have a enormous trade imbalance with the United States. And most nations spend more than 1 percent of GNP on defense.

In rejecting an off-the-shelf purchase from the United States, Japan sent another important signal—they're not interested in helping to bring down the United States trade deficit.

Last year our trade deficit with Japan was $55 billion, over 40 percent of our overall deficit. Deficits of that size are not just unsustainable, they are intolerable.

Of course, some blame for our trade problems lies here at home:

In our failure to address the budget deficit;

In the declining competitiveness of American companies; and

In the failure of many United States companies to try to penetrate the Japanese market.

But let's be honest—Japan must shoulder some of the blame as well. Their trading practices in various sectors are unquestionably unfair.

When pressed to buy American products, the Japanese often say that our goods are inferior, and that the Japanese people don't have confidence in American workmanship.

That excuse doesn't wash with our fighters. Had they bought our planes as we asked them, Japan would have purchased not only terrific fighters, but also an enormous amount of goodwill in this country on the trade question.

The argument has also been made that the FSX will have a unique mission, and that none of the U.S. planes could have fulfilled that mission.

But this argument cleverly obscures the fact that Defense Department officials went to Tokyo early on and told Japan that any of three American planes—the F-16, the F-15, and the F-18—could fulfill Japan's mission.

And the "unique mission" argument is just a smokescreen, and for the Japanese, a familiar one. In fact, they have been using the uniqueness argument for a long time to keep out our commercial goods.

The mud in Kansai Bay is unique, so American construction firms can't build Kansai airport. Japanese rice is unique, so they can't import United States rice. Japanese intestines are unique, so they can't eat United States beef. And so on.

The truth is that any one of several United States fighters, with only minor modifications, can fly the so-called special Japanese mission.

IS IT SOUND MILITARILY?

Let's assume for a moment that the FSX is a good deal.

A fundamental question then ought to be, is it sound for our mutual de-

fense? And it's here that I come up with a lot of question marks.

First, one can argue that Japan needs new fighters now, not 8 or 10 years from now when the FSX will be deployed.

The FSX replaces Japan's F-1, a domestically developed plane which hasn't been terribly successful. Indeed, in the early 1980's, the Japan Defense Agency was worried that the F-1 avionics were already obsolete, and that the airframe was suffering from metal fatigue.

Given the substantial Soviet buildup in the Far East, it makes sense that Japan should have bought United States planes to fill this gap.

Proponents of FSX dismiss this notion, arguing that because of a backlog of orders at General Dynamics, the F-16's wouldn't have been deployed until 4 or 5 years from now.

But that argument cleverly ignores the fact that Japan began considering a replacement for the F-1 in the mid eighties. Thus, if they had bought our planes then as they should have, the new fighters would be in operation today.

A second question mark militarily is the interoperability of the FSX with other U.S. assets in the region.

Interoperability is a key procurement strategy—the ability to use similar parts on different assets.

The administration has argued that because the FSX will be based on the F-16, it will thus be interoperable with U.S. assets in the Far East.

Last week Secretary Cheney testified before the Foreign Relations Committee that "Fueling and some ground support will be compatible, as will certain maintenance functions."

But what he didn't say is that the FSX will carry different weapons. And I am not reassured by his qualifying remarks about ground support and maintenance.

The final question mark about the FSX's military efficacy is that it will drain scarce resources from the mutual defense.

As everyone knows, Japan limits its defense spending to 1 percent of GNP. I support this policy. I am not eager to see Japan become a military power.

But the FSX will cost Japan two to three times as much as buying American. Maybe more, because the cost estimates for the FSX are just that—estimates—and the final costs could be much higher.

Japan has every right to spend this money. But because of Japan's ceiling on defense spending, they will then have less funds to devote to mutual defense projects.

What does that say about Japan's commitment to our mutual defense?

WHAT DOES THE UNITED STATES GET IN RETURN?

The next question that we should raise in examining this agreement is what the United States will obtain in return. For it seems only logical that the United States must not enter agreements unless they are mutually beneficial.

What will we get in return? The proponents of FSX argue that Japan has developed technology which will be applicable to our next generation fighter.

Specifically, these two technologies are in composites and phased-array radars. However, it is not clear that the United States will reap significant benefits from these technologies. Because the simple truth is that the United States has been involved in these fields for years, and is ahead of Japan in both of them.

An official from Hercules Aerospace in my own State of Delaware told a House Committee: "The United States is the indisputable world leader in the field of carbon fiber composites."

A preliminary study by the General Accounting Office reached the same conclusion: "The United States is superior to Japan in composites technology and appears to be ahead in radar development."

The argument by FSX proponents has now been refined. It's not that Japan is ahead in these technologies, the argument goes, it's that their manufacturing processes may be better than ours.

But this too is a smokescreen. The fact is we are really not sure what the Japanese have, but we are dying to find out.

And why not? I don't doubt that the United States would gain by seeing what Japan has accomplished in these fields.

But do we need the FSX deal to do it? We already have an agreement with Japan, reached 6 years ago, to share military technology.

Unfortunately, it has not worked very well. But perhaps we have not tried hard enough to make it work.

FSX proponents say that the agreement will ensure that new technology will flow back to the United States.

But if little technology has flowed back under the 1983 agreement, how can we be sure that it will under this one?

WHAT WILL JAPAN GAIN?

It is important to keep in mind what Japan hopes to gain from the FSX deal.

Japan has targeted aerospace as a key technology for the 21st century. They have made no secret of this.

The fact that Japan is willing to spend billions on a grossly inefficient production run—just 130 planes—should tell you that their primary goal in the FSX deal is not improved military capability, but increased potential as an aerospace manufacturer.

And while it is not clear that this military technology will be applicable to commercial aviation, one thing is clear: Even if we protect all of our key technologies, the FSX will allow Japan to advance on the learning curve in aerospace.

A whole generation of Japanese engineers will gain vital experience in building a state-of-the-art fighter, from drawing board to assembly line. In addition, Japan will build up its production base in aviation.

There is no reason why they should not. There is also no reason why we should help them.

My point is simply this: the United States holds the lead in aerospace technology. It is our number one manufacturing export. Why should we make an agreement that potentially threatens that lead?

PREVIOUS AGREEMENTS WITH JAPAN—A LESSON FOR FSX

When considering the FSX deal, it is instructive to look back at previous coproduction agreements with Japan.

In 1978, the United States and Japan agreed to coproduce the F-15. The agreement listed those technologies which would not be releasable for national security reasons.

According to a 1982 report by the General Accounting Office, however, Japan has repeatedly requested and successfully negotiated release of much of this technology.

I do not necessarily blame Japan for this. When Japan requested this technology, we should have said no, plain and simple.

Unfortunately, U.S. officials were apparently too concerned about continuing the momentum of the program to call a halt to the technology flow.

Who is to say it will not happen again? For example, the administration contends that the FSX agreement limits Japan's access to the source codes for the flight computer. That may reassure some in this body, but it does not satisfy this Senator.

In fact, I am a little nervous about the agreement on this point. Indeed, the oral exchange which accompanied the side letters between Secretary Baker and the Japanese Ambassador is imprecise on this issue.

Let me quote from the oral exchange, which Secretary Mosbacher told us is similar to a colloquy on the floor:

In the section titled "Technology Transfer" it reads:

Japan wishes to confirm that software will be made accessible to Japan as much as possible in order to make the FSX * * * substantively effective.

It seems to me that Japan could drive a truck through this provision, and use it demand access to the source codes for the flight computer.

The precedent I cited in the case of the F-15 agreement is not comforting. If the United States could not say no then, how can we be sure that we will this time?

Secretary Mosbacher assured us last week that "we have the leverage to make sure the agreement is followed."

With all due respect to Secretary Mosbacher, we had the leverage in the F-15 coproduction agreement, and it did not amount to much.

JAPAN'S REACTION

The proponents of the FSX agreement have argued that congressional objections to the FSX are puzzling to Japan, and will do great harm to the alliance.

In my view, this argument insults the intelligence of the Japanese and underestimates their ability to understand our system of government.

The Japanese were fully aware that Congress would play a role in reviewing this measure. And they knew all along that many in Congress were unhappy with the FSX deal.

IS OUR COMMITMENT TO THE PACIFIC THREATENED?

The argument has also been made that the FSX deal will cement our military relationship with Japan, and that if we cancel it, our commitment to the alliance and the security of the Pacific will be questioned.

This too is absurd.

The United States has over 50,000 troops in Japan, over 40,000 in South Korea, and two major bases in the Philippines.

In addition, the new multilateral aid initiative for the Philippines should ease anyone's fears that we are going to leave the region anytime soon.

So let us put aside any notion that we're not committed to the defense of the Pacific.

THE UNITED STATES-JAPAN ALLIANCE

The FSX question is symbolic of a much larger issue—a bilateral relationship that is severely imbalanced and dangerously frayed.

In my view, the scales have been tipped in Japan's favor for too long. While we have maintaned free and open markets, Japan has worked to protect many of its domestic industries.

And Japan has undercut many of our key industries, industries upon which we rely for our national security. For example, Japan has become a dominant player in semiconductors—an industry that is crucial to modern warfare—to the point where we are increasingly reliant on Japan.

In my view, Japan's actions in decimating our semiconductor industry calls into question their commitment to the defense alliance. For if Japan is so willing to undercut a key defense industry in this country, how can they expect us to continue to provide for her defense?

I am not suggesting that we pack up and go home. I am suggesting that Japan needs to be more sensitive to our defense needs.

As Ambassador Mike Mansfield has pointed out, our relationship with Japan is one of our most important. As two of the world's leading economic powers, close ties between the United States and Japan are crucial to world stability.

I am deeply concerned about the continuing tensions in the alliance, which have been exacerbated in recent years by our mounting trade imbalance. These concerns, however, do not require me to support a deal that I believe is not in the interests of the United States.

IN SUM: A BAD DEAL NOT WORTH THE PRICE

In the final analysis, we must keep in mind one fact: Japan intends to become a competitor in the aerospace industry, and the FSX deal will serve as a stepping stone toward that goal.

There is no doubt that Japan believes that the FSX will help Japan compete in this field. In fact, cooperation with the West in military ventures is a key part of their competitiveness strategy.

Let me quote from a report issued last summer by the Ministry for International Trade and Industry called Japan's choices:

> In order not to lag behind the West in international competitiveness in the future, it is undoubtedly necessary to participate * * * in the military sector through close contact with top rank Western firms.

We should be honest about what Japan wants out of this deal. They want to increase their ability to compete in the aerospace field.

Why should we help them move toward this goal?

It seems to me the burden of proof in the case of the FSX should be on the proponents. And they have failed to make the case.

In my view, there are too many uncertainties and too many risks involved to go forward with this agreement.

I strongly oppose the FSX deal, and I urge my colleagues to join me in voting against it.

Mr. WALLOP. Mr. President, I would like to begin by briefly recapping the history of this agreement. It seems to me, as I look back over the course of events, that at every stage this process has been characterized by the unwillingness of the opponents of the FSX arrangement to take "yes" for an answer:

Initially, the Japanese wanted to domestically produce the FSX. The Reagan administration and Members of Congress strongly objected to this approach and the Japanese agreed to enter into a cooperative venture with the United States.

Last year, as part of its report on the fiscal year 1989 budget, this committee included language specifying conditions that should be included in an FSX MOU. The MOU signed in November 1988 embodied those recommendations.

In January of this year, a number of Senators wrote to President Bush urging him to conduct an interagency review of the FSX agreement, to include the Commerce Department and the U.S. Trade Representative. The President agreed to conduct such a review.

In March, under continued pressure from critics, President Bush announced his intent to proceed with the FSX agreement pending Japanese acceptance of certain clarifications. In April the Japanese agreed to these changes, but some are still not satisfied.

In my opinion, the administration is to be commended for negotiating an excellent agreement which balances both the economic and national security interests of the United States. From an economic point of view, this agreement guarantees the United States a 40-percent work share during both the development and production phase of the FSX project. This 40-percent share translates into at least $2.5 billion in business and 22,700 man years of work for U.S. industry. In addition, the United States will benefit from the flowback of any advanced Japanese technology developed during the course of the FSX project.

From a national security point of view, this deal will do the most to improve Japanese air self-defense capabilities—thereby reducing the burden on the United States—by providing the Japanese with an aircraft superior to both current United States fighters and any possible indigenous Japanese aircraft. Despite the fact that we now find ourselves in an era of glasnost, Soviet military capabilities in the Pacific continue to grow and the threat that the FSX is designed to counter is a real one.

We seem to be losing sight of the fact that Japan is our closest ally in the Pacific. The United States is committed by treaty to the security and defense of Japan. Therefore, it is in the interest of the United States for Japan to have a modern, well-equipped military force. This agreement contributes to that goal.

Despite the criticisms we have heard about Japanese defense efforts, we should keep in mind that the Japanese are currently the third largest defense spender in the world, with a record of increasing their defense budget in real terms by approximately 5 percent each year over the past decade. In addition, the Japanese contribute over $2 billion a year to support United States forces stationed in Japan. The argument made by some that Japan is not concerned with its own defense just does not stand up under scrutiny.

I think it is also important for us to consider what the alternative would be to the current agreement. An off-the-shelf purchase of F-16's is not an

option. The Japanese have never seriously entertained that possibility, and in my opinion it is hard to fault them for taking such a position. This is a trend that is seen worldwide as nations increasingly refuse off-the-shelf purchases of foreign defense equipment and insist instead on performing a portion of the work at home. We have seen this happen with our NATO allies, a number of whom are coproducing the F-16. We are not immune from this trend here in the United States.

The only viable alternatives to the current FSX agreement are Domestic Japanese production of a fighter; or—more likely—Japanese codevelopment and coproduction with Europeans. With this latter option, European companies will not only get the $2 to $3 billion in business that would have otherwise gone to the United States, the Europeans will also receive the advances in Japanese technology that result from the project as well as make deep inroads into the Japanese military market from which to obtain possible future defense contracts with Japan.

It is important to keep in mind that by rejecting this agreement at this late date and after the President has gone the extra mile to clarify important aspects of the agreement, we threaten not only the FSX deal but all future defense sales to Japan. The United States currently enjoys a virtual monopoly on defense trade with Japan—95 percent of all Japanese purchases of foreign defense equipment come from the United States. In 1988, the Japanese purchased over $1.5 billion in defense items from the United States—that is more than the combined purchases of Great Britain, France, and Italy. By contrast, the United States buys very little from Japan—approximately 90 million dollars' worth of components.

We will threaten this entire defense trade relationship, to say nothing of our overall relationship with Japan, if the United States is proven through this FSX process to be an unreliable trading partner.

Opponents of the FSX deal argue that FSX codevelopment will be a catalyst to the emergence of Japan as a major competitor for the United States aerospace industry. Leaving aside the fact that the United States aerospace industry supports this deal—and surely it is in the best position to know if this deal will create a competitor—the best way to ensure Japanese competition is to reject this agreement. If the United States allows the Japanese and the Europeans to marry their resources, with no United States control of the project, it is certain a formidable competitor to the United States will emerge.

By contrast, I am hard-pressed to find any disadvantages for the United States in proceeding with this agreement.

Mr. LUGAR. I yield as much time as the Republican leader may require.

The PRESIDING OFFICER. Senator DOLE, the Republican leader, is recognized.

Mr. DOLE. Mr. President, I would like to commend my colleague from West Virginia on his mastery of the legislative process—this amendment, if adopted, would certainly set a new precedent.

We just had a vote on the disapproval resolution, and the vote was 52 to 47.

This amendment would set forth a whole new way of doing business—in effect it would let the Congress negotiate technology transfer, and maybe that is fine. Maybe that is another way to kill the FSX deal. That is precisely what this amendment is all about. It was offered by one who is opposed to the transfer, and he made a great speech on his opposition.

Without looking at the merits of the new conditions put forth in the Byrd amendment, my question is why weren't these issues raised when the President—seeking a bipartisan consensus—came to us at the beginning of the year seeking our suggestions?

This amendment is the third bite of the apple. We were consulted in the Reagan administration, consulted in the Bush administration, now we want to be consulted once again. So, maybe what this amendment really says is let the Congress negotiate.

But the way this matter has been handled by Congress to date, leads me to believe that even a congressionally negotiated deal couldn't get through here without further congressional conditions.

Now that the Dixon amendment has been dealt with, I ask my colleagues, why are we voting on another amendment relative to FSX?

Mr. President, again as I have noted the Byrd amendment is simply another bite at the apple. What my distinguished colleague from West Virginia proposes will clearly result in further negotiations with the Japanese. I ask you, how many times are we going to require the administration to go back and renegotiate?

The Senate expressed its intent with respect to the FSX MOU in language on the defense authorization bill last year, and the administration complied. Further, this spring, at the request of Members of this body, renegotiations were initiated to address additional Member concerns. A better agreement resulted, and that brings us to today. Now we want to add more conditions to the agreement.

Is there any question in anyone's mind why our allies find us occasionally unreliable? We will have our day in court when a production MOU comes before us. As for now, the Japanese have been notified that critical engine technologies such as those described in this amendment will not be transferred to Japan by the United States under this program. The MOU already prohibits the sale or transfer of the FSX or any of its subcomponents without prior approval of the U.S. Government. Any absolute prohibition, however, would require negotiation.

Mr. President, I think we are plowing new ground with the Byrd amendment and its many conditions on the sale. I oppose it strongly on procedural grounds relative to the Arms Export Control Act—this is clearly a new way of doing business. From a policy standpoint, I made myself clear earlier that, although I would have preferred an outright purchase from the Japanese, we have now negotiated what I consider a supportable agreement and I, for one, don't feel that the codevelopment MOU requires any more conditions.

This is really the third bite at the apple, not the second but the third. We were consulted in the Reagan administration, consulted in the Bush administration. Now we want to be consulted once again. That is what precisely this amendment will do. So what it says in effect, is maybe Congress ought to negotiate; maybe they should. We negotiate nearly everything else now. We keep chipping away at Presidential powers, particularly in foreign policy areas, and now in trade areas.

It seems to me that if we start down this road every time something comes up why not just have a resolution of approval and we will put on all those conditions and maybe they are good conditions depending on your point of view. Why let the executive branch do anything without certain conditions and without Congress renegotiating with the Japanese or anybody else?

I do not know why we are voting on another amendment to the FSX. I thought the amendment was disapproval or approval.

So it seems to me that while I certainly respect my friend from West Virginia, the administration opposes this amendment. There is no doubt about it if this amendment should be adopted, get through the House and signed into law, it is going to require further negotiations with the Japanese.

How many times are we going to go back to the administration and ask them to negotiate?

I would say to those people who voted against the disapproval resolution what you are doing here if you change your vote you are voting now to switch your vote, and I am not certain that is what some would intend to do.

The Senate expressed its intent with respect to the FSX MOU in language

on the defense authorization bill last year and the administration complied.

Further this spring at the request of Members of this body renogtiations were initiated to address additional Member concern and a better agreement resulted and that brings us to today, and now we want to add more conditions to the agreement.

Is there any question in everyone's mind why our allies find us occasionally unreliable?

We will have our day in court when a production MOU comes before us and then we are going to have another chance. Congress is going to have another chance.

As for now, the Japanese have been notified that critical engine technology such as those described in this amendment will not be transferred to Japan by the United States under this program. The MOU already prohibits the sale or transfer of the FSX or any of its subcomponents without prior approval of the U.S. Government. Any absolute prohibition however would require negotiation.

So it just seems to me—and again I always defer to my friend from West Virginia as the expert when it comes to legislative strategy—but it seems to me, we are plowing new ground with the Byrd amendment. This is not just some little, simple resolution. It is a way to kill the FSX deal. There is no doubt about it.

That is why the Senator from Illinois stands up and praises it and says "It is even better than what I was trying to do," in effect.

So I do not think anybody should be deceived by the amendment.

I oppose it strongly on procedural grounds, relative to the Arms Export Control Act. It is clearly a new way of doing business, and if we are going to start a whole new way of doing business then this is one way to do it.

From a policy standpoint I made myself hopefully clear that although we would have preferred an outright purchase from the Japanese we have negotiated what a majority, 52 Senators, feel is a supportable agreement.

It seems to me that codevelopment MOU does not require any more conditions.

Some say it is only a sense of the Congress on the 40 percent. What really is at issue here, as I understand it, is whether or not the Commerce Department is going to have a role to play and they should have a role to play.

And I disagree with those in the administration who deny the Commerce Department a prior role.

This is in my view not just a defense matter, it is also a trade matter. But I would say to my colleagues who just voted against the disapproval resolution, this is in effect the same vote. It is just cleverly disguised. Oh, just a little approval resolution.

If this should become law this deal is dead. If that is what you want, that is one way to view it.

But it would seem to me and I would only quote briefly from the letter from Mr. Eagleburger:

The Administration's objections to these resolutions are based on the fact that they are unnecessary, and they impede the notification process. As you know, a resolution of approval is not procedurally required for notifications submitted pursuant to section 36 of the AECA. In our opinion, support for proceeding with approval of the commercial technical assistance and manufacturing licensing agreement, as notified, is properly expressed by defeating any joint resolution of disapproval.

Additionally, such resolutions of approval or affirmation, which include additional and unnecessary co-development and co-production directives, inhibit rather than facilitate implementation of co-production and co-development programs.

For those and other reasons, as I have indicated, the letter will be made a part of the RECORD, and the administration is opposed to this amendment.

I raised it with the President this morning. He indicated his opposition to it, not the author of the amendment but to the amendment.

The President feels he has negotiated in good faith. He has consulted the Congress. He has made changes. We have had our vote and let us move on with it, and that is precisely the point I would like to make.

Mr. President, I ask unanimous consent to have the letter from Secretary Eagleburger printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

THE DEPUTY SECRETARY OF STATE,
Washington.

Hon. ROBERT DOLE,
United States Senate.

DEAR SENATOR DOLE: I am writing you to express the Administration's strong opposition to joint resolutions of approval or affirming conditions relating to the export of technology and defense articles and services for co-development of the FS-X weapon system with Japan and with respect to coproduction of the system. Such resolutions have been proposed in response to the May 1, 1989 notification that was submitted to Congress pursuant to section 36(d) of the Arms Export Control Act (AECA) concerning the proposed approval by the Department of State of a commercial technical assistance and manufacturing licensing agreement for the FS-X program.

The Administration's objections to these resolutions are based on the fact that they are unnecessary, and they impede the notification process. As you know, a resolution of approval is not procedurally required for notifications submitted pursuant to section 36 of the AECA. In our opinion, support for proceeding with approval of the commercial technical assistance and manufacturing licensing agreement, as notified, is properly expressed by defeating any joint resolution of disapproval.

Additionally, such resolutions of approval or affirmation, which include additional and unnecessary co-development and co-production directives, inhibit rather than facilitate implementation of co-production and co-development programs. The terms of the Memorandum of Understanding that has been concluded with Japan on co-development of the FS-X weapon system, and related understandings reached between the United States and Japan, are consistent with the underlying objectives of these resolutions—protection of U.S. security, economic, and technological strengths and interests. Implementation of additional conditions through a resolution of approval or affirmation, which would require renegotiation in some cases, would not materially advance these objectives.

The Administration strongly urges that the Senate take into account these objections.

Sincerely,

LAWRENCE S. EAGLEBURGER.

Mr. DOLE. I thank my colleague for yielding.

The PRESIDING OFFICER. Who yields time? The Senator from Indiana.

Mr. LUGAR. Mr. President, I yield myself as much time as I require.

Mr. President, let me follow up on the argument offered by the distinguished Republican leader and give it at least one more view so that Members of the Senate can come to grips with one of the basic issues of the Byrd amendment.

It suggests, in fact the Byrd amendment states, that the President shall consider the recommendations of the Secretary of Commerce, and then it goes through various things that the President shall do.

The problem with an amendment of this variety in a constitutional sense, Mr. President, is that the Congress is mandating that the President of the United States consider the recommendations of one of the Cabinet Members that he has appointed. The resolution does not give any leeway. It says the President shall consider the recommendations of the Secretary of Commerce.

I would raise the question, Mr. President, for sake of constitutional argument what if the President of the United States did not consider the recommendations of his Secretary of Commerce? What if he told the Secretary of Commerce, whom he has appointed as a part of his administration, that frankly, I don't think your idea is any good. Quite frankly you have an interesting point of view or you are trying to push a deal, but this is the Government of the United States of America. I am the President, and I frankly think that your argument is deficient. I really don't want you fooling around any more in this.

Mr. President, would that mean that here on the floor of the Senate we would hear anguished cries that the President of the United States has defied the Congress, that in fact he is in violation of the law, that the President of the United States by our mandate had to consider those recommen-

dations, that he had to do just what we said he had to do when he ever thought about any of these agreements, in negotiating them and working through his own thought process?

The amendment is mischievious on the fact of it because it delves into the administrative processes of the U.S. Government and the powers of the President.

The authors are well-meaning. They want to make certain that trade aspects of any deal are considered, and indeed they ought to be. Any President ought to consider those and it is a fair criticism that a President has not considered them.

Then the memorandum of understanding or the agreement such as the one we have had today before us ought to be rejected by the Congress as deficient because it did not come in from all sides.

That has not been the argument, Mr. President, about the FSX deal. It is freely admitted that Secretary Mosbacher played a very important role, that he personally came to the Foreign Relations Committee and other committees, confirmed his role and confirmed his support, that he was fully involved. The President of the United States and the Vice President have so affirmed.

But this amendment does not leave that alone. It is attached to the FSX deal. It mandates that the President must do these things, shall do these things. What are the penalties, Mr. President, if he does not?

I would just simply say, before Senators quickly dismiss all of this as simply an afterthought, that there are real problems, constitutional problems, in terms of the relationship with the President and the Congress, involved in this that ought not to be considered lightly.

There are many ways in which the Congress can deal with the President, but clearly the Constitution affords us the opportunity for advice and consent on his nominee for Secretary of Commerce. We have oversight of various activities of that role, of whoever the Secretary is, of the agencies under his control and his activities. There are many ways in which we go back and forth in our checks and balances.

But as an afterthought on the FSX deal, that we have affirmed this afternoon by a vote of 52 to 47, to begin to stipulate and to suggest that in fact a president who does not follow all of the course of thought that we deem for him to follow is in violation of the law seems to me to be a very unfortunate point of view and mischievous with regard to the constitutional process.

I am hopeful, Mr. President, that we will not adopt this amendment, that we will clear the decks, at least on the FSX question, by rejecting the amendment. I would say that failure to do that is to invite difficulty down the trail. That ought to be clearly perceived by all who have heard this debate.

Mr. President, I know of no further speakers on our side. I inquire of the distinguished author of the amendment if he is prepared to speak or to yield back time.

Mr. BYRD. Mr. President, I believe I only have 3 minutes remaining.

The PRESIDING OFFICER. The Senator from West Virginia is recognized.

Mr. BYRD. How much time remains to this side?

The PRESIDING OFFICER. Three minutes and 17 seconds.

Mr. BYRD. Mr. President, I hope that Senators will not be persuaded by these specious arguments concerning the Constitution. This amendment only says the President shall consider the recommendations of the Secretary of Commerce. It does not say the President shall accept the recommendations. If it were to try to command the President to accept the recommendations, then there might be some constitutional problem.

Mr. President, the provision developed with Mr. DANFORTH and the Armed Services Committee conforms to a draft agreement between the Commerce and Defense Departments as to how they should together, working together, better represent U.S. interests across the board in implementing and negotiating agreements with other nations. No further negotiations are required by the amendment for the MOU on development.

I listened to my good friend, the distinguished Republican leader, as he attempted to draw that thin brush across the picture. Mr. President, no further negotiations are required by this amendment. No conditions to the memorandum of understanding are included. None. It is an attempt to enhance the interests of the United States.

The administration has already said that Commerce will have a role and we are just attempting to write that into the record; that the Commerce Department will have a role.

We accept the President's word, but why not write it into the law? It is not just this administration, Mr. President. Administrations previous to this one have erred in their judgment in such arrangements. But this is a protection for all administrations and for the American people under all administrations. Let the administration change, then see how fast the footwork will change. This will protect the American people and their interests, the industrial and commercial interests of this country, under all administrations.

It is not a resolution of approval. If I understood what the distinguished Republican leader was saying, it is not a resolution of approval. As I understood from his reading of the letters from the administration, it is not a resolution of approval.

Mr. President, I hope that the Senate will adopt this amendment. It is offered in good faith. It is not an attempt to torpedo the agreement. This is looking down the road to the next agreement and merely saying to the administration, "You said the Commerce Department will have a role. We want to make sure the Commerce Department has a role." We are asking the President to consider any recommendations that the Secretary of Commerce makes. He will make the judgment on those recommendations.

Mr. President, if I have any time remaining, I yield it back.

The PRESIDING OFFICER. The Senator's time has expired.

The Senator from Indiana controls the remaining time.

Mr. LUGAR. Mr. President, does the Senator require time?

Mr. DIXON. No, thank my colleague. I was going to send my amendment to the amendment of the distinguished Senator from West Virginia to the desk and kind of expedite the procedure.

Mr. LUGAR. Mr. President, I will speak briefly and then yield back the time. I would simply indicate, as the Republican leader pointed out, that the President of the United States opposes the amendment. The administration opposes the amendment strongly.

We believe that it would not be useful, with regard to this agreement and with regard to constitutional misunderstanding, to adopt the amendment. Having said that, Mr. President, I yield back all time on our side.

The PRESIDING OFFICER. All time has been yielded back.

The Senator from Illinois.

AMENDMENT NO. 103 TO AMENDMENT NO. 101

Mr. DIXON. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Illinois [Mr. DIXON] proposes an amendment 103 to amendment No. 101.

Mr. DIXON. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 3, line 20 of the pending amendment, strike "Committee on Foreign Relations of the Senate" and insert in lieu thereof: "Committees on Foreign Relations, Armed Services, Commerce, Science and Transportation, and Banking, Housing, and Urban Affairs of the Senate".

Mr. DIXON. Mr. President, all this amendment does is, on page 3 of the

amendment by my distinguished friend from West Virginia, his amendment suggests, beginning 6 months after the date of the enactment of this resolution and every 12 months thereafter, the Comptroller General of the United States, after consultation with appropriate officials of our country, will submit to the Speaker of the House of Representatives and the chairman of the Committee on Foreign Relations of the Senate a report describing the progress made in implementing the MOU between the two countries.

Now, I apologize because I have not served in the U.S. House of Representatives and do not know exactly how this is handled over there. But I am told by colleagues here who served there that the submission of this to the Speaker of the House means that it will go to the jurisdictional committees on the subject matter in the House. That is why they do not identify the various committees in the House. All I am doing is broadening my friend's amendment here so that it is not just the Foreign Relations Committee, but it is also Armed Services, Commerce, and Banking, Housing, and Urban Affairs.

Now, clearly those four committees are all jurisdictional on the subject matter for the obvious reasons. In case anybody wonders why Banking, Housing, and Urban Affairs, as my friend from Pennsylvania, who serves on that committee, knows, and he has been very involved in this, the Export Administration Act is always considered in Banking, Housing, and Urban Affairs. So that is a jurisdictional committee.

So all we are trying to do here is have the Senate involved in the process to the same extent that the House is involved.

My friend from West Virginia has no objection to this. I will not belabor the point further if there is no objection to the amendment, which I think is sound and in good order.

The PRESIDING OFFICER. Is there any further discussion?

Who yields time?

Mr. LUGAR. Mr. President, I yield myself as much time as I may require on the opposition side.

I simply will speak not in opposition but to indicate that on our side we are prepared to accept the amendment.

Mr. DIXON. I thank my distinguished colleague on the other side. I have no further comments and ask for a vote on the amendment.

Mr. BYRD. Mr. President, I certainly have no objection to the amendment and support it, likewise.

The PRESIDING OFFICER. Do the Senators yield back their time?

Mr. DIXON. Mr. President, I yield back my time.

Mr. LUGAR. Mr. President, I yield back my time.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the amendment.

The amendment (No. 103) was agreed to.

Mr. DIXON. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. HEINZ. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The Senator from Pennsylvania.

AMENDMENT NO. 104 TO AMENDMENT NO. 101

Mr. HEINZ. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Pennsylvania [Mr. HEINZ] proposes an amendment numbered 104 to amendment No. 101.

Mr. HEINZ. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of paragraph (a) of section 3 of the amendment offered by the Senator from West Virginia [Mr. BYRD], add the following:

"Such report shall state—

"(1) whether any technology involved in development of the FS-X weapon system has been transferred to the Japanese space shuttle program or any other part of the Japanese aviation sector or aerospace technology;

"(2) whether any such technology has been diverted to any third party country unauthorized to receive such technology, in violation of the license and technology assistance agreement for the FS-X weapon system; and

"(3) whether any such technology has been made available, legally or illegally, to adversaries who could use such technology to the detriment of the North Atlantic Treaty Organization (NATO), the United States, any other member country of NATO, Japan, Australia, or New Zealand."

Mr. HEINZ. Mr. President, I made my reservations known concerning the lack of adequate safeguards over technology transfer in this agreement and certainly it is true that the Bush administration sought and received certain clarifications to the agreement. I join many Senators who have already said so. I applaud that effort.

But, in my view that effort, although meaningful, just did not go far enough and, therefore, because I am still concerned about the lack of sufficiently stringent technology safeguards in both the government-to-government MOU, and in the General Dynamics-Mitsubishi Heavy Industry Licensing and Technical Assistance Agreement, I am offering a clarification to the Byrd amendment regarding GAO's reporting requirements in section 3.

It is, briefly, my intention to require GAO in the report, the one that it submits pursuant to section 3 of Senator BYRD and Senator DANFORTH's amendment, effectively to tell us and, if possible, to certify that F-16 technology transferred under the LTAA will be properly safeguarded once it arrives in Japan. Specifically, the amendment calls for the GAO, in its report, to state three things:

First, whether any technology involved in development of the FSX weapons system has been transferred to the Japanese space shuttle program or any other part of the Japanese aviation sector or aerospace industry;

Second, whether any such technology has been diverted to any third party country unauthorized to receive such technology in violation of the license and technology assistance agreement for the FSX weapons system;

And, third, whether any such technology has been made available, either legally or illegally, to adversaries who could use such technology to the detriment of the North Atlantic Treaty Organization, NATO—the United States or any other member country of NATO—Japan, Australia, or New Zealand.

In sum and substance, Mr. President, what we want the GAO to do is to track and see how well the representations and requirements that have been agreed to and laid down are, in fact, followed through. It is my hope that at each and every turn, which means each and every report, all of us will be satisfied that the agreements are being adhered to and we will have, as the basis, something other than somebody's word that may or may not be verifiable that that is so.

So, I hope my colleagues will adopt the amendment.

The PRESIDING OFFICER. Who yields time?

Mr. BYRD. Mr. President, do I have control of the time on this amendment?

The PRESIDING OFFICER. The Senator from Illinois controls the time.

Mr. DIXON. I yield my time to the Senator from West Virginia.

Mr. BYRD. It is an amendment to my amendment. Would I not control the time on this side?

Mr. HEINZ. Mr. President, if I have any time, I yield it to the Senator from West Virginia, if I control the time.

Mr. DIXON. So do I.

The PRESIDING OFFICER. The Senators from Pennsylvania and Illinois yield time to the Senator from West Virginia.

Mr. BYRD. I think it is a good amendment. I do not remember how

that agreement was written but I will not argue the point now.

I like the amendment and I support it. I am willing to accept it and yield back the remainder of the time on this side.

The PRESIDING OFFICER. The Senator from Indiana.

Mr. LUGAR. Mr. President, to the best of my knowledge, the control of time is with the distinguished Senator from West Virginia and the Senator from Pennsylvania. But I inquire of the Senator from Pennsylvania if he would yield 2 minutes to the distinguished Senator from Rhode Island who wishes to be heard?

Mr. HEINZ. If I am in control of the time, I will be happy to yield.

Mr. CHAFEE. Mr. President, I wanted to speak on the overall Byrd amendment rather than the various other amendments here.

I would hope——

The PRESIDING OFFICER. Who yields time?

Mr. CHAFEE. I will need just 1 minute.

The PRESIDING OFFICER. The Senator from Indiana.

Mr. LUGAR. Mr. President, just for clarification, as I recall the unanimous-consent agreement, 10 minutes was provided for the Heinz amendment, 5 minutes to a side.

The PRESIDING OFFICER. That is correct.

Mr. LUGAR. So I am not certain which side would yield the 2 minutes to the distinguished Senator from Rhode Island, but I have asked, I have appealed, that one side or the other controlling time do so.

Mr. HEINZ. Mr. President, how much time remains to either side?

The PRESIDING OFFICER. The Senator from Indiana has 1 minute and 4 seconds left; the Senator from Illinois has 4 minutes and 29 seconds left.

The Senator from Illinois.

Mr. DIXON. Mr. President, if I might accommodate my friend from Rhode Island, I would be delighted to yield several minutes to him for his speech if we could first adopt the Heinz amendment, by my friend the distinguished senior Senator from Pennsylvania, to which there is apparently no objection.

Why do we not just adopt that and then let my friend from Rhode Island make his speech?

The PRESIDING OFFICER. The Chair would point out that the time has expired for debate on the Byrd amendment. So that if the Senator from Rhode Island wishes to speak, it is probably wise for someone to yield him 1 or 2 minutes at this point.

Mr. HEINZ. Mr. President, let me make the following unanimous-consent request that might facilitate moving on; that is at the disposition of the Heinz amendment that the Senator from Rhode Island be yielded 2 minutes.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

There being no further debate, the question is on agreeing to the amendment offered by the Senator from Pennsylvania.

The amendment (No. 104) was agreed to.

Mr. HEINZ. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. DIXON. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The Senator from Rhode Island is recognized for 2 minutes.

Mr. CHAFEE. Mr. President, that only took 3 minutes to get that 2 minutes, and I appreciate it. I just say this, Mr. President, briefly, I think this is an unfortunate amendment. I just do not understand quite why it is being presented. I have heard the discussions on both sides. It seems to levy the most extraordinary requirements in here and says that the Secretary of Commerce, when he has reason to believe that any such memorandum of understanding has an adverse effect, shall recommend to the President any modification he deems necessary.

I mean, if we have ever had a case of micromanagement, this is it. We are determining what the Secretary of Commerce's relationships will be with the President of the United States; a person who he is serving under and subject to.

I just do not understand why this amendment is being brought forward. I would hope it would not prevail. I have heard the arguments of our leader on the Republican side, the view of the administration on this amendment. It is going to make life, certainly, more difficult for them.

And I further understand, am I not correct, and I would ask the distinguished Senator from Indiana, when they get to the production agreement, then do they not have to come up with a further memorandum of understanding and get the approval of that in the Senate of the United States?

Mr. LUGAR. That is correct.

Mr. CHAFEE. In other words, if we do not like what is taking place we get another bite at the apple. So, it seems to me enough is enough. Let us get on with this agreement.

What will happen is, I think, probably the President will veto this if this prevails. It will delay the whole thing, exacerbate our relationships with Japan unnecessarily and the point they are trying to make here will be taken care of subsequently when we get to the approval of the memorandum of understanding on the production agreement.

So, I think it is unfortunate and I hope it would not prevail. I want to thank everybody who gave me this splendid 2 minutes.

The PRESIDING OFFICER. The question before the Senate is agreeing to the amendment offered by the Senator from West Virginia, as amended.

Mr. BYRD. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. There is a request for the yeas and nays. Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. There being no further debate, the question is on agreeing to the amendment of the Senator from West Virginia [Mr. BYRD], as amended.

The yeas and nays have been ordered. The clerk will call the roll.

The legislation clerk called the roll.

Mr. CRANSTON. I announce that the Senator from New York [Mr. MOYNIHAN] is necessarily absent.

The PRESIDING OFFICER (Mr. ROCKEFELLER). Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 72, nays 27, as follows:

[Rollcall Vote No. 67 Leg.]

YEAS—72

Adams	Exon	Lott
Baucus	Ford	McConnell
Bentsen	Fowler	Metzenbaum
Biden	Glenn	Mikulski
Bingaman	Gore	Mitchell
Boren	Graham	Murkowski
Boschwitz	Grassley	Nunn

Durenberger	Mack	Symms
Garn	Matsunaga	Thurmond
Gorton	McCain	Wallop

NOT VOTING—1

Moynihan

So the amendment (No. 101), as amended, was agreed to.

Mr. DIXON. I move to reconsider the vote by which the amendment was adopted.

Mr. HEINZ. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. MITCHELL. Mr. President, may we have order.

The PRESIDING OFFICER. Senators will leave the well and cease their conversations so the majority leader can be heard.

Mr. MITCHELL. Mr. President, for the benefit of my colleagues who have asked about the schedule for the remainder of the evening, there remains for disposition the resolution by the distinguished Senator from Alaska. I understand that he does not seek a rollcall vote, nor does any other Senator. I also understand that no Senator is seeking a rollcall vote on final disposition of the pending resolution. This being the case, then, there will be no further rollcall votes tonight.

We will continue until we complete action on those two matters. The Senate will be in session tomorrow afternoon for disposition of the conference report on the minimum wage, and there will be a rollcall vote on that tomorrow afternoon.

Mr. CRANSTON. Mr. President, today I would like to join with several of my colleagues to give my support to the FSX agreement now before the Senate.

There have been three major concerns raised by opponents of this agreement: the trade deficit, the transfer of sensitive technology, and the interests of our civilian aviation industry.

With respect to the trade deficit, while it is clear that the most satisfactory arrangement for the United States would be for the Japanese to purchase our F-16's directly, it is equally clear that this option is not available. The Japanese have steadfastly refused to buy the F-16: They want an aircraft that will meet specific mission requirements that the F-16 is not designed for. It is unreasonable to demand that Japan purchase an aircraft that does not respond to Tokyo's needs. Even if they want the F-16, it would seem unreasonable for us to demand that the Japanese purchase it "off the shelf" when we do not make the same demand of our other allies, few of whom purchase aircraft "off the shelf" from us.

When it became clear that the Japanese would not purchase our F-16's, we began negotiations with them for the coproduction agreement. We argued, rightly, that the Japanese should be purchasing United States goods when possible in order to reduce the trade imbalance. This issue is addressed satisfactorily by the FSX agreement, which stipulates that 40 percent of the production is to be done in the United States—which will translate into 2.5 billion dollars' worth of work for the United States. This agreement also provides for 22,000-man hours of work. And it is 100 percent financed by the Japanese.

On the issue of the transfer of sensitive technology, I believe the initial agreement did not provide adequate safeguards to protect our technology. However, I believe the renegotiated agreement provides sufficient safeguards to ensure that only technology essential to the project is transferred. Moreover, this technology is largely distinct from technology used in the civilian aircraft industry.

I share the concerns expressed by many of my colleagues regarding the need to maintain the competitive edge of our civilian aviation industry. I believe we must ensure that the long-term interests of private industry are not sacrificed. In this case, I believe our civilian aircraft industry is not fundamentally threatened. We will not be giving the Japanese significantly more aircraft technology than they have already obtained through our F-15 coproduction agreement, or could obtain on the open market.

Mr. President, in order to better safeguard America's commercial interests in the future, I recently introduced legislation in the Senate which would give the Commerce Department representation in the National Security Council. This legislation will ensure that future proposals to export sensitive technology are evaluated from an economic perspective as well as defense viewpoint.

I believe that the FSX agreement is far from ideal. But it is one that was entered into at our Government's initiative, and the Bush administration's demands for clarification and safeguards have been largely met.

Mr. President, I am prepared to support this agreement in good measure because I am committed to working with our friends and allies in Japan, not against them. I regret that there are many who are too quick to point a finger at Japan, to blame Japan for all our trade woes. It is my conviction that while Japan, indeed, continues to engage in several unfair trade practices, much of the blame for decreasing American competitiveness rests with ourselves. We need to do a better job of education and training, of analyzing and penetrating foreign markets. We need to lower our voices and pull up our socks. "Japan-bashing" is no prescription for future success in industrial competition. And while the FSX agreement is by no means perfect, it is a deal we should move forward with, with the determination to do a better job in the future both at home, and in our relations with our valued friends in Japan.

WAKE UP, AMERICA

Mr. D'AMATO. Mr. President, I rise today in continued strong opposition to the FSX deal with Japan. FSX is a bad deal for America and should be rejected.

If we sell F-16 technology to Japan as proposed by the FSX memorandum of understanding, we are taking a major step toward undermining our own national security. One of Japan's declared goals is to build a world-class aerospace industry. They will build it at our expense, using our technology as its foundation, just as they built the VCR and television industries.

Unlike televisions and VCR's, our aerospace industry is essential to our national security. In the 21st century, our ability to maintain our independence and sovereignty, to preserve and protect our freedom, will depend upon our military industrial base. The aerospace industry is a very major part of that military industrial base.

We learned about the importance of our military industrial base in World War II by Francis Walton, he wrote:

> In 1944 industry had performed its most significant service: The rescue of the free world from tyranny. Its production alone had made America the dominant power among nations.
>
> The United States in 1944—
>
> Built one plane every five minutes;
>
> Produced 150 tons of steel every sixty seconds;
>
> Turned out 8 aircraft carriers a month, and launched 50 merchant ships each day.
>
> * * *

Mr. President, the shipyards that launched those aircraft carriers and merchant ships are largely shuttered and dark. The skilled workers have retired or moved on to other employment. Today's most productive shipyards are located in Japan, Korea, and Taiwan.

The steel mills that smelted the steel that won World War II are also largely gone. They, too, are victims of foreign competition—and our own shortsightedness.

Only the aircraft factories remain. They don't build as many planes now as they did in 1944, but they are still there, as are the talented and dedicated men and women who work in them.

The Department of Commerce, in its 1989 U.S. Industrial Outlook, predicted that the aerospace industry would run a trade surplus of $17.1 billion in 1989. It is, simply stated, one of the strongest manufacturing sectors in U.S. foreign trade.

Yet, here we are trying to sell it for a handful of silver. Yes, it will be nice to have the money—$480 million—from the FSX codevelopment program. The promise of a 40-percent share of the coproduction is attractive.

The program is that we spent $7 billion for this technology, and the promise of coproduction is just that—a promise. And one that, according to Japanese press reports, the Japanese Ambassador has denied.

In World War II, the critical technologies were steel, rubber, ball bearings, and machine tools. American factories and refineries gave us the tools without which our soldiers, sailors, and airmen could not have won.

In the 21st century, what technologies will be critical?

Last year, section 823 of the Defense Authorization Act, Public Law 100-456, required the annual submission of "* * * A plan for developing the 20 technologies considered by the Secretary of Defense and the Secretary of Energy to be the technologies most essential to develop in order to ensure the long term qualitative superiority of United States Weapons Systems."

This year, the Department of Defense submitted the first of these required critical technology plans.

In this plan, DOD identified 22 critical technologies.

I won't read this list to you. In a separate chart inside the study, DOD identified 14 of these 22 technologies as essential to aircraft.

In this same chart, DOD identified 13 of these technologies as essential to submarines.

Mr. President, this report was presented to the Armed Services Committee on March 17. It was reported by the media, but without much fanfare—just another day, boring Government report.

But in appendix A to the report, where the Defense Department went into detail about each individual technology, there was important information about Japan.

Eight of the thirteen critical technologies identified as essential to submarines in this report are Japanese targets, according to this appendix.

The Japanese have also targeted 9 of the 14 technologies identified by the report as being critical to aircraft.

Let me explain what I mean when I say that the Japanese have targeted these technologies. I will start with the first critical technology, microelectronic circuits and their fabrication. The report stated:

Today, Japan is considered the leader in memory device manufacture (such as dynamic random access memories) while the U.S. leads in microprocessors and application—specific integrated circuits. Japan is believed to be equal to (or slightly ahead of) U.S. efforts in Gallium arsenide integrated circuit fabrication techniques.

Current trends suggest that the United States continues to lose ground to Japan in a growing number of microelectronics fabrication technologies. The most rapid decline appears to be in basic materials, packaging, and mask blanks. Today, the U.S. appears to have a clear lead in only two key areas—In Computer-Aided Design and in implantation. In every other key area, Japan is judged to be at least equal to the U.S. or has taken the lead. If current trends continue the United States can be expected to become dependent on Japanese suppliers of many key materials and production and test equipment by the year 2000.

Let's look at the second critical technology area, the "Preparation of Gallium Arsenide and other compound semiconductors." The report said:

Japan is the undisputed leader in the preparation of Gallium Arsenide materials technology, making many of the major fabrication advances in the late 1970s and early 1980s. In fact, the Japanese are now poised to take a clear leadership position over the United States if current trends continue for several more years.

The fifth critical area of technology, machine intelligence and robotics, is the next one identified as essential to submarines and aircraft. The report states:

Japanese robotics R&D will benefit from a $500 million 10-year project called the fifth-generation computer. Additionally, in 1983 a 7-year joint project was formed under the ministry of international trade and industry (MITI) to advance Japanese Robotic R&D. The MITI project addresses sensors for sight and touch; vision control; versatile robot arms capable of both high precision and high weight capability; efficiency motors for robots; and low-weight, high-strength materials for robots.

Also identified as essential to aircraft and submarines is the seventh critical technology, integrated optics. The report states:

Japan is pursuing research and development in all areas of optical processing. Government, industry, and Universities are all heavily involved. The key government participant is the Ministry of International Trade and Industry (MITI). Most of the large electronics companies in Japan have made a commitment to this effort. The optoelectronic industry and technology development association * * * is a special trade organization founded in 1980 to coordinate industrial activity, foster cooperation, and encourage standardization. Universities in Japan are also playing a key role. They perform much of the basic materials research on which the technology development is so dependent. In summary, Japan has a large, well coordinated program addressing all aspects of optics.

Next, we have fiber optics. The report states:

Japan clearly leads the world in converting fiber optic technologies to various commercial applications and has manufactured considerable amounts of law loss optical fibers. * * * In 1988 the Japanese (FUJITSU) demonstrated the first broadband optical information service.

Rather than going through the entire list, I'm going to skip ahead to the next to the last critical technology, and the last one identified as essential to aircraft and submarines, superconductivity. The report states:

Among friendly nations Japan maintains the most vigorous superconductivity program, one of magnitude on a par with that of the U.S. Their program is well balanced, extending across both low temperature superconductivity and high temperature superconductivity and across both small-scale and large-scale applications. Of particular concern is their commanding position in low temperature superconductivity digital electronics, which could very well comprise the technology of choice for a future and much-higher-performance generation of supercomputers. Moreover, being first in low temperature superconductivity digital electronics builds a strong foundation for leadership in high temperature superconductivity digitalelectronics as well.

Mr. President, what we are doing with the FSX deal is pouring gasoline on a fire. You will recall how many times the Japanese Ministry of International Trade and Industry [MITI] was mentioned in the report. It could have been mentioned more often, because it and the Japanese defense agency are the key coordinators of this effort to dominate these technologies.

Remember, nine of these critical technologies are Japanese targets.

This is our problem. We need to retain dominance in the technologies that are essential to these weapons systems and our ability to support and produce these weapons systems. Yet here we are, about to seel the F-16 technical data package to Japan, data from which they can learn many things.

Let us go back to the major issue. This next chart shows all of the areas identified in the DOD critical technologies report where the Japanese are making major effort.

Wake up America.

This is our future—our national security is at stake.

It must not be for sale, for the sake of good relations or for any other reason. Japanese dominance in these areas will tie our hands, putting limits on our foreign policy and on our ability to act in a crisis.

If we have to go to Tokyo for parts—or for entire weapons systems—we will also have to go to Tokyo for approval of our policies. When they speak, we will listen. When they object, we will hesitate to act.

This is unacceptable. Now is the time for us to act. We must say no to the FSX deal and make it stick.

In closing, I again urge my colleagues to remember those closed shipyards and steel mills, and what they contributed to our national survival in World War II. FSX goes to the heart of our future security. We must not let our aerospace industry experience the same fate as our smokestack industries, or our security will be in the hands of Japanese bureaucrats.

Mr. PELL. Mr. President, the distinguished President pro tempore [Mr. BYRD], and the Senators from Missouri [Mr. DANFORTH] and New York [Mr. MOYNIHAN], and I are offering an amendment that would apply critically important safeguards to the FSX co-development arrangement, as well as to any future agreement or coproduction.

In drafting this amendment, we took care to ensure that our amendment would not detract from the vigorous and well-informed debate on the merits of the case. Most particularly, we did not see our amendment as an alternative to the resolution of disapproval offered by the Senator from Illinois [Mr. DIXON]. We saw this

amendment as a necessary safeguard in the event the administration's proposal succeeded, as now appears will be the case. We believe that it is important that the Senate put safeguards in place and do so now. We believe further that the amendment merits the broad, bipartisan support of both supporters and opponents of the arrangement.

Mr. President, I must tell you that I personally have a number of concerns regarding this sale. In the end, I decided that the President should be given the benefit of the doubt. Accordingly, I voted against the Dixon resolution. At the same time, I believe it is crucial that the Congress enact the controls incorporated in our amendment, in order to ensure that this is a fair deal for the U.S. Government, as well as for the commercial firms involved and for American workers.

Mr. President, the purpose of our amendment is to ensure the Governments of the United States and Japan clearly understand that the Congress insists upon strict standards in the joint development phase, as well as in the coproduction phase, should the FSX project proceed into production.

Our amendment would apply an important standard in the codevelopment phase. The amendment would require that all technology, defense articles and defense services provided to Japan by the United States Government or any United States corporation or entity to codevelop the FSX shall be subject to the requirements of section 3 of the Arms Export Control Act. This would make certain that the controls regarding third-party transfers normally applied to regular sales would be applied fully to the codevelopment.

In an unprecedented and, possibly, precedent-setting arrangement such as this, it is crucial to be absolutely certain that these safeguards are assuredly in place.

With regard to any coproduction phase, the amendment would apply the same standard on third-party transfers. In addition, the resolution expressly prohibits the sale or retransfer by Japan of the FSX weapons system or any of its major subcomponents that may be codeveloped or coproduced with the United States. This will ensure that the FSX weapon will be utilized solely in Japan's national defense and not be ultimately in competiton with United States aircraft on the international market.

In addition, the amendment would prohibit the transfer to Japan of critical engine technologies. This prohibition would include, but not be limited to, hot section and digital fuel technologies. This prohibition is consistent with an assurance given to the Committee on Foreign Relations by Secretary of Defense Richard B. Cheney. The amendment serves the important purpose of making this assurance a matter of law. This will safeguard against any Japanese effort to proceed alone with engine production instead of purchasing the engines or obtaining them through a carefully constructed licensed coproduction agreement with us.

Finally, with regard to controls, the resolution expresses the sense of the Congress that any coproduction memorandum of understanding should specify that the U.S. share of the total value of that coproduction shall not be less than 40 percent of that value, including spare parts and support. This will make clear the importance that Congress attaches to the assurances given in the April 28, 1989, exchange of letters between Secretary of State Baker and the Japanese Ambassador, Nobuo Matsunaga.

The amendment will also require that the Comptroller General monitor the codevelopment closely and report annually thereon to the Congress. In addition, the amendment will ensure that the Secretary of Commerce is a key player as this arrangement progresses and in subsequent phases.

Mr. President, I regret that this has been such a contentious and troubling issue. That need not have been the case.

Clearly, the previous administration did not do at all well either in consultations with Congress or in coordinating internally among its own departments. As a result, a deal was formulated which raised a number of concerns whether our national security, foreign policy, and economic interests had been properly served. President Bush was quite correct to direct a reevaluation, after hearing of congressional and executive branch concerns. The reevaluation led to further discussions with the Japanese and the side letters of April 28. I believe that the side letter removed some key concerns. Nonetheless, I hope the administration realizes that a better handling of the negotiation from the start would have obviated the need for the subsequent fixes.

We and the Japanese have many interests in common and should be interacting with greater harmony. The contentiousness and suspicion which has been brought about in our economic and commercial relations has clearly infected our political and security relationship. Even if this proposal is allowed by the Congress, the Japanese Government and industry must see this debate as a clear warning that the economic and commercial relationship must change substantially—and as soon as possible—for the better. It is intolerable for us to be, in effect, the guarantors of Japanese security interests and have Japan still reluctant to give a fair deal on the economic front. We have stood by them and intend to continue doing so. As we do so, however, we must be treated honestly and fairly.

If this is understood here in Washington and in Tokyo, I would hope that the Japanese will make it clear to us that they will comport themselves so as to quickly allay the fears and concerns now evident. If so, the debate will be markedly different several years from now when the Congress is asked to approve a coproduction arrangement for the FSX. I would hope by then the concerns and mistrust so evident now will have been replaced by economic, commercial, diplomatic, and security relationships marked across the board by mutual trust and fairness.

Mr. SIMPSON. Mr. President, I rise in opposition to the resolution of disapproval of the joint agreement to develop the fighter support-experimental, or FSX.

The agreement was carefully worked out in the Reagan administration and now "fine tuned" by the current administration, and it is one that is mutually beneficial to both the United States and Japan, and it is acceptable to the aerospace industry in this country. Under the agreement, Mitsubishi and General Dynamics will work closely together to modify F-16 fighter jets. Japan will fund the entire cost of the program.

This agreement assures United States firms 40 percent of production contracts, and it assures that Japanese access to certain sensitive software will be restricted. Any technology that is developed from F-16 technical data will be returned to the United States, and we will have the exclusive option to purchase any technology that the Japanese develop.

Japan and the United States are allies and this agreement works to benefits both of us. The Japanese were not interested in purchasing the existing F-16, but they were very interested in developing their own technology. This agreement protects our interests—both security and commercial.

World War II ended nearly 45 years ago. This is not a trade war issue. We still disagree with our fine ally from time to time, but this is an occasion on which we can and should link arms and work together to implement this peacetime agreement.

Ms. MIKULSKI. Mr. President, today's vote on the F-16 codevelopment and coproduction agreement with Japan represents one of the knottiest issues the Senate has faced in a long time. On the one hand is the promise of short-term financial gains and U.S. employment; on the other hand is the danger of transfering sensitive technology to our major economic competitor.

I will vote to disapprove the agreement.

The technology we are proposing to transfer in this package is not state of the art, but it is a significant step forward for the Japanese. In the past the Japanese have built major sectors of their economy on technologies legitimately obtained from United States sources. They transformed these into high quality consumer goods aggressively marketed around the world. I have every reason to believe that they could, and would, do the same with our aerospace technology.

If the Japanese were simply interested in acquiring an aircraft to fulfill the mission of protecting their sealanes, then it would make more sense to buy the F-16. It is less than half the cost of the FSX. Another option is to coproduce the F-16 with the United States retaining all sensitive technology.

If their main interest is to find a way to keep their aircraft workers employed as their F-15 and F-1 production lines wind down, then coproduction would do the job.

If, on the other hand, their goal is to obtain advanced aeronautic expertise to develop their own industry—as Japanese leaders have acknowledged openly—then it is clearly not in our best long-term interest to create a competitor to our own industry by handing over billions of dollars in United States technology. A Japanese aerospace industry could not sustain itself merely by supplying domestic needs; it would have to enter the world market.

Let us look to the future. Let us learn from the past.

U.S. ingenuity and know-how have produced the world's best military and civilian aircraft. Despite intense competition from other governments, we are the supplier of choice in world markets. Aircraft sales are one of the few bright spots in our dismal trade record. We will need to maintain our superiority in the years to come, and we won't be able to do that if we give a leg up to one of the world's most dynamic economies. It would not be wise to risk the future of U.S. aerospace workers in exchange for the U.S. jobs to be gained on this one project.

The Japanese economy has already built upon United States technology to establish extraordinarily successful electronics and auto industries. Let us not add aircraft to that list.

Japan is an ally, and defense and economic ties must be maintained. I am not convinced, however, that the FSX agreement is necessary to fill a defense need. I believe that it can only exacerbate the tense trade situation that now exists between our two countries.

Mr. BOND. Mr. President, the FSX deal, under which General Dynamics will codevelop with Mitsubishi Heavy Industries a new fighter based on the F-16 has been a topic of hot debate on the floor for many months now.

We have heard Members on both sides of the issue give extensive and detailed arguments in support of their position. I do not intend to go over all of the issues that have been raised. A fact which probably pleases everyone.

However, I would like to discuss a few points that I believe Senators ought to be considering as they decide how they will vote on the resolution now before us.

I will support the agreement because, although I agree with my colleague from Missouri that in future deals we need to ensure that our economic concerns are given appropriate weight earlier on in the process, I believe that the modifications negotiated by the Bush administration make the deal a good one for the United States.

I would also agree with my colleagues who have said that everyone would be much happier if the Japanese simply bought American fighters off the shelf. However, the Japanese are not going to do that, and I do not believe we are in a position to force them to do so. I wish we were. But this is 1989, not 1949.

Mr. President, if we do not follow through on this deal, it is clear the Japanese will proceed on their own with the development and production of the FSX. It is important to remember that, initially, that was the course the Japanese wanted to pursue. It was only after strong objection from Members of Congress and the administration that the Japanese Government agreed to negotiate a deal with United States aerospace companies.

We all know that the Japanese have a history of unfair trade practices and protectionism. I believe as much as anyone that we must hold them accountable for their actions and pressure them to open their markets. What I do not think we should do, however, is throw up our hands and say that by our so-called giving away of 15-year-old technology, that somehow the Japanese will whiz by us and take away our aerospace business.

Implicit in this argument is that American workers cannot compete with their Japanese counterparts. I find this line of reasoning offensive. We do compete, in fact we're winning, and I know we will continue to do so.

I say this as a representative of one of the Nation's largest aerospace producing States—as someone who is vitally interested in U.S. aerospace jobs and in the long-term health and competitiveness of our aerospace industry.

Instead, the way for us to maintain our critical lead in aerospace is by supporting the development of new technology through programs such as the national aerospace plane.

Therefore I believe it is a mistake to try to maintain our leading position in the aerospace field by spending all our time looking back, checking to see who, if anyone is gaining on us. We should stick with what got us so far ahead to start with, always looking forward, developing the next generation technologies, as the competition tries to figure out or copy our old.

Mr. President, I hope my colleagues will vote to support this deal. I yield the floor.

Mr. HELMS. Mr. President, I have said many times during the past few months that the FSX proposal is a bad deal for America, and I have given a detailed listing of the reasons why it is a bad deal. Today, since we will vote shortly on the resolution of disapproval of the FSX program I would like to discuss several misleading arguments put forth by the proponents of FSX that should not go unchallenged.

But before I do, I would like to read a letter from Tom Clancy, the best selling author, to the Business and Industrial Council on the subject of FSX. I had the privilege to attend the Army-Navy game with him last year and I know him to be a thoughtful and reflective man who understands well the importance of U.S. leadership in technology. I quote him with his permission. Here is what he wrote about the FSX program:

> SIR: I find myself in total agreement with you on the FSX issue. At the most benign level, it smacks of GM sending R&D money to Ford. More disturbingly, however, why do we refer to Japan as an ally? What military or strategic services have they ever performed for us? The bases we have on Japanese soil, I seem to recall, we won the old fashioned way. An alliance is an exchange of services and interests, and I see that element of exchange somewhat lacking in this case. This is the opinion, I hasten to add, of the number one best-selling author in Japan. I am against the FSX deal. If they want some good fighter planes, let them purchase the planes, for cash, just as I purchase Nikon cameras and Sony electronics gear.
>
> If there is anything I can do to assist you on this issue, please let me know.
>
> Regards,
>
> Thomas L. Clancy, Jr.

I think the letter speaks for itself and there is nothing that I need to add to it directly. I might say though that my mail, and I understand the mail of quite a few other Senators, is, like Mr. Clancy's letter, running strongly against the FSX. The American people are not fooled one bit by the false claims made by the proponents of FSX.

Now let me turn to some of the more misleading arguments that have been put forth by the FSX advocates. The proponents of FSX make much of the fact that they believe approximately $2.5 billion worth of work will come to the United States as a result of the FSX program. They think that the United States should be very satisfied that the Japanese are going to give us this workshare. What's more, they say

that it is about equal to what the United States would have gotten had there been an outright buy of F-16's.

Let us do a litle simple arithmetic, Mr. President, to see if the FSX proponents are correct in their claim. General Dynamics offered to sell the Japanese the 130 airplanes they need for the FSX mission for about $3 billion. If the Japanese had been fair and cooperative allies, they would have begun purchasing those planes a year or two ago, in order to meet the very real Soviet threat which exists today.

If the Japanese had done the fair and cooperative thing, the first F-16's could be in Japan now and we wouldn't be standing here discussing FSX at all. And in the next year or two, all 130 planes could have been delivered. That means that the entire $3 billion of a direct buy could have come to American companies and the American workers by 1991 or 1992.

Let's look again at the current FSX agreement. Right now the FSX deal guarantees the United States only $480 million during the development program, which will last until 1996 or so. After that, if, and that's a mighty big if, the FSX goes into a production phase, the Japanese say in a side letter the United States will get approximately 40 percent of the production program—again that is if the program goes into production and if the Japanese live up to the side letter.

Now I am not an economist, Mr. President. But I do not have to be one to understand that the FSX program will provide a guarantee of only $480 million between now and 1996 and the hope of $2 billion between 1997 and 2007. You will note that I said 2007 because that is how long the FSX production program will take. I do not have to be an economist to know that the total proposed FSX share of $2.5 billion over the next 18 or 19 years does not equal the $3 billion we should have earned by 1992 from the sale of F-16's. Cash up front is always better than payment in dribs and drabs over a 20-year period.

But that is what the administration is telling us, Mr. President. They have said over and again that the FSX earnings would be about the same as the earnings from a direct buy of F-16's would have been. That is total nonsense, Mr. President. I think the American people understand that the Japanese and the FSX proponents are in cahoots on this one. They are trying to put the best face on the figures to lull us into thinking that we got as good a deal as if the Japanese had bought F-16's. But that is simply not true.

And what about spare parts for the FSX? I am sure, Mr. President, you will not be surprised to learn that there are no provisions in the FSX agreement for American companies and workers to make FSX spare parts. Our negotiators, who claim they did such a good job on the FSX agreement, never thought to address the question of spare parts. Even in the review and renegotiation of the FSX deal ordered by the President, there was no consideration given to spare parts.

Spare parts are not a very exciting subject. I will be the first to admit that, Mr. President. But they are very important economically. Because, over the life of an aircraft, the spare parts necessary for maintenance, add up to about 3 times the original purchase price of the aircraft. Again a little simple arithmetic will tell us that three times the original $3 billion purchase price of 130 F-16's is $9 billion in spare parts over the life of the program.

So let us continue with our arithmetic lesson, Mr. President. If the Japanese had done the right thing and bought F-16's—and I have not heard one person, even those for the FSX, say that a buy of F-16's isn't the right thing for Japan to do—then the total income to the United States would have been $3 billion for the airplanes and $9 billion for spare parts. That's a total of $12 billion. That is a little bit more than the $2.5 billion that the FSX proponents are crowing about.

Let us look one more time at the earnings we are supposed to be getting out of FSX. First, we are transferring $5 to $7 billion of our finest aerospace technology. If everything goes perfectly with FSX, we will get $2.5 billion in return. Mr. President, even if we take the lower figure of a $5 billion American taxpayer investment in the F-16, and then we subtract the $2.5 billion the FSX proponents say we will earn, the result is still a net loss of $2.5 billion to the United States. That does not sound like a very good deal to me, Mr. President.

I just do not know how the FSX proponents can claim the FSX program equals about what a direct buy would have been. Their willingness to support the FSX for $2.5 billion in spite of all the legitimate defense and commercial reasons not to do so implies that they can be swayed by the prospect of earning a few bucks. In other words, they do not care how much of their scarce defense resources the Japanese waste on the FSX, as long as a high enough percentage of it comes America's way. This type of thinking is just plain wrong. No wonder our $55 billion trade deficit with Japan doesn't seem to faze the FSX proponents.

There is also a corollary argument offered by FSX proponents. They say that we would get nothing if we turn down FSX. The Japanese would go their own way and build their own plane. So, their thinking goes, we had better take the $2.5 billion, even at the price of giving up $7 billion in F-16 technology. If we do not, we will get nothing.

First, I do not agree with the underlying premise of this argument. It is a defeatist premise, one that does our country a great deal of harm. Essentially, the premise is that we must accept the fact that the Japanese will not buy our best products. Thus we must negotiate the best deal we can given the circumstances. But, Mr. President, I submit that such is not the case. We have all sorts of leverage that we can and should use to make the Japanese buy our products. Continued access to our markets is one that comes to mind immediately.

There are other levers we could use very effectively, but don't. For example, not once during the FSX negotiations was the power of the office of the President of the United States brought to bear to influence the Japanese.

Second, even if the Japanese were to build their own plane, they would still need to buy foreign engines to power that plane. They admit that they simply do not have the technology necessary to make the advanced jet engines. That is why they are so interested in getting licensed production of one of the new F-16 engines from Pratt & Whitney or General Electric for the FSX engine. They want to grab as much of our technology as they can.

The point is that the Japanese would have to come to the United States for the engine if they stay with a single engine plane. We have the only engines in the free world in this class. If the Japanese reverted back to their original twin engine design, there are two possible engine candidates, Rolls Royce and General Electric. I admit it is not clear what the outcome would be, but again, we do have the leverage to make them buy our engines. And if they went to the British just to spite us, I can think of a number of ways in which the favor could be returned.

So why are the FSX proponents so fond of arguing that we will get nothing if the Congress in its wisdom turns down the FSX deal? Why are they so defeatist and pessimistic about the ability of our companies to compete with the British for the engine business?

The FSX proponents do not want to analyze what really might happen if the FSX were turned down. They would rather use scare tactics instead. Go through with FSX or you'll get nothing. They do not want to put together a serious strategy to maximize our national objectives and to preserve our national security. They just throw up their hands and say, "We've just got to accept unfair Japanese behavior and take the best offer they make us."

This coddling of the Japanese is not the attitude that made our Nation great. It is not an attitude that will preserve this Nation as one after the other of our finest industries are destroyed. If we are to survive as a great Nation, we must take a stand. That is what this vote is all about today. It's about whether we have the courage to fight for American interests in the face of Japanese intransigence. We must reject the posture of the FSX proponents, who want to cave in to the Japanese whenever the going gets rough.

Apparently, it is fine with the FSX proponents if the Japanese spend three times what an F-16 would cost to make an FSX. It is fine with them if the Japanese use their scarce, one-percent-of-GNP defense resources to subsidize the building of an aerospace industry. It is fine with them if the American taxpayer has to continue paying to protect Japan for another 18 years until the last FSX is finally in place in 2007. All their objections fade simply because the Japanese have offered us $2.5 billion. It seems like a lot of money, Mr. President, but when you look at the stakes, American interests are being sold short for peanuts.

As I have said, I do not believe that we would get nothing if the Japanese went their own way. I think that there is probably a billion dollars or more of work in the engines and other components that we could sell the Japanese. But let us suppose that the FSX proponents are right, Mr. President. Suppose that there was absolutely nothing for us if the Japanese went their own way. Mr. President, I would rather have nothing from FSX than to give the Japanese a big boost in aerospace.

Because that is what the FSX deal is, Mr. President, it is an elevator ride to the top for the Japanese, in our elevator. To sell out in our one remaining profitable high tech industry, one that earns us many billions each year, for the price of $2.5 billion over 19 years is just ridiculous, Mr. President. And it shows how misguided the proponents of FSX are. They are willing to let American industry and American working men and women pay any price, rather than rock the boat with the Japanese.

And that brings us to another one of the false charges that FSX proponents make. They say that if we turn down the FSX deal, then irremedial harm will be done to our diplomatic and security relationship with Japan. Therefore, they say, we must always pull all our punches when we speak about Japan. If we raise our voices ever so slightly, the Japanese will get upset and we cannot have that. It is as though we must conduct a relationship walking on eggs.

Mr. President, it is high time that we put an end to this special treatment. It is time we spoke directly to and about the Japanese. I think it is wrong to continue to treat the Japanese as though they were a fragile flower, one that can be raised only in a specially constructed hot house.

Because that is what the situation is today, Mr. President. Japan lives in a special economic and security hot house that we helped them construct after World War II in order to help them recover from the devastation of the war.

Mr. President, there is no need for that hot house today. It is time that we dismantled that obsolete structure. Japan must take her place among the mature nations of the world and act according to the duties and responsibilities of an important and mature ally.

It is demeaning to the Japanese to argue, as the FSX proponents do, that Japan must continue to receive special treatment, that we must overlook the fact that they refuse to abide by the rules of free trade and buy our incomparable F-16's.

The FSX proponents act as though if this one deal does not go through, our entire relationship will fall apart. How can that be, Mr. President? Does this mean that the Japanese will refuse to let us protect them? Will they tell us to take our bases and go home? Will a nation that depends profoundly on the United States for its conventional and nuclear defense ask us to leave? Not likely, Mr. President. Japan would be virtually defenseless without our military umbrella. It is sheer nonsense to think that Japan would ask us to withdraw if FSX does not go through.

What about our economic relationship if FSX falls through? The suggestion is made indirectly by the FSX proponents that the Japanese will stop buying our Treasury bills and stop financing our debt. How do you think we finance our defense budget to protect them, Mr. President? How do we pay for all those Japanese consumer goods? Are the Japanese willing to stop sending us cars, televisions and VCR's? Do the proponents of FSX really think that the Japanese economy is totally independent of ours?

Again, Mr. President, these arguments are premised on the fact that FSX proponents think that the Japanese need or deserve special treatment. There is no real analysis or logic behind the arguments of the FSX proponents, just an intuitive sympathy for the Japanese point of view. Well, I reject that rationalization of the Japanese viewpoint, Mr. President. I believe it is about time that the American point of view received strong consideration, and strong representation, by the executive branch in our dealings with the Japanese. And if the executive branch cannot or will not do that, Mr. President, then it is up to the Congress to see that American interests are properly protected.

Another disturbing argument by the FSX proponents is that the Japanese have special mission requirements for the FSX and that no foreign plane could meet those requirements. So the Japanese of necessity had to design and build their own plane. I was disappointed to hear our new Secretary of Defense, Mr. Cheney, make this specious argument before the Foreign Relations Committee. Now I am sure Secretary Cheney will prove to be a fine Secretary but he needs better briefers on this topic. They should give him the position of DOD's own technical experts.

When DOD's Sullivan team went to Tokyo in April 1987, they told the Japanese that we rejected the notion that the FSX had a special or unique mission. In fact, they told the Japanese that any one of our most modern fighters, the F-14, F-15, F-16, or F-18, could perform the multiple missions that we foresaw for the FSX. This information was confirmed in testimony before the Armed Services Committee last week. The F-16 can perform the FSX mission superbly. The Sullivan team told the Japanese that we regarded the Japanese claim of a special or unique mission as nonsense. It was simply an attempt to rig the process and exclude American aircraft from consideration.

Now 2 years after we thought that Japanese argument had been put to rest, we find the American Secretary of Defense raising it on behalf of the Japanese before the United States Senate. Now I know that Mr. Cheney came to this matter recently, but his staff has done him, and us, a great injustice in feeding him Japanese lines of argumentation. The Japanese must be smirking to hear the American Secretary raise an argument that his own technical experts rejected out of hand 2 years ago.

The Japanese use the unique argument all the time to exclude our products from the markets. It is not only that the FSX mission is unique, so the Japanese do not have to buy United States fighters. The Japanese argue that their snow is unique, so they do not have to buy foreign skis. That is right, they actually claimed that foreign skis would not work on their snow. They claim that the mud in Kansai Bay is unique, so that American construction firms would not know how to deal with it and, therefore, could not build the new airport there. They claim that Japanese intestines are unique, they are 5 feet longer than those in other human beings, so that the Japanese cannot digest United States beef. And so on. Needless to say, Mr. President, the uniqueness argument is pure hogwash.

Mr. President, having addressed some of the more misleading arguments of the FSX proponents, I would like to review quickly a few additional reasons why the FSX is such a bad deal for America. The United States not only believes in, but also practices free trade. Japan says it believes in free trade, but practices mercantilism. That fancy word means Japan closes its markets and refuses to buy our highly competitive products.

Instead of having access to world class American products, Japanese consumers, businesses, and Government departments are forced to buy inferior Japanese imitations of our best products. In the meantime, the Japanese import the technology behind our best products and keep trying until they perfect products almost as good as ours. Then they dump those products on our markets below cost and destroy our industries. Finally, after our industries have been decimated, the Japanese open their markets partially, but we have no products left to sell because they have put us out of business. In short, the Japanese are protectionists of the first order. And that is what they intend to do to us in aerospace, Mr. President.

What could be a better example of Japanese protectionism than their refusal to buy the world's best, and least expensive, fighter aircraft, the F-16 Fighting Falcon? Instead, they are going to reinvent the wheel—as they have with so many high quality American products—and build their own plane. That is protectionism pure and simple.

And what about the cost of the FSX? Japan spends about $35 billion a year on defense. The United States spends about $285 billion, or nine times the Japanese amount. One would hope that the Japanese would spend their small defense resources carefully. Unfortunately, they do not. Instead of buying 130 F-16's for about $3 billion, they are going to spend $1.2 billion on development and $8 billion on production, a total of about $9 billion. That is three times what the same number of F-16's would cost.

And that figure of only three times the cost of the F-16 is extremely optimistic. The respected British magazine, The Economist, estimated in a recent issue that the development costs would be triple the Japanese estimate, or $3.6 billion instead of $1.2 billion. I do not think that any proponent of the FSX can justify the extra $5 to $8 billion cost of the FSX in light of scarce defense resources on both sides of the Pacific. And, ironically, while the FSX Program is wasting billions of dollars, DOD will almost certainly be engaged in long, drawn-out burden sharing negotiations with Japan, trying to get the Japanese to ante up another $100 million or so to meet common defense goals.

Aside from the much-ballyhooed $2.5 billion, is there really anything in the FSX Program for the United States? The proponents claim that there is access to advanced Japanese technology. The Japanese are always trumpeting their so-called advanced technology. But let us be honest about it—the Japanese are not now major players in aerospace. It is unlikely that they have the technology that they claim to have. But to be fair and to be thorough, several other Senators and I commissioned a GAO study in order to find out if there was in fact advanced Japanese technology. The GAO has just concluded their study and they have found that the claim of advanced technology is a false claim. There is no advance Japanese technology in the two areas of DOD interest, the phased area radar and the cocured composite wing. U.S. companies are far ahead in these areas.

But the thing that I fear, Mr. President, is that the Japanese will be given access to the advanced United States technologies in these areas during the course of the FSX Program once they have failed in their own attempts. Then, in order to show that the FSX did provide advanced Japanese technologies, we will make a purely political decision and import back Japanese technologies that are built on our technology. And that technology will be incorporated into future versions of the F-16 just to show how good the FSX Program was. And the United States companies that invented the technology in the first place, they will be closing their doors, while the Japanese companies will be adding a second shift to pump out the items for United States fighter aircraft.

So what is it that the Departments of State and Defense really want from the FSX Program, Mr. President? According to the GAO report, State and DOD admit that their reasons for promoting the FSX Program are not commercial or technological. They admit, Mr. President, that their reasons are purely political. What DOD and State really want is to protect the status quo with Japan. They are willing to pay any price to see that their heretofore comfortable political and security relationship is not disturbed. But they are living in the past. That relationship was built on an economic and political situation that does not exist today. It cannot endure on a false foundation.

And what is the FSX deal really all about for the Japanese? It is not about the common defense or Japan would be buying F-16's today in order to meet the current Soviet threat. It is not about saving scarce defense resources, or again Japan would be buying United States aircraft instead of spending billions of extra dollars on the FSX.

What FSX is really about for the Japanese is meeting their stated national goal of having a full fledged aircraft industry with which to challenge the United States in the next century. As John Harbison of Booz, Allen and Hamilton, wrote 2 weeks ago in the Sunday New York Times: "The Japanese are not trying to develop a plane; they are trying to develop an industry." FSX is part of a sophisticated Japanese national effort to develop a viable Japanese civilian aircraft industry. That's why the Japanese are so adamant about proceeding with FSX. They see their military aircraft industry as a necessary precursor and a critical component of their high tech aerospace future.

If they want an aircraft industry to try to compete with us that is fine, but we should not help them one bit. We should not give them one piece of technology that will further their goals on either the military or commercial side. It is very naive to argue, as the administration does, that they have scrubbed the F-16 technology list to remove commercially applicably technologies. The very existence of the FSX Program provides a kind of aerospace university in which Japanese engineers will learn the systems integration skills necessary to compete with us in both military and commercial aircraft.

It is time that we realize the stakes in the FSX Program are a lot higher than whether Japan can build one military aircraft. This debate is about our national future and the future of our alliance with Japan. If the Japanese continue to ignore free trade principles and common defense interests, then there can be no alliance in the future. If they are going to go their own way, so be it—but let us not be deceived into the thinking that they are acting as steadfast allies when they are not.

If, as some newspaper reports indicate, the Japanese will turn to the Europeans or the Israelis for help if the FSX deal is not approved, again so be it. If those are the true Japanese colors, it would be good to see them now, while we can still take appropriate action. And if they do go to those countries, then maybe the Europeans or Israelis should also be made responsible for Japan's defense.

For all these reasons, Mr. President, the FSX is a bad deal for America. The United States should not participate in or encourage this program in any way. The decision on FSX is really part of a larger decision about the survival of the United States as the world's preeminent economic and military power. I intend to protect America's preeminence and to vote against U.S. participation in the FSX Program. I urge my colleagues to do the same.

Mr. HEFLIN. Mr. President, I rise today to address the proposed technol-

ogy transfer to Japan so they can build the FSX fighter plane.

When consideration of the transfer of the United States F-16 fighter plane technical data to the Japanese began, a tremendous debate broke out ove the exchange. When the Senate first considered the transfer of technology to enable the Japanese to build their own FSX fighter aircraft, I felt that the deal had not been fully explored and voted to encourage the President to delay the transfer. After reviewing the administration's revised agreement, I still feel that the technology transfer would not be in the United States' best interests.

In my judgment, the transfer of this advanced fighter technical data to Japan could have severe long-term economic and national security consequences. I have seen nothing about this deal which would be to the United States' best interest except what some might call "a show of good faith." If this deal were the drawing of straws, Japan would get the long straw each time.

Supposedly, Japan will bear the entire cost of the program. They will pay us around $400 million for our most advanced technology which is worth over $7 billion. That does not sound like a good deal. The Japanese could get the same protection by purchasing American F-16's off the shelf. If the Japanese bought the F-16's, Americans would do 100 percent of the work. With the FSX, Americans will do only approximately 40 percent of the work. That does not sound like a good deal. The Japanese could buy the F-16's at a savings of $30 million per plane but have instead chosen to produce the more expensive FSX. That does not sound like a good deal. In exchange for our technology, the Japanese will give us their technology in areas in which we already hold the lead. That does not sound like a good deal. The General Accounting Office has said that in both composite wing technology and advanced radar technology, the United States holds the lead. The Japanese decided not to purchase the existing and proven F-16 fighters and honor their commitment to help reduce the growing trade deficit. That does not sound like a good deal either. This does not sound like a good deal for one reason—it is not a good deal.

The only way the exchange of information for the FSX fighter sounds like a good deal is if you are the Japanese Government with plans to create a dominant aviation industry. Every aspect of this trade gives the Japanese an unfair competitive advantage by selling our most advanced technology for a small price. The aviation industry remains a place where the United States has a large comparative advantage over the rest of the world. We should not throw away this advantage by giving the Japanese this technology on a gold platter. All factors of this trade indicate that the Japanese are more interested in creating a competitive aviation industry than in their actual defense.

We have seen this pattern before and will not have learned anything if we allow this trade to occur. The Japanese have consistently acquired technology from a country and soon competed against the original owner in the world market. Should we allow our comparative advantage in the aviation industry to disappear by giving away this technology as we did the technology for TV's, VCR's, and semiconductors?

Mr. President, let me touch just a moment on the technology transfer aspect of this deal. The F-16 is our most advanced fighter aircraft. The administration says that the F-16 technology transferred to Japan will be protected and the advanced technology developed in the FSX program can only be used for this limited program. However, this is virtually unverifiable. We fell into the same situation recently with highly sensitive submarine propeller technology. Toshiba leaked this important information to the Soviets. We still do not know the extent of the damage of this intelligence leak—only that it will cost us billions to overcome. Are we going to fall into the same trap again? I certainly hope not.

Also, Mr. President, I am very disturbed by recent reports that Mitsubishi Heavy Industries, the Japanese company that will build the FSX, possibly was involved in the construction of the plant in Libya which is suspected of producing dangerous chemical weapons. I believe that this matter must be cleared up before we jump headlong into the FSX deal.

Mr. President, the Japanese spend only 1 percent of their GNP on defense and we should not allow them to squander these funds. They should purchase the F-16 fighters from the United States and save $30 million per plane. This would reduce the trade deficit, allow Japanese defense funds to be spent elsewhere, provide 100 percent American jobs for the fighters, preserve the American lead in the aviation industry, and provide for the Japanese defense much sooner than the FSX fighters. That sounds like a good deal because it is a good deal. We should scrap the FSX and sell the Japanese F-16 fighters.

Thank you, Mr. President.

Mr. KERRY. Mr. President, the FSX deal is not just an airplane deal. It simultaneously concerns broad issues of defense, foreign affairs, and the economy—indeed, the very definition of national security in the coming decades.

As I've been saying for some time, we cannot be the strongest nation in the world militarily if we are not the strongest nation in the world economically. Our Federal budget and trade deficits—including a $55 billion trade deficit with Japan—are evidence of fundamental economic problems that if uncorrected threaten our national strength.

The trade deficit is not something new. It's been in tens of billions a year now for most of the eighties and shows no real signs of abating. Throughout that period, we've found oursleves seeking to redefine our economic relationship with Japan by getting it to buy our goods. These efforts have largely failed.

Now, comes the FSX deal, which in many ways is a response to that environment.

On the one hand, the FSX deal is evidence that Japan can be encouraged to buy American technology when we make it in their interest to do so. Under the terms of the deal, they would be purchasing some $2.5 billion of American goods and know-how in codeveloping the plane.

On the other hand, the FSX deal is evidence that Japan continues to refuse to buy American-made goods even when they are cheaper than what Japan can manufacture. We know, and so do the Japanese, that Japan could buy state-of-the-art F-16's for many billions less than the cost of the FSX. Japan has no interest in doing that, however, because they have a second goal: To gain knowledge about how to build planes, and to them that is worth a lot of money.

So it is fair to say that the FSX deal is indeed characteristic of our relationship with Japan generally. The Japanese will buy from us—but only as a means of developing further the ability to produce the goods later on their own. The question that we then need to ask ourselves, is it in the interest of the United States to help them do so?

Let us look at the details of just what each side promises under the deal.

The United States will give Mitsubishi Heavy Industries, the prime contractor on the deal, detailed technical data on the F-16, including design and test data. General Dynamics, the prime U.S. subcontractor on the deal, will not only supply Mitsubishi with the design information, but provide technical assistance throughout the development process, and produce parts of the prototypes for the plane.

In return, United States firms are to be granted access to any new Japanese technology derived from the technology provided by the United States, as well as other technologies developed by Japan in the course of the project. Mitsubishi will allocate 40 percent of the development work to U.S. companies. And the administration has stated that Japan has committed to

giving United States firms 40 percent of the production work as well.

So, the potential good brought about by the FSX deal is—

First. That the United States gets some new access to current Japanese technology's high-strength materials and radar, and

Second. That the United States gets whatever "flow back" takes place in new Japanese developments from the codevelopment, as the Government describes it, "automatically and at no cost," and finally,

Third. That United States companies get some additional business with Japan, amounting to about $480 million for the codevelopment, and perhaps $2 billion for production.

That summarizes the upside.

The downside can be summarized much more simply—the risk that the deal will help Japan develop an aviation industry that kills off our aviation industry through predatory competition.

It has happened before.

We all know where Japan's economy was after the end of World War II, and where it is today, and where our economy was then, and where it is today. Then, the United States produced goods for the world. Now, Japan does. Then, the United States was the biggest creditor nation in the world. Now Japan is, and the United States is the biggest debtor nation in the world. Then, we were the economic leaders, the technical innovators, now Japan is.

The phenomenon has been called "Trading Places," which is also the title of a recent book by former Reagan administration trade negotiator Clyde Prestowitz, Jr., subtitled "How We Allowed Japan To Take the Lead." The book is a sobering description of how in industry after industry, the United States allowed Japan to reverse places with the United States.

In the opening chapter of his book, Prestowitz recounts case after case to document the reversal in our country's economic fortunes over the past 20 years:

> The United States had effectively lost its consumer electronics industry by the mid-1970's and had also been forced to protect its textile and steel industries. In 1981, it begged Japan to restrain auto exports.
>
> In 1984, the President's Defense Science Board warned that the nation was falling behind in high technology.
>
> On 5 November 1985, members of the President's cabinet met at the White House to consider the crisis in the semiconductor industry. The heart of the high technology underpinning both the nation's prosperity and its defense, this key industry was being devastated by Japanese competition. Nevertheless, most present opposed taking any action, believing, as one of the President's top advisors remarked—that "If our guys can't hack it, we ought to let them go."
>
> On 24 October 1986, Japan's leading computer manufacturer, Fujitsu Corporation, made an offer to buy Fairchild Semiconductor Company, but withdrew it after opposition was voiced by Secretary of Commerce Baldrige and Secretary of Defense Weinberger on the grounds that the US was becoming too dependent on Japan for critical technology.
>
> Over the summer of 1987, as the US became the world's largest debtor, interest rates continued to rise as foreign investors, primarily Japanese, demanded a higher return for investing in an increasingly risky US market. One French leader noted that the US now had two central banks, the Federal Reserve system and the Japanese insurance companies.
>
> In late 1987, as the US international debt surpassed that of Mexico and Brazil combined, US payments to foreign investors exceeded US income from holdings abroad for the first time in fifty years. Meanwhile, Japan became the world's largest creditor and passed the United States in per-capita gross national product.

Prestowitz argues that the situation has become a serious threat to United States national security, and is the result of "a critical misunderstanding about the nature of Japanese society and economic thinking * * * to them, promotion of key industries is not economically harmful but is, on the contrary, necessary to ensure the future prosperity of the nation, which they see as inextricably linked to its power."

"As a result of policies based on false assumptions and ignorance, the power of the United States and the quality of American life is diminishing rapidly in every respect," Prestowitz writes. He then quotes a former official of the Japanese Ministry of International Trade and Industry or MITI who had one of the most powerful positions in Japan, Keichi Konaga, who asked Prestowitz one question about United States relations with Japan—"why don't you wake up?"

Why do we not wake up, indeed? If the Japanese do use the FSX deal to develop an industrial base for an aerospace industry, how will we repair the damage?

In 1970, the United States produced 90 percent of phonographs sold in the United States—today 1 percent. In 1970, we produced 90 percent of the color TV's, today 10 percent. In 1970, we produced essentially 100 percent of machine tools, today 40 percent; 99 percent of telephone sets, today 25 percent; 89 percent of semiconductors, today, only 64 percent.

I for one, am not willing to take the risk that the U.S. aerospace industry that today reduces our trade deficit by $16 billion a year will join those industries.

The administration contends that the U.S. commercial aircraft industry need not fear from the FSX deal, because commercial and military technologies differ.

Yet the 1989 National Trade Estimate Report on Foreign Trade Barriers published by the Office of the U.S. Trade Representative suggests that the opposite is true. According to the report:

> Japan has targeted its aerospace industry for development. The government had formulated a plan and taken significant steps to enhance the competitiveness of its domestic industry. The effects of Japan's targeting efforts have not yet hindered U.S. industry, but there is a potential for negative effects.
>
> The Japanese government plans to make aircraft production one of Japan's major industries within 20 years. This would mean direct competition with the U.S. aerospace industry which is the largest in the noncommunist world. Japanese competition could come earlier in the rotocraft and aircraft components industries. * * * [I]f Japan's target goal is met, future lost sales to the U.S. industry would be significant although now impossible to quantify.

Dr. Robert Barthelemy, the United States National Aerospace program director, recently addressed a group of Senate staffers, and told them that the Japanese have informed him that they intended to excel in the aerospace industry, and were committed to spending $16 billion to achieve the goal.

That is not a change—the Japanese have been looking to build a civilian aerospace industry for a long time. In September 1980, MITI—the Japanese Ministry of International Trade—reported that:

> Although costs and performance requirements for commercial and military aircraft are different, development and production techniques are closely related. Therefore, research and development of commercial and military aircraft should be carried out in tandem.

In the words of MIT Prof. Richard Samuels, who heads the MIT-Japan program, we should believe the Japanese—

> When they say clearly that this project is an important step for Japanese producers who seek to establish a global position in aerospace in the 21st century * * * for the Japanese this is not just about creating jobs, but about creating comparative advantage * * * the FSX is a next major step in the development of the Japanese aerospace industry.

I believe we are endangering a $16 billion a year industry in return for a one-time payment less than $3 billion; that the Japanese will use the deal to consolidate technologies which they will then transfer to the civilian aviation industry, and that we are giving them the means to take away our markets in yet another essential industry.

We should also recognize that the deal allows Japan again to fail to honor its promises to buy American products when they are superior in price and quality; and to share less of the defense burden for Japan by spending billions to develop an aircraft that will be less capable than planes already available.

Indeed, in a way, the FSX deal itself is a consequence of a Japanese unfair trade practice—its unwillingness to

buy our F-16 planes, which are completely sufficient to meet Japan's needs for national defense.

I believe it is not in the interests of the United States or the American people to help Japanese firms become global competitors with United States firms in the aerospace industry. Unless and until our economic relations with Japan generally have been put on a far more equal basis than they are today, we should make it our national policy to promote United States penetration of Japanese market shares in essential industries, not the other way around.

We should remember that our aviation industry did not grow up in a vacuum, but rather traces its technological roots and branches to an extraordinary investment on the part of the American people through years of spending on our air force. Every one of us paid the price to make sure that no country in the world had a more sophisticated capacity to defend its skies.

Having made that investment, it would be foolhardy for the American people to permit their Government to turn these technologies over, virtually free of charge, to a close and valued ally, who is also a tough and sometimes predatory competitor.

Mr. President, it defies common sense for us to give away this investment to the Japanese, and allow them to use it to take away our markets in the future. This is not a statement of hostility to Japan or its people. It is simply not rational economic behavior on the part of the United States to provide Japan with essential technologies and experience in the aerospace industry, allowing them to shortcut the development process that we went through.

I urge the Senate to affirm the Dixon resolution to disapprove the FSX deal.

Mr. KOHL. Mr. President, after carefully examining the proposed cooperative development program for the FSX fighter between the United States and Japan, I have come to the conclusion that it is not in our national self-interest. Accordingly, I intend to vote against the agreement. Let me explain why.

To begin with, I think it is misleading to suggest that this is a military deal. Clearly Japan is not approaching this agreement from a military perspective. After all, if their interest was in getting a sophisticated fighter, they could have had the F-16, for about a billion dollars less than they will spend on the FSX. And they could have had it now, rather than waiting for years until the FSX is produced. They aren't looking for a plane; they are looking for a technology.

It is also clear that Japan is not entering into this agreement in order to reduce its $52 billion a year trade surplus with the United States. The most effective way to achieve that goal would have been to buy the F-16 or eliminate some of the trade barriers which prevent our products from entering their markets. They are not looking for a way to reduce the trade surplus; they are looking for a way to develop an industry.

No, Mr. President, this is not a military deal—it is a deal that has to be evaluated in terms of its effect on our economic security.

Now in that context, some of the proponents of this sale tell us that it really is good for our economy. They tell us that working with Japan on the FSX will allow our industry to learn about new technologies which the Japanese have and we do not. That may be what the proponents of the sale tell us, but it sure isn't what the objective General Accounting Office of the United States says. The GAO reported on May 8, 1989 that the FSX program, according to Department of Defense itself, "was not pursued with the primary objective of obtaining access to Japanese technology or balancing the exchange of technology." The GAO did report that once the deal was agreed to in principle, then the United States started to talk about trying to get access to any technology Japan might have. But, in the two areas touted as giving the United States a technological boost, the GAO concluded that "the United States has superior composits technology and appears to be ahead in the radar development."

Of course, even if we do not get any technological benefits, we are supposed to get an economic boom from the deal. Not as much, clearly not as much, as we would get if Japan simply bought our F-16's off the shelf, but still some benefits. After all, we are told, the new and improved agreement which the administration negotiated is designed to make sure that we get "approximately" 40 percent of the work for both the development and production phases of the agreement.

If we could be sure that we could get 40 percent of the work, that would be something. But we ought to look at that commitment very closely before we start to get too excited.

When the agreement was negotiated by the Reagan administration, it included the 40-percent standard just for the development work. In terms of production, all we were told was that there would be a "good faith effort" made to achieve a similar division of the work. The Bush administration, particularly the Commerce Department, was not satisfied and attempted to get a more concrete agreement. When the renegotiation began, Japan is reported to have tried to translate its "good faith effort" into language which assured the United States 28 percent of the work. If "good faith" equals 28 percent, then it is possible that "approximately" will turn out to be 30 percent. In fact, it is possible that the value to America of production work may be nothing since this agreement covers only development—we would have to negotiate a new agreement if Japan decided to produce the plane. The point is that we do not have any firm understandings about our workshare of the production; we do not even have vague understandings about the more lucrative spare parts market which may be worth as much as two or three times the original deal; and what we do have is included in an exchange of letters rather than in the memorandum of agreement itself.

Well, if we do not get much from the deal, what do the Japanese get? Mr. President, they get what they have always wanted: the technology to develop their own aerospace industry.

I would ask my colleagues to take a look at "Made in America: Regaining the Productive Edge" by Michael Dertouzos, Richard Lester, Robert Solow and the MIT Commission on Industrial Productivity. Their analysis of the aircraft industry begins on a bright note: "among all the industries studied," they report, "the commercial-aircraft industry is the strongest exporter and has the healthiest trade balance." But, they go on to suggest that our position is not really secure. We all know about the competition coming from Airbus, but the MIT study also tells us that "the Japanese Government has designated aerospace as one of three key technological areas for the 21st century, and Japan looms as a potential independent competitor." But if Japan is to become a major competitor, they have to develop their technology. They are: the MIT study reports that in Japan "by the early 1980's government aid to jet engines almost equaled that given to computers and exceeded that for telecommunications, energy, and new base technologies." Their advances in this area make them a substantial player; the FSX deal will make them a major player since, as MIT concludes, "international partnerships inevitably tend to diffuse new technologies among the cooperating nations." And that is true, Mr. President, no matter how tightly one tries to restrict the technology transfer.

Mr. President, I want to work with Japan. I want to see them pick up more of the burden of defending themselves. I want to see our trade relationship improve. But giving away the store is not the best way to improve relationships or protect our own interests.

Mr. President, I was in business for a long time. I know that deals are never all good or all bad. I recognize that once Japan decided not to buy our F-

16's, they were going to get some technological benefit. I also suspect that if we do not make this deal with Japan, they will try to reach an agreement with other nations in an effort to get the technology they want. And if that happens, we will not enjoy the "approximately" 40 percent of the work that this deal does give us. So I know there is a downside to rejecting this proposal.

But Mr. President, it comes down to this: I do not see why we ought to cooperate in our own destruction. I do not understand why we do not put up a stronger fight for our own interests. I can not comprehend why we simply roll over and play dead. We ought not make it easier for Japan, or any other nation, to gain an advantage over us. This deal does just that—and that is why I will oppose it.

THE FSX SALE

Mr. PRYOR. Mr. President, we are about to vote on whether America should hand over to Japan, specifically to Mitsubishi Heavy Industries, the technology behind the world's finest fighter, the F-16 Fighting Falcon.

Mr. President, Americans believe in free trade and we practice it in those areas of international commerce where there is reciprocal free trade. Unfortunately, Japan has too often practiced protectionism in its trade dealings with America, which has led to a whopping $54 billion a year trade deficit with the United States.

Nowhere is this unfair Japanese approach to trade more apparent than in our rice trade, or, more accurately, our lack of rice trade with Japan. In short, Mr. President, we are completely shut-out of the Japanese market for rice.

This is not free trade? It is not fair trade?

Let us talk for a moment about whether this FSX deal is a free and fair trade. Mr. President, we are giving the Japanese roughly 7 billion dollars' worth of F-16 technology that they will use to develop their military and commercial aviation industries. It is hardly a secret that one of Japan's long range goals is to develop an indigenous aircraft industry that could challenge United States aviation leadership.

What are we getting in return? Based on what I have learned I would say that we are getting some false hopes. We are being promised $400 million in return for $7 billion worth of our technology. We are also being promised that the Japanese will hand over two new technologies developed in Japan.

However according to the General Accounting Office, these so-called new Japanese technologies are available and of superior quality in the United States.

Is it a fair trade, Mr. President. I say no.

At issue is this debate is not whether we support our military allies. Japan is an important ally, but we have proven our dedication to protecting Japan's interest over and over again. We prove it by spending a good deal of our defense budget on projecting the United States military umbrella to include Japan. We have proven it by putting our Navy in harms way to keep sea lanes open in the Middle East through which oil crucial to Japan's economy must be transported.

Finally, Mr. President, we have proven our dedication to Japan's defenses by offering to build for them as many F-16's as they want to buy. Mr. President, it does not make sense and it is not fair that we are now being told that we must again prove our loyalty by giving away the technology underlying the F-16.

Mr. President, America spends almost $300 billion a year on our military. Japan spends roughly $35 billion. If the ultimate goal is to strengthen Japan's defenses, then it would make sense for Japan to commit its limited military budget to purchasing advanced aircraft from the United States rather than embarking on an expensive and risky venture into building its own advanced aircraft.

No, Mr. President, the FSX deal we vote on shortly is not a good deal or a fair deal and if it goes through we have no one to blame but ourselves.

I will vote for the Dixon amendment to disapprove of the FSX agreement.

Mr. PELL. Mr. President, I think the Senator from Illinois [Mr. DIXON] has put forth a cogent and interesting case. Nonetheless, I have concluded that I must, with reluctance, vote against his Senate Joint Resolution 113.

I have made this decision for the following reasons:

I do not believe that we could have achieved a substantially better arrangement with Japan. I would have preferred very much that the Japanese had purchased the F-16 aircraft, which is a frontline fighter in our own inventory and would have served them well. Unfortunately, that was not an option, and our realistic choice was to allow the Japanese to go it alone or in partnership with some other nation. Frankly, I believe the correct choice has been to craft a workable, cooperative arrangement, rather than to have the Japanese go in another direction. Had the Japanese pursued a different course, I believe it would have made it much more likely that they would compete with us on the international market at a measurable cost in American jobs and income.

We have been arguing for some years with the Japanese that they should take on a greater share of their own defense and that we would cooperate with them in this. Having encouraged them in that direction, it does not make sense for us to impede their own efforts in that direction.

This arrangement will benefit American industry and labor. The codevelopment project could mean that the United States will gain about $500 million. If this cooperative arrangement proceeds into a production arrangement, it could mean considerable profit to the United States with workshare yielding perhaps $2 billion or more.

The President has, in reaction to congressional criticism and substantial dissent within the administration, acted to improve the deal. As a result, the safeguards in the arrangement are much more clearly spelled out.

The President achieved an important new control on any future production by achieving an arrangement that the U.S. workshare will be approximately 40 percent. This workshare has been a highly contentious matter and the President was most prudent in determining that clarification was essential.

Having reviewed this deal carefully, Senators BYRD, DANFORTH, MOYNIHAN, and I, as well as others, have concluded that additional safeguards were feasible and could be achieved. We have incorporated these safeguards into an amendment which I believe merits and will receive the support of the Congress.

Finally, against this background, I believe that the President can safely be given the benefit of the doubt. There are sufficient protections and the Committee on Foreign Relations, which I chair, as well as the full Senate will be following this matter closely as the codevelopment arrangement proceeds. Given the debate, I am sure that the administration will wisely consult closely with the Congress as it moves toward a coproduction agreement.

Mr. BAUCUS. Mr. President, we are witnessing a unique debate on the Senate floor today.

Japan is a close and trusted ally of the United States.

The very idea that a major military agreement with a close ally could be endangered by trade concerns was unheard of even a few years ago.

So what has changed?

Mr. President, the real issue we are debating here today is much bigger than the FSX fighter.

Senators have not taken the floor to vigorously argue against this agreement because they believe Japan is not a trustworthy ally.

Senators have taken the floor because the economic relationship between the United States and Japan is fundamentally out of balance.

The $55 billion United States trade deficit with Japan is the most obvious symptom, but there are others.

Simply put, Japan has refused to play by the rules.

As James Fallows eloquently pointed out, Japan has pursued an economic policy of discouraging imports and encouraging exports. A policy that called for Japanese economic dominance in all sectors.

In an interdependent world economy, that is an unacceptable national policy.

Japan—perhaps more than any other nation—has prospered from free and open world markets. But Japan has not been willing to open its own market.

Mr. President, 2 weeks ago, the U.S. Trade Representative released the National Trade Estimate.

The National Trade Estimate—commonly referred to as the NTE—is a listing of foreign trade barriers.

In the NTE, 18 pages were devoted to simply listing Japanese trade barriers. No other nation warranted more than 10 pages.

The NTE listed Japanese trade barriers ranging from restrictions on forest product exports to violations of the Semiconductor Trade Agreement to barriers limiting United States exports of supercomputers.

And the NTE is only the latest in a large body of evidence.

Two recent studies, one by the Brookings Institute and one by the Institute for International Economics, concluded that Japan imports 25 percent to 40 percent less than would be expected for a nation at its level of development.

A recent report by the President's private sector trade policy advisory group estimated that Japanese trade barriers may be costing the United States as much as $30 billion each year.

The evidence is so overwhelming that distinguished U.S. business groups, such as the U.S. Chamber of Commerce, the National Association of Manufacturers, and the Emergency Committee for American Trade—long unflinching advocates of free trade, have asked the U.S. Government to take action against Japanese trade barriers.

The refusal of the Japanese Government to buy the United States F-16, instead opting to produce its own aircraft, is only the latest example of a very consistent pattern of behavior.

The debate today demonstrates that the U.S. Senate is no longer willing to accept the status quo.

We can no longer afford to open our market to Japanese products while Japan closes the door to our exports.

We can no longer afford to have the Defense Department and the State Department negotiate agreements without regard for U.S. trade and economic interests.

In large part to address the problem of Japanese unfair trade practices, the Trade Act of 1988 contained a provision known as Super 301.

Super 301 established a procedure for identifying those nations that maintain extensive trade barriers and initiating negotiations to eliminate those barriers.

Although no nations were specifically referenced in the provision, the main target of Super 301 is Japan.

As this debate goes on in the Senate, another debate is raging within the administration over whether or not to use Super 301 to attack Japanese trade barriers.

According to the New York Times this morning, the State Department is vigorously arguing against using Super 301 on Japan.

I hope that the administration takes note of the sentiments expressed in this Senate debate and uses Super 301 to attack Japanese trade barriers.

If the administration fails to use Super 301 on Japan, the consequences could be far graver than just losing the FSX agreement.

I plan to reluctantly vote against approval of the FSX agreement. The choice I am faced with is very difficult.

We should have pushed harder to convince Japan to simply buy our F-16's.

Also, I believe we should have considered our economic interests earlier rather than waiting to the end of the process when there is no alternative to turning the agreement down.

I understand the irritation turning this agreement down causes our Japanese allies. They thought they had a deal.

But my patience has run out.

According to the GAO and other unbiased observers, the FSX agreement is a bad deal for the United States.

The agreement will help Japan fulfill its long-term goal of establishing a world-class aerospace industry—an aerospace industry that would soon be competing head-to-head with the most successful sector of the United States manufacturing industry.

We cannot sit by and watch America's competitive edge be wiped out in yet another industry.

Economic and trade issues must be given greater weight in future dealings with Japan.

Apparently, the only way to get that message to the administration is to take drastic action. That is a very unfortunate reality for executive-congressional relations.

The United States and Japan need each other. The underlying relationship between the United States and Japan is strong. And a continuing strong bilateral relationship is vital to both countries.

But the inequitable trade relationship is undermining the positive aspects of the United States-Japan relationship.

In the interest of preserving a strong relationship into the next century, the United States and Japan must immediately begin to solve the trade and economic problems.

Finding a more equitable solution to the FSX issue is the first step down that road. I hope that we use Super 301 as a springboard to go further.

The Congress will no longer stand by and see economic problems swept under the rug.

Mr. DIXON. Mr. President, I simply wanted to say while my dear friend and colleague from Illinois is still on the floor that PAUL SIMON honors me greatly by his statement and his vote in the committee in support of my resolution of disapproval. There is no more thoughtful man in the U.S. Senate than my colleague from Illinois, Senator PAUL SIMON.

I have had the pleasure and the distinction and the honor of serving with PAUL SIMON in public service since we were very young men in the Illinois House of Representatives in the very early 1950's. As many here know, we do not always vote the same way, so that his vote here was not a vote to be voting the same as ALAN DIXON. His vote here was a thoughtful and careful vote that he arrived at after hearing all the evidence. I would just like to tell one story about my colleague, Mr. President, who I have the deepest personal affection and the greatest personal admiration for.

One time many years ago when we were very young men in the Illinois House, there was a tremendously popular man in our State who was auditor of public accounts, and he came from our part of the world from southern Illinois. He was from Granite City, I was from Belleville and Paul was from Troy. We were each about half an hour away from this fellow, the auditor of public accounts. Everybody was fond of him. Everybody said he would be Governor sometime soon.

He had an appropriation bill to substantially increase the appropriation for the operation of his office as auditor of public accounts. Everybody in the House of Representatives voted for it save one. Everybody thought, how in the world could PAUL SIMON vote against that appropriations for our popular friend who is auditor of public accounts? Frankly, many were very critical of him. He was a very young man in either his first or very early term in the Illinois House.

Mr. President, that auditor of public accounts was indicted for stealing millions from the State of Illinois out of the funds in his office. He was sent to the penitentiary and served many years' time in this penitentiary of our State, and one thoughtful man in all of the legislature at that time had the good sense and the courage to vote no on his appropriation bill.

I have been watching PAUL SIMON'S votes all my life since then, Mr. President. No man has the integrity and the mission and the purpose that I have ever known that I find in my colleague and friend. I am deeply honored that he is supporting me in what I consider to be this very worthy cause, and I express to him my profound personal appreciation.

Mr. DURENBERGER. Mr. President, I want to commend the proponents of this resolution for their broad exposition of the troubling issues surrounding the FSX codevelopment arrangement entered into between the United States and Japan. They have presented cogent and well-reasoned arguments as to why the United States should hesitate before entering into a technology transfer arrangement of the proportions of the agreement currently before us.

And I want to commend the opponents of this resolution for placing the FSX arrangement in a broader geopolitical perspective and for their forthright response to the many concerns that everyone of us in this body have concerning this transaction. On balance, this has been one of the most elucidating and important debates we have had in the Senate in many years.

Mr. President, before casting their votes, I urge my colleagues to consider precisely the nature of the issue that we will soon vote on, and the forseeable consequences that will surely result if this codevelopment arrangement is disapproved or if it is approved. In that context, I would point out that the issue before us is not whether the Japanese should purchase the General Dynamics F-16 fighter aircraft off the shelf as part of its effort to upgrade its air defense forces. That is not the issue currently being debated and was never a viable option.

The reason the Government of Japan decided to upgrade its air defense forces is because it made a commitment earlier in this decade, to assume primary responsibility for protecting Japanese airspace, coastal waters, and sea lanes out to 1,000 miles. In deciding what fighter would be most suitable for this task well into the next century, the Japanese Government has always considered only two development options. The first option, strongly supported by Japanese defense contractors, was to manufacture an entirely new fighter aircraft relying exclusively on Japanese domestic technology. The second option considered was to develop jointly with the United States a modified version of the F-15, F-16, or F-18, or to codevelop a modified version of the British Tornado fighter in conjunction with the West Germans and the Italians.

In 1987, when evidence began to mount that the Government of Japan was leaning strongly toward the go-it-alone first option, the Government of the United States entered into a series of high level negotiations in an effort to convince the Japanese to instead agree to joint development of a new fighter aircraft using a United States fighter as the basis for the project. Bowing to United States pressure, the Japanese in October 1987, announced that it would forego domestic development of a new fighter and instead decided to spend approximately $6 billion developing an advanced version of an American fighter, namely the F-16.

After more than a year of negotiations aimed at implementing the memorandum of agreement [MOU] between the two countries, the Reagan administration finalized the agreement in late 1988. However, when questions arose concerning some of the technology proposed to be transferred, and the exact share of the project that would be awarded to the American subcontractor, the new administration successfully sought to reopen the agreement.

I am convinced that the final package negotiated between the two countries is a significant improvement over the original agreement by not only protecting sensitive computer software source codes, but also ensuring that American industry will receive a fair percentage of the development work associated with this project.

Mr. President, what should be eminently clear today is that the agreement that we are debating is an agreement that was: First, actively sought and pursued by the United States Government and the U.S. defense contractors who will participate in a large share of the project; and second, reopened and renegotiated at the request of the U.S. Government.

I ask my colleagues the simple question: "What will happen if we disapprove this agreement that was initiated at our request?" Japan's vast financial resources and advanced technological expertise guarantee that it will not turn around and decide to purchase off-the-shelf F-16's. It will either begin to develop and produce the FSX on its own, or it will seek to collaborate with the advanced aerospace companies in Western Europe to develop another version of the FSX. In either case, one thing is certain: Defense contractors in the United States and thousands of their employees will not receive a single dollar of the nearly $3 billion in development work that can be expected from this agreement. That money will either stay in Japan or be funneled to our European aerospace competitors.

Mr. President, I have heard many arguments in the past week that the FSX arrangement is a one-sided giveaway of American technology that will ultimately build the foundation of a vigorous Japanese competitor to the American aerospace industry. Although I have some misgivings about sharing some of our most advanced aerospace technology with the Japanese, I am not that concerned that this agreement is such a one-sided giveaway.

In the first place, the Japanese will license the F-16C block 40 design which is a second generation redesign of the 1978 version of the fighter. I would note that this is not even the most advanced version of the F-16, since General Dynamics is currently developing a block 50 design that contains even more advanced electronic systems than the block 40. Moreover, our defense contractors are currently developing far more sophisticated and advanced fighter aircraft than the F-16, specifically the Stealth F-19 fighter, which will ensure U.S. preeminence in military aircraft technology for the foreseeable future.

More importantly, this is not a one-way deal that only benefits the Japanese. The time is long gone when the United States can believe that it holds a monopoly on all high technology development and production. In fact, there are several areas where experts would concede that the United States can learn many lessons from the Japanese about how to produce high technology products more efficiently and effectively. I believe the United States may turn out to learn as much from this arrangement about high technology production as the Japanese will learn about aircraft production from the agreement.

For example, we will surely gain many insights into Japan's technological advantages in composite technologies and phased array radars. More importantly, the Japanese have agreed to return any improvements they make in the production process at no charge to the United States and to make available any original Japanese technology used in the FSX development project that is specifically requested and paid for. In effect, this agreement may well serve to improve United States military aerospace technology and production through the transfer from the Japanese of much of their commercial manufacturing and electronics expertise.

Mr. President, this morning the Defense Department released a report indicating that the Japanese currently have a significant lead in developing 6 of 22 technologies that the Pentagon considers crucial to national security and the long-term qualitative superiority of American weapons systems. For example, the report found that Japan is ahead of the United States in certain areas of microelectronic circuitry and integrated optics.

Certainly if these rapidly developing technologies are incorporated into the FSX, the United States will be able to

share in technological and security benefits that are associated with these advances. To reject this codevelopment project is to walk away from gaining intimate access to these extraordinary advances.

Mr. President, underlying this entire debate is less a fear that Japan will become a significant military competitor to the United States than that it will use the manufacturing technologies developed in this project to become a significant threat to our commercial aviation industry. What is indeed most surprising is that none of this Nation's premier commercial aerospace companies, including world leader Boeing, oppose this agreement. And the reason the commercial aerospace industry does not oppose the project is because the industry knows that most of the military technology transferred pursuant to the FSX project will not facilitate Japan's entry into the commercial aviation industry because most of the critical manufacturing processes and technological specifications for military hardware are far different than are necessary for commercial aviation.

In addition, because of the extremely high development costs and risks associated with new generation commercial aircraft, the commercial aerospace industry is already well ahead of our military in codevelopment projects involving jet engine technology and airframe development. In fact, the Japanese are already engaged in coproducing portions of the advanced Boeing 767 commercial airliner and have been engaged in a joint research project with Boeing on the next generation of fan-jet commercial aviation known as the 7J7.

Finally, Mr. President, we should not overlook the fact that Japan is not only our most important economic partner in the Pacific but also serves as the foundation of our strategic interests in the Pacific. At the very moment that we are debating the issue of our military and economic relations with the Japanese, the leaders of the Soviet Union and the People's Republic of China are meeting in Beijing to attempt to rebuild a relationship that fell apart 30 years ago. The implications of this renewed partnership offers great possibilities for future peaceful change in the Pacific region. But it also could serve to diminish U.S. influence in this part of the world and undermine our strategic interests in the region.

Mr. President, all of us will concede that Japan must do more to open its markets to our commercially competitive products. It is neither in Japan's best interests, nor ours that our bilateral trade deficit continues to run at the level of the past recent years. But we should not allow the commercial tensions between our two countries to serve as the vehicle to undermine the vital political and military interests that we hold in this region.

I believe that our military, economic, technological, and political interests will be best served if we fulfill our commitment to carry out this codevelopment project. If we renege on this commitment, the long-term consequences to our bilateral relations could reverberate well into the 21st century.

Mr. GORE. Mr. President, if Congress votes against the FSX contract, we shall have turned a very important corner. Such a vote would mean that Congress—having weighed Japan's value as a military ally on the one hand, and Japan's threat as an economic competitor on the other, is prepared to give greater consideration to the latter.

It will signify our readiness to invite the Government of Japan to do whatever it then deems to be in its best interests, and live with the consequences of that, rather than proceed with the FSX contract.

This is not a minor matter. It can have a profound impact upon the thinking of the Japanese people, as well as of their government. The fact that such a decision will come at a moment when we are at loggerheads over nuclear modernization with another major ally—the Federal Republic of Germany—only underscores the strength of the centrifugal forces now at work on the system of collective security, which this country created, and of which it remains the necessary center.

And yet, the economic stakes are very great: far outstripping the immediate value of shares of production and access to technology in and around the FSX project itself. The game here ultimately concerns aerospace: one of the few areas where the United States retains a marked advantage.

It is obvious that the FSX has its place in a larger Japanese interest, far transcending the need for a new military aircraft. Were military necessity to be all that is at work here, then Japan ought to have purchased the F-16, or worked out a coproduction arrangement. Instead, Japan's first preference was to have developed the FSX entirely on their own, but failing that, to codesign it with us. And the reason for that is clear. This is the way in which Japan can gain experience in advanced materials, engine design, avionics, and systems integration: not for the next military aircraft, but for a larger scale venture into commercial aerospace.

Like other Members of the Senate, I have scrutinized information provided us about the details of the FSX contract. I hoped to find guidance there as to whether we should proceed or not. But it would be possible to vote against the FSX even if the contract were itself in perfect order. The choice involves issues larger than the local technicalities of this deal.

This will be instead, an apples and oranges decision. A decision in which national military security and national economic security must be balanced, even though they are values measured in different units of account.

The only bridge between these values is not in place. It would be a forward looking United States strategy aimed at sustaining our lead in aerospace, not just against potential competition from Japan, but against actual ongoing competition from Europe. Europe after all is hot on our tails with real products: Europe is competing with us for the civil aviation market; the military aviation market, and the space-launch market. Not 10 years from now. But right now.

And what is the U.S. Government's plan for aerospace? A vacuum. We are ditching the national aerospace plane—and, yes, I know it is to be transferred from the Department of Defense to NASA—but it will arrive there destitute. This was to have been the program that would push us into the far frontier of materials technology, propulsion technology, and avionics. We are about to abandon it.

We have invited our major aerospace companies to enter the field of commercial launch services in space. And there they encounter present and rising future competition from launch vehicles backed to the hilt by foreign governments. Left to fend for themselves in that environment, our private companies are going to take a bath. Where is the prospective remedy for that? Not visible.

We see every day that the U.S. computer industry, which is parent to avionics, is under seige. And what is our answer to that? Nothing.

We are even told by the administration that the FSX codesign project is to be the first of others. Indeed it may well be. What foreign government worth its salt will be interested in merely coproducing an aircraft with us, if instead it can get to where the value is really added: in designing and integrating the project. How many other systems will be codesigned, until the overseas market for U.S. aircraft is gerrymandered, and our lead in both technology and production is dissolved?

If there is no sign of the dawn of strategic commercial thinking in this government, then it is just as well that we have a crisis to wake us up: just as well that we have to confront the stakes in the FSX issue.

This debate should be an alarm in the night for the Bush administration. It cuts across party lines. It involves people who have no immediate concerns about the aerospace industry—but who are deeply concerned about

the security of the Nation. It says that we are at the point where the national interest is no longer clear enough to sustain consensus; not even clear enough to sustain a clean party-line view. It says we have a form of chaos, where each of us must reason alone.

In this process, the first and only question is what benefits the United States most, in the balance. And here is how I reason:

Rejecting the FSX contract will administer a major shock to the United States-Japanese security relationship.

Rejecting the FSX contract will also have an impact on general Japanese political opinion, by undermining the perceived value of a security relationship with us.

Rejecting the FSX contract will liberate the Japanese Government to seek its objectives by means totally independent of us.

Rejecting the FSX contract will provide another major instance of U.S. inconsistency and unreliability as a partner: An example that will affect our standing in many other places and circumstances.

Rejecting the FSX will cause direct financial damage to the U.S. defense industry.

Rejecting the FSX will impede, but not stop Japan's search for entry into the aerospace market. It will do nothing at all about competition from Europe and elsewhere.

Rejecting the FSX will not substitute for the lack of a proactive U.S. Government plan for the future of this country in aerospace.

Rejecting the FSX will do nothing to redress other grievances we have against Japanese trade practices. On the contrary, it may make it harder for us to make progress with them because of its impact on the overall psychology and politics involved in trade bargaining.

Therefore, rejecting the FSX will harm us militarily by damaging ties with a vital ally, and by keeping that ally weaker than it should be in order to do its part. But rejecting the FSX will do nothing to secure our long-term economic interests.

For these reasons, and with misgivings, I shall vote to support the FSX venture. It is just barely the right thing to do. And if the Bush administration doesn't want to see this kind of scene repeated with variations, again and again, it had better take a hint.

This country needs proactive economic and commercial strategy. We need a strategy based on growth, on investment, on innovation, on education. Without it, we will eventually retreat ever further into protectionism and withdrawal. And as we do so, the stable world order we created based on the free trade of goods and ideas will collapse, leaving behind the tragic memory of a golden age which could not be sustained, for want of wisdom.

Mr. DASCHLE. Mr. President, I have examined the administration's agreement with Japan to codevelop the FSX fighter aircraft. I have reviewed the Foreign Relations Committee's findings on the resolution of disapproval that is before us today. I have spoken with my colleagues and with constituents. And I have listened intently to the arguments of my good friends who oppose this agreement.

The FSX codevelopment project is a difficult and emotional issue. As its opponents have underscored on the Senate floor over the past week, our choice is not clear cut.

Yet, after careful evaluation of the arguments on both sides of the debate, I believe President Bush's FSX agreement with Japan serves the best interests of the United States. I would like to take this opportunity to outline why I have come to this conclusion.

The United States has been negotiating with Japan about the development of a fighter aircraft for over 2 years. After the first agreement was presented to Congress, many Members, including myself, expressed concern to the administration about the need for stricter safeguards to preserve the security of U.S. technology. In response, the administration reopened negotiations with Japan and secured the assurances we demanded—protection of our technology. Those protections are the foundation of the argument for proceeding with the codevelopment project.

Mr. President, Japan is a strong ally of the United States. That nation plays a very important role in maintaining a peaceful climate in the Pacific. Our debate on the FSX agreement is being followed in Japan, and we should be cognizant of its impact.

I understand how passionate Members are about their convictions on this issue. Yet, it is undeniable that the misinformation and emotional rhetoric surrounding the negotiations on the FSX agreement affects our relationship with Japan.

I certainly understand the concern of those Americans who fear the growing economic reach of Japan. It should not be minimized. At the same time, however, U.S. policymakers must approach complex trade issues such as the FSX codevelopment project with clear objectives in mind, paying attention to both the immediate and longer-term implications of our policy. The FSX agreement is an example of an issue that should be debated within the context of the present and with a eye toward the future.

Since 1960, Japan has been using the F-1 aircraft to defend crucial sealanes. The FSX is designed to replace this aging fighter plane.

At the beginning of our bilateral discussions about the development of a new fighter, Japan indicated its desire to develop and produce the fighter in Japan. The United States argued that Japan should base the FSX on an American aircraft. After intense negotiations, Japan abandoned its plan for indigenous development and opted for a codevelopment project with the United States based on the F-16 aircraft.

Under the final agreement negotiated by the administration, the Japanese Government will bear the entire financial responsibility for the project. United States firms will receive 40 percent of the work share in the development phase, and, if production occurs, the American work share will be approximately 40 percent of the value of the project. In addition, all Japanese technological developments that are based on United States technology will flowback to the United States at no cost.

This arrangement will mean approximately $2.4 billion to American industry. Secretary of Defense, Richard Cheney told the House Foreign Affairs Committee that this agreement will result in thousands of man-years of quality work and more than $2 billion for American industry. If Congress rejects the administration agreement, we will have nothing. Japan will go it alone.

Furthermore, this agreement is consistent with United States demands for Japan to assume a greater share of the defense burden in Asia. Because of Japan's spectacular economic success, many in Congress and the administration have urged that stronger efforts be made to ease the military burden the United States bears for the Japanese Government. I support that objective.

Japan has done more in recent years to improve its own defense capabilities than any other United States ally and has set impressive goals for the future. Japan currently spends more on defense then our traditional allies in Europe. Its military budget has risen at an average of 5 percent a year for the last 8 years. The New York Times recently reported that this year, when Pentagon spending is expected to be frozen, Japan's military outlays will rise 5.9 percent, to $31.4 billion.

Japan is willing to spend $6 billion to develop its own fighter plane, which, in turn, will ease the United States defense burden in the Pacific rim. Japan's willingness to lessen our burden should be encouraged, not criticized.

Having acknowledged the benefits of the FSX agreement, I have also evaluated its potential liabilities. As I mentioned earlier, my primary concern about this agreement is maintenance of the security of United States technology. This is a serious consideration.

Critics maintain that the administration agreement makes precious United States technology vulnerable to com-

mercial exploitation by the Japanese. Yet, the technology we would share with Japan is over 10 years old and will not be applicable to their commercial industry.

I examined the technology issue by dividing it into three distinct areas: The airframe; the engine; and the software. According to Secretary Cheney, the airframe technology to be shared with Japan is more than 15 years old, and the engines will be bought off-the-shelf from an American company.

Two issues lie at the heart of the software debate. The first is flight source codes—the codes controlling the avionics systems. The second is mission source codes—the codes dealing with fire control.

The United States has a clear lead in flight code software. This software is easily applicable to the commercial industry. Under the President's agreement, Japan will be required to write its own flight code software—our codes will not be shared. The avionics will be produced solely by Japan.

We will, however, share some mission source codes affecting fire control. Japan will have to write its own codes for other functions of the mission's computer—navigation, radar, etcetera. According to the administration agreement, Japan will not have access to software that could benefit its commercial industry.

Critics of the agreement point out that Japan could buy the F-16 off-the-shelf from the United States, which would benefit the American economy.

Japan, however, has indicated that it has no interest in buying anything off-the-shelf from anyone. Japan says it has a legitimate need for a new fighter aircraft. It anticipates future mission and design requirements of the aircraft that no existing off-the-shelf aircraft would provide. Japanese leaders ask what European country wouldn't expect to be allowed to develop an indigenous fighter. The F-1 was developed indigenously by the Japanese, and Japan entered into production agreements in the cases of the F-4, F-15 and P-3.

The Japanese Government simply will not consider purchasing an aircraft off-the-shelf. If Japan indicated a willingness to purchase a fighter, I would insist the United States built F-16 be considered. If denied that option, I would prefer that Japan co-develop the project with the United States rather than look elsewhere to meet its defense needs. Our economy would not benefit from the latter scenario.

Critics say we are giving away 7 billion dollars' worth of F-16's for a deal that only means, at the most, $3 billion to the United States. If the Japanese government bought F-16's off-the-shelf, the purchase price is estimated $2.9 billion. We are receiving approximately that amount in the co-development project.

Critics also report that many American companies have found problems with some of the single-wing composite technology Japan will likely be sharing with us under the flow-back provisions of the agreement. Likewise, they maintain that the radar systems that will be shared have been known to Hughes Aircraft and others for as long as ten years. However, Commerce and Defense Department officials refute these assumptions and cite these technologies as an important part of our continued commercial and military aircraft production.

Moreover, the United States did not predicate this agreement on the flow-back of technology. The Air Force has specifically indicated great interest in this technology. Under the codevelopment agreement, the Japanese will be paying us almost $3 billion to watch them develop, produce and test this technology. We would save the expense of testing this technology ourselves, and if we don't pursue this agreement, we will incur the expense of trying to acquire this technology from Japan after the fact.

Mr. President, the American relationship with Japan is strong and growing. One hopes that wise leadership and clear vision, in the United States and Japan, will build on this foundation for the benefit of both countries and the world. On balance, the FSX agreement is good for the bilateral relationship and good for America. The resolution of disapproval should be rejected.

Mr. MITCHELL. Mr. President the Government of Japan has elected not to purchase an existing American aircraft for its next-generation support fighter, the FSX. This decision appears to be based upon economic considerations rather than national security considerations.

If the Japanese Government had decided to select the most capable aircraft to do the job, it would have selected an existing American aircraft. If the Japanese Government had decided to make the most cost-effective decision, it would have selected an existing American aircraft. If the Japanese Government had decided to use its defense resources most efficiently, it would have selected an existing American aircraft and used the balance of the dollars saved on other defense needs. If the Japanese Government had decided to make a meaningful gesture of their commitment to reducing the enormous trade imbalance between our two countries, it would have selected an existing American aircraft.

The Government of Japan decided not to base its decisions on any of the above considerations. Instead, it selected the route of development of a new aircraft, based on the design of the United States F-16 with substantial Japanese technology.

The current imbalance in our trade relations with Japan must be corrected. The Japanese Government must make a commitment to end that imbalance and must follow up that commitment with concrete actions. These actions do not include refusing to buy our products—especially our military aircraft, which are the best in the world—or investing resources to develop their own aerospace industry to compete with ours. If we proceed with this agreement, we may be assisting in the creation of our own future competition.

I do not believe we should lend our assent to such a development.

If this agreement is permitted to go into force, it could be interpreted as an endorsement of the path of codevelopment, when a purchase of our own aircraft would have been the preferred course. At some point, the practice of refusing to purchase U.S. products while continuing to acquire U.S. technology must be reversed.

Our relations with Japan are important. Japan and the United States enjoy a close security and military relationship which should be strengthened and developed. It clearly serves the naitonal interests of both countries. At the same time, our economic relationships have developed an imbalance which threatens to weaken the security relationship. The proper way to address this potential problem is to correct the imbalances in the trade and economic flow. Each government must commit to that course as well. In this case, the Japanese have passed up an opportunity to take an important step in that direction.

We must send the message that it is time for a change in the manner in which our economic relations have been conducted. As a practical matter, issues of trade and issues of military cooperation are now linked. The economic and commercial factors must be taken into consideration in making defense cooperation decisions. The Japanese Government clearly understands this and acts accordingly. The United States must as well.

FSX AND THE PRAYING MANTIS

Mr. DIXON. Mr. President, there is a fatal flaw in the efforts of the administration to give away our American technology on the FSX fighter plane to the Japanese.

That flaw is that the American negotiators have taken the short run view. Several of my colleagues and I have argued that the long-run view is vital in this matter—vital to the well-being of the American aerospace industry, vital to the overall well-being of the American economy.

Mr. President, I would like to cite a new book on Japan that makes some telling points that are right on the

mark on this FSX proposed deal. In a moment, I am going to cite some of those very salient points. But first, I would like to say I would like to see the folks at the State Department and the Defense Department focus on some key points in this book.

I have not tried to digest the entire volume, Mr. President, and it is truly a weighty treatment of a weighty subject. Some observers would immediately say it is a dull book. There is an important distinction I have discovered over the years, Mr. President: There is unimportant dull, and there is important dull. If the experts view the book as dull, I want them to know that "The Enigma of Japanese Power," by Karel Van Wolferen is important reading. At least I have found it so in relation to the FSX package the administration is trying to peddle up here on the hill.

Let me quote from the book, Mr. President:

The greatest apparent international advantage the Japanese system has enjoyed so far lies in Western misconceptions concerning the Nature of the Japanese challenge. The United States has been especially vulnerable to Japan's industrial onslaught in that the U.S. Government agencies overseeing its interests in this respect have no institutional memory. Every two years or so, new sets of U.S. officials must learn afresh that the Japanese economy does not operate in the same way as our own. Hence the continued self-imposed handicap of doctrinal adherence to inapplicable free-trade theories. The result has been misguided stopgap policies. * * *

What the author is saying, Mr. President, is that our negotiators are easily hornswoggled in deals with the Japanese. The plain fact is that we do not think the way the Japanese think. We do not take the long-range view the Japanese take in the negotiations. Another plain fact is that the Japanese economy truly does not operate the way our American economy works. In short, Mr. President, we end up with misguided stopgap policies and the Japanese end up with another industrial base in their economy to the detriment of our manufacturing industry and our competitive edge in trade. We end up looking at the short end of the stick when the long end of the stick is what we should be concentrating on, least we end up with no stick at all.

Let us look at this deal after it's been in effect for a while. The way the deal is skewed presently, we will get 40 percent of whatever transpires. The Japanese, however, will have our technology. They will build these planes in Japan. They will sell them abroad. The author of the book I've cited points out another important fact: The Japanese move into foreign markets with rock-bottom prices. After this deal gets rolling real good, Mr. President, we will wake up to find a brand spanking new aerospace industry in Japan, a new trade competitor in the world and a bad case of how did we ever let this happen jitters once it is too late to do anything about it.

Maybe I can best sum up the point made in this book that is so relevant to the FSX deal. Keyes Beech hit directly upon the point in his thoughtful review of the book when he posed the key question I find pertinent to this debate. The question is this: Is it possible for international free trade to survive when the West, and particularly the United States, does not have a trade strategy to match that of Japan, especially when the Japanese target and kill off entire industries in a host country?

And how do the Japanese kill off entire industries? Accordingly to Charles Furguson, a Massachusetts Institute of Technology postdoctoral research associate, the Japanese do it this way:

Strategically, the system involves exclusion of foreign competitors; systematic acquisition of external technology; rapid design cycles and short product life spans; a progression from technically mature, low-cost mass markets to advanced and differentiated high-technology markets; flexible mass production of related but customized products, and long-term links with other domestic industries and suppliers. It has proved an excellent system for highly integrated, computerized production processes and is especially well suited to high-technology industries, where competition takes place in global markets that are volatile and differentiated.

Furguson further states that historically, with the aid of cooperation between industry, finance, and the government, Japanese high-technology firms "systematically excluded United States firms from Japanese markets; imported, copied, and stole United States technologies; and eventually launched export drives into the American market."

The fact that the Japanese target countries and target industries when it is to their advantage is a very real phenomenon that we Americans—and especially our negotiators—ignore at our peril, Mr. President. This business of targeting an industry, killing it off in a host country and usurping the market in international trade calls to mind the praying mantis, Mr. President. The praying mantis is opportunistic, tackling anything that looks edible. The mantis fools its prey because it raises its front legs as if praying. This marks the position of the mantis when it is hunting. Once the mantis stops praying and starts eating, everything disappears from view. That's what is happening on the FSX, Mr. President. I asked by staff to check, and I must report here today that the praying mantis is a part of the landscape in Japan.

My plea to our American negotiators is twofold, Mr. President. I ask them to read the relevant parts of this new book dealing with the enigma of Japan. Secondly, I ask that they be fully aware of the presence of the praying mantis in Japan. My counsel is this: Be wary of this deal on the FSX fighter. America and Americans stand to lose far too much to let this deal become a reality. It will become a matter of our everlasting regret as a Nation if we give away our technology, if we give away our competitive edge in trade, if we hand the Japanese a whole new industry without getting anything worth one whit of value in return. The mantis appears to be praying before it strikes. Let us never, ever forget that. We will be sorry unto our last days if we do.

The PRESIDING OFFICER. The question is on the engrossment and third reading of the joint resolution.

The joint resolution was ordered to be engrossed for a third reading and was read the third time.

The PRESIDING OFFICER. The joint resolution having been read the third time, the question is, shall the joint resolution pass?

So the joint resolution (S.J. Res. 113) as amended, was passed, as follows:

S.J. RES. 113

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. CODEVELOPMENT OF THE FSX WEAPON SYSTEM.

(a) IN GENERAL.—The President shall ensure that all technology, defense articles, and defense services provided by the United States or any United States corporation or entity to Japan pursuant to the agreement described in subsection (b) to codevelop the Support Fighter Experimental (FSX) weapon system shall be subject to the requirements of subsections (a), (c), and (d) of section 3 of the Arms Export Control Act.

(b) DESCRIPTION OF AGREEMENT.—The agreement referred to in subsection (a) is the agreement for which the President submitted a certification pursuant to section 36(d) of the Arms Exports Control Act on May 1, 1989 (transmittal no. MC-9-89).

SEC. 2. COPRODUCTION OF THE FSX WEAPON SYSTEM.

(a) IN GENERAL.—In the event that the United States and Japan seek to coproduce the FSX weapon system—

(1) the United States and Japan shall negotiate and sign a Memorandum of Understanding (MOU) containing the terms and conditions for that coproduction; and

(2) such MOU shall—

(A) prohibit the transfer to Japan of critical engine technologies (including, but not limited to, hot section and digital fuel control technologies); and

(B) prohibit the sale or retransfer by Japan of the FSX weapon system or any of its major subcomponents codeveloped or coproduced with the United States.

(b) APPLICATION OF ARMS EXPORT CONTROL ACT.—Technology, defense articles, and defense services resulting from any coproduction of the FSX weapon system by the United States and Japan shall be subject to the requirements of subsections (a), (c), and (d) of section 3 of the Arms Export Control Act.

(c) POLICY ON UNITED STATES WORKSHARE.—It is the sense of the Congress that any Memorandum of Understanding (MOU) between the United States and Japan on coproduction should specify that the United States share of the total value of the coproduction shall be not less than 40 percent of that value, including the value of manufacturing spare parts and other support items which are part of the lifetime maintenance costs of the FSX weapon system.

SEC. 3. GAO REPORT.

(a) IN GENERAL.—Beginning 6 months after the date of enactment of this joint resolution, and every 12 months thereafter, the Comptroller General of the United States, after consultation with appropriate officials of United States agencies represented on the Technical Steering Committee, shall submit to the Speaker of the House of Representatives and the chairman of the Committees on Foreign Relations, Armed Services, Commerce, Science and Transportation, and Banking, Housing, and Urban Affairs of the Senate a report describing the progress made in implementing the Memorandum of Understanding (MOU) between the United States Department of Defense and the Japan Defense Agency on Cooperation in the Development of the FSX Weapon System, signed on November 29, 1988, and related documents thereto.

Such report shall state—

(1) whether any technology involved in development of the FSX weapon system has been transferred to the Japanese space shuttle program or any other part of the Japanese aviation sector aerospace technology;

(2) whether any technology has been diverted to any third party country unauthorized to receive such techology, in violation of the license and technology assistance agreement for the FSX weapon system; and

(3) whether any such technology has been made available, legally or illegally, to adversaries who could use such technology to the detriment of the North Atlantic Treaty Organization (NATO), the United States, any other member country of NATO, Japan, Australia, or New Zealand.

(b) DEFINITION—For purposes of this subsection, the term "Technical Steering Committee" refer to the FSX Technical Steering Committee established jointly by the Japan Defense Agency and the United States Department of Defense.

SEC. 4. IMPACT OF MOUS RELATING TO THE FSX WEAPON SYSTEM ON THE COMPETITIVE POSITION OF THE UNITED STATES.

(a) SOLICITATION OF RECOMMENDATIONS.—In the implementation of the Memorandum of Understanding (MOU) and related agreements between the United States and Japan regarding the codevelopment of the FSX weapon system, and in the negotiation, renegotiation, and implementation of future memoranda of understanding and related agreements concerning coproduction of the FSX weapon system, the Secretary of Defense shall regularly solicit and consider comments or recommendations from the Secretary of Commerce with respect to the commercial implications of such agreements and the potential impact on the international competitive position of United States industry.

(b) REVIEW BY SECRETARY OF COMMERCE.—Whenever the Secretary of Commerce has reason to believe that any such memorandum of understanding or related agreement has, or threatens to have, a significant adverse impact on the international competitive position of United States industry, the Secretary of Commerce may request a review of the agreement. If, as a result of the review, the Secretary of Commerce determines that the strategic commercial interests of the United States are not being served, the Secretary of Commerce shall recommend to the President any modification to the agreement he deems necessary to ensure an appropriate balance of interests.

(c) CONSIDERATION OF RECOMMENDATIONS.—(1) The President shall consider the recommendations of the Secretary of Commerce concerning—

(A) the commercial implications of any such memorandum of understanding or related agreement, and

(B) the potential impact on the international competitive position of United States industry.

in determining whether such memorandum of understanding or related agreement shall be implemented or agreed upon.

(2) Any such memorandum of understanding or related agreement shall not be implemented or agreed upon if the President determines that such agreement is likely to have a significant adverse impact on United States industry that outweighs the benefits of implementing or entering into such an agreement.

SEC. 5. DEFINITIONS.

As used in this joint resolution, the terms "defense article" and "defense service" shall have the same meanings as are given to those terms in paragraph (3) and (4), respectively, of section 47 of the Arms Export Control Act.

Mr. DIXON. Mr. President, I move to reconsider the vote by which the joint resolution, as amended, was passed.

Mr. LUGAR. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. LAUTENBERG. Mr. President, I voted to go forward with the joint United States-Japanese development of the FSX fighter aircraft because I believe it is in our commercial and national security interests, and because it will create jobs in this country.

Under the agreement, U.S. firms will receive 40 percent of the work share in the development phase of the aircraft, estimated to be worth $480 million. When the FSX goes into production, the U.S. work share will be about 40 percent of the value of the project, estimated to be about $2 billion. So, the FSX deal will mean $2.5 billion in business for the United States and at least 22,700 man years in employment, the same benefit to our trade deficit that would have resulted from off-the-shelf purchase of our F-16's.

All Japanese technological developments that are based on U.S. technology will flow back to the United States at no cost. In four areas—radar, electronic countermeasures, inertial navigation, and mission computer hardware, the technology used will be entirely Japanese, and the United States can buy it if it wants. All other technology is, by definition, United States technology, and any improvements the Japanese make on it flow back to the United States free of cost. A Technical Steering Committee consisting of defense representatives of the two governments, and one from Commerce, is established to oversee the implementation of the agreements and to monitor the use of the technology by the two contractors.

Further, Japan will contribute 130 highly advanced aircraft to the defense of the Northwest Pacific in the 1990's. Japan's defense establishment will remain heavily dependent on United States weapons technology for the remainder of this century.

Opponents of this deal argue that Japan should buy the F-16 off the shelf to narrow the trade gap between the two countries. Let me make clear that I, too, would have preferred that the Japanese buy our F-16's off the shelf. But that is just not in the cards.

Japan's alternative to the joint FSX development agreement is to develop its own advanced fighter, their initial preference, or to codevelop with Europe. That might take longer, but it would leave American firms and workers in the cold. Japan would never have bought the F-16 off the shelf. It has not purchased that way since the 1950's, and all the indications at the outset of the negotiations were that it would not do so again.

The FSX deal will actually help the trade deficit. We'll get about $480 million from the codevelopment and $2 billion from the production phase. That translates into $2.5 billion in Japanese business the United States would not have without the agreement, approximately the same as the dollar value of a straight sale of F-16's. Buying 130 planes off the shelf at about $20 million apiece would yield us about $2.5 billion.

Opponents of the sale argue that it will aid the development of the Japanese aerospace industry, and the development of a civilian aircraft manufacturing capability. But the representatives of the aerospace industry, the Aerospace Industry Association, support the agreement. So do the two major U.S. commercial aircraft builders, Boeing and McDonnell Douglas. Why would they do so if they believed that this agreement would contribute to the creation of a Japanese competitor?

In fact, most aircraft experts believe there is very little technology directly transferable from a military aircraft like the FSX to the process of designing and manufacturing a civilian aircraft. While it is well known that the Japanese are committed to developing their own aerospace industry, little in the FSX agreement will contribute directly to that goal.

Opponents to the deal argue that the United States is giving away $7 billion worth of technology and getting nothing in return. But the F-16 did

not cost $7 billion to develop, it cost about half of that. And those expenses have long been paid for by the American taxpayer. The United States is not giving away but is selling knowledge, and will recoup development costs which were expended many years ago.

Further, the United States is not providing its leading edge technologies. Many of the technologies used in designing and building the FSX should not be shared with the Japanese, and much of the F-16 technology is now 15 years old. In fact, most of the technology to be transferred in the FSX is widely available in the global aerospace market, and could be easily provided by many European companies. The United States would not be providing Japan with our state-of-the-art technology on our latest F-16's under the agreement.

In turn, the deal's opponents have underestimated the benefits of what we will get from the Japanese. The Air Force and American companies are very interested in the technologies that may be developed, such as the manufacturing process used in the radar and the cocured composite wing. These processes are not currently possessed by U.S. companies. According to the Air Force, the Japanese are ahead of us in cocuring of structural and surface components of large and complex structures. The Japanese have already made a small wing using cocured composite technology, and although it's not clear that they will be able to make the large wing, if they can't, the risk and cost is all on them.

In the process of designing the FSX, we should learn more about advanced Japanese technology, including radar systems and composite fabrications, than Japan's aircraft will benefit from American advances.

Opponents of the deal argue that the recent revelation that Mitsubishi Heavy Industries helped Libya to build its chemical weapon plant is only the latest in a series of incidents that cast serious doubt on Japan's ability, or willingness, to protect the sensitive technical data and manufacturing technology to be transferred under the agreement. This is certainly a concern I take seriously. I believe we need to carefully monitor the agreement to make sure that this concern is kept in mind and continuously assessed.

However, I would point out to the critics that there are restrictions on retransfer of U.S. technologies and these controls have been reaffirmed as a result of the letters of clarification exchanged between the two countries. These also clarified the provisions for flowback of technology, identifying those technologies which are provided exclusively by the Japanese which the United States may have access to.

A Japanese-American committee, including representatives from Commerce and Defense, will ensure that the United States has access to FSX technology developed by Japan, and that American engine technology and software are protected as specified in the joint development agreement. If the United States feels that Japan has not held up its end of the bargain, the United States can bring the project to a halt. Without the American fuselage and engines, there will be no FSX.

Mr. President, any agreement is only as good as our willingness to enforce it. I believe the terms of the FSX deal are in our interest, and we need only make sure that these provisions are vigorously and faithfully enforced.

In short, I believe this deal is in America's best interests, and should go forward.

JAPANESE INVOLVEMENT IN LIBYAN WEAPONS PROGRAMS

The PRESIDING OFFICER. Under the previous order, the Senator from Alaska is to be recognized. The Senate will be in order. The Senator from Alaska is recognized.

Mr. MURKOWSKI. I thank the Chair. Mr. President, I rise and on behalf of myself and Senator BRADLEY I send a resolution to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report the resolution.

The assistant legislative clerk read as follows:

A resolution (S. Res. 129) relating to Japanese involvement in Libyan weapons programs.

The Senate proceeded to consider the resolution.

Mr. MURKOWSKI. Mr. President, it is my understanding that this resolution has been cleared by the majority.

The reason for the resolution specifically is that the Toshiba incident raised concern over Japanese commitment to export controls enacted for the protection of the Western Alliance. These concerns were revived when we learned that Japanese firms had basically had an involvement in building the metallurgical complex at Rabat, which ultimately we have reason to believe were part of Libya's chemical weapons effort.

I think it is important to recognize in the trust and security relationship which we enjoy with Japan that the pending FSX proposal should be undertaken in an atmosphere of mutual trust between our friends, the Japanese, and ourselves. Trust is essential to the maintenance of our security relationship. We seek to, of course, understand the motivation of our Japanese allies. And I think that our contribution to their defense over the last 40 years proves that we have a genuine interest. We also hope that our Japanese neighbors understand our interests as well, but we do have specific sensitivities.

The resolution calls attention to our friends in Japan to what we are sensitive to, which to our reading is a form of a breach of mutual trust. It should not be necessary to explain how we feel about chemical weapons—this body and the House, the administration and Americans in general have enunciated their attitude very clearly—nor should we have to explain to our friends how we feel about terrorist regimes emanating out of Libya.

It should be clear to everybody in the world, including our friends, the Japanese, that our opposition to placing the means of packaging and delivering poison gas into the hands of Libyans—Mr. President, may I have order and the attention of my colleagues?

The PRESIDING OFFICER (Mr. ROCKEFELLER). The Senate will be in order. The Senator from Alaska is correct. The Senate will not proceed until the Senate is in order.

The Senator from Alaska may proceed.

Mr. MURKOWSKI. I thank the Chair.

I think we should not have to pass legislation informing our Japanese friends of our objections to what their commercial activities have done to aid the Libyan chemical effort. However, it is necessary that before we embark on the very significant FSX arrangement we have some clear understanding. We must understand each other on the specific point where we have seen testimony in the Foreign Relations Committee centered on whether the various terms of the deal are clearly stated. Well, we have lots of questions on this. This body has gone over that at great length.

We know in 1990 for instance that there is going to be another agreement that will necessitate MOU's before production is to be initiated on the FSX fighter. It is not necessarily clear what that agreement will contain. Much is unclear about the FSX deal. Much is left to negotiate.

I congratulate my colleagues, the junior Senator from New York, and the Senator from Illinois, for bringing these points out in this discussion as well as the senior Senator from West Virginia through the last action of this body.

The amendment sends a clear signal to our friends in Japan making it perfectly clear how we feel about past actions with respect to the Libyan chemical warfare program and how we would feel about any further Japanese assistance to that program.

Mr. President, this is not anything more than pure communication. The resolution is not binding. It does not require the Japanese Government to do anything that they could not easily do. This simply clears the air, and clears the communications between

our two parties. That is the very nature of friendship.

I would also in conclusion call my colleagues' attention to the reality that very few Japanese activities occur overseas without the knowledge of the Japanese Government through the organization of MITI which basically controls their activities.

So I urge in conclusion my colleagues to join me in sending a very clear communication as we embark upon this important agreement with our allies in Japan.

Mr. DIXON addressed the Chair.

The PRESIDING OFFICER. The Senator from Illinois.

The Senator from Rhode Island controls the time.

Mr. DIXON. Will my friend from Rhode Island yield 3 minutes?

Mr. PELL. Yes.

Mr. DIXON. I thank the distinguished chairman of the Foreign Relations Committee for yielding me 3 minutes.

I support, may I say, what is being done by my friend from Alaska. But I want my colleagues and the folks in the country to know that the discussion we are having here which the Senate of the United States is now unanimously endorsing is a resolution that recognizes that the Japanese were involved in the nerve gas plant in Libya, and the information, the classified information that we cannot spell out in full on this floor, is that Mitsubishi, which will be involved in this deal without question, is involved as well in the manufacture of canisters for the nerve gas to be used against their enemies in the Mideast.

So let my colleagues in the Senate know that when we adopt this resolution we are adopting as fact what this Senator and others have said on this floor, that they have been involved in Libya against the interests of the United States. Mitsubishi has been involved, Toshiba was involved, and gave the secret submarine technology to the Soviet Union against the interests of the United States at a cost to the American taxpayers of $3 billion, placing at risk every man and woman in America on the high seas of the world.

I want to say it is a final message that ought to be made in the RECORD. This is a bad deal. The Senate narrowly rejected the resolution of disapproval. The Senate wisely overwhelmingly adopted a resolution of approval with very tight constraints, and I say this will always be remembered as one of the truly, truly bad deals for America.

I support the resolution by my friend from Alaska. It is wisely done. It is well put, and it should be adopted by all 100 Senators.

The PRESIDING OFFICER. Who yields time?

Mr. PELL addressed the Chair.

The PRESIDING OFFICER. The Senator from Rhode Island.

Mr. PELL. Mr. President, I have had the opportunity to go over this resolution. Some small changes were made in it by the Senator from Alaska. I think on balance it is a good resolution, and we are prepared to yield back our time. I urge my colleagues to support it.

The PRESIDING OFFICER. Does the Senator from Alaska yield back his remaining time? The Senator does.

All time is yielded back.

The question is on agreeing to the resolution.

The resolution (S. Res. 129) was agreed to.

The preamble was agreed to.

The resolution, with its preamble reads as follows:

S. RES. 129

Whereas, Libya's chemical weapons program has been using a metal-fabrication facility that Japanese corporations helped to equip at the Rabta technical-industrial complex; and

Whereas, the past association of Japanese corporations with this metal-fabrication facility at Rabta revived doubts about the effectiveness of Japan's control over strategic technologies; and

Whereas, Japanese corporations ended all activities associated with this facility when the Government of Japan advised them, on the basis of information provided by the United States, that the Government of Libya was using it for chemical weapons; and

Whereas, Japanese assistance, in any form, to the Libyan chemical weapons program would, in the future, undermine the trust and confidence necessary for the security relationship between the United States and Japan: Now, therefore, be it

Resolved, That it is the sense of the Senate that the proposed export of technology, defense articles or defense services pursuant to an agreement with Japan to codevelop or coproduce the Support Fighter Experimental [FSX] shall not be implemented until the President of the United States receives assurances from the Government of Japan, and transmits those assurances to the Chairman and ranking member of the Senate Committee on Foreign Relations, that:

1. No Japanese personnel are involved with any aspect of chemical weapons production in Libya; and

2. No assistance of any kind will be provided, in the future, to the Rabta complex or to any other part of the Libya chemical weapons program by any Japanese corporation.

Mr. DIXON. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. MURKOWSKI. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DIXON addressed the Chair.

The PRESIDING OFFICER. The Senator from Illinois.

ORDER OF PROCEDURE

Mr. DIXON. Mr. President, we are all finished with the work on this. My distinguished colleague on the other side and I have been asked by the leadership on the two sides to do the cleanup work in a moment. We will but, Mr. President, we have to step off the floor, and I suggest the absence of a quorum only for a brief couple of minutes.

Mr. CHAFEE. Mr. President, I wonder if he will hold on that. I have a piece of legislation which I would like to introduce.

Mr. DIXON. Mr. President, if my friend will yield, we are delighted for him to take up time for several minutes while the Senator from Indiana and I are off the floor for about 3 minutes.

Mr. CHAFEE. Let us put it in a gentler fashion. "Take up"—why do we not say the Senator is delighted to have me have the opportunity to introduce the worthwhile piece of legislation, with the accompanying material?

Mr. DIXON. I am truly delighted, and may I say I only regret that I am leaving the floor and cannot be further enlightened for the first few moments. But I look forward in the future to being enlightened by my friend from Rhode Island.

Mr. CHAFEE. Good. I will make sure the Senator receives copies of all of this.

Mr. DIXON. I thank the Senator.

(The remarks of Mr. CHAFEE pertaining to the introduction of legislation are located in today's RECORD under "Statements on Introduced Bills and Joint Resolutions.")

Mrs. KASSEBAUM addressed the Chair.

The PRESIDING OFFICER. The Senator from Kansas.

Mrs. KASSEBAUM. I ask unanimous consent to speak as if in morning business.

The PRESIDING OFFICER. Without objection, the Senator may proceed.

SPECIAL FAVORS SHOULD BE REMOVED FROM SAVINGS AND LOAN BILL

Mrs. KASSEBAUM. Mr. President, I read with alarm and disappointment that the House has added to the savings and loan bill numerous special exemptions for individual institutions. The practical affect of such provisions is to put well-connected individuals above the law. Mr. President this must not be tolerated.

Such favoritism threatens the credibility of Congress. Surely no one can forget the public outcry against the favors bestowed in the Tax Reform Act of 1986. Citizens felt cheated when asked to comply with laws from which well-connected individuals were excluded. They read with outrage how lobbyists were paid enormous fees and flaunted their ability to carve out exemptions. This fiasco must not be repeated. The average citizen views such

favoritism as little more than organized and sanctioned bribery. The taint of such favoritism stains not only the Members who sponsored the exceptions but all of Congress for allowing it to occur.

I have no doubt the public rebellion against the pay raise was fueled in large part by the resentment against Congress for permitting favoritism at the expense of the common taxpayer.

I am very pleased that the chairman of the Senate Banking Committee, Senator RIEGLE, has announced he will remove all clauses bestowing special favors. We should all support him in this effort. When the conference bill reaches the floor, we must insist that any special exemption be detailed and its presence, as well as the actual name of its beneficiary, be fully explained. There should be no provision that cannot withstand public debate.

It is my hope that the threat of this scrutiny will be such that when the bill emerges from conference we can all be assured that no one is placed above the law because of their connections or money.

Mr. President, I yield the floor.

MESSAGES FROM THE PRESIDENT RECEIVED DURING RECESS

Under the authority of the order of the Senate of January 3, 1989, the Secretary of the Senate, on May 12, 1989, during the recess of the Senate, received a message from the President of the United States, transmitting a nomination; which was referred to the Committee on Labor and Human Resources.

(The nomination received on May 12, 1989 is printed in today's RECORD at the end of the Senate proceedings.)

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Kalbaugh, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session the Presiding Officer laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

ANNUAL REPORT OF THE NATIONAL SCIENCE FOUNDATION—MESSAGE FROM THE PRESIDENT—PM 44

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, together with an accompanying report; which was referred to the Committee on Labor and Human Resources:

To the Congress of the United States:

I am pleased to transmit the annual report of the National Science Foundation for Fiscal Year 1988. This report describes research supported by the Foundation in the mathematical, physical, biological, social, behavioral, and computer sciences; engineering; and education in those fields.

Achievements such as the ones described here are the basis for much of our Nation's strength—its economic growth, national security, and the overall well-being of our people.

Federal investments in research and development should be increased even beyond the current strong levels. Such investments should focus on basic research.

As we move into the 1990's, the Foundation will continue its efforts to expand our Nation's research achievements, our productivity, and our ability to remain competitive in world markets through innovation and discoveries.

I commend the Foundation's work to you.

GEORGE BUSH.

THE WHITE HOUSE, *May 16, 1989.*

ANNUAL REPORT OF THE NATIONAL ENDOWMENT FOR THE ARTS AND THE NATIONAL COUNCIL ON THE ARTS—MESSAGE FROM THE PRESIDENT—PM 45

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, together with an accompanying report; which was referred to the Committee on Labor and Human Resources:

To the Congress of the United States:

In accordance with the provisions of the National Foundation on the Arts and Humanities Act of 1965, as amended (20 U.S.C. 959(b)(c)), I transmit herewith the Annual Report of the National Endowment for the Arts and the National Council on the Arts for Fiscal Year 1988.

GEORGE BUSH.

THE WHITE HOUSE, *May 16, 1989.*

MESSAGES FROM THE HOUSE RECEIVED DURING RECESS

Under the authority of the order of the Senate of January 3, 1989, the Secretary of the Senate, on May 15, 1989, during the recess of the Senate, received a message from the House of Representatives announcing that the House has passed the following bill, without amendment:

S. 968. An act to delay the effective date of section 27 of the Office of Federal Procurement Policy Act.

ENROLLED BILL AND JOINT RESOLUTIONS SIGNED

The message also announced that the Speaker has signed the following enrolled bill and joint resolutions:

S. 968. An act to delay the effective date of section 27 of the Office of Federal Procurement Policy Act;

S.J. Res. 37. Joint resolution designating the week beginning May 14, 1989, and the week beginning May 13, 1990, as "National Osteoporosis Week"; and

H.J. Res. 247. Joint resolution designating May 29, 1989, as the "National Day of Remembrance for the Victims of the U.S.S. *Iowa.*"

Under the authority of the order of the Senate of January 3, 1989, the enrolled bill and joint resolutions were signed on May 15, 1989, during the recess of the Senate, by the Vice President.

MESSAGES FROM THE HOUSE

At 12:14 p.m., a message from the House of Representatives, delivered by Ms. Goetz, one of its reading clerks, announced that the House has passed the following bills, in which it requests the concurrence of the Senate:

H.R. 7. An act to amend the Carl D. Perkins Vocational Educational Act to extend the authorities contained in such act through the fiscal year 1995;

H.R. 923. An act to redesignate the Federal hydropower generating facilities located at dam B on the Neches River at Town Bluff, TX, as the "Robert Douglas Willis Hydropower Project";

H.R. 2119. An act to authorize the exchange of certain Federal public land in Madison County, IL; and

H.R. 2178. An act to designate lock and dam numbered 4 on the Arkansas River, AR, as the "Emmett Sanders Lock and Dam."

MEASURES REFERRED

The following bills were read the first and second times by unanimous consent, and referred as indicated:

H.R. 7. An act to amend the Carl D. Perkins Vocational Educational Act to extend the authorities contained in such act through the fiscal year 1995; to the Committee on Labor and Human Resources.

H.R. 923. An act to redesignate the Federal hydropower generating facilities located at dam B on the Neches River at Town Bluff, TX, as the "Robert Douglas Willis Hydropower Project"; to the Committee on Environment and Public Works.

H.R. 2119. An act to aurhorize the exchange of certain Federal public land in Madison County, IL; to the Committee on Environment and Public Works.

H.R. 2178. An act to designate lock and dam numbered 4 on the Arkansas River, AR, as the "Emmett Sanders Lock and Dam"; to the Committee on Environment and Public Works.

ENROLLED BILL AND JOINT RESOLUTION PRESENTED

The Secretary of the Senate reported that on May 15, 1989, he had presented to the President of the United States the following enrolled bill and joint resolution:

S. 968. An act to delay the effective date of section 27 of the Office of Federal Procurement Policy Act; and

S.J. Res. 37. Joint resolution designating the week beginning May 14, 1989, and the week beginning May 13, 1990, as "National Osteoporosis Prevention Week."

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents which were referred as indicated:

EC-1124. A communication from the Secretary of the U.S. Senate, transmitting pursuant to law, the full and complete statement of the receipts and expenditures of the Senate, showing in detail the items of expense under proper appropriations, the aggregate thereof, and exhibiting the exact condition of all public moneys received, paid out, and remaining in his possession from October 1, 1988, through March 31, 1989; ordered to lie on the table.

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. HOLLINGS, from the Committee on Commerce, Science, and Transportation:

Phillip D. Brady, of Virginia, to be General Counsel of the Department of Transportation;

Galen Joseph Reser, of Virginia, to be an Assistant Secretary of Transportation;

David Philip Prosperi, of the District of Columbia, to be an Assistant Secretary of Transportation;

Thomas Jones Collamore, of the District of Columbia, to be an Assistant Secretary of Commerce; and

Michael Rucker Darby, of Texas, to be Under Secretary of Commerce for Economic Affairs.

(The above nominations were reported with the recommendation that they be confirmed, subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

By Mr. LEAHY, from the Committee on Agriculture, Nutrition, and Forestry:

Alan Charles Raul, of New York, to be General Counsel of the Department of Agriculture;

Richard Thomas Crowder, of Minnesota, to be a member of the Board of Directors of the Commodity Credit Corporation;

Jack Callihan Parnell, of California, to be a member of the Board of Directors of the Commodity Credit Corporation;

Franklin Eugene Bailey, of Virginia, to be an Assistant Secretary of Agriculture;

Charles E. Hess, of California, to be an Assistant Secretary of Agriculture; and

Jo Ann D. Smith, of Florida, to be an Assistant Secretary of Agriculture.

(The above nominations were reported with the recommendation that they be confirmed, subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

By Mr. CRANSTON, from the Committee on Veterans' Affairs:

Frank Quill Nebeker, of Virginia, to be chief judge of the U.S. Court of Veterans Appeals for the term of 15 years.

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. PELL (by request):

S. 989. A bill to provide for participation by the United States in a capital increase of the Inter-American Development Bank, and for other purposes; to the Committee on Foreign Relations.

By Mr. WILSON (for himself, Mr. BOREN, and Mr. HUMPHREY):

S. 990. A bill to restrict the use of congressional frank for mass mailings and newsletters; to the Committee on Rules and Administration.

By Mr. WIRTH:

S. 991. A bill to continue the suspension of the duty on d-6-Methoxy-a-methyl-2-naphthaleneacetic acid and its sodium salt; to the Committee on Finance.

By Mr. CRANSTON:

S. 992. A bill to amend Section 8e of the Agricultural Adjustment Act (U.S.C. 608e-1), reenacted with amendments by the Agricultural Marketing Agreement Act of 1937 so as to add kiwi fruit, peaches, pears, nectarines, and plums to the list of imported commodities that must meet the minimum quality standards of domestically produced fruits, vegetable and specialty crops; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. KOHL (for himself, Mr. PRYOR, Mr. HATFIELD, Mr. GLENN, and Mr. LEAHY):

S. 993. A bill to implement the Convention on the Prohibition of the Development, Production, and Stockpiling of Bacteriological (Biological) and Toxin Weapons and Their Destruction, by prohibiting certain conduct relating to biological weapons, and for other purposes; to the Committee on the Judiciary.

By Mr. METZENBAUM (for himself, Mr. THURMOND, Mr. SIMON, Mr. DECONCINI, Mr. LEAHY, and Mr. HATCH):

S. 994. A bill to amend the Clayton Act regarding interlocking directorates and officers; to the Committee on the Judiciary.

By Mr. METZENBAUM (for himself and Mr. THURMOND):

S. 995. A bill to amend the Clayton and Sherman Acts regarding antitrust procedures; to the Committee on the Judiciary.

By Mr. METZENBAUM:

S. 996. A bill to amend the Clayton Act regarding damages for the United States; to the Committee on the Judiciary.

By Mr. MITCHELL (for himself and Mr. DASCHLE):

S. 997. A bill to amend title XVIII of the Social Security Act to provide for eligibility for home health services on the basis of a need for occupational therapy; to the Committee on Finance.

By Mr. PRYOR (for himself, Mr. HEFLIN, Mr. BOREN, Mr. FOWLER, Mr. CONRAD, Mr. DASCHLE, and Mr. FORD):

S. 998. A bill to improve rural medical data and information transmission, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. HOLLINGS (for himself, Mr. DANFORTH, Mr. INOUYE, and Mr. BRYAN):

S. 999. A bill to amend the Communications Act of 1934 regarding the broadcasting of certain material regarding candidates for Federal elective office, and for other purposes; to the Committee on Commerce, Science, and Transportation.

By Mr. McCLURE (for himself, Mr. CONRAD, Mr. DASCHLE, and Mr. GORTON):

S. 1000. A bill to amend the Agricultural Act of 1949 to require the Secretary of Agriculture to exclude the malting barley price from the national weighted market price for barley in determining the payment rate used to calculate deficiency payments for the 1989 and 1990 crops of barley, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. GORE:

S. 1001. A bill to establish policies and procedures necessary to develop, as a domestically based industry in the United States, a high definition television enterprise in the United States, together with ancillary products and services; to the Committee on Commerce, Science, and Transportation.

By Mr. DURENBERGER (for himself, Mr. LUGAR, and Mr. COATS):

S. 1002. A bill to amend the Solid Waste Disposal Act; to the Committee on Environment and Public Works.

By Mr. CRANSTON (by request):

S. 1003. A bill to amend title 10 and title 38, United States Code, to make certain improvements in the educational assistance programs for veterans and eligible persons, and for other purposes; to the Committee on Veterans Affairs.

S. 1004. A bill to amend title 38, United States Code, and other provisions of law, to improve the administration of veterans' health care benefits and personnel management in the Department of Veterans Affairs and for other purposes; to the Committee on Veterans Affairs.

By Mr. HARKIN (for himself, Mr. PRESSLER, Mr. SIMON, Mr. GRASSLEY, and Mr. DASCHLE):

S. 1005. A bill relating to the sale, purchase, or other acquisition of certain railroads; to the Committee on Commerce, Science, and Transportation.

By Mr. LEAHY (for himself and Mr. THURMOND):

S. 1006. A bill to encourage innovation and productivity, stimulate trade, and promote the competitiveness and technological leadership of the United States; to the Committee on the Judiciary.

By Mr. CHAFEE (for himself and Mr. WILSON):

S. 1007. A bill to amend title 23, United States Code, regarding the reduction in apportionment of Federal-aid highway funds to certain States, and for other purposes; to the Committee on Environment and Public Works.

By Mr. DURENBERGER (for himself, Mr. BURDICK, and Mrs. KASSEBAUM):

S.J. Res. 131. Joint resolution to designate November 1989 as "National Diabetes Month"; to the Committee on the Judiciary.

By Mr. SASSER (for himself, Mr. STEVENS, and Mr. WILSON):

S.J. Res. 132. Joint resolution designating September 1 through 30, 1989 as "National Alcohol and Drug Treatment Month"; to the Committee on the Judiciary.

By Mr. SPECTER (for himself and Ms. MIKULSKI):

S.J. Res. 133. Joint resolution designating October 1989 as "National Domestic Violence Awareness Month"; to the Committee on the Judiciary.

By Mr. LEAHY:

S.J. Res. 134. Joint resolution to designate the week of October 1, 1989, through October 7, 1989, as "National Disability Awareness Week"; to the Committee on the Judiciary.

By Mr. PELL (for himself, Mrs. KASSEBAUM, and Mr. GORE):

S.J. Res. 135. Joint resolution to establish a National Commission on Human Resource Development; placed on the Calendar.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. MURKOWSKI (for himself and Mr. BRADLEY):

S. Res. 129. Senate resolution relating to Japanese involvement in Libyan weapons programs; considered and agreed to.

By Mr. HARKIN (for himself, Mr. BENTSEN, Mr. BURDICK, Mr. SHELBY, Mr. COCHRAN, Mr. MCCLURE, Mr. EXON, Mr. CONRAD, Mr. STEVENS, Mr. SANFORD, Mr. THURMOND, Mr. BURNS, Mr. BOREN, Mr. PRYOR, Mr. LUGAR, Mrs. KASSEBAUM, and Mr. GRASSLEY):

S. Con. Res. 37. Concurrent resolution expressing the sense of the Congress that the differential in Medicare payments made to urban and rural hospitals be eliminated; to the Committee on Finance.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. PELL (by request):

S. 989. A bill to provide for participation by the United States in a capital increase of the Inter-American Development Bank, and for other purposes; to the Committee on Foreign Relations.

INTER-AMERICAN DEVELOPMENT BANK REPLENISHMENT ACT

● Mr. PELL. Mr. President, by request, I introduce for appropriate reference a bill to provide for participation by the Untied States in a capital increase of the Inter-American Development Bank, and for other purposes.

This proposed legislation has been requested by the Department of the Treasury, and I am introducing it in order that there may be a specific bill to which Members of the Senate and the public may direct their attention and comments.

I reserve my right to support or oppose this bill, as well as any suggested amendments to it, when the matter is considered by the Committee on Foreign Relations.

I ask unanimous consent that the bill be printed in the RECORD at this point, together with the letter from the General Counsel of the Department of the Treasury to the President of the Senate, dated May 10, 1989.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 989

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Inter-American Development Bank Act (73 Stat. 299, as amended, 22 U.S.C. 283) is amended by adding at the end thereof the following new section:

"SEC. 32. (a)(1) The United States Governor of the Bank is authorized to vote for resolutions—

"(A) which were transmitted by the Board of Executive Directors to the Governors by resolution of April 19, 1989;

"(B) which are pending before the Board of Governors of the Bank; and

"(C) which provide for—

"(i) an increase in the authorized capital stock of the Bank and subscriptions thereto; and

"(ii) an increase in the resources of the Fund for Special Operations and contributions thereto.

"(2)(A) Upon adoption of the resolutions specified in paragraph (1), the United States Governor of the Bank is authorized on behalf of the United States to—

"(i) subscribe to 760,112 shares of the increase in the authorized capital stock of the bank; and

"(ii) contribute $82,304,000 to the Fund for Special Operations.

"(B) Any commitment to make such subscriptions to paid-in and callable capital stock and to make such contributions to the Fund for Special Operations shall be effective only to such extent or in such amounts as are provided in advance in appropriation Acts.

"(b) In order to pay for the increase in the United States subscription and contribution provided for in this section, there are authorized to be appropriated, without fiscal year limitation, for payment by the Secretary of the Treasury—

"(1) $9,169,559,712 for the United States subscriptions to the capital stock of the Bank; and

"(2) $82,304,000 for the United States share of the increase in the resources of the Fund for Special Operations.".

DEPARTMENT OF THE TREASURY,
Washington, DC, May 10, 1989.

Hon. DAN QUAYLE,
President of the Senate, Washington, DC.

DEAR MR. PRESIDENT: Transmitted herewith is a draft bill, "To provide for participation by the United States in a capital increase of the Inter-American Development Bank, and for other purposes."

The draft bill authorizes the Secretary of the Treasury to take the necessary actions for the United States to participate in the recently negotiated Seventh Replenishment of the Inter-American Development Bank (Bank).

The Bank now faces an unprecedented challenge in restoring significant growth to developing countries in Latin America and the Caribbean. In the 1980's, Latin America experienced one of the worst economic setbacks in its history. The countries of Latin America have yet to recover the levels of per capita output, income and consumption that prevailed in the 1979-81 period. For the period 1980 to 1988, real gross domestic product per capita declined, and now stands at a level first reached a decade earlier. Average unemployment has been at relatively high levels over the last decade, and social outlays have declined in per capita terms at a time when the needs of low income persons have been growing rapidly.

The Seventh Replenishment is the Bank's answer to this challenge. Negotiated over a period of years, it will result in major changes in Bank organization and operations, and increased Bank lending (over $3 billion in disbursements annually) to meet the regional demand for external financing and investment. To this end, the Seventh Replenishment is designed to support a total lending program of $22.5 billion from 1990 to 1993. It involves a capital increase of $26.5 billion and an increase of the Fund for Special Operations (FSO) of $200 million.

In negotiations for the Seventh Replenishment, the United States obtained agreement on such key issues as the decision-making structure for ordinary capital loans, country programming, enhancing environmental protection, and sector lending that be linked to sector lending by the World Bank. The Seventh Replenishment is a major accomplishment supportive of fundamental United States foreign economic policy goals.

The draft bill authorizes the Secretary of the Treasury to vote for the capital increase and the increase of the FSO, to subscribe to 760,112 shares of the capital stock of the Bank, and to make a contribution of $82.3 million to the FSO. The Administration will not request appropriations or program limitation for this subscription prior to the FY 1991 budget. While the draft legislation authorizes the appropriation of slightly more than $9 billion United States participation in the Seventh Replenishment will only involve budgetary authority of approximately $78 million annually a year over a four-year period.

It would be appreciated if you would lay the proposed bill before the Senate. An identical proposal has been transmitted to the Speaker of the House of Representatives.

The Office of Management and Budget has advised that there is no objection from the standpoint of the Administration's program to the presentation of this proposed bill to the Congress and that its enactment would be in accord with the program of the President.

Sincerely,

EDITH F. HOLIDAY,
General Counsel.●

By Mr. WILSON (for himself, Mr. BOREN, and Mr. HUMPHREY):

S. 990. A bill to restrict the use of congressional frank for mass mailings and newsletters; to the Committee on Rules and Administration.

RESTRICTING THE USE OF THE CONGRESSIONAL FRANK

Mr. WILSON. Mr. President, yesterday, at the west front of the Capitol, President Bush presented a plan to provide necessary funding for our war against drugs.

This plan, if passed by the Congress—both as an authorization and appropriation—will just about meet the commitment we made in last

year's drug bill. In many ways, that bill was a rubber check, for while it promised $2.7 billion in various kinds of relief and additional funds, to fight the war on drugs, it, unfortunately, has delivered well less than half of that amount—only about $1 billion of the $27 billion promised.

President Bush's plan calls for a more fully funded effort, at a cost of almost $1.2 billion in addition to what he has already requested. And, he has properly recommended that offsetting savings be found elsewhere in the budget to pay for these vital enhancements.

Unlike the standard operating procedure for Congress—which is to spend money on less important programs and then raise the deficit at the end to pay the serious, the important efforts like the anti-drug efforts—the President has forced the issue at the start at the very beginning, of the appropriations process. What he is telling us, and properly so, is that we must put antidrug programs first, and then divvy up the money for the rest of the domestic programs.

Well, Mr. President, I have an idea where we can find a good down payment on the President's request. All we have to do to kick-in $100 million for the fight against drugs is to stop our promiscuous spending on self-promotion in the form of congressional newsletters.

Recently, the Senate did commit to this swap for the public good during our consideration of the fiscal year 1990 budget resolution. We voted to transfer $100 million from the account that pays for newsletters and put it into the account used to fight crime. Now is the time to make good on that commitment.

Mr. President, I am today introducing a bill that would ban newsletters, thereby saving at least $100 million that would otherwise be wasted by the Congress next year. The original request for congressional mailing costs for next year was over $114 million, but recently the clerk of the House said that $20 million more would be needed, for a total close to $135 million—of which at least $100 million would support the mailing of congressional newsletters.

Mr. President, I am in no way trying to cut down on meaningful communications between the Congress and the American people. This legislation would not limit mailings of press releases to the news media designed to engender broad dissemination of information to the public. It would not limit mailings to the leaders of civic groups, corporations, labor unions, and public interest organizations who in turn could spread the word to their constituent members. And, my bill would of course not prevent Members of Congress from replying to constituent inquiries.

Indeed, all that a constituent needs to do is to write one letter on a matter of interest to that constituent and his or her Senator or Congressman could provide regular updates on that very matter.

What my bill is designed to prevent is congressional junk mail—mail that is uninvited, and invariably unwanted by the recipient.

Mr. President, my bill, which I am pleased to say is being cosponsored by the Senator from New Hampshire [Mr. HUMPHREY] and the Senator from Oklahoma [Mr. BOREN] will not simply deal with the profligacy of newsletters, but also with other related problems in the law that engender unrestrained spending.

For example, present law allows us to spend unlimited amounts of money on franked mail—even beyond what has been appropriated. This is possible because we have exempted ourselves from the Antideficiency Act which otherwise prevents spending beyond appropriation levels. If we fail to provide after-the-fact supplemental funds, the Post Office must absorb the difference.

The bill I am introducing would place the same spending restraint on Congress that is placed on every other Federal agency by prohibiting us from spending more than is appropriated.

The bill would also split the present unified congressional mail account into separate House and Senate accounts. Each House would be required to make an allocation from these accounts to each Representative and Senator. A report on expenditures for mass mail would be printed quarterly in the CONGRESSIONAL RECORD. By requiring public reports, we may encourage a reduction in the level of spending on our mail even after newsletters have been banned.

Mr. President, the bottom line question is what is the best way to spend $100 million in taxpayers' money: On newsletters or on the war against drugs?

What the American public needs to know is that a Member of Congress who sends out newsletters is using money that is desperately needed for and that should instead be devoted to the war against drugs.

He is using that money, instead, on a newsletter.

Let us get our spending priorities in order. Let us ban newsletters.

Mr. President, I ask unanimous consent that the text of the bill and a section-by-section analysis be printed at this point in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 990

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. (a) Subsection (a) of section 3210 of title 39, United States Code, is amended—

(1) in paragraph (3)(B), by striking out "congressional newsletter or";

(2) in paragraph (5)(D) by striking out "candidate for public office. For the purpose of this clause (D), the term 'mass mailing' shall mean newsletters and similar mailings of more than 500 pieces in which the content of the matter mailed is substantially identical but shall not apply to mailings—" and inserting in lieu thereof "candidate for public office, provided that this prohibition shall not apply to mass mailings—"; and

(3) in paragraph (6) to read as follows:

"(6)(A) It is the intent of Congress that a Member of, or Member-elect to, Congress may only mail a mass mailing as franked mail if it is specifically describerd in subparagraph (C) of this paragraph and is otherwise not restricted by law or the rules of the Senate or the House of Representatives for Members or Members-elect of each respective House.

"(B) For purposes of this section, the term "mass mailing" means a mailing of more than five hundred pieces in which the content of the matter mailed is substantially identical.

"(C) The only mass mailings eligible to be mailed as franked mail are mass mailings—

"(i) which are in direct response to inquiries or requests from the persons to whom the matter is mailed;

"(ii) to colleagues in the Congress or to elected or appointed Government officials (whether Federal, State, or local);

"(iii) of news releases to the communications media;

"(iv) which consist of individually addressed responses on a specific issue to constituents who have previously written on the issue;

"(v) which consist of news announcements on a specific issue individually addressed to the chief officer or any member of the board of directors of an organization with an interest in the specific issue;

"(vi) which consist of materials not prepared by or relating to a Member of, or Member-elect to, Congress; or

"(vii) the sole purpose of which is to give notice of a town meeting and which is mailable as a 'postcard' as that term is defined in the Domestic Mail Classification Schedule maintained by the Postal Rate Commission.

"(D) The Select Committee on Ethics of the Senate and the Commission on Congressional Mailing Standards of the House of Representatives shall prescribe for each respective House such rules and shall take other actions as the Committee or the Commission considers necessary and proper for Members and Members-elect to comply with the provisions of this paragraph and other pertinent regulations. Such rules shall include, but not be limited to, provisions prescribing the time within which mailings shall be mailed or delivered to any postal facility and the time when the mailings shall be deemed to have been mailed at or delivered to comply with the provisions of this paragraph."

(b) Subsection (c) of section 3210 of title 39, United States Code, is amended by striking out "newsletters,".

SEC. 2. (a) Effective October 1, 1989, subsection (A)(2) of section 3216 of title 39, United States Code, is amended by striking out "by a lump sum appropriation to the legislative branch" and inserting in lieu

thereof "from funds appropriated to (or otherwise available from) the Senate (for costs attributable to the Senate) and from funds appropriated to (or otherwise available from) the House (for costs attributable to the House of Representatives)".

(b) Subsection (c) of section 3216 of title 39, United States Code, is repealed and subsection (d) of such section is redesignated subsection (c).

SEC. 3. Effective October 1, 1989, there shall be—

(a) within the contingent fund of the Senate, a separate appropriation account to be known as the "Senate Official Mail Costs Account", which shall be administered by the Secretary of the Senate, and

(b) within the fund for Contingent Expenses of the House, a separate appropriation account to be known as the "House Official Mail Costs Account", which shall be administered by the Clerk of the House of Representatives.

SEC. 4. The Senate Select Committee on Ethics and the House Commission on Congressional Mailing Standards shall prescribe for each respective House rules and regulations governing any franked mail. Such rules and regulations shall include, for each Member of each respective House, an allocation from the amount appropriated for official mail. For Members of the Senate, such allocation shall be related to the population of the state represented. The costs for postage for such franked mail mailed by or for a Member in excess of the amount of the allocation shall be charged to such Member and shall be paid by such Member (if the allocation is from the Senate) in accordance with rules and regulations as may be prescribed by the Senate Committee on Rules and Administration, and (if the allocation if from the House) in accordance with such rules and regulations as may be prescribed by the House Commission on Congressional Mailing Standards.

SEC. 5. (a) Two weeks after the close of each calendar quarter, or as soon as practicable thereafter, the Sergeant at Arms and Doorkeeper of the Senate shall send to each Senator a statement of the cost of postage and paper and of the other operating expenses incurred as a result of mass mailings, as defined in subparagraphs (iv) through (vii) of section 3210(a)(6)(C) of title 39, United States Code, processed for such Senator during such quarter. The statement shall separatetly identify the cost of postage and paper and other costs, and shall distinguish the costs attributable to different classes of mass mailings. The statement shall also include the total cost per capita in the State. A compilation of all such statements shall be sent to the Committee on Rules and Administration. A summary tabulation of such information shall be printed in the Congressional Record next printed after the statements are received by the Committee and shall be included in the semiannual Report of the Secretary of the Senate. Such summary tabulations shall set forth for each Senator the following information: the Senator's name, the total number of pieces of mass-mail mailed during the quarter, the total cost of such mail, and the cost of such mail divided by the total population of the State from which the Senator was elected.

(b) Two weeks after the close of each calendar quarter, or as soon as practicable thereafter, the House Commission on Congressional Mailing Standards shall send to each Member of the House of Representatives a statement of the cost of postage and paper and of the other operating expenses incurred as a result of mass mailings, as defined in subparagraphs (iv) through (vii) of section 3210(a)(6)(C) of title 39, United States Code, processed for such Member during such quarter. The statement shall separately identify the cost of postage and paper and other costs, and shall distinguish the costs attributable to different classes of mass mailings. The statement shall also include the total cost per capita in the district from which such Member was elected. A compilation of all such statements shall be sent to the House Committee on House Administration. A summary tabulation of such information shall be printed in the Congressional Record next printed after the statements are received by the Committee and shall be included in the quarterly Report of the Clerk of the House. Such summary tabulations shall set forth for each Member the following information; the Representative's name, the total number of pieces of mass-mail mailed during the quarter, the total cost of such mail, and the cost of such mail divided by the total population of the district from which the Member was elected.

DESCRIPTION OF WILSON NEWSLETTER BILL

The purpose of the bill is to prohibit the sending of congressional newsletters under the congressional frank and to otherwise prevent unlimited congressional mailings.

SECTION 1

(a)(1) Conforming amendment.

(b)(2) Conforming amendment.

(c)(3) This is the central provision of the bill, rewriting paragraph (6) of 39 U.S.C. 3210(a):

Paragraph (6)(A) establishes the basic rule that the only mass mailings allowed to be mailed under the frank are those that are specifically listed in paragraph (6)(C).

Paragraph (6)(B) defines a "mass mailing" as a mailing of more than 500 pieces of mail in which the material sent is substantially identical.

Paragraph (6)(C) lists those types of mass mailings that are allowed:

(i) Mail in direct response to incoming inquiries or requests.

(ii) Mail to government officials.

(iii) Press releases.

(iv) Follow-up mail to prior incoming letters inquiries.

(v) Mail to leaders of organizations of interest to the organization.

(vi) Materials not prepared by or about the member who is sending them—e.g., consumer booklet prepared by the Commerce Department.

(vii) Town meeting notices printed on a post card.

Paragraph (6)(D) requires the Senate Ethics Committee and the House Commission on Congressional Mailing Standards to establish rules implementing these rules and limitations.

(b) Conforming amendment.

SECTION 2

(a) This provision contains a conforming amendment to section 3. Section 3 splits the congressional franking account into separate House and Senate accounts. This subsection conforms 39 U.S.C. 3216(a)(2), which is the law that establishes the mechanism for paying the Postal Service for the costs of congressional mailings.

(b) The Anti-Deficiency Act generally limits federal agencies from spending more than has been appropriated. However, 39 U.S.C. 3216(c) exempts the Congress from the Anti-Deficiency Act by stating that the Postal Service shall accept as payment in full any amount forwarded by Congress. Subsection (b) of section 2 of the bill repeals this exemption.

SECTION 3

Section 3 establishes separate House and Senate official accounts. Under present law, there is a single congressional account.

SECTION 4

This section requires that the House of Representatives and the Senate allocate to each member of Congress a proportion of the total appropriation made to that House. The Senate appropriation shall be related to the size of the state represented.

SECTION 5

Subsections (a) and (b) of this section require a compilation of statistics on the costs of certain mass mailings—i.e., follow-up mail, press releases to leaders of organizations, government publications, and town meeting notices. Such information is to be summarized and printed in the Congressional Record and in the quarterly expense reports made by the House and Senate.

Mr. HUMPHREY. Mr. President, I am pleased to join the Senator from California as a cosponsor of legislation to restrict the use of congressional mass mailing.

This bill proposes reasonable restraints on the use of congressional mailings. The bill will ban the use of congressional newsletters and restrict the use of other mass mailings. This legislation will save the American taxpayer hundreds of millions of dollars over the next few years.

The bill will also, for the first time, introduce accountability into the congressional franking system. The bill will split the congressional franking account into separate House and Senate accounts. Each House and Senate Member shall receive an individual allocation for official mail, and any postage costs in excess of this allocation shall be charged to the Member.

Under this bill, the Clerk of the House and the Secretary of the Senate shall publish in the CONGRESSIONAL RECORD a quarterly tabulation of the mail costs for each Member. This tabluation shall include the Members name, the total number of pieces of mass mail which were mailed during the quarter, the total cost of the mail, and the cost of this mail divided by the total population of the Member's district.

While the Secretary of the Senate currently reports similar information for the Senate, the House does not. This change, combined with the publication in the RECORD, will create an incentive for each Member to be more frugal with his use of the frank.

According to the Congressional Research Service, over the last 18 years, Congress has spent over $1 billion for official mail. The cost of congressional mailings has escalated from $54 million in fiscal year 1981 to $114 million in fiscal year 1988. During fiscal year

1988, the House of Representatives received 157 million pieces of mail, and sent out 549 million pieces for a total cost of $77.9 million. The Senate received 54 million pieces of mail, and sent out 257 million pieces, for a total cost of $35.5 million.

Thus, last year, Congress spent a total of $114 million on mail costs, and sent out approximately 5 pieces of mail for each letter it received.

If you divide the 806 million pieces of mail sent out by Congress in 1988 by the number of working days in a year, this works out to slightly over 3 million pieces of mail per working day. If you divide that number by the 535 Members of Congress, this means that in 1988, Congress sent out an average of 5,765 pieces of mail, per day, per Member. It would seem to me that if any Senator wants to complain about the high volume of junk mail that he receives in his post office box, he should start pointing the finger at himself.

Since there is traditionally a 25- to 30-percent difference in mails costs between election and nonelection years, the U.S. Postal Service has estimated that Congress would only spend a "mere" $83.3 million in mail costs for fiscal year 1989. However, Congress only appropriated $53.9 million for mail costs, and currently there will be a deficiency of almost $30 million. If Congress does not act to cover this deficiency, the Postal Service will be forced to pick up the tab for these costs.

And how has the Senate responded to this outrageous pattern of spending? On February 28 of this year, the Senate approved legislation which lifted the Senate's self imposed restraints on mass mailings. This system, which had been in effect since 1986, limited mass mailings by imposing a paper allotment on each Senator. Under the new rules passed in February, each Senator would be allowed to send out as many as 6 mailings per year for each postal patron in their State—the same as the current limitation in the House. Senator WILSON has estimated that if each Senator took full advantage of this new rule, the Senate could theoretically spend over $180 million on mass mailings this year—an increase of 500 percent over last year.

Why, Mr. President, was this change made? According to its sponsors, it was an attempt to force the House to evenly divide the annual appropriation for mailing costs. Mr. President, increasing the amount of money the Senate spends on postage, as a method of forcing the House to get in line, makes about as much sense as cutting down the tree to save a cat.

I would also like to point out some information which was reported in the Washington Post on April 19. Last year, the Senate paid $250,000 to purchase a new printing press, which for the first time will allow extensive use of two-color production. Combined with the fact that the removal of the mass mail limits will allow each Senator to send eight page newsletters instead of four, the U.S. Senate could give many daily newspapers a real run for their money.

According to estimates which the Clerk of the House made in January 1989, Congress will send out 777 million pieces of mail in fiscal year 1990, at a cost of $134.7 million. Of this amount, the House will spend $94.6 million. However, these estimates do not even include the increased mass mail allowances which were passed by the Senate in February. It appears likely that with these changes, Congress will easily set another all-time high for mailing costs.

One Member of the House of Representatives is quoted in the May 2 issue of the CONGRESSIONAL RECORD as saying that when he first became a Member of that body, a more senior Member advised him to do three things in order to ensure reelection. "First, you use the frank; second, you use the frank; third, if need be, you abuse the frank."

With this legislation, Senators are presented with an opportunity to eliminate the continued abuse of the franking privilege. Not only will this bill reduce the total amount of mail costs for the House and Senate, but by creating fair and open accounting methods, each Member will be held responsible for individual use of the mail privilege.

For too long, Congress has failed to limit its shameless self promotion. Senator WILSON's bill is an effective way to limit this problem, and it is certainly worthy of support.

By Mr. CRANSTON:

S. 992. A bill to amend section 8e of the Agricultural Adjustment Act (U.S.C. 608e-1), reenacted with amendments by the Agricultural Marketing Agreement Act of 1937 so as to add kiwi friut, peaches, pears, nectarines, and plums to the list of imported commodities that must meet the minimum quality standards of domestically produced fruits, vegetables and specialty crops; to the Committee on Agriculture, Nutrition, and Forestry.

AMENDMENTS TO AGRICULTURAL ADJUSTMENT ACT

Mr. CRANSTON. Mr. President, I introduce for appropriate reference a bill to amend section 8e of the Agricultural Adjustment Act, reenacted with amendments by the Agricultural Marketing Agreement Act of 1937, to add kiwi fruit, peaches, pears, nectarines, and plums to the list of imported commodities that must meet minimum quality standards of domestically produced fruits, vegetables, and specialty crops.

The Agricultural Marketing Agreement Act authorizes producers and handlers of fruits, vegetables, and specialty crops to enter into an agreement with the Secretary of Agriculture to develop programs to stabilize and improve markets for their products. These programs, known as marketing orders, can be put into effect only if approved by a majority of the producers of the commodity in a producer referendum. Once approved, however, all producers and handlers in a defined production area are subject to the provisions of the marketing order. The marketing orders can include collection of uniform assessments to fund production and marketing research, generic advertising and promotion, regulation to assure orderly flows to market, and minimum quality standards for products commercially sold.

Currently some 50 agricultural commodities, including kiwi fruit, peaches, pears, nectarines, and plums, are marketed under the provisions of a marketing order. The Federal marketing order for kiwi fruit was established in 1984. It provides for minimum grade, size, and maturity requirements. California fresh pears, plums, and peaches have operated under a marketing order since the 1940's. A separate marketing order for nectarines was established in 1958. The marketing orders for these four fruits also provide for minimum quality standards. These minimum quality provisions ensure that consumers receive a high quality product and help enhance industry sales.

However, efforts by a domestic industry to market only high quality produce under the auspices of a marketing order can be severely undercut by imports of a like commodity that is of inferior quality. Consumers often cannot distinguish between fresh fruits and vegetables that are domestically grown and those that are imported. Section 8e of the Agricultural Marketing Agreement Act provides a remedy to this problem by providing that if domestic producers adopt through a marketing order a plan to establish minimum quality standards for a particular commodity, then the imported commodity marketed domestically must also meet these minimum quality standards. Section 8e thus ensures quality consistency and benefits domestic and foreign producers equally to the extent that the market is enhanced through improved product quality.

Currently there are 20 agricultural commodities being marketed under the auspices of section 8e. California kiwi fruit, peach, pear, nectarine, and plum growers are asking that their products be added to this list of section 8e crops. The State's kiwi fruit industry is relatively new and the kiwi fruit market is heavily dominated by

first-time buyers. The industry believes that consumption of kiwi fruit can be maintained and expanded if consumers have available to them a consistently high quality, tasteful product. However, consumer preference can be easily destroyed by one bad experience especially if it is the consumer's introduction to the fruit. Imports of kiwi fruit have been increasing significantly and include fruit that tends not to ripen enough to result in a high quality product. Unfortunately, this influx of lower quality imported fruit has economically hurt California kiwi fruit growers. The California peach, pear, nectarine, and plum industries have well developed markets, supplying consumers with fruit that is attractive and of good eating quality. However, imports of peaches, pears, nectarines, and plums also have increased substantially over the last 5 years. The upward trend in imports is expected to continue. California growers of these products are interested in amending section 8e so that their past achievements in marketing quality peaches, pears, nectarines, and plums can be successfully continued.

The bill I am introducing today would ensure that kiwi fruit, peaches, pears, nectarines, and plums produced in foreign countries and marketed in the United States have the same minimum quality standards of fruit produced and marketed domestically. It will give the same section 8e coverage already afforded 20 other agricultural commodities.

Mr. President, I ask unanimous consent that the text of the bill be printed at this point in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 992

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That Section 8e of the Agricultural Adjustment Act (7 U.S.C. 608e-1), reenacted with Amendments by the Agricultural Marketing Agreement Act of 1937 is amended as follows: In "a" of Section 8e in the first sentence, before the word "eggplants" the word "or" shall be deleted and a comma added and after the word "eggplants" a comma shall be inserted and the words "kiwi fruit, peaches, pears, nectarines, or plums" added.

By Mr. KOHL (for himself, Mr. PRYOR, Mr. HATFIELD, Mr. GLENN, and Mr. LEAHY):

S. 993. A bill to implement the Convention on the Prohibition of the Development, Production and Stockpiling of Bacteriological (Biological) and Toxin Weapons and Their Destruction, by prohibiting certain conduct relating to biological weapons, and for other purposes; to the Committee on the Judiciary.

BIOLOGICAL WEAPONS ANTI-TERRORISM ACT

● Mr. KOHL. Mr. President, Senator PRYOR and I, along with Senators LEAHY, HATFIELD, and GLENN, are today introducing legislation to prohibit the development and production of biological weapons. The Biological Weapons Anti-Terrorism Act of 1989 will close a loophole in the Criminal Code and complete the implementation of an important international treaty. It will help combat terrorism and, at the same time, reaffirm our Nation's commitment to arms control. Similar legislation has been introduced in the House by ROBERT KASTENMEIER, my colleague from Wisconsin.

In 1972, the United States signed the Convention on the Prohibition of the Development, Production and Stockpiling of Bacteriological (Biological) and Toxin Weapons and Their Destruction. The Senate unanimously ratified this convention in December 1974. In all, 103 countries, including the Soviet Union, have agreed to its terms.

The convention prohibits signatory governments from developing biological weapons "in any circumstances." Parties to the convention pledge that they will not maintain biological agents or toxins "that have no justification for prophylactic, protective or other peaceful purposes." Article IV of the convention obligates each party to "take any necessary measures to prohibit and prevent the development, production, stockpiling, acquisition, or retention" of biological weapons "within the territory of each such State, under its jurisdiction or under its control anywhere." While several nations have interpreted article IV to require enactment of prohibitions in their domestic criminal laws, the United States has not yet taken this crucial step.

Our Biological Weapons Anti-Terrorism Act will put teeth into article IV of the convention by making it illegal for private persons to develop biological weapons. Implementation legislation will send a signal to the rest of the world: The United States remains firmly opposed to biological weapons at a time when developments in genetic engineering render germ warfare ever more threatening.

Our bill is simple, effective, and straightforward. It would make it a criminal offense knowingly to develop "any agent, toxin, or delivery system for use as a weapon of mass destruction." It would also authorize the Attorney General to seize and destroy such creations. The bill additionally imposes penalties on those who assist foreign nations in acquiring biological agents for use as weapons.

However, the measure would create a safe harbor for research and development that "is for a prophylactic, protective, or other peaceful purpose." Thus, for example, a medical researcher would not face liability for trying to understand a virus. Nor would the Attorney General be authorized to interfere with the dissemination of scientific ideas. In short, the bill poses no danger to the growing biotechnology industry. Moreover, it does not affect the Defense Department's existing Biological Defense Research Program.

Mr. President, even if this legislation were not required by the 1972 convention, we would still be wise to enact the bill to help combat terrorism. Surprisingly, there is no uniform statute that criminalizes the development of biological devices or organisms that are meant to kill others. We cannot rely on existing statutes that may arguably regulate one or another aspect of the problem—for instance, the Toxic Substances Control Act. The prospects of biological terrorism are too ghastly to permit a loophole in our law. As a Chicago Tribune article recently explained, the biological agents necessary for weapons "can be cultivated in an unsophisticated college laboratory from snake venom or a variety of bugs that infect humans or farm animals."

I am pleased to note that President Bush has repeatedly expressed his abhorrence of biological weapons. For example, in accepting his party's nomination in August 1988, Mr. Bush stated:

> Ban chemical and biological weapons from the face of the Earth. That will be a priority with me.

It is a priority for me, too, and I am confident that this proposal will become law in the 101st Congress. I urge my colleagues to support the Biological Weapons Anti-Terrorism Act of 1989.

I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 993

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act my be cited as the "Biological Weapons Anti-Terrorism Act of 1989".

SEC. 2. TITLE 18 AMENDMENTS.

(a) IN GENERAL.—Title 18, United States Code, is amended by inserting after chapter 9 the following:

"CHAPTER 10—BIOLOGICAL WEAPONS

"Sec.
"175. Prohibitions with respect to biological weapons.
"176. Seizure and destruction.
"177. Injunctions.
"178. Definitions.

"§ 175. Prohibitions with respect to biological weapons

"Whoever, in the United States or under the jurisdiction or control of the Government of the United States anywhere—

"(1) knowingly develops, produces, stockpiles, transfers, acquires, retains, or posesses any agent, toxin, or delivery system for use as a weapon of mass destruction; or

"(2) knowingly assists a foreign state or an international organization (as defined in section 1116 of this title) to manufacture or otherwise acquire any agent, toxin, or delivery system for use as a weapon of mass destruction;

shall be fined under this title or imprisoned for life or any term of years, or both.

"§ 176. Seizure and destruction

"(a) IN GENERAL.—The Attorney General may seize and provide for the destruction of—

"(1) any agent, toxin, or delivery system that exists by reason of conduct prohibited under section 175 of this title; and

"(2) any agent or toxin of a type or in a quantity useful primarily as a weapon of mass destruction.

"(b) DEFENSE.—It is a defense against a seizure under subsection (a) of this section that—

"(1) such agent or toxin is for a prophylactic, protective, or other peaceful purpose; and

"(2) such agent or toxin is of a type and quantity reasonable for that purpose.

"(c) PROCEDURE.—The same procedures and provisions of law relating to a forfeiture under section 924(d) of this title shall so far as applicable extend to a seizure under this section.

"(d) NONEXISTENCE OF PROPERTY RIGHTS.—No property right shall exist in any agent, toxin, or delivery system that is subject to seizure under this section.

"§ 177. Injunctions

"(a) IN GENERAL.—The United States may obtain in a civil action an injunction against—

"(1) the conduct prohibited under section 175 of this title;

"(2) the planning, preparation, solicitation, attempt, or conspiracy to engage in conduct prohibited under section 175 of this title; or

"(3) the development, production, stockpiling, transferring, acquisition, retention, or possession, or the attempted development, production, stockpiling, transferring, acquisition, retention, or possession, of any agent or toxin of a type or in a quantity useful primarily as a weapon of mass destruction.

"(b) DEFENSE.—It is a defense against an injunction under subsection (a)(3) of this section that—

"(1) the conduct sought to be enjoined is for a prophylactic, protective, or other peaceful purpose; and

"(2) such agent or toxin is of a type and quantity reasonable for that purpose.

§ 178. Definitions

"As used in this chapter—

"(1) the term 'agent' means any micro-organism, virus, or infections substance, capable of causing—

"(A) death, disease, or other biological malfunction in a human, an animal, a plant, or another living organism;

"(B) deterioration of food, water, equipment, supplies, or material of any kind; or

"(C) deleterious alteration of the environment;

"(2) the term 'toxin' means, whatever its origin or method of production—

"(A) any poisonous substance produced by a living organism; or

"(B) any poisonous isomer, homolog, or derivative of such a substance;

"(3) the term 'delivery system' means—

"(A) any apparatus, equipment, device, or means of delivery specifically designed to deliver or disseminate an agent, toxin, or vector; or

"(B) any vector;

"(4) the term 'vector' means a living organism capable of carrying an agent or toxin to a host; and

"(5) the term 'use as a weapon of mass destruction' means—

"(A) use or the threat to use; or

"(B) causing, permitting, or facilitating use;

as a weapon of mass destruction and

"(6) the term 'whoever' includes governmental entities and personnel.".

(b) CLERICAL AMENDMENT.—The table of chapters for part I of title 18, United States Code, is amended by inserting after the item relating to chapter 9 the following new item:

"10. Biological Agents and Toxins..... 175.".●

● Mr. PRYOR. Mr. President, I am happy to join Senator KOHL today as a cosponsor of the Biological Weapons Anti-Terrorism Act of 1989.

Mr. President, the possibility of terrorists using simple biological weapons within U.S. borders is horrible but unfortunately imaginable. It is horrible because lethal biological agents can spread through a population from a single source causing mass destruction on the order of a nuclear attack. It is imaginable because, unlike nuclear weapons, biological weapons are relatively cheap and easy to procure and produce.

Mr. President, realizing the uncontrollable destructive nature of biological weapons, the United States and 102 other nations, including the Soviet Union, signed a convention outlawing the production, stockpiling, or use of such weapons in 1972. We destroyed our stockpiles and today perform only defensive biological weapons research.

The executive branch attempted but failed on two occasions to have legislation enacted to implement the 1972 convention enacted by Congress. The bill was introduced in 1973 when the convention was submitted to the Senate but it was not acted upon because ratification of the convention was delayed until 1975. A second effort was made late in 1980, but Congress was unable to act before the end of the session.

The bill we are proposing is not unlike the measures introduced by previous administrations. It would establish strict criminal penalties, including tough fines and the potential for life imprisionment, for any individual or corporation that knowingly develops or produces biological agents, toxins, or delivery systems for offensive use, or that assists any foreign person in such activities. While it cannot guarantee that a determined group will not gain access to a biological weapon, legislation will minimize the threat by providing direction and a course of action for law enforcement efforts and by creating a stronger incentive for the scientific community to carefully police their work.

Our bill will not affect the current $63 million per year Defense Department Biological Defense Research Program. Nor will it have any impact on the U.S. offensive chemical weapons program. Finally it will not prohibit the use of biological agents for commercial purposes.

With this bill we will send a strong message to those who would make criminal use of biological agents. The message is that such activity will be dealt with severely and with certain punishment. This legislation will also put the United States in a stronger position to assail violations of the 1972 convention by other nations and it will help to fulfill President Bush's pledge to punish violators of biological weapons agreements.

Mr. President, tomorrow the Governmental Affairs Committee will hold an important hearing on biological weapons proliferation. I hope that in that hearing the administration can begin to form its support for this legislation.

I commend Senator KOHL's leadership in this area and urge my colleagues to support his future efforts in the Judiciary Committee and on the Senate floor to see this bill passed.●

● Mr. GLENN. Mr. President, I wish to commend my colleagues Senators KOHL and PRYOR for introducing legislation which will implement article IV of the 1972 Biological Weapons Convention. The bill will make it a criminal offense to knowingly develop, produce, stockpile, transfer, acquire, retain, or possess any agent, toxin, or delivery system for use as a weapon of mass destruction. Moreover, the legislation makes it a criminal offense to knowingly assist a foreign state or an international organization to manufacture or otherwise acquire any agent, toxin, or delivery system for use as a weapon of mass destruction.

The legislation will fulfill a U.S. responsibility in meeting its treaty obligation. At the second Review Conference on the Biological Weapons Convention in 1986, the majority of the States Party to this treaty agreed to encourage the passage of domestic legislation to ensure the physical security of laboratories and research facilities and to prevent the transfer of biological warfare agents, toxin, and weapons. In discussions with members of the Governmental Affairs Committee, officials from the Departments of State and Defense indicate that they are also supportive of measures to implement article IV and discourage the activities of individuals or corporations that violate the Convention.

S. 993 is clearly not an attempt to slow the development of the rapidly growing biotechnology industry. America is the world's leader in this

vital scientific area and we have no desire to hamper legitimate and peaceful biomedical research. However, as Judge William Webster, Director of the Central Intelligence Agency, and others have said, a threat to the U.S. and its allies from biological weapons does exist. Therefore, we must do all that we can to prevent our domestic activities from promoting development of these heinous weapons abroad, especially where they might fall into terrorist hands.

I became an original cosponsor of this legislation because I feel strongly that it will send a clear message to the world of our country's strong commitment to chemical and biological arms control. This is an important message to send at a time when the number of nations considering arming themselves with chemical or biological weapons may be increasing. As the technology to produce biological weapons becomes simpler and more widely known it is more likely that states will resort to their use. It is my hope that this legislation will herald more serious attempts by the U.S. to participate actively in developing verification schemes that will improve the chemical weapons treaty and put stronger teeth into the Biological Weapons Convention.●

By METZENBAUM (for himself, Mr. THURMOND, Mr. SIMON, Mr. DECONCINI, Mr. LEAHY, and Mr. HATCH):

S. 994. A bill to amend the Clayton Act regarding interlocking directorates and officers; to the Committee on the Judiciary.

INTERLOCKING DIRECTORATES AND OFFICERS

Mr. METZENBAUM. Mr. President, today I am introducing legislation to reform and modernize section 8 of the Clayton Act which regulates interlocking directorates. Section 8 prohibits an individual from serving as a director of two competing companies. Last year, the Senate approved the modifications to section 8 that are contained in this bill. The changes were supported by the Justice Department. I have worked with Senator THURMOND to develop this legislation and welcome him as a cosponsor, along with Senators SIMON, DECONCINI, LEAHY, and HATCH.

Section 8 was enacted in 1914. The principal sections of the act concerning interlocking directors have not been modified since this original enactment. Consequently, it is appropriate that the Congress review the statute and revise it to address current competitive concerns.

The measure I am introducing today addresses three concerns about the current provisions. First, it is appropriate that the threshold jurisdictional requirement regarding the size of corporation covered by the act be updated. Our bill raises the threshold enacted in 1914, 1 million dollars in net worth, to ten million dollars.

Second, our bill addresses the need for a de minimus exception to the flat bar on a single person serving on the board of competing companies. It is appropriate to prevent the potential sharing of information and other related anticompetitive behavior which may result from the same person serving as a director of competing corporations. However, corporations covered by the act have raised the legitimate concern that in some cases a qualified director cannot serve on a board even though the competitive overlap with another corporation represents only an insignificant portion of either company's sales. In these cases the statute is not serving any useful purpose in preventing harm to competition, but is only hindering the freedom of qualified individuals to serve as directors.

Our bill addresses this issue by providing for three de minimus categories, or safe harbors. If the competitive overlap does not exceed these safe harbors, the bar on a common director would not apply. The bill provides for a safe harbor if the affected sales constitute less than: First $1 million for either company; second 1 percent of either company's sales; or third, 4 percent of both company's sales.

Finally, our bill addresses the concern that the current ban covers only corporate directors, not senior officers. The current provision is illogical because a common senior officer presents an equal or greater potential for reducing competition. The bill would extend the bar to officers of competing corporations.

I appreciate the cooperation of Senator THURMOND who has provided extremely useful and thoughtful suggestions. We have worked to pursue this bill in a spirit of compromise and I hope my colleagues will see fit to support this measure.

I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 994

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 8 of the Clayton Act is amended to read as follows:

"SEC. 8. (a)(1) No person at the same time shall be a director or officer of any two corporations, each of which has capital, surplus and undivided profits aggregating more than $10,000,000, as adjusted pursuant to this subsection, engaged in whole or in part in commerce, other than banks, banking associations, trust companies, and common carriers subject to subtitle IV of title 49, United States Code, if such corporations are by virtue of their business and location of operation, competitors so that the elimination of competition by agreement between them would constitute a violation of any of the provisions of any of the antitrust laws.

"(2) Notwithstanding the provisions of paragraph (1), simultaneous service as a director or officer of two corporations shall not be prohibited by this section if (A) the aggregate competitive sales of either corporation are less than $1,000,000, as adjusted pursuant to this subsection, (B) the aggregate competitive sales of either corporation are less than 1 percent of that corporation's total sales, or (C) the aggregate competitive sales of each corporation are less than 4 percent of that corporation's total sales. For purposes of this paragraph, 'aggregate competitive sales' means the aggregate gross revenues for all products and services sold by one corporation in competition with the other, determined on the basis of annual gross revenues for such products and services over the last completed fiscal year. For purposes of this section, 'total sales' means the aggregate gross revenues for all products and services sold by one corporation over the last completed fiscal year.

"(3) The eligibility of a director or officer under the provisions of paragraph (1) shall be determined by the capital, surplus and undivided profits of each corporation at the end of that corporation's last completed fiscal year.

"(4) For purposes of this section, the term 'officer' means an officer elected or chosen by the Board of Directors.

"(5) For each fiscal year commencing after September 30, 1988, the $10,000,000 and $1,000,000 thresholds in this section shall be increased (or decreased) as of October 1 each year by an amount equal to the percentage increase (or decrease) in the Gross National Product, as published by the Department of Commerce or its successor, for the year then ended, over or under the level so established for the year ending September 30, 1987. At the beginning of October of each year, the Federal Trade Commission shall publish the adjusted amounts required by this paragraph.

"(b) When any person elected or chosen as a director or officer of any corporation subject to the provisions of this Act is eligible at the time of his election or selection to act for such corporation in such capacity, his eligibility to act in such capacity shall not be affected and he shall not become or be deemed amenable to any of the provisions hereof by reason of any change in the capital, surplus and undivided profits, or affairs of such corporation from whatsoever cause, whether specifically excepted by any of the provisions hereof or not, until the expiration of one year from the date on which an event causing ineligibility occurred, or, if practical, the next regularly scheduled election of directors, whichever occurs first."

Mr. THURMOND. Mr. President, I am pleased to introduce, along with Senator METZENBAUM, this legislation which will amend section 8 of the Clayton Act regarding interlocking directorates and officers. I am also pleased that Senators HATCH, DECONCINI, LEAHY, and SIMON have joined as original cosponsors. This bill, which is identical to legislation which was passed by unanimous consent in the Senate last Congress, is long overdue and much needed to modernize the treatment of interlocking directorates.

The amendment contains three provisions: First, it raises the jurisdictional threshold for companies covered by section 8 from $1,000,000 to

$10,000,000; second, it specifically creates certain de minimis exceptions to coverage; and, third, it expands section 8 to include officers elected or chosen by the Board of Directors.

Section 8, which prohibits the same person from sitting on the board of directors of competing corporations, was enacted in 1914 and has remained virtually unchanged since that time. The changes which we are proposing today will do nothing to alter the basic concept of section 8, but will only update it to take into account the economic and competitive changes which have occurred in the last 75 years. This is particularly important with respect to raising the jurisdictional threshold from $1,000,000 to $10,000,000, and establishing certain de minimis exceptions.

The substantial increase in price levels since 1914 means that the size of corporations now covered by section 8 is substantially lower than what Congress originally intended. Such corporations are not likely to be engaged in so significant a degree of commerce as to warrant coverage of the act. The same is true with respect to establishing de minimis exceptions. Current case law precludes the application of any de minimis exceptions. Yet, there is nothing to be accomplished by prohibiting individuals from serving on the boards of two companies if the amount of competitive overlap between the two companies is so small as to be competitively insignificant.

Mr. President, this legislation is an important modernization of one aspect of our antitrust laws. It is apparent from the list of original cosponsors and from the previous action on this legislation, that it has strong bipartisan support. I am pleased to be one of the cosponsors, and I encourage all of my colleagues to support these changes to section 8.

By Mr. METZENBAUM (for himself and Mr. THURMOND):

S. 995. A bill to amend the Clayton and Sherman Acts regarding antitrust procedures; to the Committee on the Judiciary.

ANTITRUST PROCEDURES IMPROVEMENT ACT

Mr. METZENBAUM. Mr. President, today I am introducing legislation to reform and modernize certain procedural aspects of the antitrust laws. Several provisions of this bill are identical to those which passed the Senate in the 100th Congress. Last Congress, the Senate approved changes to the Hart-Scott-Rodino premerger notification provisions of the Clayton Act which would close the partnership loophole for premerger filings, extend the review period for acquisitions, and raise thresholds for reporting mergers. This bill includes, in addition, provisions which would increase criminal fines and civil penalties available to the Government for violations of the antitrust laws, permit the Federal Trade Commission to prosecute violations of premerger notification requirements, and establish filing fees for premerger notification forms. I am pleased to be joined in this effort by Senator THURMOND.

The reforms contained in this bill are needed to give the antitrust enforcement agencies tools to police more effectively the laws of free competition. Merger and acquisition activity is again on the rise, with billions of dollars in assets changing hands each year. And the deals are getting bigger and bigger. Just this past year we witnessed three of the largest mergers in history: Campeau's buyout of Federated Department Stores for $6.5 billion; Phillip-Morris' acquisition of Kraft for $13 billion and Kohlberg Kravis & Robert's acquisition of RJR Nabisco for $25 billion. In February, Time, Inc., announced plans to merge with Warner Communications to create a media giant worth over $18 billion. This current merger wave will have lasting effects on our economy and on competition.

The time has come to strengthen the antitrust laws. We must put more teeth in the laws and put more resources in the hands of the enforcement agencies. We cannot afford to sit idly by while our economy becomes more and more concentrated, and while certain companies and individuals continue to flout the laws of free competition. Consumers deserve to know that we are committed to enforcement of the antitrust laws. This bill reaffirms that commitment.

I. CRIMINAL FINES

This legislation would increase the fines for criminal violations of the Sherman Act to $10 million for corporations and to $250,000 for individuals. The current penalties are simply not sufficient to deter criminal behavior, as is evidenced by the dramatic increase in the number of criminal price fixing and bid rigging convictions in the past few years. The penalties for this type of anticompetitive, anticonsumer conduct must be onerous enough that they are not viewed simply as a cost of doing business.

II. HART-SCOTT-RODINO ACT AMENDMENTS

This measure proposes several modifications to the Hart-Scott-Rodino Antitrust Improvements Act of 1976. After more than a decade of experience with reviewing proposed acquisitions under this section of the Clayton Act, the time has come to fine tune what has proven to be an invaluable enforcement tool for the antitrust agencies.

A. TIME FOR REVIEW OF MERGERS

The proposal would lengthen the time given to the antitrust enforcement agencies to complete their review in the case of large or complex mergers and in the case of cash tender offers. These extensions were appoved by the Senate without opposition last Congress.

While current law contains different waiting periods for mergers occurring by means of a cash tender offer and mergers effected in other ways, there is no correlation between the way in which an acquisition is structured and the antitrust issues it raises. Under existing law for cash tender situations, the enforcement agencies have an initial 15-day period to determine whether a more detailed investigation of a proposed acquisition is warranted and to request additional information from the merging parties. The statute currently gives the agency only 10 days to review materials submitted by the parties. In a noncash tender situation, the initial period is 30 days and the second period is 20 days. The proposal extends both the initial waiting period and the second waiting period for cash tender acquisitions to 20 days.

In addition, the bill provides for a process by which the enforcement agencies may seek additional time to review particularly complex mergers. Under this provision, the agencies may request that a court extend the statutory waiting period by an additional 25 days under certain circumstances.

Given the complex antitrust issues posed by the recent spate of stock acquisitions in the food industry, among others, it is unreasonable to expect that the enforcement agencies are not hindered in their review by the very brief time periods originally contained in the Hart-Scott-Rodino Act. The extensions proposed strike a balance between the need for thorough antitrust scrutiny of cash tender transactions and the desire not to interfere unduly with cash tender offers.

B. PARTNERSHIP LOOPHOLE

This provision would close a loophole that currently exists in the Clayton Act which allows wealthy individuals and corporations to evade the requirements of the premerger notification program merely by forming a partnership. The attempted takeover of Goodyear by Sir James Goldsmith and the attempted takeovers of Phillips Petroleum and Shamrock Oil by T. Boone Pickens were structured to take advantage of this loophole. This type of transaction continues to evade antitrust review merely by relying on an artifice that is not accountable under the FTC's current interpretation of its notification rules.

Last year, the FTC promulgated a rule which requires any person holding a controlling interest, that is, 50 percent or more, in a partnership to file premerger notification forms with the enforcement agencies as the parent entity of the partnership. This rule does not, however, require partnerships in which no partner controls at least 50 percent of the venture to

file. As a result, while FTC has narrowed the loophole somewhat by its new rule, the loophole still exists whereby wealthy individuals and corporations can create a new partnership with no partner holding 50 percent and avoid the filing requirements of the Clayton Act. For example, a partnership made up of Exxon, Mobil, and Chevron, each holding a one-third interest, could create a entity to purchase the assets of some business and the transaction would not be reportable because, under current interpretations, no person controls the partnership. Under this bill, any general partner that meets the size of person test may be required to file notification as determined by the Federal Trade Commission.

Many people, including the FTC and the business community, have realized that this loophole exists and is utilized by companies hoping to avoid reporting transactions. As a result, the FTC has recently proposed another rule and is reviewing five options for closing the loophole. If the FTC effectively closes the loophole, our proposal would not be necessary. However, if the FTC is not able to fashion a rule that closes the partnership loophole once and for all, this legislation would accomplish that goal. Large, sophisticated companies should not be able to avoid filing merely by forming a partnership. The intent of the premerger notification program was not to favor certain transactions effected by means of a partnership.

C. FILING FEES

The bill provides for filing fees for those persons making premerger notification reports. It is time to recognize that merger enforcement is in a state of crisis. One cause is easy to understand—the enforcement agencies do not have sufficient resources. Just this year, the Federal Trade Commission fired 30 employees to meet a $4.3 million shortfall and may be required to release additional employees to meet the budget reductions contained in the fiscal year 1990 budget proposal. According to Chairman Oliver, "further budget reductions would necessarily have some adverse impact on our law enforcement activities." Similarly, the proposed 1990 budget for the Justice Department includes a further reduction of five positions in the staff of the Antitrust Division.

And the trend in resources committed to merger enforcement is even more alarming. At the Federal Trade Commission, the workyears devoted to the Commission's antitrust mission fell from 759 in 1980 to 457 in 1988. In 1989, the Antitrust Division of the Department of Justice was staffed with 409 attorneys; in 1988, the Department had only 237 attorneys. This represents a decrease of nearly 60 percent in staffing for antitrust enforcement.

Over the same period of time, the number of merger filings has increased dramatically. In 1980, the agencies received 784 Hart-Scott-Rodino filings; in 1988 the number was 2,746—an increase of more than 300 percent. In addition, the size of mergers has reached incomparable proportions. The number of multibillion-dollar megamergers hit an all time high in 1988, including the three largest mergers in history. These statistics alone define the problem: The agencies have a decreasing work force to deal with an increasing workload imposed by an explosion in the number of merger filings.

The filing fees contained in this bill are designed to alleviate some of the strain placed on the agencies by the current merger craze. Filing fees are a logical way to deal with the problem of how to budget resources devoted to merger enforcement in advance without knowing with certainty the number of mergers likely to take place in a given year. In addition, filing fees are fair in that the parties to a merger—and not the general taxpaying public—bear the cost of the premerger notification program.

Filing fees are common with several other regulatory agencies that deal with specific business transactions. For example, the U.S. Patent Office collects application fees for processing patents and trademarks and for various services offered by the Patent Office, 37 CFR section 1. In 1987, the Patent Office collected over 50 percent of its total budget through application fees. Similarly, the Federal Communications Commission collects general application fees for licenses. Those fees range from $25 to $2,000 per application. Again, this income amounted to one-half of the FCC's operating budget for 1988. The Federal Energy Regulatory Commission has established filing fees for a variety of applications which require regulatory approval, including annual filings that are required by law. Fees effective May 1988 range from $100 for review of remedial orders concerning small projects to a maximum of $19,450 for pipeline certificate applications.

The Securities and Exchange Commission uses a variety of application fees for processing filings related to securities transactions and registration statements. These fees are based on a percentage of the value of the transaction. For example, an applicant must pay a fee equal to one-fiftieth of 1 percent of the "maximum aggregate price at which the securities are proposed to be offered," or a minimum fee of $100, upon filing a registration statement; 15 U.S.C. section 77f(b). Fees collected by the SEC are deposited in the U.S. Treasury and amounted to nearly 200 percent of the total budget of the SEC in 1988.

The fees contained in this bill would amend the existing requirements for Hart-Scott-Rodino premerger filings. The acquiring person would pay a fee of one-fiftieth of 1 percent of the value of the transaction, with a maximum fee of $50,000, in conjunction with filing its notification form. For those transactions in which the precise value of the transaction is not known, the Federal Trade Commission may establish rules for determining the fee to be paid. This fee system would generate approximately $20 million to be divided evenly between the FTC and the Department of Justice for use in antitrust enforcement activities.

These fees would be a nominal additional cost for most transactions and would not be unreasonable in light of the strain that premerger review places on the resources of the enforcement agencies. As an example, the recent takeover of RJR Nabisco by Kohlberg Kravis Roberts & Co. was valued at more than $25 billion. KKR alone received a $75 million fee for arranging the transaction; lawyers, brokers and bankers collected hundreds of millions more. The filing fee required under our proposal would have been a mere $50,000. In fact, according to Fortune magazine, fees paid to brokers and financial analysts in the biggest deals of 1988 were typically over 1 percent of the value of the transaction. Thus, in a typical-sized merger of $30 million, transaction costs would be about $300,000 plus attorney's fees; the proposed fee for the Hart-Scott-Rodino filing would be $6,000. Filing fees of this magnitude would be insignificant in comparison with the enormous transaction costs associated with even the most mundane merger.

D. ENFORCEMENT

This bill would permit the Federal Trade Commission to sue on its own behalf for violations of its premerger notification rules. The Federal Trade Commission is currently empowered to investigate violations of Hart-Scott-Rodino filing requirements and to establish rules necessary to carry out the purposes of the premerger notification program; 15 USC section 7A(D). This bill would allow the Commission to seek a remedy from the court once it determines that it has reason to believe that the statute or its rules were violated. This would facilitate FTC enforcement of premerger notification violations and reduce the burden on the Department of Justice in bringing these suits in behalf of the FTC.

E. CIVIL PENALTIES

This proposal would increase the penalty for violations of the premerger notification requirements of the Clayton Act. Currently, the penalty for such violations is $10,000 for each day the company is found to be in violation. Yet this does not deter

companies from thwarting the law and engaging in reportable transactions without notifying the Government. Once a company surpasses the statutory threshold for reporting stock transactions, it must suspend its purchases for 30 days to give the Government the opportunity to review the purchase. But those who speculate in stocks don't want to wait. In a typical case, the company or individual will continue to trade, often buying and selling stock at tremendous profits, knowing that the cost of getting caught is more than offset by the profits to be gained. This type of evasion is motivated by nothing but greed. The only way to deter such behavior is to increase the cost of violating the law. This bill would increase the daily penalty to $100,000, and would permit the court to order additional relief.

F. FILING THRESHOLD

Under current standards, a proposed merger must be reported to the antitrust agencies if: First, either party to the merger is engaged in commerce or an activity affecting commerce; second, one party has total assets or annual net sales of $10 million or more, and the other party has total assets or annual net sales of $100 million or more; and third, after the acquisition, the acquiring person would hold 15 percent or more of the voting securities or assets of the acquired person, or more than $15 million of the acquired person's voting securities and assets.

This bill would raise the minimum dollar amounts for the "size of person" and "size of transaction" tests originally contained in the Hart-Scott-Rodino Act. The proposal would raise the threshold for persons required to file from $10 million to $15 million, and would raise the threshold for exempt transactions from $15 million to $30 million. These thresholds have not been changed since the law was passed in 1976. These thresholds in essence exempt small companies from the premerger notification reporting requirements where it is unlikely that the transaction would raise antitrust issues.

I appreciate the cooperation of Senator THURMOND who has provided extremely useful and thoughtful suggestions. We have worked to pursue this bill in a spirit of compromise and I hope my colleagues will see fit to support this measure.

I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 995

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Antitrust Procedures Improvement Act of 1989".

CRIMINAL FINES

SEC. 2. Section 1 of the Sherman Act (15 U.S.C. 1) is amended by—

(1) striking out "one million" and inserting in lieu thereof "ten million"; and

(2) striking out "one hundred" and inserting in lieu thereof "two hundred-fifty".

HART-SCOTT-RODINO ACT AMENDMENTS

SEC. 3. (a)(1) Section 7A of the Clayton Act is amended by adding at the end thereof the following new subsection;

"(k) For purposes of this section, annual net sales and total assets of an acquiring person shall, in the case of a partnership, be based upon the annual net sales or total assets of: (1) any general partner, (2) any partner having the right to 50 per centum or more of the profits of the partnership, or (3) any partner having the right in the event of dissolution to 50 per centum or more of the assets of the partnership, provided that the partner or partners required to file notification under this subsection shall be determined by the Federal Trade Commission in accordance with subsection (d).".

(2) This subsection and the amendments made by this subsection shall become effective 120 days after the date of enactment of this section.

(b)(1) Section 7A(a) of the Clayton Act is amended—

(A) in paragraph (2), by striking out "$10,000,000" each place it appears in subparagraphs (A), (B), and (C) and inserting in lieu thereof "$15,000,000".

(B) in paragraph (3)(B), by striking out "$15,000,000" and inserting in lieu thereof "$30,000,000".

(2) Section 7A(b)(1)(B) of the Clayton Act is amended—

(A) by substituting "twentieth" for "fifteenth"; and

(B) by striking out "or (g)(2)" and inserting in lieu thereof the following ", (g)(2), or (g)(3)".

(3) Section 7A(e) of the Clayton Act is amended—

(A) by substituting "20-day" for "15-day" each place it appears;

(B) in paragraph (2) by striking out "(or in the case of a cash tender offer, 10 days)"; and

(C) by striking out "only" from the last sentence of paragraph (2) and inserting at the end thereof the following: "or (g)(3)".

(4) Section 7A(g) of the Clayton Act is amended—

(A) in paragraph (1), by striking out "$10,000" and inserting "$100,000" in lieu thereof; by striking the period at the end of the first sentence and inserting: ", in addition to such equitable relief as the court finds appropriate."; and by inserting the following at the end thereof: "or the Federal Trade Commission."; and

(B) by adding the following at the end thereof: "(3) The court may extend the additional period for up to 25 days if, due to the complexity or scope of the information or documentary material to be evaluated, the Federal Trade Commission or the Assistant Attorney General reasonably requires such additional time to determine whether the proposed acquisition may, if consummated, violate the antitrust laws."

(5) This subsection and the amendments made by this subsection shall become effective 120 days after the date of enactment of this section.

FILING FEE

SEC. 4. The Clayton Act is amended by inserting between section 7A and section 8, the following:

"FILING FEE

SEC. 7B. (a)(1) Notwithstanding the provisions of section 7A, no notification shall be considered filed until the acquiring person filing such notice pays the filing fee required by this section.

"(2) The fee required by paragraph (1) shall be equal to one-fiftieth of 1 percent of the value of the transaction involved in such merger, provided that the Federal Trade Commission may establish rules pursuant to subsection (d) for transactions in which the precise value is not known, but in no event shall the fee exceed $50,000.

"(b) All fees collected pursuant to the provisions of this section shall be evenly divided between the Department of Justice and the Federal Trade Commission and shall be allocated to such agencies for the enforcement of the antitrust laws.".

Mr. THURMOND. Mr. President, I am happy to rise today as a cosponsor of the Antitrust Procedures Improvement Act of 1989. This legislation incorporates amendments, which the Senate passed unanimously in the last Congress, to the Hart-Scott-Rodino Pre-merger Notification Act. It also includes, for the first time, proposals to increase the criminal fines for violations of the Sherman Act, and the imposition of a filing fee in connection with Hart-Scott premerger notification.

The amendments to the Hart-Scott-Rodino Pre-merger Notification Act include closing the "partnership loophole" which has allowed many partnership transactions to escape premerger reporting. Under this legislation, these transactions would have to be reported if any general partner or any partner with a 50-percent or more interest in the partnership meets the "size of person" requirement.

In addition, this bill would also increase the size of person and size of transaction tests which govern whether an entity is required to file a premerger notification. These changes have been proposed to keep pace with inflation and other economic developments which have occurred since the notification requirements were originally enacted. Such changes should reduce the number of required filings and should ease the reviewing burden for both the Federal Trade Commission and the Department of Justice. At the same time, because the significance of a transaction is tied to the size of the parties and the size of the transaction, it is unlikely that these changes will exempt competitively significant mergers from premerger filing and subsequent agency review.

As was the case with the Hart-Scott amendments last Congress, this bill also includes provisions which extend the waiting period for cash tender offers from a total of 25 days—an original 15 and subsequent 10—to a

total of 40 days—an original 20 and an additional 20. These changes allow the reviewing agency a greater time frame within which to screen the merger, but at the same time are consistent with requirements under the Williams Act. Finally, under certain circumstances, the reviewing agency can seek an additional extension of 25 days by application to the court.

As to those provisions which are new to this bill, one involves raising the Sherman Act criminal fines from $1,000,000 to $10,000,000 for corporations, and from $100,000 to $250,000 for individuals. The second would require a filing fee in connection with Hart-Scott premerger notifications. This fee is patterned after similar fees required by the SEC, and would be set at one-fiftieth of 1 percent of the value of the transaction, but in no event more than $50,000. The revenues from these fees would be divided evenly between the FTC and the Department of Justice for antitrust enforcement. In that way, any budget deficits experienced by these agencies could be offset by these revenues.

Mr. President, I believe the proposals contained in this bill are sound, and they deserve our careful consideration, study and support.

By Mr. METZENBAUM:

S. 996. A bill to amend the Clayton Act regarding damages for the United States; to the Committee on the Judiciary.

GOVERNMENT REMEDIES IMPROVEMENT ACT

Mr. METZENBAUM. Mr. President, today I am introducing legislation to provide for treble damages for the United States for violations of the antitrust laws. The proposal amends the Clayton Act to permit the Government to recover treble damages in civil suits arising out of the antitrust laws. Several recent grand jury investigations into price fixing and bid rigging have actually involved procurement fraud against the Government. This shows that fraud against the Government is not just an academic issue—the United States can be victimized by price-fixing and bid-rigging schemes. The penalty for defrauding the Government should be no less than the penalty for committing antitrust crimes against citizens.

I hope my colleagues will see fit to support this measure. I ask unanimous consent that a copy of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 996

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Government Remedies Improvement Act of 1989."

TREBLE DAMAGES FOR THE UNITED STATES

SEC. 2. Section 4A of the Clayton Act (15 U.S.C. 15a), is amended by striking out "actual" and inserting in lieu thereof "threefold the".

By Mr. MITCHELL (for himself and Mr. DASCHLE):

S. 997. A bill to amend title XVIII of the Social Security Act to provide for eligibility for home health services on the basis of a need for occupational therapy; to the Committee on Finance.

OCCUPATIONAL THERAPY HOME HEALTH BENEFITS

Mr. MITCHELL. Mr. President, today I am introducing legislation to expand the Medicare Home Health benefit to include occupational therapy as the fourth skilled service which will qualify beneficiaries for home care.

Under current law, occupational therapy services are available only after a Medicare beneficiary has otherwise qualified for home health care. Occupational therapy services may continue to be provided to a beneficiary after his or her need for qualifying services has ended.

Occupational therapy is medically prescribed treatment concerned with restoring functions impaired by illness or injury so that the individual can regain his or her ability to function independently. Like physical or speech therapy, occupational therapy is a skilled health service which assists patients in making the transition between an institution and self-care in the home.

Occupational therapy is an important part of the home health care provided to many Medicare beneficiaries. It is especially necessary for persons who are victims of strokes, heart attacks, diabetes, multiple sclerosis, or spinal cord injury, who are disabled by severe arthritis, or who have suffered physical injury as a result of a fall or some other accident.

Occupational therapy focuses on increasing the patient's functional level. The application of this service often plays a critical role in ensuring the patient's full recovery, the prevention of further disability, and a successful readjustment to the home and community environment.

The occupational therapist establishes a treatment program designed to increase the patient's level of physical function. The therapist also teaches the patient, and those family members or others who will care for the patient, compensatory techniques which permit the patient to function more independently with feeding, dressing, and personal hygiene.

This legislation was originally part of a bill introduced during the 100th Congress by Senator BRADLEY and myself. Because we did not have a cost estimate on this provision until recently, the occupational therapy provision was not included in the Omnibus Budget Reconciliation Act of 1987 or the Catastrophic Health bill, like most other provisions contained in the original Bradley/Mitchell bill.

The Congressional Budget Office is now completing its cost estimate on this legislation.

I believe that adding occupational therapy as a qualifying home health service is a reasonable and needed improvement which will strengthen the home health benefit under Medicare. I urge my colleagues to join me in support this legislation, and I ask unanimous consent that a copy of this legislation be printed at this point in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 997

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. ELIGIBILITY FOR HOME HEALTH SERVICES ON THE BASIS OF A NEED FOR OCCUPATIONAL THERAPY.

(a) PART A.—Section 1814(a)(2)(C) (42 U.S.C. 1395(a)(2)(C)) is amended by striking "or speech therapy" and all that follows through "therapy;" and inserting in lieu thereof ", occupational, or speech therapy;".

(b) PART B.—Section 1835(a)(2)(A) (42 U.S.C. 1395n(a)(2)(A)) is amended by striking "or speech therapy" and all that follows through "therapy, (ii)" and inserting in lieu thereof ", occupational, or speech therapy, (ii)".

(c) EFFECTIVE DATE.—The amendments made by subsections (a) and (b) shall apply to items and services provided on or after October 1, 1989.

By Mr. PRYOR (for himself, Mr. HEFLIN, Mr. BOREN, Mr. FOWLER, Mr. CONRAD, Mr. DASCHLE, and Mr. FORD):

S. 998. A bill to improve rural medical data and information transmission, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

HEALTH LINK IMPROVEMENTS ACT

● Mr. PRYOR. Mr. President, I joined Senator HARKIN in submitting a concurrent resolution, cosponsored by 15 Senators, that called for the elimination of the inequitable urban/rural Medicare hospital reimbursement differential. Today, I am pleased to introduce the Health Link Improvements Act of 1989, a bill that will provide needed assistance to many of the very rural health care facilities who have been victimized by unfair Federal reimbursement policy.

The primary goal of Health Link is to propel rural health care into the modern area. The bill establishes the Rural Electrification Administration [REA] as the agency responsible for managing funds to provide increased communications between rural and urban health care facilities. The REA would be charged with administering

the construction of data transmission lines, the accompanying computer technology, as well as the support personnel linking less densely populated areas to those that currently have access to quality medical services.

Under this legislation, the REA will allocate funding to establish mobile care clinics, patient transportation services and improved educational opportunities for senior citizens, handicapped, disabled, and other needy people in underserved regions. This will result in more efficient delivery of care and, as a result, may well help prevent hospital closures.

As the rest of the Nation has moved ahead in technology, it has become harder and harder for rural areas to keep pace. Because rural areas are often seen as a high-risk investment, the private sector has been reluctant to invest time, energy and money into these regions. As a result, rural health care facilities have had a difficult time delivering the types of services needed by their community and necessary to keep their facilities financially viable. This, combined with inadequate and inequitable Federal rural health reimbursement policies, has significantly weakened the rural health care delivery system.

Mr. President, almost one-fourth of the United States' population is located in nonmetropolitan areas. Yet, for no other reason than the location of their homes, this 25 percent of our population has been forced to live with economic and Federal policy changes that threaten access to needed health care services. I believe that Health Link has great potential to serve as a crucial foundation for the revitalization of health care in rural America.

It is time that investment into rural development be given top priority. Rural communities and their residents should no longer remain an untapped source. Health Link addresses many of the challenges facing rural health care providers and will pay large dividends in terms of improved access to quality health care and, as a result, lives saved.

Mr. President, this is a modest but important piece of legislation. It sends the message to rural America that we care about their health and well-being, and I urge all of my colleagues to join me in support of it.●

By Mr. HOLLINGS (for himself, Mr. DANFORTH, Mr. INOUYE, and Mr. BRYAN):

S. 999. A bill to amend the Communications Act of 1934 regarding the broadcasting of certain material regarding candidates for Federal elective office, and for other purposes; to the Committee on Commerce, Science, and Transportation.

CLEAN CAMPAIGN ACT

● Mr. HOLLINGS. Mr. President, I am introducing today, along with Senator DANFORTH, Senator INOUYE, and Senator BRYAN, legislation that furthers the intent and improves the effectiveness of the political broadcasting laws. The Clean Campaign Act of 1989 seeks to ensure greater balance and accountability in political campaigns. This legislation is identical to the one I introduced 4 years ago. A hearing was held on that bill, but we believed it required further study before moving forward. I believe that in light of the problems that have arisen in recent political campaigns, this legislation is now ripe for action.

The Clean Campaign Act addresses two specific problems that arise in the use of broadcast stations for political campaigns. The first problem involves the use of broadcast time to attack opponents. While such attacks are not new, with the advent of sophisticated uses of electronic media, such attacks are becoming more and more insidious and are contributing less and less to the debate about candidates' qualifications for office. We have all seen and heard on the broadcast media just about every form of animal and every type of hired performer make incorrect or misleading remarks about a candidate's opponent. What's more, the very nature of the broadcast media makes these attacks difficult, if not impossible, to rebut, especially if they occur late in a campaign. Everyone who has run for office knows that rebuttals take plenty of time and are very expensive.

I know full well that we cannot limit—nor would we want to limit—a candidate's discussion of an opponent's character, record, and other qualifications to hold office. This is a fundamental part of political campaigns. On the other hand, the objective of this activity is to inform the voter so an educated choice can be made. The voter deserves that such a discussion be clear and direct. It should not occur through surrogates who have no real responsibility. It is for these reasons that I am only proposing that if a candidate wants to discuss an opponent in a broadcast advertisement, he do so in person. In this way, candidates can discuss whatever they wish about their opponents, while being more responsible for what they say.

The second problem involves the use of PAC money to air advertisements on broadcast stations. We all have seen how PAC's can seriously damage the balance in a campaign through the expenditure of enormous amounts of money. In effect, a candidate budgets to fight one well-financed opponent but then ends up fighting many.

While the existing political broadcasting laws give a candidate equal opportunities vis-a-vis an opposing candidate, the laws offer far fewer protections when it comes to PAC's—and even these protections will evaporate if the Federal Communications Commission has its way. The current requirements of lowest unit advertising rate or free response time or just the ability to respond promptly do not apply with PAC's. In addition, when a candidate responds to a PAC, he then triggers the equal opportunities provision of the law. In the end, he finds he keeps making one statement for two or more on the other side. How can he hope to compete fairly? To cure this problem, my legislation again takes a straightforward approach, which in no way limits the ability of PAC's to advertise: If a broadcaster airs PAC advertisements, the broadcaster must then give the candidate who is opposed or otherwise not supported free response time within a reasonable period.

In conclusion, the approach taken in this legislation is reasonable and infringes on no person's free speech rights. It will improve the accountability of candidates and the balance in campaigns. In the end, the public will benefit by having the best information possible on which to make an intelligent choice.

Mr. President, I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 999

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Clean Campaign Act of 1989".

SEC. 2. (a) Section 315 of the Communications Act of 1934 (47 U.S.C. 315) is amended—

(1) by redesignating subsections (b), (c), and (d) as subsections (d), (e), and (f), respectively; and

(2) by inserting immediately after subsection (a) the following new subsections:

"(b)(1) If any legally qualified candidate for any Federal elective office (or an authorized committee of any such candidate) who utilizes rights of access and conditions of access under the provision of this Act uses a broadcasting station to refer, directly or indirectly, to another legally qualified candidate for that office, such reference shall be made in person by such legally qualified candidate.

"(2) If any licensee permits a broadcasting station to be used in a manner not in accordance with the requirements of paragraph (1) of this subsection, such licensee shall provide, within a reasonable period of time, to the candidate to whom reference was made the opportunity to use, without charge, the same amount of time on such broadcasting station, during the same period of the day, as was used by the legally qualified candidate (or by an authorized committee of such legally qualified candidate).

"(c)(1) If any licensee permits a person to use a broadcasting station to broadcast ma-

terial which either endorses a legally qualified candidate for any Federal elective office or opposes a legally qualified candidate for that office, such licensee shall, within a reasonable period of time, provide to any legally qualified candidate opposing the candidate endorsed (or to an authorized committee of such legally qualified candidate), or to any legally qualified candidate who was so opposed (or to an authorized committee of such legally qualified candidate), the opportunity to use, without charge, the same amount of time on such broadcasting station, during the same period of the day, as was used by such person.

"(2) For purposes of this subsection, the term 'person' includes an individual, partnership, committee, association, corporation, or any other organization or group of persons, but such term does not include a legally qualified candidate for any Federal elective office or an authorized committee of any such candidate.".

(b) Section 315(a) of the Communications Act of 1934 (47 U.S.C. 315(a)) is amended by striking "section" and inserting in lieu thereof "subsection".

(c) Section 315(e) of the Communications Act of 1934, as so redesignated by subsection (a) of this section, is amended—

(1) by redesignating paragraphs (1) and (2) as paragraphs (2) and (3), respectively; and

(2) by inserting immediately after "section—" the following new paragraph:

"(1) the term 'authorized committee' means, with respect to any candidate for nomination for election, or election, to any Federal elective office, any committee, club, association, or other group of persons which receives contributions or makes expenditures during a calendar year in an aggregate amount exceeding $1,000 and which is authorized by such candidate to accept contributions or make expenditures on behalf of such candidate to further the nomination or election of such candidate;".

SEC. 3. If any provision of this Act or the application of it to any person or circumstance is held invalid, the remainder of this Act and the application of the provision to any other person or circumstance shall not be affected by such invalidation.●

● Mr. DANFORTH. Mr. President, today I join my colleague Senator HOLLINGS in introducing the Clean Campaign Act of 1989. This bill does two things to restore balance and accountability in political campaign advertising.

First, the bill requires Federal candidates who refer to their opponents in broadcast ads to make those references in person. If an ad is broadcast in which a candidate refers to his opponent, but does not do so in person, his opponent receives free response time. This provision doesn't prevent negative advertising, but it is designed to increase accountability. If a candidate wishes to sling mud at his opponent, the public should be able to see the candidate's dirty hands.

Second, this legislation addresses independent political ads placed by political action committees or other third parties. The bill provides that if a third party runs an ad opposing a Federal candidate, then that candidate will get free response time. If a third party airs an ad endorsing a Federal candidate, then the opponents of that candidate get free response time. This bill does not eliminate or restrict ads by third parties. But it does attempt to restore balance into a campaign in which independent ads are aired. This provision will give candidates some ability to respond to messages that otherwise might be unanswerable.

The goal of this legislation, Mr. President, is to address perhaps the most troubling aspect of current American politics—the increasing negativism of political campaigns. We have always had negative campaigns. But the use of the electronic media, and the development of the independent political ad have exacerbated the problem. This bill does not make it illegal to run a negative campaign. But it does allow the public to hold accountable the candidate who runs such a campaign.

Mr. President, this bill, which amends the Communications Act of 1934, is the same bill that I introduced with Senator HOLLINGS in 1985. We held a hearing on that bill 4 years ago, but did not move the bill forward. Considering the increasingly negative tone of recent campaigns, I think the time is right to move this legislation. After all, Mr. President, what is more important than improving our political process?●

By Mr. McCLURE (for himself, Mr. CONRAD, Mr. DASCHLE, and Mr. GORTON):

S. 1000. A bill to amend the Agricultural Act of 1949 to require the Secretary of Agriculture to exclude the malting barley price from the national weighted market price for barley in determining the payment rate used to calculate deficiency payments for the 1989 and 1990 crops of barley, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

DEFICIENCY PAYMENTS FOR 1989 AND 1990 CROPS OF BARLEY

● Mr. McCLURE. Mr. President, I rise today to introduce a bill which will provide some equity to the barley producers of this Nation.

In the feed grain provision of the 1985 farm bill, the target price for feed grains, sorghum, barley, and oats were to be set at a comparative level to the target price of corn in a manner that yields a value that is reasonable and fair. The USDA decided to set target prices between the feed grains based on their comparative feed energy value to corn. In short, the barley target price was based on its relative feed value to corn with no consideration given to the barley that is malted for human consumption and sells at a premium price.

However, when USDA calculates the barley deficiency payment, they include both the feed barley price and the malt barley price. In order to be reasonable and fair, it is important that the malt barley price be dropped from the barley deficiency payment calculation because malt barley is not included when calculating the target price. If target prices are based on relative feed value, then it only makes sense that the deficiency payment calculation should be based on feed prices.

In December 1988, the USDA announced that the 5-month national average price of barley—June through October—was $2.83 per bushel, well above the target price. USDA then announced that barley growers would have to repay all of the 30-cent advanced deficiency payment given them in the spring of 1988. This places barley growers at a distinct disadvantage—one not faced by corn growers because they are the base by which all other feed grains are set. Barley growers feel that it is unfair to include malting barley in the calculation of the target price because the target price was originally based on barley's relative feed value in relation to corn. Because, malting barley is not a feed, it should not be included when determining the barley deficiency payment.

Only about 30 percent of the barley produced in the United States is used in the malt industry. Almost 70 percent of the barley produced is marketed as feed barley. The USDA is actually punishing the majority of the barley producers by including the malt barley price in the deficiency payment calculation.

In an ideal world there should be a separate farm program for feed barley and malt barley. In reality, separating the two classes of barley would be difficult and costly to administer. The fact is, all barley is feed until someone buys it for malt. There is no method of stopping rejected malt barley production from entering the feed barley channels. Trying to administer a program which dropped or separated feed barley from malt barley would be a nightmare to administer and would also be very costly. That is why it makes better sense to simply drop the malt barley price from the barley deficiency payment calculation, especially when it is not considered in setting the target price in the first place.

Some suggest that the barley growers will be making more money if the malting barley price is deleted from the calculation. In fact, malting barley varieties are generally lower yielding and need a higher degree of management thus is more costly to grow. In addition, malt barley growers face a higher risk than a feed barley grower. Thus it is doubtful that, in the long run, barley growers will be making more money if this change is made. The majority of those producers raising malt barley varieties sell their barley as feed. Since only about 30

percent of the barley produced in the United States is used in the malt industry the USDA is penalizing 70 percent of the growers by including malt barley prices in the barley deficiency payment. The truth is that the majority of them will never see a malt barley premium.

Barley growers are being treated unfairly. The current formula used is inconsistent and unfair. Malt barley is not being included during the target price determination. Therefore, it should not be included when the USDA calculates the barley deficiency payments. If the value of malt barley and the total value of feed barley were included in the target price formula, the barley target price would be above or equal to corn. If the target price were higher, barley growers would not have to repay the advanced deficiency payment. Barley growers want only to be treated as they should be under the farm bill, with fairness in relation to all other feed grains. This bill will provide fairness. I hope that my colleagues will join me in passing this measure this year.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1000

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. DEFICIENCY PAYMENTS FOR 1989 AND 1990 CROPS OF BARLEY.

Effective only for each of the 1989 and 1990 crops of barley, section 105C(c)(1)(F) of the Agricultural Act of 1949 (7 U.S.C. 1444e(c)(1)(F)) is amended by adding at the end thereof the following new sentence: "The payment rate for each of the 1989 and 1990 crops of barley shall be based on the national weighted average price received by producers during the first 5 months of the marketing year for barley (other than malting barley), as determined by the Secretary.".●

By Mr. GORE:

S. 1001. A bill to establish policies and procedures necessary to develop, as a domestically based industry in the United States, a high definition television enterprise in the United States, together with ancillary products and services; to the Committee on Commerce, Science, and Transportation.

DEVELOPMENT OF U.S. HIGH DEFINITION TELEVISION INDUSTRY

Mr. GORE. Mr. President, by every estimate, HDTV stands to be the next wave in consumer electronics. Even this understates its more fundamental importance. HDTV is itself a potentially huge market for another product; semiconductors. Well before the market for HDTV is fully developed, HDTV production will consume more semiconductors than the U.S. personal computer industry. Indeed, because HDTV's essentially are computers, it is likely that both product lines will begin to fuse.

If the United States does not secure a large portion of the HDTV market, it will forgo the opportunity to produce electronic components in numbers high enough to provide economies of scale. Without economies of scale, neither price nor qualitative competition is possible in the electronics industry. Therefore, failure to seize this chance to reenter consumer electronics means that in due course the United States will lose what is left of the semiconductor industry. Thereafter, the chances increase that we will also lose leadership in the computer industry, much of which is already highly dependent on components imported from foreign competitors.

We have only one purely U.S. firm still manufacturing television sets. To speak of capturing a significant share of the market in HDTV's is, therefore, to speak of reconstituting an industry. Left to market forces, that is impossible. The investment costs are too high, the risks too great, and the U.S. manufacturing base too thinned out. But with the Federal Government as prime mover, operating in league with American industry, it might be done.

It is apparent to this Senator that the United States cannot allow HDTV to slip by; that while private industry is key, the Federal Government has to provide at least an initial impulse; but that it is not certain government will step up to this challenge unless encouraged by Congress.

At any rate, in order to encourage this process, I have today submitted a bill designed to assure that the U.S. Government does at least think through in detail what would be needed if an HDTV industry is to be established in the United States. This bill does not seek to move large amounts of money around. It does not attempt to define policy. It merely directs that by a date certain, both the President and Congress shall have received a detailed breakdown of everything which must be done.

Recently, the American Electronics Association released its concept of such a plan. Now, we need an equally detailed response from the Federal Government. Whether we subsequently carry out any such grand plan then becomes a matter of political choice. But first we must have some idea of how to proceed, in what stages, with what kinds of support from the Government, with what division of tasks within the Government, and with what levels of cooperation in industry.

I hope that the bill I have introduced will induce the U.S. Government to take the first and most necessary step: to evaluate our situation, and to formulate a strategy.

Mr. President, I ask unanimous consent that the text of the bill and a summary of its provisions be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 1001

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. (a) On or before the expiration of the 90-day period following the date of the enactment into law of this, the Secretary of Commerce shall submit to the President of the United States and the Congress a report concerning the establishment, as a domestically based industry within the United States, of a high definition television enterprise or enterprises, together with ancillary products and services.

(b) The report required under subsection (a) shall identify the requirements for establishing in the United States of a viable industry for the production of high definition television, the components of such television, production and transmission equipment relating to television programming, and the development and manufacture of derivative and hybrid products relating to the computer and telecommunications industries.

(c) The report required under subsection (a) shall—

(1) be comprehensive, including not only issues such as the encouragement of technologies, but issues pertaining to licensing, regulations, international standards, international trade, and specialized financing problems; and

(2) separately detail the recommendations of the Secretary of Commerce for the value of the Federal Government in the development of such enterprise, including missions for individual elements of the executive branch, timelines and methods for attaining full coordination, requirements for legislative action necessary to the development of such enterprise, and anticipated funding needs.

(d) For purposes of this Act, an enterprise shall mean—

(1) an entity—

(A) formed in the United States;

(B) operating its productive facilities in the United States; and

(C) owned in its entirety by citizens of the United States; or

(2) a foreign owned entity if such entity—

(A) establishes and operates research facilities in the United States for the purpose of developing and producing high definition television in the United States;

(B) all personnel of such entity engaged in such research in connection with high definition television in the United States are citizens of the United States;

(C) the research product of such entity is available for licensing without bias to any public and private entity or agency within the United States, and on an equal footing with any foreign entity or agency;

(D) establishes and operates production facilities in the United States for the purpose of manufacturing finished components, components and subcomponents relating to high definition television, and its ancillary equipment and its spinoff products; and

(E) all personnel of such entity engaged in the establishment and operation of such production facility are citizens of the United States.

SEC. 2. There is authorized to be appropriated such sum as may be necessary to carry out this Act.

SUMMARY OF BILL

The legislation gives the Secretary of Commerce 90-days from its enactment to submit to Congress and the President a detailed report on the establishment of a HDTV industry. That report would:

Identify the requirements of such an industry, the components of such television, production, and transmission equipment related to HDTV programming, and the development and manufacture of products also related to the computer and telecommunications industries;

Include not only issues covering technological incentives, but also issues related to licensing, regulations, international standards, international trade, and specialized financing problems; and

Separately detail the recommendations of the Secretary of Commerce on the value of federal action, including the responsibilities of different Administrative agencies, timelines and plans for coordination, requirements for legislative action and, for funding.

"There's only one U.S. company still manufacturing television sets. When we talk about capturing a significant share of the HDTV market, we're talking about rebuilding an industry. Left to market forces, that would be impossible. The investment costs are too high, the risks are too great, and the U.S. manufacturing base too thin. But if industry and government work together, it can be done."

"Our first major step must be a detailed analysis of how to promote a U.S. HDTV industry. We must have some idea of how to proceed, in what stages, with what kinds of support from the government, with what division of tasks within the government and, with what levels of cooperation with industry."

By Mr. DURENBERGER (for himself, Mr. LUGAR, and Mr. COATS):

S. 1002. A bill to amend the Solid Waste Disposal Act; to the Committee on Environment and Public Works.

SOLID WASTE DISPOSAL ACT AMENDMENTS

● Mr. DURENBERGER. Mr. President, I am today introducing legislation to amend the Resource Conservation and Recovery Act [RCRA] with respect to the cleanup of hazardous wastes at steel and aluminum manufacturing facilities across the country. This legislation has been developed in consultation with representatives of the steel industry. I am pleased that Senator LUGAR and Senator COATS have agreed to join me on this bill.

In 1984, the Congress amended RCRA adding two new requirements for the cleanup of facilities releasing hazardous waste into the environment. One provision mandated the cleanup of all existing units at any facility before any new unit could receive a permit for waste treatment or disposal. The other provision gave EPA the authority to order cleanup at units which are known to be releasing wastes. EPA has been working diligently over the past 4 years to develop regulations that will implement these two legislative mandates. It is expected that the so-called corrective action regulations may soon be promulgated, and when they are, many industrial facilities which have disposed of waste onsite will be facing a big cleanup job.

This task will be especially difficult for the steel industry where many plants have been operating—and disposing of waste—on the same site for decades. Some of the larger steel producing facilities may have dozens of separate units on a single piece of property. The way RCRA works, each of those units must be cleaned up to the boundary of the unit, before any new waste management operation at the site can receive a permit.

Some companies in the industry commissioned a study of the potential cost of this cleanup task. The study, which was based on a thorough analysis of waste disposal practices for a hypothetical integrated steel making plant located in a river valley and disposing of waste onsite since the early part of this century, estimates the average costs of cleanup under RCRA as currently written at $40 million per facility—$34 million of that expense is capital costs. Most of those costs are for ground water cleanup, an extraordinarily expensive undertaking. It goes without saying that the American steel industry would find it very difficult to finance that kind of cleanup expense given the economic circumstances which it faces.

Environmental managers for some of the companies looking at these costs asked if there might be a more rational way to approach the problem—to provide adequate environmental safeguards, but take into account the nature of the industry and the way it has developed. And they have recommended an approach which is somewhat different than current law. Their recommendation is that we move the point of compliance for environmental standards from the boundary of each individual solid waste management unit to the property boundary for the whole facility. Let me say again that most large plants will contain many existing units. And RCRA requires that they all be cleaned up right to the edge of the unit, even if that means cleanup in the middle of a large operating steel plant.

The alternative is compliance at the boundary of the entire facility. This alternative would reduce average cleanup costs to approximately $8 million but would continue to afford protection for health and environmental resources anywhere outside the plant's fenceline. To assure that no contaminants crossed the boundary at levels that would be hazardous, each facility would have to conduct ground water monitoring within the plant area and at a distance from the boundary sufficient to assure that cleanup measures could be implemented before any contaminated plume of ground water affected environmental quality outside the plant. The monitoring would continue so long as the plant was in operation. When operations ceased, plant owners would be required to provide financial assurances sufficient to operate the monitoring equipment and any remedies in effect for a period of 30 years. The assurances would also include a contingency for any corrective action that might become necessary after plant closure.

Mr. President, I would ask that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1002

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 3004(u) of the Solid Waste Disposal Act is amended by inserting "(1)" after "(u)" and by adding at the end thereof the following new paragraph:

"(2) For the purposes of this subsection and section 3008(h), corrective action with respect to ground water at any existing solid waste management unit at any facility that is in Standard Industrial Classification Code 331 and 3334 shall be construed to mean—

"(A) the selection and implementation of corrective measures that assure that ground water protection standards are met at the facility property boundary during the period such facility remains in operation and the additional period provided under subparagraph (C);

"(B) the implementation of ground water monitoring at the facility property boundary and at appropriate points within the facility taking into account the nature of the solid waste management units, any releases, and the hydrogeologic setting, so that, to the extent practicable and necessary to ensure that ground water protection standards are met at the facility property boundary, corrective measures can be taken in advance of hazardous constituents reaching the facility property boundary; and

"(C) the inclusion in the schedule of compliance contained in a permit or order of a requirement that upon cessation of industrial operations at the facility in which the solid waste management units are located, if all hazardous waste and hazardous constituents in concentrations in excess of media protection standards are not removed from such facility, the owner or operator of such facility shall establish a fund or provide other assurance of financial responsibility in accordance with subsection (t) in an amount adequate to assure monitoring and the operation and maintenance of corrective measures under this paragraph for a period of thirty years after such cessation of operations, including a reasonable contingency for additional corrective measures that may prove necessary during such period. For the purpose of this subparagraph, the sale or other transfer of the facility to another entity that intends to continue industrial operations at such facility and accepts the obligation to continue corrective measures under this paragraph shall not constitute a cessation of operations.".●

By Mr. CRANSTON (by request):

S. 1003. A bill to amend title 10 and title 38, United States Code, to make certain improvements in the educational assistance programs for veterans and eligible persons, and for other purposes; to the Committee on Veterans' Affairs.

VETERANS' EDUCATIONAL ASSISTANCE IMPROVEMENT ACT

Mr. CRANSTON. Mr. President, as chairman of the Veterans' Affairs Committee, I have today introduced, by request, S. 1003, the proposed Veterans' Educational Assistance Improvements Act of 1989. The Secretary of Veterans' Affairs submitted this legislation by letter dated May 10, 1989, to the President of the Senate.

My introduction of this measure is in keeping with the policy which I have adopted of generally introducing—so that there will be specific bills to which my colleagues and others may direct their attention and comments—all administration-proposed draft legislation referred to the Veterans' Affairs Committee. Thus, I reserve the right to support or oppose the provisions of, as well as any amendment to, this legislation.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD at this point, together with the May 10, 1989, transmittal letter and enclosed section-by-section analysis of the proposed bill.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 1003

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE; REFERENCES TO TITLE 38, UNITED STATES CODE; TABLE OF CONTENTS.

(a) SHORT TITLE.—This Act may be cited as the "Veterans' Educational Assistance Improvements Act of 1989."

(b) REFERENCES TO TITLE 38.—Except as otherwise specifically provided, whenever in the Act an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of title 38, United States Code.

(c) TABLE OF CONTENTS.—The table of contents of this Act is as follows:

TABLE OF CONTENTS

Sec. 1. Short title; references to title 38, United States Code; table of contents.
TITLE I—EDUCATIONAL ASSISTANCE AND VOCATIONAL REHABILITATION PROGRAM IMPROVEMENTS
Sec. 101. Vocational Training for Certain Pension Recipients.
Sec. 102. Accepting Alternate Secondary School Credentials For Montgomery GI Bill Eligibility.
Sec. 103. Establishment of Date by Which Certain Individuals Must Elect not to Participate in the Montgomery GI Bill.
Sec. 104. Provision for Permanent Program of Independent Living Services and Assistance.
Sec. 105. Deletion of Provisions for Advance Payment of the Work-Study Allowance.
Sec. 106. Provision for Work-Study Benefits for Service-Disabled Veterans.
TITLE II—ADMINISTRATIVE AND MISCELLANEOUS PROVISIONS
Sec. 201. Elimination of Rehabilitation Subsistence Allowance Advance Payment.
Sec. 202. Accepting School Certification for Renewal of Educational Benefits After Unsatisfactory Progress.
Sec. 203. Clock-Hour Measurement of Certain Unit Courses or Subjects Creditable Toward a Standard College Degree.
Sec. 204. Technical and Clerical Amendments.

TITLE I—EDUCATIONAL ASSISTANCE AND VOCATIONAL REHABILITATION PROGRAM IMPROVEMENTS

SEC. 101. VOCATIONAL TRAINING FOR CERTAIN PENSION RECIPIENTS.

(a) Elimination of Mandatory Evaluation Requirement.—

(1) section 524(a) is amended—

(A) by striking out paragraphs (a) (1) and (4) and redesignating paragraphs (2) and (3) as paragraphs (a) (1) and (2), respectively;

(B) in paragraph (a)(1) (as so redesignated) by striking out "subject to paragraph (3)" and all that follows through "applies" and inserting in lieu thereof "subject to paragraph (2) of this subsection, if a veteran who is awarded pension on or before January 31, 1992, applies"; and

(2) Section 524(b)(4) is amended by striking out "following" and all that follows through the period and inserting in lieu thereof "following the award of pension to the veteran as described in subsection (a)(1) of this section."

(b) Trial Work Period—Section 524 is amended—

(1) by redesignating subsections (c) and (d) as subsections (d) and (e), respectively; and

(2) by inserting after subsection (b) the following new subsection:

"(c) The pension being paid to a veteran who, while participating in a vocational training program under subsection (b) of this section, secures employment in the objective of the veteran's individualized written rehabilitation plan, or in a related field which requires reasonably developed skills and use of some or all of the training or services furnished the veteran under such plan, shall not be terminated by reason of either the veteran's capacity to engage in such employment or the income received from such employment (but only if veteran's annual income from the other sources would, taken alone, not result in the termination of the veteran's pension) unless the veteran maintains that employment for 12 consectutive months.".

SEC. 102. ACCEPTING ALTERNATE SECONDARY SCHOOL CREDENTIALS FOR MONTGOMERY GI BILL ELIGIBILITY.

(1) Section 1411(a)(2) is amended by striking out "(or an equivalency certificate)" and inserting in lieu thereof "(or the equivalent as determined by the Secretary concerned, pursuant to regulations prescribed by the Secretary)".

(2) Section 1412(a)(2) is amended by striking out "(or an equivalency certificate)" and inserting in lieu thereof "(or the equivalent as determined by the Secretary concerned, pursuant to regulations prescribed by the Secretary)".

(3) Section 2132(a)(2) of title 10, United States Code, is amended by striking out "(or an equivalency certificate)" and inserting in lieu thereof "(or the equivalent as determined by the Secretary concerned, pursuant to regulations prescribed by the Secretary)".

SEC. 103. ESTABLISHMENT OF DATE BY WHICH CERTAIN INDIVIDUALS MUST ELECT NOT TO PARTICIPATE IN THE MONTGOMERY GI BILL.

(a) Section 1411(c)(1) is amended by striking out "at the time" and inserting in lieu thereof "within 14 days after the date".

(b) Section 1412(d)(1) is amended by striking out "at the time" and inserting in lieu thereof "within 14 days after the date".

SEC. 104. PROVISION FOR PERMANENT PROGRAM OF INDEPENDENT LIVING SERVICES AND ASSISTANCE.

Section 1520 is amended—

(1) by striking out subsection (b);

(2) in subsection (a)—

(A) in paragraph (1)—

(i) by striking out "(1) During fiscal years 1982 through 1989, the" and inserting in lieu thereof "The";

(ii) by striking out "paragraph (7) of this subsection" and inserting in lieu thereof "subsection (f) of this section"; and

(iii) by striking out "paragraph (2) of this subsection" and inserting in lieu thereof "subsection (b) of this section";

(B) in paragraph (2), by striking out "and who is selected" and all that follows through "subsection";

(C) in paragraph (3), by striking out "paragraph (2) of this subsection" and inserting in lieu thereof "subsection (b) of this section";

(D) in paragraph (6) by striking out "of the fiscal years 1982 through 1989" and inserting in lieu thereof "fiscal year";

(E) in paragraph (7) by striking out "paragraph" and inserting in lieu thereof "subsection"; and

(F) by striking out paragraph (5) and redesignating paragraphs (2), (3), (4), (6) and (7) as subsections (b), (c), (d), (e) and (f), respectively.

SEC. 105. DELETION OF PROVISIONS FOR ADVANCED PAYMENT OF THE WORK-STUDY ALLOWANCE.

Section 1685(a) is amended by striking out the last sentence thereof.

SEC. 106. PROVISION FOR WORK-STUDY BENEFITS FOR SERVICE-DISABLED VETERANS.

(a) IN GENERAL.—Section 1685(b) is amended—

(1) in the first sentence by striking out "are pursuing" and all that follows through the period and inserting in lieu thereof "(1) are pursuing full-time programs of education or training under chapter 30, 32, or 34 of this title, (2) are pursuing programs of rehabilitation on at least a half-time basis under chapter 31 of this title (excluding programs where pursuit is based on limited work tolerance), or (3) have disabilities rated at 50 percent or more for purposes of chapter 11 of this title and are pursuing programs of education or training on at least a half-time basis under chapter 34 of this title."; and

(2) in the last sentence by striking out "full-time student" and inserting in lieu thereof "veteran-student as described in clause (1), (2), or (3) of this subsection".

(b) CLERICAL AMENDMENT.—Section 1685 is amended by striking out "per centum" each place it appears and inserting in lieu thereof "percent".

TITLE II—Administrative and Miscellaneous Provisions.

SEC. 201. ELIMINATION OF REHABILITATION SUBSISTENCE ALLOWANCE ADVANCE PAYMENT.

(a) IN GENERAL.—Section 1508 is amended by striking out subsection (i) in its entirety.

(b) Conforming Amendments.—Section 1780 is amended by—

(1) striking out in subsection (d)(1) "or subsistence";

(2) striking out in subsection (d)(2) "or subsistence allowance, as appropriate,"; and

(3) striking out in subsection (e) "or subsistence".

SEC. 202. ACCEPTING SCHOOL CERTIFICATION FOR RENEWAL OF EDUCATIONAL BENEFITS AFTER UNSATISFACTORY PROGRESS.

Section 1674 is amended by striking out clauses (1) and (2) and inserting in lieu thereof the following:

"(1) the veteran will be resuming enrollment at the same educational institution in the same program of education and the educational institution has both approved such veteran's reenrollment and certified it to the Department of Veterans Affairs; or

"(2) in the case of a proposed change of either educational institution or program of education by the veteran—

"(A) the cause of the unsatisfactory conduct or progress has been removed;

"(B) the program proposed to be pursued is suitable to the veteran's apptitudes, interests, and abilities; and

"(C) if a proposed change of program is involved, the change meets the requirements for approval under section 1791 of this title.".

SEC. 203. CLOCK-HOUR MEASUREMENT OF CERTAIN UNIT COURSES OR SUBJECTS CREDITABLE TOWARD A STANDARD COLLEGE DEGREE.

Section 1788(e) is amended to read as follows:

"(e)(1) For the purpose of measuring clock hours of attendance or net of instruction under clause (1) or (2), respectively, of subsection (a) of this section for a course—

(A) which is offered by an institution of higher learning, and

(B) for which the institution requires one or more unit courses or subjects for which credit is granted toward a standard college degree pursued in residence on a standard quarter- or semester-hour basis, the number of credit hours (semester or quarter hours) represented by such unit courses or subjects shall, during the semester, quarter, or other applicable portion of the academic year when pursued, be converted to equivalent clock hours, determined as prescribed in paragraph (2) of this subsection. Such equivalent clock hours then shall be combined with actual weekly clock hours of training concurrently pursued, if any, to determine the total clock hours of enrollment.

(2) For the purpose of determining the clock-hour equivalency described in paragraph (1) of this subsection, the total number of credit hours being pursued will be multipled by the factor resulting from dividing the number of clock hours which constitute full time under clause (1) or (2) of subsection (a) of this section, as appropriate, by the number of semester hours (or the equivalent thereof) which, under clause (4) of such subsection, constitutes a full-time institutional undergraduate course at such institution.".

SEC. 204. TECHNICAL AND CLERICAL AMENDMENTS.

Title 38 is amended as follows:

(1) Section 1434 is amended—

(A) in subsection (a)(1) by inserting "1780(f)," after "1780(c),";

(B) redesignating subsections (c) and (d) as subsections (d) and (e), respectively; and

(C) by inserting after subsection (b) the following new subsection:

"(c) Payment of educational assistance allowance in the case of an eligible individual pursuing a program of education under this chapter on less than a half-time basis shall be made in a lump-sum amount for the entire quarter, semester, or term not later than the last day of the month immediately following the month in which certification is received from the educational institution that such individual has enrolled in and is pursuing a program at such institution. Such lump-sum payment shall be computed at the rate determined under section 1432(b) of this title.".

(2) Section 1633 is amended by adding at the end the following new subsection:

"(d) For any month in which an individual fails to complete 120 hours of training, the entitlement otherwise chargeable under subsection (c) of this section shall be reduced in the same proportion as the monthly benefit payment payable is reduced under subsection (b) of this section.".

(3) Section 1790 is amended—

(A) in subsection (a)(2) by striking out "and prepayment"; and

(B) in subsection (b)(3)(A) by inserting "30," before "32".

SECTION-BY-SECTION ANALYSIS

SHORT TITLE; REFERENCES TO TITLE 38, UNITED STATES CODE

[NOTE.—The terminology in the draft bill reflects the conversion of the Veterans Administration to the Department of Veterans Affairs (VA) pursuant to Public Law 100-527. This bill assumes that appropriate technical and conforming amendments to title 38, United States Code, mandated by section 14 of Public Law 100-527 have been made.]

SECTION 1

Subsection (a) provides that the draft bill may be cited as the "Veterans' Educational Assistance Improvements Act of 1989."

Subsection (b) provides that, unless otherwise specified, whenever in the draft bill an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of title 38, United States Code.

Subsection (c) sets forth the table of contents for the draft bill.

TITLE I—EDUCATIONAL ASSISTANCE PROGRAM IMPROVEMENTS

SECTION 101

This amendment would make two changes to the temporary program of vocational training for certain new pension recipients established under 38 U.S.C. § 524. First, it would make participation in the program completely voluntary by eliminating the requirement that veterans under age 50 who are awarded pension during the program period must participate in an evaluation to determine whether achievement of a vocational goal is reasonably feasible. Instead, any veteran awarded pension on or before January 31, 1992, the end of the program period, who desires to participate would simply apply for vocational training under the program. Second, the amendment would provide a trial work period of 12 consecutive months during which the participant's pension would not be terminated either by reason of his or her having the capacity to engage in suitable employment or by reason of the income earned therefrom.

These changes are designed to improve both program participation and results. Our experience in providing program evaluations has indicated that veterans over 50 who could participate in the program on a voluntary basis did so to a substantially greater degree than veterans under age 50 awarded pension during the program period who were required to participate in an evaluation. The cost of evaluations is by far the largest single cost in administering this program. Reduction of this expense by eliminating the mandatory requirement for evaluation in the under 50 group awarded pension during the program period will improve program effectiveness without in any way impairing veterans' access to services.

The addition of a trial work period would provide an additional incentive for veterans to elect to train and secure employment under this program. The veteran's pension would not be reduced unless he or she is employed for 12 consecutive months in an occupation consistent with the objective of the veteran's individualized written rehabilitation plan. This change would provide the veteran with a reasonable certainty that pension would not be reduced until his or her ability to maintain employment has been established.

SECTION 102

This section would amend the Montgomery GI Bill secondary school completion requirements (sections 1411(a)(2) and 1412(a)(2) of title 38 and section 2132(a)(2) of title 10) by eliminating the reference to an equivalency certificate. Instead, an individual would have to have certain alternate school credentials accepted by the Armed Forces, pursuant to regulations promulgated by the Secretary of the military department concerned.

The current law provides that to be considered eligible for the Montgomery GI Bill, an individual must have a secondary school diploma or an equivalency certificate. We believe that the secondary school requirement was intended to assist the military in obtaining high caliber personnel and, therefore, the requirement should conform to the standards acceptable to the Armed Forces.

SECTION 103

In order to establish a uniform period for all of the Armed Forces and to clarify a somewhat ambiguous provision in the current law, this section would amend sections 1411(c)(1) and 1412(d)(1) to authorize a period of 2 weeks after the date of the individual's initial entry on active duty within which he or she may elect not to participate in the chapter 30 Montgomery GI Bill program.

Under the provisions of chapter 30, an individual first entering the Armed Forces or first entering active duty on or after July 1, 1985, automatically becomes a participant unless he or she makes an affirmative election not to participate. However, these provisions do not contain clear statements as to how much time an individual actually has after entry on active duty to make the requisite election. This amendment supplies the specific time period for the election.

SECTION 104

This provision would amend section 1520 to provide that the program of independent living services for service-disabled veterans become a permanent part of chapter 31. Enactment of this proposal would enable se-

verely-disabled veterans for whom vocational rehabilitation is not currently feasible to live more independent lives.

Currently, the law provides for a program of independent living services only through September 30, 1989, and permits initiation of such programs by no more than 500 veterans in each fiscal year to that date. This amendment removes the September 30, 1989, termination date, but retains the 500 veteran cap on program initiations per fiscal year.

SECTION 105

This section would amend section 1685 of title 38, United States Code, by eliminating a provision in subsection (a) which requires the advance payment of a portion of the work-study allowance payable to an individual participating in the veteran-student services program authorized under that section.

Under current law, in return for a veteran's promise to perform a specified number of hours of work under a work-study agreement, an amount equal to 40 percent of the total payable under the agreement is paid to the veteran-student prior to the performance of any services. Remaining amounts become payable on an incremental basis once the individual has completed performance of the number of hours of work which formed the basis for the advance payment.

Overpayments in the work-study program totaled $543,291 during Fiscal Year 1987 creating liability for some 2,582 new debtors. In Fiscal Year 1988 overpayments equaled $447,785 with 2,170 new debtors. In many of these cases, the debtor dropped out of school so that administrative collection by offset is not feasible. Moreover, since the average work-study overpayment is relatively small, recovery through enforced collection generally is not cost-effective.

Enactment of this proposal would virtually eliminate accounts receivable in this program and would result in limited administrative cost savings for the Department; i.e., less than $100,000 in any fiscal year.

SECTION 106

This proposal would enable service-disabled veterans to be eligible for work-study benefits if they are pursuing training or attending school at a half-time or higher rate under chapter 31, or chapter 34 if the veteran's service-connected disability is rated at 50 percent or more disabling. The amendment would not apply to veterans under chapter 31 who have been determined to have limited work tolerance. These veterans are expected to pursue training to the extent their conditions permit. Thus, payment of subsistence allowance at the full-time rate recognizes that they are, in effect, pursuing a rehabilitation program on what is full time for them and providing work-study benefits in these cases would contradict the basis for payment of full-time subsistence allowance.

Currently, 38 U.S.C. §1685(b) provides work-study eligibility for veteran-students who are pursuing only full-time programs of education or training under chapter 30, 31, 32, or 34 of this title. However, veterans frequently pursue training and education programs on less than a full-time basis because they must work part time to meet family responsibilities. The employment which is secured sometimes results in extremely difficult schedules which the disabled veteran, in particular, may find difficult to maintain. Amending the law to allow certain service-disabled veterans in less than full-time programs to use work-study benefits would provide an additional resource in developing a program which such veterans could successfully pursue.

TITLE II—ADMINISTRATIVE PROVISIONS

SECTION 201

This section would amend provisions of sections 1508 and 1780 of title 38 to eliminate the Secretary's authority to make advance payments of subsistence allowances under chapter 31.

Under current law, certain veterans who are eligible to receive educational assistance allowances under various VA programs, or rehabilitation subsistence allowances under chapter 31 of title 38, United States Code, may, upon request, be provided an advance payment equal to as much as 2 months' educational assistance allowance or subsistence allowance, respectively, prior to actual entry into a program of education or vocational rehabilitation. These advance payments are intended to assist veterans in paying a portion of tuition and fees which many schools require prior to the commencement of training and to meet living expenses during initial periods of training.

In view of the fact that the VA pays all of a chapter 31 participant's training costs, advance payment of subsistence allowance is not warranted. In addition, since chapter 31 participants are eligible to receive advances from the Revolving Fund under section 1512 of title 38, there is little need for the current statutory authorization for advance payments.

SECTION 202

The Secretary is permitted, under 38 U.S.C. §1674, to resume payment of educational assistance allowance to an otherwise eligible veteran, following the termination of such allowance because of his or her unsatisfactory conduct or progress, if the Secretary finds that the cause of the problem has been removed and the program of education is suitable to the veteran's aptitudes, interests, and abilities.

This amendment would permit the VA to accept a school certification of reenrollment as showing that the cause of the veteran's unsatisfactory conduct or progress is removed and the program is suitable. The proposal's application would be limited to resumption of the same program at the same educational institution which reported the unsatisfactory progress.

Our experience has shown the Department's development of evidence for purposes of the required determination seldom provides any cogent information which would support a continued denial of benefits. Moreover, the development requirement adds substantially to the time it takes to process these claims to award benefits.

SECTION 203

This amendment would replace the current text of section 1788(e) with provisions for measuring such course enrollment by converting the credit hours being pursued to equivalent clock hours combining this number with the actual number of clock hours concurrently pursued, if any, to determine training time under section 1788(a)(1) or (2). This method, unlike the existing complex procedures of section 1788(e) which necessitate creation of an artificial measurement scale in each case, simply converts credit hours to equivalent clock hours, enabling measurement in the same unit expressed in section 1788(a)(1) or (2). Moreover, the Department has found that measurement under current law requires a far greater number of calculations than would be necessary under this amendment. Thus, the proposal would greatly simplify such measurement determinations and yield more readily understandable and consistent results.

Currently, section 1788(e) sets forth a method for determining full-time pursuit of a course not leading to a standard college degree which is offered by an institution of higher learning and for which the institution requires one or more unit courses of subjects creditable toward a standard college degree. This method provides for reducing the number of clock hours otherwise required for full-time study, under section 1788(a)(1) or (2), by the percentage which the number of credit hours (represented by such unit courses of subjects) being pursued is of the number of credits required for full time under section 1788(a)(4).

SECTION 204

(1) This subsection would amend section 1434(a) to except section 1780(f) from applicability to chapter 30 and would add a separate section of similar content but referencing chapter 30 rates.

Section 1434(a) currently incorporates by reference certain enumerated portions of chapter 36 which shall apply to the administration of the chapter 30 education benefits program. One such applicable provision, section 1780(f) of chapter 36, which deals with payment for less than half-time training, inappropriately authorizes rates which are inapplicable to chapter 30.

(2) This provision would amend section 1633 to provide for a proportionate reduction in chapter 32 entitlement in accordance with the reduction in monthly educational assistance allowance paid when a veteran pursuing an apprenticeship or other on-job training program under chapter 32 fails to work 120 hours in a month.

(3) This subsection makes two amendments to section 1790. First, it would amend section 1790(a)(2) which provides that the Secretary may disapprove educational institutions for the enrollment of eligible veterans or eligible persons when the institution would deny them the benefits of prepayment allowances. Since the VA no longer prepays education benefits, this amendment would delete reference to such payments.

Second, this section would amend section 1790(b)(3)(A) to add chapter 30 to the list of chapters enumerated therein.

Currently, section 1790(b)(3)(A) provides that the VA can suspend benefits if the school offering a course has violated one or more of the recordkeeping or reporting requirements of chapter 32, 34, 35, or 36. However, there is no express provision which would permit the VA to suspend benefits if an institution violated these same requirements under chapter 30. This results in the anomalous situation whereby the VA may suspend benefits under chapter 30 for violations of the recordkeeping or reporting requirements of other chapters but not of chapter 30 itself.

More importantly, the chapter 30 program, now a permanent program under the Montgomery GI Bill, is a major education benefits program which surely was intended to be embraced by a general provision for assuring proper payment of benefits by the VA.

VETERANS' ADMINISTRATION,
OFFICE OF THE ADMINISTRATOR OF
VETERANS AFFAIRS,
Washington, DC, May 10, 1989.

Hon. DAN QUAYLE,
President of the Senate, Washington, DC.

DEAR MR. PRESIDENT: There is transmitted herewith a draft bill "To amend title 10 and title 38, United States Code, to make certain improvements in the educational assistance programs for veterans and eligible persons, and for other purposes." I request that this measure be referred to the appropriate committe and promptly enacted.

This measure entitled the "Veterans' Educational Assistance Improvements Act of 1989," would make a number of amendments to the Veterans' Administration educational and vocational rehabilitation programs to facilitate the administration of the programs and make certain provisions more equitable.

Title I of the draft bill would make the pilot program of vocational training for certain pension recipients voluntary and provide participants a trial work period; amend the Montgomery GI Bill to broaden the secondary school credentialing requirements necessary for entitlement and authorize a period of 14 days after initial entry on active duty within which an individual may elect not to participate in the chapter 30 program; make permanent the program of independent living services for service-disabled veterans under chapter 31; and modify the title 38 work-study program by eliminating the authority to make advance payments and by making the program available to certain service-disabled veterans attending school on a half-time or greater basis.

Title II of the draft bill contains administrative provisions that would remove the VA's authority to make advance payments of chapter 31 rehabilitation subsistence allowances; permit the VA to accept a school's certification for renewal of educational benefits following termination for unsatisfactory conduct or progress; and streamline measurement of combined clock-hour, credit-hour course pursuit. Further, technical and clerical amendments to title 38 are included which would correct an erroneous chapter 30 reference to a chapter 36 provision for computing less than half-time training; conform the entitlement charge for on-job/apprenticeship training under chapter 32 when less than 120 hours are worked in a month; delete an outdated reference to prepayment allowances; and add chapter 30 to the list of chapters under which the VA can suspend benefits in certain situations.

The cost or savings implications of these proposals are estimated to be insignificant.

The Office of Management and Budget advises that there is no objection from the standpoint of the Administration's program to the submission of this legislative proposal to the Congress.

Sincerely yours,
EDWARD J. DERWINSKI,
Secretary.

By Mr. CRANSTON (by request):

S. 1004. A bill to amend title 38, United States Code, and other provisions of law, to improve the administration of veterans' health care benefits and personnel management in the Department of Veterans Affairs, and for other purposes; to the Committee on Veterans' Affairs.

ADMINISTRATION OF VETERANS HEALTH CARE PROGRAMS

Mr. CRANSTON. Mr. President, as chairman of the Veterans' Affairs Committee, I have today introduced, by request, S. 1004, a bill to amend title 38, United States Code, and other provisions of law, to improve the administration of veterans' health care benefits and personnel management in the Department of Veterans Affairs, and for other purposes. The Secretary of Veterans Affairs submitted this legislation by letter dated May 10, 1989, to the President of the Senate.

My introduction of this measure is in keeping with the policy which we have adopted of generally introducing—so that there will be specific bills to which my colleagues and others may direct their attention and comments—all administration-proposed draft legislation referred to the Veterans' Affairs Committee. Thus, reserve the right to support or oppose the provisions of, as well as any amendment to this legislation.

I do, however, feel a need to make one clarifying statement regarding section 7 of this legislation, which would amend section 4208 of title 38, United States Code, to provide that VA's Veterans' Canteen Service [VCS] is the exclusive agency for providing any retail or other vending operations in VA facilities. In the "Analysis of Proposed Bill" enclosed with the Secretary's transmittal, it is stated, "Since the Service was created in 1946, it has operated for more than 40 years without challenge as the exclusive means of providing any retail services in VA facilities * * *." However, it should be noted that, under the Randolph-Sheppard Act (20 U.S.C. 107 et seq.), the State of Minnesota has challenged the exclusiveness of VCS' retail rights and the matter is currently pending in arbitration. The Randolph-Sheppard Act generally provides for the authorization of blind individuals—with a preference for certain State-licensed blind persons—to operate vending facilities on Federal property.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD at this point, together with the May 10, 1989, transmittal and letter and enclosed analysis of the proposed bill.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 1004

Be it enacted by the Senate and the House of Representatives of the United States of America in Congress assembled, That (a) Except as otherwise expressly provided, whenever in this Act an amendment is expressed in terms of an amendment to a section or other provision, the reference shall be considered to be made to a section or other provision of title 38, United States Code.

SEC. 2. Section 620(a)(2) is amended—

(a) by striking clause (A) and inserting in lieu thereof the following:

"(A) the amount equal to 45 percent of the cost of care furnished by the Department of Veterans Affairs in a general hospital under the direct jurisdiction of the Department (as such cost may be determined annually by the Secretary) in the State in which such institution is located;"

(b) by striking the period at the end of clause (B) and inserting "; or" in its place; and

(c) by inserting a new clause (C) as follows:

"(C) the amount equal to 50 percent of the cost of care furnished by a community general hospital under contract with the Department of Veterans' Affairs (as such cost may be determined annually by the Secretary) in Alaska or Hawaii."

SEC. 3. Section 628(a)(2) is amended by striking the word "found" and all that follows and inserting in lieu thereof "a participant in a vocational rehabilitation program as defined in section 1501(9) and is medically determined to have been in need of care or treatment to make possible such veteran's entrance into a rehabilitation program, or prevent interruption of a rehabilitation program, or hasten the return to a rehabilitation program which was interrupted because of such illness, injury, or dental condition; and".

SEC. 4. Section 4107(b)(2) is amended by striking the period at the end of the first sentence and inserting in lieu thereof the following:

"or is a physician or dentist serving in a comparable position in the Central Office of the Veterans Health Services and Research Administration."

SEC. 5. Section 4114(a)(3) is amended—

(a) by striking the penultimate sentence in paragraph (A) and inserting in lieu thereof the following:

"Temporary full-time appointments of persons who have successfully completed a full course of training as a physical therapist, practical/vocational nurse, occupational therapist or pharmacist in a recognized school for that occupation, approved by the Secretary, and who are pending registration/licensure in a State or certification by a national board recognized by the Secretary, shall not exceed two years."

(b) by inserting after the penultimate sentence in paragraph (C) the following:

"A student who has a temporary appointment under this paragraph and who is pursuing an academic program leading to a degree in physical therapy, occupational therapy or pharmacy approved by the Secretary may be reappointed for a period not to exceed the duration of such student's academic program."

SEC. 6. Section 4205 is amended—

(a) by striking the phrase "or other interest bearing accounts"; and

(b) by adding the following at the end:

"Money in the revolving fund not required for current disbursements shall be invested and reinvested by the Secretary of the Treasury in interest bearing obligations of the United States or in obligations guaranteed as to both principal and interest by the United States, taking into consideration current market yields on outstanding marketable obligations of the United States. The income on such investments shall be credited to and form a part of the Fund."

SEC. 7. Section 4208 is amended by deleting the old text and inserting in lieu thereof:

"Notwithstanding any other law, the Service shall be under the exclusive control and supervision of the Secretary, and shall: (1) function as an independent unit in the Department of Veterans' Affairs; (2) have exclusive control over all activities of the Service, including sales, procurement and supply, finance, including disbursements, and personnel management; and (3) have sole and exclusive authority to provide articles of merchandise and services, under this chapter, at any Department of Veterans' Affairs facility under the control or jurisdiction of the Secretary."

(b) The table of sections at the beginning of chapter 75, title 38, United States Code, relating to section 4208 is amended to read as follows:

"4208. Service to be independent unit and exclusive."

SEC. 8. Section 115 of Public Law 100-322 is amended—

(a) by striking "1989" in subsections (d) and (e) and inserting in lieu thereof "1992";

(b) by striking "1988" in subsection (e) and inserting in lieu thereof "1991"; and

(c) by striking subsection (f) in its entirety and redesignating subsection "(g)" as "(f)".

ANALYSIS OF PROPOSED BILL

Section 2 would amend section 620 to provide that in Alaska and Hawaii, those states without a VA general hospital, the per diem cost of community nursing home care purchased by VA will not exceed 50 percent of the cost of care purchased by VA in a community general hospital in that State. Currently, the per diem rate is limited to "45 percent of the cost of care furnished by the Veterans' Administration in a general hospital . . . or . . . 50 percent of such costs, if such higher amount is determined necessary by the Administrator." This has been interpreted to allow the 45 or 50 percent factor to be applied to a VA medical district average or a VA index hospital, if necessary, to purchase adequate care for veterans. The proposed amendment would rectify a problem in Alaska where, in light of increasing costs, the current formula threatens to limit VA's capability to obtain the care needed.

This provision would allow a higher general hospital index rate for Alaska and Hawaii, which would permit VA to establish a higher maximum community nursing home rate in those States and thereby enable the Department to purchase needed care. Enactment of this proposal would not have any significant cost impact.

Section 3 would amend 38 U.S.C. § 628 to clarify that VA has the authority to pay for emergency medical services for veterans participating in a vocational rehabilitation program under 38 U.S.C., Chapter 31, when the veteran cannot reasonably obtain medical care through VA or other Government facilities. Under existing law, VA may generally pay for the care of certain categories of veterans in private non-Federal facilities only when the care has been authorized in advance. Section 628 provides an exception to that rule for certain veterans when a medical emergency exists and a VA or other Government facility is not reasonably available at the time of the emergency. Among the veterans eligible for reimbursement of such emergency care are some, but not all veterans participating in a vocational rehabilitation program under Chapter 31. Specifically, section 628 applies if a veteran is found to be "(i) in need of vocational rehabilitation under Chapter 31 of this title and for whom an objective had been selected or (ii) pursuing a course of vocational rehabilitation training and is medically determined to have been in need of care or treatment to make possible such veteran's entrance into a course of training, or prevent interruption of a course of training, or hasten the return to a course of training which was interrupted because of such illness, injury, or dental condition."

Since section 628 was first enacted, changes have been made in the VA's vocational rehabilitation programs. For example, VA now conducts a program of independent living that does not necessarily involve a so-called "course of training" with a specific vocational goal. This proposal would authorize VA coverage of emergency care for a veteran in such a program by amending section 628 to include all veterans participating in a vocational rehabilitation program as that term is defined in 38 U.S.C. § 1501(9). This amendment is also intended to cover an individual who has just completed a course of training under the vocational rehabilitation program, but has not yet obtained employment. In that case, the individual is still a participant in the program, and VA would still be providing vocational rehabilitation services. The proposal would clarify that all participants in vocational rehabilitation programs are authorized emergency medical care if a VA or other Federal medical facility is not available to provide the needed care. Enactment of this provision would result in insignificant costs as we anticipate only a few cases would arise.

Section 4 of the draft bill would amend section 4107(b)(2) of title 38, United States Code, to authorize the Department of Veterans' Affairs to use the Director grade in the "Physician and Dentist Schedule" in section 4107(b)(1) for a physician or dentist position in the Central Office of the Department's Veterans Health Services and Research Administration which is comparable to the position of Director of a Department, medical center, domiciliary, or independent outpatient clinic.

Currently, section 4107(b)(2) restricts use of the Director grade to Directors of the Department's health-care facilities mentioned above. Therefore, only the Executive or Medical Director grades are available for Central Office physician and dentist positions, even though the Director grade (which is between the two other grades in pay) might be more appropriate. This proposal would allow relating the pay for these positions more closely with the level of responsibility and improve the administration of physician and dentist assignments and advancements.

Section 5 would amend 38 U.S.C. § 4114(a)(3) to authorize the appointment of graduate physical therapists, graduate practical/vocational nurses, graduate occupational therapists, and graduate pharmacists under 38 U.S.C. § 4114(a)(3)(A). Current provisions of 38 U.S.C. § 4104(3) provide for the appointment of licensed physical therapists, licensed practical or vocational nurses, pharmacists and occupational therapists. However, although not cited by position title, these personnel may also be appointed as medical support personnel under 38 U.S.C. § 4114(a)(3)A) for a period not to exceed one year pending receipt of licensure or certification.

The proposed amendment to 38 U.S.C. § 4114(a)(3)(A) would authorize the Department to appoint graduate physical therapists, graduate practical/vocational nurses, graduate occupational therapists and graduate pharmacists for more than one year. This authority would apply to graduates who have successfully completed a full course of training in a recognized school for that occupation, approved by the Secretary, and who also are awaiting licensure in a State or certification by a national board recognized by the Secretary.

By adding the categories of personnel listed above to those authorized for appointment for up to two years under section 4114(a)(3)(A), the proposed change would enable these personnel to obtain health benefits and life insurance. Current Office of Personnel Management regulations do not allow employees with temporary appointments of one year or less to receive these benefits. Graduate physical therapists, graduate practical/vocational nurses, graduate occupational therapists and graduate pharmacists appointed to VA health care facilities are employed with the expectation that they will be converted to a probationary appointment upon attainment of licensure or certification. Nearly all such appointees ultimately receive permanent appointments under 38 U.S.C. § 4104(3). However, until that time, they remain ineligible for health and life insurance benefits.

The proposed legislative change is expected to enhance the VA's ability to recruit new graduates and to compete successfully with private sector health care providers. In drafting the proposed amendment VA adopted language from a similar provision of 38 U.S.C. § 4114(a)(3)(A) which permits the appointment of graduate nurse technicians for a period not to exceed two years. No significant additional costs are expected to result from this proposed change.

38 U.S.C. § 4114(a)(3)(A) is further amended by adding a new sentence, preceding the last sentence in paragraph (C), which would permit the appointment of physical therapy, occupational therapy and pharmacy students as technicians beyond one year. Current provisions of 38 U.S.C. § 4114(a)(3)(A) restrict appointment of medical support personnel to one year. This authority can be used to appoint students who are enrolled in good standing at an accredited school in one of these occupations, but the one-year limitation terminates the appointment, in many cases, before the student receives his or her degree and thus fosters a drain of potential career personnel in these occupations for the VA.

The proposal would amend 38 U.S.C. § 4114 to allow VA health care facilities to reappoint physical therapy, occupational therapy and pharmacy students as technicians for a period not to exceed the duration of their academic program leading to a degree.

This proposal is patterned on existing authority under 38 U.S.C. § 4114(a)(3)(C) which permits VA to reappoint nursing students for a second year and would extend this opportunity for reappointment to physical therapy, occupational therapy and pharmacy students as well. This wording provides for reappointment after one year as opposed to extending the initial appointment period, thus allowing the period of initial appointment to serve as an opportunity for VA to assess the student's performance and potential. No additional costs are expected to result from this change.

Section 6 would amend chapter 75 of title 38, United States Code, to clarify that monies in the VCS revolving fund may be invested in Treasury securities. Current law (as amended by section 414 of Public Law 100-322) provides that designated amounts from the VCS revolving fund may be depos-

ited "in checking accounts or other interest-bearing accounts . . . ."

Prior to this amendment, the bulk of VCS monies were maintained in non-interest bearing Treasury accounts. With the enactment of Public Law 100-322, and after much discussion with officials of the Department of the Treasury, VCS officials began depositing funds in Treasury Direct accounts and purchasing "T-bills"; however, the investment options under such an arrangement are somewhat limited.

Other provisions of law are more specific, authorizing the Secretary of the Treasury to invest certain agency monies in interest-bearing obligations of the United States. (See, for example, 10 U.S.C. §§ 1461, 1467; 38 U.S.C. § 5228.) The legislative record strongly suggests that Congress intended to provide investment authority for VCS monies at least as broad as that afforded those other agencies' funds which may be invested in Treasury activities.

The legislative history indicates that Congress' purpose in enacting this provision was to enable VCS to maximize returns on its surplus monies. Notes from the Subcommittee hearings explain Congress' view that, "[p]rudent financial management calls for investment of funds which are not needed to meet current VCS demands . . . and that explicit authority to invest surplus is consistent with the goals and mission of the VCS."

The proposed revision which is intended to clarify this provision is patterned on existing investment authority and would serve to clarify VCS authority to invest in a variety of Treasury securities, including participation in the "Federal Investment Counseling Program." The new language directs that the Secretary of Treasury "shall invest and reinvest in interest bearing obligations" those funds designated by the VCS as surplus, thereby, facilitating the administration of VCS investment monies and allowing VCS to take advantage of Treasury expertise. Ultimately, the proposed revision will enable VCS to effectuate the goal set by Congress when initially amending § 4205, to foster investments which yield the highest return on surplus monies from the VCS revolving fund.

Section 7 would amend section 4208 of title 38, United States Code, to make it clear that the Veterans' Canteen Service, under the control and supervision of the Secretary, is the exclusive agency for providing any retail or other vending operations in VA facilities. Since the Service was created in 1946, it has operated for more than 40 years without challenge as the exclusive means of providing any retail services in VA facilities, particularly hospitals and homes, where the Secretary determined VCS services were needed. This provision would simply amend the VCS statute to explicitly provide what has long been at least implicit—that the Secretary has exclusive authority under the VCS law to provide merchandise and services, including vending machines, at any VA facility.

Section 8 would amend section 115 of Public Law 100-322 to extend for three years from September 30, 1989, to September 30, 1992, the VA's authority to provide community-based care for homeless chronically mentally ill veterans. Congress initially authorized VA to provide such care in Public Law 100-6. Public Law 100-322, enacted on May 20, 1988, repealed the program authorization established under Public Law 100-6 and specifically directed VA to conduct a pilot program for homeless chronically ill veterans, and established a September 30, 1989, expiration date for it. In addition, Section 115 of Public Law 100-322 directed that the Administrator of Veterans' Affairs submit a report on the pilot program to the authorizing committees by February 1, 1989, with recommendations as to whether the pilot program should be continued. As required, in January 1989 the Administrator reported to Congress on the program's success.

In the interim, Congress has enacted various provisions in support of VA's pilot program for the homeless. The "Urgent Relief for the Homeless Supplemental Appropriations Act of 1987" appropriated an additional $5 million for the program through September 30, 1988. Section 501 of Public Law 100-628, the Stewart B. McKinney Homeless Assistance Amendments Act of 1988, authorized additional funding for Fiscal Years 1989 and 1990. Despite these supplemental funding provisions, Congress did not extend the program's September 1989 expiration date. In light of continued congressional support (evidenced by the supplemental appropriations) and early evidence of the program's success, we recommend that the pilot program be extended for another three years. The draft bill would accomplish this and thus enable VA to gain additional data and assess the merits of the pilot program over a longer term. Extension of this pilot program would not entail any additional costs.

VETERANS' ADMINISTRATION,
OFFICE OF THE ADMINISTRATOR OF VETERANS' AFFAIRS,
Washington, DC, May 10, 1989.

Hon. DAN QUAYLE,
President of the Senate,
Washington, DC.

DEAR MR. PRESIDENT: There in transmitted herewith a draft bill "To amend title 38, United States Code, and other provisions of law, to improve the administration of veterans' health care benefits and personnel management in the Department of Veterans' Affairs, and for other purposes." We request that it be referred to the appropriate committee for prompt consideration and enactment.

The enclosed draft bill would amend several provisions of law in an effort to enhance operations of the VA health care system by improving medical center personnel and management procedures, extending an expiring program targeted to assist the homeless and clarifying statutory language to facilitate the administration of veterans' health care benefits and the provisions of retail and vending services at VA facilities.

CONTRACT NURSING HOME CARE

Among its provisions, the draft bill would resolve what we believe may become a serious problem in those States without a general VA hospital (Alaska and Hawaii). Under existing law, the maximum per diem rate VA may pay for contract nursing home care is 45 percent of the cost of care in a VA general hospital or, where deemed necessary, 50 percent of that cost. With the increasing cost of nursing home care, the current formula threatens to limit VA's capability to obtain such needed care in Alaska, for example. We recommend that Congress amend the law to set maximum per diem rates in Alaska and Hawaii to a level pegged to rates in community general hospitals, as provided in our draft bill. With enactment of a higher general hospital index rate for Alaska and Hawaii, VA will be able to obtain the care needed for veterans in those States. Enactment of this proposal would not result in any significant cost increase to the Department.

FLEXIBILITY IN HIRING

Currently, section 4107(b)(2) of title 38, United States Code, prohibits the Veterans' Health Services and Research Administration (VHS&RA) in the Department of Veterans' Affairs from using the Director grade under the "Physician and Dentist Schedule" in section 4107(b)(1) for anyone other than the Director of a VA medical center or independent outpatient clinic. The pay for the Director grade is comparable to the General Schedule grade GS-16 ($67,038 for Step 1, effective January 1, 1989).

Because of this restriction, the VA is prevented from using the Director grade as an option mainly when it reassigns or promotes physicians or dentists to positions in the VA Central Office. Instead, we can generally only give these physicians or dentists either the Executive or Medical Director grade, unless the position is specified by statute. The Executive grade, which is generally given to Chiefs of Staff at medical centers, is between the General Schedule grades GS-15 and 16 ($61,900 for Step 1). The Medical Director grade is comparable to GS-17 ($76,990 for Step 1).

The draft bill would amend section 4107(b)(2) to authorize the Department to use the Director grade for Central Office physicians and dentists if the position is comparable to the positions of a medical center director.

We believe that there are Central Office physician and dentist positions with responsibilities, qualification requirements, and complexities that are comparable to those of a Director of a VA medical center. There could also be future positions in Central Office where the Director grade would be more appropriate than either the Executive or Medical Director grade. Providing the VA with the option to use the Director grade would allow us to more closely relate the pay for these positions with the level of their responsibilities.

The additional flexibility to use all three grades (Executive, Director, and Medical Director) would also improve administration or assessments and advancements of physicians and dentists to Central Office positions. This would particularly assist the Department in recruiting Chiefs of staff who are in the Executive grade.

There are no increased costs associated with this proposal. We believe that any cost savings that may arise from assigning physicians or dentists to the Director, rather than the Medical Director, grade would be minimal and speculative.

Another provision of the draft bill would expand the appointment authority under 38 U.S.C. § 4114. Section 5 of the draft bill would amend 38 U.S.C. § 4114(a)(3)(A) by authorizing VA to appoint graduate physical therapists, graduate practical/vocational nurses, graduate occupational therapists and graduate pharmacists for more than one year, subject to a maximum of two years, provided they have successfully completed a full course of training in a recognized school for that occupation, approved by the Secretary and are awaiting licensure in a State or certification by a national board recognized by the Secretary. In addition, the proposed change would permit VA to offer such graduates the opportunity to obtain health and life insurance. Under OPM regulations employees with temporary appointments of one year or less are ineligi-

ble for such benefits. This places VA at a serious disadvantage when competing against private institutions for this scarce pool of health care professionals. Private health care institutions typically offer such benefits to graduates when they are first employed. The proposed amendment would empower VA to compete more effectively with the private sector in this regard. No significant cost would arise from this marginal change in VA appointment authority.

Section 5 of the draft bill would also authorize VA to appoint physical therapy, occupational therapy and pharmacy students for a period not to exceed the duration of their academic program. Under the present authority, which limits temporary appointments to one year, many students are required to terminate employment before completing their academic training. Because at that juncture they have not yet obtained a degree, they are ineligible for appointment as probationary permanent employees. This interruption in the "internship" works against the possibility that promising students may work continuously with VA and ultimately become career VA health care providers. The opportunity to employ, observe, and identify promising students is thus less valuable under the current one year limit.

Under the draft bill, to qualify for reappointment these students must maintain good academic standing in a program approved by the Secretary leading to a degree in physical therapy, occupational therapy or pharmacy. With appropriate orientation and supervision, such students could be appointed as technicians and perform duties of increasing sophistication consistent with the level of training they have completed. Moreover, because the draft bill would enable more stable employment relationships with students during their training, it may make VA employment more attractive to the students. Thus, the proposed change would help VA meet current staffing needs in these occupations as well as enhance the Department's opportunity to recruit and retain promising students for career service. No significant cost increase would result from enactment of this provision.

EXTENSION OF HOMELESS CHRONICALLY MENTALLY ILL PILOT PROGRAM

In Public Law 100-6 Congress provided funding and authority for VA to develop a program to provide community-based psychiatric rsidential treatment for homeless chronically mentally ill veterans. That law transferred $5 million in FY 1987 funds to VA's medical care account for this program. Pursuant to Public Law 100-6, the VA established the Homeless Chronically Mentally Ill program (HCMI). In the summer of 1987, Congress enacted the "Urgent Relief for the Homeless Supplemental Appropriations Act of 1987" as part of Public Law 100-71. It provided additional spending authority by appropriating an additional $5 million for the HCMI program to be available through September 30, 1988. Section 115 of Public Law 100-322 enacted on May 20, 1988, repealed the program authorization established in Public Law 100-6 and specifically directed the conduct of an HCMI pilot program. Section 115 established a September 30, 1989, expiration for the pilot, but directed that the Administrator of Veterans' Affairs submit a report on the pilot program to the authorizing committees by February 1, 1989, to include a recommendation as to whether the pilot program should be continued.

On January 17, 1989, the Administrator provided Congress the report required by section 115, advising, in essence, that data collected demonstrated that the pilot program has been operated in a cost effective manner. Our experience with the program indicates that it has been very successful in reaching out to the target population, veterans who are both homeless and chronically mentally ill, and providing a wide range of services to this seriously ill population of veterans.

We note that in section 501 of Public Law 100-628, the Stewart B. McKinney Homeless Assistance Amendments Act of 1988, Congress in November 1988 authorized additional appropriations for each of Fiscal Years 1989 and 1990 of $30 million, of which $15 million is to be available for the HMCI program. Congress did not lift the program's September 30, 1989, "sunset" provision, however, and provided no evidence of an intent to impliedly repeal it. To the contrary, Congress also let stand the requirement in section 115 of Public Law 100-322 that the Administrator report on the Agency's experience with the program.

In view of the early evidence of the program's success, we recommend that it be extended for another three years to enable us to gain additional data and assess the merits over a longer term. We anticipate that the extension of this pilot program would entail no new costs.

CLARIFYING AMENDMENTS

This draft bill also includes a provision to clarify that the Veterans' Canteen Service (VCS) is the exclusive authority for providing retail or other vending operations in VA facilities.

In addition, we propose more specific wording of 38 U.S.C. § 4205, as amended by Public Law 100-322, to clarify that money in the VCS revolving fund not required for current disbursement is to be invested in Treasury securities. Finally, the draft bill would clarify our authority to pay for the medical costs of veterans participating in a VA-sponsored vocational rehabilitation program when those costs are incurred in a medical emergency, and a VA or other Federal health-care facility is unavailable to provide the needed care. Enactment of these provisions would not result in significant costs.

The Office of Management and Budget advises that there is no objection from the standpoint of the Administration's program to the submission of this legislative proposal to the Congress.

Sincerely yours,

EDWARD J. DERWINSKI,
Secretary.

By Mr. HARKIN (for himself, Mr. PRESSLER, Mr. SIMON, Mr. GRASSLEY, and Mr. DASCHLE):

S. 1005. A bill relating to the sale, purchase, or other acquisition of certain railroads; to the Committee on Commerce, Science, and Transportation.

REVIEW OF PROPOSED RAILROAD ACQUISITIONS

● Mr. HARKIN. Mr. President, today, Senators PRESSLER, SIMON, GRASSLEY, DASCHLE, and I are introducing legislation that would require the Interstate Commerce Commission to review proposed acquisitions of class I railroads if such acquisitions could potentially result in a reduction in service or in an increase in a railroad's debt. The legislation would not increase the jurisdiction of the ICC in regard to the purchase of shortline railroads.

Railroads are crucial to the movement of agricultural commodities, manufactured goods, coal and many other products. Their maintenance and continued operation at a proper level of service is essential for our national productivity.

The Nation's railroad and highway systems are the arteries and veins that facilitate commerce. The granting of large tracts of land to railroads in the 19th century represented the transfer of great wealth to an industry which was recognized as crucial to the development of our Nation. It was an important investment and it was key to the economic development of the country.

The Interstate Commerce Commission has the authority to prevent anticompetitive railroad mergers. It is incumbent upon ICC to consider proposed abandonment of trackage—even the possible abandonment of small segments on isolated branch lines that will affect only a few shippers—to determine whether that abandonment would jeopardize the public's interests.

However, according to a letter that a number of my Senate colleagues and I received yesterday from the ICC, the Commission feels that it may not have jurisdiction over the possible purchase of the CNW railroad by the Wall Street investment partnership, Japonica Partners. The ICC arrived at this conclusion after holding a hearing on this question on May 9. I must note that the position is not held unanimously by the five commissioners.

Commissioner J.J. Simmons III asserted—

The majority's statement, that the Commission's chances of success in litigation resulting from any assertion of jurisdiction are "questionable," is apparently grounded in a disinclination to become involved. The Commission should not adopt this constricted interpretation of its responsibilities.

Commissioners Andre and Lamboley also made separate comments that the Commission may have jurisdiction over this issue depending on certain questions.

The possibility is very real that a Japonica leveraged buy-out could destroy the CNW. And, this type of a transaction could threaten other major railroads that serve wide areas of the country. I believe that we must ensure that the ICC oversee this type of transaction to protect national interests.

The Chicago and Northwestern operates track in Iowa, Minnesota, Wisconsin, Nebraska, South Dakota, Wyoming, Missouri, Illinois, and Michigan—nine States. The railroad is expected to operate 40 billion revenue ton miles this year. It receives a billion dollars in revenue. The CNW moved 270,000 carloads of grain in 1988 and

three quarters of that grain was corn or soybeans. The CNW transported 115 million tons of coal. The railroad is a major mover of steel, automobiles, auto parts, and all types of consumer goods. CNW employees are expected to work 16 million hours in 1989. The Federal Government has provided over $200 million in assistance to the railroad to improve the quality of its track.

In Iowa, the CNW operates 40 percent of the rail trackage in the State—1,945 miles. And, it moves about that same percentage of our corn and soybeans to market. Trains use much of the CNW trackage in Iowa as gathering lines for grain. These same lines are also crucial for a large number of manufacturers. If branch lines cease to operate or if service sharply deteriorates, the adverse economic impact on the State of Iowa would be tremendous. From both an Iowa and a national perspective, continued operation of the CNW railroad is crucial to the Nation's transportation system.

If the Japonica tender offer goes through, the CNW would accrue a significant amount of debt. CNW's present debt of $536 million would soar by an additional $615 million if this tender offer were finalized. Few people believe that the CNW would be able to continue with its track modernization program with that kind of an increase in debt. Under the railroad's current plans, $82 million is to be spent on track maintenance in future years. What would be the maintenance level with a doubling of the railroads debt? Wouldn't there be added pressure to sell various segments of the railroad with the increased debt load?

The result of the Japonica leveraged buy-out, in my view, is likely to be a series of abandonments and sales of significant segments of the railroad under the pressure of debt. I suspect that we will see deterioration of service that would lead to a decline in traffic. When traffic declines, the ICC will begin to hear that lines should be abandoned because operations are no longer profitable.

It would not be reasonable for the ICC to look only at such individual actions that are likely to result from a successful Japonica tender offer when they did not rule on the logic of the purchase itself.

The legislation we're introducing today would correct this problem. It would require that the ICC examine any proposed acquisition of a class I railroad in a leveraged buy-out scenario or in other scenarios if the transaction is likely to be destructive to the operation of a railroad.

Frankly, I developed this legislation because of my concern about possible immediate damage to a major railroad that is crucial to Iowa and the Midwest. However, I'm also troubled that railroads, by their nature, have a tendency to be takeover targets. Like farmland near cities, railroad property can often be worth far more as land than as a railroad. The owners may be able to make a killing. But, the national economy will suffer greatly.

I ask unanimous consent to submit for the RECORD an article that appeared in the weekend Washington Post which discusses the possibility that certain entities may be interested in purchasing Conrail, and I ask unanimous consent that the article be printed following my remarks. I am sure that there are many other potential railroad targets around the country.

I want the management of our Nation's railroads to be running the railroads instead of spending their time figuring out how to block unfriendly leveraged buy-outs or developing their own exotic financing schemes so management can buy a railroad from its stockholders.

I urge that the Senate consider and pass this legislation.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

IS CONRAIL ON THE TAKEOVER TRACK?—WITH STOCK CURB SET TO END, RAIL FIRM PREPARES FOR THE FUTURE

(By John Crudele)

Consolidated Rail Corp. has the best poison pill of any company around. The railroad has Congress forbidding anyone to buy even one-tenth of its shares.

But, alas, all good things come to an end, and Conrail is said to be preparing for the day next April when its congressional shield is removed.

"They don't specifically talk about fears of a takeover," says Andrew Geller, who follows Conrail for Philadelphia's Provident National Bank. "But they understand what might be out there after April."

Under the 1986 law that pieced together Conrail—a now-profitable freight carrier serving the Northeast—nobody was allowed to buy more than 10 percent of the company's stock. That prohibition ends next April. Geller says Conrail's management is painfully aware that it must get the company's stock price (around $36) higher if it is to avoid the risk of a takeover attempt. And he believes an increase in the company's $1.20 a share dividend is one thing Conrail will probably do in an effort to improve its stock price.

What else is Conrail doing? The scuttlebutt on Wall Street is that the company is keeping a very watchful eye for signs of anyone accumulating its stock.

D.F. King & Co., Conrail's proxy solicitation firm, is said to have been put on alert by the railroad for any signs of concentrated stock buying. Recent activity in Conrail's stock shows just how interested investors might be in the railroad once the takeover restraints are removed.

When Drexel Burnham Lambert analyst Linda Dunn issued a report on May 5 on Conrail's financial strength and the chances of a restructuring of the company, Conrail's stock climbed sharply on twice its normal trading volume. Dunn says that Conrail's financial prowess "could trigger either [its] restructuring or an outsider taking an interest."

How much is Conrail worth? Even though the rail line isn't the type of company that can be broken up, some analysts still think Conrail could command $55 a share in a buyout. But investors will have to wait until April Fools Day for even a chance to collect.●

● Mr. SIMON. Mr. President, I am pleased to join my friend from Iowa and our other distinguished colleagues as an original cosponsor of this important legislation. This bill will allow the Congress and the executive branch to be sure that the hostile takeover/leveraged buyout game will not wreak havoc on the Nation's rail transportation system. It does this by granting the Interstate Commerce Commission explicit jurisdiction over acquisitions of Class I railroads by a non-carrier.

A broad interpretation of the ICC's mandate might allow the agency to exert jurisdiction without a change in the law. Its recent reluctance to do so, however, in the matter of the ongoing hostile takeover attempt of CNW Corp., the parent company of the venerable Chicago and North Western Railroad, by Japonica Partners, Ltd., apparently requires some clear direction from Congress.

I have long been concerned that many hostile takeovers, mergers, and leveraged buyouts cause the disruption of local economies, unwarranted job losses, a dangerous buildup of corporate debt and a preoccupation with short-term profits at the expense of carefully considered investment in a longer-term future. This deal exhibits many of these traits and one other important characteristic.

The firm that Japonica has put in play doesn't process food, make tires or sell cosmetics—it provides rail freight and commuter passenger service crucial to the economic well-being of my home State of Illinois and eight other states in the Midwest and West. This aspect of the proposed transaction requires the special attention of an accountable body—in this case the Interstate Commerce Commission—that can protect the public interest.

We must be sure that any acquirer of a major railroad will continue to provide the markets it serves with dependable and efficient rail transportation service which meets the needs of shippers, consumers and rail passengers. Some important questions must be answered by any party who proposes to make such an acquisition, but particularly by a non-carrier.

The acquirer must be able to show that it possesses the expertise in the railroad business to continue to provide efficient service. It must describe its post-acquisition plans for the railroad in reasonable detail. Finally, the buyer must demonstrate that the financial structure of the transaction does not include a new debt load that

might threaten either the long-term viability of the carrier or rail transportation service in affected markets. A highly-leveraged deal might require the buyer to conduct an emergency auction of large chunks of the railroad's trackage or capital assets which could disrupt service and make it difficult for the railroad to survive a recession.

Mr. President, in my judgment, Japonica has thus far failed to meet this burden of proof.

In order to finance this transaction, Japonica proposes to add $768 million in long-term debt to the $427 million CNW already carries. About $141 million of the present debt load is in low-interest notes held by the Federal Railroad Administration. On an annualized basis, this amounts to $85 million in additional interest expenses. This figure is greater than CNW's earnings for any of the last 3 years.

To pay down this new $1.2 billion dollar debt load, Japonica says it will take cost-cutting measures, sell certain unspecified CNW real estate holdings, excess capital equipment and the road's Chicago area commuter service.

Japonica apparently has no real operating plan for CNW, only ideas. A full-blown operating plan will be devised after the transaction is completed.

This lack of specificity in Japonica's plans, coupled with the massive debt Japonica would add to CNW's balance sheet, could have grave consequences in the event of an economic downturn for the farmers, businesses and commuters CNW now serves.

As the ICC noted in a response to Senator HARKIN'S inquiry on this transaction:

> The possibility that a combination of increased leverage, recession economics and a log jam in the formation [divestiture] of short-line operations might prompt cessation of service over otherwise operable properties is the most serious risk posed by this transaction.

I am concerned that this scenario is far more likely to be the operative one than that propounded by Japonica.

I have a special interest in the fate of the commuter rail service the CNW provides to the Chicago metropolitan area. Last year, I led the successful effort to pass emergency legislation extending the mandatory cooling-off period in CNW's negotiations with the Railway Brotherhoods in order that the 40,000 people who depend on those lines to get to their jobs could do so without interruption.

I think this transaction poses a far greater danger to Chicago's regional transportation system than the transitory threat of a strike. My old friend and colleague from Illinois and the author of the last mass transit authorization bill set out this serious flaw in Japonica's proposal in a letter to Alan Greenspan, the Chairman of the Federal Reserve Board, relating to the Japonica deal. Senator DIXON pointed out that Metra, the public entity that operates the CNW commuter lines, is heavily subsidized from Federal, State and local resources, but particularly by the Federal mass transit program.

He added that Metra, the only possible purchaser of the CNW commuter lines, would not be able to buy those lines from a Japonica-owned CNW without a significant infusion of new Federal money from the mass transit program. Senator DIXON stated that those funds will simply not be available. I think it is doubtful that State and local governments could make up the difference.

Japonica is counting on the tens of millions of dollars it would receive from the sale of the CNW commuter lines to significantly reduce the massive debt it caused CNW to incur. If Japonica can't sell those lines, we won't need an economic downturn to see a serious disruption in CNW's rail operations.

Mr. President, I think the need for this legislation is clear and I hope my colleagues will act quickly to give the ICC the authority it needs to preserve the integrity of the Nation's rail transportation system.●

By Mr. LEAHY (for himself and Mr. THURMOND):

S. 1006. A bill to encourage innovation and productivity, stimulate trade, and promote the competitiveness and technological leadership of the United States; to the Committee on the Judiciary.

NATIONAL COOPERATIVE RESEARCH ACT EXTENSION OF 1989

Mr. LEAHY. Mr. President, I am pleased to introduce the National Cooperative Research Act Extension of 1989. This legislation would promote the competitiveness, technological leadership, and economic growth of the United States by extending the National Cooperative Research Act of 1984—the 1984 Antitrust R&D Act—to permit joint manufacturing ventures as well as joint research and development ventures. This legislation will enable American firms to respond to the growing pressures generated by technology and international competition without risking harm to the competitive marketplace or the integrity of our antitrust laws.

I am pleased to be joined in this effort by my distinguished colleague from South Carolina, Senator THURMOND. We will be working together on this legislation during the coming months, as we have on many other bills in the past.

The need for firms to pool their resources and enter into joint manufacturing ventures is essential if American business is to remain competitive in the world marketplace. The high-definition television [HDTV] industry is just one example of yet another technology that may be lost to foreign competitors if American companies are unable to pool their manufacturing capabilities. The immense cost required to develop the HDTV technology and catch up with Japanese and European HDTV industries makes it very difficult for any one American firm to undertake the initiative. The cost of not pursuing the HDTV technology is enormous, however. HDTV technology potentially could create such a large demand for related components, such as semiconductor chips, that the failure to develop the technology could place U.S. high-technology companies at a severe competitive disadvantage. In addition, high definition display screens will become essential for more detailed and more accurate information in everything from the medical to the defense industries. This legislation will enable American companies to compete effectively and will help curb the erosion of the United States' industrial base.

Importantly, the legislation will enable small businesses and individual inventors to assist in the manufacturing of new technologies. Much of our national inventive dynamism is located in our small enterprises—particularly in the field of high technology. If they can maintain their small-unit creativity and yet join with other firms for R&D and manufacturing when a project is too big or costly or risky to do alone, the entire Nation will be the beneficiary.

Our foreign competitors do not labor under the same antitrust restrictions that confront American businesses. Their R&D and manufacturing muscle is unlimited, and their R&D and manufacturing ventures are formed on strictly pragmatic grounds: What is needed and what will work. Consequently, in many industries, such as videocassette recorders and HDTV, the Japanese and Europeans either have captured the market or are years ahead of the United States. As the world's largest consumer electronics market, we simply cannot afford to keep losing these key components of the electronics industry. We must stimulate rather than straitjacket American business.

The 1984 R&D Act has been very successful. In the last 5 years, companies have established nearly 100 joint research ventures, which are developing everything from chipmaking and steelmaking processes to superconductors. Sematch, the semiconductor industry's facility to develop superior chipmaking methods, has made significant advances in only 2 years and has charted a course to surpass Japan's chipmaking prowess by 1995.

The Council on Competitiveness, a group of 150 corporate CEO's, recently concluded, however, that America's

achilles heel is the failure to convert scientific discoveries into commercial products. Over and over again we find American innovations mass marketed by our key trade competitors.

It is time for Congress to help American firms jump from the petri dish to the product bin. That is what this bill is designed to do. It does so by making the logical extension to the 1984 act by allowing joint manufacturing and processing as well.

No one should fear that passage of this bill will weaken our antitrust laws. By extending rather than supplanting the 1984 R&D Act, this legislation retains the 1984 act's protections against antitrust violations. The Department of Justice and the Federal Trade Commission retain their authority to investigate the scope and structure of a joint R&D or manufacturing venture. The 1984 act's safeguards against price-fixing and market allocation arrangements are maintained, as are its notice provisions which I worked on with Senator THURMOND and others on the Judiciary Committee 5 years ago.

This legislation recognizes that the creativity, knowledge, and economic resources necessary to develop innovative technologies rarely will be limited to one firm. It removes a significant impediment to the creation of joint manufacturing and processing ventures. Companies will be able to pool both assets and risks. Projects previously too expensive for a single company to undertake may now be started. Programs that promise technological breakthroughs in medicine, engineering, and many other areas can now be initiated for the betterment of society.

Mr. President, I urge my colleagues to support this legislation and ask unanimous consent that the text of the legislation be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1006

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "National Cooperative Research Act Extension of 1989".

JOINT MANUFACTURING VENTURES

SEC. 2. The National Cooperative Research Act of 1984 (15 U.S.C. 4301 et seq.) is amended—

(1) in section 2(a)(6) by—

(A) inserting "or manufacturing" after "development" the first place it appears;

(B) redesigning subparagraphs (D) and (E) as subparagraphs (E) and (F), respectively;

(C) inserting the following new subparagraph between subparagraph (C) and subparagraph (E), as redesignated:

"(D) the manufacturing and processing of equipment and materials,";

(2)

(D) inserting "and manufacturing" after "research" in subparagraph (E); and

(E) inserting "(D), and (E)" after "(C)" in subparagraph (F), and inserting "and development or manufacturing," after "research," in the matter following subparagraph (F);

(2) in section 2(b) by—

(A) inserting "or manufacturing" after "development" the first place it appears;

(B) striking "conduct the research and development that is the" in paragraph (1) and inserting in lieu thereof "carry out the"; and

(C) inserting "or manufacturing" after "development" in subparagraph (3)(B);

(3) in section 3 by inserting "or manufacturing" after "development" the first place it appears, and by inserting "or product" the second place it appears;

(4) in section 4 by inserting "or manufacturing" after "development" each place it appears in subsections (a)(1), (b)(1), (c)(1), and (e);

(5) in section 5(a) by inserting "or manufacturing" after "development";

(6) in section 6 by inserting "OR MANUFACTURING" after "DEVELOPMENT" in the section heading;

(7) in section 6 by inserting "and any party to a joint manufacturing venture, acting on such venture's behalf, may, not later than 90 days after entering into a written agreement to form such venture or not later than 90 days after the date of enactment of the National Cooperation Research Act Extension of 1989, whichever is later," after "Act"; and

(8) in section 6 by inserting "or manufacturing" after "development" each place it appears in subsections (d)(2) and (e).

Mr. THURMOND. Mr. President, today we are introducing legislation to amend the National Cooperative Research Act of 1984 [NCRA] to extend its coverage to manufacturing joint ventures. It is our expectation that these amendments will enable American businesses to respond more effectively to scientific and technological advances and to improve their competitiveness in international markets. The National Cooperative Research Act, also known as the joint research and development bill, enjoyed broad support in 1984, and we believe that these proposed amendments will receive the same broad support.

Mr. President, competition in worldwide markets is strong and is getting stronger every year. American firms cannot afford to settle for less than the most advanced means of manufacturing if they are to be successful, not only in exporting their products, but also in retaining their positions in their markets right here at home. This means that they must make substantial investments in state-of-the-art facilities. Such investments, however, are often too costly for one firm to undertake. Joint manufacturing ventures may provide just the answer for firms which cannot make the needed investments in new production technology, but do not want to merge their entire operations to achieve the benefits that the venture can provide. Moreover, through the joint participation of two or more companies, firms may obtain economies of size or efficiencies in manufacturing that would otherwise not be available. Such benefits may make the difference between successful U.S. competition and conceding markets to more efficient foreign producers.

However, Mr. President, under the current antitrust damage system, the threat of private treble-damage actions, however ill-founded, may discourage firms in the same industry from entering into such ventures. The perception of serious antitrust risk may make firms hesitant to build joint facilities to exploit new technology.

Mr. President, in 1984 the Committee on the Judiciary was confronted with many of the same concerns regarding joint research and development of technology. At that time, the committee forwarded to the Congress a carefully crafted approach in the NCRA to encourage research and development. The NCRA has two major features: First, the NCRA guarantees that joint research and development ventures, if they are ever called into question under the antitrust laws, will be analyzed under the rule of reason standard so that the competitive benefits of such ventures may be considered; and, second, antitrust liability with respect to a joint venture disclosed to the Government under the NCRA is limited to actual damages plus prejudgment interest.

The NCRA has been very successful, Mr. President. It has removed a potential deterrent to procompetitive projects while leaving the antitrust laws in place as a safeguard against any possible anticompetitive conduct. It is my understanding that over 100 joint research and development ventures have been disclosed to the Department of Justice since the NCRA went into effect. Many of these joint efforts were, no doubt, encouraged by the reduction of potential antitrust damage liability.

Mr. President, this is a matter that calls for our prompt attention. The basic groundwork has already been laid in the crafting of the NCRA in 1984. We anticipate broad support for this important, narrowly tailored measure, and we urge that hearings be held at the first opportunity so that the Congress may enact this legislation without delay.

By Mr. CHAFEE (for himself and Mr. WILSON):

S. 1007. A bill to amend title 23, United States Code, regarding the reduction in apportionment of Federal-aid highway funds to certain States, and for other purposes; to the Committee on Environment and Public Works.

NATIONAL HIGHWAY FATALITY AND INJURY REDUCTION ACT

Mr. CHAFEE. Mr. President, today I am introducing the National Highway

Fatality and Injury Reduction Act of 1989.

The purpose of my legislation is simple and twofold: It seeks to save lives and reduce the injuries that result from car and motorcycle crashes. In addition, it seeks to decrease the staggering health care costs borne by our society because of highway crashes.

In order to achieve this goal, this legislation gives each State that does not have a safety belt law and a universal motorcycle helmet law, 3 years to pass such a law. A State which is not in compliance will lose 5 percent of its highway construction funds the first year it is not in compliance and 10 percent each year thereafter. This bill also provides $95 million in grants out of the Highway Trust Fund to States with safety belt and helmet laws that meet certain criteria for education and enforcement activities. An additional $5 million is made available to the National Highway Traffic Safety Administration [NHTSA] to assist the States in these activities.

In 1988, approximately 47,000 people were killed on our highways. This would be the equivalent of a major airplane crash killing 28 people every single day of the year. Approximately 4 million people were injured last year on our highways. Every 10 minutes someone dies in a traffic accident and every 8 seconds someone is injured. If you live to be 75 years old, the odds are you will experience on the average 5 police reported traffic accidents, and you will have a 10-percent chance of suffering a serious injury.

If we choose to do nothing more about highway safety, over 60,000 people will die every year by the year 2000 and over 85,000 will die every year by the year 2020 assuming the fatality rate stays the same and the number of miles driven increases at the projected rate. Injuries will nearly double as well by 2020.

Motor vehicle crashes are the leading cause of death for people from 1 to 44 years of age. Road trauma produces more paraplegics and quadriplegics each year in the United States than all other causes combined and it is a leading cause of new cases of epilepsy.

One of the major Federal responsibilities in the 1990's during the post-Interstate era must be the reduction of fatalities and injuries on our Nation's highway system. Over 2.5 million people have been killed on our highways since the beginning of the automobile, more Americans than were killed in all the wars our country has been involved in since that time. And many, many millions more have been injured. This is a tragedy, and it is one of the largest public health problems our country is facing today.

This is also an economic burden we cannot afford at the Federal, State or local level. Motor vehicle injuries and fatalities occurring in 1986 accounted for at least $29.5 billion in present and future costs. Included in this total are $16.4 billion for lost productivity, $4.1 billion for medical costs, and $9 billion for insurance administration, legal and other costs. This does not include $27.4 billion in property damage. Based on the cost of $29.5 billion, the injuries and fatalities that could have been avoided in 1987 in those States that did not have motorcycle and safety belt usage laws would have resulted in a total present and future cost savings of $675 million. There is a growing body of evidence that many of the costs of motor vehicle injuries are being borne by the public.

Mr. President, the evidence is clear that the use of safety belts and helmets saves lives and reduces the severity of injuries. Through research done by NHTSA and others, models have been developed that show that safety belts reduce the risk of being killed by about 45 percent, and motorcycle helmets reduce it by about 29 percent.

Safety belts have saved 15,200 lives from 1983 through 1988. More than 10,300 of those have been credited directly to safety-belt use laws. If all front seat occupants had worn seat belts, it is estimated that 15,000 lives would have been saved in 1987.

Motorcycle helmets saved an estimated 4,645 lives from 1982 to 1987. If all motorcyclists had worn helmets during this time, approximately 9,030 lives would have been saved.

And helmets and safety belts have saved tens of thousands of people from serious injuries.

A study done in North Carolina after it enacted a safety belt law in 1985 indicated that a reduction of approximately 1,100 severe or fatal injuries per year can be attributed to the safety belt law in North Carolina.

Texas' experience shows that after its helmet law was repealed in 1977 the number of fatalities and injuries increased dramatically. Texas recently passed a motorcycle helmet law.

Mr. President, safety belt and motorcycle helmet laws increase usage.

Over 30 countries have passed mandatory safety-belt use laws. The United States is virtually the only developed nation that has not passed national safety belt legislation. Other countries report a dramatic increase in use after a safety belt law is passed. In Canada belt use increased from 30 percent to 76 percent after a national law was passed. After England passed a law, belt use increased from 37 percent to 93 percent.

New York was the first State to pass a safety belt use law in 1984. Approximately a year after the first safety belt law was passed, national usage rose to 27 percent, compared to 13 percent in 1984. Today it is 46 percent nationwide. Much of that increase is due to the safety belt use laws passed by 33 States and the District of Columbia. NHTSA estimates show that in States with safety belt use laws, 52 percent buckle up while only 37 percent do so in States without laws.

The effect of motorcycle helmet laws on usage is even more dramatic. In 1984, helmet use rates for areas with mandatory laws were over 98 percent for all riders. In locations with no or limited use laws, the rates were 51.3 percent for drivers and 34.8 percent for passengers. Twenty-two States, the District of Columbia and Puerto Rico now have universal motorcycle laws. An additional 23 States require helmets under a specified age, usually 18. One State requires passengers to wear helmets.

Between 1966 and 1975 when helmet laws were enacted, the motorcycle fatality rate per 10,000 motorcycles fell from about 13 to less than 7. But from 1976 to 1979 during which time 27 States repealed or weakened their helmet laws, the death rate rose from 7 to about 10 persons for every 10,000 motorcycles.

Mr. President, the cost of not using safety belts and helmets is very high. The loss of life and the effect of serious injury is tragic enough, but in addition, look at the costs that are being borne by the public through rising medical costs, motor vehicle and health insurance premiums, public assistance programs for medical care and long-term rehabilitation, and Social Security survivor benefits. Of the leading causes of death, road-related trauma is second only to cancer in economic burden.

Michigan experienced an 11.6-percent decrease in injuries the first 6 months after it passed a safety belt law. There was also a significant reduction in the rate of fatalities for front seat occupants during this time. The annual injury cost savings for Michigan is over $40 million, and over $85 million was saved annually as a result of the reduction in fatalities.

A study of accident claims paid by League General Insurance Co. in Michigan showed that after Michigan's mandatory safety belt law was in place, injury claims in 1987 dropped 25 percent over the previous year and 15 percent since the law took effect in July 1985.

In an example of who increasingly is paying medical costs, a study of 105 motorcycle trauma patients seen during 1 year at the Harborview Medical Center in Seattle showed that 63.4 percent of the initial medical care costs were paid for by public funds. None of the victims were receiving public assistance prior to the accident but became eligible because of anticipated long hospital stays.

Data on Texas' experience analyzed by the Texas Department of Health and the Department of Public Safety

shows that unhelmeted riders averaged twice as many days in the hospital as helmeted riders and the average hospital charge for unhelmeted cyclists was nearly 2.5 times greater than for helmeted cyclists. Forty-one percent of the unhelmeted cyclists, compared to 27 percent of the helmeted cyclists, had no hospital insurance.

Finally, Mr. President, this is not an individual liberty issue. Driving on our highways is a privilege, not a right. Every level of government has a responsibility to see that the road system is designed as safely as possible, and that those who use it do so as safely as possible.

The constitutionality of motorcycle helmet and safety belt laws have been upheld by the courts. A Massachusetts lower court opinion upheld by the Supreme Court make the argument well:

While we agree with plaintiff that the act's only realistic purpose is the prevention of head injuries incurred in motorcycle mishaps, we cannot agree that the consequences of such injuries are limited to the individual who sustains the injury . . . The public has an interest in minimizing the resources directly involved. From the moment of the injury, society picks the person up off the highway; delivers him to a municipal hospital and municipal doctors; provides him with unemployment compensation if, after recovery, he cannot replace his lost job, and, if the injury causes permanent disability, may assume the responsibility for his and his family's subsistance. We do not understand a state of mind that permits plaintiff to think that only he himself is concerned.—Simon vs. Sargent.

It is time to take action. Education programs are crucial. Enforcement of these laws is absolutely necessary and increases their effectiveness. Additional funding would benefit the State's efforts. But I am convinced having safety belt and helmet laws is by far the most effective way to save lives and reduce injuries.

Many States provide exemptions from safety belt laws for certain vehicles such as pickup trucks. While this legislation does not require States to make changes in their safety belt laws, it is my hope that they will consider reviewing their laws to provide this protection for everyone.

But the first step is to have a safety belt and motorcycle helmet law passed in every State. While highway construction sanctions are not the most popular mechanism, they are clearly the most effective. Our experience with the helmet law is a good example. After the safety standards were passed in the 1966 Highway Safety Act, all but three States passed effective helmet laws. When Congress prohibited the Department of Transportation from imposing sanctions in 1976, 26 States had repealed their laws by 1978 and as a result many people have been killed and seriously injured because people were given the message that they did not have to wear a helmet.

Training motor vehicle and motorcycle drivers is very important and must be emphasized as well. But no matter how good the training is, or how experienced the driver, there will always be crashes and in that moment when a crash occurs, it is the safety belt and the helmet which have the best chance of saving your life.

Mr. President, I hope my colleagues will join with me in supporting this legislation.

Mr. President, I ask unanimous consent that the following documents be placed in the RECORD following my statement: The text of the bill; a summary of the National Highway Fatality and Injury Reduction Act of 1989. A list of the organizations which support this legislation.

Summaries of:

The Economic Cost to Society of Motor Vehicle Accidents, 1986 Addendum, NHTSA.

A Model for Estimating the Economic Savings from Increased Safety Belt Use, NHTSA.

A Model for Estimating the Economic Savings from Increased Motorcycle Helmet Use, NHTSA.

M.J. Hannigan, commissioner, Department of California Highway Patrol.

The executive summary of "A Statewide Survey of Public Opinion on the Proposed Mandatory Safety Belt Legislation."

Testimony presented to the California Senate Transportation Committee.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 1007

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. This Act may be cited as the "National Highway Fatality and Injury Reduction Act of 1989."

SEC. 2. Chapter 1 of title 23, United States Code, is amended by adding at the end thereof the following new sections:

"Sec. 159. Motorcycle Helmets and Safety Belts.

"(a)(1) The Secretary shall withhold 5 per centum of the amount required to be apportioned to any State under each of sections 104(b)(1), 104(b)(2), 104(b)(5), and 104(b)(6) of this title on the first day of fiscal year 1992, if it is lawful in that State for any person:

"(A) to operate or ride a motorcycle without wearing a motorcycle helmet;

"(B) to occupy a front seating position in a passenger car without using a safety belt or child safety restraint while the vehicle is in forward motion; or

"(C) to act both as described in (A) and as described in (B).

"(a)(2) The Secretary shall withhold 10 per centum of the amount required to be apportioned to any State under each of sections 104(b)(1), 104(b)(2), 104(b)(5), and 104(b)(6) of this title on the first day of each fiscal year succeeding fiscal year 1992, if it is lawful in that State for any person:

"(A) to operate or ride a motorcycle without wearing a motorcycle helmet;

"(B) to occupy a front seating position in a passenger car without using a safety belt or child safety restraint while the vehicle is in forward motion; or

"(C) to act both as described in (A) and as described in (B).

"(b)(1) Any funds withheld under this section from apportionment to any State on or before September 30, 1993, shall remain available to such State as follows:

"(A) If such funds would have been apportioned under section 104(b)(5)(A) of this title but for this section, such funds shall remain available until the end of the fiscal year for which such funds are authorized to be appropriated.

"(B) If such funds would have been apportioned under section 104(b)(5)(B) of this title but for this section, such funds shall remain available until the end of the fiscal year for which such funds are authorized to be appropriated.

"(C) If such funds would have been apportioned under section 104(b)(1), 104(b)(2), or 104(b)(6) of this title but for this section, such funds shall remain available until the end of the third fiscal year following the fiscal year for which such funds are authorized to be appropriated.

"(b)(2) If, before the last day of the period for which funds withheld under this section from apportionment are to remain available for apportionment to a State under paragraph (1), the State makes effective a law which is in compliance with subsection (a), the Secretary shall on the day following the effective date of such law apportion to such State the funds remaining available to such State that had been withheld under the subsection.

"(b)(3) Any funds apportioned pursuant to paragraph (2) shall remain available for expenditure as follows:

"(A) Funds apportioned under section 104(b)(5)(A) of this title shall remain available until the end of the fiscal year succeeding the fiscal year in which such funds are so apportioned.

"(B) Funds apportioned under section 104(b)(5)(B) of this title shall remain available until the end of the second fiscal year succeeding the fiscal year in which such funds are so apportioned.

"(C) Funds apportioned under section 104(b)(1), 104(b)(2), or 104(b)(6) of this title shall remain available until the end of the third fiscal year succeeding the fiscal year in which such funds are so apportioned.

29-059 O-90-26 (Pt. 7)

Sums not obligated at the end of such period shall lapse or, in the case of funds apportioned under section 104(b)(5) of this title, shall lapse and be made available by the Secretary for projects in accordance with section 118 of this title.

"(b)(4) If, at the end of the period for which funds withheld under subsection (a) of this section from apportionment are available for apportionment to a State under paragraph (1), the State has not made effective a law which is in compliance with the applicable subsection, such funds shall lapse or, in the case of funds withheld from apportionment under section 104(b)(5) of this title, such funds shall be made available by the Secretary for projects in accordance with section 118 of this title.

"(b)(5) No funds withheld under this section from apportionment to any State after September 30, 1994, shall be available for apportionment to such State.

"SEC. 160. Motorcycle Helmet and Safety Belt Incentive Grant Program.

"(a) Subject to the provisions of this section, the Secretary shall make grants to those States which adopt and implement effective programs to increase traffic safety by ensuring that persons riding on motorcycles wear helmets and receive adequate rider training and that persons riding in other motor vehicles not only use safety belts and child safety restraints but use them correctly. Such grants may only be used by recipient States to implement and enforce such programs.

"(b) No grant may be made to a State under this section in any fiscal year unless the State enters into such agreements with the Secretary as the Secretary may require to ensure that such State will maintain its aggregate expenditures from all other sources for motorcycle safety programs, safety belt programs and child passenger safety programs at or above the average level of such expenditures in its two fiscal years preceding the date of enactment of this section.

"(c) No State may receive grants under this section in more than three fiscal years. In any fiscal year, the Federal share payable for any grant under this section shall not exceed 50 per centum of the cost of implementing and enforcing the programs under the grant.

"(d) Subject to subsection (c), the amount of a grant made under this subsection to any State which is eligible for a grant under subsection (e)(1) shall equal 30 per centum of the amount apportioned to the State for fiscal year 1989 under section 402 of this title.

"(e)(1) A State is eligible for a first-year grant if the State—

"(A) requires each person occupying a front seating position in a passenger car to use a safety belt or child safety restraint correctly;

"(B) requires each person riding on a motorcycle to wear a motorcycle helmet;

"(C) provides for a comprehensive community-based program to educate the public about motorcycle safety and safety belt and child safety restraint use, involving public health and education agencies, hospitals, and related organizations;

"(D) provides for a statewide police training program on the enforcement of helmet use requirements and safety belt and child safety restraint use requirements; and

"(E) provides for the monitoring of helmet use and safety belt use rates by methods that provide a measure of statewide usage.

"(2) A State is eligible for a second-year grant if the State—

"(A) meets the requirements of subsection (e)(1);

"(B) achieves a helmet use rate of 75 per cent and a safety belt use rate for front seat occupants of 50 percent.

"(3) A State is eligible for a third-year grant if the State—

"(A) meets the requirements of subsection (e)(1); and

"(B) achieves a helmet use rate of 85 per cent and a safety belt use rate for front seat occupants of 70 per cent.

"(f) There is authorized to be appropriated to carry out this section $25,000,000 for fiscal year 1991 and $35,000,000 per fiscal year for each of fiscal years 1992 and 1993, all out of the Highway Account of the Highway Trust Fund. Such sums shall remain available until expended. Approval by the Secretary of a grant with funds authorized by this subsection shall establish a contractual obligation of the United States for the payment of such grant."

SEC. 3. There is authorized to be appropriated to carry out public education and information activities in support of State and community motorcycle safety and safety belt and child safety restraint use programs $5,000,000 for fiscal year 1990, out of the Highway Account of the Highway Trust Fund. Such sums shall remain available until expended. Approval by the Secretary of Transportation of the payment of such sums shall establish a contractual obligation of the United States to pay such sums.

SEC. 4. The Secretary of Transportation may issue regulations to implement section 411 of title 23, United States Code.

SUMMARY OF THE NATIONAL HIGHWAY FATALITY AND INJURY REDUCTION ACT OF 1989

Section 1 is the short title.

Section 2 provides that any State which does not have in place a safety belt law for persons in the front seat of a passenger car, and a motorcycle helmet law by September 30, 1991, (three years after the date of enactment of this legislation) will lose five percent of its Interstate, Interstate 4R, Primary, Secondary and Urban highway apportionments.

Failure to pass a safety belt and helmet law will result in the withholding of 10 percent of a State's highway apportionments in each year following fiscal year 1992.

States which comply with this law by September 30, 1994 will have all apportionments returned which have not lapsed. Any apportionments withheld on or after October 1, 1994 will not be returned.

Section 2 creates a three-year incentive grant program to implement and enforce helmet and safety belt laws. Grants cannot exceed a 50 percent Federal match and will not be more than 30 percent of a State's FY 1989 402 apportionment.

A State is eligible for a first year grant if it:

(1) has a safety belt law for front seat passengers in passenger cars;

(2) has a universal motorcycle helment law;

(3) has a comprehensive community-based program to educate the public about motorcycle safety, safety belt use and child safety restraint use;

(4) has a monitoring system to determine statewide helmet and safety belt use.

A State is eligible for a second-year grant by meeting the additional requirement of achieving a helmet use rate of 75 percent and a safety belt use rate of 50 percent.

A State is eligible for a third-year grant by achieving a helmet use rate of 85 percent and a safety belt use rate of 70 percent.

This section provides $25 million in fiscal year 1991 and $35 million for each of fiscal years 1992 and 1993 out of the Highway Trust Fund for the grant program.

Section 3 provides $5 million out of the Trust Fund to NHTSA for public education and information programs in support of State and community motorcycle safety, safety belt, and child safety restraint use programs.

THE ECONOMIC COST TO SOCIETY OF MOTOR VEHICLE ACCIDENTS—1986 ADDENDUM

NHTSA estimates that the total economic cost to society of motor vehicle accidents was $74.2 billion in 1986. Included in this loss are medical costs, productivity losses, property damage, legal and court costs, insurance administration, emergency service costs, coroner and medical examiner costs, public assistance administration and government programs. These costs resulted from traffic accidents which caused over 46,000 deaths, 3.4 million injuries, and 45 million damaged vehicles. Tables 1 through 5 summarize economic costs by injury level and cost category.

Roughly $59.7 billion of the overall cost represents losses that could be reduced in a roughly proportionate manner if traffic accidents, injuries, and fatalities were to decrease. The remaining portion, totalling $14.5 billion, represents costs which are relatively fixed, i.e., that will not change in direct response to foreseeable changes in

the accident or injury rate. These costs include primarily insurance underwriting costs, which are the administrative costs of writing and maintaining insurance policies, and the cost of government agencies that were established to improve vehicle or highway safety.

The largest source of loss is property damage, which accounts for roughly $27.4 billion or 37 percent of the total cost. The high incidence of accidents that involve no personal injury (over 90 percent of all accidents) is responsible for this result.

Insurance expense is the second highest contribution to overall costs, totalling $20.9 billion and accounting for 28 percent of total cost. However, a substantial part of total insurance expense, roughly $14.2 billion, is a relatively fixed expense associated with insurance underwriting. The variable portion of insurance administrative expense totals $6.7 billion and represents only 11 percent of total economic costs that could be expected to vary with changes in the accident rate.

Among injury related costs, productivity losses account for $16.4 billion or over 22 percent of all costs while legal and court costs and medical costs each account for about $4 billion or roughly 6 percent of total costs.

Note that these cost estimates do not include any allowance for pain and suffering or value of life. They therefore only represent one portion—the monetarily tangible economic costs—of the total cost that is incurred by members of society due to motor vehicle accidents.

Note also that this updated estimate should not be directly compared to previous estimates. Changes in the basis for determining incidence makes comparison between this and previous cost estimates inappropriate for determining trends.

A MODEL FOR ESTIMATING THE ECONOMIC SAVINGS FROM INCREASED SAFETY BELT USE

1. INTRODUCTION

Safety belt usage is by far the most important step that vehicle occupants can take to protect themselves in the event of a crash. It has been estimated that wearing these devices increases a person's chance of surviving a crash by 45 percent, and of avoiding a serious injury by 50 percent. Unfortunately, only about 42 percent of all automobile occupants currently use their safety belts. This failure of nearly 60 percent of automobile occupants to use their belts results in approximately 8,700 additional deaths and 120,000 moderate to critical injuries each year. An additional 2,600 persons die and 31,000 are injured unnecessarily in light trucks and vans because of low belt usage. These needless deaths and injuries (those that could be prevented by proper belt use) cost society an estimated $6 billion annually in medical costs, lost productivity, and other injury-related expenses.

These costs, many of which are ultimately borne by state welfare and assistance programs, could be significantly reduced if safety belt usage were to increase. This report describes a method whereby individual states can estimate the deaths and injuries that could be prevented and the economic cost savings that could result if they take measures which increase safety belt use. This method basically involves a three step process: first, determining the incidence of death and injury now experienced in the state; second, determining the potential safety improvement through increased belt usage in the particular state; and thirdly, combining the potential safety benefits with their associated economic costs. The resulting estimates should provide a reasonable "order of magnitude" indicator of safety and economic benefits that could result from increased safety belt use. They should not, however, be characterized as a precise prediction of these savings.

A MODEL FOR ESTIMATING THE ECONOMIC SAVINGS FROM INCREASED MOTORCYCLE HELMET USE

I. INTRODUCTION

This paper provides a methodology that can be used with state specific crash injury data to estimate the safety and economic benefits that would result from taking measures which increase motorcycle helmet usage. In 1986, over 4,500 motorcycle riders were killed and roughly 170,000 were injured in crashes on our nation's highways. The loss of life and bodily injury resulting from these crashes is a major cause of personal grief and economic hardship for the immediate victims as well as their families and friends.

Motorcycles are the most hazardous form of motor vehicle transportation. While representing only 3 percent of all registered vehicles and accounting for only 0.5 percent of all vehicle miles traveled (VMT), motorcycle occupants make up nearly 13 percent of all occupant traffic fatalities. More than 80 percent of all motorcycle crashes result in injury or death to the motorcyclist. This increased fatality and injury rate is due to both a higher incidence of crash involvement and a higher risk of injury in the event of a crash. Motorcycles obviously lack many features found on most other vehicles such as safety belts and enclosed compartments which restrain and protect occupants in the event of a crash. In addition, motorcyclists suffer far more ejections—one of the more serious injury causing events during a vehicle crash.

Helmet usage is by far the most important step that motorcycle riders can take to protect themselves in the event of a crash. It has been estimated that wearing a helmet can prevent over 60 percent of all serious and fatal injuries to the head region, which accounts for roughly 40 percent of all serious injuries. This added protection increases a person's chance of surviving a crash by 27 percent, and of avoiding a serious injury by 13 percent. Unfortunately, only about 59 percent of all motorcycle riders currently wear helmets. This failure of over 40 percent of motorcycle riders to use a helmet results in approximately 700 additional deaths, 3,600 moderate to critical injuries and 3,300 minor injuries each year. These needless deaths and injuries (those that could be prevented by helmet use) cost society an estimated $300 million annually in medical costs, lost productivity, and other injury-related expenses.

These costs, many of which are ultimately borne by state welfare and assistance programs, could be significantly reduced if motorcycle helmet usage were to increase. This report describes a method whereby individual states can estimate the economic cost savings that could result if they take measures which increase helmet use. This method basically involves a three step process: first, the determination of the incidence of death and injury now experienced in the state; second, determining the potential for improvement through increased helmet usage in the particular state; and third, combining the potential safety benefits with their associated economic costs.

The resulting estimate should provide a reasonable "order of magnitude" indicator of safety and economic benefits that could result from increased motorcycle helmet use. It should not, however, be characterized as a precise prediction of these savings.

THE COSTS OF TREATING HEAD INJURED UNHELMETED MOTORCYCLISTS IN TEXAS

[June 1987—November 1988]

INJURY COSTS

Preliminary statistics indicate that 2,204 motorcyclists received a non-fatal head injury in Texas between June 1987 and November 1988. Of those whose helmet status is known (2173), 1,874 (86%) were unhelmeted.

In Texas, hospital and physician costs can be conservatively estimated at $17,172 per initial hospitalization for a head injured unhelmeted motorcyclist. Thus, the costs for initial treatment of these 1,874 can be conservatively estimated at over $32 million.

Of the unhelmeted motorcyclists who received a head injury during this time period, an estimated 3% (56) were discharged to a rehabilitation center or nursing home for continuing medical care. Estimating a daily charge of $400 per patient, charges would total $22,400 per day, or $672,000 every month for the 56 receiving care.

In a study by the Texas Department of Public Safety, in cooperation with the Texas Department of Health, involving 763 motorcycle patients in 18 hospitals across the state, 59% of the unhelmeted motorcycle accident patients did not have health insurance. Thus, a large percentage of initial medical costs is borne by the public sector and eventually by insurance rate payers.

FATALITY COSTS

Preliminary statistics indicate that there were 462 motorcycle fatalities in Texas between June 1987 and November 1988.

365 (80%) of those who died were unhelmeted.

Lost earnings of 365 persons (mostly males), whose estimated average age is 25 years, can be estimated to be more than $511 million at an expected average lifetime annual earnings of $35,053 per person.

Other costs associated with these fatalities have not been included.

Source Notes: Preliminary motorcycle injury and death statistics provided by the Department of Public Safety statistical division.

Calculations involving costs are based on assumptions and data from a variety of sources. For clarification or further information, contact David Zane, Texas Department of Health.

[From the National Highway Traffic Safety Administration, Dec. 1984]

IMPACT OF THE REENACTMENT OF THE MOTORCYCLE HELMET LAW IN LOUISIANA

SECTION IV—SUMMARY AND CONCLUSIONS

The repeal of the mandatory Louisiana helmet law and subsequent re-enactment provided the basis for systematic study and comparison of injury types and severity, fatalities, and costs associated with safety helmet use.

The study incorporated the time frames of June-September, 1981 (during the post-repeal period) and June-September 1982, subsequent to the re-enactment of the helmet law. Geographic study locations included Lake Charles, Baton Rouge, and New Orleans. Additionally, fatalities were stud-

ied for the entire state for both calendar years.

The Louisiana Highway Safety Commission provided general motorcycle accident data for both study years. This information was used as a data base in tracking motorcycle accidents and victims from the time of occurrence to final patient disposition.

Roadside observations were conducted to ascertain levels of compliance with the law. The mean use rate was 95.70%, which compares favorably with results from similar studies conducted in South Dakota (99.6%) and Kansas (99.7%) during periods of enactment of motorcycle helmet usage laws.

With respect to age and helmet use, it was found that younger riders involved in accidents in 1981 did not demonstrate a higher helmet usage rate than older riders involved in similar accidents, even though the repeal of the law did not exempt the under age 19 group from wearing safety helmets. This fact indicates the helmet laws aimed at younger riders are not directed toward an age group with decreased usage rates in accidents.

In both study years, data indicated that about 93% of drivers were male. Among all drivers, safety helmet usage increased from 46% in 1981 to a documented 72% (an observed 95.7%) in 1982. These data were abstracted from state accident reports and apply only to injury accidents—as noted previously, observational studies indicated a 95.70% compliance. This difference in usage rates suggests that non-helmeted riders experience a greater frequency of accidents than the motorcyle rider population-at-large.

As observed in roadside studies, not all helmeted riders used eye protection. The mean safety helmet usage among observed drivers was 95.6%, while the mean use of eye protection was 88.53%. Passenger use of eye protection was somewhat lower at 70.22%.

In terms of fatally injured motorcyclists, there was a significant decrease of 30% from 1981 to 1982, or a total of 40 fewer deaths in spite of a 5.9% increase in motorcycle registrations. Death certificates were located for 198 of the fatally injured cyclists in 1981 and 1982. The most common injury cited as the primary cause of death was head injury (55%).

It was also shown that whereas fatal head injuries occurred 2.2 times more often than fatal injuries before the law was reinstated, they occurred only as often as other injuries in 1982. Findings were just as dramatic in non-fatal accidents. Of 135 cases studied in-depth, 27% were head/face injuries classified as most severe in 1981, with only 8.7% noted as such in 1982. In terms of first, second, and third most severely injured body regions, head injuries decreased from 14% in 1981 to 10% in 1982 of total injuries. Combined data for both years demonstrate a rate of 285.71 head injuries per 1,000 helmeted injured riders as compared to 634.92 for non-helmeted motorcyclists. At AIS Level 3, head injuries increased by 500%, from a rate of 15.9 per thousand helmeted riders to 95.2 per thousand non-helmeted riders. AIS Level 4 was also significant at a 100% increase in the non-helmeted riders. AIS Levels 5 and 6 were significant at 100% and 1200% increases respectively in injury rates per thousand non-helmeted riders.

Financial impact of the re-enactment of the mandatory helmet law was also investigated. The average cost per accident decreased 48.61% from 1981 and 1982 with re-enactment of the helmet statute.

Dramatic differences were found in lengths of hospital stay between helmeted and non-helmeted riders in both study years. For 1981-1982, the combined average length of hospital stay for helmeted riders was 0.71 days while the average LOS for non-helmeted riders was 3.75 days. Such dramatic differences reinforce the effectiveness of mandatory helmet laws in decreasing severity of injuries.

Reduction of costs in 1982 was significant in all areas. While the reduction in property damages is not immediately traced to cause, the reduction in medical costs is clearly a function of reduction in the nature and severity of injuries, and thus, the length of stay and the amount of medical resources utilized. Length of stay declined 58.6% from 1981 to 1982, a statistically significant difference.

PROSPECTIVE STUDY OF THE EFFECT OF SAFETY BELTS ON MORBIDITY AND HEALTH CARE COSTS IN MOTOR-VEHICLE ACCIDENTS

(By Elizabeth Mueller Orsay, MD; Timothy L. Turnbull, MD; Mary Dunne, MD; John A. Barrett, MD; Patricia Langenberg, PhD; Charles P. Orsay, MD)

To assess the impact of safety belt use on the extent of injuries sustained in motor-vehicle accidents and the incurred health care costs, 1364 patients were prospectively evaluated at four Chicago-area hospitals. Of these, 791 (58%) were wearing a safety belt whereas 573 (42%) were not. The mean injury severity score for safety belt wearers was 1.8 ± 0.07 vs 4.51 ± 0.31 in those not wearing a safety belt. Only 6.8 of safety belt wearers required admission vs 19.2% of those not wearing a safety belt. Restrained occupants incurred mean charges of $\$534 \pm \$67$ compared with $\$1583 \pm \$201$ in unrestrained occupants. Thus, safety belt wearers had a 60.1% reduction in severity of injury, a 64.6% decrease in hospital admissions, and a 66.3% decline in hospital charges. Our findings demonstrate the significant societal burden of nonuse of safety belts in terms of morbidity and the cost of medical care.

Trauma resulting from motor-vehicle accidents (MVAs) represents a major challenge to our health care delivery system and a significant societal burden Motor-vehicle accidents are the leading cause of death in Americans aged 5 to 34 years and the seventh leading cause of death overall.[1] In 1982, an estimated 3.2 million people were injured in MVAs, of whom approximately 1.4 million were treated in emergency departments and 350,000 required hospitalization.[2] As a result of MVA-associated injuries, 1.3 million years of potential life before age 65 years were lost in 1984.[3] The overall economic loss to the United States attributable to MVAs in 1980 has been estimated to be $57.2 billion.[4]

The Department of Transportation postulates that universal use of safety belts would reduce MVA-related fatalities by 50% and injuries by 65%.[5] Previous studies, based on police reports[6] or National Highway Traffic Safety Administration records,[7] report a reduction of serious injury of belted front-seat occupants of 43% to 52%[6] and a decline in fatalities of 43%[7] To our knowledge, no prospective studies based on medical data have specifically attempted to assess the efficacy with which safety belt use may prevent injury from motor-vehicular trauma. We undertook the following prospective study to assess the effect of safety belt use on the extent of injuries sustained during MVAs as well as the economic impact of their use.

MATERIALS AND METHODS

During the period of Jan. 1 to July 1, 1986, data were collected on patients who presented after an MVA to the emergency department or trauma unit of four Chicago-area hospitals. Two of these hospitals (Mercy Hospital and Medical Center of Illinois Masonic Medical Center, Chicago) were urban community hospitals, one was a public inner-city hospital (Cook County Hospital, Chicago), and the fourth was a large suburban community hospital (Lutheran General Hospital, Park Ridge, Ill). These four hospitals were selected because they cover a wide geographic area within Cook County and a wide range of socioeconomic groups. In addition, the selected hospitals receive patients from a large assortment of urban crash settings, including expressways (high speeds) and city streets (lower speeds). Patients involved in MVAs that occurred in rural areas were not included.

All patients who presented with complaints referable to an MVA that had taken place within the previous 24 hours were eligible for inclusion. Pedestrians, bicyclists, motorcyclists, bus passengers, and those in trucks with more than two axles were excluded. Each weekday, the logs of each emergency department or trauma unit were reviewed in an attempt to identify any missed motor-vehicle injury cases. Cases thus identified were resubmitted to the examining physician with the medical record for completion and inclusions in the study.

Initial data were collected prospectively for all study subjects by the examining physician. The physician administered a structured questionnaire that included the following data: (1) determination of safety belt usage, (2) position of subject in vehicle, (3) mechanism of injury (front-end, rear-end, or broadside collision), (4) posted speed limit at location of MVA, (5) mode of transport to hospital, and (6) final disposition (discharge, transfer to another facility, admission to hospital, or death in emergency department). The examining physician also noted on the questionnaire if there was evidence of alcohol use, ie, clinical intoxication, a smell of alcohol on the breath, or an alcohol level. The data were then analyzed as yes/no variables. Alcohol levels obtained for legal use were sent to state laboratories; the

---

Footnotes at end of article.

results were not made available for the purposes of this study and therefore are not included. For all subjective data collected, independent confirmation was sought from paramedics, police, or others whenever possible.

The medical records (emergency and inpatient, if applicable) of all subjects were subsequently reviewed by a member of the research team. Additional collected data included the time of registration, nature of injuries, and payment status. An injury severity score (ISS) was then calculated based on the *Abbreviated Injury Scale Manual* (1985 edition).[8] A numerical score (1 to 5) is assigned to the severity of injury in each region; the squares of the three highest scores are then summated to obtain the ISS. Financial records were analyzed to determine the total hospital (excluding physician fees) and emergency department charges generated as a direct result of the MVA for each subject. The costs of consultants, admitting physicians, rehospitalizations, and rehabilitation were not included.

Study subjects were divided into two groups (restrained and unrestrained by safety belts) for the purposes of data analysis. Preliminary power calculations were made for an alpha of 0.05 and a power of 0.90 to detect a difference in ISS score of at least 0.5. The principal statistical test used were t tests for comparisons of means of continuous variables and x^2 tests for drawing inferences concerning proportions. Analyses of covariance and logistic regression analyses were performed to compare safety belt users with nonusers, controlling for possible confounding variables. The SAS statistical package on an IBM mainframe at the University of Illinois at Chicago was used to perform the analyses.

RESULTS

A total of 1364 patients were entered into the study. The mean age of the patients was 33.03±0.42 years (mean ±SEM); 52.5% were men, 63.6% were drivers, 24.6% were front-seat passengers, and 11.3% were back-seat passengers. There was no significant difference noted in the month patients sere seen (January through June), but there was a difference noted in the time they were registered; 37.1% were registered from 7 AM to 3 PM, 42.1% from 3 to 11 PM, and 20.8% from 11 PM to 7 AM (P>.001).

Seven hundred ninety-one patients (58%) claimed to be wearing safety belts, and 573 (42%) did not. Of those wearing safety belts, 603 (76.2%) were wearing a shoulder harness and lap belt, 121 (15.3%) were wearing a lap belt only, and in 67 (8.5%) the safety belt type was not known. Differences were noted between the two groups with respect to age, sex, and reported mechanism of injury. Safety belt wearers were slightly older, more often female, and more likely to be involved in a rear-end collision. In addition, safety belt users were less likely to have used alcohol and less likely to require transport by ambulance. The groups were similar with respect to the posted speed limit where the accident occurred (Table 1).

TABLE 1.—CHARACTERISTICS OF SAFETY BELT WEARERS VERSUS NONWEARERS

Characteristic	Safety belts: Yes (n=791)	Safety belts: No (n=573)	P [1]
Mean ± SEM age, y	35±0.5	31.9±0.7	0.004
Male (percent)	49.7	55.8	.028
Reported mechanism of injury (percent):			
Rear-end collision	40.8	26.2	
Front-end collision	24.1	37.6	
Struck broadside (passenger)	20.0	20.5	.001
Struck broadside (driver)	12.8	9.4	
Other	1.2	1.9	
Unknown	1.2	4.4	
Alcohol use (percent)	5.6	19.5	.0001
Ambulance transport (percent)	36.4	57.6	.0001
Posted speed limit (mph) (percent):			
<30	40.5	39.6	
30–45	39.6	35.1	
≧55	8.5	8.6	NS
Unknown	11.5	16.8	

[1] Percentages were compared by the Pearson x^2 test. Means were compared by the two-tailed t test. NS indicates not significant.

SEVERITY OF INJURY

The mean ISS for safety belt wearers was 1.8±0.07 as opposed to 4.51±0.31 for those not wearing safety belts ($P<.001$). Patients who had worn safety belts, whether they were drivers front-seat passengers, or back-seat passengers, fared significantly better than their unrestrained counterparts.

When the reported mechanism of injury was evaluated, striking differences in ISS were noted between safety belt users and nonusers in front-end collisions (2.15±0.18 vs 6.12±0.64, $P<.001$). Benefit was also provided by safety belts in broadside collisions, where restrained occupants had an average ISS of 2.01±0.14 as opposed to 3.6±0.34 for unrestrained occupants ($P<.001$). Smaller but significant differences in ISS were noted between the groups in rear-end collisions. Safety belt wearers had a mean ISS of 1.38±0.06 vs 2.47±0.14 for nonusers ($P<.001$).

Admission to the hospital may be another indication of severity of injury. A significantly greater number of unrestrained subjects required admission (including those who died in the emergency department). Only 54 (6.8%) of the total 791 safety belt wearers required admission. However, 110 (19.2%) of the 573 patients who did not wear safety belts required admission ($P<.001$). Thus, two thirds of patients who required hospital admission were not wearing safety belts at the time of injury. Significant differences in ISS between the restrained and unrestrained groups remained in both the admitted and discharged groups. Regardless of admission status, unrestrained occupants utilized significantly more hospital days than restrained occupants (1.2±0.2 days vs 0.4±0.08 days, $P<.001$).

When only the most severely injured patients are considered, ie, those with an ISS of 12 or greater, again, the overwhelming majority were unrestrained. Thirty-six (81.8%) were not wearing safety belts; eight (18.2%) were ($P<.001$). There were five deaths during this study, all among patients who did not wear safety belts.

Multivariate methods, including analysis of covariance and logistic regression, were used to assess the independent effect of safety belt usage on ISS scores, controlling for other variables. Since age, alcohol use, and type of accident were observed to be associated with safety belt use and also may be associated with the severity and cost of injury, they were assumed to be possible confounding variables. The posted speed limit was also included. Although there were sex differences in safety belt usage, there is no reason to believe that ISSs or costs should differ by sex, other factors being equal. Therefore, analyses of covariance were carried out comparing the ISSs of safety belt users and nonusers, with age in years, alcohol usage (yes or no), and type of accident (entered as dummy variables; front-end collision, rear-end collision, or other) as covariates. Results (Table 2) indicate that unrestrained patients had an ISS that was two points higher on average, even when all the confounding variables were controlled for. Alcohol users scored one point higher on average, as did patients who were involved in a front-end collision. Those in a rear-end collision had somewhat lower scores on average. Scores averaged higher with increasing age and slightly higher for a posted speed limit of 30 to 45 mph. Mean ISSs for restrained and unrestrained subjects were adjusted for differing values of the covariates in the two groups; safety belt wearers were observed to have a significantly lower adjusted mean ISS than nonwearers ($P=.0001$).

Logistic regression analysis was used to assess the association of safety belt use with severe injury, defined as an ISS of 12 or greater. Proportions of restrained and unrestrained subjects with severe injury were compared, using alcohol use and type of collision as covariates. Results (Table 3) indicate that the odds of severe injury were 4.8 times greater for nonusers of safety belts when other significant variables were controlled for. The odds ratio for front-end collisions was similarly large, while alcohol usage was not independently associated with severe injury. Since age was entered as a continuous variable, an odds ratio is not available. However, the proportion of patients with severe injury increased significantly with increasing age.

TABLE 2.—COMPARISON OF SAFETY BELT USERS AND NONUSERS ON INJURY SEVERITY SCORE AND COST [1]

Variable	Injury severity score [2]: Coefficient	Injury severity score [2]: P	Cost [3]: Coefficient	Cost [3]: P
Safety belt nonuse	1.88	0.0005	596.2	0.0005
Alcohol use	1.13	.0016	730.1	.007
Front-end collision	0.79	.0039	583.0	.005
Rear-end collision	−0.71	.0048	−381.7	.047
Posted speed limit, mph:				
30–45	0.74	.001	470.2	.0006
>55	0.51	.81	394.8	.17
Age, y	0.032	.0001	22.7	.0001

[1] Analysis of covariance.
[2] Adjusted mean±SD injury severity score was 2.42±0.23 for safety belt users and 4.30±0.22 for nonusers ($P=.0001$).
[3] Adjusted mean±SD cost was $912.80±$172.90 for safety belt users and $1508.90±$179.60 for nonusers ($P=.0005$).

HEALTH CARE COSTS

Significant differences were also found in the health care costs of safety belt users and nonusers. Unrestrained occupants incurred mean charges of $1583±$201, nearly three times the charges for restrained occupants ($534±$67, $P<.001$; Fig 1, right).

When the patient's position in the vehicle was evaluated, nonwearers consistently incurred higher charges than safety belt wearers (Fig 2, right). This difference reached statistical significance in drivers and front-seat passengers only. However, the number of back-seat passengers for statistical comparison was small (N=158).

Patients who did not wear safety belts who required hospital admission demonstrated a trend toward higher charges (Fig 3, right; $7250±$851 vs $5300±$603, $P=.076$), though the sample size was small (N=162). However, in patients who were dis-

charged or transferred from the emergency department, a significant difference was demonstrated, with restrained occupants incurring average charges of $175±$5 vs $228±$8 for unrestrained occupants ($P<.001$). This represents a 23.3% reduction in charges for safety belt wearers (Fig 3, right).

TABLE 3.—LOGISTIC REGRESSION RESULTS COMPARING SAFETY BELT USERS AND NONUSERS BY INJURY SEVERITY SCORE

Variable	Injury severity score>12		
	Odds ratio	95 percent confidence interval	>
Safety belt use	4.94	2.03–12.02	0.0004
Front-end collision	4.74	2.10–10.66	.0002
Alcohol use	1.59	0.68–3.74	.29
Posted speed limit, mph:			
30–45	1.94	0.91–4.15	.09
>55	1.43	0.37–5.58	.60
Age (20-year difference)	2.01	1.35–2.99	.006

Evaluation of payment status showed that the majority of unrestrained passengers either had no payment (49.2%) or were receiving governmental assistance (5% public aid, 3% Medicare). Of safety belt wearers, 57% had private insurance or were enrolled in a health maintenance organization, and 3% were covered by workman's compensation ($P<.001$, Fig 4).

Multivariate analyses were also conducted to assess the independent effect of safety belt use on health care costs, controlling for the covariates age, type of collision, posted speed limit, and alcohol usage (Table 2). The adjusted mean costs differed by about $600 ($P=.0008$); alcohol users incurred charges approximately $700 higher on average. Costs were higher in front-end collisions, lower in rear-end collisions, higher at 30 to 45 mph, and increased with the age of the patient.

COMMENT

This study suggests that safety belts provide a significant benefit in reducing injury and health care costs. We demonstrated a 60.1% reduction in severity of injury (51% after adjusting for other variables), a 64.6% decrease in hospital admissions, and a 66.3% decline in hospital charges (49% for adjusted means) in safety belt wearers. To our knowledge, this is the first study evaluating the efficacy of safety belt use in the United States based on medical data. By utilizing the ISS system, an objective assessment can be made of the number and severity of injuries in relation to safety belt use. Previous studies[6] and government reports[9] used police reports in assessment of injury. In this system, the police officer assigns the accident victim an injury score of A, B, C, or K (severe, moderate, minor, or fatal injury). Obviously, data obtained by this system are of questionable reliability. In addition, this study is unique in that it also assessed the hospital charges associated with the care of the injured motorist.

Actual hospital and emergency department charges were used to estimate health care costs in this analysis. These are conservative estimates, in that direct charges generated by pre-hospital emergency services, rehospitalizations, and rehabilitation were not included. Furthermore, indirect costs resulting from time lost from work, increased insurance premiums, and lost productivity of those who die or are permanently disabled by MVAs were not measured. Inclusion of these costs may have resulted in even greater differences in cost estimates. The cost to care for patients who required hospitalization was higher for those who did not wear safety belts, though statistical significance was not reached (Fig. 3, right). However, the sample size in this subgroup was small, suggesting a beta error. Larger sample sizes may demonstrate a statistically significant difference.

The four hospitals participating in the study were geographically scattered throughout Cook County to include a variety of roadways (highways and urban and suburban roads). Only rural roads were not represented. Baker et al,[10] however, stated that mortality from MVAs may be highest in areas of low population density; this suggests that we omitted from our sample roads responsible for high mortality from MVAs. The months of January through June were chosen to cover a variety of road conditions in winter, spring, and summer in Chicago. In addition, the four hospitals admit patients from a wide variety of socioeconomic groups, with an assortment of vehicles and driving habits.

Throughout this study, we relied on patient reporting and/or paramedic reporting of safety belt use. The actual safety belt use rate in Illinois at the time of the study was 36%.[9] Actual safety belt use may be appreciably different than reported, as it may be impossible to obtain physical evidence of safety belt use. Paramedics were asked to verify the presence or absence of restraint use at the scene. However, the accident victims were often out of their vehicles when the ambulance arrived. In only 23 of the 618 cases with patients transported to the hospital by ambulance was there disagreement on safety belt usage between paramedics and patients. If we assume, however, that restraint use is only overreported, ie, unrestrained patients stated that they were wearing a safety belt and not vice versa, then there would be an even greater benefit in reducing injury and cost if the true incidence were known.

It should be noted that only those patients who presented to the hospital following an MVA were included. Patients who did not present to the hospital, who presented over 24 hours following injury, or who went directly to the morgue were not included. In Cook County, paramedics must transport all seriously (or fatally) injured MVA victims to a hospital unless the patient has dependent lividity, rigor mortis, or decapitation, all unlikely events in traffic accidents. It is therefore unlikely that any fatalities were not included in the study due to direct transport to a morgue. The number of uninjured motorists who did not present to a hospital is unknown and is not available through the Department of Transportation.

Studies conducted in other countries, many of which assessed the effects of safety belt legislation, also demonstrate the benefit of safety belt use.[11–22] Henderson and Wood[11] reported a 25% decrease in predicted deaths in the year following safety belt legislation in New South Wales, Australia. In an evaluation of the Swedish experience, Mellbring et al[12] reported a reduction in the number of MVA victims admitted to hospitals following legislation despite a 40% increase in reported MVAs. In England, a retrospective study comparing the 12 months preceding and following the enactment of safety belt use legislation revealed a mean ISS of 4.94 before and 2.8 after the law. A 42% reduction in the number of front-seat occupants who required hospital admission and a 27% decline in the number of deaths following introduction of the law was reported.

In the United States, New York was the first state to pass a mandatory-use safety belt law. In the first nine months after the law was enforced, MVA fatalities decreased by 17%, resulting in the lowest highway fatality rate (per 100 million miles driven) in several decades.[3] In Illinois, where safety belt legislation took effect in July 1985, an estimated 55 to 60 lives were saved and 8000 serious injuries were prevented in the first year following enactment.[9] Nationwide, the National Highway Traffic Safety Administration reported that safety belt usage of fatally injured MVA victims was about half the usage of those whose injuries were less incapacitating.[23] Unrestrained occupants were 40% more likely to be injured in an MVA and twice as likely to require hospitalization as restrained occupants.[24]

Compulsory safety belt use legislation appears to be the most effective agent in increasing safety belt usage. Usage rates increased from just under 40% to 95% in England,[14] from 20% to 80% in Sweden,[12] from 15% to 90% in Australia,[15] and from 21% to 47% in New York state[25] after such legislation. Insurance incentives[26] and mass-media campaigns[27] have been ineffective in altering the rate of safety belt usage. Other efforts to promote safety belt usage, including safety belt pledge cards, incentive plans, and "awareness" programs have met with variable success.[28]

Mandatory safety belt use legislation has been a controversial topic in the United States. To date, 33 states and the District of Columbia have enacted such legislation, while two additional states had safety belt laws and later repealed them (Massachusetts and Nebraska). Worldwide, over 30 countries have passed mandatory-use laws. The United States is virtually the only developed nation that has not passed national safety belt legislation.[29]

The Department of Transportation estimated the cost to society of injuries sustained in MVAs at about $15.3 billion in 1980.[4] Our results indicate a 66.3% decreased cost attributed to safety belt use. If this reduction is applied to the estimated $15.3 billion, universal safety belt usage would save $10.1 billion each year. In our era of rising health care costs, the safety belt may be a very efficient mechanism for saving lives and reducing costs.

Society bears the burden of MVAs, not only in direct health costs but also in lost productivity of workers (indirect costs). There were over 11 million lost workdays for survivors of MVAs in 1985.[24] The administrative and overhead cost of motor-vehicle and health insurance premiums totaled nearly $13.8 billion in 1980.[4] Furthermore, in 1980, the federal government spent an estimated $7.5 billion and state and local governments spent an estimated $3.4 billion for MVA-associated expenses.[4]

This study analyzed automobile safety belt use and subsequent health care costs. Our data suggest that, in an urban setting, safety belt utilization was associated with decreased severity of injury from motor-vehicle trauma and reduced the medical care costs of injured motorists. This analysis in combination with existing evidence supports a more aggressive national posture toward safety belt usage for the benefit of both the individual and the American people.

This study was supported in part by the Illinois Coalition for Safety Belt Use, Springfield, Ill.

We thank Dorothy Bissell and Elizabeth Springer for their help in manuscript preparation. We are also grateful for the contributions made by the resident and attending staffs of the University of Illinois Affiliated Hospitals Emergency Medicine Residency and the University of Illinois Surgery Residency, without whose cooperation and efforts this study could not have been accomplished.

THE PUBLIC COST OF MOTORCYCLE TRAUMA

(By Frederick P. Rivara, MD, MPH; Barbara G. Dicker, MA; Abraham B. Bergman, MD; Ralph Dacey, MD; Clifford Herman, MD)

Despite the effectiveness of motorcycle helmet legislation, many states have repealed these laws during the last decade. Aspects often neglected by policymakers are who pays for the care of these victims and how much of this cost is subsidized by public funds. To determine the extent of this subsidy, we studied the cost of care of 105 motorcyclists hospitalized at a major trauma center during a 12-month period. Total direct costs for these 105 patients, followed up for a mean of 20 months, were more than $2.7 million, with an average of $25,764 per patient. Only 60 percent of the direct costs were accounted for by the initial hospital care; 23 percent of costs were for rehabilitation care or readmission for treatment of acute problems. The majority (63.4 percent) of care was paid for by public funds, with Medicaid accounting for more than half of all charges.) (*JAMA* 1988; 260:221-223)

Motorcycle trauma is an important cause of mortality and morbidity in the United States.[1] In 1985, four thousand four hundred twenty-three motorcyclists were killed, accounting for nearly one of every ten motor vehicle fatalities.[2] For every motorcyclist killed there are about 90 others who require medical care for the treatment of their injuries.[3] Well known to health professionals are the facts that most deaths and serious disabilities are due to head injuries,[4] that helmets significantly reduce the chances of death and disability,[5-7] and that compulsory helmet laws appreciably increase the proportion of helmeted motorcycle riders.[8] This knowledge led Congress in 1966 to enact legislation to withhold federal funds for highway construction from states without compulsory motorcycle helmet laws. The result was that by 1975 forty-seven states required all motorcyclists to use helmets, leading to a striking diminution in mortality rates.[6] Reacting to strong pressure from motorcycle rider groups, in 1976 Congress withdrew the authority of the Department of Transportation to withhold highway funds from noncompliant states. Twenty-six states promptly repealed or weakened their helmet laws.[8] These actions were associated with a 44 percent increase in motorcycle fatalities nationally between 1976 and 1979.[6]

In dealing with this issue, policy makers have tended to neglect an important aspect of motorcycle trauma: who pays for the costs of care.[9] Several studies have shown that a high proportion of motorcyclists lack insurance to cover the costs of their medical care, resulting in heavy subsidization by taxpayers.[6,10-12] These studies, however, have only considered the immediate period of hospitalization and have not explored subsequent costs for rehabilitation and home care, costs for support of dependents when an injured head of the household is not able to work, or indirect costs from lost productivity. We therefore examined all costs generated by injured motorcyclists treated at a major trauma center during a one-year period.

METHODS

Harborview Medical Center (HMC), Seattle, is the only level I trauma center serving the four-state area of Washington, Alaska, Idaho, and Montana. As a level I trauma center, HMC has resources available around the clock to care for any type of trauma emergency, including appropriate medical specialists, support services, and immediate operating room availability. Approximately 80% of the admissions are from King County (population, 1.4 million); an additional 20% are from the rest of the region. All injured motorcyclists admitted for care during 1985 were identified through the Harborview Trauma Registry, a computerized listing of all trauma admissions. Injury Severity Scores (ISSs) were calculated from the Abbreviated Injury Scale-1980 [13] using the method of Baker et al.[14] The Glasgow Coma Score (GCS) was calculated by the treating physician as described by Teasdale and Jennett.[15]

Direct costs of care were determined as those incurred by the study group during the follow-up period (mean, 20 months). Although there is a distinction between costs and charges,[16] payer-specific charges were used as a proxy for costs of care. Hospital charges and source of payment for the acute-care hospitalization, rehospitalization at HMC, or rehabilitation care at HMC were obtained from the hospital billing office. Costs for hospital care constitute 93% to 94% of charges. Charges for professional fees were obtained froim the billing office of the Harborview physician group practice. For patients who received rehabilitation care elsewhere, after consent was obtained the patient's family, treating physician, and treating facility were contacted to determine charges for care on discharge from HMC. Finally, a search by state personnel

[1] Footnotes at end of article.

was made of records for use of funds from Aid to Families of Dependent Children, Supplemental Security Income, the Division of Vocational Rehabilitation, and Medical Assistance (Medicaid) by the injured motorcyclists during the follow-up period. With the assurance that only aggregate data would be used, the study was approved by the institutional review board of the University of Washington.

Indirect costs were estimated using the human capital approach outlined by Rice et al [17] for a subset of the study population in whom the time lost from work as a result of the injury was known. Costs were based on age- and sex-specific national estimates of mean annual earnings in 1980. The estimates take into account the 1980 employment rates published by the US Bureau of the Census and described by Rice et al.[17] Earnings include the value of housekeeping services for women not in the labor force and for employed men and women. For individuals with fatal or totaly incapacitating injuries, indirect costs were estimated as the expected lifetime earnings for age and sex, discounted at the conservative rate of 6%.

RESULTS

One hundred eleven motorcyclists were treated for injuries at HMC during 1985. Medical records were unavailable for four patients, leaving 107 for review.

TABLE 1.—*Selected characteristics of motorcyclists admitted to Harborview Medical Center during 1985*

Characteristic	No. of motorcyclists (N = 107)
Sex:	
Male	91
Female	16
Mean age, Y	28.6
Injury Severity score:	
<14	52
14–25	39
25 +	16
Glasgow Coma Score:	
<9 (severe)	17
9–13 (moderate)	11
13–15 (mild)	72
Unknown	7
Mean length of stay, d	19.6
Outcome:	
Death	7
Persistent vegetative state/severe disability	18
Moderate disability/good recovery	82

TABLE 2.—COMPONENTS OF DIRECT COSTS

Type of cost	No. of motorcyclists	Total cost	Average cost	Percent of total
Acute-care hospitalization:				
Initial inpatient	105	$1637217	$15,592	60.5
Readmission	26	123,650	4,756	4.8
Rehabilitation:				
Harborview Medical Center	8	190,977	23,872	7.0
Other inpatient rehabilitation	9	309,211	34,357	11.4
Nonhospital charges:				
Skilled nursing care	5	41,099	8,220	1.5
Physician fees	105	360,621	3,434	13.3
AFDC/SSI [1]	4	12,972	3,243	0.5
Vocational retraining	3	5,832	1,944	.2
Equipment	11	16,875	1,534	.6
Transportation	14	4,942	353	.2
Home health care	4	1,847	462	.07
Total	105	2,705,244	25,764	100

[1] AFDC indicates Aid to Families With Dependent Children; and SSI, Supplemental Security Income.

PATIENT PROFILES

Characteristics of the injured cyclists are shown in Table 1. The majority of patients were men, with a mean age of 28.6 years. The mean length of stay was 19.6 days (range, one to 258 days). Nearly half of the patients (49%) had an ISS less than 15 while 15% had an ISS greater than 25. There were 61 patients (57%) with head injuries; in 33 patients these were mild, with a GCS between 13 and 15. Eleven patients had moderate head injuries, with a GCS between 9 and 12; head injuries were severe, with a GCS less than 9, in 17 patients. There were seven deaths; 18 patients were severely disabled or in a persistent vegetative state on discharge from the hospital.

DIRECT COSTS

Complete financial information was available on 105 patients (Table 2). Total direct costs for these 105 patients, followed up for a mean of 20 months, were more than $2.7 million, or an average of $25 764 per patient, Sixty percent of these costs were accounted for by charges for initial hospital care. Rehabilitation care accounted for an additional $500 188, or 18.4% of the total direct costs. Twenty-two patients had 26 readmissions for treatment of acutecare problems related to the initial injury, generating an additional $123 650 (4.6% of total) in charges. Non-hospital-related charges accounted for only 1% of all direct costs. The three patients with the most severe injuries accounted for 18% of the total direct costs; patients with severe head injuries had costs almost fivefold higher than those with moderate or minor head trauma.

TABLE 3.—SOURCES OF PAYMENT (N=105)

Source	Charges	Percent of total charges
Medicaid	$1,522,090	56.3
Other state/public funds	192,171	7.1
Federal AFDC/SSI [1]	12,972	
Division of vocational rehabilitation	5,832	
Military health care	60,060	
State reimbursement for indigent care	113,307	
Commercial	595,165	22.0
Self-pay	19,086	0.7
Other/unknown	367,732	13.9
Total	2,705,244	100.0

[1] AFDC indicates Aid to Families with Dependent Children; and SSI, Supplemental Security Income.

SOURCES OF PAYMENT

The majority (63.4%) of care of injured motorcyclists was paid for by public funds in one form or another, with Medicaid payments accounting for slightly more than half of all charges (Table 3). None of the victims were receiving public assistance prior to being injured. The patients qualified instead for the "medically indigent" category of Medicaid after admission in anticipation of a long hospital stay because of their serious injuries, resulting in $113,307 in charges reimbursed by the state. Injury-related disability also resulted in direct transfer of payments to three patients with Supplemental Security Income funds and to the dependents of two patients with funds from Aid to Families With Dependent Children. Three patients received state support for vocational rehabilitation training. Finally, one patient received part of his treatment in the military health care system. Commercial insurance plans accounted for 22% of charges, while less than 1% of charges were paid directly by the injured motorcyclist or his family.

TABLE 4.—HARBORVIEW MEDICAL CENTER (HMC) CHARGES AND INJURY SEVERITY

Injury severity score (No. of motorcyclists)	HMC charge	Average charge
1–8 (27)	$123,189	$4,563
9–15 (35)	387,812	11,080
16–24 (26)	561,751	21,606
25–34 (13)	506,747	38,981
35–49 (3)	365,322	121,744
50+ (1)	6,928	6,928
Total (105)	1,951,749	

DIRECT COSTS AND INJURY SEVERITY

As expected, average costs for care were directly related to injury severity (Table 4). More than half (59%) of the patients had injuries with ISSs of 15 or less. These patients, however, accounted for only 26.2% of acute-care hospital costs. There were 39 patients (37%) who had ISSs between 16 and 34; these patients accounted for 54.7% of acute-care hospital costs. The three patients with the most severe injuries (ISSs between 35 and 49) had an average direct cost of $121,744 and accounted for 18.7% of hospital costs. The patient with the most severe injuries generated a relatively small hospital charge because he died soon after admission.

The direct costs of care also varied directly with the severity of the head injury (Table 5). Patients with a GCS less than 9 had 4.7-fold higher average costs than did those with scores of 9 or more.

TABLE 5.—HARBORVIEW MEDICAL CENTER CHARGES AND GLASGOW COMA SCORE

Glasgow coma score (No. of motorcyclists)	Total charge	Average charge
<9 (16)	$750,976	$46,936
>9 (84)	835,727	9,949
Unknown (5)	365,145	73,029
Total (105)	1,951,848	

INDIRECT COSTS

The indirect costs, representing the value of lost output because of cessation or reduction of productivity caused by death or disability are shown in Table 6. The average losses from fatal injuries are somewhat low because of the inclusion of one 71-year-old man. This individual was an unusual motorcycle fatality by virtue of his age. Only 1.9% of patients with motorcycle injuries were 65 years of age or older and only 0.5% of motorcycle trauma victims dying in the United States in 1985 were aged 65 years or older.[2] If this individual is excluded, the average indirect cost from fatal injuries is $410,850.

Indirect costs were based on employment data available from 44 individuals at the mean follow-up time of 20 months. These represent minimal estimates of the lost productivity for the entire group. The total direct and indirect costs are thus conservatively estimated at more than $7.1 million.

TABLE 6.—INDIRECT COSTS FROM LOST PRODUCTIVITY

Cause of cost	No. of motorcyclists	Productivity losses	
		Total	Average
Mortality	7	$2,477,768	$353,967
Morbidity	44	1,924,335	43,735
Total	51	4,402,103	

COMMENT

At this urban level I regional trauma center, 64% of the total direct costs for motorcycle trauma victims in 1985 were paid by public funds. The study is consistent with prior studies. Acute-care hospital charges at the Massachusetts General Hospital from 1982 to 1983 for injured motorcyclists averaged $15,114.[11] The authors found that 46% of their 47 patients had no medical insurance. A study of charges for orthopedic injuries to motorcyclists in a level I trauma center in California found that 82.3% were paid from public funds.[10]

In addition to supporting these previous findings, our study extends them by examining charges for care beyond the initial hospitalization and by estimating the indirect costs of the motorcycle injuries. Follow-up care, rehabilitation care, and physician services accounted for an additional $1 million, or 39.5% of total charges. Because many insurance policies do not cover long-term rehabilitation or nursing home needs and because they provide limited coverage of outpatient expenses, most of these additional charges are paid by public funds.

Although indirect costs accrue mainly to the individual who is injured, they do reflect a societal cost. Society is not only deprived of the individual's contributions, but it may need to provide support to him or his family as well. The indirect costs arrived at in this study are not precise. They may be overestimated because they are based on age- and sex-specific national estimates of annual mean earnings. Since a disproportionate share of the sample lacked health insurance coverage, these individuals may have had jobs with below-average wages. On the other hand, the indirect costs are underestimates of the total since they are based on follow-up data from only a portion of the total group.

As a regional center attracting the most seriously injured patients, our population may not be representative of all motorcycle injury victims. However, these cost estimates, even if only representative of one region, are alarming.

There are many approaches that could be used to decrease the public cost of motorcycle trauma. One relatively easily implemented solution would be to require helmets. Although we did not compare helmeted and unhelmeted motorcycle riders, other studies have shown that motorcycle helmets are clearly effective in decreasing the severity of head injuries and in lowering the rate of fatal injuries. One study that compared the risk of death in a motorcycle crash of an unhelmeted rider with that of a helmeted rider on the same motorcycle found that the unhelmeted rider had a 27% greater chance of dying.[7] Other studies have documented that states with an enforced helmet law maintain a compliance rate of more than 90% while in states without such a law helmet usage remains at the 50% level.[18] Decreasing head injuries through a mandatory helmet law would therefore be expected to significantly reduce the costs of care.

The impact of the cost of motorcycle injuries on society was perhaps best expressed 16 years ago by a Massachusetts court:[19]

We cannot agree that the consequences of such (motorcycle) injuries are limited to the individual who sustains the injury. From the moment of injury, society picks the person up off the highway; delivers him to a municipal hospital and municipal doctors; provides him with unemployment compensation if, after recovery, he cannot replace his lost job, and, if the injury causes permanent disability, may assume the responsibility for his and his family's subsistence.

This study was supported by contract 6500-53379 from the Washington State Department of Social and Health Services, grant CCRO-02570-01 from the Centers for Disease Control, and contract N00014-84-C-0725 from the Office of Naval Research.

We would like to thank Susan Pilcher, RN, of the Harborview Trauma Registry for identifying the patients; Linda Carbone, Mike Matthews, and Mary Ann Olmstead for providing the hospital and physician charges; and the Washington State Department of Social and Health Services for providing the follow-up financial information.

DEPARTMENT OF HEALTH,
Providence, RI, May 12, 1989.

Hon. JOHN H. CHAFEE,
The U.S. Senate, Dirksen Senate Office Building, Washington, DC.

DEAR SENATOR CHAFEE: I am writing both as a physician and as Director of a Family Health Program with enthusiastic support for your proposed bill on seat belt and motorcycle helmet laws. Statistics and experience speak for themselves; injuries from use of motor vehicles is the most important cause of deaths and serious disabilities among children and young adults. Judged in terms of lost opportunity, productivity, and human suffering, these injuries may be our most important health problem. They're certainly a huge cost, both to families and to public finances.

We have proven by actual experience that both mandated helmet and seat belt use greatly reduces serious injuries. I have no doubt that the proposed legislation would quickly lead to state action, as we had in the early seventies. All of us concerned about the prevention of death and disability, especially among the young people of this country, applaud this proposal to mandate simple, direct preventive measures.

If we can assist you in any way with the data on injuries in Rhode Island or in the New England region, please do not hesitate to call.

Sincerely yours,
WILLIAM H. HOLLINSHEAD, M.D.,
Medical Director, Divisions of Family Health.

RHODE ISLAND MEDICAL SOCIETY,
Providence, RI, May 15, 1989.

Hon. JOHN H. CHAFEE,
U.S. Senator, Dirksen Senate Office Building, Washington, DC.

DEAR SENATOR CHAFEE: The purpose of this letter is to express the support of the Rhode Island Medical Society for your legislation requiring states to enact mandatory motorcycle helmet and automobile safety belt laws, or risk losing a portion of their federal highway funds.

Numerous scientific studies have clearly demonstrated the efficacy of both motorcycle helmets and automobile safety belts in saving lives and reducing the severity of traumatic injury to operators and passengers.

In addition to reducing the number of deaths and reducing serious injuries, passage of this legislation would mitigate the spiraling costs of medical care. A recent study in the Journal of the American Medical Association revealed that the vast majority of motorcyclists are medically uninsured. Thus, the cost of their hospitalization and rehabilitation is indirectly underwritten by taxpayers and the insured.

In short, the passage of these measures would save countless lives, prevent serious bodily injuries and reduce the expensive medical costs associated with traumatic injury. The Rhode Island Medical Society commends you for this initiative, and urges your colleagues in the Senate to join you to secure its passage.

Sincerely,
BOYD P. KING, M.D.,
President.

DEPARTMENT OF TRANSPORTATION,
GOVERNOR'S OFFICE ON HIGHWAY SAFETY,
Providence, RI, April 24, 1989.

Senator JOHN H. CHAFEE,
U.S. Senate, Dirksen Senate Office Building, Washington, DC.

DEAR SENATOR: After reading your proposed legislative draft, I want to applaud your idea of a mandatory helmet law and seat belt law. Withholding up to 10% of a state's Federal-aid highway construction funds will definitely force the states to enact these measures, which, I feel, are long overdue.

As you are aware, we have not been able to pass a seat belt law in the Rhode Island House for the last eight years. We were, however, the second state to pass a Child Restraint Law, which was raised in 1987 to include youngsters up to age thirteen.

Your idea of an incentive program to provide funds for education and for the enforcement of these laws is excellent. May I suggest that the law should require belting of front and back seat passengers. Also of real importance is the fact that 5 million dollars in Fiscal Year 1990 is not enough money to allocate. Under your present formula Rhode Island would receive only $25,000 to educate the public, too low a figure to be effective statewide.

The grant procedure is too stringent. If you are serious about a national helmet and seat belt law, then make the offer more attractice to the states by not making the eligibility requirements so difficult to meet.

Also there is a certain ambigiuty in my mind concerning the community-based program. Does the measure call for a program in each of the thirty-nine communities in Rhode Island?

I hope that I have been of some assistance to you in reviewing this bill and wish you success in enacting this legislation.

Sincerely,

EDWARD J. WALSH,
Chief Coordinator.

JANE MATTSON ASSOCIATES, INC.,
King of Prussia, PA, April 10, 1989.

JOHN H. CHAFEE,
Ranking Minority Member, Committee on Environment and Public Works, U.S. Senate, Washington, DC.

DEAR SENATOR CHAFEE: I applaud and support your concern for highway safety outline in your letter of March 29, 1989, and would be pleased to provide assistance any way possible.

Most of my work involves catastrophic medical case management. Over 50% of my cases are with persons with traumatic brain injury. I am asked to provide cost estimates to insurance companies on almost every case. Additionally, I testify as an expert providing expected lifetime costs, based on the individual case situation. Several years ago I developed ideal models of care and costs for those with traumatic brain injury for a very large HMO. I am also a Ph.D. candidate at the Heller School of Brandeis in health policy. Most interesting, in my course on public policy we just did mock testimony, and one of the topics was seat belt legislation.

I am aware that over two million people have survived motorcycle and automobile accidents. Much of my work is in Texas and Massachusetts which have repealed respectively helmet and seat belt laws.

Although I work with individual cases, when you add up the number of people whose lives have been irrevocably altered by these kinds of accidents since 1980, we are most assuredly in excess of 600,000 people. For the purposes of clarity, I have broken down the level of functioning into five areas:

(1) Persistent Vegetative State.—Those who start out in coma and remain in a persistent vegetative state, requiring maintenance care for the remainder of their lives. (Very few families can maintain them and most of these reside after awhile in special units in nursing homes. Those with only Medicaid and no funds have worsening levels of care.)

(2) Extremely Severe Dependency.—Those people spend a great deal of time in an ICU unit and still more in a rehab hospital. They need extensive services for many years. Most of these will need total care for the remainder of their lives, and most run out of health insurance funds, relying only on Medicaid and Medicare.

(3) Moderate Dependency.—Mostly severe behavioral problems. These people spend one to three years in ICU units and rehab hospitals. They still require caregiving in many areas and cannot generally function without supervision once released.

(4) Behavioral Dependency.—These people spend time in ICU units then several months in rehab hospitals. They generally bounce from program to program, and often wind up in institutions or on the streets. Most of them wind up with only Medicare and Medicaid funding.

(5) "Walking Wounded."—These are people whose time in hospitals vary from almost no time to a few months. They generally require a minimum of services but generally have a difficult time being productive for the rest of their lives.

It is impossible to determine exact breakdown or functional levels of persons with traumatic brain injury. Suffice it to say, however, that the following statistics would be true:

(1) 5,000 persons per year—persistent vegetative state
(2) 15,000 remain severely disabled
(3) 30,000 remain moderately disabled
(4) 8,000 have severe behavioral problems
(5) 14,000 walking wounded

Note:—There are still others who have head injuries and accidents who could fit into the last category, but have few, if any, initial costs.

My best estimate is that 50% of those with severe head injury start out with some form of commercial insurance, either Blue Cross/Blue Shield, HMO or a PPO. Another 15-20% might be Medicaid eligible. The remainder have no coverage at all. By the third year, 85% have no coverage; 60% of these might draw on Medicare/Medicaid.

The attached table, Hypothetical Needs/Cost for 1989, is a reasonable estimate of traumatic head injury costs today in the United States. The staggering needs/cost of $61 billion certainly would be mitigated with improved highway safety laws. Additionally, the taxpayer would find relief in reduced Medicare and Medicaid funding requirements. The above cost considerations do not speak of the family grief and hardships, as well as the loss of income that are part and parcel in head injury.

Of the almost 70,000 who are injured annually, 50,000 will never be productive again. The average profile for a person with traumatic brain injury is an age 27 male. We can look at the figures for lost wages in a number of ways. Each year there is approximately $1 billion lost in wages from these people. If we look at the years preceding 1989, we are probably talking about $10 billion in lost wages and at least $4 billion in Social Security Disability Income funds.

These figures have been adjusted for those states that have passed seat belt laws. With mandatory seat belt and helmet laws, the real change in costs among those with moderate and severe disabilities, as well as those who remain in a vegetative state would be enormous. If all states were to uphold these laws, it is believed that the real cost to the taxpayer might be cut by approximately 40%.

Sincerely,

JANE MATTSON,
OTR/L, CRC, CIRS.

Enclosure.

Hypothetical needs/cost for 1989

	Millions
I. Persistent vegetative state:	
5,000 first year at $250,000/year	$1,250
45,000 at $100,000/year maintenance	4,500
(Assume 50 percent cost reduction at 75 percent Medicare/Medicaid = $2,156,000,000/year.)	
II. Severely disabled injury:	
15,000 first year at $320,000/year	4,800
140,000 severe survivors at $150,000/year maintenance	21,000
(Assume 50 percent cost reduction at 75 percent Medicare/Medicaid = $9,675,000,000/year.)	
III. Moderate injury:	
30,000 first year at $250,000/year	7,500
60,000 ongoing maintenance at $180,000/year	10,800
180,000 minimum maintenance at $50,000/year	9,000
(Assume 50 percent cost reduction at 75 percent Medicare/Medicaid = $10,237,000,000/year.)	
IV. Behavioral problems:	
8,000 first year at $200,000/year	1,600
24,000 ongoing maintenance service at $180,000/year	4,320
40,000 minimum maintenance at $50,000/year	2,000
(Assume 50 percent cost reduction at 75 percent Medicare/Medicaid = $2,970,000,000/year.)	
V. Walking wounded:	
14,000 first year at $100,000/year	1,400
112,000 maintenance at $10,000/year	1,120
(Assume 50 percent cost reduction at 75 percent Medicare/Medicaid = $945,000,000/year.)	
Total annual estimated needs/cost.	61,865
Total annual Medicare/Medicaid	25,983

DEPARTMENT OF CALIFORNIA
HIGHWAY PATROL,
Sacramento, CA, March 8, 1989.

Mr. ANDREW MCGUIRE,
Executive Director, Mary Martin Trauma Center, San Francisco, CA.

DEAR MR. MCGUIRE: The Governor asked me to respond to your letter about California Highway Patrol motorcycle officers wearing helmets.

Since January, 1975, CHP motorcycle officers have driven more than 13 years and 80,819,309 miles without a fatality. We attribute this zero fatality rate to two important factors: training and helmet use. The CHP's fatality rate contrasts sharply with the 1986 national fatality rate for motorcycle riders of 36 deaths for each 100 million miles driven, as estimated by the National Federal Highway Administration.

The CHP has always trained its motorcycle officers. However, in 1968 we redesigned our motorcycle training program, placing more emphasis on defensive driving techniques that help officers avoid accidents. In the mid-1970s, the Department further enhanced its motorcycle training efforts by developing an intensive three-day program in which officers participate every two years. In addition, officers must receive eight hours of training every quarter at their local offices.

The CHP began using motorcycle helmets October 1, 1956. Since that time, CHP motorcycle officers have been required to wear helmets while operating Departmental motorcycles as a condition of their employment with the CHP. The before and after fatality rate results of wearing motorcycle helmets and participating in intensive training programs are shown below:

	Number Fatalities	Number of Miles Driven	Rate of Fatalities
1. Pre-Helmet (1/1/29–10/1/56)	47	112,563,488	41.75
2. Post-helmet (10/1/56–12/31/88)	23	219,571,669	10.47
3. Post-helmet/intensified training (1/6/75–12/31/88)	0	80,819,309	0

[1] Rate of fatalities for each 100,000,000 miles driven.

As motorcycle helmet safety technology improved over the years, the CHP purchased newer, safer helmets. Since 1970, it has been CHP policy to replace motorcycle helmets every five years to take advantage of new technology as well as to assure that helmets do not deteriorate because of age. All current CHP motorcycle helmets meet the 1985 Snell Foundation standards, which meet and exceed both the American National Standards Institute (ANSI Z90) and Department of Transportation (DOT-218) standards. The Snell Foundation is a nonprofit organization that developed the first helmet tests and established performance standards for helmets.

It also has been, and continues to be, CHP policy to replace any officer's helmet that has been impacted, even though it may have sustained no visible damage. The crushable liner of the helmet is designed for single impact protection and the integrity of the protection system of a helmet worn by a CHP officer must be fully maintained.

I have given you this rather lengthy history of the CHP's motorcycle officer training program and helmet use to substantiate my answer to your question—yes, CHP motorcycle officers should wear helmets; they must also be trained. The combination of training and helmet use has greatly reduced the fatal and injury accidents incurred by our motor officers.

I trust that this information has been helpful. I appreciate this opportunity to explain the life-saving effect helmets have had in the CHP. Please let me know if I can be of further assistance.

Sincerely,

M.J. HANNIGAN,
Commissioner.

A STATEWIDE SURVEY OF PUBLIC OPINION ON THE PROPOSED MANDATORY SAFETY BELT LEGISLATION, MARCH 29, 1989

EXECUTIVE SUMMARY

Methodology

A survey of 403 Rhode Islanders was conducted to determine attitudes towards safety belt and the mandatory safety belt law. Respondents were contacted through random digit dialing techniques. Sex and region were controlled for and call back procedures were utilized to minimize the likelihood of the sampling containing a disproportionate number of people more likely to be home.

Sample

A description of the sample is as follows:

Sex: Males, 48.4 percent; Females, 51.6 percent.

Region:

Blackstone Valley—23.3 percent, Burrillville, N. Smithfield, Smithfield, Woonsocket, Cumberland, Lincoln, Central Falls, Pawtucket.

Providence—17.6 percent.

Suburbs—23.3 percent, Cranston, Warwick, E. Greenwich, W. Warwick, Johnston, N. Providence.

East Bay—19.1 percent, includes Newport, Middletown, Portsmouth, Jameston, East Providence, Barrington, Bristol, Warren, Tiverton, Little Compton.

Southern R.I—9.7 percent, Exeter, No. Kingstown, So. Kinstown, Hopkinton, Richmond, Westerly, Charlestown, Narragansett, Block Island.

West—6.9 percent.

Age: 18–24, 14.9 percent; 25–34, 28.0 percent; 35–44, 23.6 percent; 45–59, 15.9 percent; 60 plus, 17 percent.

SUMMARY OF FINDINGS

How do Rhode Islanders feel about mandatory safety belt laws?

71.7% of all respondents favor mandatory safety belt laws (42.4% favor them strongly).

Who is more/less likely to favor mandatory safety belt laws?

The heavier the use, the more likely they are to favor mandatory safety belt laws. However, those indicating light usage while driving are split on the issue (47.9% favor, 48.7% oppose).

East Bay and South County residents are more likely to favor (79.2 and 76.9 respectively)

A higher percentage of women favor the law (76.4%—66%)

Those driving more than 20,000 miles per year are less likely to favor the law (64.3% favor)

Those who think safety belts are only somewhat effective, as opposed to very effective are less likely to favor the law (Very: 81.4% favor, somewhat: 64.4%)

More than 80% of those in the 45–54 and 60–64 age categories favor the law, while the least support comes from the 30–34 age group (64.3% favor) and the 40–44 age group (65.2% favor)

Respondents with 2 or more children are more likely to favor mandatory laws (roughly 80%)

Why do people oppose mandatory safety belt laws?

For all respondents, the strongest reason to oppose was the enforcement issue: 44.9% said it was a strong reason and 16.9% somewhat of a reason.

While respondents considered violation of rights to be a strong reason or somewhat of a reason for opposing mandatory seat belt laws, well over half of these people still favor such laws.

What are the effects of various arguments on mandatory safety belt laws?

The argument that non-usage of safety belts raises insurance rates was the strongest argument in persuading opponents of the law to be more inclined to favor it. Overall, 72% said that they would be much more or somewhat more likely to support mandatory safety belt laws based on that argument. Of those opposed to such a law, 36.5% said they would be much more or somewhat more likely to support the law if it affected the rates of health insurance costs. 60.6% said it made no difference.

When told safety belt laws were effective in increasing usage 81.7% of those opposed said it makes no difference and only 16.3% were much more or somewhat more likely to support (only 1.9% much more likely) mandatory seat belts laws

When told there were less deaths and injuries in states with laws, 63.8% said the argument made no difference, while 30.8% said they were much more or somewhat more likely to support the law.

The fact the Massachusetts repealed its mandatory safety belt law had little effect on respondents' opinions regarding a Rhode Island law.

The fact that 31 other states have a mandatory safety belt law made no difference to 89.4% of those opposing the law.

What effect will a mandatory law have on safety belt usage?

Overall, 78.2% said they would wear a safety belt always or most of the time (59.1% always) if a mandatory safety belt law existed.

Almost half of those opposing the law said they would wear a safety belt always or most of the time if such a law existed.

How strictly should laws be enforced?

Of all respondents, 79.9% felt the law, if passed, should be very or somewhat strictly enforced (very—47.5%). Those favoring the law favored stricter enforcement (90.3% very of somewhat with 54% very) and those opposed less strict (53.8% very or somewhat with 31.7% very).

Are safety belts needed with air bags?

41.2% felt they were needed, 14.4% responded no, while 44.4% did not know.

INTERIM HEARING OF THE SENATE TRANSPORTATION COMMITTEE, NOVEMBER 9, 1987, STATE CAPITOL, SACRAMENTO, CA,. ON MOTORCYCLE HELMET USE

Committee members: Wadie P. Deddeh, Chairman; Marian Bergeson, Robert G. Beverly, Jim Ellis, V. Ch., Cecil Green, Gary Hart, Quentin L. Kopp, Rebecca, Q. Morgan, Dan McCorquodale, Alan Robins, Newton R. Russell, John Seymour, Rose Ann Vuich.

Committee staff: Mehdi Morshed, Staff Director; Steven J. Schnaidt, Senior Consultant, Jone D. McCarthy, Committee Secretary. Reported by: Evelyn Mizak, Shorthand Reporter.

Chairman DEDDEH. Thank you very much.

Our next two witnesses are from the Motorcycle Safety Foundation, Mr. Peter Fassnacht and Dave Clark.

Mr. FASSNACHT. Thank you, Mr. Chairman and Committee Members. My name is Peter Fassnacht, and I am the Vice President of the Motorcycle Safety Foundation.

I might point out that I am an active motorcyclist, as is my wife and most of our friends.

I have with me today Mr. David Clark, who's our Director of Research. And we would both like to offer you some comments about the research observations that we have monitored and the issues relating to the subject at hand.

By way of background, the Motorcycle Safety Foundation is a national not-for-profit organization. Our national resource offices are located in Costa Mesa, California.

Our purpose is to improve the safety of motorcyclists on the nation's streets and highways. Our staff are active in the development and promotion of rider training programs that train in excess of 75,000 motorcyclists each year. They work in conjunction with various state government agencies to research and develop ways to implement effective operator licensing tests. They conduct program-related research, public awareness campaigns for motorists and motorcyclists alike.

This safety interest extends to the California citizens who operate some 700-plus thousand motorcycles registered in this State.

I'd like to provide to you some vital information that will contribute to your understanding of the use of helmets, but first I'd like to express policy concerning helmet use that is our Foundation's position.

The Motorcycle Safety Foundation and its member companies strongly recommend the use of a Department of Transportation (DOT) approved helmet—and from this point on, whenever I refer to helmets, we refer to an approved helmet. They do need to meet certain minimum standards—at all times when riding a motorcycle, scooter or moped.

Accident analyses show that head and neck injuries account for a majority of serious and fatal injuries to motorcyclists. Research also shows that, with few exceptions, head and neck injuries are reduced by the proper wearing of an approved helmet.

Adopting a law requiring helmet usage has been shown to raise the 40–50 percent voluntary helmet use level to that of over 90 percent. While the safety and economic benefits of such laws are obvious, the Board of Trustees of the Motorcycle Safety Foundation believes any decision to mandate a helmet usage should be made by the citizens and the Legislators of each State.

However, the Motorcycle Safety Foundation, in its commitment to programs to reduce accidents and injuries, will not oppose the mandatory use of helmets if the Legislature determines it is in the best interests of the State. Further, we will continue to require the use of helmets for all instructors and students participating in Motorcycle Safety Foundation courses and activities at recognizing training sites.

Helmet use, along with rider education, operator licensing and public awareness to prevent accidents from occurring, is an important component of a comprehensive motorcycle safety program. The Motorcycle Safety Foundation is committed to these programs and will continue to cooperate as an information resource with parties involved in motorcycle safety issues.

On the subject of any offsetting or disadvantages in the use of helmets, I'd like to offer some additional comments.

As you may have become aware, the mandatory use of helmets has generated considerable opposition. I do not wish to address the social issues of lawmaking; however, I feel it is necessary to address the misinformation spread by helmet and mandatory use law opponents.

These folks often try to make you believe that helmets cause neck injuries; they impair hearing; or they constrain vision, or cause overheating. These points are simply not supported in fact.

Without a doubt, not having a helmet in a crash or collision situation is far worse than having one, and most importantly, the simple truth is that no one has the ability to predict when they're going to be involved in a crash or collision. The logic is quite obvious, that wearing a helmet at all times is the most prudent approach. They can happen any time, some would say especially when you least expect it.

The primary cause of neck injuries, with or without a helmet, is the crash or collision that the unfortunate motorcyclist is involved in. And while we heard a great deal about the relative risks of the individuals involved in motorcycling, the most typical or dominating crash experience is one where an automobile driver somehow violates the path of the motorcyclist and causes the collision. So, the relative risk of the individual involved may be of little point when the cause of the accident may in fact be beyond the immediate control of the rider.

Helmets do reduce the sound level to the rider; however, they do this to all sounds. It's important for us to understand this, because it's a factor that you hear very often. In order for a rider to take advantage of sound to avoid collisions, that sound has to be louder than the other sounds around him. Just as I can hear you in this room, it's because your sounds are louder than the ambient sounds of the air conditioning, or the rumbling of the audience present.

If it is, as are the sounds here, you can hear it. Helmets do moderate or reduce the sound somewhat, but it does it to all sounds.

Helmets can reduce wind noise, which can be of significant benefit, and wind noise is a significant distracter to the driving task. So on the point of hearing, I'd like to say if you can hear it, you'll be able to hear it, and that helmets can reduce the wind noise that will permit you to hear some of those sounds around you that may or may not help you.

It's also very important to point out that research in motorcycle accident causes has not identified one instance where hearing something would have provided that rider with any kind of an advantage in having to deal with that collision or avoid that collision. Simply put, if you can hear the cause of the accident that's about to occur, it's too late. A helmeted rider can hear more than the insulated cars with stereos blaring, in any case.

The important point is that vision dominates the rider collision information gathering system. Most accidents that occur, occur with situations that occur or that develop immediately in front of the rider, which is well within their visual field. Which raises the issue of vision.

Helmets do not restrict a rider's ability to see, especially those situations most critical to the rider developing in front of him.

While it is true that helmets intrude slightly into the complete human visual field, they do so to protect the head regions, the vital face and temple regions, not to do anything other than that.

Senator RUSSELL. Question.

You're saying that the helmets do impair peripheral vision?

Mr. FASSNACHT. I'm saying that humans have the ability in their peripheral field, to see a very wide region. In some helmets, those that meet approvals, that can be in the immediate or the far reaching of the peripheral field. They can do that. They do that in order to protect that region of your face that is right adjacent to your eyes.

Senator RUSSELL. I thought we heard this morning that they are required to not protrude beyond the 4:00 o'clock area, which would be behind them in 180 degree peripheral vision.

Mr. FASSNACHT. That's true, but in terms of the maximum or the field that people are able to see, it does extend quite wide. It's very close to the limits of human vision.

Senator RUSSELL. With some slight reduction in peripheral vision.

Mr. FASSNACHT. I think a more important point, though, and this is very important to the traffic safety issue relating to whether or not a helmet intrudes into that field, is that they don't prevent the rider from moving his eyes. You are allowed to turn your eyes from one side to another, and more importantly, you are allowed to turn your head, as you would in your automobile, scanning mirrors, checking over your shoulder for other traffic. That's a task that's demanded of all of our drivers and should not be unexpected in a motorcyclist.

One of the issues raised is that of overheating, and another fact is that helmets do not cause overheating. When it's uncomfortably hot outside, it's uncomfortably hot, whether or not you're wearing a helmet, riding a motorcycle, or driving a car, walking down the street.

A recent study done by Bob Carpenter in "Road Rider" magazine, a respected editor who has a great deal of—intense respect for truth in motorcycling, shows quite clearly that while surface temperatures on a motorcycle helmet can get quite hot in the hot sun, and I quote:

"Temperatures inside a properly fitting helmet rarely rise more than one or two degrees above normal body temperatures."

And that helmet interior temperature tends to stabilize at or near body temperature even when it's colder, and it can be much colder, outside. So in most helmets, there is a beneficial heatrelated effect. The potential in those helmets can moderate against the potentially fatal effects of hypothermia, whose early stages are very much like alcohol intoxication.

We have with us today a video tape program prepared by Professor Hurt and his research staff at the University of Southern California as a part of their major research study done earlier this decade. It addresses the issues relating to helmet effectiveness, and it reviews specific case studies showing similar situations, riders under similar conditions, going to their destinations and being involved in similar crashes, one rider being without the benefit of a helmet, and the other being with the benefit of a helmet. It identifies quite clearly the positive effect that that has shown.

In the interests of time, I'm not able to show this film to you. However, I will submit it to the Committee. I urge you to review this privately or in your post-hearing considerations.

I also have with me for your review a Motorcycle Information Kit, published by and distributed by the Motorcycle Industry Council, who we work closely with, who incidentally are in favor of mandatory helmet use laws.

I'd like to now turn this portion of our presentation over to our Director of Research, Mr. Dave Clark.

Senator RUSSELL. May I just ask a question?

Would you share with us your training in statistical analysis?

Mr. CLARK. Certainly.

I have my Bachelor's Degree in mathematics, and my Master's Degree is in business administration, and I have an emphasis in quantitative methods and marketing.

Senator RUSSELL. Thank you.

Mr. CLARK. It is the Motorcycle Safety Foundation's belief that there are no significant disbenefits associated with helmet use. The major USC study, "Motorcycle Accidents Cause Factors and Identification of Countermeasures", provides strong evidence to this fact, and no substantial research has come to MSF's attention to the alternative.

While the research by Dr. J.P. Goldstein attests that helmet use increases the severity of neck injuries past a critical impact velocity to the helmet, based upon my experience and statistical work, I feel that the

technical problems are so great in this study that the results cannot be relied upon. These technical problems include very small and incomplete sample base, nonindependent variables, and based upon comments from Professor Harry Hurt, faulty equations and definitions within the report.

Furthermore, Leonard Evans and Michael Frick, representing the General Motors Research Laboratories, have reported major problems in this study within a recent helmet effectiveness study.

We have provided for your review a much more detailed evaluation of Dr. Goldstein's study.

Chairman DEDDEH. Excuse me.

Is the art of sampling and studying samples, and so on, is that an abstract, undisputable science? Or could you have two studies coming to different conclusions? Is that a possibility?

Mr. CLARK. I think that as far as sample sizes, that's a pretty definite science.

Chairman DEDDEH. It's the size.

Mr. CLARK. Right.

Chairman DEDDEH. You take 100 people here, but is it not true that within the science, even medicine, that you could have two physicians, or three or four, and they'll give you two, three or four different diagnoses of what the problem is with some person, or finding? Is that not a possibility.

Mr. CLARK. Well, perhaps to some extent, but I think that, for example, in this particular situation, there is only about 50 sample sizes that they were based upon, and I think that most statisticians would say that that would be a very, very small example to make a large involved study with.

Chairman DEDDEH. Is it possible for Dr. Goldstein to take Professor Hurt's findings and say they are flawed? Is that a possibility?

Mr. CLARK. Yeah, I mean, it's possible that they could find limitations in it.

Chairman DEDDEH. Sure.

Mr. CLARK. Sure.

Chairman DEDDEH. So then, what I am trying to get from you is that while I respect what Dr. Hurt's findings are, I have no reason personally to doubt Goldstein's findings, too, unless I am biased in favor of Hurt, or I am biased against Goldstein.

Mr. FASSNACHT. Independent of a bias for the results, a review of the research by our staff uncovered a considerable number of methodological flaws that caused us great concern, especially a study that has this kind of opportunity for impact that would be used for public policy making purposes.

I would feel uncomfortable with leaving you with the notion that it's simply a matter of professional opinion. There's large numbers of very respectable researchers now who do not feel at all comfortable with the methodology used by Dr. Goldstein in his economic research.

Senator RUSSELL. Are they comfortable with Professor Hurt's——

Mr. FASSNACHT. Yes, indeed. Recognizing that in just about any form of research undertaken, including today's research opportunity, that there will be limitations.

Chairman DEDDEH. That's fair. Go ahead.

Mr. CLARK. All right.

At this point, I'd like to also provide you statistics related to motorcycle use among the states, and the use and effectiveness of helmets; specifically how do accident, injury, and fatality rates vary among states with and without helmet laws. Can any differences among states be attributed primarily to the existence or nonexistence of a helmet requirement, or are there other factors which also could account for the variations?

Based upon our current reports from the Motorcycle Safety Foundation's annual survey of states, there were 5,023,780 registered motorcycles in the U.S. in 1986. And based upon our current information as of May, '87, there were 19 states, plus the District of Columbia, with full helmet laws. And this applies to all operators, whether they have high risk or low risk, and it's required for both operators and passengers.

These 19 states, plus District of Columbia, account for 35 percent of the '86 motorcycle registrations. Also, there are 26 states, including California, which have partial helmet laws, such as for minors only. And these 26 states account for 53 percent of motorcycle registrations. And finally, there are 5 states with no helmet laws at all, and they account for 12 percent of the motorcycle registrations.

A comparison of accidents, fatalities and registrations for states with full mandatory helmet laws versus states with partial or no helmet laws during 1985 and '86 provides some evidence as to the effectiveness of helmet laws. The most important indication of helmet law effectiveness from these statistics would be fatalities per 100 accidents. In 1986, fatalities per 100 accidents were 15.7 percent less in helmet law states than in non-helmet law states. In 1985, fatalities per 100 accidents were 7.6 percent less in helmet law states than non-helmet law states.

Fatalities per 100 accidents is by far the more important indicator than some of the others that you might use, such as accidents per 10,000 registrations or fatalities per 10,000 registrations, since the primary helpfulness of a helmet is to reduce the severity of an accident once it has occurred, rather than to prevent an accident from occurring.

There are various other factors that enter into the comparability of statistics between states, one being a difference in reporting policiies. These include differing property damage thresholds, various definitions of motorcycles for reporting accidents and registrations, and some estimated figures required for states not having the requested statistics.

Another important factor that can enter into differences in statistics includes differing traffic densities. If you have different traffic patterns and road conditions, it can affect the likelihood of severe motorcycle accidents between states as well as such things as helmet laws.

Due to these additional factors, one should not rely solely on comparisons between state statistics. One should also evaluate the results of many other research studies that are available concerning helmet effectiveness.

I'd like to bring to your attention a few of these other studies that we think are very interesting and provide strong evidence as to the effectiveness——

Chairman DEDDEH. I've got three more witnesses, and I've got 30 minutes.

Mr. CLARK. Okay.

One is called "Helmet Effectiveness in Preventing Motorcycle Driver and Passenger Fatalities", and it was written by Leonard Evans and Michael Frick of the Operating Systems Research Department for the General Motors Research Laboratories. It was written on October 30th, 1986. And they, in this report, they found that helmet effectiveness in preventing fatalities to motorcycle drivers and passengers was determined by applying what they call a double pair comparison method to the Fatal Accident Reporting System, or the FARS data, for 1975 through 1984. Motorcycles with a driver and passengers, at least one of whom was killed, were used. The method focuses on two occupants: a subject occupant and an other occupant. The probabilities of a fatality to the subject occupant——

Senator RUSSELL. Mr. Chairman.

Perhaps you could summarize the report rather than tell us the details of how they got to it.

Mr. CLARK. All right.

Chairman DEDDEH. Most of it has been stated by some other witnesses really.

Senator RUSSELL. Yes. Just give us the bottom line.

Mr. CLARK. Okay.

They found that helmets are 27, plus or minus 9, percent effective in preventing fatalities to motorcycle riders. Putting it a little more simply, this study indicates that over one-quarter of motorcyclists killed without wearing helmets would still be alive had they been wearing helmets.

A second study by the same authors, same organization, is called, "Motorcyclist Fatalities and the Repeal of Mandatory Helmet Wearing Laws." And in their study, they found that after repeal, motorcyclist fatalities increased more in the states which repealed their laws that in those that did not in 24 out of 26 cases, with the average effect being 25 percent, plus or minus 6 percent. And they concluded that the repeals of mandatory helmet wearing laws for motorcyclists were followed by substantial increases in motorcycle fatalities.

Furthermore, we have many—there's many other studies that have been done by individuals—many other studies have been done by individual states providing evidence as far as the effectiveness of helmet laws. Examples are Arizona, Minnesota and Wisconsin concerning the effects of the repeal of helmet laws in their states, and Louisiana concerning the effect of re-enactment of the helmet law.

Chairman DEDDEH. Mr. Ouellet gave us that information.

Do you have something new to add, because this is all in this report.

Mr. FASSNACHT. We just have one area concerning the ability of helmets to meet federal impact standards, if that's of interest.

We can skip to that——

Mr. CLARK. All right, fine.

I'd like to provide a few results from the Hurt Report as far as the ability of helmets to meet——

Mr. FASSNACHT. I suspect you've got that from Jim Ouellet.

Mr. CLARK. All right, then we'll go on to the last part, which has to do with the low cost versus more expensive models.

Based upon an interview of Dr. Jim Newman, who has done extensive helmet testing for the Bio engineering firm, Bio Kinetics and Associates, in Canada, there is very little difference in helmets in their protection abilities. In fact, on a 1-10 scale, he rated the cheapest helmet at 8, and the most expensive at 9.

Furthermore, similar views were expressed by Jim Ouellet and Dave Thom of the USC Traffic Safety Center.

Chairman DEDDEH. We've heard that before.

Mr. FASSNACHT. We have summaries of the research cited in our presentation, and I'm prepared for a review by the Senators.

Chairman DEDDEH. We'll take them as part of the record.

Senator RUSSELL. Are you leaving the video tape?

Mr. FASSNACHT. Yes, we are.

Chairman DEDDEH. Thank you, gentleman, very much. Whatever documents you have, you leave them with us for the record. Thank you.

By Mr. DURENBERGER (for himself, Mr. BURDICK, and Mrs. KASSEBAUM):

S.J. Res. 131. Joint resolution to designate November 1989 as "National Diabetes Month"; to the Committee on the Judiciary.

NATIONAL DIABETES MONTH

● Mr. DURENBERGER. Mr. President, I am pleased to introduce today with my colleague Senator BURDICK, Senate Joint Resolution 131 to designate November 1989 as "National Diabetes Month."

Since 1982, a joint resolution declaring November as "National Diabetes Month" has been passed by Congress and signed into law by the President. I have had the privilege of sponsoring this resolution for 6 of the last 7 years. Thanks to the dedication and support of the American Diabetes Association and its State affiliates, which use this resolution to help focus public attention on the significance of diabetes research and education, we have been able to help spread an important message about diabetes throughout the Nation.

Approximately 11 million people in America have diabetes, and many others have been touched by a family member, neighbor, or friend who has the disease. Only 6 million of those 11 million Americans know they have the disease, and it is for this reason the National Diabetes Month resolution is so important. These individuals must be identified and given the health care they need.

Diabetes cost the United States $20.4 billion annually in direct and indirect medical expenses, disability payments, lost productivity, and absenteeism. It is a leading cause of death in this country and the leading cause of new blindness in which over 5,000 people go blind every year. In addition, diabetes is the primary cause of nontraumatic foot and leg amputations, as well as kidney disease.

Minorities—especially native Americans, Hispanic Americans, and black Americans—face an increased risk of diabetes. For example, nearly 50 percent of the population in some Pima Indian tribes have the disease. Diabetes is one-third more prevalent in the black population than in the general population.

However, we can improve these statistics and reduce the human and economic cost of diabetes. How? Diabetes is unique among chronic diseases and disorders in that careful self-monitoring by the patient with diabetes can avoid the development of some of the most serious complications. Proper diet, exercise, and medication are essential to minimize these complications through the active and informed participation of the patient with diabetes.

As you may know, one of the leading State affiliates of the American Diabetes Association is located in my home State of Minnesota. Through their work, I have seen what a State affiliate can do for people with diabetes by fostering public awareness and education. Three Minnesota institutions—the University of Minnesota, the Mayo Clinic, and the International Diabetes Center—are leading centers for diabetes research. I am very proud that the ADA Minnesota affiliate and these three research facilities have contributed so much to the Nation and the State in the field of diabetes research.

The National Diabetes Month resolution can help increase public awareness and understanding of diabetes. This in turn can increase public support for diabetes research, help develop better methods of diagnosing and treating the disease, and help the 6 million undiagnosed people with diabetes in this country seek the proper medical attention they so urgently need.

Mr. President, I urge my colleagues to support this important resolution. I ask unanimous consent that the text of the joint resolution be printed in the RECORD.

There being no objection, the joint resolution was ordered to be printed in the RECORD, as follows:

S.J. RES. 131

Whereas diabetes is a leading cause of death by disease in the United States;

Whereas diabetes affects over 11 million Americans, of whom almost 6,000,000 are not aware of their illness;

Whereas diabetes costs the Nation $20,400,000,000 annually in health care costs, disability payments, and increased mortality due to diabetes;

Whereas up to 85 percent of all cases of noninsulin dependent diabetes may be prevented through greater public understanding, awareness, and education;

Whereas diabetes is particularly prevalent among Black Americans, Hispanic Americans, Native Americans, and women; and

Whereas diabetes is a leading cause of new blindness, kidney disease, heart disease, strokes, birth defects, and foot and leg amputations, all of which can be reduced by better public understanding and awareness of diabetes; now, therefore be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, that the month of November 1989 is designated as "National Diabetes Month." The President is authorized and requested to issue a proclamation calling upon the people of the United States to observe that month with appropriate ceremonies and activities.●

By Mr. SASSER (for himself, Mr. STEVENS, AND Mr. WILSON):

S.J. Res. 132. Joint resolution designating September 1 through 30, 1989, as "National Alcohol and Drug Treatment Month"; to the Committee on the Judiciary.

NATIONAL ALCOHOL AND DRUG TREATMENT MONTH

● Mr. SASSER. Mr. President, I rise today to introduce a joint resolution designating the month of September 1989 as "National Alcohol and Drug Treatment Month." This joint resolution is cosponsored by my colleagues from Alaska [Mr. STEVENS], Florida [Mr. GRAHAM], and California [Mr. WILSON].

The designation of this special month will encourage a focus on the positive contributions alcohol and other drug abuse treatment services provide in assisting those suffering from alcoholism and other drug addiction to recover and rebuild their lives. Treatment serves as the bridge from dependence to independence from alcohol and other drugs.

Because alcohol and other drug abuse are complex problems involving biological, psychological, and social factors, a variety of approaches are needed to break their grip on our society. Aggressive law enforcement can limit the availability of illicit drugs. Workplace programs and drug testing can motivate occasional users who have not responded to other approaches. A national alcohol and drug abuse strategy can control the impact on society of these severe cases and reduce the demand for illicit drugs.

Dependence on alcohol or other drugs is a chronic disease. A 1985 National Household Survey on Drug Abuse showed that approximately 23 million Americans currently use illicit drugs. Of these, more than 6.5 million people are severely dependent on heroin, other opiates, amphetamines, and cocaine. The majority of these persons cease to function in legitimate social roles and often engage in criminal behavior as part of their drug-using lifestyle. This group accounts for the bulk of the social and economic problems commonly associated with drug abuse and provides a continuing market for the illicit drug distribution system.

In addition, more than one-third of U.S. families are affected by alcoholism and an estimated 10 million Americans are problem drinkers or alcoholics. And alcohol abuse during pregnancy is one of the leading causes of mental retardation in infants and is the only preventable cause.

Acquired Immunodeficiency Syndrome [AIDS] has added a new urgency to the need to address the Nation's critical intravenous [IV] drug abuse problems. Because shared needles can transmit the AIDS virus, IV drug users constitute a growing percentage of the pediatric AIDS cases are related to IV drug use by one or both parents of the infant. Drug abuse treatment can reduce the rate of spread of AIDS to

minimize the tragedy of lives lost and the immense national economic costs.

Alcohol and other drug abuse treatment provides an effective means toward independence from substance dependence and is a necessary element in solving the problems associated with drug and alcohol abuse. Treatment can reduce criminality, as well as increase stable employment, progress in schools, healthy relationships, higher self-esteem and overall improvement in general health.

A broad coalition of constituency groups in the alcohol and drug field are urging the support of National Alcohol and Drug Treatment Month.

LIST OF GROUPS

Alcohol and Drug Problems Association of America.
American Academy of Pediatrics.
American Council for Drug Education.
American Medical Society on Alcoholism and Other Treatment Dependencies.
American Hospital Association.
American Psychological Association.
American Public Health Association.
Americans for Substance Abuse Prevention and Treatment .
American Youth Work Center.
Association of Labor-Management Administrators and Consultants on Alcoholism.
Center for Science in the Public Interest.
Children of Alcoholics Foundation, Inc.
Committee on Problems of Drug Dependence.
Families in Action Drug Information Center.
Health and Medical Council of Washington.
Legal Action Center.
National Association of Alcohol and Drug Abuse Counselors.
National Association of Addiction Treatment Providers.
National Association of Black Substance Abuse Workers, Inc.
National Association of State Alcohol and Drug Abuse Directors.
National Black Alcoholism Council.
National Council on Alcoholism.
Northeast Methadone Coalition.
Therapeutic Communities of America, Inc.

Mr. President, I urge my colleagues to support National Alcohol and Drug Treatment Month and help call attention to the positive contributions that substance abuse treatment can make to our Nation's efforts to decrease the demand for drug and alcohol. I ask unanimous consent that the text of the joint resolution be printed in the CONGRESSIONAL RECORD.

There being no objection, the joint resolution was ordered to be printed in the RECORD, as follows:

S.J. RES. 132

Whereas alcohol and other drug abuse and dependence are major public health problems that are preventable and treatable;

Whereas the economic costs to society of alcohol and drug abuse in 1983 alone were over $176,000,000,000;

Whereas alcohol and drug abuse treatment provides an effective means toward independence from substance dependence and is a necessary element in solving the problems associated with alcohol and other drug abuse;

Whereas more than one-third of the families of the Nation are affected by alcoholism and an estimated 10,000,000 Americans are problem drinkers or alcoholics;

Whereas alcohol abuse during pregnancy is one of the leading causes in the Nation of mental retardation in infants and is the only preventable cause;

Whereas over 70 percent of the pediatric acquired immunodeficiency syndrome cases are related to intravenous drug use by one or both parents of the infant;

Whereas drug abuse treatment is an effective way of preventing the spread of AIDS among intravenous drug abusers;

Whereas alcoholism and drug dependence are illnesses requiring prevention, treatment, and rehabilitation through the assistance and cooperation of a broad range of Federal, State, and local health, law enforcement, and social service agencies, families, employers, employees, and organizations concerned about alcohol and other drug abuse; and

Whereas despite our national policy goal of making treatment available to all who request it, the existence of waiting lists highlights the need to increase the availability and quality of alcohol and other drug treatment services: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That September 1 through 30, 1989 is designated "National Alcohol and Drug Treatment Month", and the President is authorized and requested to issue a proclamation calling upon the people of the United States to observe that month with appropriate ceremonies and activities.●

By Mr. SPECTER (for himself and Ms. MIKULSKI):

S.J. Res. 133. Joint resolution designating October 1989 as "National Domestic Violence Awareness Month"; to the Committee on the Judiciary.

NATIONAL DOMESTIC VIOLENCE AWARENESS MONTH

Mr. SPECTER. Mr. President, today I am introducing a joint resolution to designate October 1989 as "National Domestic Violence Awareness Month." This resolution is the successor of Senate Joint Resolution 371, which I introduced in the 100th Congress. I am joined in this effort by my colleague from Maryland, Senator MIKULSKI.

According to the U.S. Department of Justice, 95 percent of all assaults on spouses or ex-spouses from 1973 to 1977 were committed by males. In 1984, U.S. Surgeon General C. Everett Koop reported that domestic violence is the single largest cause of injury to women in the United States.

Domestic violence affects urban and rural women of all racial, social, religious, ethnic, and economic groups, and of all ages, physical abilities, and lifestyles. Therefore, it is fitting that we focus attention on the growing national tragedy of domestic violence, and demonstrate our support for those individuals and organizations working to address it.

Mr. President, the incidence of domestic violence nationwide is staggering. According to the National Coalition Against Domestic Violence, over 50 percent of all married women experience some form of physical abuse in their relationships. But the violence does not end there. A 1984 independent study by Ms. Lenore Walker, author of "The Battered Woman Syndrome," found that 53 percent of abusive husbands beat their children as well as their wives, and that this violence is frequently repeated. During 1986, the National Coalition members provided shelter to more than 311,000 women and children from their unsafe homes.

In my own State of Pennsylvania, the incidence of domestic violence is especially acute. Between July 1987 and June 1988, hotlines throughout the Commonwealth handled 128,362 abuse-related calls. The Pennsylvania Coalition Against Domestic Violence, headquartered in Harrisburg, PA, operates 39 shelters, 8 counseling centers and safehomes, and 12 hotlines throughout the Commonwealth. The Pennsylvania Coalition reports that during their 1987-88 fiscal year these facilities provided services to 63,197 persons, 51,239 of whom were victims of domestic abuse. The coalition members also provided 396,629 hours of counseling to victims and their children, and 147,424 shelter days to 17,409 battered individuals.

Statistics show that there is a growing need for such facilities. The Pennsylvania Coalition reported an 11-percent increase in the number of shelter recipients and a 7.9-percent increase in the number of counseling recipients during the 1987-88 fiscal year. The total number of victims seeking aid is expected to continue to increase. To address this need, the coalition plans to open three new shelters to serve Allegheny, Butler, and Huntingdon Counties in Pennsylvania.

Unfortunately, despite these extensive efforts, existing shelters are as yet unable to meet the needs of all the victims. The Pennsylvania Coalition reported that in fiscal year 1987-88, shelters were forced to turn away 8,639 women and children—an increase of 19.5 percent over the previous year's rejection rate. According to national statistics provided by the National Coalition Against Domestic Violence, for every woman sheltered, two women in need of shelter must be turned away due to lack of space.

Mr. President, I long have been concerned about the devastating effects of domestic violence on American families. As the former district attorney of Philadelphia, I have witnessed firsthand the tragic consequences of domestic abuse cases. Accordingly, I commend the efforts of the Pennsylvania Coalition Against Domestic Violence, the National Coalition Against Domestic Violence, the National Network for Victims of Sexual Assault, and similar

organizations that take such an active role in combating domestic abuse.

Mr. President, I ask unanimous consent that the joint resolution be printed in the RECORD.

There being no objection, the joint resolution was ordered to be printed in the RECORD, as follows:

S.J. RES. 133

Whereas it is estimated that a woman is battered every fifteen seconds in America;

Whereas domestic violence is the single largest cause of injury to women in the United States, affecting three million to four million women;

Whereas urban and rural women of all racial, social, religious, ethnic, and economic groups, and of all ages, physical abilities, and lifestyles are affected by domestic violence;

Whereas 30 per centum of female homicide victims in 1986 were killed by their husbands or boyfriends;

Whereas one-third of the domestic violence incidents involve felonies, specifically, rape, robbery, and aggravated assault;

Whereas in 50 per centum of families where the wife is being abused, the children of that family are also abused;

Whereas some individuals in our law enforcement and judicial systems continue to think of spousal abuse as a "private" matter and are hesitant to intervene and treat domestic assault as a crime;

Whereas in 1986, over three hundred and eleven thousand women, plus their children, were provided emergency shelter in domestic violence shelters and safehomes and the number of women and children that were sheltered by domestic violence programs increased by nearly one hundred thousand between 1983 and 1986;

Whereas for every one woman sheltered nationwide, two women in need of shelter may be turned away due to a lack of shelter space;

Whereas the nationwide efforts to help the victims of domestic violence need to be coordinated;

Whereas there is a need to increase the public awareness and understanding of domestic violence and the needs of battered women and their children; and

Whereas the dedication and successes of those working to end domestic violence and the strength of the survivors of domestic violence should be recognized: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That October 1989 is designated as "National Domestic Violence Awareness Month". The President is authorized and requested to issue a proclamation calling on the people of the United States to observe this month by becoming more aware of the tragedy of domestic violence, supporting those who are working to end domestic violence, and participating in other appropriate efforts.

By Mr. LEAHY:

S.J. Res. 134. Joint resolution to designate the week of October 1, 1989, through October 7, 1989, as "National Disability Awareness Week"; to the Committee on the Judiciary.

NATIONAL DISABILITY AWARENESS WEEK

● Mr. LEAHY. Mr. President, I am pleased to introduce today a joint resolution designating the week of October 1, 1989 as National Disability Awareness Week.

In its 1986 report, "Toward Independence," the National Council on Disability wrote:

People with disabilities have been saying for years that their major obstacles are not inherent in their disabilities, but arise from barriers that have been imposed externally and unnecessarily.

These barriers are forms of discrimination—in employment, housing, public accommodations, public services, transportation, and communication.

Last week, I joined 32 other Senators in sponsoring the Americans with Disabilities Act. The purpose of this historic legislation is to provide a clear and comprehensive mandate for the elimination of discrimination against persons with disabilities. Much of the work of the bill comes out of the National Council's report which recommended the legislation we introduced.

We can change the law—and it is my hope that we will pass the Americans with Disabilities Act this Congress—but we also must change the attitudes, the fear and misunderstanding that are so often the roots of discrimination. That is what my resolution seeks to do.

I want America's 37 million citizens with disabilities to be recognized for their abilities, not their disabilities. Every October, the Vermont Association of Business Industry and Rehabilitation [VABIR], coordinates a Vermont disability awareness day conference which does just this. The conference educates employers on how to hire, provide access and accommodate people with disabilities. Exhibitors display equipment and provide information valuable not only for hiring, but also for retraining employees who become disabled. I am proud to be an honorary chairperson of the Vermont Disability Awareness Conference because it helps change people's attitudes about disabilities, and more specifically, it helps to remove the barriers that prevent persons with disabilities from entering the workforce.

America's 37 million citizens with disabilities deserve an equal opportunity to fully participate in and contribute to this society. I hope you will join me in recognizing these rights by cosponsoring this important resolution.

Mr. President, I ask unanimous consent for the text of the joint resolution to be printed in the RECORD.

There being no objection, the joint resolution was ordered to be printed in the RECORD, as follows:

S.J. RES. 134

Whereas 37 million individuals in the United States have disabilities (such individuals are hereinafter referred to as "Americans with disabilities"), and over 25 percent of Americans with disabilities have more than one disability;

Whereas one out of every twelve individuals in the United States copes with some form of disability;

Whereas although nearly three out of every four individuals without a disability in the United States have at least a high-school education, the rate for Americans with disabilities is just slightly more than one in every two;

Whereas an American with a disability is two and one-half times as likely to have an income that falls below the poverty line than is a nondisabled individual in the United States;

Whereas the population of Americans with disabilities will increase dramatically over the next two decades as the ability of science of medical technology to prolong human life continually improves;

Whereas disabilities increasingly affect the people of the United States;

Whereas one working-age black American in every seven has a disability;

Whereas 31 million individuals in the United States have some form of activity limitation;

Whereas 8.2 million individuals in the United States have a visual impairment;

Whereas 17 million individuals in the United States have a hearing impairment;

Whereas 18.4 million individuals in the United States have an orthopedic disability;

Whereas 4.2 percent of all children under the age of 21 in the United States have a chronic activity limitation;

Whereas 3 percent of all school-aged children in the United States have a learning disability;

Whereas 50,000 school-aged children under the age of 18 in the United States have an emotional or behavioral disability;

Whereas 5 percent of American school-aged children in the United States have speech and language disabilities;

Whereas most Americans with disabilities recognize that Federal laws passed since the late 1960's have helped to give better opportunities to Americans with disabilities;

Whereas most Americans with disabilities strongly endorse efforts by the Federal Government to enhance the lives of persons with disabilities;

Whereas most Americans with disabilities are not alone in believing that individuals with disabilities should be protected by law from discrimination; and

Whereas the people of the United States can express their concern for all Americans with disabilities by recognizing such Americans' right to participate as integral members of our society: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the week of October 1, 1989, through October 7, 1989, is designated as "National Disability Awareness Week", and the President of the United States is authorized and requested to issue a proclamation calling upon the people of the United States to observe that week with appropriate ceremonies and activities.●

By Mr. PELL (for himself, Mrs. KASSEBAUM, and Mr. GORE):

S.J. Res. 135. Joint resolution to establish a National Commission on Human Resource Development; placed on the Calendar.

NATIONAL COMMISSION ON HUMAN RESOURCE DEVELOPMENT

Mr. PELL. Mr. President, today I introduce on behalf of myself, Mrs.

KASSEBAUM, and Mr. GORE a joint resolution to establish a National Commission on Human Resource Development.

This measure originally was introduced in the 100th Congress as Senate Joint Resolution 368, and hearings were held before the Subcommittee on Education, Arts and Humanities of the Committee on Labor and Human Resources. There are slight but important changes between this measure and Senate Joint Resolution 368. One of these changes reflects the interest shown in the Commission and its charter by the academic community and industry. We were asked to create a vehicle by which these two groups could formally associate themselves with the Commission and make a direct contribution to its activities. An Academic and Industry Advisory Council has been added to provide that opportunity.

The purpose of this Commission is straightforward and in my view highly important. It is intended that the Commission go to the American public in a series of regional meetings. By the use of surveys and open direct dialog, the Commission will ask what order to function at the upper limits of the capability that is each individual's by birthright. The Commission will solicit views from the public on the role of the individual, family, community and government in researching and implementing techniques designed to increase fulfillment of human potential. It assumes that it is a normal aspiration of all citizens to more completely realize their full human potential. It is accurate to say that the real health and wealth of our Nation is in the realized potential of its citizens.

There have been exciting scientific findings in regard to the extent of human potential. For example, there are findings concerning the role that the mind can play in influencing the body's immune system. We are approaching the point at which doctors and patients alike need to know if there is a practical role the patient can play in this regard. I don't know what the proposed Commission will find, but even the most modest increases in creativity and health can have large social and economic impact.

I suggest that every problem our Nation and the world faces will yield to solutions in direct proportion to the number of citizens who are actively seeking to achieve personal excellence, and believe that the techniques for attaining fuller potential can be identified.

It is a modest step for the Federal Government to establish this Commission. No appropriated funds are being requested. The Commission is charged to raise its own operating funds from private and foundation resources.

The Commission I propose would be composed of 25 commissioners to be appointed by the President and the Congress. The measure calls for citizens with specific training and experiences, and as far as practicable would reflect the ratio of women and men and the diversity of the population of the United States. They will range in age from high school students to the retired community.

The legislation acknowledges the belief that it is a shared responsibility of the individual, the family, the community and the Nation to provide knowledge, and opportunity to increase personal excellence and to fulfill human potential.

The Commission will seek out practical, proven techniques to improve human performance. With expert scientific advice, it will recommend a research agenda to investigate promising but unproven techniques.

The life of the Commission will be 2 years. One of the responsibilities of the Commission will be to communicate with State governments on the advisability of establishing State Commissions on Human Resource Development. It is anticipated that implementation of the findings and recommendations of the Commission will extend for many years beyond the life of the National Commission, and that the primary focus of this activity properly is at the level of State and local governments and of the individual.

The drafting of this legislation has been influenced from many sectors. In January 1987, a meeting was held with Dr. William Graham, Science Advisor to President Reagan, on the subject of a possible Presidential Commission on Human Potential. A series of follow-on staff meetings were helpful in developing ideas on such a Commission. In October 1987, Stephan Schwartz, author, founder and president of the Mobius Society, and Richard Gunther, California business man and philanthropist, provided a 10-page statement on the subject that had been compiled from a series of meetings over 6 months with 23 highly qualified individuals who gave their reasons why it was timely to establish such a Commission. Additionally, as word of the Commission legislation spread, I have received highly supportive mail on the subject. It appears that citizen support groups for activity of the Commission are quietly and spontaneously forming.

The measure calls for the Commission to communicate through appropriate channels with foreign governments about the establishment of counterpart Commissions in anticipation of international sharing of ideas and findings on techniques designed to increase fulfillment of human potential. There are global problems in which the United States should assume its fair share, but only its fair share, of the responsibility to find solutions.

The best ideas from citizens of all the nations—individuals functioning at peak performance as teachers, laborers, scientists, managers, all walks of life—will be required. This is the charge to the work of the Commission, this is my hope for the Commission.

The Commission will have to work hard to deliver on its responsibilities, but its work will be a very important first step, an investment, in assisting every individual who wants to, to give back to his family, her community, his nation, her world, the fruits of minds and bodies operating at the highest potential. This is the way that problems will be solved, people functioning at their fullest potential in an interdependent world.

I ask unanimous consent that the text of the joint resolution be printed in the RECORD.

There being no objection, the joint resolution was ordered to be printed in the RECORD, as follows:

S.J. RES. 135

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This resolution may be cited as the "National Commission on Human Resource Development Act".

SEC. 2. FINDINGS.

The Congress finds that—

(1) the health and wealth of the Nation is in the realized potential of its citizens;

(2) it is a normal aspiration of all citizens to more fully achieve their potential in body, mind, and spirit;

(3) techniques for attaining fuller potential of individuals can be identified;

(4) it is a shared responsibility of the individual, the family, the community and the Nation to provide the knowledge and opportunity to promote personal excellence and the highest levels of human potential;

(5) compulsive and addictive behavior, low self-esteem, high rates of teenage pregnancy, high suicide rates, and a weakened family structure arise in part from arrested or stunted development of human potential;

(6) the role of the individual in health maintenance and healing, complementing medical practices that treat symptoms and disease, has yet to be fully developed;

(7) teaching methods that inculcate a sense of enthusiasm, challenge, and accomplishment in achieving greater fulfillment of individual potential are desirable and achievable;

(8) the will of the citizenry to take responsibility for their lives, to push leadership to higher levels of performance, and to serve their community and Nation all may be enhanced by increased self-confidence achieved by development of personal excellence;

(9) there is a role for government to assist in research and education on techniques that promote the development of personal excellence and fuller realization of human potential; and

(10) increased fulfillment of human potential can contribute to—

(A) solving problems that separate people;

(B) cooperating in the interest of humankind; and

(C) strengthening world peace, security, tolerance, and fundamental human rights, and the promotion of economic and social progress and well-being for all peoples.

SEC. 3. ESTABLISHMENT.

There is established a Commission on Human Resource Development.

SEC. 4. DUTIES OF THE COMMISSION.

(a) IN GENERAL.—The Commission shall—

(1) advise the Congress, the President, and the American public on policies and programs designed to facilitate the fuller attainment of human potential;

(2) solicit views from the public on the role of the individual, family, community, and government in research, education, and implementation of techniques designed to more fully realize human potential;

(3) identify private and foundation financial resources to fund the operation of the Commission;

(4) establish a scientific advisory panel to assist in the evaluation of technologies and procedures calculated to assist in attaining higher levels of human potential;

(5) establish an academic and industry advisory council to assist in developing procedures to implement the findings of the Commission;

(6) communicate with State governments on the advisability of establishing State Commissions on Human Resource Development; and

(7) communicate with foreign governments and international organizations, after consultation with the Secretary of State, on the establishment of counterpart Commissions and prepare for an international meeting of such Commissions prior to the preparation of the final report required under section 6.

(b) ACADEMIC AND INDUSTRY ADVISORY COUNCIL.—Members of the scientific advisory panel established pursuant to subsection (a)(4), and the academic and industry advisory council established pursuant to subsection (a)(5) shall serve without financial remuneration.

SEC. 5. CENTER FOR HUMAN RESOURCE DEVELOPMENT.

(a) IN GENERAL.—The Commission shall establish an independent educational and scientific nonprofit entity, entitled the "Center for Human Resource Development" to receive contributions for the operation of the Commission, to perform such duties as may be assigned by the Commission, and to perform the duties of the Commission upon termination of the Commission.

(b) BOARD OF DIRECTORS.—The board of directors of the Center established pursuant to subsection (a), shall be selected by the Commission.

(c) VACANCY.—A vacancy in the board of directors of the Center shall be filled in a manner determined by the Commission.

(d) TERMINATION.—The termination of the Commission shall not effect the operation or existence of the Center.

SEC. 6. REPORT AND PROPOSAL.

(a) REPORT.—The Commission shall prepare and transmit a report to the President and the Congress within 18 months after funding for the operation of the Commission has been secured. The report shall describe the activities of the Commission and contain such recommendations as the Commission considers appropriate for individual, family, community and government action to more fully achieve human potential.

(b) PROPOSAL.—The Commission shall prepare and transmit to the President and the Congress a proposal for implementation of the recommendations of the Commission within 24 months after funding for the operation of the Commission has been secured.

SEC. 7. MEMBERSHIP OF THE COMMISSION.

(a) COMMISSION MEMBERSHIP.—The Commission shall consist of—

(1) 11 members appointed by the President, of which—

(A) 1 member shall be an individual with training and experience in extraordinary human performance research;

(B) 1 member shall be an individual with training and experience in the delivery of health care services as a physician;

(C) 1 member shall be an individual with training and experience in the field of higher education;

(D) 1 member shall be an individual with training and experience in the clergy;

(E) 1 member shall be an individual with experience in organized labor;

(F) 1 member shall be an individual with experience at the management level of business;

(G) 1 member shall be an individual who is retired;

(H) 3 members shall be from the general public; and

(I) 1 member shall be from an appropriate executive department; and

(2) 14 members appointed jointly by the Speaker of the House of Representatives and the President pro tempore of the Senate, of which—

(A) 1 member shall be an individual with training and experience in extraordinary human performance research;

(B) 1 member shall be an individual with training and experience in the delivery of health care services as a nurse;

(C) 1 member shall be an individual with training and experience in the field of education as a teacher at the pre-college level;

(D) 1 member shall be an individual with training and experience in the clergy;

(E) 1 member shall be an individual with experience in organized labor;

(F) 1 member shall be an individual with experience at the management level of business;

(G) 2 members shall be individuals with student high school status when appointed to the Commission;

(H) 4 members shall be from the general public;

(I) 1 member shall be a member of the Senate; and

(J) 1 member shall be a member of the House of Representatives.

(b) REPRESENTATION.—Insofar as practicable the Commissioners appointed by the President and the Congress shall reflect the diversity of the population in the United States.

(c) APPOINTMENTS.—The President and the Congress shall appoint the members of the Commission not later than 30 days after the date of the enactment of this resolution.

(d) VACANCIES.—A vacancy in the Commission shall be filled in the same manner as the original appointment was made. A vacancy in the Commission shall not affect the powers of the Commission.

(e) CHAIRPERSON.—The members of the Commission shall elect a Chairperson from among the members of the Commission.

(f) QUORUM.—14 members of the Commission shall constitute a quorum, but a lesser number may hold hearings.

(g) ORGANIZATIONAL MEETING.—The Commission shall hold an organizational meeting to establish the rules and procedures of the Commission not later than 30 days after all members are first appointed to the Commission and sufficient operating funds have been secured.

SEC. 8. COMPENSATION AND TRAVEL.

(a) COMPENSATION.—Each member of the Commission who is not an officer or employee of the United States shall be compensated at a rate established by the Commission not to exceed the daily equivalent of the annual rate of basic pay prescribed for grade GS-18 of the General Schedule under section 5332 of title 5, United States Code, for each day (including traveltime) during which such member is engaged in the actual performance of duties as a member of the Commission. Each member of the Commission who is an officer or employee of the United States shall receive no additional compensation.

(b) TRAVEL.—While away from their homes or regular places of business in the performance of duties for the Commission, all members of the Commission and nongovernment members of the Scientific Advisory Panel and the Academic and Industry Advisory Council shall be allowed travel expenses, including per diem in lieu of subsistence, at a rate established by the Commission not to exceed the rates authorized for employees of agencies under sections 5702 and 5703 of title 5, United States Code.

SEC. 9. COMMISSION STAFF.

(a) EXECUTIVE DIRECTOR.—The Commission shall appoint an Executive Director who shall be compensated at a rate established by the Commission not to exceed the rate of basic pay prescribed for level V of the Executive Schedule under section 5316 of title 5, United States Code.

(b) ADDITIONAL PERSONNEL.—With the approval of the Commission, the Executive Director may appoint and fix the compensation of such additional personnel as the Executive Director considers necessary to carry out the duties of the Commission.

(c) EXPERTS AND CONSULTANTS.—Subject to such rules as may be issued by the Commission, the chairperson may procure temporary and intermittent services of experts and consultants.

(d) PERSONNEL DETAIL AUTHORIZED.—Upon request of the chairperson, the head of any Federal agency is authorized to detail, on a reimbursable or non-reimbursable basis, any of the personnel of such agency to the Commission to assist the Commission in carrying out its duties under this Act.

SEC. 10. POWERS OF COMMISSION.

(a) HEARINGS.—For the purpose of carrying out this resolution, the Commission may hold such hearings, sit and act at such times and places, take such testimony, and receive such evidence, as the Commission considers appropriate. The Commission may administer oaths or affirmations to witnesses appearing before the Commission.

(b) ADMINISTRATIVE PROVISION.—Any member or employee of the Commission may, if authorized by the Commission, take any action which the Commission is authorized to take by this section.

(c) INFORMATION.—The Commission may secure directly from any Federal agency such information as may be necessary to enable the Commission to carry out this Act. Upon request of the Chairperson of the Commission, the head of such agency shall furnish such information to the Commission.

(d) RESEARCH SUPPORT.—The Commission may apply and receive funding for research from any Federal or State agency or private source to advance the purposes of this Act.

(e) GIFTS.—The Commission may accept, use, and dispose of gifts, grants or donations of money, services or property. Such gifts, grants, donations, services, and property may only be used to advance the purposes of this Act.

SEC. 11. DEFINITIONS.

For purposes of this Act—

(1) The term "Center" means the Center for Human Resource Development established pursuant to section 4(a)(4).

(2) The term "Commission" means the National Commission on Human Resource Development established by section 3.

(3) The term "Federal agency" has the meaning given to the term "agency" in section 551(1) of title 5, United States Code.

SEC. 12. TERMINATION.

The Commission shall terminate 30 days after submitting the final report required by section 5 unless other provisions are made.

Mrs. KASSEBAUM. Mr. President, I am joining Senator PELL as a cosponsor of a joint resolution establishing a National Commission on Human Resource Development. The purpose of this resolution is to establish the Commission and outline its structure and responsibilities. The resolution does not seek Federal funding for the Commission, which is to be supported by private contributions.

Senator PELL has a longstanding interest in efforts to develop and enhance human potential. As chairman of the Senate Education Subcommittee, Senator PELL has demonstrated a commitment to promoting excellence and achievement in all aspects of our educational system. This resolution would take these efforts one step further, as a principal task of the Commission will be to identify ways in which to promote and encourage personal excellence in all aspects of life.

I have had the opportunity to work with Senator PELL on a variety of education issues. It is always a pleasure, and I look forward to continued cooperation on this joint resolution and other Education Subcommittee matters.

ADDITIONAL COSPONSORS

S. 5

At the request of Mr. DODD, the names of the Senator from Michigan [Mr. LEVIN] and the Senator from Colorado [Mr. WIRTH] were added as cosponsors of S. 5, a bill to provide for a Federal program for the improvement of child care, and for other purposes.

S. 15

At the request of Mr. CRANSTON, the name of the Senator from Maryland [Ms. MIKULSKI] was added as a cosponsor of S. 15, a bill to amend the Public Health Service Act to improve emergency medical services and trauma care, and for other purposes.

S. 16

At the request of Mr. CRANSTON, the name of the Senator from Wisconsin [Mr. KOHL] was added as a cosponsor of S. 16, a bill to require the executive branch to gather and disseminate information regarding, and to promote techniques to eliminate, discriminatory wage-setting practices and discriminatory wage disparities which are based, on sex, race, or national origin.

S. 54

At the request of Mr. METZENBAUM, the name of the Senator from Oregon [Mr. HATFIELD] was added as a cosponsor of S. 54, a bill to amend the Age Discrimination in Employment Act of 1967 with respect to the waiver of rights under such act without supervision, and for other purposes.

S. 135

At the request of Mr. GLENN, the name of the Senator from Wisconsin [Mr. KOHL] was added as a cosponsor of S. 135, a bill to amend title 5, United States Code, to restore to Federal civilian employees their right to participate voluntarily, as private citizens, in the political processes of the Nation, to protect such employees from improper political solicitations, and for other purposes.

S. 198

At the request of Mr. HATCH, the name of the Senator from Vermont [Mr. LEAHY] was added as a cosponsor of S. 198, a bill to amend title 17, United States Code, the Copyright Act to protect certain computer programs.

S. 223

At the request of Mr. MOYNIHAN, the name of the Senator from North Dakota [Mr. CONRAD] was added as a cosponsor of S. 223, a bill to establish a grant program for research, treatment and public education with respect to Lyme disease.

S. 231

At the request of Mr. MOYNIHAN, the name of the Senator from California [Mr. CRANSTON] was added as a cosponsor of S. 231, a bill to amend part A of title IV of the Social Security Act to improve quality control standards and procedures under the Aid to Families With Dependent Children Program, and for other purposes.

S. 260

At the request of Mr. MOYNIHAN, the names of the Senator from California [Mr. CRANSTON], the Senator from Indiana [Mr. LUGAR], the Senator from Louisiana [Mr. JOHNSTON], and the Senator from Alabama [Mr. SHELBY] were added as cosponsors of S. 260, a bill to amend the Internal Revenue Code of 1986 to make the exclusion from gross income of amounts paid for employee educational assistance programs.

S. 342

At the request of Mr. DANFORTH, the name of the Senator from Iowa [Mr. HARKIN] was added as a cosponsor of S. 342, a bill to amend the Internal Revenue Code of 1986 to provide that certain credits will not be subject to the passive activity rules, and for other purposes.

S. 411

At the request of Mr. BOSCHWITZ, the name of the Senator from Mississippi [Mr. LOTT] was added as a cosponsor of S. 411, a bill to amend the Internal Revenue Code of 1986 to restore a capital gains tax differential, and for other purposes.

S. 419

At the request of Mr. SIMON, the names of the Senator from Iowa [Mr. HARKIN] and the Senator from Maine [Mr. COHEN] were added as cosponsors of S. 419, a bill to provide for the collection of data about crimes motivated by race, religion, ethnicity, or sexual orientation.

S. 424

At the request of Mr. THURMOND, the name of the Senator from Kentucky [Mr. FORD] was added as a cosponsor of S. 424, a bill to provide a minimum monthly annuity for the surviving spouses of certain deceased members of the uniformed services.

S. 430

At the request of Mr. DASCHLE, the name of the Senator from Massachusetts [Mr. KENNEDY] was added as a cosponsor of S. 430, a bill to amend title XIX of the Social Security Act to provide coverage for certain outreach activities undertaken at the option of a State for the purpose of identifying pregnant women and children who are eligible for medical assistance and assisting them in applying for and receiving such assistance, and for other purposes.

S. 449

At the request of Mr. BOREN, the names of the Senator from Louisiana [Mr. BREAUX], the Senator from Mississippi [Mr. LOTT], and the Senator from Montana [Mr. BURNS] were added as cosponsors of S. 449, a bill to amend the Internal Revenue Code of 1986 to provide incentives for oil and natural gas exploration and production, and for other purposes.

S. 458

At the request of Mr. DECONCINI, the name of the Senator from Minnesota [Mr. BOSCHWITZ] was added as a cosponsor of S. 458, a bill to provide for a General Accounting Office investigation and report on conditions of displaced Salvadorans and Nicaraguans, to provide certain rules of the House of Representatives and of the Senate with respect to review of the report, to provide for the temporary stay of detention and deportation of certain Salvadorans and Nicaraguans, and for other purposes.

S. 464

At the request of Mr. SANFORD, the name of the Senator from Indiana [Mr. LUGAR] was added as a cosponsor of S. 464, a bill to promote safety and health in workplaces owned, operated

or under contract with the United States by clarifying the United States' obligation to observe occupational safety and health standards and clarifying the United States' responsibility for harm caused by its negligence at any workplace owned by, operated by, or under contract with the United States.

S. 507

At the request of Mr. SIMON, the name of the Senator from Michigan [Mr. LEVIN] was added as a cosponsor of S. 507, a bill to prohibit investments in, and certain other activities with respect to, South Africa, and for other purposes.

S. 519

At the request of Mr. LAUTENBERG, the name of the Senator from North Dakota [Mr. CONRAD] was added as a cosponsor of S. 519, a bill to prohibit smoking on any scheduled airline flight in intrastate, interstate, or overseas air transportation.

S. 535

At the request of Mr. LAUTENBERG, the name of the Senator from Maine [Mr. MITCHELL] was added as a cosponsor of S. 535, a bill to increase civil monetary penalties based on the effect of inflation.

S. 565

At the request of Mr. CRANSTON, the names of the Senator from South Dakota [Mr. PRESSLER] and the Senator from Alabama [Mr. HEFLIN] were added as cosponsors of S. 565, a bill to authorize a new corporation to support State and local strategies for achieving more affordable housing; to increase homeownership; and for other purposes.

S. 566

At the request of Mr. CRANSTON, the names of the Senator from South Dakota [Mr. PRESSLER] and the Senator from Alabama [Mr. HEFLIN] were added as cosponsors of S. 566, a bill to authorize a new corporation to support State and local strategies for achieving more affordable housing, to increase homeownership, and for other purposes.

S. 581

At the request of Mr. SPECTER, the name of the Senator from North Dakota [Mr. CONRAD] was added as a cosponsor of S. 581, a bill to establish emergency response procedures for rail carriers in transporting hazardous materials.

S. 587

At the request of Mr. MITCHELL, the name of the Senator from Louisiana [Mr. JOHNSTON] was added as a cosponsor of S. 587, a bill to amend the Marine Protection, Research, and Sanctuaries Act to protect marine and near shore coastal waters through establishment of regional marine research programs.

S. 611

At the request of Mr. INOUYE, the name of the Senator from Illinois [Mr. SIMON] was added as a cosponsor of S. 611, a bill to establish administrative procedures to determine the status of certain Indian groups.

S. 618

At the request of Mr. SARBANES, the name of the Senator from Pennsylvania [Mr. HEINZ] was added as a cosponsor of S. 618, a bill to authorize the Indian American forum for political education to establish a memorial to Mahatma Gandhi in the District of Columbia.

S. 686

At the request of Mr. MITCHELL, the name of the Senator from Georgia [Mr. FOWLER] was added as a cosponsor of S. 686, a bill to consolidate and improve laws providing compensation and establishing liability for oil spills.

S. 687

At the request of Mr. BAUCUS, the name of the Senator from New York [Mr. D'AMATO] was added as a cosponsor of S. 687, a bill to amend the Clean Water Act to expand authority for penalties for discharges of oil and hazardous substances to provide for an assessment of oil spill contingency plans.

S. 691

At the request of Mr. LAUTENBERG, the name of the Senator from Georgia [Mr. FOWLER] was added as a cosponsor of S. 691, a bill to require certain information in the National Driver Register to be made available in connection with an application for a license to be in control and direction of a commercial vessel.

S. 714

At the request of Mr. MCCLURE, the names of the Senator from North Dakota [Mr. BURDICK], the Senator from California [Mr. CRANSTON], and the Senator from Utah [Mr. HATCH] were added as cosponsors of S. 714, a bill to extend the authorization of the Water Resources Research Act of 1984 through the end of fiscal year 1993.

S. 754

At the request of Mr. PACKWOOD, the names of the Senator from Alabama [Mr. HEFLIN] and the Senator from Vermont [Mr. JEFFORDS] were added as cosponsors of S. 754, a bill to restrict the export of unprocessed timber from certain Federal lands, and for other purposes.

S. 755

At the request of Mr. PACKWOOD, the name of the Senator from Alabama [Mr. HEFLIN] was added as a cosponsor of S. 755, a bill to authorize the States to prohibit or restrict the export of unprocessed logs harvested from lands owned or administered by States.

S. 762

At the request of Mr. EXON, the name of the Senator from Louisiana [Mr. JOHNSTON] was added as a cosponsor of S. 762, a bill to amend chapter 32 of title 39, United States Code, to limit the number of congressional mass mailings, require public disclosure of the costs of such mass mailings, and for other purposes.

S. 782

At the request of Mr. WILSON, the name of the Senator from California [Mr. CRANSTON] was added as a cosponsor of S. 782, a bill to amend the Clean Air Act to provide that the Administrator of the Environmental Protection Agency shall have authority to regulate air pollution on and over the Outer Continental Shelf.

S. 797

At the request of Mr. INOUYE, the name of the Senator from Nebraska [Mr. EXON] was added as a cosponsor of S. 797, a bill to amend the Communications Act of 1934 to improve the education of children by establishing a National Endowment for Children's Educational Television, and for other purposes.

S. 893

At the request of Mr. LAUTENBERG, the names of the Senator from Hawaii [Mr. INOUYE], the Senator from Minnesota [Mr. BOSCHWITZ], the Senator from Pennsylvania [Mr. SPECTER], the Senator from Michigan [Mr. LEVIN], and the Senator from Florida [Mr. GRAHAM] were added as cosponsors of S. 893, a bill to establish certain categories of Soviet and Vietnamese nationals presumed to be subject to persecution and to provide for adjustment to refugee status of certain Soviet and Vietnamese parolees.

S. 894

At the request of Mr. LAUTENBERG, the name of the Senator from Michigan [Mr. LEVIN] was added as a cosponsor of S. 894, a bill to amend the Internal Revenue Code of 1986 to allow amounts paid for home improvements to mitigate radon gas exposure to qualify for deduction for medical expenses.

S. 918

At the request of Mr. BOREN, the names of the Senator from California [Mr. CRANSTON], the Senator from Connecticut [Mr. DODD], and the Senator from Pennsylvania [Mr. HEINZ] were added as cosponsors of S. 918, a bill to enable producers of fresh mushrooms to develop, finance, and carry out a nationally coordinated program for fresh mushroom promotion, research, and consumer information, and for other purposes.

S. 919

At the request of Mr. BOND, the name of the Senator from Minnesota [Mr. BOSCHWITZ] was added as a cosponsor of S. 919, a bill to enable producers of soybeans to develop, finance, and carry out a nationally coordinated program for soybean promotion, re-

search, and consumer information, and for other purposes.

S. 973

At the request of Mr. LUGAR, the name of the Senator from Mississippi [Mr. COCHRAN] was added as a cosponsor of S. 973, a bill to create a Rural Capital Access Program within the Department of Agriculture to encourage lending institutions to provide loans to certain businesses, and for other purposes.

S. 978

At the request of Mr. INOUYE, the names of the Senator from Rhode Island [Mr. PELL], the Senator from Massachusetts [Mr. KERRY], and the Senator from Michigan [Mr. LEVIN] were added as cosponsors of S. 978, a bill to authorize the establishment within the Smithsonian Institution of the National Museum of the American Indian, to establish a memorial to the American Indian, and for other purposes.

SENATE JOINT RESOLUTION 15

At the request of Mr. PRESSLER, the name of the Senator from Delaware [Mr. ROTH] was added as a cosponsor of Senate Joint Resolution 15, a joint resolution to designate the second Sunday in October of 1989 as "National Children's Day."

SENATE JOINT RESOLUTION 55

At the request of Mr. SIMON, the names of the Senator from Delaware [Mr. BIDEN], the Senator from Florida [Mr. GRAHAM], and the Senator from Oregon [Mr. PACKWOOD] were added as cosponsors of Senate Joint Resolution 55, a joint resolution to designate the week of October 1, 1989, through October 7, 1989, as "Mental Illness Awareness Week."

SENATE JOINT RESOLUTION 57

At the request of Mr. PELL, the name of the Senator from Michigan [Mr. RIEGLE] was added as a cosponsor of Senate Joint Resolution 57, a joint resolution to establish a national policy on permanent papers.

SENATE JOINT RESOLUTION 95

At the request of Mr. MCCLURE, the names of the Senator from South Carolina [Mr. THURMOND], the Senator from Alaska [Mr. MURKOWSKI], the Senator from Rhode Island [Mr. CHAFEE], the Senator from Kansas [Mr. DOLE], the Senator from Vermont [Mr. JEFFORDS], the Senator from North Dakota [Mr. CONRAD], the Senator from Illinois [Mr. DIXON], the Senator from Louisiana [Mr. JOHNSTON], the Senator from Arizona [Mr. DECONCINI], the Senator from Illinois [Mr. SIMON], the Senator from Florida [Mr. GRAHAM], the Senator from Wyoming [Mr. SIMPSON], the Senator from New York [Mr. D'AMATO], and the Senator from South Dakota [Mr. DASCHLE] were added as cosponsors of Senate Joint Resolution 95, a joint resolution to designate the week of September 10, 1989, through September 16, 1989, as "National Check-Up Week."

SENATE JOINT RESOLUTION 104

At the request of Mr. MITCHELL, the names of the Senator from Florida [Mr. GRAHAM], the Senator from Massachusetts [Mr. KERRY], the Senator from Tennessee [Mr. SASSER], the Senator from Wyoming [Mr. WALLOP], the Senator from Wyoming [Mr. SIMPSON], and the Senator from Vermont [Mr. LEAHY] were added as cosponsors of Senate Joint Resolution 104, a joint resolution to express the sense of the Congress with respect to the health of the Nation's children.

SENATE JOINT RESOLUTION 113

At the request of Mr. DIXON, the name of the Senator from Washington [Mr. ADAMS] was added as a cosponsor of Senate Joint Resolution 113, a joint resolution prohibiting the export of technology, defense articles, and defense services to codevelop or coproduce the FSX aircraft with Japan.

SENATE JOINT RESOLUTION 129

At the request of Mr. DOLE, the names of the Senator from Illinois [Mr. DIXON], the Senator from New Jersey [Mr. LAUTENBERG], the Senator from Arizona [Mr. MCCAIN], the Senator from North Dakota [Mr. CONRAD], the Senator from Texas [Mr. GRAMM], the Senator from Mississippi [Mr. COCHRAN], the Senator from Oregon [Mr. HATFIELD], the Senator from Maryland [Mr. SARBANES], the Senator from Hawaii [Mr. INOUYE], the Senator from Wisconsin [Mr. KASTEN], the Senator from Wyoming [Mr. SIMPSON], the Senator from Pennsylvania [Mr. HEINZ], the Senator from Pennsylvania [Mr. SPECTER], the Senator from California [Mr. WILSON], The Senator from West Virginia [Mr. BYRD] and the Senator from New York [Mr. D'AMATO] were added as cosponsors of Senate Joint Resolution 129, a joint resolution to provide for the designation of September 15, 1989, as "National POW/MIA Recognition Day."

SENATE JOINT RESOLUTION 130

At the request for Mr. SARBANES, the names of the Senator from Alabama [Mr. SHELBY], the Senator from North Dakota [Mr. CONRAD], the Senator from Illinois [Mr. SIMON], the Senator from Iowa [Mr. GRASSLEY], the Senator from Rhode Island [Mr. PELL], the Senator from Kansas [Mr. DOLE], the Senator from Virginia [Mr. ROBB], the Senator from Illinois [Mr. DIXON], the Senator from Idaho [Mr. SYMMS], the Senator from North Dakota [Mr. BURDICK], the Senator from Florida [Mr. GRAHAM], the Senator from Rhode Island [Mr. CHAFEE], the Senator from Oklahoma [Mr. BOREN], the Senator from Alaska [Mr. MURKOWSKI], the Senator from Idaho [Mr. MCCLURE], the Senator from Oregon [Mr. PACKWOOD], and the Senator from Arizona [Mr. DECONCINI] were added as cosponsors of Senate Joint Resolution 130, a joint resolution designating February 11 through February 17, 1990, as "Vocational-Technical Education Week."

SENATE CONCURRENT RESOLUTION 9

At the request for Mr. HUMPHREY, the names of the Senator from Wisconsin [Mr. KASTEN], the Senator from Florida [Mr. MACK], and the Senator from South Dakota [Mr. PRESSLER] were added as cosponsors of Senate Concurrent Resolution 9, a concurrent resolution establishing procedures for expedited consideration by the Congress of certain bills and joint resolutions submitted by the President.

SENATE RESOLUTION 99

At the request for Mr. BOSCHWITZ, the names of the Senator from Iowa [Mr. HARKIN], the Senator from Hawaii [Mr. MATSUNAGA], and the Senator from North Carolina [Mr. HELMS] were added as cosponsors of Senate Resolution 99, a resolution requiring the Architect of the Capitol to establish and implement a voluntary program for recycling paper disposed of in the operation of the Senate.

SENATE RESOLUTION 114

At the request for Mr. GRAHAM, the names of the Senator from Alabama [Mr. HEFLIN], and the Senator from New York [Mr. MOYNIHAN] were added as cosponsors of Senate Resolution 114, a resolution concerning the restoration of Eastern Airlines.

SENATE CONCURRENT RESOLUTION 37—RELATING TO DIFFERENTIALS IN CERTAIN MEDICARE PAYMENTS

Mr. HARKIN (for himself, Mr. BENTSEN, Mr. BURDICK, Mr. SHELBY, Mr. COCHRAN, Mr. MCCLURE, Mr. EXON, Mr. CONRAD, Mr. STEVENS, Mr. SANFORD, Mr. THURMOND, Mr. BURNS, Mr. BOREN, Mr. PRYOR, Mr. LUGAR, Mrs. KASSEBAUM, and Mr. GRASSLEY) submitted the following concurrent resolution; which was referred to the Committee on Finance:

S. CON. RES. 37

Whereas the Medicare Prospective Payment System, implemented in 1984 and based largely on the theory that urban hospitals incur a greater cost per patient than rural hospitals, does not account for the fact that rural hospitals serve a greater proportion of Medicare and indigent patients and a lesser proportion of patients covered by private health insurance than urban hospitals;

Whereas the operation of the Medicare Prospective Payment System has lead to a differential in Medicare payments made to urban and rural hospitals, with rural hospitals being reimbursed for a lesser proportion of their costs than urban hospitals;

Whereas the terms "rural" and "urban" are too narrow to describe true medical demographics and therefore should not be the basis for a Medicare cost reimbursement system;

Whereas because of the implementation of the urban-rural differential, rural hospitals began closing at twice the rate of urban hospitals in 1987;

Whereas many rural hospitals are the only source of medical care for the rural citizens of the Nation;

Whereas a viable health care network is an essential part of the infrastructure of rural economic development; and

Whereas by placing rural hospitals in financial jeopardy, the urban-rural Medicare payment differential is discriminating against agriculture, rural businesses, and rural citizens: Now, therefore, be it

Resolved by the Senate (the House of Representatives concurring), That the appropriate committees of the House of Representatives and the Senate should consider legislation as soon as practicable that would equalize the Medicare payments made to rural and urban hospitals.

● Mr. HARKIN. Mr. President, I am pleased to submit today, together with 15 of my colleagues, a concurrent resolution expressing the sense of the Congress that the differential rate paid under Medicare's prospective payment system to urban and rural hospitals be eliminated.

The differential payment made to rural and urban hospitals under Medicare places an undue financial burden on rural hospitals. This differential payment is slowly starving the rural hospitals to death. In 1988 alone, the American Hospital Association reported a record 81 hospital closures, of which 42 were in rural areas.

In my own State of Iowa, one hospital has gone into receivership and one is close to it. The Iowa Hospital Association tells me that 65 of 83 rural Iowa hospitals lost money in caring for patients in 1987, and Medicare reimbursement for rural hospitals in Iowa is averaging about 30 percent less than that paid to their urban counterparts. Similar scenarios are being played out all across rural America.

Medicare recipients who live in rural areas are no less deserving of quality, accessible health care than Medicare recipients who live in urban areas. Yet when a hospital closes, not only are the services of the hospital lost, but the community will have a much harder time recruiting physicians, nurses and other health care providers.

Rural hospitals are also a critical part of the economic infrastructure of the community in which they are located. Hospital closures mean more to a community than forcing residents to drive farther to receive care. In many communities, they are large employers, and their closure means a loss of jobs for many people. In addition, there is an economic ripple effect which is likely to have a financial impact on many other community businesses.

Legislative solutions have been proposed this Congress which would address the differential payments under Medicare, including S. 306, introduced by Senator BENTSEN, of which I am a cosponsor. I am asking that these proposals be a priority of all House and Senate Members during the 101st Congress.

If we don't act quickly to change Medicare's prospective payment system, the health care system in rural America will crumble. If that happens, the impact on the health of the elderly who reside in rural America will be drastic both in humane and economic terms, and simply cannot be allowed to happen—the price is too high.

I urge my colleagues to support this concurrent resolution.●

● Mr. SHELBY. Mr. President, I rise today to join my colleagues in support of this vital legislation to eliminate the differential in Medicare reimbursement for rural and urban hospitals. Hospitals in Alabama, as well as hospitals across the Nation, are closing at rapid rates. In fact, my home State has the dubious distinction of having the highest hospital closure rate in the country.

As a nation, we have committed ourselves to the ideal of universal access to basic health care services. To keep that commitment to rural citizens, we must recognize the unique stresses on our rural health care delivery system.

Small rural hospitals are the key to a strong rural health care system. In addition to basic acute care, these hospitals often provide other valuable health services to the community such as respite care, nursing care, well-child clinics, preventive care, and the list goes on.

Frequently these hospitals are the largest employer in their communities. Over the last several years, the rural unemployment rate has been consistently higher than in urban areas. When a hospital closes, many jobs are lost, further contributing to an already deteriorating rural economy.

There is growing evidence that our rural health care system is under severe strain. Rural hospitals are closing at record rates. Since 1980, over 200 rural community hospitals have closed their doors and the remaining rural hospitals across the country are experiencing such financial stress that closure may be imminent.

Like in other areas, access to community-based, high-quality, basic health care services is at risk in rural Alabama. Alabama has the highest hospital closure rate in the Nation. Between 1980 and 1987 nine hospitals closed their doors, and five of these served rural areas. In 1988, seven more hospitals ceased operation, and four were rural hospitals.

Mr. President, in the past I have been able to say that the majority of the 145 hospitals in my State were rural, but this is not longer the case. Today, only 59 rural hospitals have survived the ravaging tide of hospital closures sweeping the Nation. Last year, 75 percent of these rural hospitals reported an operating loss. This situation is not unique to my State. Across the country, hospitals are struggling with inadequate Medicare and Medicaid reimbursement, Federal cost-cutting initiatives, declining admissions, and an increasingly competitive health care environment.

There are a variety of reasons for the precarious situation in which our rural hospitals find themselves today. As compared to their urban counterparts, rural hospitals tend to be smaller, have fewer patients, provide fewer specialized services, and often serve an older population. It has been estimated that one third of our Nation's elderly live in rural areas, and rural practitioners often treat patients who are sicker as it is reported that rural Americans have disproportionately higher rates of serious chronic illness.

Due to the higher percentage of the elderly living in rural areas, rural hospitals are especially dependent on Medicare. They lack the volume and the mix of patients to balance shortfalls in Medicare reimbursement and are thus hard-pressed to pay the salaries that will attract and retain professionals.

Rural providers are finding it increasingly difficult to attract and retain health professionals, in part due to substantial differentials in rural versus urban Medicare reimbursement rates. Many rural hospitals contend that they must pay more for qualified hospital staff than their nearby urban hospitals since they both draw from the same geographic labor pool. Rural hospitals in remote areas argue that they sometimes must pay increasingly higher salaries to attract specialized staff such as intensive care nurses to their community. As hospitals are labor intensive, this magnifies the problem of making health care services locally accessible. Alabama hospitals currently spend almost half their budget on salaries, and as the demand increases for rural practitioners, so have the entry level salaries.

Although the total number of U.S. physicians may be sufficient for the Nation, there are dramatic shortages in many rural areas. Studies have shown that when a small, rural hospital closes, the community often loses its physicians and has difficulty attracting new ones because doctors often will not practice in an area without a hospital. Rural hospitals in Alabama also report severe shortages of nurses, pharmacists, physical therapists, lab technicians, and other allied health professionals.

Rural hospitals treat fewer private-paying patients and treat a disproportionately high percentage of Medicare patients. Rural citizens, as a group,

have a 15-percent higher rate of uninsuredness than the U.S. average, and a 24-percent higher rate than their urban counterparts. Also, 75 percent of the rural poor do not qualify for public assistance. In 1987, Alabama's hospitals collectively absorbed over $260 million worth of uncompensated care at actual costs, or more than 12 percent of their total experiences.

The dependence of rural hospitals on Medicare as a major payment source has become particularly keen since the implementation of the prospective payment system [PPS] in 1984. Nearly twice as many hospital closures were reported in 1987 than in 1984, due in large part to this dependency. Recent reports show that the majority of rural hospitals in Alabama are experiencing negative Medicare operating margins.

Inadequate reimbursement granted to hospitals for Medicare patients can ultimately raise concerns about quality and access to health care as reduced payment rates force hospitals to cut down on staff and close unprofitable services. This is particularly troublesome for rural hospitals. The possibility of numerous closures is becoming a reality across the country. In Alabama alone, the Alabama Hospital Association reports that as many as 13 facilities may close this year—all of them will be small, and all will be rural.

For the most part, society in general and many in government usually think it is cheaper to provide care in rural areas than in urban. In fact, however, the greater distances, geographic barriers, and sparse population actually make the provision of health care more expensive in rural areas.

There is no one strategy or solution to the problems faced by rural hospitals. Foremost in our minds should be the need to provide equitable reimbursement for small rural hospitals with respect to the Medicare prospective payment system. Access to and availability of basic health care services in our Nation's rural areas must be maintained if we are to keep the commitment to our rural residents.

Mr. President, I am pleased to cosponsor this resolution to eliminate the urban-rural reimbursement under the Medicare prospective payment system. I would also urge my colleagues to support swift overhaul of the system, as every day we delay, we place the viabililty of our rural hospitals in further jeopardy.●

SENATE RESOLUTION 129—RELATING TO JAPANESE INVOLVEMENT IN LIBYAN WEAPONS PROGRAMS

Mr. MURKOWSKI (for himself and Mr. BRADLEY) submitted the following resolution; which was considered and agreed to:

S. RES. 129

Whereas, Libya's chemical weapons program has been using a metal-fabrication facility that Japanese corporations helped to equip at the Rabta technical-industrial complex; and

Whereas, the past association of Japanese corporations with this metal-fabrication facility at Rabta revived doubts about the effectiveness of Japan's control over strategic technologies; and

Whereas, Japanese corporations ended all activities associated with this facility when the Government of Japan advised them, on the basis of information provided by the United States, that the Government of Libya was using it for chemical weapons; and

Whereas, Japanese assistance, in any form, to the Libyan chemical weapons program would, in the future, undermine the trust and confidence necessary for the security relationship between the United States and Japan: Now, therefore, be it

Resolved, That it is the sense of the Senate that the proposed export of technology, defense articles or defense services pursuant to an agreement with Japan to codevelop or coproduce the Support Fighter Experimental (FSX) shall not be implemented until the President of the United States receives assurances from the Government of Japan, and transmits those assurances to the Chairman and ranking member of the Senate Committee on Foreign Relations, that:

1. No Japanese personnel are involved with any aspect of chemical weapons production in Libya; and

2. No assistance of any kind will be provided, in the future, to the Rabta complex or to any other part of the Libyan chemical weapons program by any Japanese corporation.

AMENDMENTS SUBMITTED

DISAPPROVAL OF FSX SALE TO JAPAN

BYRD (AND OTHERS) AMENDMENT NO. 101

Mr. BYRD (for himself, Mr. PELL, Mr. DANFORTH, Mr. MOYNIHAN and Mr. BINGAMAN) proposed an amendment to the joint resolution (S.J. Res. 113) prohibiting the export of technology, defense articles, and defense services to codevelop or coproduce the FSX aircraft with Japan; as follows:

Strike out all after the first word and insert in lieu thereof the following:

SECTION 1. CODEVELOPMENT OF THE FSX WEAPON SYSTEM.

(a) IN GENERAL.—The President shall ensure that all technology, defense articles, and defense services provided by the United States or any United States corporation or entity to Japan pursuant to the agreement described in subsection (b) to codevelop the Support Fighter Experimental (FSX) weapon system shall be subject to the requirements of subsections (a), (c), and (d) of section 3 of the Arms Export Control Act.

(b) DESCRIPTION OF AGREEMENT.—The agreement referred to in subsection (a) is the agreement for which the President submitted a certification pursuant to section 36(d) of the Arms Export Control Act on May 1, 1989 (transmittal No. MC-9-89).

SEC. 2. COPRODUCTION OF THE FSX WEAPON SYSTEM.

(a) IN GENERAL.—In the event that the United States and Japan seek to coproduce the FSX weapon system—

(1) the United States and Japan shall negotiate and sign a memorandum of understanding (MOU) containing the terms and conditions for that coproduction; and

(2) such MOU shall—

(A) prohibit the transfer to Japan of critical engine technologies (including, but not limited to, hot section and digital fuel control technologies); and

(B) prohibit the sale or retransfer by Japan of the FSX weapon system or any of its major subcomponents codeveloped or coproduced with the United States.

(b) APPLICATION OF ARMS EXPORT CONTROL ACT.—Technology, defense articles, and defense services resulting from any coproduction of the FSX weapon system by the United States and Japan shall be subject to the requirements of subsections (a), (c), and (d) of section 3 of the Arms Export Control Act.

(c) POLICY ON UNITED STATES WORKSHARE.—It is the sense of the Congress that any Memorandum of Understanding (MOU) between the United States and Japan on coproduction should specify that the United States share of the total value of the coproduction shall be not less than 40 percent of that value, including the value of manufacturing spare parts and other support items which are part of the lifetime maintenance costs of the FSX weapon system.

SEC. 3 GAO REPORT.

(a) IN GENERAL.—Beginning 6 months after the date of enactment of this joint resolution, and every 12 months thereafter, the Comptroller General of the United States, after consultation with appropriate officials of United States agencies represented on the Technical Steering Committee, shall submit to the Speaker of the House of Representatives and the chairman of the Committee on Foreign Relations of the Senate a report describing the progress made in implementing the Memorandum of Understanding (MOU) Between the United States Department of Defense and the Japan Defense Agency on Cooperation in the Development of the FSX Weapon System, signed on November 29, 1988, and related documents thereto.

(b) DEFINITION.—For purposes of this subsection the term "Technical Steering Committee" refers to the FSX Technical Steering Committee established jointly by the Japan Defense Agency and the United States Department of Defense

SEC. 4. IMPACT OF MOU'S RELATING TO THE FSX WEAPON SYSTEM ON THE COMPETITIVE POSITION OF THE UNITED STATES.

(a) SOLICITATION OF RECOMMENDATIONS.—In the implementation of the memorandum of understanding (MOU) and related agreements between the United States and Japan regarding the codevelopment of the FSX weapon system, and in the negotiation, renegotiation, and implementation of future memoranda of understanding and related agreements concerning coproduction of the FSX weapon system, the Secretary of Defense shall regularly solicit and consider comments or recommendations from the Secretary of Commerce with respect to the commercial implications of such agreements and the potential impact on the internation-

al competitive position of United States industry.

(b) REVIEW BY SECRETARY OF COMMERCE.—Whenever the Secretary of Commerce has reason to believe that any such memorandum of understanding or related agreement has, or threatens to have, a significant adverse impact on the international competitive position of United States industry, the Secretary of Commerce may request a review of the agreement. If, as a result of the review, the Secretary of Commerce determines that the strategic commercial interests of the United States are not being served, the Secretary of Commerce shall recommend to the President any modification to the agreement he deems necessary to ensure an appropriate balance of interests.

(c) CONSIDERATION OF RECOMMENDATIONS.—(1) The President shall consider the recommendation of the Secretary of Commerce concerning—

(A) the commercial implications of any such memorandum of understanding or related agreement, and

(B) the potential impact on the international competitive position of United States industry,

in determining whether such memorandum of understanding or related agreement shall be implemented or agreed upon.

(2) Any such memorandum of understanding or related agreement shall not be implemented or agreed upon if the President determines that such agreement is likely to have a significant adverse impact on United States industry that outweighs the benefits of implementing or entering into such an agreement.

SEC. 5. DEFINITIONS.

As used in this joint resolution, the term "defense article" and "defense service" shall have the same meanings as are given to those terms in paragraphs (3) and (4), respectively, of section 47 of the Arms Export Control Act.

DIXON AMENDMENT NO. 102

Mr. DIXON proposed an amendment to amendment No. 101 proposed by Mr. BYRD (and others) to the joint resolution (S.J. Res. 113), supra, as follows:

Strike out all after "Section" on line 3, page 1, and insert in lieu thereof the following:

(a) the proposed export of technology, defense articles, or defense services pursuant to a license and technical assistance agreement with Japan described in subsection (b) to codevelop the Support Fighter Experimental [FSX] aircraft is prohibited.

(b) An agreement referred to in subsection (a) is an ageement for which the President submitted a certification pursuant to section 36(d) of the Arms Export Control Act on May 1, 1989 (transmittal No. MC-9-89).

DIXON AMENDMENT NO. 103

Mr. DIXON proposed an amendment to amendment No. 101 proposed by Mr. BYRD (and others) to the joint resolution (S.J. Res. 113), supra, as follows:

On page 3, line 20 of the pending amendment, strike "Committee on Foreign Relations of the Senate" and insert in lieu thereof: "Committees on Foreign Relations, Armed Services, Commerce, Science and Transportation, and Banking, Housing, and Urban Affairs of the Senate".

HEINZ AMENDMENT NO. 104

Mr. HEINZ proposed an amendment to amendment No. 101 proposed by Mr. BYRD (and others) to the joint resolution (S.J. Res. 113), supra, as follows:

At the end of paragraph (a) of section 3 of the amendment offered by the Senator from West Virginia [Mr. Byrd], add the following:

"Such report shall state—

"(1) whether any technology involved in development of the FSX weapon system has been transferred to the Japanese space shuttle program or any other part of the Japanese aviation sector or aerospace technology;

"(2) whether any such technology has been diverted to any third party country unauthorized to receive such technology, in violation of the license and technology assistance agreement for the FSX weapon system; and

"(3) whether any such technology has been made available, legally or illegally, to adversaries who could use such technology to the detriment of the North Atlantic Treaty Organization [NATO], the United States, any other member country of NATO, Japan, Australia, or New Zealand."

NOTICES OF HEARINGS

COMMITTEE ON RULES AND ADMINISTRATION

Mr. FORD. Mr. President, I wish to announce that at the Committee on Rules and Administration business meeting scheduled for Wednesday, May 17, 1989, at 9:30 a.m., in SR-301, Russell Senate Office Building, the committee plans to consider S. 874. This bill would establish national voter registration procedures for Presidential and congressional elections.

While the Daily Digest has been carrying this item for the Rules Committee agenda for the 17th, the official notice that I placed in the RECORD last Thursday, which listed all the legislation the committee plans to mark up, inadvertently omitted S. 874.

SELECT COMMITTEE ON INDIAN AFFAIRS

Mr. INOUYE. Mr. President, I would like to announce that the Select Committee on Indian Affairs will be holding a mark up on Tuesday, May 16, 1989, beginning at 2:30 p.m., in 485 Russell Senate Office Building on S. 978, a bill to establish the National Museum of the American Indian and S. 402, the Puyallup Land Claims Settlement Act.

Those wishing additional information should contact the Select Committee on Indian Affairs at 224-2251.

Mr. President, I would like to announce that the Select Committee on Indian Affairs will be holding a hearing on Friday, June 9, 1989, beginning at 9:30 a.m., in 485 Russell Senate Office Building on the implementation of amendments to the Indian Self-Determination Act.

Those wishing additional information should contact the Select Committee on Indian Affairs at 224-2251.

COMMITTEE ON SMALL BUSINESS

Mr. BUMPERS. Mr. President, I would like to announce that the Small Business Committee's Subcommittee on Rural Economy and Family Farming will hold a field hearing in Livingston, MT, on May 24, 1989. This hearing was originally scheduled for May 26, 1989. The subcommittee will be hearing testimony on the impact of S. 863, the Rural Access to Capital Act of 1989, and S. 759, the Rural Access to Telecommunications Services Act of 1989, on rural communities. The hearing will be held at the Park County Courthouse Community Room, 414 Callender Street, Livingston, MT, and will commence at 8 a.m. For further information, please call Tamara McCann of the committee staff at 224-4352.

AUTHORITY FOR COMMITTEES TO MEET

COMMITTEE ON FOREIGN RELATIONS

Mr. DIXON. Mr. President, I ask unanimous consent that the Committee on Foreign Relations be authorized to meet during the session of the Senate on Tuesday, May 16 at 2 p.m. to mark up the Foreign Relations Authorization Act for fiscal year 1990.

The PRESIDING OFFICER. Without objection, it is so ordered.

SPECIAL COMMITTEE ON INVESTIGATIONS

Mr. DIXON. Mr. President, I ask unanimous consent that the Special Committee on Investigations of the Select Committee on Indian Affairs be authorized to meet during the session of the Senate on May 16, 1989, at 10 a.m. to hold hearings pursuant to Senate Resolution 66, section 21, agreed February 28, 1989.

The PRESIDING OFFICER. Without objection, it is so ordered.

SPECIAL COMMITTEE ON INDIAN AFFAIRS

Mr. DIXON. Mr. President, I ask unanimous consent that the Select Committee on Indian Affairs be authorized to meet on May 16, 1989, beginning at 2:30 p.m., in 485 Russell Senate Office Building, to consider for report to the Senate S. 978, a bill to establish the National Museum of the American Indian and S. 402, the Puyallup Land Claims Settlement Act.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON DEFENSE INDUSTRY AND TECHNOLOGY

Mr. DIXON. Mr. President, I ask unanimous consent that the Subcommittee on Defense Industry and Technology of the Committee on Armed Services be authorized to meet on Tuesday, May 16, 1989, at 9 a.m. in open session to receive testimony on the defense technology base.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEES ON CONVENTIONAL FORCES AND ALLIANCE DEFENSE; READINESS, SUSTAINABILITY AND SUPPORT; AND MANPOWER AND PERSONNEL

Mr. DIXON. Mr. President, I ask unanimous consent that the Subcommittees on Conventional Forces and Alliance Defense; Readiness, Sustainability and Support; and Manpower and Personnel of the Committee on Armed Services be authorized to meet on Tuesday, May 16, 1989, at 2:30 p.m. in open session to receive testimony on alternatives for substituting Reserve Forces for Active Air Forces, with emphasis on rapid reinforcement of Europe. Also Donald B. Rice for Secretary of the Air Force.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON ARMED SERVICES

Mr. DIXON. Mr. President, I ask unanimous consent that the Committee on Armed Services be authorized to meet on Tuesday, May 16, 1989, at 11 a.m. in open session to consider the nomination of Gen. Robert T. Herres, U.S. Air Force, for reappointment as Vice Chairman of the Joint Chiefs of Staff.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON SCIENCE, TECHNOLOGY, AND SPACE

Mr. DIXON. Mr. President, I ask unanimous consent that the Subcommittee on Science, Technology, and Space, of the Committee on Commerce, Science, and Transportation, be authorized to meet during the session of the Senate on May 16, 1989, at 2 p.m. to hold a hearing on the issues and options involved in creating a national research and technology strategy to help build a U.S.-based high-definition television industry.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON RURAL DEVELOPMENT AND RURAL ELECTRIFICATION

Mr. DIXON. Mr. President, I ask unanimous consent that the Subcommittee on Rural Development and Rural Electrification of the Committee on Agriculture, Nutrition, and Forestry, be authorized to meet during the session of the Senate on Tuesday, May 16, 1989, at 9:30 a.m. to hold a hearing on rural development.

The PRESIDING OFFICER. Without objection, it is so ordered.

SELECT COMMITTEE ON INTELLIGENCE

Mr. DIXON. Mr. President, I ask unanimous consent that the Select Committee on Intelligence be authorized to meet during the session of the Senate on Tuesday, May 16, 1989, at 2 p.m. to hold a closed hearing on intelligence matters.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON THE JUDICIARY

Mr. DIXON. Mr. President, I ask unanimous consent that the Committee on the Judiciary be authorized to meet during the session of the Senate on Tuesday, May 16, 1989, at 10 a.m. to hold a hearing on child abuse.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON OVERSIGHT OF GOVERNMENT MANAGEMENT

Mr. DIXON. Mr. President, I ask unanimous consent that the Subcommittee on Oversight of Government Management, Committee on Governmental Affairs, be authorized to meet during the session of the Senate on Tuesday, May 16, 1989, at 9:30 a.m., to hold a hearing on oversight of DOD's inadequate use of off-the-shelf items.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON THE HANDICAPPED

Mr. DIXON. Mr. President, I ask unanimous consent that the Subcommittee on the Handicapped, of the Committee on Labor and Human Resources, be authorized to meet during the session of the Senate on Tuesday, May 16, 1989, at 2 p.m., to conduct a hearing on Americans with Disabilities Act, S. 933.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

THE NATIONAL BICENTENNIAL COMPETITION ON THE CONSTITUTION AND BILL OF RIGHTS

● Mr. DECONCINI. Mr. President, this month in our Nation's Capital over 950 young people from 44 States gathered to participate in the National Bicentennial Competition on the Constitution and Bill of Rights. I am proud to announce that a team from Corona Del Sol High School in Tempe represented my home State Arizona. These young scholars worked hard to reach the national finals by winning in the district and the State competitions. Their performance at the national level was equally outstanding, as they were among the 10 finalists.

The members of the team are Charles F. Adams, Andre E. Brennan, David C. Burns, Bryan C. Choate, Stacy L. Combs, Lisa M. Dillion, Elizabeth M. Enderle, Amy A. Fiedler, Kirstin M. Hermanson, Stacey M. Jackson, Jeffrey M. Jennings, Michael W. Kahn, Dina J. Krause, Matthew B. Levine, Jana G. Seiter, Gregory S. Sorenson, Laura L. Southern, Terry L. Maidi, Brent A. Villanueva, Scott E. Walker, Michael C. Wisdom, and Shawn P. Young.

Along with the students, their instructor Jim Denton deserves much of the credit for the success of the team. In addition, Lois Fitch, the district coordinator, and Don Nordlund, the State coordinator, have worked hard in helping not only this team reach the finals, but also in overseeing the entire program.

The National Bicentennial Competitive on the Constitution and Bill of Rights is the most extensive educational program in the country developed to educate young people about the Constitution and Bill of Rights. With the support of Congress, the active involvement of Representatives and Senators, and the efforts of thousands of civic and education leaders, the program achievements over the past 2 years have been dramatic: 1,022,320 students have studied the curriculum; 14,381 teachers are teaching the course; 420 congressional districts and the five territories have fully functioning programs; 92 U.S. Senators are supporting the program in their States; and 393 U.S. Representatives are participating in their districts.

The program provides students with a specially designed 6-week course of study designed to provide upper elementary, middle and high school students with a fundamental understanding of the Constitution and Bill of Rights and the principles and values they embody. Students complete the instructional portion of the program with a test designed to measure their "constitutional literacy" and receive a certificate of achievement signed by their U.S. Representative.

High school participants then enter a nationwide series of competitions at the congressional district, State, and national levels. Students testify before a panel of experts at a simulated congressional hearing designed to measure understanding and capacity to apply principles being learned to historical and contemporary events. Each year, the National Bicentennial Competition culminates in 3 days of intensive competition among classes from almost every State in the Union.

Mr. President, the need to educate our young people about the Constitution and Bill of Rights is well documented. Studies have found that only slightly more than half of students surveyed were able to identify the original purpose of the Constitution. Nearly half thought the President could appoint Members of Congress and one-third thought he could adjourn Congress when he saw fit. Indeed, another survey conducted on behalf of the Hearst Corp. suggested that over half of Americans thought that the Marxist credo "from each according to his ability, to each according to his need" can be found in the Constitution. Most alarming was the finding that a greater proportion of today's students display antidemocratic attitudes than did students in 1952.

The benefits of this educational program are clear—it is making a difference among the over 1 million students who have studied the program.

A recent study has shown that the National Bicentennial Competition Program has increased the constitutional literacy of our young citizens. Students in classrooms all over the country are debating the issues that concerned the Founding Fathers and demonstrating how the Constitution's basic principles apply to them today.

The preservation of our freedom and our Nation depends upon our young people, the decisionmakers of tomorrow. We have much to gain from educating them about the Constitution, the Congress, and the continuing responsibilities of citizenship. I am proud to have students from my State perform so well in the national finals, and I commend each of them and their teacher for their hard work in accomplishing this great achievement.●

AMERICA SALUTES BROADWAY WEEK

● Mr. D'AMATO. Mr. President, I rise today to elevate public awareness of the individuals and organizations who devote their time and energy to advancing the cause of live theater by calling attention to the week of May 29, 1989, through June 4, 1989. This week has been designated "America Salutes Broadway Week" by the League of American Theatre Wing. This resolution with Broadway as the focus of the Tribute designates the week of May 29, 1989, through June 4, 1989, as "America Salutes Broadway Week."

Broadway theater enriches the lives of almost every American and is the cornerstone of our modern culture. Broadway enjoys a great cultural legacy that continues to stir the American imagination; it recalls our past, but it also speaks to future generations. Today, Broadway is as healthy as it has been in years, and its future looks just as bright. Broadway represents the best live entertainment in the world.

Broadway can be described as the longest street in the United States, stretching from Maine to Hawaii and Florida to Alaska. It is easily accessible to all Americans since its touring productions travel to all 50 States. Every American has the opportunity to see a Broadway show in or near his or her hometown.

Broadway is a street of dreams. It is a magnet that draws young American theater artists—actors, playwrights, designers and young directors—and inspires them to create their best work.

Broadway shows provide an economic boost to every city in which they are seen. It is documented that for every dollar spent at the box office, an additional $3 are pumped into local economies through such ancillary services as hotels, restaurants, retail stores, and transportation.

If you want to be thoroughly entertained by a musical spectacle, attend a Broadway show. If you want your mind opened to ideas about political, social, and religious ideologies or if you want a simple diversion from everyday life—attend a Broadway show. Broadway can be many things to many Americans.●

CUTS IN INDIA'S DEFENSE BUDGET

● Mr. DECONCINI. Mr. President, in these times of continued tension among nations in certain parts of the world, I believe that it is important to recognize the efforts of those nations which do their part in attempting to reduce these tensions. It is for this reason that I want to congratulate the Government of India for its decision to cut its national defense budget.

The government of Prime Minister Rajiv Gandhi has recognized the importance of sending a strong signal to its neighbors in the Asian subcontinent. In response to the withdrawal of Soviet occupation troops from Afghanistan and the ceasefire in the Iran-Iraq War, India has reduced its budgeted defense spending levels for the fiscal year 1989-90 in absolute terms by $124 million. This reduction in defense spending is a cut of approximately 12 percent over the previous year. According to the February 28, 1989, edition of the Hindustan Times, the revised Indian defense budget has dropped defense spending to 14 percent of the total Indian budget for the current fiscal year. This is also the third straight year in which defense spending, as a portion of the total Indian budget, has been reduced.

In the early part of this decade, the Indian Government had directed a significant portion of its resources to increased military procurement. The reduction in spending for the third year in a row recognizes the resource crunch facing the nation and the need for implementing measures for greater cost effectiveness. It also allows for more funds to be spent on the massive human and economic problems facing this growing nation. Other nations, including the United States, are facing similar situations in trying to achieve a balance in funding levels between important human and defense needs.

In India's case, the defense reduction also marks a period of stabilization in its relations with its neighbors and former adversaries—Pakistan and China. While the nations in the region must continue their efforts to stem the growth of potentially destabilizing weapons, this action by India deserves the recognition and support of the United States Government. I encourage other nations in this part of the world to follow the positive example set by the Government of India.●

NATIONAL WEEK OF COMMITMENT TO HELP THE HOMELESS

● Mr. D'AMATO. Mr. President, I rise today to cosponsor Senate Joint Resolution 111, a joint resolution designating the week beginning October 8, 1989, as "National Week of Commitment to Help the Homeless."

The problem of homelessness in America is a national tragedy no citizen can ignore. According to the Department of Education, 220,000 schoolchildren lack a home, while 65,000 are unable to attend school regularly because of their plight; 5,000 homeless youths die each year, children unknown, unwanted, and uncared for. They are victims of a cruel reality.

It is for these casualties of our society that we must act to promote a sense of civic duty. Voluntary efforts would go a long way in mitigating the suffering of the homeless, and I urge my colleagues to join me in support of this legislation.●

FETAL ALCOHOL SYNDROME AWARENESS

● Mr. GRAHAM. Mr. President, I rise to draw the attention of my colleagues to an important public education effort which began on Mother's Day, May 14. The National Council on Alcoholism, in concert with the Office for Substance Abuse Prevention, the Center for Science in the Public Interest, and the Healthy Mother, Healthy Babies Coalition are mounting a major awareness campaign to educate Americans about the risks of drinking during pregnancy.

In 1981 the Surgeon General issued a health message warning women about the dangers of drinking alcohol during pregnancy. Seven years later a 1988 Bureau of Alcohol, Tobacco and Firearms study found that many participants were relatively unaware of suspected alcohol related health hazards such as fetal alcohol syndrome. Although most felt drinking alcohol during pregnancy was dangerous, there were some who thought it was good for you during pregnancy. A few even mentioned that they consumed liquor during pregnancy at their doctor's direction. The study also found that only 4 in 10 adults are familiar with and understand the term fetal alcohol syndrome.

Fetal alcohol syndrome [FAS] is a combination of physical and mental birth defects that result from drinking alcohol during pregnancy. Fetal alcohol effects [FAE] are those signs in the offspring that have been linked to alcohol use during pregnancy which do not meet the diagnostic criteria for full-blown FAS.

Mr. President, because the research in this area is incomplete, it is assumed there is no safe amount of alco-

hol consumption during pregnancy. However, alcohol related birth defects are 100 percent preventable if alcohol is not consumed during pregnancy.

Public education is essential to reduce the incidence of alcohol related birth defects in the United States. The 1988 antidrug bill included legislation requiring health and safety warning labels on all alcoholic beverages. These labels, which will appear on all alcoholic beverage containers by late 1989 will urge women not to drink alcohol during pregnancy and will serve as an important educational tool.

It is appropriate that this week, from Mother's Day, May 14 to May 20, has been declared "Alcohol-Related Birth Defects Awareness Week." The purpose of the week is to educate the American public and increase awareness of the adverse consequences of alcohol consumption during pregnancy. The need for such education is evidenced by the following facts:

Only 57 percent of Americans under the age of 45 have heard of fetal alcohol syndrome.

At least 5,000 babies each year suffer the effects of FAS. As many as 50,000 babies each year suffer the milder effects of alcohol birth defects known as fetal alcohol effects.

FAS is the third leading cause of mental retardation and the leading preventable one. It is characterized by growth deficiencies, facial abnormalities—including a small head circumference, flattened face and sunken nasal bridge—malformed organs and mental retardation.

The incidence of FAS is approximately 3 per 1,000 live births.

Society spends $15 million a year to treat babies born with such birth defects, $670 million to care for children and adolescents with the affliction and $760 million to look after adults. All told, the indirect loss of productivity is $510 million.

In conclusion, public educational efforts such as "Alcohol-Related Birth Defects Awareness Week" are an important part in the continuing effort to reduce the unnecessary tragedy and loss suffered by uninformed families throughout the United States. The National Council on Alcoholism and the numerous organizations involved with Alcohol-Related Birth Defects Awareness Week are to be commended for their commitment and dedication to the educational efforts concerning this serious public health problem and for providing American families with a clear message about drinking during pregnancy.●

COSPONSORSHIP OF NATIONAL CORRECTIONAL OFFICERS WEEK

● Mr. D'AMATO. Mr. President, I rise today to commend Senate Joint Resolution 72, a joint resolution that designated the week beginning May 7, 1989 as "National Correctional Officers Week."

This week commemorated those risking life and limb to accept responsibility for guarding the more than 600,000 inmates in our country. Working in highly stressful environments, these individuals place themselves in dangerous situations to police the prison population as well as protect surrounding communities. I feel we owe a special debt to correctional officers and was heartened by the passage of this legislation by my colleagues.●

CHILDREN: OUR HIGHEST PRIORITY

● Mr. SARBANES. Mr. President, I joined recently in introducing a measure in the Senate known as the "Health of America's Children" resolution. It is my understanding that this resolution is currently before the Labor and Human Resources Committee and may soon be brought to the floor for full Senate consideration. I rise today to urge prompt passage of this resolution and to bring to the attention of the Senate the urgent need to move quickly to address the critical issues facing us with respect to our children's future.

While disagreements over matters of policy are inevitable in a free and democratic republic, there is little room for disagreement about what must be our country's highest priority—the protection and well-being of our children. It has been well established that under the policies of the previous administration, our Nation's children lost precious ground with Federal spending on programs for children falling in the last decade from $51 to $49 billion in real dollars.

Since 1980, the number of children not covered by health insurance has grown steadily with current figures showing 20 percent of all children under age 18 without insurance and approximately 15 percent of pregnant women uninsured. According to a study by the National Association of Children's Hospitals and Related Institutions, less than 60 percent of U.S. children under age 4 received basic immunizations in 1985.

In addition, the United States has one of the highest infant mortality rates of any industrialized nations. Maryland's average infant mortality rate of 11.7 per 1,000, slightly higher than the national average, and Baltimore City's rate of 18.2 per 1,000 for black infants, illustrates graphically the need for an increased investment in prenatal and neonatal care. Prenatal care not only benefits infants in the short term, but may also improve their potential to become healthy and productive adults. Missed opportunities to prevent or treat childhood health problems may impose lifetime costs on children, their families, and society.

In an effort to address this critical problem, I joined in sponsoring the Infant Mortality and Children's Health Act to require States to raise the ceiling for Medicaid eligibility to 185 percent of the Federal poverty level for pregnant women and infants. States would also be required to phase-in Medicaid coverage for children up to age 18 living in families at or below 100 percent of the poverty level. Under this proposal, Medicaid coverage and services would become more readily available to those who are eligible and coordination would be increased between the Medicaid Program and the Special Supplemental Food Program for Women, Infants, and Children [WIC].

The Federal investment in child nutrition programs has also declined over the past decade. Funding for the School Lunch and School Breakfast Programs, the Child Care Food Program, and the Summer Food Service Program fell 29 percent from 1982 to 1985—yet the previous administration continued to propose Federal budgets which slashed funding for critical child nutrition programs.

I adamantly opposed such cuts and I look forward to the opportunity to renew our Federal commitment in this area through the reauthorization of expiring child nutrition programs: The Summer Food Service Program for Children serving approximately 22,000 children per day in my State of Maryland; the Food Distribution Program providing $19 million worth of food and commodities to Maryland's schools; Child Care Food programs; the WIC Program; Charitable Institutions and the Disaster Feeding Program; the Nutrition Education and Training Program, and the State Administrative Expense Funds Program.

Legislation to reauthorize these programs has been introduced in the House and is expected to be introduced in the Senate in the near future. I strongly support a renewed Federal investment in these critical programs and will continue to monitor carefully relevant legislation to ensure their prompt reauthorization.

Child care is another area which requires immediate attention. There can be no doubt that the existing national supply of child care services is inadequate to meet the needs of the increasing number of children who have mothers employed outside of the home. The number of preschool children with mothers in the labor force has grown by 75 percent over the past 15 years, and the number of school-age children with working mothers has increased by 22 percent. Over half of all mothers who have infants under 1 year of age are working outside the home.

It is obvious that prompt action must be taken to respond to this increasing need. A study conducted in 1987 by the U.S. Bureau of Labor Statistics found that only 2 percent of all business establishments—defined as individual business or Government work sites with one or more workers—provide employer-supported child care services. Given this, it might reasonably be assumed that the Federal Government would have increased its support of child care services to meet the changing needs of our society. Instead, the previous administration sought massive cuts in appropriations for Federal programs providing support for child care services, especially those serving child care needs of low-income Americans.

The current administration has proposed a tax credit approach which includes a $1,000 tax credit for families with incomes below $13,000 and children under age 4, and an expansion of the current dependent child care tax credit. However, this approach does not address the issues of supply and quality of child care and would not benefit families with school-age children.

To address the present problem more fully, I have joined in sponsoring the Act for Better Child Care Services which focuses on ensuring the availability of quality, affordable child care services throughout the Nation. I also support the Family and Medical Leave Act, to provide employees with an amount of job-guaranteed, unpaid leave upon the birth or adoption of a child or the serious illness of a child or parent. The United States remains the only industrialized nation that does not have some form of national family leave policy for working parents. I regret that a filibuster prevented final action on this proposal as well as child care legislation during the last Congress. I intend to continue to work for the prompt passage of measures which address our Nation's pressing child care needs in a comprehensive manner.

Mr. President, the final matter I would like to address with respect to the well-being of our Nation's children is that of Federal support for education. As in the areas of health and child care, children have suffered as a result of actions taken in the last 8 years. The previous administration chipped away unrelentingly at Federal aid to education. In fiscal year 1981, the administration's budget request for education was 6 percent less than the funding approved by Congress in the previous year, and the 1982 budget request was 16 percent less than the 1981 appropriation level. The 1983 request of $9.95 billion was nearly 33 percent below the previous year's level of spending.

In fiscal year 1984, the President requested $13.2 billion, or 14.5 percent less than the appropriation approved by Congress in the previous year. In fiscal year 1985, an election year, the administration proposed a marked increase over its previous budget. Even so, the request only matched the actual funding level for fiscal year 1984. The following year, the budget request was again cut sharply, 18-percent less than the fiscal year 1984 appropriation. Both the fiscal year 1987 and fiscal year 1988 requests were below the amount appropriated the year before, 15 percent and 29 percent lower, respectively. In fiscal year 1989—another election year—the Reagan administration requested level funding for education.

Congress attempted to preserve the long-term Federal investment in education by consistently appropriating more for education than was requested by the administration. Nevertheless, from 1980 to 1988 Federal outlays for the Department of Education decreased as a percentage of the total budget from 2.5 to 1.8 percent. Federal funding for elementary and secondary education programs decreased by 26 percent.

I am concerned especially that funding for compensatory education programs has fallen by 25 percent since 1980. It is well established that ensuring a sound educational experience at an early age greatly enhances the future lives of our Nation's children. In fact, early education programs such as the Perry Preschool in Ypsilanti, MI, the Brookline Early Education project, Philadelphia Head Start, the Syracuse University Children's Center, and other child development programs have shown that high quality preschool programs can reduce, by as much as 40 percent, the likelihood that children will drop out of school, become pregnant as teenagers, become dependent on welfare, or become involved in crime.

Given these statistics and during a period when problems existing in urban education led the Carnegie Foundation for the Advancement of Teaching to describe students in large urban centers as "an imperiled generation," the cuts outlined above cross the line from unwise to incomprehensible. It is imperative to remember that children are the future. Unless we provide future generations with the quality education necessary to acquire the knowledge and skills needed to function successfully in an increasingly complex world, we not only imperil the futures of our children—we imperil the future of our Nation. I am pleased that the current Congress is considering initiatives to provide high quality early childhood education. We must continue our efforts to ensure the development of such programs and increase support for existing programs like chapter I and Head Start which have already proven their effectiveness.

Mr. President, in a society where one out of four children is born poor, one out of six has no health insurance, and one out of seven is at risk of dropping out of school, we must renew and strengthen the Federal investment in programs which promote our children's well-being. With a fresh and sustained commitment to this critical task, we will ensure a more productive future for our children and a stronger foundation for our Nation.●

RESCUING A NATION

● Mr. HATFIELD. Mr. President, he was a 40-year-old mining engineer who had decided that "just making money isn't enough," the orphaned son of an Iowa blacksmith who had already lived on several continents. Years later, he would become President of the United States. But in August 1914, he would begin what biographer George Nash calls an undertaking unprecedented in world history: an organized rescue of an entire nation from starvation.

The man was Herbert Hoover, and his Commission for Relief in Belgium would become "an international symbol of practical idealism." So too would he.

Dr. George Nash, the author of "The Life of Herbert Hoover: The Humanitarian, 1914-1917" and a number of other books, details this tremendous undertaking and the man who made it possible in "An American Epic: Herbert Hoover and Belgian Relief in World War I." I ask that this uplifting story be printed in the RECORD following my remarks.

The article follows:

"AN AMERICAN EPIC": HERBERT HOOVER AND BELGIAN RELIEF IN WORLD WAR I

(By George H. Nash)

Senator Everett Dirksen of Illinois was once asked by a group of junior high school students to define diplomacy. The senator replied: "If I said to my wife, 'You have a face that would stop a thousand clocks,' that would be stupidity. But if I turned to her and said, 'Dear, when I behold you, time stands still,' that's diplomacy!"

The subject of my essay, and of the book that I have just published, is, in a way, diplomacy, but diplomacy of a special sort—indeed, of a character that the world had never seen before. The Life of Herbert Hoover: The Humanitarian, 1914-1917 is also a book about politics, again of a special sort: the politics of philanthropy and humanitarian relief on a scale previously unknown and unimagined. And, of course, my book is the second installment in a biography of one of the least understood of all American leaders.

While preparing this volume, I spent many rewarding days in the research rooms and corridors of the National Archives, where I received the courteous assistance of people like Assistant Archivist for Presidential Libraries John Fawcett and archivists Ronald Swerczek and Gerald Haines. I was

drawn here by two superb collections: Record Group 59 (the General Records of the Department of State) and RG 84 (the Records of the Foreign Service Posts of the Department of State). Of the latter, two in particular—the files of our embassy in London and legation in Brussels for the years of World War I—proved to be indispensable. And no doubt like innumerable other scholars over the years who have explored these particular treasures, I say: Hurrah for the State Department's decimal file and the access to the past that it facilitates. Would that every other agency of government used a similar classification scheme.

This summer the nations of Eruope and North America will recall the seventy-fifth anniversary of the outbreak of the First World War. For the people of the United States this commemoration will evoke many images. Of battle sites like Château-Thierry and Belleau Wood. Of soldiers like John J. Pershing and Sergeant York. Of Flanders Fields where poppies grow. Of a musical call to arms, "Over There." For some Americans the remembrance will elicit another image as well: of the grim, chaotic month of August 1914, when the independent kingdom of Belgium courageously resisted an invading German army, only to fall victim to a four-year ordeal of conquest.

One American will be forever linked in history with Belgium's travail in that awful war. His name, of course, is Herbert Hoover. After the battle of the Marne, giant European armies bogged down in the trenches, and famine threatened beleaguered Belgium, a highly industrialized nation of 7 million dependent upon imports for three-quarters of her food. On one side the German army of occupation refused to take responsibility for victualing the civilian population. Let Belgium import food from abroad as she had done before the war, said the Germans. On the other side stood the tightening British naval blockade of Belgian ports. Let the Germans, as occupiers of Belgium, feed its people, said the British. Besides, they argued, how could one be sure that the Germans would not seize imported food for themselves?

As the tense days passed in the early autumn of 1914, food supplies dwindled ominously in Belgium. To the outside world went emissaries pleading for the allies to permit food to filter through the naval noose. Finally, on October 22, after weeks of negotiations, Herbert Hoover established under diplomatic protection a neutral organization to procure and distribute food to the Belgian populace. Great Britain agreed to let the food pass unmolested through its blockade. Germany in turn promised not to requisition this food destined for helpless noncombatants.

Why Hoover? In the summer of 1914 Herbert Clark Hoover was a prosperous forty-year-old international mining engineer living in London—and dreaming of a career of public service in the United States. This orphaned son of an Iowa blacksmith had come far indeed from his humble beginnings in the American Middle West. Rising rapidly in his chosen profession, by 1914 he directed or in part controlled a worldwide array of mining enterprises that employed a hundred thousand men. "If a man has not made a fortune by 40 he is not worth much," Hoover had said, while still in this thirties. By August 1914 he had achieved his goal yet was not content. "Just making money isn't enough." he confessed to a friend. Instead, he wanted (as he put it) to "get into the big game somewhere." Fascinated by the power of the press to mold and direct public opinion, Hoover that summer was negotiating to purchase a newspaper in California. Events in Europe compelled him to abandon his quest. Had it not been for "the guns of August," he would have entered American public life—and might even be remembered today—as a newspaper magnate.

In the first tumultuous weeks of the war, tens of thousands of American travelers in Europe fled the war-shocked continent for the comparative safety of London—and, they hoped, passage home. It was not as easy as that. Arriving in the British capital, many Yankee tourists found themselves unable to cash their instruments of credit or obtain temporary accommodation, let alone tickets for ships no longer crossing the Atlantic. Responding to the travelers' panic and necessities, Hoover and other American residents of London organized an emergency relief effort that provided food, temporary shelter, and financial assistance to their stranded fellow countrymen. Eventually the passenger ships resumed their sailings, and more than 100,000 weary and frightened travelers headed back to the United States. Hoover's untiring and efficient leadership during the crisis earned him the gratitude of the American ambassador to Great Britain, Walter Hines Page. And when a few weeks later the plight of Belgium became perilous, Ambassador Page and others agreed upon Hoover, a man of demonstrated competence, to administer this new mission of mercy. The globe-trotting mining engineer who had done well, and who now wanted to good, had found an unexpected entree into the "big game."

And so began an undertaking unprecedented in world history: an organized rescue of an entire nation from starvation. Initially no one expected this humanitarian task to last more than a few months. Few foresaw the gruesome stalemate that developed on the western front. As Hoover himself later wrote, "The knowledge that we would have to go for four years, to find a billion dollars, to transport five million tons of concentrated food, to administer rationing, price controls, agricultural production, to contend with combatant governments and with world shortages of food and ships, was mercifully hidden from us."

Within a few months Hoover and a team of mostly American volunteers built up what one British goverment official called "a piratical state organized for benevolence." Indeed, the novel relief organization, which went by the name of the Commission for Relief in Belgium (CRB), possessed some of the attributes of a government. It had its own flag, it negotiated "treaties" with the warring European powers, and its leaders parleyed regularly with diplomats and cabinet ministers in several countries. It even had a "pirate" leader in Hoover, who enjoyed informal diplomatic immunity and traveled freely through enemy lines—probably the only American citizen permitted to do so in the entire war.

As a historian and biographer of Mr. Hoover, I am particularly impressed by four aspects of his wartime service to the people of Belgium. First, by the sheer complexity and magnitude of the relief commission that he led. Today we are apt to take for granted the prompt intervention of humanitarian agencies in areas of distress, be it a famine in Ethiopia, an earthquake in Mexico, or a typhoon in Bangladesh. In 1914, however, no institution for the succor of Belgium existed; it became Hoover's awesome responsibility to create one.

Consider the array of tasks that the Commission for Relief in Belgium was obliged to perform. First it had to raise money throughout the world—partly through charitable appeals, but primarily, as the war went on, through subsidies from the Allied governments. With this money it had to purchase wheat and other foodstuffs from North America, South America, and Australia. Then it had to arrange for shipping these foodstuffs to Belgium; eventually the CRB had a fleet of several dozen ships continuously at its disposal. When these ships entered the European war zone, they were required to navigate carefully lest they be seized or subjected to submarine attack. And when the food-laden vessels reached the neutral Dutch port of Rotterdam, their cargo had to be unloaded for conveyance by canal into Belgium.

Once inside the occupied country the supplies had to be prepared in mills, dairies, and bakeries for human consumption. Then the food had to be distributed equitably to an anxious population scattered over more than 2,500 villages, cities, and towns. As part of its undertaking, the CRB needed to verify that the daily rations did indeed reach their intended recipients and not the German army of occupation. Working with Hoover and his staff was a vast network of forty thousand Belgian volunteers who handled the distribution of food throughout their land. This parallel Belgian organization was known as the Comité National de Secours et d'Alimentation. At its head were some of the country's most eminent business leaders. In early 1915 Hoover's team was allowed to extend its life-sustaining operations to 2 million desperate French civilians caught behind the German battle lines on the western front. Thus the CRB's work came to encompass a total area of nearly twenty thousand square miles.

The commission's functions were even more complex than this summary suggests. Writing in early 1917, one of the CRB's young supervisory delegates, Joseph C. Green, explained in a letter what providing food to a civil population under enemy control actually entailed:

"Take the one item of bread for example. First the [CRB] Provincial Representative has to figure out periodically the exact population of his Province, and the exact quantities of native wheat and rye and of imported wheat and maize on hand. From this he calculates the quantity of imported grain necessary to cover a certain period. This he reports to Brussels, and Brussels to London. London supplies the ships. New York purchases and sees to the loading. Rotterdam transships into canal barges. In the meantime Brussels has decided upon the exact quantities to be shipped to each mill in the country, and Rotterdam ships accordingly. The provincial man must see to the unloading and the milling. The milling involves questions of percentages of bran and flour, of mixtures of native and foreign grains, of the disposal of byproducts and so on."

And this was just the start: "When the flour is finally milled, the real work of distribution begins. Sacks must be provided and kept in rotation. The exact quantity of flour required by a given Commune for a given period must be ascertained. Shipments by canal or rail or tram or wagon must be made to every Commune dependent upon the mill. Boats and cars and horses must be obtained and oil must be supplied for engines and fodder for horses. When the

flour has reached the Local Committee it must be carefully distributed among the bakers in accordance with the needs of each. Baking involves yeast, and the maintenance of yeast factories, and the disposal of by-products, and questions of hygiene and a dozen other minor matters. When the bread is baked it must be distributed to the population by any one of a dozen methods which guarantee an absolutely equitable distribution, each man, woman and child getting the varying ration to which he is entitled, paying for it if he can afford it, and getting it free if he can't. All this involves financial problems, and bookkeeping, and checking and inspection, all along the line; and the whole process to the tune of endless bickering with German authorities high and low, and endless discussions with a thousand Belgian committees.

"Now, if you have digested that, you have some idea of what it means to supply a nation with bread. But that is only one item among many. Lard, rice, milk, clothing, etc., etc.: each involves its own special series of problems."

But "relief in Belgium" meant even more than this. By the middle of April 1917 nearly 5 million people in Belgium and northern France were destitute. Using the CRB's gifts from abroad and the profits from its own food sales to the well-to-do, the Comité National financed a vast and growing web of benevolence, including more than 2,700 local charitable committees as well as various other more specialized institutions. All in all, Hoover calculated that more than half the entire population was receiving some kind of assistance in the spring of 1917, including at least 2,700,000 who were helped by the communal charitable committees.

One object of special solicitude was the young. It was our task and the Belgians', Hoover wrote later, "to maintain the laughter of the children, not to dry their tears." Thanks to the CRB's external fund raising and food imports, and the dedicated zeal of Belgian volunteers, the challenge was impressively met. By early 1917 (to cite but one example) three-fourths of Belgium's children were receiving daily hot lunches at canteens established especially for this purpose.

Another particular concern to Hoover was the plight of Belgium's renowned lace workers. Deprived of essential raw material by the invasion and subsequent blockade, a workforce of forty thousand women faced destitution, long-term idleness, and possible attenuation of their skills until Hoover and his associates stepped in. The CRB arranged to import needed thread for the lacemakers and to sell some of their finished products abroad. It also helped committees make advances to the women for their unsold production, such money to be recovered from the export of accumulated merchandise after the war. In these ways an entire industry was kept alive and thousands of skilled women self-supporting. The sale of the exquisite lace in England and the United States also no doubt helped to sharpen "the club of public opinion" that Hoover wielded in behalf of Belgium's cause.

No enterprise so massive, so multifaceted, so exposed to the passions of war, could hope to function undisturbed. This is the second feature of Hoover's relief experience that impresses the biographer: the unremitting pressures and troubles that beset him at every turn. From the day of its inception, the CRB had to cope with critics in the various belligerent governments who were convinced that its work was enhancing the military strength of one side or the other. Scarcely a month went by that did not witness some challenge to the precarious existence of the commission. Time and again Hoover was immersed in exhausting negotiations in an endless race against famine and malnutrition. Prime Minister Herbert Asquith, Lloyd George, the British Admiralty, the German high command: all at one time or another opposed him—and felt the sting of his relentless entreaties. At times, too, he had furious disagreements with his Belgian counterpart Emile Fancqui, a man, like himself, of great ability and formidable force of personality. Let no one think that humanitarian relief, because of its noble and generous purpose, was exempt from political intrigue, personal ambition, and diplomatic rivalry. It was not.

Sometimes, weary from incessant conflicts with one or another belligerent power, however contemplated resigning. "Were it not for the haunting picture in one's mind of all the long line of people standing outside the relief stations in Belgium," he wrote early in the war, "I would have thrown over the position long since." Ofttimes, too, he threatened to resign—the better to obtain his objectives. But Hoover did not quit. When the chips were down, it was his critics who yielded, recognizing his indispensability and growing statute and the risk of angering American public opinion that he had so skillfully mobilized.

Third, I continue to be impressed—as were so many observers at the time—by the energy, resourcefulness, and public relations acumen of the man at the apex of the CRB. While the relief commission had many volunteers—all, like Hoover, working without pay—and while Hoover himself emphasized the value of organization, his local subordinates knew that one man dominated their endeavors: the man they called "the Chief."

What kind of person was he? Here is Edward Eyre Hunt's description of him in the Belgian relief period:

"In appearance he is astonishingly youthful, smooth-shaven, dark haired, with cool, watchful eyes, clear brow, straight nose, and firm, even mouth. His chin is round and hard.

"One might not mark him in a crowd. There is nothing theatrical or picturesque in his looks or bearing. . . . At work he seems passive and receptive. He stands still or sits still when he talks, perhaps jingling coins in his pocket or playing with a pencil. His repertory of gestures is small. He can be so silent that it hurts.

"Being an American he sometimes acts first and explains afterwards. But his explanations, like his actions, are direct and self-sufficient."

To Ambassador Walter Hines Page, life was "worth more . . . for knowing Hoover. But for him Belgium would now be starved. . . . He's a simple, modest, energetic little man who began his career in California and will end it in Heaven; and he doesn't want anybody's thanks."

Hoover's ability to concentrate on the relief problems at hand was almost legendary. Joseph C. Green later described an encounter he had with "the Chief" in the Brussels office of the CRB:

". . . I found Mr. Hoover standing with his back to the wall, gazing fixedly at a spot on the floor five or six feet in front of me.

"I went over, said good morning, and was about to proffer my hand in the Belgium fashion when I became aware that he was absolutely unconscious of my presence. I stood about awkwardly for a few minutes till he came to with a start, and recognized me with a nod. This extreme absorption in the business of the moment is one of Mr. Hoover's chief characteristics. Belgians, with their more elaborate code of good manners, find it difficult to understand him."

Sometimes Hoover's ability to concentrate had amusing aspects. Hugh Gibson, an American diplomat, told Green one day of the time—

"That Mr. Hoover once came to the Legation to see him on business. During the entire conversation he paced the floor in the little salon upstairs. One of his pacings led him to the door, and he walked out. Gibson thought that he was going to continue his walking up and down in the hall, and his first intimation that the interview was terminated was the sound of footsteps hurrying downstairs. Gibson ran after him and just reached the outside door in time to shout a hurried goodbye."

When the United States entered the European conflict in 1917, Hoover returned home to head a new wartime agency, the United States Food Administration. But the relief commission that brought him fame continued to function, although in a reorganized form necessitated by the end of American neutrality. Throughout the war the CRB and Comité National indefatigably fed more than nine million people a day in Belgium and northern France. And when the commission finally closed its accounts, it found that it had spent nearly a billion dollars. It had sustained the health and morale of the Belgian people. It had made Herbert Hoover an international symbol of practical idealism, and it had launched him on what he later called "the slippery road of public life."

Hoover was not a man to covet what he called "European decorations." Moreover, once he became an official of the United States government he could not accept a title of nobility. In August 1918, therefore, when Hoover visited the tiny portion of Belgium not under German control, King Albert, on petition of his ministers, presented his American guest a specially created, unique title: "Ami de la nation belge," Friend of the Belgian Nation. By royal directive only Hoover would ever hold this title of esteem.

Hoover's association with Belgium did not terminate with the end of World War I. At that point he could easily have retired from the scene; most men no doubt would have done so. But even before the cessation of hostilities he was thinking ahead to the reconstruction of the strifetorn land whose history had intersected so fatefully with his own. As early as 1916 he suggested to the exiled Belgian minister of finance that the CRB's excess funds at the end of the war be used to establish a foundation "for the stimulation of scientific and industrial research." In 1918 Hoover confided to the American minister to Belgium, Brand Whitlock:

"As to the question of re-building in Belgium and Northern France, it is the one job that I would like to have. I believe that it contains usefulness and sentiment beyond any other occupation after this War is ended, and there is nothing that would appeal to me so much as to join with you in a mission of this kind. . . ."

In 1920, after various negotiations, Hoover's dreams achieved practical fruition. Upon liquidating, the CRB had a surplus of over $35 million. Of this sum it distributed more than $18 million in outright gifts to

the Universities of Brussels, Ghent, Liège, Louvain, and other educational institutions. The remainder of the money was divided between two foundations created that year: the CRB Educational Foundation in the United States, and the Fondation Universitaire in Belgium.

Through this device Hoover and his wartime associates forged enduring bonds of Belgian-American cultural exchange, bonds that persist to this day. During the 1920s, for instance, Hoover's foundation granted over $1,600,000 for the rebuilding of the University of Louvian, so terribly ravaged during the German occupation. Thus was born in the tragedy of World War I an empire of philanthropy with which Hoover was identified for the rest of his life.

Finally—and this is the fourth theme to which I call your attention—the creation of the Commission for Relief in Belgium turned out to be more than a passing episode in a great war—and more than a springboard to one man's political career. Hoover's endeavor was in fact a pioneering effort in global altruism—in his own words, "an American epic" that in some ways was the prototype of much that followed in this bloody century. In 1916 Lord Eustace Percy of the British Foreign Office described Hoover as "the advance guard and symbol of the sense of responsibility of the American people towards Europe." A few months later the New Republic echoed this assertion, acclaiming the CRB as "an outpost of the Republic" whose continued success was of the highest national priority. Hoover and his colleagues, declared the journal, had "created an American obligation in Europe." To the New York Times in early 1917, Hoover's administration of the CRB ranked as "perhaps the most splended American achievement of the last two years."

In more recent times the world has grown accustomed to American action to save lives and restore the fractured economies of far-off lands. Indeed, today such involvement is almost universally taken for granted. One reason for this expectation, one reason for its acceptance—although few today know it—is the institution created nearly seventy-five years ago by Herbert Hoover.

For Hoover, also, the Belgian experience was but a prologue. In the years 1917 to 1921, he as well as his country moved even more prominently onto the international stage. No longer just the almoner of Belgium, he became (in General Pershing's words) "the food regulator for the world"—or, as one admirer put it, a "Napoleon of mercy." It has been said that Hoover was responsible for saving more lives than any other person in history. The story of that achievement during the remainder and aftermath of World War I will be a principal focus of the next volume of my biography.

Sixty years ago this fall, while Hoover was seeking the office of President, a certain mediocrity was running for city council in Augusta, Georgia. The candidate apparently knew his limitations, for he announced in his campaign advertisements, "I know I'm not much, but why vote for less?" Without discussing Hoover's later political odyssey, I hope I have said enough here to suggest why his contemporaries came to feel that with him they did not, so to speak, have to "vote for less," and how it was possible for him to become President of the United States without ever having held an elective office.

Why did he do it? Any autobiographical statement that he composed sometime during World War I provides a clue:

"There is little importance to men's lives except the accomplishments they leave to posterity. What a man accomplishes is of many categories and of many points of view; moral influence, example, leadership in thought and inspiration are difficult to measure, to prove or to treasure . . . and the proportion of success to be attributed to their effort is always indeterminate. In the origination or administration of tangible institutions or constructive works men's parts can be more certainly defined. When all is said and done accomplishment is all that counts."

During his lifetime Hoover created and administered many "tangible institutions," the most remarkable of which was the Commission for Relief in Belgium. He also left behind a panoply of achievements long obscured by the bitter memory of the Great Depression. When Hoover died in 1964 at the age of ninety, he had spent fifty years—a half century—in one form or another of public service. It was a record that in sheer scope and duration may be without parallel in American history.

A life like that requires not pages but volumes to measure.●

NUCLEAR REGULATION REORGANIZATION AND REFORM ACT OF 1989—S. 946

● Mr. BREAUX. Mr. President, on May 9 I introduced S. 946, the Nuclear Regulation Reorganization and Reform Act of 1989, along with Senators SIMPSON and BIDEN. I ask unanimous consent that the text of the bill be printed in the RECORD.

The text of the bill follows:

S. 946

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. This Act may be cited as the "Nuclear Regulation Reorganization and Reform Act of 1989".

TITLE I—REORGANIZATION AND REFORM OF NUCLEAR ENERGY REGULATION

Subtitle A—Nuclear Safety Agency

DECLARATION OF PURPOSES

SEC. 101. The Congress declares that—

(a) a clear and coordinated national policy for the development, use, and regulation of atomic energy for peaceful purposes, in accordance with the objectives of the Atomic Energy Act of 1954, as amended, is in the best interest of the general welfare and the common defense and security of this Nation; and

(b) to best achieve these objectives, improvements in the effectiveness of the current approach to the regulation of atomic energy for peaceful purposes are required.

DEFINITIONS

SEC. 102. For the purpose of this Act—

(a) the term "Agency" means the Nuclear Safety Agency established under section 103; and

(b) the term "Administrator" means the Administrator of the Nuclear Safety Agency appointed under section 104(a).

ESTABLISHMENT OF NUCLEAR SAFETY AGENCY

SEC. 103. (a) There is hereby established the Nuclear Safety Agency (hereinafter in this Act referred to as the "Agency"). The Agency shall succeed the Nuclear Regulatory Commission in existence on the day before the effective date of this Act.

(b) There are transferred to the Agency all of the functions of the Nuclear Regulatory Commission.

(c) For purposes of title 5 of the United States Code, the Agency is an Independent Establishment in the Executive Branch of the government.

(d)(1) The Administrator shall keep the Committees of the Senate and the House of Representatives which, under the rules of the Senate and the House, have jurisdiction over the functions of the Agency, fully and currently informed with respect to the activities of the Agency.

(2) For the purpose of any review by the Office of Management and Budget of any Agency rule or regulation, the following procedures shall apply:

(A) For each Agency rule or regulation reviewed by the Office of Management and Budget, the Office shall establish a public docket and shall include in such docket the following information:

(i) copies of all written material received by the Office concerning the Agency rule or regulation under review that originates from persons who are not employees of the federal government; and

(ii) a list of all meetings and all other communications, including oral communications, with persons who are not employees of the federal government concerning the Agency rule or regulation under review.

(B) The Office of Management and Budget shall inform the Administrator of all scheduled meetings with persons who are not employees of the federal government concerning any Agency rule or regulation under review by the Office and shall provide the Agency with a reasonable opportunity to attend such meetings.

(C) The Administrator shall place in the rulemaking record for any nuclear regulation reviewed by the Office of Management and Budget the following information:

(i) copies of all drafts of any proposed or final rule submitted to the Office for review;

(ii) copies of all written materials pertaining to any proposed or final rule submitted to the Office for review; and

(iii) a written explanation of the specific reasons for any significant changes made by the Agency in the draft of any proposed or final rule submitted to the Office for review as a result of such review.

(D) The time for review of Agency rules or regulations by the Office of Management and Budget shall not exceed sixty days following receipt of such submission by the Office. The time for review may be extended for good cause by the Office for an additional thirty days. Notice of any such extension, together with a succinct statement of the reasons therefore, shall be placed in the rulemaking record.

(E) Nothing in this Act alters in any manner—

(i) rulemaking authority vested by law in the Agency to initiate or complete a rulemaking proceeding or to issue, modify, or rescind a rule or regulation; or

(ii) the criteria for rulemaking applicable under other statutes.

OFFICERS

SEC. 104. (a) The Agency shall be administered under the supervision and direction of an Administrator, who shall be appointed by the President, by and with the advice and consent of the Senate.

(b) There shall be in the Agency a Deputy Administrator who shall be appointed by the President, by and with the advice and

consent of the Senate. The Deputy Administrator shall perform such functions as the Administrator shall prescribe.

(c)(1) Section 5313 of title 5, United States Code, is amended by adding at the end thereof the following: "Administrator, Nuclear Safety Agency.";

(2) Section 5314 of title 5, United States Code, is amended by adding at the end thereof the following: "Deputy Administrator, Nuclear Safety Agency.";

(3) Section 5313 of title 5, United States Code, is amended by striking "Chairman, NRC";

(4) Section 5314 of title 5, United States Code, is amended by striking "Member, NRC"; and

(5) Section 5315 of title 5, United States Code, is amended by striking "Executive Director for Operations, Nuclear Regulatory Commission".

ABOLITION OF NUCLEAR REGULATORY COMMISSION

SEC. 105. The Nuclear Regulatory Commission is hereby abolished. Sections 201(a)-(g) and 209 of the Energy Reorganization Act of 1974, as amended, are repealed.

TRANSFER AND ALLOCATION OF APPROPRIATIONS AND PERSONNEL

SEC. 106. The personnel employed and the assets, liabilities, grants, contracts, property, records, and unexpended balances of appropriations, authorizations, allocations, and other funds employed, held, used, arising from, available, or to be made available, in connection with the Nuclear Regulatory Commission and the functions transferred under this Act, are, subject to section 1531 of title 31, United States Code, transferred to the Agency for appropriate allocation.

EFFECT ON PERSONNEL

SEC. 107. (a) The transfer of personnel pursuant to this Title shall not cause any employee to be separated or reduced in grade or compensation.

(D) Any person who, on the day before the effective date of this title, held a position compensated in accordance with the Executive Schedule prescribed in chapter 53 of title 5, United States Code, and who, without a break in service, is appointed in the Agency to a position having duties comparable to those performed immediately preceding his appointment, shall continue to be compensated in his new position at not less than the rate provided for his previous position for the duration of his service in this new position.

INCIDENTAL TRANSFERS

SEC. 108. The Director of the Office of Management and Budget, at such time or times as the Administrator shall provide, may make such determination as may be necessary with regard to the transfer of the Nuclear Regulatory Commission pursuant to this Title and the transfer of functions under this Title, and to make such additional incidental disposition of personnel, assets, liabilities, grants, contracts, property, records, and unexpended balances of appropriations, authorizations, allocations, and other funds held, used, arising from, available, or to be made available in connection with the Nuclear Regulatory Commission and the functions transferred under this Title, as may be necessary to carry out the provisions of this Title. The Director of Management and Budget shall provide for such further measures and dispositions as may be necessary to effectuate the purposes of this Title.

SAVINGS PROVISIONS

SEC. 109. (a) All orders, determinations, rules, regulations, permits, grants, contracts, certificates, licenses, and privileges—

(1) which have been issued, made, granted, or allowed to become effective by the President, the Nuclear Regulatory Commission, or any court of competent jurisdiction, in the performance of functions which are transferred under this Title; and

(2) which are in effect at the time this Title takes effect,

shall continue in effect according to their terms until modified, terminated, superseded, set aside, revoked, or repealed in accordance with law by the President, the Administrator or other duly authorized official, a court of competent jurisdiction, or by operation of law.

(b)(1) The provisions of this Title shall not affect any proceeding, petition, or application for a license or other form of permission or approval pending at the time this Title takes effect before the Nuclear Regulatory Commission with respect to functions transferred under this Title, but such proceedings, petitions, and applications, to the extent that they relate to functions so transferred, shall be continued before the Agency. Decisions shall be issued with respect to such proceedings, applications, or petitions, appeals shall be taken therefrom, and payments shall be made pursuant to such decisions, as if this Title had not been enacted. Decisions issued with respect to such proceedings, applications, or petitions shall continue in effect until modified, terminated, superseded, revoked, or repealed by the Administrator or other duly authorized official, by a court of competent jurisdiction, or by operation of law. Nothing in this subsection shall be deemed to prohibit the discontinuance or modification of any such proceeding, petition, or application under the same terms and conditions and to the same extent that such proceeding, petition, or application could have been discontinued or modified if this Title had not been enacted.

(2) The Administrator is authorized to promulgate regulations providing for the orderly transfer of proceedings continued under paragraph (1) of the Agency.

(c) Except as provided in subsection (e)—

(1) the provisions of this Title shall not affect actions commenced prior to the date this Title takes effect, and

(2) in all such actions, proceedings shall be had, appeals taken, and judgments rendered, in the same manner and with the same effect as if this Title had not been enacted.

(d) No action or other proceeding commenced by or against any individual in the official capacity of such individual as an officer of the Nuclear Regulatory Commission shall abate by reason of the enactment of this Title. No cause of action commenced by or against the Nuclear Regulatory Commission or functions transferred under this Title shall abate by reason of the enactment of this Title.

(e) If, before the date on which this Title takes effect, the Nuclear Regulatory Commission, or any officer thereof in the official capacity of such officer, is a party to an action under this Title, such action shall be continued with the Administrator or other appropriate official of the Agency, as the case may be, substituted or added as a party.

(f) Orders and actions of the Administrator in the exercise of the functions transferred under this Title shall be subject to judicial review to the same extent and in the same manner as if such orders and actions had been by the Nuclear Regulatory Commission in exercising such functions immediately preceding their transfer. Any statutory requirements relating to notice, hearings, actions upon the record, or administrative review that apply to the exercise of such functions transferred under this Title shall apply to the exercise of such functions by the Administrator.

REFERENCE

SEC. 110. With respect to any function transferred under this Title and exercised after the effective date of this Title, any reference in any other federal law, Executive Order, rule, regulation, certificate, directive, instruction, delegation of authority, or other official document in force on the effective date of this Title of or pertaining to the Nuclear Regulatory Commission shall be deemed to refer and apply to the Agency. After consultation with the appropriate committees of the Congress, the Administrator shall prepare and submit to the Congress proposed legislation containing technical and conforming amendments to title 42, United States Code, and to other provisions of law to reflect the changes made by this Title. Such legislation shall be submitted not later than six months after the effective date of this Title.

CONFORMING CHANGES

SEC. 111. Title II of the Energy Reorganization Act of 1974 (42 U.S.C. 5841 et seq.) is amended by—

(a) striking the phrase "a Director" wherever that phrase appears and inserting in lieu thereof "an Assistant Administrator";

(b) striking the phrase "the Director" wherever that phrase appears and inserting in lieu thereof "the Assistant Administrator"; and

(c) striking the phrase ", as provided in section 209," wherever that phrase appears.

CONSTRUCTION AUTHORIZATION FOR NUCLEAR WASTE REPOSITORY

SEC. 112. Section 191 of the Atomic Energy Act of 1954, as amended, is amended by adding a new subsection (c), as follows:

"(c)(1) Upon the receipt of an application for a construction authorization pursuant to 42 U.S.C. 10134(b), the Administrator shall establish one or more licensing boards for the conduct of any formal adjudicatory proceedings that may be requested on such application. Each board shall be comprised of three members, one of whom shall be qualified in the conduct of administrative proceedings and two of whom shall be appointed from among persons nominated by the Nuclear Waste Technical Review Board in accordance with paragraph (2). Members of the Board shall be appointed for such length of time as may be necessary to consider and act upon such application.

"(2) The Nuclear Waste Technical Review Board shall, not later than 60 days after the date on which the recommendation of site designation becomes effective under 42 U.S.C. 10135, nominate not less than 6 persons for appointment to the initial licensing board established pursuant to paragraph (1). Each person nominated for appointment to the Board shall have such technical or other qualifications as the Nuclear Waste Technical Review Board deems appropriate to the issues to be decided in consideration of an application for a construction authorization.

"(3) If a board member becomes unavailable or is recused after appointment, or it

the Administrator determines that proceedings before more than one board become necessary to complete the proceedings in a timely manner, additional members or additional boards shall appointed in the same manner provided for the appointment of the initial member of board. For the purpose of appointing members required to be nominated by the Nuclear Waste Technical Review Board, the Administrator may, as appropriate, either appoint from among those initially nominated or shall request the Nuclear Waste Technical Review Board to nominate one or more additional groups of six persons.

"(4) Upon the issuance of an initial decision by the licensing board on an application for a construction authorization, the Administrator may either affirm the decision in whole or in part, or set aside, remand, or reverse any action, findings, or conclusions found to be arbitrary, capricious, an abuse of discretion, or otherwise not in accordance with law or unsupported by substantial evidence.".

Subtitle B—Office of Investigations

SEC. 121. (a) Title II of the Energy Reorganization Act of 1974 (42 U.S.C. 5801 et seq.) is amended by adding a new section 205A, as follows:

"OFFICE OF INVESTIGATIONS

"SEC. 205A. (a) There is hereby established in the Agency an Office of Investigations under the direction of an Assistant Administrator for Investigations, who shall be appointed by the Administrator, who shall report directly to the Administrator and who shall serve at the pleasure of and be removable by the Administrator.

"(b) Subject to the provisions of this Act, the Assistant Administrator for Investigations shall perform such functions as the Administrator shall designate, including investigations into possible violations of the Atomic Energy Act, the Energy Reorganization Act, or any other statutes that the Administrator is responsible for implementing, and rules, regulations, orders, and license conditions issued by the Agency thereunder, that may involve intent or purpose to commit such violation, or that may have arisen as a result of careless disregard, deception, or other indications of willful intent.

"(c)(1) The Assistant Administrator for Investigations may initiate an investigation at the request of the Administrator, Deputy Administrator, or a Regional Administrator.

"(2)(A) The Assistant Administrator may initiate an investigation on his or her own initiative. The Administrator may prohibit the Assistant Administrator from conducting investigative activities, after the Assistant Administrator has decided to initiate, carry out, or complete an investigation, if the Administrator determines specifically with respect to such investigation that such prohibition is necessary to protect the public health and safety or the common defense and security.

"(B) If the Administrator exercises any power under subparagraph (A), the Assistant Administrator shall submit a statement concerning such exercise within thirty days to the Committee on Environment and Public Works of the Senate and the Committees on Interior and Insular Affairs and Energy and Commerce of the House of Representatives.

"(C) The Administrator shall, within thirty days after submission of a statement under subparagraph (B), transmit a statement of the reasons for the exercise of power under subparagraph (A) to the Committee on Environment and Public Works of the Senate and the Committees on Interior and Insular Affairs and Energy and Commerce of the House of Representatives.

"(d) Any employee of the Agency obtaining information concerning possible violations falling within the scope of authority of the Office of Investigations shall promptly provide such information to the Office of Investigations.

"(e) Whenever the Assistant Administrator for Investigations has reasonable grounds to believe that there has been a violation of Federal criminal law, the Assistant Administrator, after notifying the Administrator, shall report such violation to the Attorney General. Neither the Administrator nor any other employee of the Agency shall prevent or prohibit the Assistant Administrator from reporting such violations to the Attorney General.".

(b) Within 90 days from the date of enactment of this Act, the Commission and the Attorney General shall enter into a memorandum of understanding to—

(1) provide for the coordination of matters that could lead both to enforcement action by the Commission as well as criminal prosecution by the Attorney General;

(2) provide decision procedures and schedules with respect to action on matters referred to the Attorney General; and

(3) facilitate the exchange of information relating to matters within the respective jurisdiction of the Commission and the Department of Justice.

(c) Section 5315 of title 5, United States Code is amended by adding at the end thereof the following: "Assistant Administrator for Investigations, Nuclear Safety Agency.".

Subtitle C—Nuclear Reactor Safety Investigations Board

FINDINGS AND PURPOSE

SEC. 131. (a) The Congress finds that—

(1) there exists a potential for conflict of interest in the investigation of significant safety events arising out of activities licensed or otherwise regulated by the Nuclear Safety Agency, where the Agency's prior action or inaction may have been a partial contributor to the cause of such event;

(2) an independent organization for the investigation of such events will inspire greater public confidence in the investigatory process for such incidents; and

(3) the increased stature and enhanced visibility of the investigations conducted by such an independent organization, and the recommendations made as a result of such investigations, will help to ensure timely consideration and implementation of the recommendations of such an organization.

(b) The purpose of this subtitle is to establish a Nuclear Reactor Safety Investigations Board to—

(1) conduct independent investigations of significant safety events arising out of activities at production or utilization facilities licensed by the Agency under section 103 or 104 of the Atomic Energy Act of 1974 (42 U.S.C. 2133, 2134); and

(2) submit to the Administrator and to the Congress the results of any such investigation, including any recommendations for actions to be taken by the Administrator to prevent the recurrence of such events.

NUCLEAR REACTOR SAFETY INVESTIGATIONS BOARD

SEC. 132. (a) There is hereby established within the Nuclear Safety Agency an independent board to be known as the Nuclear Reactor Safety Investigations Board (hereafter in this section referred to as the "Board").

(b) The Board shall consist of three members who shall be appointed by the President, by and with the advice and consent of the Senate. The members shall be appointed on the basis of technical qualification, professional standing, and demonstrated competence and knowledge relevant to the investigative functions of the Board. No more than two members of the Board shall be of the same political party. Not later than 90 days after the effective date of this Title, the President shall submit such nominations for appointment to the Board. The President shall designate one member to serve at the Chairperson of the Board.

(c) The terms of office of members of the Board shall be three years, except as otherwise provided in this subparagraph. Of the three members first appointed to the Board, one shall serve for one year, one for two years, an one for three years. Any individual appointed to fill a vacancy occurring on the Board prior to the expiration of the term of office for which his or her predecessor was appointed shall be appointed for the remainder of the term. Upon the expiration of his or her term of office, a member shall continue to serve until his or her successor is appointed and shall have qualified. Any member of the Board may be removed by the Residents for inefficiency, neglect of duty, or malfeasance of office.

(d)(1) The Chairperson shall be the chief executive officer of the Board and shall exercise the excutive and administrative functions of the Board with respect to the appointment and supervision of personnel employed by the Board, the distribution of business among such personnel and among administrative units of the Board, and the use and expenditure of funds.

(2) Section 5314 of title 5, United States Code, is amended by adding at the end thereof the following: "Chairperson, Nuclear Reactor Safety Investigations Board.".

SEC. 133. The Board shall have the following functions and authorities:

(a)(1) The Board may investigate or cause to be investigated any significant safety event, as defined in paragraph (5) of this subsection, arising out of activites at production or utilization facilities licensed by the Agency under section 103 or 104 of the Atomic Energy Act of 1954 (42 U.S.C. 2133, 2134). The Board may also investigate or cause to be investigated other safety events upon the request of the Administrator.

(2) The purpose of any investigation initiated pursuant to this subsection shall be to determine the facts, conditions, and circumstances of the significant safety events investigated, including—

(A) an assessment of the implications of such event for public health and safety;

(B) a determination of whether such event is part of a pattern of similar events at production or utilization facilities licensed by the Agency under section 103 or 104 of the Atomic Energy Act of 1954 (42 U.S.C. 2133, 2134) which could adversely affect the public health or safety; and

(C) an assessment of the root causes of such event, including the contribution, if any, of the actions of the Agency to such event.

(3) The Board shall report in writing, and shall submit such report to the Administrator, on the facts, conditions, and circumstances of each event investigated pursuant to this subsection, including—

(A) the date and place of the event;

(B) the nature and probable consequence of the event;

(C) the cause or causes of the event; and

(D) any action recommended to prevent the recurrence of the event, including any recommendations for actions to be taken by the Agency with regard to regulatory requirements or practices.

(4)(A) The Administrator shall respond in writing to any recommendations of the Board within 120 days of receipt of such recommendations. Such written response shall detail specific measures adopted or to be adopted by the Administrator in response to such recommendations, and explanations for the Administrator's inaction on any recommendations not adopted.

(B) The recommendations of the Board made pursuant to paragraph (3) and the response of the Administrator to such recommendations shall be made available to the public and shall be submitted to Congress.

(5) For the purpose of this subtitle, a "significant safety event" shall be defined as an event that involves:

(A) a moderate exposure to, or release of, radioactive material from a production or utilization facility licensed by the Agency under section 103 or 104 of the Atomic Energy Act of 1954 (42 U.S.C. 2133, 2134);

(B) a major degradation of essential safety-related equipment at a production or utilization facility licensed by the Agency under section 103 or 104 of the Atomic Energy Act of 1954 (42 U.S.C. 2133, 2134); or

(C) a major deficiency in the design, construction, use of, or management controls for a production or utilization facility licensed by the Agency under section 103 or 104 of the Atomic Energy Act of 1954 (42 U.S.C. 2133, 2134).

(6) Except for investigations initiated at the request of the Administrator, the Board shall, prior to the initiation of an investigation pursuant to this section, consult with the Administrator and, if the Board determines that an investigation is warranted, the Board shall set forth in writing the basis for the Board's determination that the event constitutes a significant safety event, as defined in paragraph (5). The written statement of the Board's basis for initiating an investigation shall not be subject to judicial review. The written statement shall be made available to the public and shall be submitted to Congress.

(7) No part of the conclusions, findings, or recommendations of any report of the Board relating to any event or the investigation of such event shall be admitted as evidence or used in any suit or action for damages growing out of any matter mentioned in such report.

(b) Following the issuance of a written determination pursuant to paragraph (a)(6) of this section, or upon the initiation of an investigation requested by the Administrator, any employee of the Board, upon presenting appropriate credentials, including any security clearance required by the Administrator, and a written notice of inspection authority, may enter the facility where the event has occurred and do all things appropriate for a proper investigation. The employee may inspect and copy records, files, and documents, including licensee records, files, and documents at locations other than the facility where the event occurred, and may inspect processes, controls, and facilities relevant to the investigation of such event.

(c) Subject to section 552a of title 5, United States Code, the Board may secure directly from any agency or instrumentality of the United States such information as that agency or instrumentality may already possess as may be necessary to enable the Board to carry out an investigation pursuant to this subtitle. Upon request of the Board, the head of such agency or instrumentality shall furnish such information to the Board. The information which the Board may secure under this subsection may include any material designated as classified material pursuant to the Atomic Energy Act of 1954, or any materials designated as safeguards information and otherwise protected from disclosure under section 147 of the Atomic Energy Act of 1954.

(d)(1) Following the issuance of a written determination pursuant to paragraph (a)(6) of this section, or upon the initiation of an investigation requested by the Administrator, the Board or, upon authority of the Board, any member thereof, any administrative law judge employed by or assigned to the Board, or any officer or employee duly designated by the Board, may, for the purpose of carrying out this subtitle, hold such hearings, sit and act at such times and places, administer such oaths, and require by subpoena or otherwise attendance and testimony of such witnesses and the production of evidence as the Board or such officer or employee deems advisable. Subpoenas shall be issued only under the signature of a Board member, upon authorization by the Board, and may be served by any person designated by the Board.

(2) Any person who willfully neglects or refuses to qualify as a witness, or to testify, or to produce any evidence in obedience to any subpoena duly issued under the authority of this paragraph shall be fined not more than $5,000, or imprisoned for not more than 6 months, or both. Upon certification by the Board of the facts concerning any willful disobedience by any person to the United States Attorney for any judicial district in which the person resides or is found, the Attorney may proceed by information for the prosecution of the person for the offense.

(3) Where the Board discovers information during the course of its investigation involving matters within the jurisdiction of the Agency's Inspector General or the Assistant Administrator for Investigations, such information shall be forwarded promptly, as appropriate, directly to the Inspector General or concurrently to the Administrator and the Assistant Administrator for Investigations.

(e)(1) Subject to such rules as may be prescribed by the Board, the Board may appoint and fix the pay of such officers and employees (including investigators and attorneys) as the Board considers necessary to carry out the powers and duties of the Board. Appointments shall be made under this paragraph in such manner that not more than the equivalent of 55 full-time officers and employees are employed by the Board at any time.

(2) Employees of the Board shall be selected, appointed, employed, and compensated pursuant to section 161d. of the Atomic Energy Act of 1954, as amended.

(f) Subject to such rules as may be prescribed by the Board, the Board may procure temporary and intermittent services under section 3109(b) of title 5, United States Code, but at rates for individuals not to exceed the daily equivalent of the maximum annual rate of basic pay payable for grade GS-18 of the General Schedule. The amount of consultant services which may be obtained by the Board under this subsection shall not exceed, during any fiscal year period, the amount of services which would be obtained if the Board procured on a full-time basis the services of 12 consultants.

(g)(1) Upon request of the Board, the Administrator or the head (or governing authority) of any other Federal agency or instrumentality may—

(A) detail to the Board, on a reimbursable basis, such personnel as may be desirable to assist the Board in carrying out its duties; and

(B) make available to the Board, on a reimbursable basis, such facilities, equipment, or other administrative support services as may be desirable to assist the Board in carrying out its duties.

(2) The Administrator shall provide the Board with appropriate and adequate office space, together with such equipment, office supplies, and communications facilities and services as may be necessary for the operation of the Board and shall provide necessary maintenance services for such offices and the equipment and facilities located therein.

(h) The Board may confer with employees of State or local government agencies and may use, on a reimbursable basis, such services, records, and facilities as such agencies may make available to the Board.

(i) The Board may use the United States mails in the same manner and under the same conditions as other departments and agencies of the United States.

(j) The Board shall report annually to the Congress on the activities of the Board. Such report shall contain—

(1) a summary of the significant safety events investigated by the Board during the preceding calendar year; and

(2) a summary, in such detail as the Board deems advisable, of the recommendations made by the Board pursuant to subparagraph (a)(3)(D) of this section, together with the observed response of the Administrator to each such recommendation.

Such reports shall be made available to Federal, State, and local government agencies concerned with safety at production or utilization facilities licensed by the Agency under section 103 or 104 of the Atomic Energy Act of 1954 (42 U.S.C. 2133, 2134). Upon request, such reports shall be made available to other interested persons.

(k) The Board is authorized to establish rules, procedures, or other appropriate guidance governing the operations of the Board and the conduct of Board investigations.

SEC. 134. There shall be transferred to the Board such offices of the Agency, or functions, powers, or duties of such offices, as the Administrator may determine are properly related to the functions of the Board and will further the purposes of this Act, except that there shall not be transferred to the Board any program operating responsibilities.

SEC. 135. (a) There are hereby authorized to be appropriated for each of the fiscal years 1989, 1990, 1991, 1992, 1993, and 1994 the sum of $5,500,000.

(b) The Board shall terminate at the end of fiscal year 1994.

Subtitle D—Separability

SEC. 141. If any provision of this title, or the application of such provision to any person or circumstance, is held invalid, the remainder of this title, or the application of such provision to persons or circumstances other than those as to which it is held invalid, shall not be affected thereby.

Subtitle E—Effective Date

SEC. 151. This Title and the amendments made by this Title shall take effect on such date during the 6-month period beginning on July 21, 1989, as the President may direct in an Executive Order. If the President fails to issue an Executive Order for the purpose of this section, this Title and such amendments shall take effect on January 21, 1990.

TITLE II—MISCELLANEOUS PROVISIONS

NOTIFICATION REQUIREMENTS FOR NONCOMPLIANCE

SEC. 201. Section 206 of the Energy Reorganization Act of 1974, as amended (42 U.S.C. 5846), is amended to read as follows:

"NONCOMPLIANCE

"SEC. 206. (a) Any firm constructing, owning, operating, or supplying the components of any facility or activity which is licensed or otherwise regulated pursuant to the Atomic Energy Act of 1954, as amended, or pursuant to this Act, and any individual director or responsible officer of such a firm, obtaining information reasonably indicating that such facility or activity or basic components supplied to such facility or activity—

"(1) fails to comply with the Atomic Energy Act of 1954, as amended, or any applicable rule, regulation, order, or license of the Agency relating to substantial safety hazards, or

"(2) contains a defect which could create a substantial safety hazard, as defined by regulations which the Agency shall promulgate,

shall immediately notify the Agency of such failure to comply, or of such defect, unless such firm or individual has actual knowledge that the Agency has been adequately informed of such defect or failure to comply.

"(b) The Administrator is authorized to issue such regulations and orders as may be necessary to ensure compliance with this section, including regulations and orders requiring any firm subject to this section to devise and implement procedures to identify, evaluate, and report defects.

"(c) Any firm or individual who violates any regulation or order issued under subsection (b) of this section shall be subject to a civil penalty in the same manner and amount as for violations subject to a civil penalty under section 234 of the Atomic Energy Act of 1954, as amended.

"(d) The requirements of this section shall be prominently posted on the premises of any firm subject to this section.

"(e) The Agency is authorized to conduct such reasonable inspections, investigations, and other enforcement activities as needed to ensure compliance with the provisions of this section and with any regulations and orders issued thereunder.

"(f) For purposes of this section, the term 'firm' shall have the meaning provided for the term 'person' in subsection 11 s. of the Atomic Energy Act of 1954, as amended, except that it shall include the Department of Energy to the extent that its facilities, materials, or activities are licensed by the Agency and shall not include an 'individual.' ".

DISCLOSURE OF SECURITY-RELATED SAFEGUARDS INFORMATION

SEC. 202. Section 147 of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2167), is amended by inserting the following language in subsection a. before the sentence that begins "The Commission shall exercise the authority": "Paragraphs (1), (2), and (3) of this subsection shall include safeguards information contained in generic studies, reports, and analyses that would provide substantial assistance in compromising or negating any of a licensee's specific security measures or procedures to protect nuclear material or facilities, as described in subparagraphs (1), (2), and (3) of this subsection, or in targeting a licensee's vital plant equipment as described in subparagraph (3) of this subsection.".

STORAGE AND DISPOSAL OF GREATER-THAN-CLASS-C LOW-LEVEL WASTE

SEC. 203. (a) Subject to the requirements an limitations of this section, the Secretary is authorized to accept for storage low-level radioactive waste with concentrations of radionuclides that exceed the limits established by the Agency for Class C radioactive waste, as defined by section 61.55 of title 10, Code of Federal Regulations, as in effect on January 26, 1983, that is owned or generated under license or regulation of the Agency (or an Agreement State): *Provided, however,* That no such waste shall be accepted by the Secretary until the Secretary submits to Congress a comprehensive report setting forth—

(1) the options for the permanent disposal of such waste and a discussion of the actions that the Secretary intends to take to implement the preferred disposal option; and

(2) the options for ensuring that the beneficiaries of the activities resulting in the generation of such waste bear all reasonable costs of the storage and disposal of such waste and a discussion of the actions that the Secretary intends to take to implement the preferred cost recovery option.

(b) Low-level radioactive waste with concentrations of radionuclides that exceed the limits established by the Agency for Class C radioactive waste, as defined by section 61.55 of title 10, Code of Federal Regulations, as in effect on January 26, 1983, that is owned or generated under license or regulation of the Agency (or an Agreement State) shall, except as otherwise provided in subsections (c) and (d), be stored or disposed of only in a facility that is licensed by the Agency (or an Agreement State). Any storage or disposal facility for such waste that is operated by the Federal Government shall be licensed only by the Agency.

(c) Prior to the issuance of a license for a storage facility, the Agency may permit the transfer to the Secretary for storage of low-level radioactive waste with concentrations of radionuclides that exceed the limits established by the Agency for Class C radioactive waste, as defined by section 61.55 of title 10, Code of Federal Regulations, as in effect on January 26, 1983, that is owned or generated under license or regulation of the Agency (or an Agreement State), if the Agency determines in writing that such transfer is necessary to eliminate an immediate and serious threat to the public health and safety or the common defense and security.

(d)(1) Nothing in this section shall be deemed to apply to or otherwise affect any contractual obligation of the Secretary entered into on or before June 9, 1988, pursuant to which the Secretary is required to accept low-level radioactive waste with concentrations of radionuclides that exceed the limits established by the Agency for Class C radioactive waste, as defined by section 61.55 of title 10, Code of Federal Regulations, as in effect on January 26, 1983, that is owned or generated under license or regulation of the Agency (or an Agreement State).

(2) Nothing in this section shall be deemed to alter, amend, or otherwise apply to the activities of the Secretary pursuant to the West Valley Demonstration Project Act (42 U.S.C. 2021a *et seq.*).

(3) Nothing in this section shall be deemed to alter, amend, or otherwise apply to the activities of the Secretary specifically authorized pursuant to the Memorandum of Understanding Between the U.S. Nuclear Regulatory Commission and the U.S. Department of Energy Concerning the Removal and Disposition of Solid Nuclear Wastes from Cleanup of the Three Mile Island Unit 2 Nuclear Plant (46 Federal Register 38614, July 28, 1981), as amended by the Memorandum of Understanding Between the U.S. Nuclear Regulatory Commission and the U.S. Department of Energy Concerning the Removal and Disposition of Solid Nuclear Wastes from Cleanup of the Three Mile Island Unit 2 Nuclear Plant (47 Federal Register 16229, April 15, 1982).

(4) Nothing in this section shall be deemed to alter, amend, or otherwise apply to the activities of the Secretary pursuant to the Nuclear Waste Policy Act of 1982, as amended (42 U.S.C. 10101 *et seq.*).

(5) Nothing in this section shall be deemed to alter, amend, or otherwise affect the responsibility of States or compacts pursuant to the Low Level Radioactive Waste Policy Amendments Act of 1985 (42 U.S.C. 2021b *et seq.*).

(6) Nothing in this section shall be deemed to alter, amend, or otherwise apply to low-level radioactive waste with concentrations of radionuclides that exceed the limits established by the Agency for Class C radioactive waste, as defined by section 61.55 of title 10, Code of Federal Regulations, as in effect on January 26, 1983, that is owned or generated under license or regulation of the Agency (or an Agreement State) and that is classified for national security purposes pursuant to the Atomic Energy Act of 1954, as amended.

QUARTERLY REPORT ON IMPLEMENTATION OF THE NUCLEAR WASTE POLICY ACT

SEC. 204. The Administrator shall submit to the Committee on Energy and Commerce and the Committee on Interior and Insular Affairs of the House of Representatives and the Committee on Environment and Public Works of the Senate each quarter a report on the status of the Agency's implementation of the Nuclear Waste Policy Act of 1982, as amended (42 U.S.C. 10101 *et seq.*). Such report shall include a detailed summary of—

(a) the activities of the Agency during such quarter;

(b) the funds expended during such quarter;

(c) all interactions with the Department of Energy with regard to implementation of the Act, including Agency communications, recommendations, and other activities regarding the development of a repository pursuant to title I of such Act; and

(d) the technical issues that relate to the licensability of any candidate site under consideration for development as a repository and any activities undertaken by the Agency during such quarter with respect to such issues.

WEST CHICAGO THORIUM TAILINGS SITE

SEC. 205. The Nuclear Safety Agency may not designate a permanent disposal site for low-level nuclear wastes at Ann and Factory Streets in West Chicago, Illinois, until the

Agency has studied alternative sites to determine the safest site available to store such wastes.●

THANK YOU SUE GENTRY FOR YOUR DEDICATION AND SERVICE TO INDEPENDENCE, MO

● Mr. BOND. Mr. President, Miss Sue Gentry, a lifelong Missourian, is being honored by her native home of Independence on May 19. Miss Gentry's professional and personal achievements stand as a living legacy in her community.

Sue Gentry began her heralded journalism career in 1929 at the Independence Examiner, a paper she would spend her entire career with. She served as editor of the paper from 1943 to 1952 holding the distinction of being the only woman to do so. She traveled to Washington, DC, in 1945 to cover the White House Press Conference on the end of the war with Japan.

Miss Gentry excelled outside the halls of the Examiner as well. She joined the Daughters of the American Revolution in 1939; she was elected president of the Missouri Press Women in 1959, and she served as president of Theta Signa Phi, an honor society for women in communication, from 1954 to 1955. From 1966 to 1989 she has worked as editor of the Jackson County Historical Society Journal. In 1974, she became president of the Jackson County Historical Society and today serves as cochairman of the society's archives.

Sue Gentry has not gone unnoticed by her peers or her community. In 1960, she received the "Woman of Achievement" Award from Theta Sigma Phi. William Chrisman High School cited her as their outstanding alumnus in 1969. The following year, 1970, she was named Missouri Press Woman of the Year. Throughout the seventies, she was honored several times by the Independence Chamber of Commerce, the Independence School Board, and other organizations in eastern Jackson County.

The decade of the eighties has continued to bring acclaim and recognition to this most-deserving lady. "Sue Gentry Day" was celebrated in Independence in 1984. Last year, the city of Independence presented her with an award for public service and the Rotary Club named her recipient of the Mark H. Siegfried Rotary Award of Merit.

Miss Sue Gentry has dedicated her life to the community of Independence, MO, through her tireless civic endeavors and high standards of professionalism as a journalist. She has made an impact decade after decade and has touched generations.

My fellow colleagues, please join me in commending Miss Sue Gentry for her lifetime of dedication to the great people of Independence and all of Missouri.●

BUDGET SCOREKEEPING REPORT

● Mr. SASSER. Mr. President, I hereby submit to the Senate the latest budget scorekeeping report for fiscal year 1989, prepared by the Congressional Budget Office in response to section 308(b) of the Congressional Budget Act of 1974, as amended. This report was prepared consistent with standard scorekeeping conventions. This report also serves as the scorekeeping report for the purposes of section 311 of the Budget Act.

This report shows that current level spending is over the budget resolution by $0.9 billion in budget authority, and over the budget resolution by $0.4 billion in outlays. Current level is under the revenue floor by $0.3 billion.

The current estimate of the deficit for purposes of calculating the maximum deficit amount under section 311(a) of the Budget Act is $135.7 billion, $0.3 billion below the maximum deficit amount for 1988 of $136.0 billion.

The report follows:

U.S. CONGRESS,
CONGRESSIONAL BUDGET OFFICE,
Washington, DC, May 15, 1989.

Hon. JIM SASSER,
Chairman, Committee on the Budget, U.S. Senate, Washington, DC.

DEAR MR. CHAIRMAN: The attached report shows the effects of congressional action on the budget for fiscal year 1989 and is current through May 12, 1989. The estimates of budget authority, outlays, and revenues are consistent with the technical and economic assumptions of the most recent budget resolution, House Concurrent Resolution 268. This report is submitted under section 308(b) and in aid of section 311 of the Congressional Budget Act, as amended, and meets the requirements for Senate scorekeeping of section 5 of Senate Concurrent Resolution 32, the 1986 first concurrent resolution on the budget.

Since my last report, Congress has taken no action that affects the current level of spending or revenues.

Sincerely,

ROBERT D. REISCHAUER,
Director.

CBO WEEKLY SCOREKEEPING REPORT FOR THE U.S. SENATE, 101ST CONG., 1ST SESS., AS OF MAY 12, 1989

[In billions of dollars]

	Current level [1]	Budget resolution H. Con. Res. 268 [2]	Current level +/− resolution
Fiscal Year 1989			
Budget authority	1,233.0	1,232.1	0.9
Outlays	1,100.1	1,099.8	.4
Revenues	964.4	964.7	−.3
Debt subject to limit	2,750.3	[3] 2,824.7	−74.4
Direct loan obligations	24.4	28.3	−3.9
Guaranteed loan commitments	111.0	111.0	
Deficit	135.7	[4] 136.0	[5] −.3

[1] The current level represents the estimated revenue and direct spending effects (budget authority and outlays) of all legislation that Congress has enacted in this or previous sessions or sent to the President for his approval and is consistent with the technical and economic assumptions of H. Con. Res. 268. In addition, estimates are included of the direct spending effects for all entitlement or other mandatory programs requiring annual appropriations under current law even though the appropriations have not been made. The current level of debt is subject to limit reflects the latest U.S. Treasury information on public debt transactions.

[2] In accordance with sec. 5(a)(b) the levels of budget authority, outlays, and revenues have been revised for Catastrophic Health Care (Public Law 100–360).

[3] The permanent statutory debt limit is $2,800.0 billion.

[4] Maximum deficit amount [MDA] in accordance with section 3(7)(D) of the Congressional Budget Act, as amended.

[5] Current level plus or minus MDA.

DRUGS, LAW ENFORCEMENT AND FOREIGN POLCY

● Mr. KERRY. Mr. President, recently the Foreign Relations Subcommit-

tee on Terrorism, Narcotics and International Operations, which I chair, issued its report on "Drugs, Law Enforcement and Foreign Policy," chronicling the serious problems our Government has faced and continues to face in the war on drugs.

The report concluded that drugs are the No. 1 national security threat to the United States in this hemisphere. The evidence shows narcotics knows neither national boundaries nor ideology. The cartels have linked up with governments and terrorist movements alike throughout Latin America. The cartels and their networks must be understood for what they are—serious threats to the security of the United States at home and abroad and they must be treated as such.

The subcommittee also found that too often other foreign policy interests were permitted to sidetrack, disrupt, and undercut the war on drugs. As a result, our law enforcement personnel have been demoralized and our communities threatened. Again and again, we found agencies with foreign policy responsibilities failing to provide law enforcement with the information it needed to make arrests and otherwise enforce the law.

The subcommittee also found that United States law enforcement and foreign policy officials failed to address the drug issue for fear of jeopardizing the war on Nicaragua. This affected law enforcement in two areas especially—responding to the information on General Noriega's criminal empire, and responding to criminal activity related to the Contras.

The saga of General Noriega represents one of the great foreign policy failures of recent memory. Our decision to continue working with him long after our Government had extensive information regarding his drug trafficking has been a continuing betrayal of the public trust.

The subcommittee found that the secret Contra war provided numerous opportunities for drug traffickers to link up with the Contras, and they did. The subcommittee compiled an extensive record of these links, which have been significantly corroborated by documents obtained from law enforcement agencies.

Unfortunately, we found many examples of each of the above failures.

The subcommittee found cases in which high U.S. officials intervened to stop law enforcement operations aimed at nailing drug kingpins.

We found that a United States Ambassador to the Bahamas had shut down a Justice Department drug sting aimed at bringing down corrupt Bahamian Government officials.

We learned how high United States officials, including Lt. Col. Oliver North, went to the Justice Department to intercede on behalf of a man convicted of a narco-terrorist assassination plot against a Honduran President—because the man had been the administration's liaison to the Contras.

We were told by a former United States Ambassador to Costa Rica that a decision was made by the United States to "put Noriega on the shelf" and take no action against his drug trafficking until the Sandinista government had been overthrown.

We were told by the head of the Drug Enforcement Agency that someone at the National Security Counsel leaked information on a DEA drug sting operation against the Sandinistas in order to influence a congressional vote on Contra aid, causing the operation to abort.

We also found out that the State Department chose four companies controlled by drug traffickers to provide assistance to the Contras. As a result, drug traffickers got funds out of the U.S. public treasury as part of our Contra humanitarian assistance program.

Finally, the report includes a summary of allegations that officials in the Justice Department sought to undermine and interfere with this investigation in 1986 because of concerns about its possible political impact. The charge came from a Federal prosecutor in Miami, Jeffrey Feldman, who was handling the investigation of weapons and Neutrality Act cases involving contra supporters.

According to prosecutor Feldman, Justice Department officials may have simultaneously interfered with a Federal grand jury in Miami, and with our congressional investigation in Washington, because of concerns about their impact on the Contra program.

These allegations raise very serious issues, which I understand are under investigation by the Independent Counsel.

These findings are significant, and I believe they deserve the serious attention of the Congress. I have already introduced legislation in response to a number of these findings, the "International Narcotics and Terrorism Control Act of 1989," S. 924, which is currently cosponsored by Senators D'AMATO, ADAMS, MOYNIHAN, CRANSTON, FORD, SANFORD, and DECONCINI, and on which I anticipate the Foreign Relations Committee will soon hold hearings.

I ask that the executive summary of the report entitled "Drugs, Law Enforcement and Foreign Policy," issued by the Subcommittee on Terrorism, Narcotics and International Operations be included in the RECORD at this point.

The summary follows:

EXECUTIVE SUMMARY AND CONCLUSIONS

"The American people must understand much better than they ever have in the past how (our) safety and that of our children is threatened by Latin drug conspiracies (which are) dramatically more successful at subversion in the United States than any that are centered in Moscow."

That warning was delivered in Subcommittee testimony by General Paul C. Gorman, now retired and formerly head of U.S. Southern Command in Panama. Such a characterization, coming from an individual who served with such distinction in the United States Army, should not be taken lightly.

There should not be any doubt in anyone's mind that the United States is engaged in a war directed at our citizens—the old, the young, the rich, the poor. Each day, with what has become a numbing regularity, the American people are besieged with the news of the latest casualties in the drug war.

The Colombian drug cartels which control the cocaine industry constitute an unprecedented threat, in a non-traditional sense, to the national security of the United States. Well-armed and operating from secure foreign havens, the cartels are responsible for thousands of murders and drug-related deaths in the United States each year. They exact enormous costs in terms of violence, lower economic productivity, and misery across the nation.

The American criminal justice system has been overwhelmed by the drug war. To date, most of the U.S. law enforcement efforts have been directed at the domestic drug distribution network. The result is a criminal justice system swamped with cases which cannot be processed fast enough, jails that are overflowing with prisoners, a greater influx of cocaine than when the war on drugs was declared in 1983, and a cheaper, higher quality product.

As a recent study sponsored by the Criminal Justice Section of the American Bar Association noted:

"A major problem reported by all criminal justice participants is the inability of the criminal justice system to control the drug problem . . . through the enforcement of the criminal law. Police, prosecutors and judges told the Committee that they have been unsuccessful in making a significant impact on the importation, sale and use of illegal drugs, despite devoting much of their resources to the arrest, prosecution and trial of drug offenders".

Attempts to interdict the flow of drugs at the border, while important, has experienced only marginal success. According to U.S. officials in the vanguard of the war on drugs, at best, interdiction results in the seizures of only 15 percent of the illegal narcotics coming into the country. For the drug cartels, whose production capabilities stagger the imagination, a 15 percent loss rate is more than acceptable.

Demand reduction through education and rehabilitation are critical elements in the war on drugs. But most experts acknowledge that even this strategy will require a considerable period of time before major inroads are made into significantly reducing cocaine usage in this country.

The narcotics problem is a national security and foreign policy issue of significant proportions. The drug cartels are so large and powerful that they have undermined some governments and taken over others in our hemisphere. They work with revolutionaries and terrorists. They have demonstrated the power to corrupt military and civilian institutions alike. Their objectives seriously jeopardize U.S. foreign policy interests and objectives throughout Latin America and the Caribbean.

The Subcommittee investigation has led to the following conclusions and recommendations.

PAST FAILURES

In the past, the United States government has either failed to acknowledge, or underestimated, the seriousness of the emerging threat to national security posed by the drug cartels. The reasons for this failure should be examined by the Senate Select Committee on Intelligence, in concert with the Senate Committee on Foreign Relations, to determine what corrective steps should be taken.

In some instances, foreign policy consideration interfered with the U.S.'s ability to fight the war on drugs. Foreign policy priorities towards the Bahamas, Honduras, Nicaragua, and Panama at times delayed, halted, or interfered with U.S. law enforcement's efforts to keep narcotics out of the United States. In a few cases within the United States, drug traffickers sought to manipulate the U.S. judicial system by providing services in support of U.S. foreign policy, with varying results.

U.S. officials involved in Central America failed to address the drug issue for fear of jeopardizing the war efforts against Nicaragua.

The war against Nicaragua contributed to weakening an already inadequate law enforcement capability in the region which was exploited easily by a variety of mercenaries, pilots, and others involved in drug smuggling. The Subcommittee did not find that the Contra leaders personally were involved in drug trafficking. There was substantial evidence of drug smuggling through the war zones on the part of individual Contras, Contra suppliers, Contra pilots, mercenaries who worked with the Contras, and Contra supporters throughout the region.

The saga of Panama's General Manuel Antonio Noriega represents one of the most serious foreign policy failures for the United States. Throughout the 1970's and 1980's, Noriega was able to manipulate U.S. policy toward his country, while skillfully accumulating near-absolute power in Panama. It is clear that each U.S. government agency which had a relationship with Noriega turned a blind eye to his corruption and drug dealing, even as he was emerging as a key player on behalf of the Medellin cartel.

POLICY AND PRIORITIES

International drug trafficking organizations are a threat to U.S. national security. Our government must first acknowledge that the activities of the drug cartels constitute a threat of such magnitude and then establish a more coherent and consistent strategy for dealing with the problem.

The threat posed by the drug cartels should be given a major priority in the bilateral agenda of the U.S. with a number of countries, including the Bahamas, Haiti, Colombia, Bolivia and Paraguay. It should be among the most important issues with a number of other countries, including Mexico and Honduras.

In order to signal to other countries the seriousness with which the United States regards the drug issue, the President should convene a summit meeting of Latin American leaders to begin developing a strategy to deal with this issue and related economic problems.

Narcotics law enforcement has often taken a back seat to other diplomatic and national security priorities. The war on drugs must not in the future be sacrificed to other foreign policy considerations.

ADMINISTRATIVE RECOMMENDATIONS

The Treasury Department should begin negotiations on gathering information on large foreign U.S. dollar deposits, as authorized by the 1988 Omnibus Drug Bill.

The State Department should make a special effort to control multiple entry visas from countries which are major drug transit countries or which harbor major drug organizations.

The Federal Aviation Administration should undertake a major effort to inspect hundreds of substandard aircraft, many of which are used for smuggling illegal narcotics. These aircraft are located throughout the United States, and those which do not meet FAA specifications should be grounded immediately.

Individuals who represent themselves as working for the CIA or other national security agencies of the United States Government, and who in fact do not, should be prosecuted promptly to the full extent of the law.

All U.S. law enforcement agencies should devote significantly greater attention to counter-intelligence in order to prevent drug traffickers from penetrating their operations.

The existing distrust among law enforcement agencies working on the drug problem and national security agencies must be resolved. Ways must be found to make it possible for law enforcement agencies to have access to national security intelligence information related to the drug threat.

Federal salaries of senior prosecutors and investigators must be raised and special Senior Executive Service positions created in order to encourage the most talented and experienced personnel to remain on the job.

SPECIFIC LEGISLATIVE RECOMMENDATIONS

The President should be given a series of optional sanctions to apply to major drug producing and drug-transit countries which have not fully cooperated with the U.S. in drug enforcement efforts. This would allow the President to certify a nation under the national security provision of 481(h)(2)(a)(i)(II), and thus avoid the mandatory sanctions contained in current law, while still giving him other optional sanctions. The proposed sanctions would include: prohibiting ships that have stopped at such a nation within 60 days from discharging passengers or cargo in the U.S.; denying landing rights in the U.S. to the national airlines of such a nation; subjecting goods and containers from any such nation to special inspections, quarantines, or other additional regulations to prevent them from being used to transport prohibited substances to the United States; denying or limiting non-immigrant visas to nationals of any such nation; eliminating Customs preclearance agreements with any such nation.

No government employee or official with responsibility for narcotics issues in either the Executive or Legislative branches of government should be permitted to represent a foreign government on narcotics matters for a period of three years after they leave. The penalties for violating such a prohibition should be the same as for violations of the Federal Regulation of Lobbying Act of 1946.

The Department of State should be required to notify the Congress within 10 days whenever it denies a request from law enforcement for reasons of national security or foreign policy. The notification should include a full description of the reasons for the refusal. Past decisions by the Department of State to end law enforcement operations on such grounds should have been subject to Congressional review; this provision would ensure that Congress remain in a position to exercise oversight over such decisions.

The Department of State should be prohibited from entering into contracts with any individual or company under indictment or convicted of any narcotics-related offenses, including money laundering. The Department should be required to institute procedures by which it would routinely check with the FBI, Customs and DEA to determine whether a company or individual is under investigation before the Department enters into any contract with the company or individual.

No U.S. intelligence agency should be permitted to make any payments to any person convicted of narcotics related offenses, except as authorized in writing by the Attorney General in connection with the investigation or prosecution of criminal activity.

The Neutrality Act should be amended to apply only to actions which are not specifically authorized by the State Department. Each such authorization would require prompt notification by the State Department to the House and Senate Foreign Affairs and Foreign Relations Committees, and Select Committees on Intelligence.

The annual drug certification report should be required to review links between international narcotics trafficking, money laundering and international terrorism (including guerrilla groups on the right and the left with regard to ideology.)

The National Director of Narcotics Policy should be required to report to the Congress on current U.S. federal personnel practices affecting all persons engaged in the war on drugs to determine whether adequate resources are being devoted to hiring, training, promotion, and retention of federal employees responsible for narcotics matters.●

ELECTRIC UTILITY BANKRUPTCY CLARIFICATION ACT

● Mr. HUMPHREY. Mr. President, earlier this year, Senator RUDMAN and I introduced legislation to clarify the U.S. Bankruptcy Code with respect to its treatment of electric utilities. Our bill, S. 46, and a House companion, H.R. 681, protect ratepayers by preventing electric utilities from using the chapter 11 reorganization provisions of the Bankruptcy Code to circumvent State laws.

S. 46 fills a gap in the Bankruptcy Code by clarifying the role of State regulatory authorities in a bankruptcy proceeding. This gap was revealed when the largest utility in New Hampshire filed for bankruptcy under chapter 11. The Public Service Co. of New Hampshire [PSNH] has asked the Federal Bankruptcy Court to approve a reorganization plan which would transfer jurisdiction of PSNH's rates from the State Public Utility Commission to the Federal Energy Regulatory Commission. In seeking to supplant State Law, PSNH hopes to realize enormous rate increases. In fact, under PSNH's plan, New Hampshire customers would bear a 40-percent

rate increase in order to protect the financial interests of PSNH's creditors.

Mr. President, S. 46 is designed to protect the ratepayers from unwarranted and exorbitant rate increases that will result when utilities seek to circumvent State laws through the reorganization provisions in the Bankruptcy Code. S. 46 simply requires that, in cases where a proposed reorganization plan would restrict the existing jurisdiction of a State regulatory body, that State authority would have to approve the utility's reorganization plan.

Although S. 46 was promoted by the PSNH bankruptcy, the problem addressed by the bill is by no means confined to New Hampshire. In fact, State leaders and utility regulators from across the Nation are writing to urge their congressional delegations to support S. 46. Recently, I have received letters of endorsement from the Governor of Maine, the Arkansas Public Service Commission, the New Jersey Board of Public Utilities, the Wisconsin Public Service Commission, and the Indiana Utility Regulatory Commission.

Mr. President, these State representatives share my belief that the Federal bankruptcy laws were never intended to short circuit State jurisdiction over public utilities. I urge my colleagues to join their States in supporting S. 46.

I ask that a copy of each of these letters be printed in the RECORD.

The letters follow:

STATE OF WISCONSIN
PUBLIC SERVICE COMMISSION,
Madison, WI, April 13, 1989.

Re S. 46—A bill proposing to prevent electric utilities from declaring bankruptcy to circumvent state law.

Hon. JOSEPH R. BIDEN, Jr.,
Chairman, Committee on Judiciary, U.S. Senate, Russell Senate Office Building, Washington, DC.

DEAR CHAIRMAN BIDEN: The Public Service Commission of Wisconsin is in full support of S. 46, and requests that it be supported by you and the Judiciary Committee. Wisconsin ratepayers could be seriously harmed should a Wisconsin electric utility adopt the course of action taken by the Public Service Company of New Hampshire with regard to the Seabrook Nuclear Power Plant. It is important that Wisconsin ratepayers remain protected by our state reorganization statute. Therefore, we request that you support Senator Humphrey's clarifying legislation.

Thank you for your consideration.

Sincerely,

CHARLES H. THOMPSON,
Chairman.
MARY LOU MUNTS,
Commissioner.
CHERYL L. POFAHL,
Commissioner.

ARKANSAS PUBLIC
SERVICE COMMISSION,
Little Rock, AR, April 27, 1989.

Hon. DALE BUMPERS,
U.S. Senator,
Dirksen Senate Office Building,
Washington, DC.

DEAR SENATOR BUMPERS: On January 25, 1989, Senator Gordon Humphrey introduced S. 46. This legislation would prevent electric utilities from using the reorganization provisions of the bankruptcy code to circumvent State laws governing rates and other matters.

The Arkansas Public Service Commission supports this legislation. However, we are concerned that the definition of electric utility used in § 110.(c) hits more than was intended. It appears that a broad interpretation of this section could potentially include co-generation facilities. Under the Public Utility Regulatory Policy Act, the utility that ordinarily supplies a co-generation facility with electricity is required to buy any excess electricity produced by a co-generation facility. This could possibly bring these co-generation facilities in under the resale provision.

The Arkansas Public Service Commission urges you to support S. 46 with an amendment specifically exempting the co-generation facilities.

Thank you for your consideration in this matter.

Sincerely,

SAM I. BRATTON, Jr.,
Chairman.
PATRICIA S. QUALLS,
Commissioner.
JULIUS D. KEARNEY,
Commissioner.

STATE OF MAINE,
OFFICE OF THE GOVERNOR,
Augusta, ME, April 12, 1989.

Hon. JOSEPH R. BIDEN, Jr.,
SD-224, Washington, DC.

DEAR SENATOR BIDEN: As a result of Maine's recent exposure to two utility bankruptcies with the potential for serious disruption of the affordable supply of electricity to our state, I am writing to urge your support of H.R. 681, the Electric Utility Bankruptcy Clarification Act. This bill provides that bankruptcies and reorganizations of public utilities will not short-circuit state regulatory jurisdiction. In the course of a recent reorganization filing under Chapter 11 of the Bankruptcy Code made by Public Service of New Hampshire, that utility has proposed that federal regulatory oversight of a newly-created holding company should supersede state jurisdiction over costs associated with the Seabrook nuclear power plant. A Maine consumer-owned electric utility, the Eastern Maine Electric Cooperative, has filed for protection under Chapter 11 as well, due to its inability to support continued investment in the Seabrook project.

I favor enactment of H.R. 681 due to Maine's interest in effective state regulation of electric utilities, particularly in cases where those utilities face an uncertain and troubled financial future. The federal government and courts have for years recognized the importance of state regulation of electric utility operations. In the absence of H.R. 681's enactment, this important state interest could be jeopardized in pending—and future—bankruptcy proceedings.

Thank you for your attention to this very important concern.

Sincerely,

JOHN R. MCKERNAN, Jr.,
Governor.

STATE OF NEW JERSEY,
BOARD OF PUBLIC UTILITIES,
Newark, NJ, April 12, 1989.

Re S. 46 and HR. 681, Bills Proposing to Prevent Electric Utilities from Declaring Bankruptcy to Circumvent State Law.

Hon. GORDEN J. HUMPHREY,
U.S. Senator, Washington, DC.

DEAR SENATOR HUMPHREY: The New Jersey Board of Public Utilities is concerned about the precedent being set by Public Service Company of New Hampshire's (PSNH) filing for Bankruptcy and Reorganization under Chapter 11 of the United States Code. It has come to our attention, through the National Association of Regulatory Utility Commissioners, that PSNH is seeking reorganization in order to circumvent state regulation.

This Board supports the passage of S. 46 and H.R. 681 which are designed to prevent such action by utilities. It is our belief that clarification of the bankruptcy law to require prior state regulatory approval for plans of adjustment or reorganization is a positive action.

Thank you for considering our comments on this important issue.

Very truly yours,

CHRISTINE TODD WHITMAN,
President.

INDIANA UTILITY
REGULATORY COMMISSION,
Indianapolis, IN, April 10, 1989.

Re S. 46 Senator Gordon Humphrey.

Hon. RICHARD G. LUGAR,
306 Hart Building, Washington, DC.

Dear SENATOR LUGAR: The Indiana Utility Regulatory Commission would like to express our strong support for S. 46 introduced by Senator Gordon Humphrey entitled the "Electric Utility Bankruptcy Clarification Act". Senator Humphrey's bill addresses a problem in New Hampshire where Public Service Company of New Hampshire has sought protection of the bankruptcy Court. The PSNH bankruptcy is the result of problems emanating from the long delay in issuing an operating license to the Seabrook Nuclear Power Plant.

In March of 1986, this Commission by emergency action following lengthy proceedings granted Public Service Indiana emergency rates which, in conjunction with numerous other provisions of the Order, saved PSI from bankruptcy. One of the reasons that this Commission determined it to be essential that PSI not become bankrupt is the very problem addressed by Senator Humphrey's bill. That question is the extent to which a bankruptcy court might go in setting rates for a utility's electric customers contrary to the orders of the state's legitimate ratemaking agency, in our case the Indiana Utility Regulatory Commission.

Although PSI avoided bankruptcy as a result of the closing down of the Marble Hill construction, the Wabash Valley Power Association which held a 17% interest in that new construction, was forced into bankruptcy more specifically a Chapter 11 proceeding. The major problem now facing WVPA in those proceedings are the claims of the Rural Electrification Administration that it has the power to override state jurisdictions and to order WVPA in spite of the

IURC and without express authority from anyone, including the bankruptcy court, to raise its electric rates to a level deemed sufficient by the REA.

This very brief and oversimplified review of our situation in Indiana should help you to understand why the IURC considers S. 46 or similar legislation to be very important. As a matter of fact, while S. 46 may meet the New Hampshire crisis it really is not broad enough to address the current conflict between the IURC and REA. Regardless of that concern, however, we strongly support the remedy provided by S. 46 in that it would definitely clarify the position of all parties insofar as bankruptcy proceedings of a public utility are concerned.

Presently WVPA has pending before the United States District Court for the Southern District of Indiana in civil action IP 89-126-C its complaint for declaratory judgment against the Rural Electrification Administration to settle this jurisdictional question. I am enclosing for you and your staff a copy of this complaint in order that you may better understand WVPA's position in this matter, a position with which the IURC is fully in accord. Frankly, we consider the manner in which the Rural Electrification Administration is addressing this problem to be an example of federal bureaucracy at its worst. You are probably already aware of the fact that REA has advised WVPA's member cooperatives that no further financial assistance will be extended until the member cooperatives comply with REA's orders. The IURC is seeking to intervene in these federal court proceedings in support of WVPA.

While we are very optimistic that WVPA will prevail in the declaratory judgment action, it seems preferable that such confrontations be resolved either by changes in policy or, if that is not possible, federal legislation.

A number of Indiana utilities are subsidiaries of holding companies. Although none seems in current danger of bankruptcy, the situation addressed by S. 46 could occur in Indiana at some further date. We urge your support of S. 46 and any amendments which might further strengthen the bill.

The Commission and its Staff will be very happy to provide you with any additional information which you might wish in regard to this problem.

Sincerely yours,

LESLIE DUVALL,
Acting Chairman.●

CLEAN WATER ACT AMENDMENTS

● Mr. D'AMATO. Mr. President, I rise today as a cosponsor of S. 687, legislation which will expand authority under the Clean Water Act with regard to penalties for major oilspills.

It's been nearly 2 months since the *Exxon Valdez* ran aground on Bligh Reef in Prince William Sound. The toxic crude oil has killed thousands of birds, at least 600 sea otters, countless other marine and wildlife as well as fouling nearly 300 miles of shoreline. The Coast Guard has reported that cleanup efforts are progressing slowly at best.

The question that many Americans have asked is why was Exxon so ill prepared for such a disaster? Why wasn't the contingency plan followed? Why did it take so long for the Federal Government to intervene? And what is Congress going to do about all of this?

S. 687 gives Congress a chance to do something to help deter future oilspills. This legislation increases the amount of the penalty that can be applied to a company responsible for a major oilspill from a minimum of $5,000 to a minimum of $50,000. It also gives the EPA Administrator the discretion to increase that penalty in response to the severity of the spill up to $50 per barrel. In the case of the *Exxon Valdez* that would have been in the neighborhood of $12 million.

The legislation also requires the EPA to report back to Congress within 1 year with an assessment of existing oilspill contigency plans and recommendations for changes and improvements.

While we cannot guarantee that there will never be another major oilspill, we can take steps to strengthen existing laws and toughen penalties for such inevitable events. This legislation will go a long way toward deterring future oilspills and increasing the standards of vigilance and care in the oil industry necessary to protect our fragile environment. I urge my colleagues to support this bill.●

TERRY ANDERSON

● Mr. MOYNIHAN. Mr. President, today marks the 1,522d day of captivity for Terry Anderson in Beirut.

I ask that the March 16, 1986, column by Jack Anderson and Dale Van Atta be printed in the RECORD.

The column follows:

STILL HOSTAGE

One year ago today, a green Mercedes pulled in front of the parked car in which Associated Press correspondent Terry Anderson was sitting on a street in West Beirut. He was talking with a friend, AP photographer Don Mell.

"I don't like this," Mell recalls saying, as the green car pulled up. He stepped back from Anderson's car, and said: "Get out of here."

Before either American could do anything, three men brandishing pistols jumped out of the Mercedes. They dragged Anderson out of his car and up to theirs, knocking his glasses off. There was nothing Mell could have done.

It was clear that Anderson was the kidnappers' target. The previous day, he had told colleagues a green Mercedes tried twice to run him off the road.

Anderson was the AP's chief Mideast correspondent. The story of Anderson and his family in the year he has been held prisoner by terrorists is a heart-rending one.

A respected foreign correspondent who had worked in Tokyo, South Korea and South Africa, Anderson was assigned to Beirut in late 1982. He soon won a reputation as an astute observer of Lebanese Shiite activities; he already had a solid reputation as a reporter who meticulously checked his facts.

"He had a sense of value about his work," his sister, Peggy Say of Batavia, N.Y., told us. "He honestly felt they needed him there because he felt he was unbiased."

The seemingly insoluble tragedy of Lebanon affected this compassionate reporter deeply. A close friend and fellow journalist, Robert Fisk, a veteran of a decade in Beirut, recalls the time Anderson came into the AP office to write after seeing an Arab child burned to death in some mindless act of violence. Anderson put his head down on his typewriter and wept unashamedly. Then he wrote his story.

"The only thing that happened he absolutely would not talk about was the bombing of the Marine compound," his sister said. An ex-Marine himself, Anderson "had spent a lot of time with those Marines," she explained. The devastating suicide bombing of the compound at Beirut airport killed 259 Americans in October 1983.

Anderson learned to live in the constant danger of Beirut with some degree of ease. In 1984, he persuaded his father, Glenn, to pay him a visit. Concerned that his own apartment wasn't safe enough, Anderson checked his father into the Commodore Hotel, a reporter's hangout normally immune from attack by the competing armed factions in the city.

"Dad visited him until his hotel room was shelled by gunfire," Peggy Say recalled. "It blew out the wall in Dad's room, so he came back home." Almost to the moment he was kidnapped, Anderson felt protected from deliberate acts of violence—or at least assured his family that he was. He told them that the Shiite Moslem terrorists needed him to tell their story to the world, and must realize it would be counterproductive for them to harm him. Despite these assurances, Anderson took the precaution of sending his wife, Mikki, and their young daughter, Gabrielle, back to Mikki's native Japan a year before his abduction.

Anderson's captors have provided scant informaton about their prisoner. The family received two letters from him soon after his kidnapping, but both read as if they had been dictated by the terrorists. The release of a fellow hostage, the Rev. Benjamin Weir, last September brought the family a heart-warming report of Anderson's courage in captivity.

Weir told the family that Anderson's greatest concern seemed to be whether his newborn child was a boy or girl. It was a girl, born on June 7, not quite three months after the kidnapping.

To tell Anderson the good news, the family put together a videotape for his 38th birthday last October. His captors allowed him to see it, and in the only apparently authentic letter he sent, Anderson said he wept with happiness on seeing the film of his new daughter.

Since then tragedy has stalked the Anderson family. His father, who had worked tirelessly for his release, died Feb. 15 of cancer diagnosed only 5 weeks earlier. At the funeral, the oldest son, Glenn Jr., had a heart attack.

Today in Washington, the relatives of American hostages in Lebanon will hold a religious service in the morning and a candlelight vigil in front of the White House in the evening.

Lest we forget, the other hostages known to be still alive are Peter Kilburn, an American University of Beirut librarian; The Rev. Lawrence Jenco, a Catholic relief official; David Jacobsen, an American University hospital official; and Thomas Sutherland, agriculture dean of the university.●

SELF-DEFENSE, AN INHERENT RIGHT

● Mr. McCLURE. Mr. President, it is clear that self-defense is an inherent right. It is a peculiar notion indeed that denies us this basic right. Must we cringe before the thugs that terrorize the innocent and the weak? If we do, evil will surely prevail.

I am pleased to share with my colleagues two excellent letters to the editor, one to the Washington Post written by Frank Tauss of Vienna, and the other to the Washington Times, by Derek W. Linden of Bethesda. We have all been horrified by the vicious beating and rape of a young woman in Central Park. Her life has been shattered; nothing can mend that. We can, however, imagine how events would have differed if the victim had been armed, or if the criminals had feared some kind of effective self-defense or punishment.

Perhaps we are seeing a breakdown in the moral fiber of the individual, for whatever reason. I have no sympathy with those who find excuses for such brutality. When normal standards for moral behavior are missing, as they were in this case, and other, less publicized cases, society must move to protect itself. It must first of all not deny the law-abiding individual the means for self protection. It must also ensure that such savagery is swiftly and certainly punished, thus instilling the fear that will promote restraint in those otherwise lacking conscience.

Mr. President, I ask that the two following letters be inserted in the RECORD.

The letters follow:

[From the Washington Post, May 16, 1989]

WHAT IF THE JOGGER HAD CARRIED A GUN?

The difference between Bernhard Goetz and that unfortunate woman in Central Park is that Mr. Goetz recognized that a danger existed and prepared himself for it. It is madness that once you are selected to be a victim by a thug you have no real recourse but to suffer the violence as did the jogger, or be vilified and prosecuted for protecting yourself. Would Mr. Goetz have been mutilated or killed had he not defended himself? If the jogger had been armed and shot one or more of her attackers, would she, too, stand trial?

When an individual steps beyond the limits of civilized behavior, then it is the right of the civilized to defend themselves. No amount of psychological rationalization can alter the fact that one of our basic instincts is to survive, first as an individual and then as a group. Those who threaten our survival should feel a swift and painful retribution, either at the hands of the intended victim in the act of self-defense or by the community in the aftermath.

I do not want to be killed; I will not kill. I do not wish to be stolen from; I will not steal. Do unto others as you would have others do unto you is not just a quote from a religious text; it is a definition of the social contract that allows groups of people to live in relative harmony with one another.

Those who are horrified by the idea of killing in self-defense or retribution, think how it would feel if it were your sister or your wife or your mother or yourself who was raped or killed. If you do not love yourself or those in your life enough to want to survive, that's OK. That's your choice. But it is not my choice.

When a person demonstrates that he is not bound by the same conscience and morality as the community and takes from someone else all that he really has, his life, then that person forfeits his rights, privileges and even his existence. This will not prevent or discourage all such attacks; nothing can eliminate all the crime and criminals as long as humans are imperfect. But swift and final punishment will prevent the violator from killing again and let others know that we value ourselves and will not take lightly the loss of one of our own.

Until the apologists realize this and accept the reality of the world we live in, there will be more, not fewer, victims.

FRANK TAUSS.

VIENNA.

[From the Washington Times, May 16, 1989]

ADDING A SIGNIFICANT RISK FACTOR TO THE PAST-TIME OF "WILDING"

While I agree with the general tenor of Samuel Francis' April 27 column, "Up in Central Park, down in New Orleans," condemning the vicious maiming and gang-rape that occurred in Central Park, he is fundamentally wrong in asserting that New York's Sullivan law has disarmed criminals in New York.

The effect of personal disarmament (colloquially referred to as "gun control") in New York, Washington, D.C., and other major cities has not been to disarm criminals, but rather to disarm law-abiding citizens. Personal disarmament has not affected violent crime; in fact when law-abiding citizens are disarmed, criminals are emboldened.

This horrible incident also provides vivid illustration, if any was needed, that the only sure means of self-defense available to a victim confronted by physically stronger and more numerous assailants is a handgun.

One can well imagine what might have happened if the victim had been armed with one of the new, light-weight, high-capacity semi-automatic handgun that undercover police officers (including some New York officials who vociferously oppose the ownership of such handguns by civilians) are making their handguns of choice. One might even surmise that with the addition of significant risk to the activity, "wilding" might fall into disfavor among its current participants.

DEREK W. LINDEN.

BETHESDA, MD.●

COLLEGE LOANS VERSUS GRANTS

● Mr. SIMON. Mr. President, as often as we say it, it cannot be said too many times: Education is our Nation's best investment in the future. While President Bush says he wants to be our "education president," the fact remains we are devoting only about 2 percent of our Federal budget to education. There are all sorts of ways we can improve our educational system and one of those is shifting our national priorities. But another important issue that I have written about in my weekly column is the question of college loans versus grants. I ask that a copy of my column be printed in the RECORD.

COLLEGE LOANS VERSUS GRANTS: SOME SURPRISING ANSWERS

[EDITOR'S NOTE.—Senator Simon is former chairman of the House Subcommittee on Higher Education and now serves on the Senate Subcommittee on Education.]

This nation has to do better in education. You will continue to hear me say that over and over, until we act to change our priorities.

One of many illustrations of this shortcoming is in higher education.

In the last nine years the average cost of college—eliminating the inflation factor—has risen by 40 percent. During that same period, family income grew 33 percent—and federal assistance for students rose 3 percent.

It should not surprise anyone, then, that in many key measures of using talent we are slipping. For example, the number of blacks graduating from high schools has risen over those same years, while the number going to college has dropped.

Not only has student financial aid dropped, it has been twisted.

We have shifted away from a primary emphasis on grants to go to college, to loans.

What's wrong with that? A number of things:

(1) It costs the federal government more money. That may be hard for some to believe but it is true. Because we subsidize interest and also pay for loan defaults, the costs are escalating. Of the money provided for student loans this year, 43 percent is not going for loans, but to pay for defaults.

(2) It discourages college attendance. That happens for two reasons: It is a barrier to some people to take out loans in the first place, particularly if you come from a family unaccustomed to taking out loans, or you are from a family that has been burdened already by having too much debt. A second factor is that we now have studies that show that students who go to college through grants are more likely to stay and complete their work than students who rely on loans.

(3) The loans often postpone the traditional American dream. What is that dream? Having a home of your own and a family. One young couple I talked to recently is faced with repayments of $422 a month for seven years. They're living on limited income. They would like to have that home and family, but they see no alternative but to postpone those hopes.

(4) Loans discriminate. We have made a great deal of progress in this country that we can look to with pride. But it is still true that those of us who are white males will on the average earn more when we graduate from college than those of you who are female or members of minority groups. That means that it is easier for some people to repay loans than for others.

(5) Loans twist occupational goals. You're a college student, facing $10,000 to $15,000 in loan repayments when you get out of college. You must choose between majoring in business or law, or becoming either a teacher or a social worker. You are a person of above average talent, who would like to become a teacher or a social worker, but you also want to pay off that loan quickly. Is

the nation better served by your shifting over to a major in business or becoming a lawyer? Probably not, yet that is the way we tilt things.

I do not favor doing away with loans. We should keep the loan program we have, but as we recognize that more student aid is essential for the nation's future, we should shift what we spend toward more grants.

For most American families, sending young people to college is a struggle—more of a struggle than it should be. If we devoted more than the present 2 percent of the federal budget to education, and did it wisely, it would be less of a struggle for these families.

And the nation would be well served.●

NUCLEAR AND MISSILE PROLIFERATION

● Mr. GLENN. Mr. President, I have spoken many times about the global spread of nuclear weapons and missiles, and about the measures that are needed to halt this proliferation before it sends the world into turmoil. If anyone here seriously thinks that these problems are now under effective control—or that the threats from the proliferation of these weapons are remote from the daily lives of average Americans—then I have a few comments that may change your mind.

A VOICE OF REASON

Let us start with some common sense—you do not need a top secret intelligence clearance to understand how the proliferation of these deadly weapons threatens us all. As much as I have read and spoken about this problem, I have not seen a more straightforward statement of the risks and responsibilities that we face as a nation in this area than a brief opinion piece by A.M. Rosenthal that appeared in last Friday's New York Times.

Mr. President, I ask to submit at this point in the RECORD an op-ed by A.M. Rosenthal, from the New York Times of May 12, 1989.

The article follows:

THE WEAPONS OF HELL

At least we will know where to put the blame. If the day comes when the terrorist nations use the weapons of hell against us or other enemies, at least we will know that.

At first, we will try to evade the truth. We will say it is the fault of our friends and allies who sold those mad-men the material for the chemical weapons, the missiles and the nuclear technology.

But eventually we will have to face reality: the blame belongs to us, the Government and people of the United States. We knew, and could have stopped it, but did not.

About 40 West German companies are suspected by Washington of shipping chemicals and technology for chemical warfare to a Libyan plant and other Middle Eastern countries. German companies helped Libya, Syria, Iraq and possibly Iran build missile capability.

China is sending missiles to Libya. A Swiss company negotiated with Iran to build a poison gas plant.

We know Pakistan, and probably India too, has received clandestine help from abroad in preparing its nuclear weapons capability. Pakiston is an American ally and India a democracy important to us.

But perhaps someday far less friendly regimes will rule in Islamabad or New Delhi. Then we would live in fear that nuclear weapons capability could be transferred to bitterly hostile nations.

The principal target for the chemical weapons—the Libyan plant alone will produce 40 tons a day for warfare—of course would be Israel.

But the terrorist nations showed, during the Iran-Iraq war, that they will use chemical weapons against each other and their own people.

So it is easily conceivable that countries that deliberately blow up civilian airliners might one day raise the terror level by planting and exploding a chemical weapon somewhere in the West. The Ayatollah would regard it an act of special piety.

Americans look on drowsily. Is the danger on another planet? American specialists on terrorism and weaponry are astonished at the public passivity.

American Governments have not provided leadership. The Reagan Administration sent more than 250 polite complaints to the West Germans about nuclear aid to Pakistan and chemicals to Middle Eastern countries.

But the protests were usually secret. Our German allies either buried or routinely denied them.

Now, that Swiss company finally agrees that helping Iran build a poison gas plant would not be a delicate thing to do.

The West Germans got around to arresting the former director of the company that built the Libyan plant—the same company that, in January, Bonn indignantly denied was doing anything of the sort.

Well, that's nice. But all those other complaints Washington made to Germany, what happened to them and how were investigations carried out?

But it is not useful to blame the Germans or Swiss or Chinese. Obviously they do not consider selling chemical weapons or missiles to terrorist nations that bad; matter of values.

It is this country's job and moral obligation to stop friends and allies from sending terror weapons to terrorists.

First, the Government must stop wrapping the record in secrecy, stop putting "classified" stamps on our protests, stop covering evasions and denials. The "secrets" are kept not from suppliers or receivers—just the American public. President Bush can end that with a telephone call to the State Department.

Then we should cut off from the U.S. market every foreign company we believe is sending materials or technology for these weapons to terrorists; cut them off very fast, for very long.

Legislation to do this is before the Senate and the House, introduced by members of both parties. The Administration wants the decisions to cut off trade left to the President. No; they should be automatic by law.

We must tell the Chinese Government that we happen to have our own little cultural sensitivities and that they must choose between missiles to Libya and business with us.

Then we must say much the same thing to our allies. Most of them are as worried as we—and as clean. As for Germany, perhaps we may find that more Germans will agree with us than with the grossly, unforgivably insensitive German companies on the list of traders in hell.

Of course, we have to make absolutely sure we are not in that trade in any way ourselves—as we and Israel were so shamefully when the missiles were sent to Iran. It is part of waking up and looking in the mirror—better now than waiting until just one day too late.

Mr. Rosenthal makes three key points:

First, since today's foreign friends may easily become tomorrow's foes—a lesson we learned the hard way in the cases of Libya and Iran—we should not directly or indirectly condone the proliferation of nuclear weapons or nuclear-capable missiles anywhere, even by our friends. It is our duty to encourage our friends to see the folly in possessing such weapons and to communicate our firm determination to stop this mad pursuit of what Mr. Rosenthal calls, the weapons of hell. We must have a global policy.

Second, the United States cannot shirk its responsibilities by covering up proliferation with the veil of secrecy based on political concerns—secrecy based on legitimate concern about intelligence sources and methods is one thing, but secrecy based on political convenience is quite another. When we send hundreds of diplomatic protests and messages to other nations that are chronic suppliers of materials for these "weapons of hell," our responsibility does not—and cannot—stop with the delivery of these so-called demarches.

Why should the Congress and the American people not be informed if our diplomacy is ineffective in stopping this deadly commerce? Why should the citizens in the offending country never be provided an opportunity to learn of the concerns that we are expressing to their leaders? Are we using secrecy to protect the guilty, or to mask a failed policy? If so, maybe an appropriate subject for Mr. Rosenthal's next op-ed might be, the "policies of hell."

His third point is that our policies must have some teeth—when we detect illicit trafficking in commodities associated with nuclear weapons, missiles, chemical or biological weapons, we must have something more in our grab-bag of diplomatic responses than what Richard Perle has recently called, demarche-mallows. I believe Mr. Rosenthal is right: The time has come for the United States to impose stiff economic penalties on companies that chronically traffic in goods related to all of these types of weapons. We need to penalize not just the use of these weapons in war. We need to go after the "kingpins" of the illicit nuclear and missile marketplace. The world must know where we stand.

THE VOICE OF THE AMERICAN PEOPLE

Although the previous administration did very little to educate the American people about the threats we all face from the proliferation of nu-

clear weapons and their various delivery systems, I am convinced that the public understands that nuclear terrorism or regional wars involving these "weapons of hell" are threats that deserve a high priority in any administration.

In the early days of the last Presidential campaign, the polling firm, Marttila & Kiley, Inc., released a survey of randomly selected American voters which shows that the public at large is definitely concerned about the problem of nuclear proliferation. Here are a few quotes from the findings of that survey:

Several findings point to a growing public concern that nuclear proliferation and Third World instability, perhaps even more than a continued arms race between the superpowers, represent the gravest threats to our national security.

Other than "tensions in the Persian Gulf" * * * Americans are more likely to view "the spread of nuclear weapons to the Third World" as a serious threat to our country's security than any other item we tested.

Fully 76 percent regard nuclear proliferation as an "extremely" or "very" serious threat to national security * * * this ranks higher than either the "nuclear weapons buildup by the U.S. and Soviet Union" (64 percent), or "Soviet aggression around the world" (56 percent).

More recently, the Roper Center for Public Opinion Research has reported a Yankelovich survey in which 1,000 randomly selected registered voters from across the Nation were asked to assess the extent to which "the spread of nuclear weapons to Third World countries" threatened our national security interests.

Here are the results of that October 1988 poll: An astounding 87 percent of the respondents ranked nuclear proliferation as either an "extremely serious" or a "very serious" threat. It is interesting that this figure is over 10 percent higher than the result obtained in October 1987 to the same question. Only 2 percent of the voters in the 1988 poll called the proliferation threat, "not very serious."

This, Mr. President, is the voice of the American people—this is where we stand.

THE VOICE OF THE MEDIA

In recent months, the international and domestic news media has been issuing one horror story after another about the worsening global spread of nuclear weapons, missiles, and chemical and biological weapons. I ask to submit into the RECORD at the end of my remarks the full texts of several of these reports. Here is what the media is reporting:

Pakistan continues its march toward the bomb.—The European press is having a field day with reports that Pakistan has acquired from West Germany United States-origin tritium—an H-bomb material—tritium recovery equipment, lithium—used in producing tritium—and a United States-origin laser, the latter as part of a package of equipment for making nuclear fuel. Meanwhile, the Pakistani army chief has boasted that his recently tested surface-to-surface missiles "are extremely accurate systems and can carry a payload of over 500 kg (1,100 pounds)." All of these developments are occurring in a country that receives hundreds of millions of dollars in United States economic and military aid—aid that President Reagan recently certified "will reduce significantly the risk" of Pakistan acquiring the bomb.

India's nuclear and missile programs are rolling like the ancient juggernaut.—India is now reported to be ready to test fire a 1,500 mile intermediate-range ballistic missile. It is ironic that India, after having condemned the United States and the Soviet Union for many years for failing to make progress in nuclear disarmament, is now developing a nuclear-capable missile that is within the class of delivery systems that the United States and Soviets have just agreed to eliminate. India has also reportedly acquired United States-origin beryllium—a material used in components of United States nuclear weapons—for its nuclear program and has been openly accused by the Government of Norway as the illicit destination of over 20 tons of Norwegian heavy water, a material used in producing plutonium.

Nuclear and missile developments are of growing concern in East Asia.—China persists in its stubborn refusal to join international treaties against the proliferation of nuclear weapons, while aggressively promoting sales of ballistic missiles and missile technology to unstable regions. Admiral Thomas Brooks, the Director of U.S. Naval Intelligence, recently testified before the House Committee on Armed Services that in 1988, "the PRC began marketing its 'M' series of short range tactical missiles * * * the M-9 SRBM (325 nm range) is certain to find clients in a number of Middle Eastern/South Asian states." The Chinese are also marketing dual-use equipment and materials associated with the development of nuclear weapons. Meanwhile, I have learned that our Government is considering selling to China valuable nonnuclear parts for nuclear powerplants, worth hundreds of millions of dollars, even though United States law bars the provision of United States nuclear technology to China until certain nonproliferation conditions are met. And thanks to a recent 30-year United States/Japan nuclear agreement, Japan no longer needs United States case-by-case approvals to make use of or ship, by air or sea, ton quantities of weapon-usable plutonium produced from United States-supplied nuclear fuel or reactors. Press reports are also circulating that North Korean may be building an unsafeguarded nuclear reprocessing plant for plutonium production, and that South Korea is working on a ballistic missile that meets the standard international criteria of being "nuclear-capable." If the Korean peninsula goes nuclear, how long could Japan afford not to follow suit?

But there are other regions that are receiving their fair share of press reports in recent months:

The Middle East is on the verge of an arms race involving all of the "weapons of hell."—While Israel's nuclear weapons and long-range missile programs remain unfettered and a subject that is taboo for discussion even among Israel's own citizens, Iraq appears determined to develop its own heavy missiles, chemical and biological weapons and, according to some recent reports, nuclear arms to meet its own regional ambitions. Egypt appears determined to acquire its own IRBM with the assistance of Argentina, Iraq, and unscrupulous European arms dealers. Saudi Arabia, meanwhile, is sitting comfortably with its new Chinese nuclear-capable CSS-2 IRBM's. According to Admiral Brooks—the United States naval intelligence chief—Libya, Iraq and Iran are all, in his words, "actively pursuing" a nuclear weapons capability. Who knows who will be the next to toss a match into the Middle East tinderbox?

Projects are underway in Latin America to develop nuclear submarines and nuclear-capable missiles.—Along with continuing concerns about the refusal of both Argentina and Brazil to join international treaties banning the acquisition or proliferation of nuclear arms, a concern heightened by the dangers of political instability in each country, both nations appear determined to acquire long-range ballistic missiles and nuclear submarines. And both Argentina and Brazil appear intent to export their nuclear-capable missiles to customers in the Middle East.

THE VOICE OF THE NEW ADMINISTRATION

President Bush has stated both in the campaign and after coming to office, that he regards nuclear and missile proliferation to be among the foremost threats facing the Nation and our allies. I hope that he is able to translate his concern into tangible policies designed to halt the spread of these dangerous weapons. He will certainly have my support in pursuing this objective.

Soon the new administration will have a major choice to make. Will we continue the policies of the past, with all of their trappings—such as the demarche-mallows, the refusal to report bad news to Congress and the American people, the blindness to proliferation activities in friendly countries, and the myth that being a reliable supplier of nuclear goods and military

aid will purchase responsible nonproliferation policies among recipients of those supplies? Or will we reinvigorate our policies with new ideas, fresh approaches, and a heightened sense of national commitment? I hope we are prepared to show the world that we not content with trying to manage proliferation, and that we are willing to work creatively with other nations to stop it outright.

Mr. President, as chairman of the Committee on Governmental Affairs, I would like to announce that the committee will hold a hearing on Thursday, May 18 to hear the views of the new administration on these issues. We will hear the testimony of CIA Director William Webster, Mr. Reginald Bartholomew, who has been called the "nonproliferation czar" at the State Department, and Ambassador Ronald Lehman, the new Director of the Arms Control and Disarmament Agency, to assess the threat and our national responses to these awesome challenges facing the Nation.

I hope that this hearing marks the start of a new era of cooperation and consultation between the Executive and Congress in the nonproliferation area. We are going to need this cooperation at home if we are to expect any cooperation or respect from our friends and foes abroad.

The material to be printed in the RECORD follows:

[From Nuclear Fuel, Mar. 6, 1989]

U.S. REPEATEDLY WARNED GERMANY ON NUCLEAR EXPORTS TO PAKISTAN

(By Mark Hibbs)

The U.S. government has issued about 100 specific communiques to the West German government related to planned exports to the Pakistan Atomic Energy Commission (PAEC) and its affiliated organizations, according to information obtained by NuclearFuel. Documents reveal that since the early 1970s planned exports—some of which were carried out—included a range of items—from computer technology to uranium.

Beginning in 1982, U.S. nonproliferation officials began warning Bonn that PAEC attempted to acquire technology for capture of pure tritium. In March, and again in May, 1986, the U.S. told German officials that the firm Linde AG was planning to export a tritium extraction facility to PAEC.

In responding to U.S. requests, German officials contacted Linde, which said it "had no plans" to export such a facility.

The U.S. sent a third warning in December 1986. "Notwithstanding Linde's assertions, we continue to believe that the information we provided you previously is correct, and that Linde submitted a proposal to PAEC for installation of a tritium recovery facility."

While on two previous occasions German export officials asserted that technology from Linde "could not result in a form of pure tritium," the U.S. government replied that "our technical information indicates that such a facility could result in a pure form of tritium."

Western tritium experts queried by NuclearFuel said that the U.S. position was correct. Linde AG, one of a handful of firms in the world with expertise in the field of cryogenic distillation of hydrogen isotopes, could have supplied a heavy water detritiator with capability to purify the tritium gas product.

In 1985, Germany licensed for export to Pakistan a tritium plant by the firm NTG Nukleartechnik GmbH (NTG), preferring to call it a "heavy water purifier" instead of—as the U.S. preferred—a "tritium recovery facility" in the interests of complying with German regulations on sensitive nuclear exports. While heavy water purification technology is not subject to export controls in Germany, technology for the recovery of tritium is controlled.

The U.S. believed that Germany would control export of tritium capture technology to Pakistan according to a pledge made by German officials at a spring 1986 meeting of the Coordinating Committee on Export Controls (COCOM). While German officials previously told the U.S. they "had no authority" to control tritium technology exports, the U.S. government told Bonn that Germany "should now have the legal authority to control the export of a tritium recovery facility." Equipment especially designed for tritium production or recovery appears on Germany's Nuclear Energy List of March 25, 1988. That list of items needing an export license is an annex to Germany's Foreign Trade Ordinance.

The U.S. also discussed with Bonn reports that nuclear trader Alfred Hempel may have been working to assist PAEC is acquiring material for an unsafeguarded reactor.

According to a German government report, citing "friendly intelligence," Hempel, in late 1986, made an offer to PAEC through the firm Ventron GmbH for supplying boron carbide, an absorber material used in reactor construction. U.S. officials told Bonn that "it is well known that Pakistan is developing an indigenous, unsafeguarded reactor" and advised export officials to intervene. In November 1987, German officials advised the U.S. embassy in Bonn that boron exports to Pakistan would require an export license and that none would be given.

Based on other intelligence information, the U.S. Arms Control and Disamament Agency (ACDA) had requested in 1980 that the West German government investtigate several dealings of Nuken GmbH with PAEC.

According to a German government report prepared at ACDA's request, Nukem officials, in 1973, were negotiating the sale of 8 metric tons (MT) of heavy water to the Pakland Corporation, which, according to intelligence sources, was a purchasing arm of PAEC. In the same year, Nukem discussed selling PAEC an undisclosed amount of uranium metal. German officials said that in 1977 the U.S. Energy Research & Development Administration, DOE's predecessor agency, approved the export by Nukem of materials testing reactor (MTR) "reprocessing and transport" technology to the unsafeguarded Pinstech reprocessing facility in Rawalpindi.

The report also says that Nukem sent 30 kilograms of UF6 of unspecified enrichment to PAEC via the Pakistan embassy in Paris in 1978. In the same year, Nukem officials negotiated delivery of "waste liquid vaporizing technology" to PAEC for New Labs, another unsafeguarded reprocessing facility, as well as melting crucibles and 145 kg of depleted uranium.

Nukem officials, according to the report, said only the UF6 was sent to Pakistan. Three additional exports planned for 1979—MTR reflector material to Pakistan, tritium targets to PAEC, plus beryllium metal and beryllium oxide to the Pakistan Directorate of Industrial Liaison—were "held up" by U.S. reexport requirements, Nukem officials were quoted as saying in the report.

The U.S. will not pay more attention to proliferation concerns in Germany, Western diplomatic sources in Bonn said. However, the sphere of influence of U.S. proliferation officials in Germany will be limited because other foreign policy issues—primarily modernization of Lance missiles stationed in Germany—will take precedence.

U.S. officials are also said to be taking a wait-and-see attitude regarding German pledges to tighten nuclear export controls (Nucleonics Week, 5 Jan., 3).

While proposed export restrictions might "put smaller fry like NTG out of business," one source said, non-proliferation officials are skeptical that larger nuclear establishment firms—such as Leybold Heraeus GmbH—will be penalized. The future prosecution of Leybold Hereaus management for its role in exporting sensitive high-enriched uranium centrifuge equipment to Pakistan in 1987 is viewed by U.S. officials as a litmus test of German will to punish nuclear proliferators, sources said. The U.S. "will keep bringing up this case," one source said. German justice officials said the case is presently mired by problems of international law surrounding the alleged theft of Urenco enrichment know-how.

Diplomatic sources also said that the U.S. is looking for an avenue to exert "more direct influence" on officials in the Economics Ministry responsible for export control. One 1986 interoffice memo penned by an Economics Ministry official said that U.S. communiques warning of planned nuclear exports to South Asia "usually land in my wastepaper basket."

GERMAN FIRM'S EXPORTS RAISE CONCERN ABOUT PAKISTAN'S NUCLEAR CAPABILITIES

(By Mark Hibbs)

Information obtained by Nuclear Fuel about West German nuclear exports to Pakistan provides indirect evidence of intensified nuclear weapons research by the Pakistan Atomic Energy Commission (PAEC), Western experts said.

Because Pakistan does not appear to possess technology to detritlate heavy water, German criminal justice officials are puzzled about the purpose of a tritium gas storage and purification plant provided in 1987 by the German firm NTG Nukleartechnik GmbH (NTG), now called NTG Neuetechnik, (NF, 6 Feb., 7). "It is a subject we have been thinking about every day," said Hanau prosecuting attorney Reinhard Huebner.

According to western experts, however, Pakistan may want to irradiate lithium-6 targets—perhaps in an unsafeguarded research reactor—to obtain weapons-significant amounts of tritium gas. The plant provided by NTG, they said, would be capable of purifying this tritium gas to 98% as alleged by suspects' confessions in the case.

In amounts of about 4 to 5 grams, tritium, the heaviest hydrogen isotope, is used as a booster in a fission nuclear weapon.

Information obtained by Nuclear Fuel about the plant design indicates that the tritium facility erected and tested in Pakistan would not be capable of separating hydrogen isotopes present in impure tritium gas extracted from heavy water. This "effectively eliminates" the possibility that the

plant is used to purify gas obtained by detritiating heavy water from the Kanupp reactor, one expert said.

In addition to the tritium isotope of hydrogen, "dirty" tritium gas obtained by detritiating heavy water contains large amounts of deuterium, as well as normal hydrogen. The three hydrogen isotopes must be separated in order to extract pure tritium.

Although U.S. proliferation officials repeatedly warned Germany about Pakistani intentions to acquire heavy water detritiation technology and although German export control officials indeed approved an application by NTG to export a heavy water detritiating plant to Pakistan (NF, 26 Dec. '88, 1), justice officials have no evidence that such a plant was exported to Pakistan.

The plant confirmed to be in Pakistan could, however, purify the gas product obtained from irradiated lithium-6 targets, since separation of hydrogen isotopes would not be required. Bombarding lithium-6 with neutrons produces an end product of tritium, large amounts of helium-3 and helium-4. "Pakistan is irradiating lithium targets," one U.S. expert said, "the German plant could give them a basically pure tritium product."

Western experts said that U.S. proliferation officials have been concerned for several years about the possibility that Pakistan was interested in procuring targets or lithium-tritium technology. A U.S. note to the German Foreign Office from March 13, 1986 expressed the concern that Pakistani agents in Germany were operating on the "international market" to be able to procure "tritiated targets" which could be used "at the Pinstech plant in Rawalpindi" to extract pure tritium.

Export documents indicate that prior to this date German officials approved exports of sub-kilogram amounts of lithium metal and lithium aluminum hydride to Pakistan and India. But according to officials from the Federal Ministry of Research & Technology (BMFT), which evaluated the export applications, the quantities exported were too small to have nuclear application.

Production of tritium via lithium requires bombarding the lithium-6 isotope with neutrons in a reactor. Western experts said, however, that it was not likely that PAEC would use the Kanupp heavy water reactor, which is under IAEA safeguards, for this purpose.

An official at the IAEA said that while heavy water at Kanupp is safeguarded along with reactor fuel, the control rods are not explicitly checked. "From a safeguards point of view irradiation of lithium at Kanupp would be a theroretical possibility," a U.S. safeguards official said.

But experts queried said circumstantial evidence points instead to the possibility that Pakistan may want to irradiate lithium-6 at an unsafeguarded, unknown research reactor. Because of the low melting point of the aluminum used in target cladding, irradiation in a Candu reactor core—where temperatures above 500 degrees F obtain—would also be undesirable, experts said.

One expert recently at PAEC said that Pakistan might be building a 50-MWt research reactor which could produce plutonium with a few high-enriched uranium "driver" rods in the core, but which could also be used to irradiate lithium targets. PAEC is "very proud" of its present capabilities in enrichment, reactor technology, and fuel fabrication, the source said. "I have no doubt PAEC has the means" to build the plant, he said.

Indirect evidence for the plant is provided by testimony in the NTG affair obtained by NuclearFuel.

Confessions of key suspects and documentary evidence indicates that NTG supplied "know-how for design and constuction" of a "small, pool-type" research reactor which prosecutors said might not yet have been completed or erected. In 1987, NTG also supplied aluminum rods and tubes for this reactor.

According to information from Bonn export officials, during 1987, Inam Ul-Haq, identified by intelligence sources as a buyer for PAEC, attempted to buy 30 metric tons of aluminum tubing for the firm Multinational Incorporation in Lahore, Pakistan. A German firm unsuccessfully attempted to export the tubing to Pakistan via Italy, sources said.

Western experts said that the aluminum obtained by PAEC would be useful as cladding material for lithium-6 targets. Aluminum tubes are used for cladding because lithium-aluminum bondings are more chemically stable than lithium-zircaloy bondings.

Western experts believe that it would not be difficult for Pakistan to acquire the technologies to enrich the lithium-6 isotope in lithium metal (over 90% of which naturally occurs as lithium-7) and then bond the cladding to the lithium. The process technology for the final step prior to purification—extraction of tritium gas from irradiated targets—calls for melting the targets in a high-temperature vacuum oven. Details are considered classified information in established weapons states, but engineers in Pakistan "could figure it out without too much difficulty," one weapons expert said.

According to documents, NTG exported to PAEC a high-temperature vacuum oven in 1987.

Beyond expertise for an unsafeguarded reactor, documents also reveal that PAEC also illegally obtained from NTG about 7,000 kilograms of fuel cladding material for Kanupp, the document indicate. This was procured in India and then shipped via Germany to Pakistan, falsely declared as stainless steel tubing and not reported to German export control officials. Because of the word "nuclear" in the full name NTG, Pakistani agents "expressly requested" that the tube transfers be handled by Physikallsch-Technische Bundesanstalt (PTB), a consulting firm under contract to NTG, according to the West German documents.

[From Der Spiegel, Feb. 20, 1989]

NUCLEAR EXPORTS TO PAKISTAN REPORTED

Pakistan has the ability to build the atom bomb. West German firms supplied parts and know-how.

The laboratory is hidden in a desert at the foot of the Kashmir mountains. Anti-aircraft artillery protects the area, soldiers guard the doorways into and out of the laboratories, storehouses, and underground vaults.

In the laboratory, generators whir, selected scientists operate highly sensitive aggregates; measuring instruments, vacuum pumps, and automated precision tools work around the clock.

In the nuclear plant, which forms part of the nuclear center of Pinstech near Rawalpindi, elements for the Islamic bomb are produced in strict secrecy—with machinery made in Germany.

The German equipment—for the time being the last delivery—was tested on site by Peter Finke, 45, on behalf of the Gelnhausen-based firm New Technologies (NTG). In July last year, the physicist showed his Pakistani colleagues for 2 weeks how to operate the complicated glove-compartment plant for the recovery of tritium.

Since then the scientist ("I am a pacifist") has had pangs of conscience; possibly the equipment could be "converted," he says. He stresses that anyway, a "pure training plant" was supplied—allegedly, in order to clean the tritium-contaminated Pakistani nuclear reactor in Karachi, which is, however, 1,100 km away.

Radioactive tritium is sold on the international black market of weapons-grade nuclear products at even higher prices than plutonium. A few grams of this gas are sufficient to increase the power of an explosive "substantially," says nuclear weapons scientist Gerhard Locke, 56, of the Euskirchen Fraunhofer Institute. Therefore, "the second bomb generation of the lighter type" cannot do "without tritium," he says.

However, the artificially produced superheavy hydrogen decomposes quickly into helium. Therefore, it must be constantly renewed.

That is precisely what the NTG plant can do: Every day, five grams of tritium can be recovered—a quantity which according to Locke is "incredibly large." That is why Albert Farwick, chief of the Nanau public prosecution which is investigating NTG, considers "some civil use practically inconceivable."

There is no doubt that Munir Ahmed Khan, chief of the Pakistan Nuclear Authority, with whom Finke already had a cup of tea, has secretly developed his country into a nuclear power; the bomb puzzle is complete. He had many individual parts—ranging from transformer sheets to uranium conversion—supplied by small West German firms, using a network of agents to this end.

The special pipes and supersolid steel from Singen and Saarbruecken, the mass spectrometers and magnets from Bremen and Bonn were made-to-measure for Khan's program which is carried out in a number of nuclear centers:

In Rawalpindi, where in addition to the bomb plant, a 24-year-old U.S. research reactor is in operation and a reprocessing plant produces about 20 kg of plutonium every year;

In Kahuta, Abdil-Kadir Khan, who is admired as "the new Einstein," meanwhile has produced more than 100 kg highly enriched weapons-grade uranium, using ultra-high-speed centrifuges;

At the Dera-Ghazi-Khan center, natural uranium is pulverized and converted into uranium hexafluoride, the initial product for further processing, in three conversion plants supplied by the Freiburg businessman Albrecht Migule for DM15 million.

The Pakistani "atom shopping" has often had Bonn's official approval. The Federal Economics Office (BAW) in Eschborn approved the export of an electronically controlled milling machine of the Munich-based Friedrich Deckel AG, which a secret U.S. study assesses as "extremely useful" for the "production of elements of a nuclear explosive system;" the Economics Ministry rejected as "unacceptable and irrelevant" the U.S. demand to guarantee that the machine not be used in the nuclear industry.

The export of a special press to compact hard-metal powder, which was supplied by

Dieffenbacher GmbH & Co in the Swabian town of Eppingen in 1985, was also approved, even though the purpose of the machine (price DM1.3 million) was not kept secret. The responsible officials knew that the isostatic hot press was intended "for use in an ammunition factory for the manufacture of heavy-metal cores for projectiles."

What types of cores could be meant was discovered post facto by experts of the Federal Research Ministry: "A highly efficient nuclear explosive" must be compressed to the largest possible extent, and "the easiest way" to achieve this is by using a press that is hardly different from the Dieffenbacher model.

The press and the milling machine, made in Germany, were so-called dual-use goods that can also be used for peaceful purposes and are therefore not contained in the embargo lists. However, the U.S. Administration had warned Bonn in time about such deals. U.S. intelligence services reported in 1979 that with the blueprints that he stole in Almelo, in the Netherlands, Abdil Khan was now in a position to build a uranium enrichment plant. To this end, he would buy "equipment on the European market," they said.

U.S. President Jimmy Carter wrote to Chancellor Helmut Schmidt at the time that "we must be careful and prevent this program from beng completed." U.S. experts specifically went to Bonn to instruct the responsible officials. They told them that two firms, the Hanau-based Leybold-Heraeus and the Renningen-based Team Industries, were already "doing business."

Several weeks later, two managers of the enterprises mentioned informed the Economics Ministry that the deals had been carried out. Team Industries had just shipped 31 frequency converters to Pakistan, highly sensitive instruments that are used for the power supply of uranium centrifuges. Leydold-Heraeus manager Gotthard Lerch reported that his firm had supplied valves, vacuum pumps, brazing furnaces, measuring instruments, and a gas purifying plant "in the past 3 years"—together "worth DM1.3 million."

Lerch also said that of course, "it cannot be totally ruled out" that such instruments are useful in a uranium enrichment plant. He said that in the future he will "keep an eye on the aspect of possible use."

He did so. Meanwhile, the Cologne public prosecution is investigating Lerch, because he allegedly smuggled cases of blueprints for the building of a uranium centrifuge out of the Federal Republic. At the same time, he had a number of special instruments copied in Switzerland, the investigators say. The individual parts, which were declared "cooper pipes, boilers, and crane girders," were transported across the French border by truck and were shipped in Air France planes from Lyon via Dubai to Pakistan.

The deal attracted attention after Swiss customs officers seized three specially large vacuum containers, so-called autoclaves.

The proceedings against Lerch have been dragging on for 2 years now. Only one West German exporter has been punished because of illegal nuclear exports to Pakistan: Albrecht Migule.

Quoting the Nuclear Nonproliferation Treaty, the judges said at the time that "owing to a law enforcement deficit, the FRG must accept being accused of having failed to meet its contractual obligations." They added that "the goals" of the nuclear nonproliferation treaty have been "attacked," because the authorities made it so easy for Migule that he did not have to proceed "particularly cleverly."

SPD Bundestag Deputy Hermann Bachmaier says that "the motto by which people in the Federal Economics Ministry work appears like a red thread in the files: You never hear anything, you never see anything—and in particular, you never block anything." Bachmaier, who heads the Bonn Nuclear Investigation Commission, says: "Our doors are just open."

The Karlsruhe Nuclear Research Center (KFK), which is 90 percent government-owned, also was involved in unrestrained exports. The KFK scientists supplied to their colleagues in Rawalpindi parts of a mass spectrometer, without which it is impossible to determine the degree of uranium enrichment. They trained Pakistani scientists, and even allowed one of them to visit their sanctuary—the "hot cells" where plutonium is separated, and they passed on valuable know-how.

Even the Economics Ministry found the close contacts between Karlsruhe and the Pinstech laboratories "astounding." The ministry said that whereas "constant efforts are being made to inhibit the Pakistani nuclear program," the KFK "maintains very close contacts with relevant Pakistani authorities to convey know-how for just this nuclear program." No conclusions were drawn.

The same thing happened when roughly 100 kg of specially hardened steel was shipped from Bremerhaven to Karachi on 9 August 1985. The hot goods on board the "Nedloyd Everest" were just being shipped across the Red Sea, when it dawned on the German authorities that it might perhaps be the so-called maraging steel of Arbed Saarstahl, which is subject to approval and is indispensable for the inside casing of uranium centrifuges, the rotors. The investigators later wondered why "so much fuss" was made about the shipment which involves a number of minor order addresses; however, the proceedings were discontinued.

No matter whether computer systems where involved that can be used for the "control of weapons systems," highly sensitive electronic hardware or ring magnets which according to reports of the Federal Intelligence Service just corresponded to the dimensions of the Pakistani high-speed gas centrifuge of the second type (German version). A coincidence? The officials in the Bonn Economics Ministry always felt pestered, instead of feeling challenged to intensify their checks, when the Foreign Ministry passed on secret documents of U.S. intelligence services warning about planned deliveries.

Such "anonymous papers usually end up in my wastebasket," Buenter Welzien of the Federal Economics Institute furiously wrote to the Economics Ministry, wondering whether Bonn had "ever bombarded the Department of Commerce in a similar way?" Even when the Americans asked Bonn to find out about negotiations conducted by German firms on the possible sale of so-called cryotons—tiny electronic elements with which the time a bomb detonates can be determined with an accuracy of one-millionth of a second—the Federal Economics Ministry's reaction was particularly rough. A responsible official called Spies scribbled on a piece of paper: "I reject such employment measures on principle."

However, the request had not been that absurd, after all. Rudolf Maximilian Ortmayer, at the time NTG manager, reportedly also negotiated in Pakistan with a man called Sulfikar Ahmed Butt—the very Pakistani who had attracted attention in the United States when he was trying, via agents, to purchase 50 cryotrons from EG & G Inc. Wellesley, Massachusetts, the only producer in the world. Butt, who is considered to be the chief buyer for the Pakistani bomb builders, reportedly presented to Ortmayer a comprehensive wish-list.

However, the negotiations were only more specific regarding tritium: Butt ordered 10 grams.

The nuclear buyer soon was not interested any more in the heavy water clearing plant that the Pakistanis initially planned to buy, although Ortmayer had engineered everything so nicely to legalize the deal. He invited the responsible official of the Federal Economics Institute, Manfred Ruck, and the Bonn expert spies to see him in Gelnhausen. Having a glass of sherry, the gentlemen discussed the export wishes.

Ruck wrote to his colleague Spies that the plant is absolutely harmless, comparable, "in a figurative sense, to a drinking water treatment plant."

The application was approved.

[From Defense & Foreign Affairs Weekly, May 15-21, 1989]

PAKISTAN PERFECTS N-DETONATOR, CHINA HELPS

Sources close to the Pakistani nuclear program have revealed that Pakistani scientists have now perfected detonation mechanisms for a nuclear device. Islamabad has successfully produced bomb casings which can withstand the buffetting of high speed flights. Such as device, it is learned, can be delivered by Pakistan's F-16s. It has been further learned that China is making arrangements for a Pakistan nuclear test, most likely at its Lop Nur testing ground. Over the past two years Pakistani scientists have been producing enriched uranium at the Kahuta plant. Pakistan's success has been made possible to a large degree by China. Informed sources have told the *Weekly* that China continues to help Islamabad in its nuclear ambitions. Chinese scientists have been visiting Kahuta and Pakistani scientists have been reciprocating the visits.

U.S. CANNOT HALT INDIAN, ISRAELI MISSILE PROGRAMS

US Assistant Secretary of State Allen Holmes has told the Senate subcommittee on defense industry and technology that Washington can do little to rein in the Indian and Israeli missile programs. Holmes is reported to have said that both New Delhi and Tel Aviv had developed indigeneous missile programs, with marginal external support and Washington would have little or no leverage over the two respective programs. Meanwhile Senator Jeff Bingaman has been pressing US Commerce Secretary Robert A. Mosbacher to bar the sale to India of US ballistic missile testing equipment that he fears will directly aid that country in the development of its *Angi* ballistic missile, which has a range of 1,500 miles. The *Weekly* has learned that missile proliferation will be a major issue to be discussed between Secretary of State James Baker in his meetings with Soviet Foreign Minister Eduard Shevardnadze in Moscow later this week. Washington is expected to press the USSR to reconsider joining a seven nation Western undertaking to end the sale of ballistic missile technology to developing nations. The Bush administration is taking the missile proliferation issue very

seriously and Washington is expected to remind Moscow that the Soviet Union has been "primarily responsible" for the delivery of thousands of Soviet-made *Scud* missiles over the past decade to Iran, Egypt, Libya and Syria. US officials are hopeful that Moscow will agree to impose unilateral restraints because of growing Soviet concern about the proliferation of missiles capable of reaching Soviet territory in a number of countries including Israel, Saudi Arabia, Iraq and Iran.

[From Nuclear Fuels Magazine, Feb. 6, 1989]

GERMAN FIRMS EXPORTED TRITIUM PURIFICATION PLANT TO PAKISTAN

(By Mark Hibbs)

Two West German firms exported to Pakistan between 1985 and 1987 a plant for storage and purification of large amounts of tritium gas, according to German federal prosecuting attorneys. The firms, Ncue Technologien GmbH (NTG) and Physikalisch Technische Beratung (PTB), have been under investigation since late last year on suspicions they violated German law (NF, 26 Dec.'88, 1).

Tritium gas can be used in nuclear fission weapons as an igniter or as a booster—the latter typically using about four grams of tritium gas. In microgram amounts, tritium also has civilian uses, such as in the watch industry and in medical research.

Industry experts queried by NuclearFuel, concurring with German prosecutors, said a civilian use for such a plant in Pakistan is difficult to imagine.

Moreover, 0.8 gram of tritium was exported illegally from Germany to Pakistan via Hong Kong to be used to leak-test the tritium plant. Part of that tritium was of Soviet origin, while the rest was produced from U.S.-origin heavy water in a German reactor.

Reliable sources said that prior to startup of the purification plant, Pakistani agents had tried unsuccessfully to import from a German firm at least 300 liters of tritium gas corresponding to about 65 grams of pure tritium at standard temperature and pressure.

Alfred Farwick, senior federal prosecuting attorney in Hanau, revealed details of the plant export January 26 in a closed session of the Bundestag (parliamentary) committee investigating the activities of German nuclear firms.

Hanau prosecutors have been investigating nuclear exports since they received information last fall that top officials from at least two companies, NTG and PTB, were believed to have violated the German Foreign Trade Act by exporting sensitive nuclear equipment and nuclear-related material to several non-NPT countries.

The plant installed in Pakistan can purify tritium gas contaminated with helium-3, oxygen, and deuterium, sources said. Experts explained that "dirty" tritium gas, stored on large absorber beds, is heated and passed through a uranium filter that captures the impurities by forming metal hydrides, yielding 98% pure tritium on the other side of the filter.

According to information obtained by German prosecutors, the total holdup capacity of the purification plant sent to Pakistan is 100,000-240,000 curies of tritium gas. Industry sources suggested that the daily throughput of the plant would be approximately 5,000-10,000 curies, the equivalent to production of 0.5-1.0 gram/day of pure tritium gas. One source said this would be an "enormous amount for a country like Paskistan."

The plant would be able easily to purify all the tritium gas—estimated to range anywhere from 200,000 to 2-million curies—present in the heavy water moderator system of the 137-MW Kanupp reactor—Pakistan's sole official potential source of tritium.

The large size of the plant is fanning speculation that Pakistan may have sources of unsafeguarded heavy water, since purification of tritium gas distilled from all Kanupp's heavy water would take only 200 days at the plant's nominal throughput of 10,000 curies/day. Experts said it would be extremely unusual to detritiate an entire heavy water inventory in a single step. The plant, one industry official alleged, would be "big enough to accommodate" the western world's total annual civilian requirement for pure tritium gas. "I can't believe that a plant that size can have a peaceful use in Pakistan," he said.

Western experts are puzzled, however, about the absence of direct evidence that Pakistan has acquired the technology necessary for detriatiating heavy water—a key link in the process chain which starts with tritium-contaminated heavy water and ends with "clean" heavy water and purified tritium gas as a byproduct.

When heavy water is used as a moderator for natural uranium reactors, it becomes contaminated with tritium over time and must be decontaminated using cryogenic distillation technology—a "sophisticated affair," one western engineer said. "Pakistan would have little use for a tritium gas purification plant if it didn't have the upstream technology to detritiate heavy water," he said.

So far there is only indirect documentary evidence that Pakistan has acquired heavy water detritiating technology. In 1984, NTG informed the Bonn government it planned to export a "heavy water purificiation plant" to Pakistan (Nucleonics Week, 5 Jan., 3). Sources said the matter led to a dispute between the Economics Ministry, which controls nuclear exports, and Foreign Office officials who had been asked by the U.S. government to intercede, after U.S. intelligence got wind of the planned export. Washington believed two firms—Linde AG and Sulzer—may have been involved in the planned export to Pakistan.

Despite the U.S. appeal, in September 1985, the Federal Economics Office (BAW) ruled officially that a license was not required for export of a "heavy water purification plant" to Pakistan.

While prosecutors said the tritium plant in Pakistan cost about DM 2.5-billion ($1.4-million), a Bonn legislator said the total value of the planned tritium technology export was about DM 13-million ($7.2-million). The difference might be accounted for by the more expensive upstream detritiating equipment, an industry source said.

According to prosecutors, although PTB director Peter Finke went to Pakistan to test-operate the completed facility, Finke said he was never told, and could not ascertain, the facility's precise location. Finke said he concluded, however, that it was not in the vicinity of the Kanupp reactor.

Prosecutors are now investigating the German source of Pakistan's tritium technology. The staff of one German nuclear research center may have been involved, as well as a former employee of Nukem GmbH who had access to tritium process technology because of a previous tritium joint venture. A scientist at the Maz Planck Institute for Plasma Physics in Garching is also said to have contributed to Pakistan's tritium expertise.

The 8,000 curies of pure tritium gas used to test-operate the plant in Pakistan were obtained for PTB from a German heavy water reactor and from the USSR by two other firms: Gutekunst, a manufacturer of liminous paints in Schwennigen, Germany, and chemical isotopes company Radium-Chemie AG of Teufen, Switzerland.

Sources said it is unclear where Pakistan might obtain impure tritium gas to feed into the purification plant. Large amounts of deuterium in the "dirty" gas would point to an unsafeguarded heavy water supply in Pakistan, one expert said. Large amounts of oxygen in the feed gas, however, would indicate that Pakistan is producing tritium gas by bombarding lithium-6 targets in a reactor with alpha particles—a technology used by nuclear weapons states. This could mean, according to one source, that Pakistan has constructed a secret unsafeguarded reactor.

GERMANY MAY HAVE APPROVED EXPORTS BY PROSECUTOR TO BE ILLEGAL

(By Mark Hibbs)

Some nuclear-related exports from West Germany to non-signatories of the Nuclear Non-Proliferation Treaty (NPT) apparently were offically sanctioned by the German bureaucracy amd supported by legislators in the Bundestag. At least two of the items originally alleged to have been exported illegally—a tritium extraction plant sent to Pakistan and an ultrasound fuel testing device sent to South Africa—may have left Germany quite legally, the latest information indicates.

On December 21, the senior federal prosecuting attorney in Hanau, Alfred Farwick, announced that suspects from the firm NTG-Neue Technologien GmbH (NTG) and the nuclear consulting firm Physikalisch-Technische Beratung (PTB), "illegally exported nuclear technology to Pakistan without the required permits" from the Federal Economics Office (BAW), an arm of the Federal Ministry of Economics in Bonn (NF, 26 Dec. '88, 1; Nucleonics Week, 5 Jan., 3). NTG was known until 1986 as NTG-Nukleartechnik GmbH. The firms were said also to have exported various nuclear equipment and technology to India and South Africa.

Since then, more suspects have signed confessions and the official investigation has widened to other parties, reliable German sources said.

Last week, Federal Minister of Environment and Nuclear Safety (BMU) Klaus Toepfer suspended the nuclear licenses of a third firm, Gutekunst, after Hanau prosecutors said it may have been involved in procuring tritium gas and nuclear technology for PTB and NTG, possibly in another country.

According to confessions leaked to the conservative daily Die Welt last week, another small trading company called Rieckermann in Hamburg served as an NTG broker with Pakistan. In addition, former directors of NTG and PTB were said to have been in Pakistan about 20 times until agreement was reached on terms for the export of tritium extraction equipment and 300 liters of tritium gas. According to officials from BMU, much less tritium—about 8,000 curies, or just under one gram—was actually delivered from Germany.

U.S. officials knowledgeable about nuclear weapons technology said that one gram of

tritium would be far more than Pakistan would require for commercial purposes, but just under the quantity needed for use in a nuclear weapon.

Officials in Bonn called on the Pakistan embassy last week, after suspects alleged that the former Pakistan ambassador to Germany acted as a courier between the exporting firms and agents in Pakistan. A spokesman for Chancellor Helmut Kohl said that as the present Pakistan ambassador claimed he knew nothing of the matter, Bonn would not take further diplomatic action for the time being.

The ultrasound device for fuel fabrication exported to South Africa—termed "measuring technology" in the prosecutors' original report on December 21—appears to be a fuel clad quality control device manufactured and supplied by Nukem GmbH.

The so-called ROTA-25 ultrasound testing device, used to check the neutron porosity of zircaloy fuel cladding, was supplied by Nukem to yet another small German firm, GASA, which did a large volume of business with South Africa before filing for bankruptcy last fall. According to company officials, Nukem knew the equipment was destined for South Africa and assisted in making the device operable after it was delivered. Nukem cleared the sale with federal export control officials at BAW, who ruled on March 8, 1985 that no export permit was necessary.

Nukem officials said direct military use of the Nukem technology by South Africa is "out of the question."

The export of a tritium extraction plant to Pakistan may also have been legal. According to information obtained by Nuclear Fuel, NTG informed Bonn in 1984 of its plans to export heavy water purification technology to Pakistan. The planned sale led to a dispute between the export-promoting Economics Ministry and the Foreign Office, responsible for ensuring Gemany's commitment to nonproliferation.

A senior U.S. State Department official told Nuclear-Fuel last month that Germany "has always shared our concern about the potential for illegal exports to unsafeguarded programs and has been fully cooperative." However, documents in the case show that Washington's plea to block the export of tritium technology was rejected by the German bureaucracy.

In a message dated March 13, 1986, the State Department said an export of such technology to Pakistan from a U.S. firm "would not have been approved" and urged Bonn to block the sale. The German Foreign Office, fearing the export would damage Germany's nonproliferation credentials, encouraged the Economics Ministry to block the export.

An Economics Ministry note dated April 25, 1986, said that NTG management had requested the firm not be named in discussions of the delicate export license matter. They said NTG management feared terrorist reprisal if it became known the firm was negotiating to export nuclear technology to Pakistan.

Nonetheless, NTG's planned export of tritium technology to Pakistan appears to have been no secret to federal legislators. On May 7, 1985, a Christian Democratic (CDU) Bundestag MP from the state of Hesse (where the firm is located), wrote to Rudolf Sprung, parliamentary state secretary in the Economics Ministry, urging support of the NTG export to Pakistan in the interest of local jobs.

[From Hamburg DPA, Jan. 30, 1989]

FIRM SAID TO EXPORT MISSILE COMPONENTS TO LIBYA

KARLSRUHE (DPA)—Highly valuable missile components have been transported to Libya according to a report in the "BADISCHE NEUESTE NACHRICHTEN" (BNN) via a firm in northern Baden. As the newspaper, which is published in Karlsruhe (Tuesday edition) [31 January] reports, quoting Gustav Eduard Michaelis the president of the Karlsruhe Finance Office, this illegal export was discovered last year by customs investigators. An investigation was started on the possible violation of the law on the control of weapons of war.

Out of concern for the enquiries which were still in progress, the Karlsruhe Higher Financial Directorate refused to give further details on the extent of the arms dealing. The name of the firm was also not given. This is not the only occurrence of transportation of weapons to Libya through northern Baden, the paper quotes Michaelis as saying.

[From Hambury Der Spiegel, Jan. 30, 1989]

COMPANIES EXPORTED BERYLLIUM TO INDIA

[Excerpts] Bonn authorities permitted the export of beryllium to nuclear-weapons-possessing India in 1984. Beryllium is used for constructing bombs. [passage omitted]

According to sub-paragraph 0112 of Bonn's "export list B," which is intended to prevent exports of nuclear goods that can be used for the production of weapons to problematic countries, the export of beryllium is classified as strictly requiring an export license. However, as is coming to the surface now, in the spring of 1984, the Hanau-based Degussa company is suspected of having exported 95 kg to India, of all countries, a country that has nuclear weapons-and Bonn had "non objections."

The deal which was authorized by the authorities of the then Economic Minister Otto Graf Lambsdorff (FDP), and Foreign Minister Hans-Dietrich Genscher, might become the cause of new irritations in FRG-U.S. relations. As can be learned from the application papers, which Der Spiegel has, the bulk of the material came from the United States; as middleman, Degussa passed the hot goods on to India.

The transaction took place at a time when, internationally, the rumor was growing stronger that, after its atomic bomb, India was about to develop its own hydrogen bomb. The delivery was forwarded to an address, which, according to FRG nuclear researcher Gerhard Locke, is "most suspicious": The Bhabha Atomic Research Centre (BARC) in Trombay, north of Bombay.

This center likes to boast its nuclear developments in the fields of medicine and agriculture. However, the Indians are less ready to supply information concerning the military part of their research.

International safeguard controls have no access to information regarding the amount of plutonium—the stuff of which the bomb is made of—the nuclear reactors in Trombay breeds. What is certain is that the material for India's first nuclear explosion in 1974 was provided by Trombay. U.S. experts estimate its present plutonium production at some 25 kg per year.

What is strange is that by consenting to the Degussa deal on 15 May 1984 with a specific form, the ministries in Bonn discarded any "suspicion of abuse of beryllium for nuclear purposes." Last week, Degussa itself, parts of the shares of which are held by a subsidiary of the Henkel Washing Powder Company and Dresdner bank, did not find anything objectionable to the deal with India. According to company spokesman Joachim Nimtz, the delivery "was carried out with the permission of the authorities."

On 21 October 1983 the Federal Economic Office (BAW) accepted the first of two applications for exports by the Hanau enterprise. Only 4 months previously, in June 1983, the Reagan Administration had stopped all U.S. deliveries of this kind to India—at that time secret intelligence services noticed intensive efforts by India to start a second nuclear test, possibly with a hydrogen bomb.

Similar reports were spread by the Federal Intelligence Service (BND) almost 2 years later. The "BARC Nuclear Research Center In Trombay," the BND warned in a classified report of May 1985, has been ordered by the Indian Defense Ministry to "continue work on developing a nuclear fusion weapon (hydrogen bomb)."

In its application for exports, Degussa put under the heading "use" "research and development work" in smelting, compressing, and casting of beryllium, which is often used for alloys. Material of "high purity"—at least 98 percent—had been ordered. Degussa added a telex of the Indian Nuclear Ministry [title as published] to the documents for the application. In this telex a government representative claimed that India does "not have any program for the production of nuclear weapons."

According to experts, the amount of beryllium ordered at that time makes sense: 95 kg—this is "a manageable amount for about 20 bombs," arms researcher Locke says.

In building a hydrogen bomb, the metal can be put around the radioactive core as a sheath. The desired effect: According to Locke, the neutron-multiplying properties of the relatively cheap beryllium reduce the demand for valuable plutonium "by a factor of about two."

The Bonn experts cannot have ignored this possibility of use: experts of the FRG Research Ministry expressly warned against the fact that the metal can "be used as a neutron reflector for the construction of nuclear weapons," when they had to deal with an application for the export of 60 kg of beryllium nitrate to India in February 1980.

Only because—as the BAW calculated—"at the most 2.637kg" of pure beryllium can be produced from the nitrate was the permit issued at that time.

The Research Ministry experts noted that for the building of bombs India needs "amounts ranging in kilograms". These were delivered 4 years later—almost 100kg.

[From the New York Times, May 7, 1989]

NORWAY DETAILS HOW HEAVY WATER WENT TO INDIA

(By Sanjoy Hazarika)

NEW DELHI, May 6.—Norwegian investigators say they have evidence that material that could be used in the manufacture of atomic weapons was illegally shipped to a Bombay company in 1983. The company is listed in the Bombay telephone directory as an affiliate of the Indian Government's Department of Atomic Energy.

The Norwegian investigators say their evidence of the shipment, involving 21 tons of deuterium oxide, or heavy water, is a document and a statement from a witness. But the chairman of India's Atomic Energy

Commission, M. R. Srinivasan, denied that such a transaction had taken place.

"At no stage have we bought heavy water from Norway," Dr. Srinivasan said in an interview. "We do not know the veracity of these documents; we have not had anything to do with Norway. We are one of the most important producers of heavy water in the world and we do not have any imports except from the Soviet Union."

It has been previously reported that India obtained heavy water from Norway and the Soviet Union, but this is the first time that Norway has given details of the company that they said received the shipment at Bombay.

Norwegian officials say they have the original flight document that traces the shipment from Oslo to Basel in Switzerland and then to Dubai in the United Arab Emirates and finally to Bombay. They are also relying on testimony by a man hired by a West German company to accompany the cargo.

Under the Nuclear Nonproliferation Treaty, shipments of more than one ton must be reported to the International Atomic Energy Agency and put under safeguards if shipped to countries like India, which has not signed the treaty. That was not done in the case of the 1983 shipment.

Heavy water is used in reactors to slow the neutrons emitted in nuclear fission to a speed at which they cause additional fissions. Ordinary water can also be used, but it absorbs neutrons and therefore requires use of enriched uranium, which is expensive and difficult to make. With heavy water, reactors can run on natural uranium. Reactors using uranium produce plutonium, a bomb fuel, as a byproduct.

Plutonium is also used to start new atomic reactors, and Dr. Srinivasan, the nuclear official, has said that critics who say that India is diverting the material to a nuclear arms program overlook this point. In an interview last year, he said that 50 kilograms of plutonium were used in 1985 to start up a new "fast breeder" test reactor that uses raw material available in India.

Although most of India's nuclear plants are not open to international inspection, New Delhi has denied having a secret weapons program. Its capability of building a nuclear weapons system was shown, however, when it exploded what it called a peaceful nuclear device in 1974.

Norway said a West German company, Rohstoff Einfuhr, bought 15.18 tons of heavy water from Norway in 1983, flew it to Basel in Switzerland by West African airlines. Then, with the addition of six tons of Soviet heavy water, it was flown to Dubai and India. The consignment landed in Bombay, the Norwegians said, about Dec. 7, 1983.

The Chief Public Prosecutor for Oslo, Anstein Gjengedal, who is leading the investigation of the shipment, said in a telephone interview that he did not know whether the destination was an Indian Government department.

"All I have is an address in Bombay, not a name, and we have found this address on a freight document written in West Germany and we still do not know if this is the end user," he said.

Mr. Gjengedal said the address on the freight consignment document listed the Directorate of Purchase and Stores at Palton Road in Bombay as the consignee. He quoted a West German national who reportedly accompanied the flight to India as saying that the consignment was "handed over to this address."

A visit to the address given by the Norwegians showed that the department had moved. A security official at the Directorate's office said the office was move "three or four years ago." The Bombay telephone directory lists the Directorate under a listing for Central Government offices of the Atomic Energy Dpartment.

[From Jane's Defence Weekly, Apr. 22, 1989]

CONTROLLING THE SPREAD OF BALLISTIC MISSILES

(By Barbara Starr)

CIA Director William Webster predicts that by the year 2000, at least 15 nations will be producing their own ballistic missiles.

"Although missiles being developed by these countries are somewhat crude and inaccurate, many of them have capabilities well beyond battlefield range and can strike in a matter of minutes," Webster said.

He did not identify the 15 countries, in a speech following Congressional testimony in which he warned of the proliferation of nuclear, chemical, and biological weapons, especially in the Middle East.

Webster says as many as 20 nations are developing chemical weapons and 10 countries are working to produce biological weapons.

As missile attacks on cities in the Gulf War accelerated in the 1980s, seven industrial nations announced a new effort in April 1987 to curb the transfer of technology that could enable other nations to develop ballistic missile systems.

Yet since the formation of that Missile Technology Control Regime (MTCR), a seemingly unstoppable number of nations have continued to proceed with development of long-range missiles capable of derlivering nuclear warheads, as well as chemical or biological weapons.

The MTCR attempts to control missile technology exports through the co-ordination of the seven member nations: the United States, Canada, France, the UK, Italy, Japan and West Germany. The Soviet Union, China and Israel are not signatories.

Non-proliferation advocates say Third World nations have to go to these 10 suppliers for reliable and usable technology.

The MTCR has had only moderate success as a limiting force. Yet, as Webster said, it does not include "key players in today's missile and advanced technology market.

"The agreement also does not reduce the incentive or ability of Third World nations to develop ballistic missile technology on their own."

Moreover, critics say the MTCR does not take a strong enough stand against export of so-called dual use items, such as components which could easily be transferred from a space programme to a missile programme.

For example, US officials are keeping a close eye on whether India is using technology gained in its space programme for its ballistic missile test programme. India is reportedly planning the first test launch of its Agni medium-range ICBM, said to have a 2000 km range, next month.

The MTCR is not an official treaty, and there is no ruling body to administer sanctions or controls. Each member nation must develop its own laws to control exports restricted under the MTCR.

"The only enforcement mechanism is if the CIA finds out a nation is doing something it shouldn't," says Gary Milhollin, a former nonproliferation consultant to the Pentagon. "The MTCR is not going to stop the spread of ballistic missiles to the Middle East. It is too little, too late."

The regime does provide for a detailed system of regulating the export of certain materials and components that could be used in ballistic, as well as cruise missiles.

Under the terms of the agreement, an envelope is established whereby there is a strong "presumption of denial" to export items capable of delivering at least a 500 kg payload to a range of at least 300 km.

According to the official text of the regime, this means member nations will generally agree not to export "complete rocket systems (including ballistic missile system, space launch vehicles and sounding rockets) and unmanned air vehicle systems (including cruise missile systems, target drones, and reconnaissance drones)" that fall within those capability parameters.

Also not to be exported are individual rocket stages, re-entry vehicles designed for non-weapons payloads, some solid or liquid fuel rocket engines, some types of guidance sets, and arming, fuzing and firing mechanisms.

Another category of items is established where exports are more readily permitted if it is determined on a case-by-case basis that the components will not be used for ballistic or cruise missiles.

These include lightweight turbojet and turbofan engines, ramjet and scramjet engines, some liquid fuel control systems and propellants.

This complex regime has yet to stop some key nations, however. For example, recent reports indicate that Egypt is co-operating with Argentina and Iraq on the development of the SS-1C Condor II with a range of up to 1000 km.

The Condor programme has experts around the world worried. It is a potential threat to Israel—but the UK is also worried that Argentina could use it against the Falklands (Malvinas).

A report in the Argentinas newspaper suggests however that Israel is pressing Argentina to end the relationship with Cairo, in return for which Israel will deliver 12 promised A-4Q aircraft.

In response to international pressure, the West German Government has been taking a closer look at missile technology exports. But many in the US Congress are critical.

Rep. Howard Berman alleged recently that West Germany's largest aerospace firm Messerschmitt-Bölkow-Blohm (MBB) has played a key role in Condor II and that Fiat's SNIA-BPD is also contributing components. "There is also reliable evidence that MBB is participating in a separate Iraqi missile project in the northern city of Mosul, the suspected site of Iraqi chemical weapons development," he said.

Berman, and a bipartisan coalition of four other Congressman, have introduced legislation to strengthen the MTCR.

The legislation would require the President to impose at least one of the following sanctions on any company he finds in violation of the MTCR: denial of US export licenses; denial of US Government contracts; and/or a ban on imports into the USA.

"Perhaps our allies have done as much as they politically can. But by enacting this legislation, the United States can do more. Companies engaged in these projects will be forced to forego their business with us if they continue to pursue the profit gained by this extremely risky and ill-advised business," says Berman.

[From International Defense Review, 1989]

INDIAN IRBM DETAILS REVEALED

For the first time, India has officially admitted the existence of the Agni surface-to-surface IRBM. IDR understands that its first firing will take place shortly from the Interim Test Range at Baliapal in Onssa State. Agni (Fire) is the biggest and longest-range missile being developed by the Defense Research & Development Laboratory (DRDL) at Hyderabad under the Integrated Guided Missile Program launched in 1983. Its design team was headed by Dr. A.P.J. Abdul Kalam, Director of DRDL, who had also been in charge of the earlier Prithvi program (see IDR 5/1988 p. 478).

Significantly, the first stage of Agni is the solid-propellant first stage of the SLV-3 satellite launch vehicle. The four-stage SLV-3 was also designed by Dr. Abdul Kalam, while at the Indian Space Research Organisation (ISRO). It has a three-segment polybutadene acrylic acid acrylonitrile (PBAN) solid-propellant charge. The 10m-long. 1m-diameter stage weighs 10,000 kg. While its thrust and burning time are not given, the thrust should be over 20t, since the complete SLV-3 weighed 17t at lift-off.

For the first time, India has thus used a component of its purely civilian space research program for a military application. (Under former Chairman Dr. Satish Dhawan, ISRO had consistently opposed any military application for its SLV-3 or any other product).

The Second of Agni's two stages has a storable liquid propulsion system. While the 250km-range Prithvi, first test-fired on 25 February 1988, has a low-energy propellant combination of RFNA and xylidene and the same could also very likely be used on the Agni upper stage. India also has the N_2O_4/UDMH technology in hand.

Press accounts state that the Agni will have a "twin-microprocessor-based missile-guidance computer with interrupt-driven real-time software". Design work on the control and guidance system was also undertaken at DRDL, with collaboration from researchers at the Indian Institute of Science, Bangalore, under the Joint Advanced Technology Program. The earlier Prithvi has an advanced inertial navigation and guidance system, as well as an onboard mission controller.

The Agni, with a range probably exceeding 2,000 km. is expected to have a conventional warhead. While no details have been released, the warhead is likely to be extremely heavy, and there may be various types for deep strikes against high-value targets.

[From Hamburg Der Spiegel, Mar. 27, 1989]

FIRMS INVOLVED IN IRAQ MISSILE PRODUCTION

Iraq is building its own missile production. Technology and know-how for the research center were delivered by German companies.

On 5 August 1987 at 1602 telex machine "298078 Con MIK" starts to rattle. Telex number 3368 goes "to Gipro site office" and starts with a call for help:

"Since at the moment it is hardly possible to reach a competent person at project Saad 16," the "very esteemed gentleman" Nitsche and Isele are asked to convey the "list of training companies with the appertaining dates of the courses."

The telex line belongs to the Vienna Consultco Limited. In Al Thakafiya Street [spelling as published] in the north of the Iraqi university town of Mosul this Austrian construction company has a joint office with the Bielefelder Gildemeister Projecta Limited (Gipro).

Gipro is the general contractor for Saad 16—a project for which "laboratories and workshops comparable with facilities for technical colleges and test institutes" are being built, according to the Gipro management.

The comparison is misleading; In reality Saad 16 is the currently largest and most secret armament project in Iraq. Documents and eyewitness reports available to DER SPIEGEL are substantiating the suspicion: The facilities being constructed on the northern rim of the town on the Tigris River are certainly not the harmless institute that "is to be operated in cooperation with Mosul University," as the Gipro management claims.

Telex number 3368 proves: German companies are involved much more in the project than has been assumed to date.

Dozens of FRG companies have delivered technology and know-how for the "Technology Center," in which—according to intelligence information—missiles and chemical weapons are to be developed. The Iraqis are basing their work on preliminary work done by Egypt and Argentina—the Condor 2 missile project. Its goal is the development of a precise intermediate-range missile whose range could cover the entire Middle East.

The beneficiary of FRG business efficiency is a dictatorship, which is striving for regional supremacy after 8 years of war in the Gulf, which tried to break the resistance of its own Kurdish minority in the north of the country with cowardly poison gas attacks in violation to international law, and which has recently been accused by the human rights organization Amnesty International of systematically torturing even children.

A structural diagram from the documents of a company involved in Saad 16, which was published in the previous edition of the Austrain magazine PROFIL, proves FRG influence on the DMI.5-billion project: According to this, 5 years ago the state-owned Iraqi company Saad General Establishment contracted Gildemeister Projecta in contract number 16/1/84 as the general contractor for "technology" and Consultco as subcontractor for the "civilian parts" of the project—overground workings and foundation work as well as transportation and insurance.

The most important deliverer of technology of the planning company Gipro became Messerschmidt-Boelkow-Blohm (MBB), a Munich aircraft company, which has been developing various kinds of flying armament for decades—from the Tornado fighter bomber to the Fighter 90, from antitank missiles to large-scale missiles. MBB is participating in the Mosul deal with DM77 million. The people from Munich and Bielefeld hired several other subcontractors. "As a German company," the Gipro management assured DER SPIEGEL, "we tried to contract German producers for the delivery of equipment if it was possible in any way." Obviously with success.

From the German BP to Carl Zeiss, from Degussa to Tesa—renowned companies are working for the Saad 16 project: 38 FRG companies are dealing with a comprehensive training program for Iraqi experts, which are to be trained in operating chemical laboratories and electronics workshops, wind tunnels, and physical test facilities.

The list of contractors in a monthly Gipro report also contains companies which have repeatedly been suspected of dubious arms deals.

Fritz Werner Industrial Equipment Limited provided a universal drilling machine. The company from Geisenheim, which is 10-percent state owned has been conducting profitable arms deals for years, also with Iran, Iraq's enemy in the Gulf war.

By far, the most comprehensive monthly delivery in July 1987 was ordered at Karl Kolb Company. The public prosecutor is currently investigating this laboratory equipment company because of the suspicion that the Hesse firm delivered poison gas facilities to Iraq.

The Rheinmetall cannon production company is involved via its subsidiary Aviatest, providing two wind tunnels; and with the Mauser gun manufacturer another FRG arms producer is listed in Gipro's order books.

There is even a direct missile trace from MBB to Iraq, which has now been retraced by PROFIL journalists Herbert Langsner and Alan George. The Munich company has been involved in the Argentine Condor I Project since 1979, which first was allegedly destined to build a weather research rocket. Soon it turned into a "multipurpose" missile.

Not quite 2 years ago, when it had long become clear that the Argentines were working on a military missile program, MBB had to cease cooperation upon pressure by Bonn. MBB engineers, which were hired by partners of the Munich company in the Condor project, remained in business—and with them the technical know-how of the Bavarians.

Insiders believe that the old Condor crew are now providing their technical knowledge to Iraq for serial production of those weapons that are developed near Mosul. Europeans report from Baghdad that a top secret production facility is currently being established somewhere in northern Iraq.

Gildemeister is able to present a clearance certificate for the dubious deals—clearance number 48422 of the Federal Economic Office.

"For presentation to the customs authorities" the Federal Economic Office attests to Gildemeister Projecta Limited that "according to current rules, machinery, electrical equipment, regulation, measuring, and testing instruments for a research, development, and training institute with eight main sections, name: Project Saad 16, do not need an export permission."

The subcontractors also stress that their deliveries were legal. Peter Resz Czynski of the Hamburg Koerber AG assures that Blohm company, a member of the concern, has in no way delivered computer-controlled grinding facilities, which are subject to export permission, to Iraq. In 1985 and 1986 three standard grinding machines, type HFF 512 and Hanseat 11, "older model" (Resz czynsik) were ordered. Operators were trained for these machines in Germany and Iraq. "Everything completely harmless," Resz Czynski says.

MBB spokesman Udo Philipp also wants to give this impression. Testing centers "for surface analysis" and calibration labs were sent to Iraq. However, Philipp admits, "something like this" can "also be used for military purposes."

Gipro, too, does not want to absolutely exclude the possibility that the technology center, all of which will be handed over to Iraq "by mid-1989," could be used militarily: "In general, all universal products and fa-

cilities can often be used for several purposes."

However, what eyewitnesses have seen on site and what is proved by construction plans, goes far beyond the mere possibility of military utilization. Saad 16, located in a valley 1 km off the transit road to Sachu [spelling as published], is strictly guarded with electronics and video cameras by the military.

The more than 3.3-km-long fence is equipped with watchtowers, the main entrance is equipped with quick-action barriers. Mercedes Unimog vehicles, which are equipped with radar antennas, are patrolling between the buildings. Bungalows for managers, a first-aid station, a fire brigade, and an independent energy supply stress the isolation from outside.

Camouflage and bunkers emphasize the military character of the facility, whose center is a more than 100-meter-long hall for the construction of prototypes. In the northern part of the area a 120-meter-long subterranean shooting gallery—4 meters wide and 4 meters high—was tunneled into the mountain. The walls, insulated with noise-proof naps, look as if a chicken farm had donated its annual stock of egg cartons to this.

In a side valley to the west, there are 28 so-called resistance buildings, which have particularly stable roofs that are slanting down on one side and three stable walls, the fourth wall, on the other hand, is made only of wood. Thus, in case of laboratory accidents, the pressure of an explosion is purposefully directed into a harmless direction. Most of the 58 chemical laboratories are located there.

Adjacent, protected by walls on all sides, there is a missile test stand with control rooms and climate chambers. The buildings with measuring laboratories (from MBB), which are close by, are also protected by a 150-meter-long wall against the chemical laboratories.

Several times the speed of sound can be stimulated in the 12-meter-long wind tunnels, and the 27 electronics laboratories have a nonechoing room built by Siemens.

"Only if one is inside this room," an insider says ironically, "can one overlook that this is a military project."

U.S. FIRMS HELPED IRAQ GAIN ABILITY TO MAKE MISSILES, OFFICIALS SAY

(By David B. Ottay)

Before U.S. export restrictions in 1987, some American companies sold equipment that helped Iraq build a military-industrial complex capable of developing missiles, U.S. officials disclosed yesterday.

"We're aware of the fact that American technology was sold to the Saad 16 complex," said a U.S. official, who described the facility near Mosul in northern Iraq as "a defense-industrial establishment" involved in engineering and manufacturing missiles, planes and other military items.

The disclosure came amid a U.S. diplomatic drive to get West European nations to crack down on companies selling technology and expertise to Third World nations seeking to build missiles or chemical and biological warfare plants.

The United States imposed a ban in 1980 on the sale by U.S. companies of all military equipment and so-called "dual-use" items—those with civilian or military application—to Iraq and Iran during their 1980–88 Persian Gulf war.

Whether the American equipment at the Saad 16 complex were "dual-use" items was not immediately clear. But U.S. officials insisted no U.S. export laws were violated by the American firms.

The officials refused to disclose the firms' names, but said the equipment provided to the Iraqis was "relevant to missile production" and sold "directly or indirectly" to the Saad 16 complex.

A spokesman for Hewlett-Packard Co., the California computer firm, said in a telephone conversation last night in 1985–86, the company had delivered "electronic equipment of various types" to the German company, Messerschmitt-Boelkow-Blohm (MBB), under a license authorized by the German government and the U.S. Department of Commerce.

"The end-user on the license was shown as the State Organization for Technical Industries-Saad General Establishment," Hewlett-Packard spokesman Richard Harmon said. He added that the Iraqi organization was described as "an institute for higher learning."

He added, "In summary, anything delivered to Saad was done through MBB and subject to a specific authorization."

A spokesman for another U.S. firm, Wiltron Co., in Morgan Hill, Calif., which makes electronic test and measuring instruments, confirmed that in early 1987 Wiltron had sold a $50,000 "scalar analyzer system" to its subsidiary in Germany, which in turn provided it to MBB for the Saad complex. Peter Chalfont said the firm had obtained a Commerce Department license indicating that the Saad site was the end user.

In testimony yesterday before a Senate Armed Services subcommittee, W. Seth Carus, an expert on missile proliferation at the Washington Institute for Near East Policy, referred to recent reports in West German and Austrian media that U.S. companies "may have supplied 40 percent" of the equipment for the Saad 16 complex.

State Department officials confirmed U.S. involvement in building the complex but said "it was not clear" on what the 40 percent estimate was based.

They said it was legal for U.S. companies to obtain export licenses to sell certain high-tech items abroad until restrictions were imposed by the Missile Technology Control Regime (MTCR) signed by the United States, Canada, France, West Germany, Italy, Japan, and Britain in April 1987.

The regime bans export of missiles or their components and any technology or equipment related to the production of ballistic and cruise missiles capable of delivering a payload of at least 500 kilograms to a distance of 300 kilometers or more.

"They [U.S. firms] obtained export licenses and nothing illegal was done," one U.S. official said.

However, congressional sources said that in 1985, two years before it formally committed the U.S. to the MTCR, the Reagan administration had begun adhering informally to the regime. They questioned whether licenses should have been issued in the 1985–87 period.

U.S. officials said while the United States had sought to adhere to the MTCR terms since March 1985, the Commerce Department had no legal basis for halting such sales as those involved in the Saad 16 complex until the regime went into effect in 1987.

The officials said they were unaware of any U.S. sales to the Iraqi complex since April 1987.

Carus said that in addition to MBB, West German and Austrian news reports had identified a German-Austrian company, Gildemeister, as the principal builder of the Saad 16 complex. He said the reports named two U.S. firms besides Hewlett-Packard and Wiltron which allegedly provided equipment to it.

The two others were Tektronix Inc. of Beaverton, Ore., a manufacturer of computer graphics terminals and measuring instruments, and Scientific-Atlanta Inc. of Atlanta, which makes telecommunications and satellite ground station equipment.

A spokesman for Tektronix said yesterday the firm was searching records for sales to Iraq or the Gildemeister firm. A person at Scientific-Atlanta said offices were closed for the day.

Carus testified that "a variety" of West German firms were involved in building the Saad 16 complex, in which Iraq had invested more than $200 million. He described it as a research and development facility to build "a variety of different types of missiles, including both ballistic and cruise missiles."

But U.S. officials said they thought the complex would also be involved in the production of various weapons, including missiles.

The West German magazine Stern said Hewlett-Packard had provided computers for more than 50 laboratories in the complex.

[From the London Financial Times, 12 Apr. 1989]

PROSECUTOR LAUNCHES INQUIRY INTO MBB'S CONDOR MISSILE LINKS

(By Simon Henderson and David Goodhart in Bonn)

The Munich city prosecutor is investigating reports that a subsidiary of the West German aerospace concern Messerschmitt-Bölkow-Blohm (MBB) broke export control laws by delivering parts for a DM70m missile system to Iraq.

MBB would make no comment on the allegations but did confirm yesterday that its subsidiary MBB-Transtechnica was being investigated.

Western officials say that a group of 16 companies in Europe, known as the Consen Group, is using West German rocket designers and other specialists to help Egypt, Argentina and Iraq develop a 1,000km-range missile capable of carrying nuclear and chemical warheads. The companies are registered in Monaco, Switzerland, Austria, West Germany, and Argentina.

MBB is one of six big European companies named in documents as being "most important in co-operation and as sub-contractors".

Western officials expressed concern at the activities of the Consen Group, which they say is acting as a "European missile management company", buying in expertise for the missile, the Condor II, particularly on propellants and guidance systems, using predominantly West German engineers.

One Consen company, the IFAT Corporation of Zug, Switzerland, was quoted last year in US court documents as sending more than $1m to an Egyptian-born American citizen now awaiting trial in California charged with conspiring to export missile parts to Egypt without a license.

Another company in the group, Desintec, also of Zug, attempted to buy missile nozzles from the US in 1984 for the Argentine Air Force.

Western officials describe the Condor II as a two-stage, solid fuel rocket. They say

that it was due to be tested in Argentina in October but was delayed by technical problems. Development is being conducted in parallel in both Egypt and Argentina, with Iraq funding part of the Egyptian programme. Deployment is not expected until 1992.

Washington and London are leading a diplomatic effort to stop the development of the missile. In 1987 they agreed with other Western European nations and Japan on a Missile Technology Control Regime which tightened export controls on sensitive items. The UK is worried that the Condor II will have the range and accuracy to hit the airfield on the Falklands from Argentina. The main US concern is the impact in the Middle East.

Israel, which has already test-fired its own long-range missile, the Jericho II, is developing its own anti-missile missile. Western intelligence officials credit the Israeli secret service, Mossad, with causing three explosions in Europe seeking to break up the Consen operation, including one last May when the car of Consen's general manager was blown up on the French Riviera.

MBB has admitted helping Argentina develop an earlier missile, Condor I, but says it is not involved in Condor II. But its subsidiary MBB Transtechnica is a sub-contractor to another West German company, Gildemeister, on a project in Iraq known as Saad 16. Last week West German investigators seized files from Gildemeister.

[From Mid East Markets (MEM), Apr. 17, 1989]

CONDOR II: AN ISSUE TO TEST US-EGYPT TIES

A reference to a new missile in MEM on February 6, 1989 set off a whole series of articles elsewhere and brought into the open a simmering diplomatic row. MEM understands that when President Mubarak was in Washington he was asked about Egypt's intentions concerning the missile which it is building with Argentina's technical help and Iraqi finance. The Israeli Prime Minister, Yitzak Shamir, also asked the US what was going on, and last week the Israeli Foreign Minister, Moshe Arens, asked the West German Defence Minister, Rupert Scholz, about the involvement of West German companies.

Although still to be flight-tested the Condor II missile is state-of-the-art. It has two solid-fuel stages and will fly a 700kg payload over 1000km. It is likely to have terminal guidance to make it accurate to within 100m. Existing missiles in Arab arsenals are antiquated by comparison and hardly accurate enough to hit even a city. The Soviet-supplied Scud is a version of the Nazi V-2 missile from World War Two. It has a single-stage liquid-fuelled motor which means that the missile must be accompanied by tankers containing highly volatile fuel to top up the missile.

The new Iraqi missiles—Al Hussein (range 650km) and Al-Abbas (range 860km)—are merely enhanced Scuds with a longer range obtained by using less warhead and more fuel. The Saudi missiles obtained from China are also liquid-fuelled and probably unserviceable most of the time: imagine storing and handling the fuming nitric acid and industrial alcohol fuels in desert temperatures of over 40°C!

CONSEN

Argentina and Egypt agreed to cooperate on Condor II in the early 1980s, with Iraq helping Egypt under a secret exchange agreement believed to be known as Badr 2000. All three countries have been helped by a mysterious collection of European companies known as the Consen Group. One Consen company, the Ifat Corporation, financed an attempt to buy missile technology last year in the US for which an Egyptian-born US citizen is awaiting trial. The man, Abdel Kader Helmy, is described by his lawyer as being a childhood friend of the Egyptian Defence Minister, Abdel Halim Abu Ghazala, who is also implicated in the attempt to break US export laws.

Another Consen company, Desintec, tried to buy rocket nozzles for the Condor II from a California company in 1984. They were to be sent to the Argentine air force. Plans for the nozzles are shown here, including a cross-section of the missile with its internal star shape to ensure best burning of the propellant. (Consen declined to comment on its involvement with Condor II.) [Graphs not reproducible.]

The Consen Group has used West German rocket engineers and other specialists to help Egypt and Argentina, and may also have helped Iraq in its Scud enhancement programme, which tilted the balance in the Gulf war when the modified missiles started to rain down on Tehran last year.

The Egyptian missile production facilities are being readied at Military Factory 90 in the Abu Zabaal area outside Cairo. This is also where reports claim that Egypt has a chemical weapons plant, and where Field Marshal Abu Ghazala wants to build a production line for the US Abrams tank.

Iraq's Scud modification plant is thought to be at the Sa'ad 16 complex near Mosul, although there is another programme, designated Project 395, which is considered more closely linked to the Condor II. There have been direct contacts between the Iraqi Technical Corps for Special Projects (Teco), the organisation responsible for Project 395, and the Argentine Institute of Aeronautical and Space Research, which co-ordinates work on the Condor. Teco, which also drafts experts into oilfield work and other non-military areas, comes under the direct authority of President Saddam Hussein, although it is run by his son-in-law, the Minister for Industry and Military Industrialisation, Brig. Hussein Kamel Majid.

During recent weeks West German officials have started investigating the activities of a subsidiary of the aerospace giant, Messerschmitt-Bolkow-Blohm (MBB) which is involved with another West German company, Gildermeister Projecta, at Sa'ad 16 in Iraq. Yet other West German companies are linked to Military Factory 90 in Egypt.

SUBSTANCE TO NUCLEAR ALLEGATIONS AGAINST IRAQ

Although the US Government was annoyed when Israeli officials leaked reports that Iraq was trying to develop a nuclear weapon, the denials of the more knowledgeable officials were more qualified than much of the press noticed.

The assertion of the Washington Post was that Israeli officials thought that Iraq was between two and five years from making an atomic bomb. The newspaper also claimed that the device was intended to put on the Condor II missile being developed in conjunction with Egypt and Argentina (see separate story).

The more conventional estimate for Iraq achieving membership of the nuclear club is 10 years. Nuclear status might have been reached eight years ago, but the destruction caused by an Israeli bombing raid on the Tuwaitha nuclear centre in 1981 was so total that the possibility of using a research reactor to produce plutonium had to be abandoned.

Present concern about Iraq is based on increasing efforts that the country is trying to build a uranium enrichment plant using the centrifuge principle. Highly enriched uranium is an alternative weapon material to plutonium, but can only be produced using an elaborate and sophisticated industrial plant. Western officials have noted over the years the number of Iraqi students being sent abroad to study the two basic principles of uranium enrichment diffusion and centrifuges. Recently, they say, it became clear that Iraq had opted for the centrifuge route in which uranium, in a gaseous form, is pumped through hundreds of linked high-speed centrifuges.

USA officials confirm that $400,000 worth of vacuum pumps destined for Iraq, and suspected to be destined for a nuclear plant, were recently stopped from being shipped. What had caught the attention of US agents was that the pumps in question were designed for use with vegetable oil but were being ordered by the State Company for Oil Projects, Iraq's main oil equipment purchase body. When asked to explain the order by the US, Iraqi officials were not able to give an adequate answer.

There are very few centrifuge plants in the world, and most produce low enriched uranium for power stations. The only one in the developing world is in Pakistan which, despite denials, has been producing enough highly enriched uranium to make between four and six bombs a year for the last two years. The Pakistan plant uses techniques similar to those developed by the Urenco consortium of the UK, the Netherlands and West Germany to produce uranium for their power stations.

Pakistan took 10 years to build and start operating its plant, overcoming foreign export controls and technical difficulties, hence the time frame for Iraq. The difference, western officials say, is that Iraq is putting considerably more money and effort into its buying programme. Maybe the Israelis were right after all.

SAUDI CONCERN OVER CHEMICAL CLAIM

The Saudi Government is showing its usual sensitivity: this time on the delicate subject of chemical weapons. A fairly innocuous reference in a long series on the subject in the Chicago Tribune elicited from Saudi officials a denial that was considerably longer than the original claim.

The Chicago Tribune on April 4 listed 25 countries it said were known or suspected by US intelligence officials to possess or be developing chemical weapons. The Middle East countries included were Israel, Egypt, Libya, Syria, Iran and Iraq. The Tribune then added: "Suspected of being in the next echelon of those who have an interest in a possible access to resources needed to build chemical weapons are Saudi Arabia, Pakistan, India, Thailand, Brazil, Argentina, Chile and Peru, according to these sources."

This was the sole reference to Saudi Arabia in a cluster of articles and background pieces on chemical warfare published by the Tribune and totalling more than 10,000 words. But it was enough to prompt a statement from the official Saudi Press Agency that the kingdom had issued a categorical denial of the report's allegation that it was a country with the potential to produce chemical weapons.

"A responsible Saudi source told the Saudi Press Agency here today that what had been published by the Chicago Tribune is merely baseless and fabricated," the agency said in a report issued on April 6. The kingdom had declared, and again reiterated, its opposition to the production of chemical weapons. The agency's report then drew attention to the kingdom's recent ratification of the Nuclear Non-Proliferation Treaty.

This was the important point, because the denial was as much aimed at scotching reports in the US press that Riyadh had agreed to help Iraq underwrite the financial costs of refurbishing its Osirak nuclear facilities at Tuwaitha outside Baghdad—bombed by Israel in 1981—as at replying to vague assertions that the kingdom possessed some potential for chemical weapons manufacture.

The episode is also instructive because it underscores the strong sensitivity of the Saudis on the delicate issue of unorthodox weapons of any kind. Having received their medium-range East Wind missiles from China, the Saudis are taking pains to make it clear to the US that there is no question of them being equipped with anything other than conventional warheads.

UNDERSTANDING WITH ISRAEL

For more than a year the US has been engaged in discreet but parallel talks with the Saudis and the Israelis aimed at preventing either a pre-emptive strike—presumably by Israel—or any wedding of chemical weaponry to existing missiles—presumably with regard to the Saudis. (Western intelligence officials say that the Chinese missiles delivered to the kingdom have had their range reduced to between 1200-1400 km. In Chinese service the missile carried a nuclear warhead; indeed it was the missile used to test China's fourth nuclear bomb, the design of which was subsequently passed on to the Pakistanis, the officials say.)

For the Saudis, much is at stake. The kingdom is currently seeking assurances from the Bush Administration that the US will agree to a major sale of some 315 General Dynamics Land Systems Division M1-A1 main battle tanks, together with between 50 and 100 replacement aircraft for its aging fleet of 110 F-5 reconnaissance aircraft and interceptors. The Saudis are also seeking to secure the tracked Multiple Launch Rocket systems (MLRS) battlefield rocket and 2,000 of the Mark-84 aerial bombs. US companies concerned with the potential sales are engaged in a major campaign to inform Congress of the importance of these arms deals. They are basing their case not so much on Saudi Arabia's defence needs, but on the economic costs to the US if these deals, which are potentially worth several billion dollars, fail to go through.

ADMINISTRATION'S VIEW

The Bush Administration—and in particular the new Director of Policy Planning at the State Department, Dennis Ross—remains particularly concerned about the growing political acceptability of chemical weapons in the Middle East following Iraq's successful use of chemical weapons in both its campaigns against Iran and in its repression of Iraqi Kurds. The Saudis therefore need to counter this impression if they are to secure the weapons systems they favour.

US defence industry officials have told MEM that the Saudis are again looking to the US for military aircraft, because it is complicated enough having to introduce one totally unfamiliar aircraft into their inventory—the British Aerospace Tornado—and they would feel comfortable if the replacement for their F-5s were to come from the US.

Ideally, they would like a further 50 McDonnell Douglas F-15 interceptors, which could then be incorporated into the Saudi arsenal with relative ease as the Royal Saudi Air Force already possesses 60 F-15s. Failing that, they would choose to replace their 110 F-5s on a one-for-one basis with General Dynamics F-16s or McDonnell Douglas F/A-18s.

[From the New York Times, Feb. 23, 1989]

THOSE CHINESE MISSILES

(By William Safire)

WASHINGTON.—If you keep tugging on a loose thread, the Hong Kong tailors warn, your whole suit could fall apart.

Here's a loose thread: In Chicago, consular representatives of the People's Republic of China are now forbidden to travel in their consular cars outside the environs of Cool County. Public transportation, yes; private cars, no.

Tug gently on that stray fact. Why can't these Chinese diplomats travel in their own vehicles to catch whatever is playing in Peoria? What are we afraid they may see?

Nothing. It's part of a proper tit-for-tat policy, begun last Oct. 24, reciprocating for a seemingly weird policy of the Chinese Government. For some reason, American diplomats in Shenyang, a large city between Beijing and the border of North Korea, are forbidden to drive unaccompanied to see what's happening along the border.

Tug again. What might our officials in China want to eyeball, and perhaps photograph or ask questions about, along that road that has the Chinese so sensitive? We know from our satellites that no top-secret military or research installation is hidden there.

The road we cannot travel unaccompanied runs from Beijing alongside the railroad line to Dandong, on the Yalu River. That is where the train crosses into North Korea, delivering missile-length boxes first fo Sinuiju and later to the port of Nampo.

Keep tugging. These are the ports from which North Korea exports missiles and missile-support electronics to Iran, Libya and Syria. Some American officials, whose suspicions are pooh-poohed in our State Department, believe that these IRBM's are built in China, sent by rail to North Korea and transshipped to the Middle East terrorist nations.

A company of great interest to international missile-watchers is Poly-technology, which is affiliated with Citic, the Chinese trading-banking-industrial development combine. Polytech is said to be staffed by the sons and daughters of China's leading political families, whose prestigious rice bowls will be hard to break.

The P.R.C. officially denies selling Silkworm missiles to Iran, or any missiles to Libya, Iraq or Syria that might be used to deliver locally produced poison-gas warheads. The Chinese do not deny—indeed, proudly assert—a deal made last year to supply Saudi Arabia with its CSS-2 East Wind missiles, with a range up to 2,000 miles.

That Chinese-Saudi missile deal stunned Washington, which mistakenly thought that neither Beijing nor Riyadh would alter the balance of power in the Middle East without at least checking with the U.S.

Frank Carlucci, then Secretary of Defense, was dispatched to the Chinese capital last September to seek assurances that no missilery would be sold to the Terrorist Club.

Now here is where at least some of the suit falls apart, Secretary Carlucci, operating without Presidential supervision or senatorial oversight, may have thought he had assurances from the Chinese to stop the dangerous spread of missiles, in return for secret promises to more U.S. technical aid. He passed the word around pre-election Washington: Not to worry.

But the Chinese are proud to compete with superpowers on rocketry, and are the subtlest negotiators. They may be keeping their word, if such was given, not to export missiles to the Middle East—but that would not include weaponry to North Korea, which may be falsely promising not to transship from Nampo. Equally important, the Chinese leadership may believe it is free to sell the equipment and knowhow to any nation seeking to make missile systems on its own soil.

The embarrassing question President Bush will hate to ask, when he visits China this weekend, is this: Is a Chinese company on the verge of a deal to supply Colonel Qadhafi, or anyone, with the technical package needed not only to produce but to launch and guide missiles?

Mr. Bush should not put his personal inclination to be a polite visitor above America's national interest. He can hope, with delicacy but with firmness, that Chinese missile support systems—using such hot stuff as cable digital communications, pulse width modulation or microcomputer technology—are not for sale to dictators endangering world peace.

Deng Xiaoping will catch his drift: without a credible and reportable agreement to restrict missile delivery systems, China can expect no further U.S. technological cooperation.

With that understood, the two leaders can clink glasses, reminisce, pose in front of the Great Wall and otherwise pre-empt the visit of Mr. Gorbachev.

U.S. PRODS IAEA ABOUT SAFEGUARDS FOR NORTH KOREAN NUCLEAR PLANTS

(By Ann MacLachlan)

The U.S. complained to the February meeting of the IAEA Board of Governors about North Korea's delay in submitting its nuclear facilities to agency safeguards. The Peoples Democratic Republic of Korea (PDRK) signed and ratified the Nuclear Nonproliferation Treaty (NPT) several years ago in anticipation of a nuclear plant deal with the USSR (Nucleonics Week, 2 Jan. '86, 7) However since that action, the Asian nation has neither consummated the purchase of Soviet PWRs nor concluded the required safeguards agreements with the IAEA.

The U.S. and even more so the Republic of Korea which is still technically at war with the PDRK, are doubly concerned because satellite photographs have shown that North Korea is operating a magnox reactor. North Korea, which does not maintain diplomatic relations with the U.S., is also believed to be building a reprocessing plant near the magnox reactor.

A senior IAEA official said that following the U.S. complaint, the North Koreans were "reminded" of their obligation under the NPT to conclude a general safeguards agreement and facility attachments covering any nuclear installations containing material that comes under * * * safeguards. The U.S., said a well-informed source, has said it will

take its real complaint about the two clandestine facilities formally to the IAEA board, satellite photos included, if the North Koreans continue to foot-drag in concluding the safeguard agreement.

The satellite photos show, the source said, that Pyongyang has set up a virtual replica of the 60-MW Calder Hall magnox reactor, Britain's first, which started up in 1956. The North Koreans, he said, appear to have built a reactor themselves based on the declassified design of Calder Hall. They also may have purified indigenously the graphite used as moderator block, but the uranium is assumed to be imported, the source said. The reactor started operating a year and a half ago, he said.

The reprocessing plant is observed to be under construction across a river in central North Korea.

Not surprisingly, the facilities have caused consternation across the border in South Korea, which tried to buy a reprocessing plant 10 years ago from France but was stymied by stiffening of French nonproliferation policy.

The Calder Hall reactor is still operating at British Nuclear Fuel's Windscale works, producing electricity and materials for the U.K. nuclear defense program.●

STEEL USERS FOR VRA's

● Mr. ROCKEFELLER. Mr. President, there has been a lot of discussion in the press and elsewhere lately about the steel Voluntary Restraint Agreement Program. Extension of the program has been opposed by some steel consumers. Their complaints about the program have gotten considerable attention. What's not been reported is the growing numbers of steel users who support the VRA's. They realize a strong, healthy, competitive steel industry is good for steel users, the steel industry and for America.

To cite one major example, recently the board of directors of the Shipbuilders Council of America unanimously adopted a resolution to support the extension of VRA's for steel. I ask that a copy of the resolution be printed in the RECORD as well as a list of members of the council.

The Shipbuilders Council of America is the national trade association representing 94 percent of America's shipbuilders and ship repairers as well as manufacturers of marine equipment. These segments of the maritime industry are significant users of steel plate and structurals. As almost all of this steel is produced domestically, a healthy American steel industry is important to our shipbuiliding and ship repair businesses.

Under the steel VRA Program, the American steel industry has made excellent progress toward its goal of retaining its competitiveness. Costs have been lowered sharply, labor productivity has been increased dramatically and production quality has been improved greatly. Despite this progress, much more remains to be done. Substantial new investment and modernization, on a sustained basis—approximately $2 to $3 billion per year—is needed if the steel industry is to maintain its competitiveness with leading foreign producers. After sustaining losses in excess of $12 billion between 1982 and 1986, the industry's financial gains of the past 18 months are not adequate to complete its comeback. In a world in which steel trade is dominated by foreign government intervention, failure to extend the VRA mechanism of dealing with unfairly traded steel imports will abort the industry's restructuring.

The Shipbuilder's Council is only the latest in an expanding list of steel-using manufacturers who support an extension of the VRA Program. Lee Iacocca, in a letter to U.S. Trade Representative Carla Hills urging that the VRA's be extended, praised the "American steel industry for its efforts to revive a devastated industry, one without which we (the Chrysler Corporation) would have great difficulty surviving ourselves". Maytag Corp., another large steel consumer, has stated that "the VRA Program has had minimal impact on prices and has not resulted in difficulties in obtaining steel * * *" Over 375 companies that are steel users echo those sentiments. These companies constitute a significant majority of American steel users.

These steel consumers have formed a coalition called Coalition for a Competitive America/Steel Users for VRA's. I had the pleasure of introducing the leaders of this group last week at a press conference here in the Capitol. With me were representatives of Chrysler, Milton Can Co., Valmont Industries, Crown Cork and Seal, Thompson Steel, Corey Steel, Jernberg Corp., and UNR-Leavitt.

The list of members illustrates the breadth and depth of this coalition. Companies all over the country have joined. In the discussion of the future of U.S. steel trade policy, it is important to remember that the needs of all steel consumers must be considered.

The material follows:

SHIPBUILDERS COUNCIL OF AMERICA
RESOLUTION

Whereas, the steel industry of the United States has been victimized by unfair international competition;

Whereas, that competition was driven by foreign government subsidy practices that distorted the international market;

Whereas, the United States Government, in order to combat those practices, established a Voluntary Restraint Arrangements on steel imports, allowing the steel industry to modernize its plant, retrain its work force and institute new management systems;

Whereas, the process of modernization has allowed the steel industry to improve its competitive position in the world market;

Whereas, the existence of state-supported aid has *not* been eradicated and the process of modernization has *not* been completed; Therefore, be it

Resolved, That the Shipbuilding Council of America supports the extension of the steel industry's Voluntary Restraint Arrangements unless, and until, international aid and support programs are terminated allowing for the unfettered functioning of a free and open international steel market.

FACILITATING ALUMNI INVOLVEMENT IN SCHOOLS

● Mr. SIMON. Mr. President, recently, I read an article by Marciene S. Mattleman in Education Week, about getting alumni of elementary and secondary schools involved in those schools.

We work on alumni in higher education, but we have not done the same in elementary and secondary education.

It is an unusual concept that ought to be spread. Miss Mattleman is a senior professor of education at Temple University and executive director of Philadelphia Futures.

I urge my colleagues in the Congress to read the article, which appreared in Education Week.

I ask that the article be printed in the RECORD.

The article follows:

[From Education Week, Mar. 1, 1989]

FACILITATING ALUMNI INVOLVEMENT IN SCHOOLS

(By Marciene S. Mattleman)

Major reports in this decade have made it eminently clear that the current generation of young people in this country differs substantially from previous generations. A much greater proportion of today's young face serious socioeconomic barriers that may hamper their successful completion of school.

Overcoming these barriers has rightfully been seen as a task not simply for educators but for the entire community. And in that spirit, philanthropic groups and individuals, such as the New York City industrialist Eugene M. Lang, have created incentive programs that help some of these so-called "at risk" young achieve their dreams of meaningful work and a good education.

In Philadelphia, a new program along these lines hopes to broaden the base of public involvement while increasing the number of students helped. It is called "Philadelphia Futures," and it seeks to tap a source of support that has long been a staple of the higher-education community school pride and nostalgia.

The central strategy of Philadelphia Futures, which operates as an independent, nonprofit clearinghouse, is to assist alumni of the city's schools—public and parochial—in providing support for students currently attending their alma maters. It also enlists the aid of other segments of the community, including corporate, religious, cultural, and governmental groups.

Other programs aimed at motivating students to stay in school, such as Mr. Lang's "I Have a Dream" Foundation, now operating in 24 cities, yield great and praiseworthy benefits for the students they serve. But, as critics have noted, the generous spirit behind them often operates like a lottery, dispensing good fortune unequally among classes within a selected school or even among siblings.

Philadelphia's program recognizes that, to reach the vast majority of those in need, intervention must be broader. It must go beyond the mere provision of fiscal resources, finding creative ways to channel the energies and concerns of average citizens.

Philadelphia Futures is working to open up more options for the city's young by, first, connecting them to resources already available and then, creating new sources of support from people who may never before have been asked to lend a helping hand: the schools' alumni.

Though higher education has traditionally depended on alumni involvement, such support has not been widely sought below the college level. The psychological basis for this kind of appeal is the premise—corroborated by sociologists—that as our society becomes more mobile, we seek our roots; we grow more nostalgic. Programs like Philadelphia Futures can turn that nostalgia into positive action.

The project's method is information and referral. Using media outreach and promotion, it facilitates access for those who wish to volunteer as tutors, mentors, or role models, or who want to create incentives such as prizes and scholarships encouraging students to remain in school. Through a control telephone number, the program links those willing to intervene with those in need.

An advisory group of state and local leaders—including Mayor W. Wilson Goode, Pennsylvania's secretary of education, Thomas Gilhood, and the superintendents of Philadelphia's public and parochial schools—has provided the visability needed to raise funding for start-up operations.

Since the project was officially launched in January, several promising initiatives have taken shape. They suggest the range of support activities such programs can provide:

Twenty mentors and tutors have been placed with schools and community-based organizations. These volunteers range from a newspaper reporter to a corporate lawyer. The program also is providing role models through career days in schools.

In each of these activities, Philadelphia Futures is fulfilling its role as a broker in servicing existing programs.

Ten alumni have pledged to provide financial aid for college to individual students from their high schools. Two committees have been formed to work with donors on such matters as the criteria for and selection of recipients.

Fifteen other graduates have established small prizes in their favorite subjects and grade levels. These awards—which may take the form of cash, subscriptions to magazines, or cultural-center memberships—are a way of recognizing current students for outstanding achievement or effort.

In response to queries about the cost of such involvement, the staff suggests that $250 in the bank will assure a $25 prize for a number of years.

A scholarship directory developed by the program was published by the *Philadelphia Daily News* in February. Two local businesses have paid for 40,000 copies—to be distributed to high-school juniors and seniors throughout the city, as well as to community-based organizations and churches.

The purpose of this project is not only to encourage other donors, but to ensure that existing scholarships are used. Millions of dollars in private college-aid money are overlooked nationally each year.

Another newspaper publication, a comprehensive directory of local incentive programs, is in preparation. No such compilation currently exists.

The guide will include listings of summer activities, stipends, contests, and other programs that have become part of the public agenda of corporations, libraries, civic organizations, and private schools. This effort is intended both to improve accessibility to these opportunities and promote them as exemplars.

Several area colleges have developed plans for further involvement with high schools. One university is organizing a summer computer camp; others are planning orientation programs to entice students into the sciences.

Through such programs, colleges can raise the expectations of disadvantaged students while introducing them to their own institutions in the hope of later recruitment.

A weekly hotline for college financial-aid information will soon be giving parents and other citizens a chance to talk informally with a college-admissions financial counselor. A local bank—PSFS—has funded the service, and college-based personnel are being asked to volunteer on a rotating basis.

And a group of college-admissions officers, along with recently graduated Philadelphia high-school alumni, will soon begin visiting local schools. Informal panel discussions will be aimed at creating among students a sense of expectation and greater motivation to further their schooling.

None of these initiatives is easily achieved; each takes networking, meetings, agreements, and flexibility. Each also requires staffing—and for a low-budget enterprise, that means office volunteers are needed.

But the alternative is to throw up our hands and label the problems of today's young people "someone else's business."●

NATIONAL DIGESTIVE DISEASE AWARENESS MONTH

Mr. DIXON. Mr. President, I ask unanimous consent that the Judiciary Committee be discharged from further consideration of House Joint Resolution 170, a joint resolution to designate May 1989 as "National Digestive Disease Awareness Month," and that the Senate proceed to its immediate consideration.

The PRESIDING OFFICER. The joint resolution will be stated by title.

The legislative clerk read as follows:

A joint resolution (H.J Res. 170) designating May 1989 as "National Digestive Disease Awareness Month."

The PRESIDING OFFICER. Is there objection to the present consideration of the joint resolution?

There being no objection, the Senate proceeded to consider the joint resolution.

The joint resolution was ordered to a third reading, was read the third time, and passed.

The preamble was agreed to.

Mr. DIXON. Mr. President, I move to reconsider the vote by which the joint resolution was passed.

Mr. LUGAR. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

MEASURE PLACED ON CALENDAR—SENATE JOINT RESOLUTION 135

Mr. DIXON. Mr. President, on behalf of Senators PELL, KASSEBAUM, and GORE, I ask unanimous consent that Senate Joint Resolution 135, a joint resolution to establish a National Commission on Human Resources Development, introduced earlier today, be placed on the calendar.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR STAR PRINT—SENATE RESOLUTION 119

Mr. LUGAR. Mr. President, I ask unanimous consent that Senate Resolution 119 be star printed to reflect the following changes, which I send to the desk on behalf of Senator WILSON.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDERS FOR WEDNESDAY

ORDER OF PROCEDURE

Mr. DIXON. Mr. President, I ask unanimous consent that the majority leader, after consultation with the minority leader, may at any time turn to the consideration of either the conference report on the budget, House Congressional Resolution 106, or the supplemental appropriations bill expected to arrive from the House later this week.

The PRESIDING OFFICER. Without objection it is so ordered.

ORDER FOR RECESS

MORNING BUSINESS

Mr. DIXON. Mr. President, I ask unanimous consent that when the Senate completes its business today, it stand in recess until 1 p.m., Wednesday, May 17, and that following the time for the two leaders, there be a period for morning business not to extend beyond 2 p.m., with Senators permitted to speak therein for up to 5 minutes each.

The PRESIDING OFFICER. Without objection it is so ordered.

PROGRAM

Mr. DIXON. Mr. President, for the information of Senators, on tomorrow, the Senate will turn to the conference report on the minimum wage bill, H.R. 2, at 2 p.m. under a time limitation of 2½ hours. Under the unanimous-consent agreement, a vote on the conference report will occur not later than 4:30 p.m. tomorrow.

RECESS UNTIL 1 P.M. TOMORROW

Mr. DIXON. Mr. President, if the distinguished acting Republican leader has no further business and if no Senator is seeking recognition, I now ask unanimous consent that the Senate stand in recess under the previous order until 1 p.m., Wednesday, May 17, 1989.

Mr. LUGAR. We have no further business.

There being no objection, the Senate, at 7:39 p.m., recessed until Wednesday, May 17, 1989, at 1 p.m.

NOMINATION

Executive nomination received by the Secretary of the Senate after the recess of the Senate on May 12, 1989, under authority of the order of the Senate of January 3, 1989:

NATIONAL LABOR RELATIONS BOARD

JERRY M. HUNTER, OF MISSOURI, TO BE GENERAL COUNSEL OF THE NATIONAL LABOR RELATIONS BOARD FOR A TERM OF 4 YEARS, VICE ROSEMARY M. COLLYER, TERM EXPIRED.

NOMINATIONS

Executive nominations received by the Senate May 16, 1989:

DEPARTMENT OF JUSTICE

JAMES FRANKLIN RILL, OF MARYLAND, TO BE AN ASSISTANT ATTORNEY GENERAL, VICE CHARLES F. RULE, RESIGNED.

E. BART DANIEL, OF SOUTH CAROLINA, TO BE UNITED STATES ATTORNEY FOR THE DISTRICT OF SOUTH CAROLINA FOR THE TERM OF 4 YEARS, VICE VINTON DEVANE LIDE, RESIGNED.

DEPARTMENT OF LABOR

ROBERT P. DAVIS, OF VIRGINIA, TO BE SOLICITOR FOR THE DEPARTMENT OF LABOR, VICE GEORGE R. SALEM, RESIGNED.

DEPARTMENT OF EDUCATION

NELL CARNEY, OF VIRGINIA, TO BE COMMISSIONER OF THE REHABILITATION SERVICES ADMINISTRATION, VICE SUSAN S. SUTER, RESIGNED.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

JOHN C. WEICHER, OF THE DISTRICT OF COLUMBIA, TO BE AN ASSISTANT SECRETARY OF HOUSING AND URBAN DEVELOPMENT, VICE KENNETH J. BEIRNE, RESIGNED.

DEPARTMENT OF COMMERCE

JOHN MICHAEL FARREN, OF CONNECTICUT, TO BE UNDER SECRETARY OF COMMERCE FOR INTERNATIONAL TRADE, VICE W. ALLEN MOORE, RESIGNED.

IN THE AIR FORCE

THE FOLLOWING CADET, U.S. AIR FORCE ACADEMY, FOR APPOINTMENT AS A SECOND LIEUTENANT IN THE REGULAR AIR FORCE, UNDER THE PROVISIONS OF SECTIONS 9353(B) AND 531, TITLE 10, UNITED STATES CODE, WITH DATE OF RANK TO BE DETERMINED BY THE SECRETARY OF THE AIR FORCE.

ROBERT J. FRINK, xxx-xx-xxxx

THE FOLLOWING-NAMED OFFICERS FOR PERMANENT PROMOTION IN THE U.S. AIR FORCE, UNDER THE PROVISIONS OF SECTION 628, TITLE 10, UNITED STATES CODE, AS AMENDED, WITH DATES OF RANK TO BE DETERMINED BY THE SECRETARY OF THE AIR FORCE.

CHAPLAIN

To be major

GREG W. CARLSON, xxx-xx-xxxx
ROBERT E. CRUTHIRDS, xxx-xx-xxxx
RICHARD G. ELLIOTT, JR., xxx-xx-xxxx
STEPHEN L. FRICK, xxx-xx-xxxx
CHARLES R. ROWLAND III, xxx-xx-xxxx
JOHN S. SANDERS, xxx-xx-xxxx

THE FOLLOWING OFFICER FOR APPOINTMENT IN THE REGULAR AIR FORCE UNDER THE PROVISIONS OF SECTION 531, TITLE 10, UNITED STATES CODE, WITH A VIEW TO DESIGNATION UNDER THE PROVISIONS OF SECTION 8067, TITLE 10, UNITED STATES CODE, TO PERFORM THE DUTIES INDICATED, PROVIDED THAT IN NO CASE SHALL THE FOLLOWING OFFICER BE APPOINTED IN A GRADE HIGHER THAN MAJOR.

CHAPLAIN

ROBERT E. CRUTHIRDS, xxx-xx-xxxx

IN THE MARINE CORPS

THE FOLLOWING NAMED OFFICERS OF THE MARINE CORPS FOR PERMANENT APPOINTMENT TO THE GRADE OF MAJOR UNDER TITLE 10, UNITED STATES CODE, SECTION 624:

HOUSE OF REPRESENTATIVES—*Tuesday, May 16, 1989*

The House met at 12 noon.

The Chaplain, Rev. James David Ford, D.D., offered the following prayer:

Deliver us, O God, from any fear or distress that would keep us from being the people You would have us be. Your word has promised that perfect love casts out all fear and that we can be secure in the hope that Your blessings abound in us and about us all our days. Free us, O gracious God, from all that would keep us from using our energies and talents in service to the people who need help and support, and guard us always from that which keeps us from being Your voices for justice and peace and liberty in all areas of life. In Your name, we pray. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

PLEDGE OF ALLEGIANCE

The SPEAKER. Will the gentleman from Illinois [Mr. EVANS] kindly come forward and lead us in the Pledge of Allegiance?

Mr. EVANS led the Pledge of Allegiance as follows:

I pledge allegiance to the Flag of the United States of America, and to the Republic for which its stands, one nation under God, indivisible, with liberty and justice for all.

MAKING IN ORDER ON WEDNESDAY, MAY 17, 1989, OR ANY DAY THEREAFTER, CONSIDERATION OF CONFERENCE REPORT ON HOUSE CONCURRENT RESOLUTION 106, CONCURRENT RESOLUTION ON THE BUDGET—FISCAL YEAR 1990

Mr. PANETTA. Mr. Speaker, I ask unanimous consent that it may be in order on Wednesday, May 17, 1989, or any day thereafter, to consider the conference report on the concurrent resolution (H. Con. Res. 106) setting forth the congressional budget for the U.S. Government for the fiscal years 1990, 1991, and 1992, that all points of order against the conference report and against its consideration for failure to comply with the provisions of clauses 2, 3, and 4 of rule XXVIII be waived, that the conference report be considered as having been read when called up for consideration, and that debate on the conference report be limited to 90 minutes.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

NEW HOPE FOR AGENT ORANGE VICTIMS

(Mr. EVANS asked and was given permission to address the House for 1 minute.)

Mr. EVANS. Mr. Speaker, last week Secretary Derwinski took a big step in ensuring that the Veterans' Administration would be a kinder and gentler bureaucracy. I salute him for deciding not to appeal the district court ruling that the Veterans' Administration imposed too strict a standard in agent orange claims.

This decision is a positive one because in the past, under Democratic and Republican administrations, the Federal Government has been unresponsive in helping veterans and their families. The victims of agent orange have suffered enough.

I hope the Secretary will quickly propose responsible new regulations and quickly reconsider the 31,000 claims involved in the case.

Mr. Speaker, I also want to salute the Vietnam Veterans of America for bringing the suit in the first place, although I find it regrettable that they had to go to the Federal courts to get the Veterans' Administration to live up to the law of the land.

ADDRESSING THE PROBLEM OF INADEQUATE RURAL HEALTH CARE

(Mr. CLINGER asked and was given permission to address the House for 1 minute, and to revise and extend his remarks.)

Mr. CLINGER. Mr. Speaker, American's rural health care system is on a crash course, and unless we begin to address some of the problems associated with rural health care, many of our rural citizens may soon be denied proper medical care.

The general problem of rural health care stems largely from the way Medicare disburses through rural hospitals. Due to the urban/rural differential, Medicare pays rural hospitals on the average nearly 40 percent less than their urban counterparts. As a result, 87 rural hospitals have closed in the past 2 years. The effect of these closures on the community is very far reaching.

I believe rural hospitals are facing these problems for two reasons. First, the population of rural areas is generally older than the national average, so more people are eligible for Medicare and are more likely to need it. Second, rural patients are often poorer than the average and tend to be underinsured and to seek treatment later, making it very likely that the hospital will exceed the preset reimbursement limit.

To solve this problem, Mr. Speaker, over 100 Members of Congress from all ends of the ideological spectrum have joined together to form the Rural Health Care Coalition, an organization dedicated to identifying and solving problems associated with rural health care.

Mr. Speaker, I urge my colleagues to seriously consider the proposals presented by the Congress.

SUPPORT URGED FOR LEGISLATION TO IMPROVE HEALTH CARE FOR RURAL AMERICANS UNDER MEDICARE

(Mr. JONTZ asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. JONTZ. Mr. Speaker, I rise today to urge the House to address the challenges facing our rural health care system.

In particular, I would like to urge my colleagues to support H.R. 1110, or comparable legislation to end the urban/rural distinction in Medicare reimbursement.

Currently, the average rural hospital receives 20 percent less than an urban hospital in Medicare reimbursement. In Indiana, the urban/rural differential can be anywhere between 8 and 42 percent. Rural hospitals have reasons to be concerned: In 1987, 41 of Indiana's 50 rural hospitals lost money on patient care.

A recent survey in Indiana projected that six of our State's rural hospitals will close in the next 5 years and the George Ade Memorial Hospital in Newton County, which I represent, became the first casualty since the survey was published when it closed its doors as a hospital in March of this year.

Basing hospital payments on arbitrary geographic classification is unfair, and threatens access to health care for many rural Americans. H.R.

1110 will not solve all of the problems of our rural hospitals, but it will change Medicare reimbursements to reflect that the health care needs of rural Americans are no less important than those of urban Americans.

PROPOSED CHANGES IN URBAN/RURAL DIFFERENTIAL FOR MEDICARE PAYMENTS

(Mr. COMBEST asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. COMBEST. Mr. Speaker, I take this opportunity to discuss a problem facing not only the 19th District of Texas but one that confronts those living in rural areas across our Nation. The problem of accessible and adequate health care.

No longer do we live in the days of the Marcus Welby style family doctor. Today rural Americans can be forced to drive an hour or more to receive hospital care. This drastic change in our fundamental health care system must be addressed.

The disappearance of rural hospitals and doctors are reaching deadly levels. My home State of Texas has led the Nation for the third consecutive year in hospital closures with 19 last year. Currently 49 counties in Texas have no hospitals and 14 counties are without doctors. These problems threaten the lives of rural Americans daily.

The issues facing rural health care are complex and multifaceted but my colleagues on the rural health care coalition have offered answers to many of these questions.

One answer is to reimburse rural hospitals at the same rate as their urban counterparts, which is not the case today. Urban hospitals are paid 30 to 40 percent more for Medicaid and Medicare reimbursement than rural hospitals.

Another answer is to guarantee tax credits for those physicians and nurses who are willing to serve understaffed hospitals around the Nation's rural areas.

I have touched only on a few important issues today facing rural Americans, but I ask for your support in passing legislation to address the challenges confronting the rural health care industry.

□ 1210

"RIGHT ON," PRESIDENT BUSH

(Mr. TRAFICANT asked and was given permission to address the House for 1 minute.)

Mr. TRAFICANT. Mr. Speaker, I rise today to commend President Bush for the steps he has taken to end the arms race. I do not mean Geneva; I mean the arms race in the streets of America. His decision to ban the import of semiautomatic weapons is a welcome sight, and a needed decision for America. Thank God President Bush has the courage.

The second amendment of the Constitution guarantees the American citizens the right to bear arms, but not the right to tote cannons, and President Bush has made the tough decision, and he needs the help of everybody in this country.

Mr. Speaker, I am also supporting the President, and I will be reintroducing my bill which calls for the death penalty for drug smugglers of huge amounts of heroin and cocaine, which this country does not produce. Drugs that kill our children and poison our freedoms.

I say, "Right on, President Bush. Keep it up."

ONCE AGAIN PRESIDENT BUSH SEIZES THE INITIATIVE

(Mr. DREIER of California asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DREIER of California. Mr. Speaker, there has been a great deal of talk over the years about dealing with the issue of criminal code reform and the rampant crime problems to which the gentleman from Ohio [Mr. TRAFICANT], my colleague, has just referred. I have to say that under this President we have seen him step up to bat and deal with the Third World debt crisis, we have seen him deal with the savings and loan crisis, and we have seen him deal with the budget deficit crisis. Yesterday we saw him boldly take on the initiative of trying to turn the corner on this terrible crime rate we have.

Mr. Speaker, while everyone might not be supportive of every single provision in this bill, I, too, would like to congratulate President Bush for once again seizing the initiative.

THE FAMILY CHOICES IN CHILD CARE ACT OF 1989

(Mr. HAYES of Louisiana asked and was given permission to address the House for 1 minute.)

Mr. HAYES of Louisiana. Mr. Speaker, today I join the gentleman from Missouri [Mr. BUECHNER], my good friend and colleague, in introducing a bill that will help ease the financial burden that child care places on the concerned working mother and father. Our legislation addresses both the financial and emotional factors that have been the center of this issue. We believe that in order to adequately address the needs of the American family that we must have a proposal that has at least two basic criteria.

First, Mr. Speaker, it must help those most in need of tax assistance, the low- and middle-income parents; second, it must insure the continued right of parents to choose the services that are best for their own child, whether the services are provided by a grandmother, neighbor, child care center with a religious affiliation or not, or by a parent who wishes to stay home and care for their child. Our bill meets those criteria and creates additional options such as a clearinghouse for information on child care services and tax incentives for the employer who wishes to provide the working family man or woman with in-house child care services.

It is time for Congress to recognize this need, and act responsibly, and, as the gentleman from Missouri [Mr. BUECHNER] is so fond of saying, "Lache pas la patate."

A STEP IN THE RIGHT DIRECTION

(Mr. COUGHLIN asked and was given permission to address the House for 1 minute.)

Mr. COUGHLIN. Mr. Speaker, as vice chairman of the Select Committee on Narcotics Abuse and Control I want to congratulate the President on the anticrime package which he proposed yesterday. In the words of the President, he proposed new laws to punish criminals, new agents to arrest them, new prosecutors to prosecute them, and new prisons to hold them.

Mr. Speaker, this program is a step in the right direction, and it complements legislation that was introduced today by the chairman of the Select Committee on Narcotics Abuse and Control, the gentleman from New York [Mr. RANGEL] and myself to provide for alternative incarceration of drug abusers and nonviolent criminals, which I also commend to this House.

RURAL HEALTH CARE

(Mr. LANCASTER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LANCASTER. Mr. Speaker, I rise today to call attention to the need for increased awareness of the problems that rural Americans face every day in seeking adequate health care. Health expenditures represent the third largest category in the Federal budget, yet the problems that rural Americans encounter in obtaining affordable, quality health care appears to be growing. The House Rural Health Care Coalition has introduced a package of bills that will help insure that the Nation's rural residents obtain improved health care.

Our coalition package contains legislation, H.R. 1583, that will eliminate the differential in Medicare reimbursement. I have heard again and again from my rural hospital administrators about the unfairness of the dif-

ferential. Since several of my district's rural hospitals border counties that are paid at the urban rate, this inequity must be entirely abolished. All hosptials in my district must compete in hiring doctors, nurses, and other medical personnel with those that are reimbursed at a higher rate. In addition, the expenses and medical needs of rural and urban patients are comparable. This means that my constituents who provide and receive Medicare-reimbursed services are not being dealt with in an even-handed manner. The hospitals in my congressional district are in dire need. If they are to remain open as viable, financially sound health care facilities, legislation must be enacted to eliminate this differential.

The coalition's package also includes the Rural Emergency Medical Services Improvement Acts, H.R. 1586 and 1587, which would establish a $45-million block grant program to States for recruiting, training, and keeping rescue squad workers and other emergency medial service personnel and for financing the purchase, upgrading, and maintainance of emergency medical equipment.

Other important bills in the package include the following: House Concurrent Resolution 83, a sense-of-Congress resolution that states the need to reconcile the current disparity between rural and urban physician fees under the Medicare Program; H.R. 1588, to restore the tax deduction for education loan interest for physicians, nurses, and allied health professionals; H.R. 1585, a bill to reduce and remove the administrative barriers to establishing clinics, disseminate information about them, and increase prenatal care and mental health services through the clinics; H.R. 1584 to help States develop programs to streamline the eligibility for Federal maternal-child health programs; and H.R. 1589 which will establish an Office of Rural Health Care.

Mr. Speaker, I urge all Members of this body to carefully examine these bills. Each will make for a stronger, healthier rural America. We have a responsibility to the good people of rural America to make certain that they are provided the means for a longer, healthier life that is within their financial reach.

THE RURAL HEALTH CARE CRISIS

(Mrs. SMITH of Nebraska asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. SMITH of Nebraska. Mr. Speaker, the rural health care crisis is all too real and threatening in Nebraska.

As such, I join my colleagues from the Rural Health Care Coalition in urging the House to ensure that access to quality, affordable, and community-based health care is a reality for rural as well as urban Americans.

This is not a small special interest Congress can afford to ignore. The rural health care crisis impacts more than one-fourth of the U.S. population. It effects those people supplying this Nation with the world's most abundant, safest, and cheapest food supply.

Many rural health problems are a result of discriminatory Medicare policies. The devastating result is the loss of rural hospitals, the foundation of the rural health care delivery network.

While no Nebraska hospital has closed in the last year, many struggle month to month to stay open. Already in my district, nearly one-third of 62 counties are without a hospital.

When rural hospitals are lost, communities lose part of their identity, most often their major employer, their doctors, and any real hope of attracting new businesses and realizing economic recovery.

But solving the rural health crisis is not just a matter of keeping hospitals open or attracting doctors under unfair Medicare policies.

It also means overcoming geographic distances, a transportation shortage, and a shortage of not just doctors, but also nurses and the whole array of health professionals.

And it means serving a population that is proportionately older, poorer, sicker, less likely to be insured, and engaged in the most dangerous occupations.

The coalition's 1989 agenda addresses these problems and is deserving of the attention of the House. It seeks to correct Medicare inequities for rural hospitals and physicians, to attract medical professionals to rural communities, promote prenatal care, and improve rural emergency services.

Solving the rural health care crisis and ensuring universal access to health care for all America must be a priority of this Congress.

JAPAN—THE LEADER OF UNFAIR TRADE PRACTICES AGAINST THE UNITED STATES

(Mr. BRENNAN asked and was given permission to address the House for 1 minute.)

Mr. BRENNAN. Mr. Speaker, I rise today in strong support of a resolution disapproving the sale of the FSX fighter technology to Japan. Over the past couple of weeks the Committee on Armed Services' Investigations Subcommittee has heard testimony on this sale. At those hearings I questioned DOD and Commerce Department witnesses about the merits of such a sale. Unfortunately their responses were not reassuring that the United States would gain any advantage from this sale.

During town meetings I hold across my State strong reservations have been expressed by citizens of Maine in regard to this sale.

Mr. Speaker, our aerospace industry remains No. 1 in the world, and in the long run I fear that this sale could jeopardize that status. Recent trade figures indicate Japan continues to be a leader in unfair trade practices against the United States, and I wonder how this sale will correct it.

We must evaluate our trade relationship with Japan by protecting our national and economic security interests. I do not believe the sale of this fighter technology meets that test. Therefore I urge my colleagues to join me in a joint resolution to disapprove the sale.

THE FAMILY CHOICES IN CHILD CARE ACT OF 1989

(Mr. BUECHNER asked and was given permission to address the House for 1 minute.)

Mr. BUECHNER. Mr. Speaker, I once again rise to ask the question: Should the Federal Government be in the business of telling parents the type of child care they must choose for their children? The answer remains an emphatic no.

Our families don't want government intrusion into what is truly a family matter. The last thing parents need is for the Federal Government to tell them the type of child care they must choose.

If Congress really wants to assist families with child care, it should implement a pro-family Federal policy that will: First, provide equal treatment for all types of child care; second, maximize child care options for parents; third, not discriminate against families in which one parent remains at home; and fourth, encourage private employers to provide child care benefit programs to assist parents while they are working.

Today, my friend and colleague Congressman HAYES of Louisiana and I, are introducing the Family Choices in Child Care Act of 1989 which implements a pro-family Federal policy with all of the elements I just mentioned. However, the keystone of this bill is that is provides tax relief for low- and middle-income families with children under age 6 with 100-percent freedom to choose the type of care they want for their children including mother care, in-family care, and church based care.

Mr. Speaker, it's time to stop overtaxing the American family and time for Congress to focus its efforts and respond to the child care needs of American families. We call upon my colleagues to join us in sponsoring this legislation to ensure our commitment

to the continued growth and security of the American family.

INFANT MORTALITY IN RURAL AMERICA

(Mr. ROWLAND of Georgia asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ROWLAND of Georgia. Mr. Speaker, there is a greater perception of the health care needs of our rural citizens today than in the past, so it is with a great deal of optimism that I join with my colleagues today to support efforts in Congress to help meet these needs in rural America.

The high rate of infant mortality in rural America is an issue of particular concern to me. It has long been apparent that these rates are higher in rural areas than in most urban areas.

Fortunately, more attention is being focused on this problem than ever before. As a member of the Rural Health Care Coalition and the vice chairman of the National Commission to Prevent Infant Mortality, I have been working with many others in looking for solutions. For instance, we have recently introduced two legislative proposals, H.R. 1584 and H.R. 1710, which will improve and expand access to preventive health and social services for pregnant women and children. I urge my colleagues to act on this legislation to promote the health of babies and mothers in rural America, as well as the country as a whole.

□ 1220

THE FLUID URGENT SUPPLEMENTAL

(Mr. MICHEL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MICHEL. Mr. Speaker, the situation with respect to the upcoming supplemental is rather fluid, I guess, to say the least. The Rules Committee is meeting this afternoon to craft a rule for consideration of the supplemental.

I might remind our colleagues that 10 days or so ago when we had it considered here on the floor there was an attempt to load it up with everything other than what ought to be in an urgent supplemental. The House rose up in righteous indignation, Members on both sides of the aisle, and caused the leadership to pull it.

My feeling is now that there is only one item that is really significant that is an urgent supplemental item, and that has to do with veterans' hospitals medical care, maybe a few little minor ones; but if there is another attempt on the part of the majority or Members to pile on this urgent supplemental, while the President has not formally committed himself, I get the distinct impression in my conversations with the President that he would be inclined to veto it.

Now, if the rule is crafted in such a way that the minority cannot have its full rights protected and there is this feeling that discerning Democrats would like to make absolutely certain that the first appropriation bill out of the box is one devoted only to that cause, then it seems to me we would be within our rights to vote down the rule again to get the message across that all we need is a stripped down supplemental this first time around.

RURAL HEALTH CARE

(Mr. WISE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WISE. Mr. Speaker, I rise today to speak about the pressing need to improve rural health care in West Virginia and the Nation. The consequences of inadequate, inaccessible and unaffordable health care are often devastating for those who need it the most. The infant mortality rate in the United States exceeds that of 18 other countries, including Japan, Spain, Ireland, Germany and France.

Low-income pregnant women who live in rural areas all over the country suffer from a crippling lack of prenatal services. The lack of adequate prenatal care often leads to premature birth, birth defects and low birth weight. Low birth weight babies are 40 times more likely to die in their first month than normal weight babies. For very low birth averted by prenatal care, the U.S. health care system saves between $14,000 and $30,000.

We need to support the legislative agenda of the Rural Health Care Coalition, which includes increased maternal child health care funding and expanded Medicaid coverage.

The question in this case is not can we afford this, but how can we not afford it.

DEMOCRATS PLAYING GAMES WITH URGENT SUPPLEMENTAL

(Mr. GINGRICH asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GINGRICH. Mr. Speaker, I want to pick up on what the gentleman from Illinois [Mr. MICHEL] just said.

The Democrats on the Appropriations Committee are playing games with America's veterans. President Bush sent a solid supplemental request to help the veterans to keep open the hospitals to do what is necessary. For 5 weeks now the Democrats in the Appropriations Committee have been playing games with that legitimate request to help veterans.

There is a rumor on the floor today that we are going to see another effort made in the next 24 hours to again play games with America's veterans.

President Bush will veto any effort by the House Democrats to put additional materials on the legitimate urgent supplemental, and he should veto it and I would urge every Member to vote to sustain that veto.

If the House Democrats want to pass a clean, simple, signable bill to help America's veterans, they have a chance to do so in the next 24 hours. I hope that is the kind of rule and that is the kind of supplemental they will bring to the floor.

REPUBLICANS SHOULD PUT THEIR MONEY WHERE THEIR MOUTH IS

(Mr. HOYER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HOYER. Mr. Speaker, the leader and the whip of the minority party have just come and talked about the urgent dire supplemental. One of the things that was in that bill was money for the drug war, for the drug fight, putting our money where our mouth is, where our politics is, if you will.

Yesterday the President gave a speech about fighting drugs. He talked about the Bureau of Alcohol, Tax and Firearms, one of the key elements in our fight on drugs. The President's budget this year, Mr. Speaker, recommended a $14 million reduction in last year's figure. The President's request, in fact, is $25 million below a current services budget. His request, therefore, yesterday for an additional $18.8 million is somewhat hollow. It is still $7 million less than a current services budget.

Current services, Mr. Speaker, is doing that which we are doing this year. The American public believes there is a crisis. The supplemental said, "Let's spend some money."

Mr. President, we applaud you, but we need to spend the money to back up that program.

THE DIRE EMERGENCY SUPPLEMENTAL APPROPRIATIONS

(Mr. GEKAS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GEKAS. Mr. Speaker, continuing on the discourse having to do with appropriations and the supplemental, I intend to appear before the Rules Committee this afternoon and to fire the opening shot for a movement which I think has to catch fire and has to receive eventual approval by the House of Representatives and the

other body when the time comes, and that is the repeal of or modification of section 89. We all know what that implies. We all know what a harassment that contains for our business community, the loss of jobs and a whole bunch of adverse effects that can have long-range implications for our economy.

Now, I know that the difficulty will be before the Rules Committee, not only in the ironclad natural opposition of the majority to allow amendments of this type, but also of the legitimate waivers that have to be obtained for consideration of this effort on our part, but I urge the Members to adopt a positive stance for repeal or modification of section 89.

IMPROVEMENT OF MEDICAL SERVICES FOR NATION'S RURAL POPULATION

(Mr. LAUGHLIN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LAUGHLIN. Mr. Speaker, since 1980, 163 rural hospitals have closed their doors, denying even basic health care to the millions of Americans living in these areas. In the State of Texas 39 rural hospitals have closed during the past 4 years.

If we are to reverse this trend, we must eliminate the current differential between payment rates for hospitals and physicians in urban and rural areas. In addition, we must expand the rural hospital transition program to allow rural hospitals to remain viable and respond to a rapidly changing environment. As a further incentive, we must allow physicians and health care professionals serving these areas to deduct the interest from their student loans in exchange for serving medically underserved areas. And finally, we must implement a program to improve the availability and quality of rural emergency medical services on the State level.

These measures will not keep every hospital in rural America operational, but they will help ensure the continuation of medical services available to our Nation's rural population.

SUBSIDIZING SOYBEAN OIL SALE TO SOVIETS IS OUTRAGEOUS

(Mr. CONTE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. CONTE. Mr. Speaker, 2 weeks ago the President approved a taxpayer-subsidized sale of 1.5 million tons of wheat to the Soviet Union. At a subsidy of at least $10 per ton, that sale is going to cost us over $15 million.

If that is not bad enough, some people now want the President to approve the sale of 500,000 tons of subsidized soybean oil to the Soviets, at a cost of $75 million to the taxpayer.

Mr. Speaker, subsidizing the wheat sale was absurd. Subsidizing the soybean oil sale would be outrageous.

How could anyone even consider giving the Soviets a $75 million windfall, when we can barely scrape up enough to take care of our veterans? Do not let it happen, Mr. President. Do not let this slippery soybean sale slide through. Do not let the Export Enhancement Program waste any more of our money.

The mere fact that you even have to consider it shows how ridiculous the export Enhancement Program can be. The Department of Agriculture calls it "eeping" the Soviets. It's time to stop "eeping" the Soviets and start keeping the taxpayers money.

1230

RURAL REFERRAL CENTER REIMBURSEMENT

(Mr. McCURDY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. McCURDY. Mr. Speaker, I rise today to help bring to the attention of my colleagues from urban districts a matter of great importance in rural health care survival. I am referring to the issue of rural referral center reimbursement.

In what is termed a cost-cutting measure, Medicare proposes to eliminate a service that is vital to rural communities. Medicare plans to reduce the number of hospitals which qualify as rural referral centers, by changing the criteria under which they are designated.

Will this practice save a significant amount of money in the Medicare budget?

No!

Will it eliminate a service rural communities drastically need?

Yes! And it certainly impacts a district such as mine that covers over 8,000 square miles.

These centers provide lifesaving technology and services to rural communities that do not have the resources to provide them. The only alternative for these communities is to transport very ill patients many miles to urban hospitals which receive a higher rate of reimbursement than the rural referral centers.

I urge my colleagues to support legislation to extend the status for those hospitals that are now considered rural referral centers.

RURAL HEALTH CARE

(Mrs. VUCANOVICH asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. VUCANOVICH. Mr. Speaker, as a member of the Rural Health Coalition, I appreciate the opportunity to address the challenges that face rural health care in our Nation today.

As many of us know all too well, in much of rural America, rural health care centers that provide medical care are not adequately reimbursed for their services. In order to combat this inequity, I support the elimination of the urban/rural Medicare payment differential. Several of my colleagues who represent rural areas have introduced legislation that addresses this concern.

To this end, I have cosponsored Congressman PICKLE's bill, H.R. 762, the Equity for Rural Hospitals Act of 1989 as well as Congressman CRAIG's bill, H.R. 148. These bills are particularly important to my State of Nevada. Because Nevada has one of the fastest growing populations of older people, the elimination of this differential is crucial to the health care of older people and to the existence of hospitals that rely on Medicare reimbursement. Also, rural Nevada has shared in the overall prosperity of the State in its gold boom, and as rural Nevada continues to prosper, the focus of access to quality rural health care becomes more important.

It is also vital for Congress to provide incentives to increase the recruitment and retention of health professionals in rural areas.

I have consponsored Congressman VANDER JAGT's bill, H.R. 1588, which allows a tax deduction for education loan interest as an incentive for health professionals to practice in medically underserved areas.

I appreciate the efforts of Congressman TAUKE and Congressman SYNAR for their leadership in rural health issues. I urge my colleagues not only to consider the concerns that we are addressing today but also to act on these concerns by passing needed rural health care legislation.

CRITICISM OF LUJAN A DISSERVICE TO INSULAR AND INDIAN AMERICANS

(Mr. DE LUGO asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DE LUGO. Mr. Speaker, yesterday's Washington Post article on Interior Secretary Manuel Lujan did a disservice to millions of Americans in the insular areas and on Indian reservations by reporting in a critical way that Lujan visited insular areas and reservations just after taking office.

The Secretary of the Interior has more impact on the lives of these often forgotten peoples than any other Americans.

The article's criticism suggests that there was something more important that Lujan should have been doing.

There are a number of Members of Congress on both sides of the aisle and in both Houses who would disagree.

The priority need for the Secretary to pay more attention to insular affairs, which have been poorly handled by Interior in the recent past, was the first point brought up by Chairman BENNETT JOHNSTON during Lujan's confirmation hearings.

Lujan joined 12 members of the Interior and Insular Affairs Committee headed by Chairman MO UDALL on a rigorous, working trip to the Pacific. It made possible unprecedented, joint Federal executive-legislative meetings for which island leaders expressed appreciation.

The issues were important to their peoples and involve U.S. security interests and substantial budgetary expenditures.

It was, for example, the first time that an Interior Secretary had been to Palau, islands for which he is fully responsible under law. Palau is strategically important to the United States but has been racked with political violence, corruption, high rates of drug abuse, and crippling debts in part because Lujan's predecessors didn't do their job there.

The messages of the article's criticism are that issues involving the millions of insular and Indian Americans are lower priority than natural resource issues at Interior and that the Secretary should not devote much time to them.

As a member of the Interior and Insular Affairs Committee with a strong environmental record, I firmly disagree.

ADDRESSING THE MEDICAL NEEDS OF RURAL AMERICA

(Mr. LIGHTFOOT asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LIGHTFOOT. Mr. Speaker, today I am joining with my colleagues on the House Rural Health Care Coalition to address the medical needs of rural America. The House Rural Health Care Coalition today is outlining its support of several legislative initiatives to resolve the most severe problems confronting rural hospitals.

Mr. Speaker, I am alarmed by the rate of hospital closures in rural America. The hospitals in my congressional district are some of the largest employers in the area. Hospital closures often have a negative ripple effect throughout the community. Rural businesses lose cost effective providers and communities lose local health care resources.

In addition, Mr. Speaker, physicians in rural areas receive far lower payments for their services than their urban counterparts. Several rural communities and hospitals have expressed to me their concerns with recruiting and retaining health care professionals in their communities. Because health care facilities are closing, nurses are driven from rural communities to better working conditions and higher salaries in urban hospitals.

Finally, Mr. Speaker, I am committed to work to eliminate the urban and rural Medicare payment differential. This is the No. 1 problem facing rural health care providers. Rural hospitals are more dependent on medicare payments than their urban counterparts because rural areas are traditionally comprised of older Americans whose health care costs are paid by Medicare.

Mr. Speaker, I urge my colleagues to join with me to ensure the quality of our health care delivery system will not be jeopardized. I hope you will cosponsor one of the several measures introduced by my colleagues on the House Rural Health Care Coalition.

RURAL HOSPITALS NEED HELP

(Mr. STALLINGS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. STALLINGS. Mr. Speaker, two Idaho hospitals closed their doors to acute care service last summer—March Valley Hospital in Downey and Ashton Memorial Hospital in Ashton. Fremont General Hospital in St. Anthony preceded these facilities in its demise.

Community Hospital in Council, in a 13th hour plea to the community last month, managed to raise $150,000 as a line of credit to gain the management services of Lutheran Health System and forestall closure.

Other hospitals could close within the next year.

Idaho hospitals wrote off nearly $80 million for uncompensated care in 1988—16.3 percent above 1987's level. This figure includes writeoffs for indigent care, bad debts the hospitals were unable to collect, and contractual allowances imposed on providers by Medicare/Medicaid reimbursement levels.

Medicare losses make up the lion's share of the hospitals' losses at $45 million or 10.3 percent of gross revenue. Losses attributed to the Medicare program are up 20.3 percent over 1987 levels.

Rural hospitals cannot sustain these losses. Without immediate assistance, Idaho hospitals will no longer be able to continue to provide rural communities with the accessible, high quality health care that Idahoans have long enjoyed.

Many in Congress do not understand rural in Idaho terms. They do not realize the geographic and weather impediments to accessing health care services in another community when the nearest hospital closes.

And when a hospital closes, the impact on a rural community can be staggering. Seldom will a physician remain in the community and, when there is no physician and no suitable health service, the community becomes a less desirable location for private economic development.

A recent survey by the University of Idaho Center for Business Development and Research found that sales by Idaho hospitals generated more earnings for Idaho households per dollar than sales by any other industry. And for every $1 million in gross receipts of Idaho hospitals, nearly 46 jobs were created.

It is imperative that Congress enact legislation to protect and strengthen health care services in Idaho and in rural communities across the Nation.

I strongly urge the elimination of the urban-rural differential for Medicare hospital payments. Reimbursement must be based on more accurate measures of severity to illness, case mix, and labor and nonlabor costs.

We also must make certain that rural communities are able to attract and retain qualified health care professionals, provide increased support for community and migrant health centers, rural health clinics, rural mental health services, and rural health research.

Certainly our needs are great, but with commitment and perseverance we can make certain rural America has access to quality, community-based health care.

IN SUPPORT OF H.R. 2145

(Mr. GOSS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GOSS. Mr. Speaker, H.R. 2145 would prohibit the United States from contributing to the United Nations if that body were to offer full membership to an organization that has not earned international recognition as a state.

It just so happens that we have such a situation developing today. The PLO, through its efforts to join the World Health Organization, is seeking entry into the United Nations. Mr. Speaker, we are all fully aware that the PLO has come nowhere near earning international recognition as a state.

The Palestinian Liberation Organization continues to operate under a charter apparently predicated on the ongoing use of violence and terrorism. Allowing the PLO entry into the United Nations would be unconscionable.

The United Nations only works as an organization of nation states, not an

ad hoc collection of political parties, ethnic groups, or displaced peoples.

Granting U.N. membership to a political organization claiming to represent people living in the territory of another sovereign state would be a very dangerous precedent. I urge my colleagues to support H.R. 2145.

RURAL HEALTH CARE

(Mr. SKELTON asked and was given permission to address the House for 1 minute.)

MR. SKELTON. Mr. Speaker, I rise today in support of efforts in Congress to provide better health care delivery to rural America. As a member of the Rural Health Care Coalition and chairman of the congressional rural caucus, I am encouraged by the groundswell of Members in the House that have introduced and support rural health care legislation.

I first introduced legislation in the 99th Congress to eliminate the Medicare reimbursement differential between urban and rural hospitals. This year, that legislation carries the number H.R. 1110. There are a number of pieces of legislation that now contain this important first step in saving hospitals in nonurban areas. Also, there are very good pieces of legislation dealing with the shortage of physicians and nurses, and other aspects of health care delivery.

Citizens in rural areas should not suffer simply because of where they live. If the young and elderly cannot get adequate health care maintenance, if rural hospitals continue to close, the worst of these cases will soon become a burden on the health care systems in suburban and urban areas. We must not let this happen.

I applaud Congressmen MIKE SYNAR and TOM TAUKE in their efforts to bring Members of the House together as one voice on this issue.

VETERANS' ADMINISTRATION IN DIRE NEED OF ASSISTANCE

(Mr. McEWEN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. McEWEN. Mr. Speaker, as the House is fully aware and as all of America's veterans have known for many months, the Veterans' Administration is in dire need of assistance. Whole hospital wards are being closed. Medical facilities are inadequate. Veterans are not being serviced, and new regulations are coming out on a daily basis disqualifying veterans' assistance to America's veterans because of a shortage of funding.

Some weeks ago the President and the Secretary of Veterans' Affairs asked for immediate aid. They asked the Congress for an urgent supplemental, additional funds for the Veterans' Administration. Congress said that if the President supports it and if the veterans are going to get it, such an excellent opportunity for us to put all kinds of Christmas tree ornaments on this package.

On the floor of the House some days ago the President's urgent supplemental was rejected because 93 percent of the funding did not go to veterans. It went for other causes.

□ 1240

Now we are here again listening to a discussion of possibly riding on the backs of veterans again, to use that vehicle—a veterans' supplemental—to fund other programs. Mr. Speaker, we must help veterans today and forget using the support Americans feel for their cause to pass spending measures that cannot stand on their own merit.

MEDICAL CARE TO SMALL COMMUNITIES

(Mr. DORGAN of North Dakota asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DORGAN of North Dakota. Mr. Speaker, last Saturday I flew into a small airstrip of a small rural community about 30 miles south of the Canadian border. I asked someone there why an ambulance was waiting at the small airport. The person said a young 2-year-old Indian child has been run over by a lawn mower at the reservation. They were waiting for a doctor who was flying in. The child was in pretty critical condition.

That instance reminded me of how important medical care is to small communities. I grew up in a town of 300 people. When someone was in need of emergency care and had to go to the hospital, we had to put a handkerchief on the antenna and drive 55 miles to get to a hospital, speeding all the way.

We are now preordaining, it seems to me, the closing of a lot of rural hospitals around this country by continuing a system of payment under Medicare that says to the rural hospitals we are going to give you 30 percent less than everybody else. That preordains that we are going to close rural hospitals, and I think that is unfortunate.

When the prospective payment systems was established 6 years ago the deal was, and I was involved in the deal because I was on the Ways and Means Committee when we developed the prospective payment system and passed it, that one national rate would be established. That is what our rural hospitals deserve, and that is what this Congress ought to do.

FSLIC LEGISLATION

(Mr. WALKER asked and was given permission to address the House for 1 minute.)

Mr. WALKER. Mr. Speaker, it is bad enough that this House is up to its eyeballs in creating the problem that led to the savings and loans crisis. Now as we are about to consider legislation to deal with the S&L crisis that this House helped create, we hear a rumor that the process and the procedures of the House are about to be abandoned as we bring that legislation to the floor.

Evidently the chairman of the Committee on Banking, Finance and Urban Affairs has unilaterally changed the legislation and intends to file a report later today which is his personal version of the bill rather than that reported from his committee.

Mr. Speaker, when is someone going to stop this kind of abuse? We cannot have chairmen of committees overruling the work of their committees.

There is a lot of controversy about this particular legislation for FSLIC. It should not be resolved unilaterally by one chairman. The Chair should refuse to let the report be filed until the House is assured that it is the committee's report and not the chairman's personal report.

RURAL HEALTH CARE

(Mr. SYNAR asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SYNAR. Mr. Speaker, as Members can see from the theme of today's 1-minute speeches, there is a concern in this Congress among Republicans and Democrats that are stretched throughout 43 States and make up 100 Members of the Rural Health Coalition. As its chairman, along with the gentleman from Iowa, Mr. TOM TAUKE, I am proud to say that I think we are finally getting the focus that this problem deserves. We come to the body today to address our colleagues both from rural and urban areas with a sincere interest in bringing to their attention the disparity and the discrimination that exist in this country with respect to health care delivery.

We are not asking for a better deal. We are not asking for a handout. We are asking for a fair deal to compensate for the true costs of delivery of health care so that all people in this country, regardless of whether they live in rural areas or in urban areas, and who contribute equally into Medicare, can feel like their Government is treating them with equal attention.

RURAL HEALTH LEGISLATION

(Mr. CALLAHAN asked and was given permisison to address the House

for 1 minute and to revise and extend his remarks.)

Mr. CALLAHAN. Mr. Speaker, like a number of my colleagues representing rural areas of our country, I am concerned about the growing unavailability of health care in these areas. In Alabama alone, 13 hospitals have closed since 1983, 8 of those closings occurred in 1988. Unfortunately, what is happening in Alabama reflects a growing trend in this country. Since 1980, 206 rural hospitals—43 of them last year—have closed their doors and by some estimates 600 more will close by the early 1990's.

But hospital closings are not the only problem ailing health care in rural America. There is also a growing shortage of physicians practicing in these areas. Due to differences in Medicare reimbursement between doctors practicing in rural and urban areas, fewer and fewer physicans are chosing to set up their practices in the rural areas. And why should they when they will get paid less to work longer and harder hours than their urban counterparts?

If this trend continues, health care is not only going to be unavailable but unobtainable. Already we hear stories of seriously ill people driving hundreds of miles just to get to a doctor, and when they arrive, they oftentimes wait hours to see him because he is with other patients.

It amazes me that in a country where modern medicine allows us to transplant the organ of one person into another, where a simple laser beam can remove a blinding cataract, that we can no longer assure the average citizen access to simple life saving health care because they live outside of a large metropolitan area. In a country which measures our civilization in terms of our technological advances, what is happening in rural health care is setting us back decades. Will it matter if we cure the common cold or cancer or AIDS if half of the citizens of our country do not have access to fundamental health care services?

Mr. Speaker, I urge my colleagues to give serious consideration to the plight of health care in rural America—a lot of lives are depending on it.

RURAL HEALTH CARE

(Mr. ALEXANDER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ALEXANDER. Mr. Speaker, I rise in full support of the House Rural Health Care Coalition's legislative package proposing extensive reform of health care in areas such as the northeast Arkansas district that I represent.

Three communities in this poor, rural district have lost their hospitals in the past 3 years. Ten other small, rural hospitals in Arkansas are facing imminent closure.

Physicians, nurses, certified registered nurse anesthetists, and other health professionals are leaving rural areas for more promising careers and adequate pay in urban areas.

The coalition's legislative package could change the prognosis of rural health. Our bills would increase Medicare payments to rural hospitals give health professionals incentives to practice in rural areas, improve emergency medical services, and expand infant mortality initiatives.

I urge my colleagues to support the coalition's agenda for reform.

RURAL HEALTH CARE

(Mr. NIELSON of Utah asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. NIELSON of Utah. Mr. Speaker, today I join the Rural Health Coalition in addressing the challenges facing health care in the rural community. I would like to draw my colleagues attention to two areas of concern.

First, one of the greatest difficulties hospitals in these rural areas are having is the recruiting of doctors. It is nearly impossible to attract specialists due to negative perceptions of low income, lack of peer support, and no pay for time off. There is a shortage especially of obstetricians and emergency physicians. Because of this shortage, patients living in a rural area are forced to travel to urban hospitals, in order to receive the specialized care they need.

A second concern is that due to a lack of funds, rural hospitals are unable to offer the quality and frequency of medical services desired. People living in these economically depressed communities often cannot afford the high cost of medical care, so they do not seek it until they are very ill, therefore increasing the resulting cost. Because of this, there is a high rate of large debts owed to rural health care centers, just one of the factors contributing to their lack of funds. Rural hospitals are unable to adequately staff and maintain themselves and are forced to close their doors to the community several days a week. Once again, patients must go to urban centers to receive the care they need.

If this situation is allowed to continue, rural hospitals all across the Nation will have to close their doors permanently. This would have a very negative impact not only on the health of the people, but also on the economy of rural communities. Jobs provided by the hospital would be lost, resulting in loss of income and increased unemployment. Patients would have to travel long distances even for the simplest medical care. The consequences would be disastrous.

I urge you, my fellow colleagues, to keep these concerns in mind when dealing in the future with rural health care legislation.

RURAL HEALTH CARE

(Mr. OBERSTAR asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. OBERSTAR. Mr. Speaker, in conjunction with my colleagues from the Congressional Rural Health Caucus, I join in supporting initiatives to equalize the payments between rural and urban hospitals. There is no reason for the distinction and disparity that exists in payment for comparable services provided in urban areas and in rural areas.

No better dramatization of the disparity and of the need for comparable payment could be demonstrated than in the NBC Sunday Today Show of about 2 weeks ago which featured Dr. Ray Christianson, a family practice doctor in the small community of Moose Lake, MN, focusing on his struggle to serve a widely dispersed population, providing high-quality health care, but stretched to the limit of the ability of one person to serve the needs of those people when he could be working in an urban area like Minneapolis-St. Paul and making double the pay he is making in little Moose Lake.

Let us save the Ray Christiansons of this world.

RURAL HEALTH CARE

(Mr. BEREUTER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BEREUTER. Mr. Speaker, I join my colleagues on the Rural Health Care Coalition in bringing to the attention of this body a package of bills introduced to attempt to deal with the inequities that exist in the Medicare reimbursement programs. We, as a coalition, ask that rational, equitable rules be implemented, and where necessary, we are offering a package of statutory changes to assure that that happens.

A few minutes ago my colleague, the gentleman from North Dakota [Mr. DORGAN] spoke eloquently about some of the difficulties with respect to delivery of adequate health care and medical services in rural areas. Relatedly, I want to call attention of the body to a resolution that the gentleman from North Dakota has introduced, H.R. 1583, which addresses a particular problem through the creation and functioning of a Medicare geographical classification review board. It would attempt to deal with the reimbursement problem of hospitals like

those in my own State—hospitals in Beatrice and Fremont—that happen to be located just outside standard metropolitan statistical areas. Many of the costs experienced by such hospitals, such as labor costs are the same or nearly the same as in the adjacent SMSA, yet they are reimbursed at an inadequate level reflecting a much lower general rate for rural area hospitals.

I urge my colleagues to support this legislation.

ACCESS TO HEALTH CARE FOR RURAL COMMUNITIES

(Mr. ROGERS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ROGERS. Mr. Speaker, a fundmental concern of families who live in rural communities is whether or not they will have access to the health care that they need. Rural hospitals are crucial, sole providers of health services, and that is why I feel strongly that Congress must eliminate the current differential between urban and rural reimbursement rates.

I ask Congress today to treat rural hospitals fairly. While rural hospitals receive a significant amount less from Medicare than do their urban counterparts, rural hospitals have costs that are equal to, or in some cases, higher than some urban hospitals. Those of us who live in rural communities, like my district in Kentucky, know that our communities suffer from a shortage of health care professionals and necessary medical services. Inadequate Medicare payments are directly related to the ability of rural communities to recruit and retain physicians.

The differential rate has placed rural hospitals at an unfair advantage. The elimination of the differential and fair treatment for all hospitals is simply a matter of equity.

CARING FOR OUR VETERANS

(Mr. SOLOMON asked and was given permission to address the House for 1 minute.)

Mr. SOLOMON. Mr. Speaker, I would ask you and especially my colleagues back in their offices to right now drop what they are doing. I want them to pick up the telephone and call the veterans' hospital in their district. I want them to ask for the national service officer for the VFW or the DAV, or the American Legion, and I want them to ask what is going on in that hospital. Do my colleagues know what they are going to tell them?

□ 1250

They are going to tell you that veterans are being turned away, there is no money there to give them prescription drugs, there is no money there to hire nurses and doctors, and they are going to tell you they are shutting down hospital beds. That is the situation.

You know, we earlier, 2 weeks ago, passed a budget for next year in which we picked up most of the shortfall for the veterans' medical care delivery systems in this Nation. But we have yet to act on the dire supplemental for this year. There is a $600 million shortfall out there.

In the Miami hospitals, in Pennsylvania, in Michigan, in California, all over this Nation there is no money to take care of the veterans of this Nation.

Get on the phone and call them and act on this supplemental and stop holding the veterans of this Nation hostage.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore (Mr. BUSTAMANTE). Pursuant to the provisions of clause 5 of rule I, the Chair announces that he will postpone further proceedings today on each motion to suspend the rules on which a recorded vote or the "yeas" and "nays" are ordered, or on which the vote is objected to under clause 4 of rule XV.

Such rollcall votes, if postponed, will be taken after debate has concluded on all motions to suspend the rules.

NOISE REDUCTION REIMBURSEMENT ACT OF 1989

Mr. ANDERSON. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 968), to provide for the Federal reimbursement of local noise abatement funds as amended.

The Clerk read as follows:

H.R. 968

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Noise Reduction Reimbursement Act of 1989".

SEC. 2. PURPOSES.

The purposes of this Act are to—

(1) enhance the quality of life of citizens living in proximity to the Nation's airports;

(2) allow for the prompt implementation of the full range of recommendations of federally sponsored noise studies;

(3) provide that scarce Federal funds for noise abatement may be used with maximum efficiency; and

(4) provide that individual airports throughout the national airway system are encouraged to spend local funds on noise abatement by providing for the Federal reimbursement of such local funds.

SEC. 3. NOISE CONTROL COSTS INCLUDED AS ALLOWABLE PROJECT COSTS.

Section 513(a)(2) of the Airport and Airway Improvement Act of 1982 (49 U.S.C. App. 2212(a)(2)) is amended by inserting "(A)" after "(2)", by inserting "or" after "1946;", and by adding at the end thereof the following new subparagraph:

"(B) it was incurred after June 1, 1989, by the airport operator and before, on, or after the execution of the grant agreement and was incurred as part of the airport operator's federally approved airport noise compatibility program (including project formulation costs) and in accordance with all applicable statutory and administrative requirements;".

The SPEAKER pro tempore. Is a second demanded?

Mr. CLINGER. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from California [Mr. ANDERSON] will be recognized for 20 minutes, and the gentleman from Pennsylvania [Mr. CLINGER] will be recognized for 20 minutes.

The Chair recognizes the gentleman from California [Mr. ANDERSON].

Mr. ANDERSON. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I support this bill and commend the gentleman from Tennessee [Mr. CLEMENT], for introducing it.

The bill can make an important contribution to noise abatement. Under existing law, an airport cannot receive funding for noise abatement measures, such as the purchase of housing impacted by noise, unless the airport operator receives a grant before a project is undertaken. The bill now before us will change this requirement to permit an airport to be reimbursed for noise abatement expenditures undertaken after June 1, 1989. The bill includes several restrictions designed to ensure that the projects are carried out in accordance with all applicable legal and administrative requirements. The bill does not commit the Federal Government to provide reimbursement for any particular project. The bill only makes certain projects eligible to compete with other eligible projects for Federal funding.

The legislation will promote noise abatement. Because of obligations ceilings imposed in the appropriations process, we have been unable to get enough money out of the Airport and Airway Trust Fund to fund all noise abatement projects which are ready to go. This bill will encourage airports to do important noise abatement work even though Federal funding is not currently available.

I have been a long time supporter of the Aviation Noise Abatement Program. This legislation is a good contribution to the program since it will encourage more noise abatement projects to begin at the earliest possible date. I commend the gentleman from Tennessee for offering this legislation and I urge my colleagues to support it.

Mr. Speaker, I yield 5 minutes to the gentleman from Tennessee [Mr. CLEMENT].

Mr. CLEMENT. Mr. Speaker, I would like to offer my praise and thanks to the leadership and members of the Public Works and Transportation Committee for their role in bringing the Noise Reduction Reimbursement Act of 1989 to the floor of the House this afternoon. Passage of this legislation was a bipartisan effort at the committee and offers a model for future legislation to solve our Nation's infrastructure problems.

Although, the origins of this legislation lie in the efforts of the Nashville International Airport to grapple with demands for increasing the capacity of the national air transport system, the bill provides a model for other airports also undertaking major expansions. Nashville's effort is an example of what must happen if the national air transportation system is to meet today's challenges and future growth needs.

Along with any new capacity for the Nation's air transport system comes the unwelcome byproduct of increased noise. Regrettably, as with most programs, Federal funds are simply not available to fund the Federal share of the noise abatement measures for airports across our Nation.

The Noise Reduction Reimbursement Act bridges this gap between immediate need and the lack of Federal funding with that greatest of American virtues: self-reliance. Thus, what began as an effort to solve the particulars of Nashville's problems has become a solution that can be used by other airports coping with the noise problems of major expansions.

The act allows an airport to use its own funds to implement federally approved noise programs, and then be reimbursed later by the Federal Government for the Federal share of such projects. This measure will allow airports to begin implementing noise programs upon completion of the Federal noise study and then be repaid as Federal funds become available.

Some care needs to be taken to distinguish this program from the Letter of Intent Program. The Letter of Intent Program is a reimbursement program under which the Federal Government commits to a fixed-repayment schedule. The Letter of Intent Program was designed for large capital programs and provides assurances to the airports that they will be repaid within a certain time. In contrast, the Noise Reimbursement Program of H.R. 968 is analogous to the reimbursement program for land acquisition. Under the land program, the Federal Government is given broader leeway as to the timing of reimbursement and no one airport is put in a priority position over other airports competing for noise funds.

Although conceptually simple, this legislation has several subtle advantages. Foremost of these is that proper concern for the quality of life of people living near airports need not be sacrificed because of a shortage of Federal noise funds. As most of us know, prompt implementation of noise abatement programs is becoming as important as funds for runways to expand the capacity of the national air transportation system. It does little good to build new runways and then have communities vote for airport use restrictions because of increased noise.

Another advantage of the legislation is that since the local community pays the up-front costs, and the Federal Government gets to repay the locality with future inflated dollars, and without interest, the Federal Government gets the equivalent of an interest free loan. Accordingly, scarce Federal funds are stretched further. Moreover, the legislation gives the Federal Government full discretion as to when the funds will be reimbursed.

In closing, I would like to pay tribute to the people of Nashville and the leadership of the Nashville International Airport. This is the second time that their long-term expansion program has run into Federal funding constraints, and this is the second time that they have supported solutions which involved self-help. In fact, in both cases they have been willing to advance money to the Federal Government. The first instance was the letter of intent for the new runway, and the second is H.R. 968.

America's efforts to grapple with the need to rebuild its infrastructure is just beginning. All of the Congress' ingenuity will be required to meet this challenge. I believe that H.R. 968 is a model building block in the efforts of the House and Public Works and Transportation Committee to meet this challenge. I believe the Nation will be well served by passage of this legislation and I ask for my colleagues' support.

Mr. CLINGER. Mr. Speaker, I yield myself such time as I may consume.

Mr. SPEAKER, I rise in support of this bill that would address the problem of aircraft noise. Aircraft noise is one of the greatest obstacles to the growth of our Nation's air transportation system. It is a matter of serious concern to many citizens who live near airports.

We have developed several methods for addressing the noise problem. One is to expend money out of the airport and airways trust fund for noise abatement purposes. This year more than $100 million is supposed to be spent to soundproof buildings and take other actions to mitigate noise.

However, under current law, airports must usually wait to receive a Federal grant before beginning noise abatement projects. This means that important improvements that could enhance the quality of life and increase airport capacity often must wait until the Federal grant is approved.

This bill would speed up the process by allowing local airports to spend their own money for noise abatement projects now and be reimbursed for it with a Federal grant later.

Of course, there is some risk for the local airport because it might not get reimbursed by the Federal Government. But for those airports willing to take that chance, this legislation gives them an opportunity to expedite noise abatement projects. Those airports that do not want to take the chance can still proceed as in the past and await the Federal grant before beginning the noise abatement work.

Since this bill provides increased flexibility to local airports in their noise mitigation efforts, I support it and urge my colleagues to do the same.

□ 1300

Mr. ANDERSON. Mr. Speaker, I yield 2 minutes to the gentleman from Minnesota [Mr. OBERSTAR], chairman of the Subcommittee on Aviation.

Mr. OBERSTAR. Mr. Speaker, the laws governing the airport improvement program provide that an airport cannot receive funding for noise abatement projects unless the grant is received before the project is undertaken.

What we are doing with this legislation is making a slight change in the approach paralleling existing law in the Federal Highway Program, allowing an airport to be reimbursed for noise projects, if the project is carried out after June 1, 1989, and if, second, it is part of an FAA improvement, airport noise compatibility program, known in technical FAA terms as the Part 150 Noise Program.

By offering the airports a realistic prospect of receiving funding for such projects within a reasonable time after they have been undertaken, I think we will encourage the airports to move ahead with noise abatement programs. Many have held back because of the complexity of getting funding and the long leadtime for planning. They need to have some assurance that they can move ahead with the project and have a reasonable prospect of being reimbursed.

As the gentleman from Pennsylvania pointed out, there is no commitment in this legislation by the Federal Government to make funding available at a later date. We are establishing eligibility for funding at a future time. I think that the airports have the confidence and the knowledge that with

the Aviation Trust Fund, that at some date money will be available. If they move ahead under approved FAA approved programs, the airports are willing to take that chance and move ahead with their airport noise abatement projects which are so needed and will facilitate aviation throughout this country.

I want to commend the gentleman from Tennessee [Mr. CLEMENT], for his hardwork and leadership on this legislation. Though this bill has its roots in the local circumstances of his district, his approval on this has a national significance. Airport neighbors around the country will benefit from the actions taken today. The gentleman from Tennessee has done a great service by his work on this legislation.

Mrs MORELLA. Mr. Speaker, I rise in support of the Noise Reduction Reimbursement Act of 1989, H.R. 968.

As my colleagues know, we in the Greater Washington area have been working for many years on noise abatement issues connected with National and Dulles Airports. Residents of my district in Montgomery County, individually and under an organization called "Citizens for the Abatement of Aircraft Noise, Inc." [CAAN], are represented by a large coalition organized by the Metropolitan Washington Council of Governments [COG] into the Committee on Noise Abatement at National and Dulles Airports. Formal meetings of the committee have been taking place under the chairmanship of Betty Ann Kane on a regular basis. CONANDA, as it is called, consists of elected legislative and executive branch officials from suburban Maryland, northern Virginia, and the District of Columbia, along with nonvoting industry representatives from the Metropolitan Washington Airports Authority [MWAA], the Air Transport Association of America, the Air Line Pilots Association, the National Business Aircraft Association, and scores of officially designated observers.

At this time, CONANDA is waiting for the publication of the second "part 150" noise mitigation recommendations of the MWAA. A part 150 study for Dulles Airport has already been circulated for comments, and an addendum is in the hands of the local governments. The study for National Airport is expected to include the resolution passed by the WMAA Board of Directors last October stating "that it is the sense of the Board of Metropolitan Washington Airports Authority that aircraft operators should not proceed with expansion of flights after 10 p.m. and before 7 a.m." This resolution, along with a new permanent noise monitoring system, should enhance the public's confidence that flights will be quieter in the day and both infrequent and quiet at night.

Mr. Speaker, I mention this information because it is of concern to all of us that National Airport, as well as other airports in the United States whose flight paths are over homes, schools, hospitals, et cetera, be able to benefit from noise abatement procedures. This bill, which will give airport operators more options to facilitate the noise abatement process, sends an important message that we believe in its necessity and will act accordingly. I commend Chairman ANDERSON and the Energy and Commerce Committee for H.R. 968.

Mr. HAMMERSCHMIDT. Mr. Speaker, I would like to join the chairman in support of this bill which would permit the FAA to reimburse an airport sponsor for expenditures incurred as part of the airport's federally approved Airport Noice Compatibility Program.

This bill will encourage airport sponsors to spend money up front for noise abatement knowing that at some point in the future, these expenditures may be reimbursed out of the airport and airway trust fund. As I understand it, the legislation would establish no priorities for funding but would have the effect of expediting expenditures for noise abatement.

I urge my colleagues to support this bill.

Mr. KLECZKA. Mr. Speaker, today the House is considering H.R. 968, a bill providing Federal cost reimbursement of local airport noise abatement projects.

This legislation is necessary because airplane noise control is a growing concern of airports and their neighbors. With ever-greater air traffic and increasingly sophisticated methods of noise abatement available, projects which minimize this annoying form of pollution should be expedited.

H.R. 968 permits the Department of Transportation to award grants from the airport and airway trust fund to airports for noise control projects after work on such a project has begun. This would allow airports to start work on these efforts while being reimbursed at a later date if Federal funding is not currently available.

Under current law, an airport may not receive Federal funding for noise abatement if it has already begun work on a project before a grant is awarded. Reforming this counter-productive procedure would provide greater efficiency in the use of Federal airport noise control dollars.

H.R. 968 is not a budget buster either; according to the Congressional Budget Office, the enactment of this measure will result in no additional costs to the Federal Government.

I have been assisting Milwaukee's General Mitchell International Airport in my Fourth Congressional District of Wisconsin with several noise abatement projects. However, airports cannot be expected to bear the burden of noise control on their own. By cutting red-tape through legislation such as this, we in Congress can assist in this process.

I urge my colleagues to join constructively in the war against airport noise by voting for H.R. 968.

Ms. PELOSI. Mr. Speaker, I rise in support of H.R. 968 which would enable airport authorities to receive reimbursements for airport improvement projects aimed at reducing noise. I support noise mitigation efforts and believe project reimbursements are entirely appropriate. While this bill addresses some of the funding concerns of airports, other noise issues remain.

In my city of San Francisco, overflight noise continues to be a very serious problem. I have urged the Federal Aviation Administration [FAA] to consider alternatives which would route flights away from the city. The FAA response has been less than satisfactory—flights over San Francisco have not been reduced nor rerouted.

San Francisco has a strong local noise mitigation policy and the city has made every effort to comply with Federal regulations. Regardless, the FAA has withheld important Federal airport improvement funding because of perceived noncompliance with Federal noise regulations.

I am concerned about this lack of concern and cooperation by the FAA. The fact is, Mr. Speaker, that the FAA has not developed national noise mitigation guidelines. This inaction now makes it necessary for the Congress to step in and develop a national policy on aircraft noise. Such a policy should incorporate the concerns of airport communities such as San Francisco, which are most heavily impacted by aircraft noise.

This issue of aircraft noise is of major concern to the citizens of San Francisco and I am pleased that the topic is being discussed in Congress today. I urge members of the Aviation Subcommittee to develop a national noise policy and I also urge my colleagues to support the legislation before us today.

Mr. LANTOS. Mr. Speaker, I rise in strong support today of H.R. 968, the Airport Noise Abatement Cost Reimbursement Act. I would like to commend my good friend and colleague, Chairman GLENN ANDERSON, and the members of his committee for their effort in bringing this important legislation before the Congress.

Under current law, airports may not receive Federal grants from the airport and airway trust fund to cover the cost of noise abatement projects if any work on the project begins before the grant is awarded. The Airport Noise Abatement Cost Reimbursement Act, which we are considering today, will permit the Department of Transportation to award grants from the airport trust fund to airports for noise abatement projects after work on such a project has begun.

This will be an important incentive to airport authorities to move ahead quickly with noise abatement projects without waiting first for Federal clearance, which can sometimes be slow in coming. The airport noise abatement cost reimbursement will vastly improve the quality of lives of countless families living near our Nation's airports at no additional cost to the Federal Government.

For many of my constituents on the San Francisco peninsula, airport noise is the principal source of degradation in their quality of life. As the needs and demands of the air-traveling public increase and our Nation's airports are called upon to accommodate many more passengers and many more flights, the Federal Government must continue to encourage local airport authorities and communities to support noise abatement projects.

The use of Airport Improvement Program funds for FAA-approved noise abatement projects is absolutely essential to the success of airport improvement ventures. Certainly, prompt and expeditious funding of noise abatement projects is necessary for continued community support. While the Administrator retains discretion over the reimbursement of Federal funds, this legislation sends a signal to the Department of Transportation and to the many communities around the Nation that the Federal Government will expeditiously ful-

fill its commitment toward funding appropriate airport noise abatement projects.

During the 100th Congress, language was included in the Airport and Airway Act which prohibits the Secretary of Transportation from withholding grant payments without providing an applicant with an opportunity for a hearing. In an effort to reduce airport noise in and around San Francisco International Airport, airport officials refused to allow Burlington Air Express to operate retrofit Boeing Q-707 jet aircraft at the airport because they exceeded airport noise standards. In response, the FAA refused to issue $17 million in previously approved grants to San Francisco International Airport. These funds have still not been disbursed to San Francisco International Airport pending an appeal in the Federal courts while much needed safety equipment and runway work sits idle.

Mr. Speaker, the FAA must encourage, not discourage airports and communities to attack their airport noise problems head on and must not penalize communities in their efforts to fight airport noise. I urge my colleagues to pass H.R. 968, the Airport Noise Abatement Cost Reimbursement Act, so that airports can begin immediately to implement their noise abatement programs to assure a high quality of life for those Americans who live near our Nation's airports.

Mr. ANDERSON. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. CLINGER. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

The SPEAKER pro tempore (Mr. BUSTAMANTE). The question is on the motion offered by the gentleman from California [Mr. ANDERSON] that the House suspend the rules and pass the bill, H.R. 968, as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. ANDERSON. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks on H.R. 968, the bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

AUTHORIZING THE SECRETARY OF TRANSPORTATION TO RELEASE RESTRICTIONS ON PROPERTY CONVEYED TO PENINSULA AIRPORT COMMISSION

Mr. ANDERSON. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 838) to authorize the Secretary of Transportation to release restrictions on the use of certain property conveyed to the Peninsula Airport Commission for airport purposes, as amended.

The Clerk read as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That subsection (b) of the first section of the Act entitled "An Act to authorize the Secretary of Transportation to release restrictions on the use of certain property conveyed to the Peninsula Airport Commission, Virginia, for airport purposes," approved November 6, 1986 (Public Law 99-618; 100 Stat. 3490), is amended—

(1) in paragraph (3) by striking "7.5 acres" and inserting "20.5 acres"; and

(2) by striking paragraph (4).

The SPEAKER pro tempore. Is a second demanded?

Mr. CLINGER. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from California [Mr. ANDERSON] will be recognized for 20 minutes, and the gentleman from Pennsylvania [Mr. CLINGER] will be recognized for 20 minutes.

The Chair recognizes the gentleman from California [Mr. ANDERSON].

Mr. ANDERSON. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of H.R. 838. The legislation removes restrictions which were imposed when the Federal Government gave land to Newport News. The restrictions require the land to be used solely for aeronautical purposes. H.R. 838 would permit the Airport Commission to sell or lease 13 acres of this land. The bill requires that the Airport Commission must receive fair market value for any land which is sold or leased and that the proceeds from the transfer or sale must be used for the development, improvement or operation of a public airport.

We have been advised by the Federal Aviation Administration that the small amount of land involved is not necessary for effective operation of the airport at Newport News. With the conditions imposed, the interests of the United States will be fully protected. This legislation is similar to many other bills which have been enacted to deal with similar circumstances at other airports. I urge passage of H.R. 838.

(Mr. CLINGER asked and was given permission to revise and extend his remarks.)

Mr. CLINGER. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, this bill clears up some unfinished business from the last two Congresses. In the 99th Congress, we passed a bill that removed certain deed restrictions on the airport in Newport News, VA. This cleared the sale of about 20½ acres of property at that airport which was no longer needed for airport purposes. However, when the Senate took up the bill, they cut out 13 acres. This left some of the property still subject to the deed restriction.

Last year, during the 100th Congress, the Senate took another look at this issue and decided to pass a bill to remove the restrictions on the remaining 13 acres. However, the House took no action on that bill.

The bill before us now is similar to the one the Senate passed last year. It merely completes the action that this body initiated 3 years ago by releasing the remaining 13 acres of airport property from restrictions in the deed that prevent their sale. We have a letter from the Federal Aviation Administration indicating that it does not object to this action.

Therefore, I support this bill and urge its immediate passage.

I would just like to add that the sponsor of this bill, Congressman HERB BATEMAN, could not be here today because he is recovering from heart bypass surgery. HERB has worked diligently to see this bill enacted. We all wish him a speedy recovery and look forward to his rejoining us here in the near future.

I know he would want to join me in thanking Chairman ANDERSON, subcommittee Chairman OBERSTAR, and ranking member JOHN PAUL HAMMERSCHMIDT for their support of this measure.

And so, once again, Mr. Speaker, I urge approval of this bill.

Mr. ANDERSON. Mr. Speaker, I yield 1 minute to the gentleman from Minnesota [Mr. OBERSTAR], chairman of the Subcommittee on Aviation.

Mr. OBERSTAR. Mr. Speaker, I did not realize this legislation was going to be a get well message for our colleague, the gentleman from Virginia [Mr. BATEMAN], but the fact that the committee has acted so promptly certainly should serve to cheer the gentleman on his recovery from surgery.

The legislation had a long history and has been carefully reviewed by the FAA, by the subcommittee on both sides of the aisle, and the issue is clear. The airport received their market value for the property, has devoted the proceeds to the airport which is customary practice and policy in this situation because there is no reason not to allow the airport to go ahead to take the action, contemplate it. The legislation will remove the aeronautical use restriction on this 13-acre parcel of land at the Newport News Airport that ought to be approved by the U.S. Congress and signed into law by the President.

Mr. HAMMERSCHMIDT. Mr. Speaker, this bill authorizes the Secretary of Transportation to release restrictions on the use of airport property owned by the Peninsula Airport Com-

mission. As originally introduced, the bill would have provided an across-the-board release of restrictions on the transfer of airport property if the Secretary so authorized.

The bill before us now would limit the potential release of restrictions to 20.5 acres. This would require the release of any additional land to be approved by Congress.

As my colleagues may recall, this is consistent with legislation that we passed in a previous Congress establishing a similar specific limitation on the number of acres to be released.

This bill makes the legislation applicable only to land that was previously transferred and therefore is limited in its application. I urge my colleagues to support the bill.

□ 1310

Mr. ANDERSON. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. CLINGER. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

The SPEAKER pro tempore. (Mr. BUSTAMANTE). The question is on the motion offered by the gentleman from California [Mr. ANDERSON] that the House suspend the rules and pass the bill, H.R. 838, as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. ANDERSON. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on H.R. 838, the bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

CONDEMNING CONTINUING VIOLENCE AND THE IMPOSITION OF MARTIAL LAW IN TIBET

Mr. SOLARZ. Mr. Speaker, I move to suspend the rules and agree to the concurrent resolution (H. Con. Res. 63) commemorating March 10, 1989, as the 30th anniversary of the Tibetan National Uprising and expressing the concern of the Congress for the ongoing human rights abuses in Tibet, as amended.

The Clerk read as follows:

H. CON. RES. 63

Whereas on March 5, 6, and 7, 1989, Tibetans engaged in peaceful demonstrations in Lhasa were fired on by Chinese authorities, reportedly killing 30 to 60 persons and injuring hundreds;

Whereas on March 8, 1989, martial law was declared in Lhasa and its evirons, and there were subsequent reports of mass arrests and mistreatment of Tibetans by Chinese authorities;

Whereas, despite some Chinese efforts to address the grievances of the Tibetan people, reports issued by the international press and credible human rights organizations, including Asia Watch and Amnesty International, confirm mounting allegations of very serious violations of human rights in Tibet, including arbitrary arrest and detention, the use of excessive force on peaceful demonstrators, restrictions on religious freedoms, torture, and a systematic pattern of discrimination;

Whereas the government of the People's Republic of China has endorsed the Universal Declaration of Human Rights and has expressed its concern about human rights conditions in other countries, including South Africa and the United States;

Whereas Congress passed, and President Reagan signed into law on December 22, 1987, legislation stating that "the Government of the People's Republic of China should respect internationally recognized human rights and end human rights violations against Tibetans . . . and should actively reciprocate the Dalai Lama's efforts to establish a constructive dialogue on the future of Tibet";

Whereas, although both the Government of the People's Republic of China and the Dalai Lama have declared an intention to enter into negotiations concerning the situation in Tibet, no talks have yet taken place; and

Whereas the Dalai Lama has called on Tibetans to refrain from violence: "There is no justification for violence—to use guns, or to stone people, or to burn houses.": Now, therefore, be it

Resolved by the House of Representatives (the Senate concurring), That the Congress—

(1) condemns the use of excessive and lethal force by the Chinese authorities in Tibet against individuals engaged in the peaceful expression of their political beliefs;

(2) urges the People's Republic of China to exercise restraint in response to future peaceful demonstrations, to respect internationally recognized human rights, and to end human rights violations in Tibet;

(3) urges the People's Republic of China to lift martial law in Lhasa and its environs at the earliest possible date and to admit foreign journalists and human rights monitors to Tibet:

(4) urges the People's Republic of China to allow representatives of respected international humanitarian organizations to have access to prisons in Tibet;

(5) consistent with section 1243 of Public Law 100-204, urges the President to continue to make respect for human rights (including the treatment of Tibetans) an important factor in United States conduct of relations with the People's Republic of China;

(6) urges the executive branch, through the Secretary of State, to call attention to violations of human rights in Tibet; and

(7) supports all efforts, including those of the Dalai Lama, to peacefully resolve the situation in Tibet and urges both sides to pursue a constructive dialogue for a peaceful resolution of the situation as early as possible.

The SPEAKER pro tempore. Is a second demanded?

Mr. BROOMFIELD. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from New York [Mr. SOLARZ] will be recognized for 20 minutes, and the gentleman from Michigan [Mr. BROOMFIELD] will be recognized for 20 minutes.

The Chair recognizes the gentleman from New York [Mr. SOLARZ].

Mr. SOLARZ. Mr. Speaker, I yield myself such time as I may consume.

Mr. FASCELL. Mr. Speaker, will the gentleman yield?

Mr. SOLARZ. I am glad to yield to the distinguished chairman of the Foreign Affairs Committee, the gentleman from Florida [Mr. FASCELL].

Mr. FASCELL. Mr. Speaker, I rise in support of House Concurrent Resolution 63, as amended, and urge its immediate adoption. This resolution expresses congressional concern about ongoing human rights violations in Tibet. It condemns the March 8, 1989, imposition of martial law in Tibet which followed the violent suppression of 3 days of peaceful demonstrations. Reliable sources report that 30 to 60 persons were killed and hundreds were injured when Chinese authorities opened fire on unarmed demonstrators.

The resolution also expresses concern about the practice of arbitrary arrest and detention, the use of torture, religious discrimination, and a systematic pattern of discrimination against Tibetans, in addition to the use of excessive force. House Concurrent Resolution 63 calls for the peaceful resolution to the situation in Tibet and urges the Chinese Government to take steps toward that end such as lifting martial law, exercising restraint in response to future peaceful demonstrations, allowing international humanitarian organizations access to Tibetan prisons, and pursuing a contructive dialog with the Dalai Lama and his representatives.

The measure urges the administration to call attention to violations of human rights in Tibet and calls upon the President to continue to make respect for human rights an important factor in our bilateral relationship with the People's Republic of China.

Mr. Speaker, information about the present situation in Tibet is sketchy at best. With the imposition of martial law, all foreign journalists and tourists were expelled and none have been allowed back in the intervening 2 months. However, despite this total ban on news from Tibet, reports of mass arrests, severe restrictions on freedom of movement within the capital city of Lhasa, and even executions of those involved in the demonstrations, has leaked out. This resolution urges the People's Republic of China to allow foreign journalists and independent human rights organizations into Tibet to monitor the situation.

I commend the authors of the resolution, Mr. ROSE, Mr. GILMAN, and Mr. DOUGLAS, and the gentleman from California [Mr. LANTOS], who offered the amendments, for their leadership in bringing this egregious situation to the attention of our colleagues. I also commend the subcommittee chairmen and ranking minority members, Messrs. YATRON and BEREUTER of our Human Rights Subcommittee and Messrs. SOLARZ and LEACH of the Asian sub-

committee, for their efforts to forge a strong, principled and bipartisan statement that expresses our continued condemnation of these deplorable actions by the Chinese authorities. I understand the administration fully supports the resolution and I urge its immediate adoption.

Mr. SOLARZ. Mr. Speaker, this resolution was originally introduced by my very good friend, the gentleman from North Carolina [Mr. ROSE] together with the gentleman from New York [Mr. GILMAN], and strongly supported by the gentleman from California [Mr. LANTOS]. It was subsequently revised somewhat in the Committee on Foreign Affairs, and it now comes before us in its current form.

I certainly want to pay tribute to the gentlemen who originally brought this resolution before us for their continuing commitment to the cause of human rights in Tibet. They have constituted themselves as a kind of Tibetan caucus, as it were, in the House, in which they vigilantly monitor developments in Tibet, a far away place in which few Americans have ever set foot but where there are apparently serious and continuing abuses of human rights which should engage the concerns and attention of all Americans. So in that sense I think that all of us owe a debt of gratitude to those gentlemen who have been primarily responsible for bringing this resolution before us.

About 2 months ago, in Lhasa, the capital of Tibet, thousands of Tibetan citizens engaged in peaceful protests and demonstrations were fired upon by the Chinese authorities in the Tibetan capital, as a result of which between 30 and 60 people were killed and hundreds of others were injured. Subsequent to this brutal repression of what was apparently a peaceful protest, the Chinese authorities established martial law in Tibet as well, and martial law, so far as I know, continues to be in effect in Tibet at the present time.

The purpose of this resolution, Mr. Speaker, is not only to take note of these unfortunate developments but to express the very strong sense of the Congress that in our judgment excessive and lethal force was used by the Chinese authorities in Tibet against individuals engaged in acts of peaceful protests.

The resolution urges the Chinese authorities to respond to any subsequent demonstrations which may take place in a more restrained fashion, it calls upon the Chinese authorities to lift martial law, and, perhaps most importantly, it calls for a peaceful and constructive resolution of the Tibetan problem through a dialog between the concerned parties, including hopefully the Dalai Lama, who embodies in so many respects the hopes and aspirations and interests of the Tibetan people.

Mr. Speaker, I have no doubt that the adoption of this resolution will occasion some criticism in the Chinese press and on the part of Chinese authorities that we are interfering in the internal affairs of China. With all due respect to our Chinese friends, I have to reject that argument. Certain things are no long considered exclusively within the internal jurisdiction of member states of the United Nations. The People's Republic of China is a signatory of the universal declaration of human rights, as well as other international covenants which clearly apply to the situation in Tibet. Just as this Chamber has not hesitated to express its views about the abuse of human rights in literally dozens of other countries around the world, in Asia, in Africa, in the Middle East, and in our own hemisphere, so, too, we have every right, indeed a responsibility, to express our concern with respect to the abuse of human rights in parts of China as well.

Furthermore, I think it should be noted for the record that while our Chinese friends accuse of interfering in their internal affairs by virtue of our expressions of concern about the human rights situation in Tibet, the fact of the matter is that they themselves not hesitated to criticize the continuing abuse of human rights in South Africa, where they have joined with us in opposing the apartheid regime in that country. From time to time they have even been heard to express criticism of what they believe to be racist policies here in our own country, and I fail to see how they can feel free to criticize aspects of American life, which we believe they have every right to do, while at the same time criticizing us for commenting on the abuse of human rights in their own country.

Finally, Mr. Speaker, let me say that some Members may wonder why it is that at a moment when tens of thousands of Chinese are demonstrating for human rights in Tiananmen Square in Beijing, the capital of China, where they are being joined not just by intellectuals but by workers and other Chinese citizens who want greater freedom of expression, greater freedom of the press, a diminution of corruption, and real progress toward democratization in China, we should be adopting a resolution which focuses just on the human rights situation in part of China. To those who wonder about this seeming paradox, I can only say that we are in the process of drafting a resolution which will deal with the human rights situation in China as a whole, because I know that the Members who originally drafted this resolution and who have for years championed the cause of human rights in Tibet feel just as strongly about the cause of human rights throughout China as a whole. And I dare say that if China heeds these expressions of concern, if, more importantly, it responds to the concerns of its own people whom we are simply supporting by this resolution, they will ultimately benefit from it as well.

So, Mr. Speaker, I am pleased to say that this resolution enjoys strong bipartisan support. A similar version has already been adopted in the other body. When asked about it, the administration said it has no objections. I would have been happier if they had said they supported it, but at least they did not oppose it. I will let my friends on the other side of the aisle tell us why the administration could not go marginally beyond saying it had no objections. We would appreciate it if they had said they actively, positively, affirmatively, and constructively supported it, but I realize that it takes a while to get the Department of State in shape, and that the Assistant Secretaries are not on the job yet and reviews are still going on. So perhaps it is understandable that they were not able to get their act together in time for the consideration of this resolution.

□ 1320

Hopefully, Mr. Speaker, when we take up the broader resolution, they will be in a position to tell us that they positively endorse it.

Mr. BROOMFIELD. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I would like to congratulate Chairman SOLARZ, Congressman GILMAN, Chairman YATRON, Congressman BEREUTER, and other members of the Foreign Affairs Committee who crafted this resolution condemning human rights violations by the Chinese Government. This particular resolution stems from the violent suppression of demonstrators in Tibet earlier this year.

It is unfortunate that once again we are compelled to address the issue of human rights violations in China. I am very disappointed that China, which has progressed in many ways over the past decade, still finds it so difficult to respect the basic human rights of its citizens.

The resolution which we consider today is not to be taken lightly, and I hope the Chinese Government is listening. Beating and killing peaceful protesters, martial law, and arrests in the dead of the night are not the behavior of a decent government. Such policies will only serve to hinder United States-Chinese relations.

While the Chinese have made some progress in solving the problems in Tibet, actions such as those of March 5, 6, and 7, overshadow any accomplishments. This resolution is not only a condemnation of that violence, but a plea to both the Chinese Government

and the Tibetans to reach a settlement through peaceful means.

I urge my colleagues to support House Concurrent Resolution 63.

Mr. Speaker, I yield such time as he may consume to the gentleman from New York [Mr. GILMAN], one of the principal sponsors of this resolution.

Mr. GILMAN. Mr. Speaker, I thank the distinguished chairman of the Foreign Affairs Committee, the gentleman from Florida [Mr. FASCELL]; the distinguished gentleman from New York [Mr. SOLARZ], the chairman of the Subcommittee on Asia and Pacific; the gentleman from Pennsylvania [Mr. YATRON], the distinguished chairman of the Human Rights Subcommittee, for bringing this resolution before us. I also thank the gentleman from California [Mr. LANTOS] and the gentleman from North Carolina [Mr. ROSE] for their support. As the crisis in Tibet worsens, it is appropriate that we go on record expressing our concern.

When this resolution was initially introduced in late February the authors meant simply to commemorate the 1959 March 10th uprising in Lhasa against People's Republic of China authorities that led, in a few short days, to the deaths of some 80,000 Tibetans and to the Dalai Lama's flight to India. Initially, it was our intent to have the resolution come up under suspension and quickly dispensed with. It was not intended that 2 months later, it would be a substitute for any substantive action in response to the March 8, 1989, declaration of martial law and the subsequent carnage carried out by People's Republic of China authorities who in July called for "merciless repression." It has been reported that over the past 2 months between 800 to 1,000 Tibetans were killed during demonstrations and in their homes. Although there has been a lack of more sustantive action on the part of the Congress, I know it is no one's intent to allow for this resolution to indicate our true level of concern.

While I support the substitute that has come out of the committee I do take exception to the fact that this bill does not mention that the Dalai Lama has offered that the People's Republic of China could be responsible for Tibet's foreign affairs and for its defense and that in October 1988 he called for negotiations in Geneva starting in Jaunary of this year. After months had passed without receiving any affirmative reply from the People's Republic of China, the Dalai Lama then suggested that Hong Kong should be the venue for negotiations. Despite this initiative, People's Republic of China authorities still drag their feet even though the Dalai Lama has virtually given away the kitchen sink in an overly conciliatory approach to get to the negotiating table.

With that aside, at this point it appears we are in an endless loop where the Congress passes a resolution slapping the hand of the People's Republic of China, the People's Republic of China then express so-called outrage and the State Department, believing that we let off some steam, carries on business as usual with the People's Republic of China. However, as martial law and hostilities continue, we should not carry on as usual. And we should not be sending mixed signals from our Government to the People's Republic of China.

We have been informed that prior to and during the existing martial law period the People's Republic of China used United States supplied Sikorsky helicopters to repress the Tibetans.

Since this is an issue which should deeply concern us, I introduced legislation calling for a Presidential certification that no United States manufactured arms sold to the People's Republic of China are used in such a manner.

To this day martial law has not been lifted and his holiness the Dalai Lama still calls for negotiations and appeals to impatient and militant Tibetan youths to refrain from any violence.

As Tibetan youths observe how, on the one hand, Yasir Arafat is greeted in Europe; that Namibia is moving towards independence; that the Mujahadeen has forced the Soviet withdrawal from Afghanistan, and how, on the other hand, the concern of the United States and other Western Powers is not about the future of the Tibetan people but, rather has been concerned about not "offending" China, the conclusion they draw is all too compelling: That world opinion only responds to violence and does not respond to the Dalai Lama's voice of reason.

I ask my colleagues, why does our Nation find it so difficult to concern ourselves with Tibetan and Chinese human rights when we have a blueprint with the manner in which we addressed human rights violations in the U.S.S.R.?

Perhaps the New York Times writer, Abe Rosenthal, put it best recently when he queried:

> Why has the United States for decades shown sympathy for the captive nations of Eastern Europe but kept silent on Tibetan struggles against the Chinese empire? Why do we turn our back on the Tibetan fighters we once encouraged and trained?
>
> Can we use again the combination of plain talk and economic penalties and rewards that have worked elsewhere—this time to get justice for the Tibetans. Why not use our economic influence to make Beijing understand that arming terrorist nations has price as well as profit?
>
> And finally: If the United States speaks out strongly for the marchers in the street, directly and publicly from the White House to the Forbidden City, will we not be more worthy in the eyes of the Chinese people and in our own?

Accordingly, while I support and urge the adoption of the resolution before us. I don't believe that it adequately and appropriately addresses the problem. I, therefore, invite my colleagues to join with me in H.R. 2002 in calling for a Presidential certification that would restrict United States military equipment being used to repress Tibetans. Such an initiative represents a very modest start in the proper direction.

I thank the gentleman for yielding time to me.

Mr. BROOMFIELD. Mr. Speaker, I reserve the balance of my time.

Mr. SOLARZ. Mr. Speaker, I yield 4 minutes to the gentleman from Pennsylvania [Mr. YATRON].

I do not think a resolution on human rights has come to this floor in the last several years without the strong support of the gentleman from Pennsylvania [Mr. YATRON], the very distinguished chairman of the Subcommittee on Human Rights and International Organizations.

Mr. YATRON. Mr. Speaker, I strongly support House Concurrent Resolution 63 as amended which is before the House today. I would first like to commend Mr. ROSE, Mr. LANTOS, and Mr. GILMAN for their sponsorship of this resolution. I also want to commend Mr. SOLARZ and Mr. BEREUTER for their contributions in crafting a bipartisan substitute. Finally, I would like to thank Chairman FASCELL and Mr. BROOMFIELD for their support for the resolution.

This resolution condemns the continued human rights violations against Tibetans in the People's Republic of China and the imposition of martial law in Tibet. By passing this resolution, the House will demonstrate its concern over human rights violations in Tibet and the efforts of the Dalai Lama to establish a dialog with the People's Republic of China's Government to seek a peaceful solution to the situation in Tibet.

Recently, the human rights environment in Tibet has deteriorated with the fierce clamp down on Tibetan demonstrators in early March, which left an estimated 30 to 60 people dead. From all reports, these demonstrators were nonviolent in the call for greater freedom. Martial law was declared in Lhasa on March 8, making it difficult, at best, to hear the voice of the Tibetan people. Since martial law was imposed, reports indicate that there have been numerous cases of arbitrary arrest and torture.

Mr. Speaker, this resolution serves to continue to impress upon the Chinese Government our growing concern for basic human rights in China. This resolution condemns the use of excessive and lethal force by the Chinese authorities in Tibet, urges the Government to exercise restraint, to lift mar-

tial law in Lhasa, and to allow human rights organizations access to prisons in Tibet. The proposed legislation also urges the President to continue to make the People's Republic of China's human rights record an important element in our relations, calls on the Secretary of State to focus attention on human rights violations in Tibet, and lastly to support a constructive dialog between the People's Republic of China and the Dalai Lama to find a peaceful resolution.

Mr. Speaker, the People's Republic of China has endorsed the Universal Declaration of Human Rights, which clearly states that all people are entitled to basic rights and freedoms set forth in the declaration without discrimination of any kind, including race, religion, political opinion, or national or social origin. Unfortunately, the People's Republic of China has yet to adhere to all the tenets of the declaration. Until that time, we need to continue to call attention to the plight of the Tibetan people.

Mr. Speaker, I strongly urge our colleagues to support House Concurrent Resolution 63.

□ 1330

Mr. SOLARZ. Mr. Speaker, I yield such time as she may consume to the gentlewoman from California [Ms. PELOSI].

Ms. PELOSI. Mr. Speaker, I thank my colleague for yielding me this time.

Mr. Speaker, I rise today in support of House Concurrent Resolution 63 which condemns human rights violations by Chinese authorities in Tibet.

I commend the members of the Foreign Affairs Committee, the chairman, the gentleman from Florida [Mr. FASCELL], the gentleman from New York [Mr. SOLARZ], the gentleman from North Carolina [Mr. ROSE], the gentleman from Pennsylvania [Mr. YATRON], the gentleman from New York [Mr. GILMAN], the gentleman from Nebraska [Mr. BEREUTER], and the others, for their leadership on this issue and their work on this resolution.

The historical struggle for Tibetan independence has intensified. Calls for autonomy have been met with severe repression by the Chinese. Press reports of official violence against Tibetans have contributed to increased global recognition of the problem and have prompted Chinese authorities to restrict press access to Tibet.

We must not allow human rights violations to continue. The policy of massive resettlement must be recognized as a deliberate attempt to dilute Tibetan cultural autonomy and the deployment of 300,000 Chinese troops in Tibet must be seen as an attempt to stifle it. We must also call for an end of policies which have resulted in massive environmental degradation of the Tibetan countryside.

Mr. Speaker, this is a critical time for the Tibetan people. We must redouble our efforts to ensure that Tibetan culture is protected. I urge my colleagues to support this resolution.

Mr. BROOMFIELD. Mr. Speaker, I yield such time as he may consume to the gentleman from Nebraska [Mr. BEREUTER], the ranking member of the Subcommittee on Human Rights and International Organizations, who reported this bill out.

Mr. BEREUTER. Mr. Speaker, I thank the distinguished gentleman from Michigan for yielding me this time.

Mr. Speaker, Tibet is one of those areas of the globe that, because it is so inaccessible and because it is a closed society, often escapes world attention. But the clampdown on basic human and political rights of Tibetans by the People's Republic of China should not go unnoticed. It is unacceptable conduct for nations to subject their citizens to arbitrary arrests, to restrictions on the practice of religion, and to systematic discrimination. It is unacceptable conduct for any nation to break up peaceful protests by firing indiscriminately into a crowd. These apparent practices on the part of the People's Republic of China in Tibet deserve to be condemned, and this legislation does just that.

The Chinese already are aware of our concern. We passed legislation in 1987 stating that the People's Republic of China should "respect internationally recognized human rights and end human rights violations against Tibetans." The legislation we are now considering reaffirms our previous commitment, and makes it clear that the United States does not condone the repressive measures by the People's Republic of China in Tibet.

Mr. Speaker, in so many ways the People's Republic of China has made remarkable progress in the area of human rights in recent years. This progress makes Chinese behavior toward Tibetans all the more regrettable. I would hope Beijing is listening to this plea for basic rights.

I would urge a favorable report on this legislation.

Mr. SOLARZ. Mr. Speaker, I yield 3 minutes to the gentleman from North Carolina [Mr. ROSE], the author of the original resolution and a great champion of the cause of human rights in Tibet.

Mr. ROSE. Mr. Speaker, I want to thank the eloquent chairman of the subcommittee, the gentleman from New York [Mr. SOLARZ] for allowing me this time.

I want to thank the full chairman of the committee, the gentleman from Florida [Mr. FASCELL] and all the members of the Foreign Affairs Committee that have unanimously supported this legislation and for permitting me to say a few words here today about the current situation in Tibet.

Mr. Speaker, Amnesty International has issued many reports about the situation in Tibet. The latest was issued several months ago. We cannot be totally sure today as to just what the situation is in this far-off country, but we do know that martial law has been imposed. We do know that the situation in Tibet is vastly different from the situation in Beijing, as the subcommittee chairman reported, where thousands and thousands of students are peacefully demonstrating for democratic reforms in all of China.

The great contrast here shows how the Chinese people regard the citizens of Tibet. The government's resolute violent and riot-inciting actions against a small group of Tibetan lay people, monks, and nuns, conducting peaceful protests against China's illegal occupation of Tibet, in stark contrast with the Chinese restraint that has been shown to us on worldwide television in the square in Beijing.

This contrast serves as testimony to the racist and the colonial instincts of the Chinese occupation forces in Tibet. Chinese Government attitudes and actions remain a real and constant threat to the survival of this ancient and peaceful Tibetan culture.

Mr. Speaker, it is time that we quit treating China as a diplomatic darling, as a special child that is immune to the fundamental standards of decency that we apply to other countries. This administration and this Congress should, and must, commit ourselves to the formulation of a human rights policy toward China if we are serious about fundamental human rights and democratic freedoms and if we are to gain the respect of the People's Republic of China.

Mr. Speaker, the Dalai Lama has become a friend of many of us in this body, having visited here several times since the late 1970's. He does not seek to be a political leader in Tibet and even recently was reported in one newspaper that he would resign all of his responsibilities in that regard. What he seeks is the peaceful return of life in Tibet as it existed before the Chinese occupation and revolution.

Mr. Speaker, China's actions should be watched carefully in Tibet.

Mr. Speaker, I want to thank you and your colleagues on the House Foreign Affairs Committee for your work and unanimous support of this legislation and for permitting Members of Congress the opportunity to speak about the current situation in Tibet.

Mr. Speaker, on March 5 of this year, Chinese authorities stationed in Tibet again violently repressed peaceful, prodemocracy demonstrations in the Tibetan capital of Lhasa. During the ensuing violence, hundreds, and perhaps as many as 1,000 Tibetans, were killed by Chinese soldiers using automatic weapons. Foreign tourists and the press were

forcibly removed from Tibet. The Tibetan section of the city was cordoned off by Chinese militia and thrown under martial law. Today, Lhasa, a city which only 30 years ago was a Tibetan city, remains under a Chinese Government imposed martial law. Lhasa remains closed to the outside world.

Although the Western World cannot be certain about the present situation in Tibet, I would like to share with my colleagues a few passages from an urgent action appeal issue on March 8, 1989, by Amnesty International:

The decree of martial law, which came into effect at midnight on 7 March, empowers police soldiers to take all necessary measures to put down disturbances. "[Security forces] can detain troublemakers on the spot and take action against anyone who resists arrest," the official New China News Agency reported.

Under martial law all demonstrations, public gatherings and strikes are banned, everyone must carry identity papers, police checkpoints have been set up and access to the centre of the city [the Tibetan quarter] has been restricted.

Amnesty International is concerned that, following the imposition of martial law in the Tibetan capital of Lhasa, large-scale arbitrary arrests may be carried out and that those detained, particularly those suspected of active participation in the recent demonstrations, face the risk of torture and long periods of incommunicado detention without charge. Amnesty International is also concerned that, in the present climate of extreme tension and violence, the broad powers given to Chinese troops under martial law may facilitate reprisal actions against people suspected of involvement in the recent protests or pro-independence activities, and possibly result in summary executions.

Mr. Chairman, the Chinese Government's resolute, violent, and riot-inciting actions used against a small group of Tibetan lay people, monks, and nuns conducting a peaceful protest against China's illegal occupation of Tibet are in stark contrast with the Chinese Government's restraint in dealing with the hundreds of thousands of Chinese students and workers demonstrating for democratic reforms. This contrast serves as testimony to the racist and colonial instincts of the Chinese occupation forces in Tibet. Chinese Government attitudes and actions remain a real and constant threat to the survival of the ancient and peaceful Tibetan culture.

In closing, I commend His Holiness the Dalai Lama, the simple Buddhist monk that all Tibetans recognize as their leader, for his active pursuit of a peaceful resolution of the 40-year-old conflict in Tibet. On several occasions, including an event here on Capitol Hill, the Dalai Lama has extended the offer of substantive negotiations with the Chinese on the future status of Tibet. The Dalai Lama's efforts have been supported by the Congress and other Parliaments around the world. However, his offers to initiate talk continue to be rejected by a Chinese Government that wishes to portray the issue of Tibet as an internal affair of China and as a personal problem between the Dalai Lama and the leaders of the People's Republic of China.

Such arguments have not been acceptable to this administration, and previous administrations, when challenging the leadership of the Soviet Union on human rights abuses in that country. Such arguments, and warnings, should not be acceptable to our Government in dealing with China. This year, the People's Republic of China is 40 years old. Although I commend the strong relationship that the United States has nurtured with the People's Republic of China over the past 10 years, it is time that we quit treating this diplomatic darling as a special child that is immune to the fundamental standards of decency that we apply to other countries. This administration and this Congress should, and must, commit ourselves to the formulation of a human rights policy toward China if we are serious about fundamental human rights and democratic freedoms and if we are to gain the respect of the Government of the People's Republic of China.

Mr. BROOMFIELD. Mr. Speaker, I yield 3 minutes to the gentleman from California [Mr. LAGOMARSINO].

Mr. LAGOMARSINO. Mr. Speaker, I rise in support of House Concurrent Resolution 63 which commends the 30th anniversary of the Tibetan national uprising and expresses the concern of Congress regarding human rights abuses in Tibet.

I am very concerned about the continued use of excessive and lethal force by the People's Republic of China against Tibetans participating in peaceful expressions of will. As short a time ago as March the People's Republic of China brutally crushed a peaceful march in Lhasa, the capital of Tibet, leaving a reported 30 to 60 persons dead and hundreds more injured. Foreigners, including the Western press, were firmly expelled from the Province.

I am encouraged by the current ongoing peaceful demonstrations for greater democracy happening in Bejing today, as we speak. Thus far, the People's Republic of China Government has shown maturity and restraint in this situation. I hope such responsible and reasonable attitudes continue to prevail and that real political change—greater democracy, real respect for human rights and freedoms—quickly happens. This resolution urges the People's Republic of China Government to follow the same course in Tibet. Tibetans, too, deserve respect for their fundamental human rights. The People's Republic of China should reassess its policy and exercise restraint in its future dealings with peaceful demonstrators. Clearly, martial law in Lhasa should be lifted and free access given to foreign journalists. This resolution also urges the People's Republic of China to allow international human rights monitors to access prisons in Tibet. If there is a new era of positive reform and change in China, it must also be experienced in Tibet.

There are many ways to improve the situation in Tibet. This resolution, which also marks the 30th anniversary of the Communist seizure of Tibet, suggests some of them. I am encouraged that we have not forgotten the discrimination and suffering inflicted on the Tibetan people. Clearly Tibet is special with a distinct ethnic group. It should be treated as such. The People's Republic of China, over the past 30 years has treated Tibet differently—it has treated Tibet worse and has tried to forceably erase the unique Tibetan culture and heritage. The People's Republic of China must recognize this fact, not try to eradicate it. If the People's Republic of China wants us, the residents of Hong Kong, the Republic of China, and others to believe that a "one China, two systems" policy can work, and that the People's Republic of China will seriously adhere to it, the People's Republic of China can start today by reforming its policy toward Tibet. Actions speak much louder than words. Providing Tibet with the freedom and real autonomy it deserves would send a positive signal for the future.

I urge my colleagues to join me in supporting this resolution.

□ 1340

Mr. SOLARZ. Mr. Speaker, there has been no stauncher advocate in behalf of the Tibetan people and the cause of human rights in Tibet than the gentleman from California [Mr. LANTOS], and I yield 3 minutes to the gentleman from California [Mr. LANTOS].

Mr. LANTOS. Mr. Speaker, I thank my friend and colleague, the gentleman from New York, for yielding me this time.

Mr. Speaker, I want to pay tribute to all of my colleagues on both sides of the aisle who played such a key role in bringing this matter before the House.

The Tibetan people have no lobby. The Tibetan people have no political action committee. The only thing that the Tibetan people have is a just cause. That just cause is one of begging, pleading, to be able to live according to their cultural and religious traditions.

When the Congressional Human Rights Caucus invited His Holiness the Dalai Lama to address us some time ago, he extended the hand of peace to the government in Beijing. He pleaded with the authorities of Beijing to sit down and peacefully negotiate a modus vivendi so the people of Tibet will be able to live according to their ancient traditions.

Mr. Speaker, it is one of the tragedies of recent Chinese foreign policy that while along so many lines the Chinese have shown flexibility, statesmanship, and vision, in their dealing with Tibet and the Tibetan people they have shown nothing but contempt, rigidity, racism, and a pattern of noncooperation. It is the ultimate irony that today Mr. Gorbachev has to

sneak into the grand palace by a side door because the Chinese authorities do not wish to use force against the thousands of students and others who are demonstrating for human rights at the main square of Beijing, while in Lhasa in Tibet the Chinese have not the slightest hesitation in using the most brutal methods in oppressing Tibetan monks, children, women, and others in a contest which is really a very cruel contest, a contest of those who are many who have the weapons who are powerful, and the unarmed, peace-loving Tibetan people.

Our Chinese friends in Beijing must understand that this issue will not go away. This issue will not go away because it is a moral issue. It is the issue of the rightness and the justice of the Tibetan cause, the right of the Tibetan people to live according to their own traditions.

House Concurrent Resolution 62 underscores the commitment of the Congress to preserving and protecting the right of the people of Tibet.

Mr. BROOMFIELD. Mr. Speaker, I yield 3 minutes to the cochairman on the Republican side of the Human Rights Caucus, the gentleman from Illinois [Mr. PORTER].

Mr. PORTER. Mr. Speaker, I strongly support House Concurrent Resolution 63 and commend our colleagues, the gentleman from North Carolina [Mr. ROSE], the gentleman from New York, and the cochairman of the Congressional Human Rights Caucus, the gentleman from California, for their efforts on behalf of the Tibetan people. This resolution clearly outlines my concerns and suggests constructive action that the Chinese and our own Government and international organizations can take to resolve the acute problems facing the people of Tibet.

Since the Chinese violent occupation of Tibet in 1951, the Tibetans have suffered ongoing human rights violations, including torture, arbitrary arrest and detention, religious persecution, the use of excessive force against peaceful demonstrators, and a systematic pattern of discrimination. Respectable human rights organizations such as Amnesty International and Asia Watch, as well as firsthand accounts from foreign travelers and Tibetan refugees, describe an appalling situation that I fear may lead to the complete annihilation of the Tibetan people. Reports indicate that over 1 million Tibetans have died as a direct result of the military occupation and related Chinese policies.

In 1959, the Dalai Lama and 85,000 of this followers were forced to flee across the Himalayas into surrounding regions. Thousands of Tibetans died trying to escape. Thirty years later, Tibetans continue to be killed and abused at the hands of Chinese authorities.

On March 8, 2 days before the 30th anniversary of the Tibetan uprising, China declared martial law in Lhasa and surrounding areas, and expelled all foreign visitors and journalists from the region. A few days earlier, Tibetans had begun peaceful, unarmed demonstrations demanding an end to oppressive Chinese rule. The marchers were met by Chinese authorities using firearms, tear gas, wooden and iron clubs with protruding nails, and electric cattle prods used as torture instruments while interrogating detainees. According to an April 13, New York Times report, over 100 Tibetans were killed and many others unjustly arrested.

Mr. Speaker, we can not sit idly by while China continues to use strong arm oppressive tactics to quash the free will of Tibet's peaceful citizens. The Chinese treatment of the Tibetan people and other religious minorities must be remembered as United States policy toward China evolves. United States economic and political cooperation with China, as well as continued arms sales all hinge on China's willingness to respect international human rights standards. I urge my colleagues to vote for this resolution.

Mr. SOLARZ. Mr. Speaker, to sum up the case for the majority on this resolution, I yield my 1 remaining minute to the gentleman from Michigan [Mr. LEVIN].

Mr. LEVIN of Michigan. Mr. Speaker, it is a privilege to join my distinguished colleagues on both sides of the aisle supporting this resolution. It expresses our feelings about the universality of human rights. They apply everywhere, even in very distant-fromhere Tibet.

Tibet is a fragile society. It would not take very much longer for it to be eradicated by the Chinese. It is also a nonviolent society. It is not equipped by experience or tradition to defend itself by using arms.

If peaceful negotiations apply anywhere in this world, if they make sense where there is any difference, it is in Tibet. So may we send off this resolution for others to see hoping that it will be a step in the direction of peace, not violence.

A tranquil society deserves its full human rights.

Mr. BROOMFIELD. Mr. Speaker, I yield 2 minutes to the gentleman from Pennsylvania [Mr. GEKAS].

Mr. GEKAS. Mr. Speaker, the American people rightfully over the years sometimes question the wisdom in the Congress of the United States in undertaking resolutions such as this. They ask: What do they mean? How can they help? Of what value are they?

Mr. Speaker, we have seen time and time again that a resolution calling for freedom for a people, the cry of freedom that emanates from this floor does reach oppressed people across the world. Ask the workers in Poland, ask the intellectuals in the Soviet Union, ask the students in China, ask anyone in world history about what happens on the floor of the Congress of the United States, and they will tell you that there is always a signal for freedom.

Mr. Speaker, this goes back to the First Congress of the United States in 1789 and has not ceased since.

□ 1350

As a matter of fact, history credits the House of Representatives of the Congress of the United States in the mid-19th century, in the 1820's, for the overthrow of the Ottoman Empire. Why? Because Members of the House then in 1820, 1822, and 1824, stood where we are standing today and sought out world opinion on questions of freedom.

So we do not take lightly the action that we undertake here today. The people of Tibet deserve our sympathy, our help, our support, our joining them in their cry for freedom.

Mr. CONTE. Mr. Speaker, I rise today in strong support of House Concurrent Resolution 63, which commemorates the 30th anniversary of the Tibetan uprising against Chinese rule.

Tibet is far away, and its 30-year torment has gone almost unnoticed. Yet its people have undergone a kind of suffering too common in this century: They have been the victims of a conscious attempt to destroy their unique culture and religious faith.

In 1959, the Dalai Lama fled Tibet after Mao's promises of autonomy and respect for Tibetan rights proved false. In the next decade, during China's Cultural Revolution, Tibet's temples were destroyed, and its monks imprisoned. Thousands of Tibetans died in prison for their faith and their resistance to Communist rule. And even now, as the Government of the People's Republic of China has moderated its ideology, Tibetans continue to suffer. Their protests have been bloodily suppressed, and their attempts to negotiate have been rebuffed.

The situation in Tibet, however, is not hopeless—the actions of Tibetans at home, and of the Tibetan community in exile are testimony to Tibet's continued hope for justice. The Dalai Lama's 5-point plan can provide a basis for negotiations and the peaceful resolution for which Tibetans pray. Let us hope that the Government of China, now engaged in rebuilding its relationship with the Soviet Union and with the West, can work with him to rebuild its relationship with a people who have suffered too long.

We in the Congresss must do whatever we can to call attention to Tibet's struggle, and to support those who continue to hope and work to restore Tibetans their rights. This resolution is a firm statement of our support for decency and human rights around the world, and I hope all our Members will support it.

Mr. SOLOMON. Mr. Speaker, I have joined in sponsoring this resolution because its mes-

sage is important and must be heard by the leadership of the People's Republic of China, no matter now much it may resist listening.

Events taking place in the People's Republic of China present that government's leadership with clear evidence that the prospect of real change is now challenging it, no longer just economically, but politically as well. I believe that, to a certain extent, that leadership is to be commended for its response so far to the demonstrations by students, journalists, and workers in Beijing. The message embodied in this resolution, however, is that the underlying challenge it faces is to truly change its attitudes and policies, not just toward the issue of political democracy, but in its treatment of the non-Chinese people under its control, particularly in its actions against the great nation of Tibet.

It is noteworthy that in both the case of the present demonstrations in Beijing and the March demonstrations in Lhasa, the Tibetan capital, the harsh threats made by the government against those outbursts did nothing more than provoke greater participation in them. This has indeed been a true failure for the People's Republic of China's leadership, and in Tibet, this approach led directly to the terrible government-sponsored violence and killings that aroused the great concern of the rest of the world. The challenge to the People's Republic of China's leaders now is to understand and accept this failure and to undertake a more enlightened approach. In the case of Tibet, such an enlightened change would follow the outline of this resolution, namely an end to the repression of the Tibetan people's cultural and political rights, the lifting of martial law in Tibet, the opening of Tibetan prisons to international inspection and, above all, the opening of sincere discussions with the Dalai Lama, leader of the Tibetan people, toward a constructive agreement on Tibet's future.

Mr. Speaker, in closing I want to state that the United States would welcome a new relationship with a People's Republic of China that is truly progressive, democratic, and respectful of the rights of the nations within its governance. The People's Republic of China should understand that the challenge it faces in dealing with its own peoples is also a challenge it faces in its relations with the free world. The American Government's respect for the leadership of the People's Republic of China would certainly be enhanced should it meet this challenge in a positive way. I hope that the Government of the People's Republic of China will see that such a new approach would not only lead to a better life for the people of China and the people of Tibet, but to a new and dramatically improved relationship with the United States and the other leading nations of the world.

Mr. BROOMFIELD. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

The SPEAKER pro tempore (Mr. BUSTAMANTE). The question is on the motion offered by the gentleman from New York [Mr. SOLARZ] that the House suspend the rules and agree to the concurrent resolution, House Concurrent Resolution 63, as amended.

The question was taken.

Mr. SOLARZ. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to the provisions of clause 5 of rule I and the Chair's prior announcement, further proceedings on this motion will be postponed.

GENERAL LEAVE

Mr. SOLARZ. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on House Concurrent Resolution 63, the concurrent resolution just considered.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

SUNDRY MESSAGES FROM THE PRESIDENT

Sundry messages in writing from the President of the United States was communicated to the House by Mr. Kalbaugh, one of his secretaries.

PROHIBITING U.S. CONTRIBUTIONS TO THE UNITED NATIONS UNDER CERTAIN CONDITIONS

Mr. YATRON. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 2145) to prohibit United States contributions to the United Nations or any of its affiliated organizations if full membership as a state is granted to any organization or group that does not have the internationally recognized attributes of statehood, as amended.

The Clerk read as follows:

H.R. 2145

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. POLICY OF THE UNITED STATES CONCERNING MEMBERSHIP AS A STATE OF THE PALESTINE LIBERATION ORGANIZATION IN THE WORLD HEALTH ORGANIZATION, THE UNITED NATIONS, ANY SPECIALIZED AGENCY OF THE UNITED NATIONS, OR ANY ORGANIZATION AFFILIATED WITH THE UNITED NATIONS.

It is the policy of the United States to oppose the admission to membership as a state of the Palestine Liberation Organization in the World Health Organization (WHO), the United Nations, any specialized agency of the United Nations, or any organization affiliated with the United Nations.

SEC. 2. WITHHOLDING CONTRIBUTIONS TO CERTAIN ORGANIZATIONS OF WHICH THE PALESTINE LIBERATION ORGANIZATION IS A MEMBER STATE.

The President shall withhold assessed and voluntary contributions to the United Nations, any specialized agency of the United Nations, or any organization affiliated with the United Nations, if that agency or organization admits as a member state the Palestine Liberation Organization.

SEC. 3 AUTHORITY TO WITHHOLD CONTRIBUTIONS TO CERTAIN ORGANIZATIONS WHICH ADMIT AS A MEMBER STATE ANY ENTITY WITHOUT THE INTERNATIONALLY-RECOGNIZED ATTRIBUTES OF STATEHOOD.

The President is authorized to withhold assessed and voluntary contributions to the United Nations, any specialized agency of the United Nations, or any organization affiliated with the United Nations, if that agency or organization admits as a member state any organization, group, or other entity which the President determines does not have the internationally-recognized attributes of statehood.

SEC. 4. USE OF FUNDS.

(a) TRANSFER OR REPROGRAMMING.—Funds withheld pursuant to section 2 or 3 are authorized to remain available until expended and may be reprogrammed or transferred to any other account of the Department of State or the Agency for International Development to carry out the general purposes for which such funds were appropriated. Any transfer under this section shall be treated as a reprogramming for purposes of section 34 of the State Department Basic Authorities Act of 1956 (22 U.S.C. 2706).

(b) LIMITATION OF TRANSFER AUTHORITY.—The transfer authority contained in subsection (a) may be exercised only to such extent and in such amounts as are provided in advance in appropriation Acts.

SEC. 5. PAN AMERICAN HEALTH ORGANIZATION.

For the purposes of this Act, the Pan American Health Organization shall not be considered an affiliate of the World Health Organization or an organization affiliated with the United Nations.

The SPEAKER pro tempore. Is a second demanded?

Mr. BROOMFIELD. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from Pennsylvania [Mr. YATRON] will be recognized for 20 minutes, and the gentleman from Michigan [Mr. BROOMFIELD] will be recognized for 20 minutes.

The Chair recognizes the gentleman from Pennsylvania [Mr. YATRON].

Mr. YATRON. Mr. Speaker, I yield such time as he may consume to the gentleman from Florida [Mr. FASCELL], chairman of the Foreign Affairs Committee, who has been a leader in advancing U.S. interests in the United Nations system for many years.

Mr. FASCELL. Mr. Speaker, I thank the distinguished chairman of the Subcommittee on Human Rights and International Organizations for yielding time to me and express my appreciation to him for acting rapidly on this bill. I also extend my commendation to the original sponsor, the gentleman from California [Mr. LANTOS] for his work in bringing this important piece of legislation to the floor.

Mr. Speaker, I rise in strong support of this bill. It has already achieved its immediate purpose because last week, by a decisive vote, the World Health

Organization deferred action on the PLO application.

This bill has already achieved its immediate purpose. Last week by a decisive vote of 83 to 47 with 20 abstaining the World Health Assembly deferred action on the PLO's application for membership in the World Health Organization.

Along with a strong warning from the Secretary of State and actions taken in the other body, this bill has sent a powerful message reflecting American agreement across the political spectrum and between the branches of government that the PLO must not be admitted as a member of the World Health Organization. That message was heard clearly in Geneva and, judging by the size of the vote, in a host of capitals as well.

I want to commend the gentleman from California [Mr. LANTOS] for his leadership on this issue. I want to also express my appreciation to the chairman of the Subcommittee on Human Rights and International Organizations [Mr. YATRON] for acting rapidly on this timely bill. The unanimous support of his subcommittee for the bill served as a timely notice to the member states of the World Health Organization of the high stakes involved for the work of that important organization if they allow it to become politicized through admitting to membership a group having none of the characteristics of a state recognized by international law.

Mr. Speaker, I take no great pride in supporting legislation which would cut off funding to the World Health Organization or any other U.N. agency if they admit the PLO as a member. I am a supporter of international organizations. With all their warts, and there are many, we need globally agreed upon policies and programs to meet global problems.

We live on a planet where increasingly our fortunes and our very lives are increasingly interdependent. We need outstanding agencies like the WHO to combat the scourage of disease. But if we are to have effective programs the nations of the world must learn where to draw the line on politics. Politics under the U.N. system is supposed to be the subject of debate at the United Nations in New York and not in the technical agencies.

Those with narrow agendas, such as the PLO, will use every opportunity to advance their cause or simply to cause mischief. The members of the world community must not permit the shortsighted few to endanger the painstaking work of many statesmen over decades to build a credible set of international instruments for global cooperation. These instruments may yet prove crucial for our survival. Any group aspiring to present themselves as a state ought to be able to recognize the stake of those they claim to represent in the organizations their narrow ambitions could mortally harm.

Fortunately the United States was not alone in recognizing what was really at stake in the PLO's spurious application for WHO membership. Many other countries raised their voices and cast their votes in support not only of the WHO but of the whole web of international cooperation it has been so hard to build and would be so easy to disrupt. I am heartened that in this instance, at least, that the world community has taken a sane and sensible action.

Mr. Speaker, I would also like to take this opportunity to commend the President, the Secretary of State, the Assistant Secretary for International Organizations, and our Ambassador at the United Nations and all others in the Government here in Washington and around the world who worked so hard to assure a successful outcome of this issue in the World Health Organization.

Since we do not have a report on H.R. 2145, I wanted to take a few minutes to explain the intent of the committee in considering this bill and its sections.

Section 1 simply states that it is the policy of the United States to oppose membership as a state of the PLO in any organization or body affiliated with the United Nations.

Section 2 says that the President shall withhold assessed and voluntary contributions to the United Nations any specialized agency or any organization affiliated with the United Nations if that agency or organization admits the PLO as a member state.

Section 3 gives broad authority to the President to withhold contributions to certain organizations which admit as a member state any entity without the internationally recognized attributes of statehood. Withholding would occur only if the President determines that an entity admitted as a state does not have the attributes of statehood. The President is not required to make such a determination. This section gives the President discretionary authority in cases other than the PLO.

Section 4 refers to the use of funds. In subsection A, the law provides guidelines for the use of funds withheld and says that they are to remain available until expended and may be reprogrammed or transferred to any other account of the Department of State or the Agency for International Development to carry out the general purposes for which such funds are appropriated. Subsection B provides for a limit of transfer authority and says it can be exercised only to the extent and in such amounts as are provided in advance in appropriations acts.

The intent of section 4 is to introduce flexibility in allocating monies if it becomes necessary for the United States to withhold funds. If we are forced to cut funding, our hope and expectation is that those funds would be used for purposes which the organization itself seeks to achieve. If funds would have had to be withheld from WHO—fortunately they do not since the WHO Assembly voted down the PLO's application for membership—those funds should be used for purposes for which the organization seeks to accomplish. The WHO manages an important program to combat AIDS and if PLO had become a member state, our intent would have been that U.S. withholdings would be allocated to some kind of international AIDS prevention program. Similarly, if the United States would withhold funds from one agency because the PLO were abated, those could also be available for use to pay other international organizations to which the United States can give assessed and voluntary contributions.

Mr. YATRON. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in strong support of H.R. 2145 as amended, a bill to prohibit United States contributions to any international organization which grants the Palestine Liberation Organization statehood status. The legislation also authorizes the Secretary of State to withhold assessed or voluntary contributions to the United Nations or any specialized agency which admits as a member an entity which does not possess the internationally-recognized attributes of a State.

Mr. Speaker, on April 6, the PLO's representative in Geneva transmitted a letter from Yasser Arafat, to the Director General of the World Health Organization, Dr. Nakajima, applying for statehood status. This application led to a flurry of congressional and administration actions designed to thwart the PLO's ill-advised initiative.

Upon learning of the application, Congressmen GILMAN, BEREUTER, SMITH of Florida and I sent a letter of protest to the World Health Organization. Secretary Baker issued a statement that the United States vigorously opposed the PLO's admission as a member to the World Health Organization and further recommended that there be no further contributions—assessed or voluntary—to any international organization which makes a change in the PLO's status. Working in concert with the Department of State, the Subcommittee on Human Rights and International organizations, which I chair, held a hearing on the PLO statehood campaign and unanimously reported out the legislation we are considering today.

The PLO statehood drive at the WHO and other international organizations is ill-conceived for a number of reasons. First, under international law, the PLO does not meet the qualifica-

tions of a State. It is not a government and it does not exert governmental control over any territory.

Second, this initiative would seriously undermine efforts to achieve a comprehensive peace in the Middle East. President Bush and Secretary Baker have boldly maintained the new dialog with the PLO in the hope of establishing a negotiating process. The PLO's statehood campaign jeopardizes this policy and is totally incompatible with diplomatic norms and procedures.

Third, in his communication to the WHO, Arafat's letterhead includes the entire State of Israel as being the State of Palestine. This flies in the face of Arafat's recent comments in Paris declaring the PLO charter inoperative, as well as his call for a Palestinian state along side Israel within its pre-1987 borders.

Mr. Speaker, Secretary Baker should be commended for the outstanding leadership he has provided in making it clear to the international community that the United States-Palestine Liberation Organization dialog should not be viewed as a diplomatic umbrella to justify the PLO's statehood campaign.

Congressman BEN GILMAN and I had the pleasure of meeting with Dr. Nakajima prior to the General Assembly meeting which started last week. Dr. Nakajima is a sincere man who heads an organization which has been at the forefront in promoting public health programs which have saved the lives of millions of children. Our problem is not with Dr. Nakajima. It is with the member states of that organization which are supporting the PLO campaign.

Mr. Speaker, as a result of the consideration of H.R. 2145 and the combined efforts of the Foreign Affairs Committee, Secretary Baker, and an effective United States delegation led by Assistant Secretary of State John Bolton, the PLO's application was rejected on Friday by a secret ballot vote of 83 to 47 with 20 abstentions.

While we succeeded at the World Health Organization, it is extremely important to note that the PLO has expressed its intention to apply for statehood at other specialized agencies including UNESCO. The passage of this bill would considerably strengthen the administration's hand in convincing the international community that giving in to the PLO's demands would only undermine the fine work of the United Nations and its specialized agencies. This bill is completely compatible with administration policy and sends a strong message that the Congress and the executive branch are united on a very important foreign policy issue.

Mr. Speaker, I would like to commend Congressman BEREUTER, the ranking minority member of the subcommittee for his leadership in working with me to bring this legislation to the floor. I also want to commend Chairman DYMALLY and Congresswoman SNOWE for expeditiously moving on this legislation and the sponsors of the bill, Congressman LANTOS and Congressman GILMAN for energizing the Congress to act on this timely initiative. Finally, I would like to commend the chairman of the Foreign Affairs Committee, Congressman FASCELL and the ranking minority member, Congressman BROOMFIELD for their expeditious consideration of the bill.

I urge my colleagues to unanimously support this legislation.

□ 1400

Mr. BROOMFIELD. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, as our colleagues are aware, last Friday, the World Health Organization, by a vote of 83 to 47, deferred until next year a decision on whether to admit the Palestine Liberation Organization as a member of the WHO.

President Bush and his administration deserve to be congratulated for the leadership they have demonstrated on this important matter. They saw the issue coming, and they took decisive action to make sure that the U.S. position was known by the PLO, the WHO and the member states of the WHO. Secretary Baker, on May 1, also made a firm statement of the U.S. opposition to PLO membership in the World Health Organization.

However, while we succeeded in Geneva with the World Health Organization this round, the issue if far from dead. The PLO has vowed to continue its compaign to gain admission into the various U.N. agencies. The PLO has already applied for membership in UNESCO, and there are a series of U.N. agency meetings coming up in the months ahead.

Thus passage of H.R. 2145, and the strong message it sends, continues to be essential. We are saying to the world that this Nation is united in its opposition to granting the PLO membership in the World Health Organization, or in any other international organization, and that the United States is prepared to act upon that conviction.

Like the application of the PLO for membership into the WHO, the PLO's application with the other technical U.N. agencies does nothing to advance the peace process in the Middle East. Further, its application forces restricted technical organizations to confront a divisive political issue that lies beyond their mandates. Issues such as this serve only to politicize the organizations, and detract from the fine work that they do.

There is ample reason to deny the PLO membership in any of the technical U.N. agencies. The PLO does not meet any of the criteria of statehood. It exercises no governmental control over any territory called Palestine or a Palestinian population.

Further, the PLO cannot perform the functions associated with statehood. For instance with the World Health Organization, the PLO has no capacity to even implement WHO resolutions for member states or to carry out WHO-promoted health programs. There is no justification to change the PLO's status from observer to member in any of the U.N. agencies.

Finally, the world should know that the Congress and the executive branch are in agreement in our opposition to PLO membership in the United Nations or in any of its related agencies.

Mr. Speaker, I yield the balance of my time to the ranking member of the subcommittee, the gentleman from Nebraska [Mr. BEREUTER].

Mr. BEREUTER. Mr. Speaker, I thank the gentleman from Michigan [Mr. BROOMFIELD] for yielding me this time.

This Member strongly supports the legislation now before us—H.R. 2145, as amended.

Let me just say at the outset that I commend the gentleman from California [Mr. LANTOS] for his energy and outstanding leadership in bringing this issue before us in such a timely manner. The gentleman from New Jersey [Mr. SMITH], the gentleman from Florida [Mr. SMITH], and the gentleman from New York [Mr. GILMAN] also deserve commendation as original cosponsors of this resolution.

I would also like to recognize the efforts of Chairman FASCELL and its ranking minority member, the gentleman from Michigan [Mr. BROOMFIELD], Mr. YATRON, Mr. DYMALLY, and Mrs. SNOWE, my colleagues on the relevant subcommittees for their efforts in expediting the consideration of the United States response to PLO efforts to enter United Nations specialized agencies such as the World Health Organization.

Finally, the administration also deserves to be commended for the capable manner in which they respond to the PLO application to the WHO. Secretary James Baker was particularly effective in communicating to the members of World Health Organization that full membership for the PLO would have serious financial consequences for that organization. There is no doubt that the PLO application was defeated by such a large margin [83–47] because of the effectiveness of our State Department and the expressed resolve of Congress on this issue. This was a truly bipartisan effort which produced significant results.

Mr. Speaker, despite the vote in the World Health Organization Assembly to defer the PLO's application for a year, the fundamental problem remains. The PLO already has applied for full membership to UNESCO, an organization where the United States exercises limited influence. In addition, the PLO observer to the United Nation has announced his intention to apply for full membership to all United Nation specialized agencies. The PLO shows no signs of backing down after its defeat at the World Health Assembly on Friday. It seems we are going to have to wage this diplomatic battle over and over.

Mr. Speaker, I am greatly concerned for the future of the U.N. specialized agencies. Generally they do good work and some like UNICEF and UNDP have excellent results. The WHO is in the forefront of the worldwide effort to combat AIDS, and is on the cutting edge of many of the world's most pressing public health problems. Had the United States been forced to eliminate assessed and voluntary contributions to WHO, a number of projects close to my heart would have suffered.

It is alarming that the U.N. technical bodies are at risk of becoming deeply, and possibly irrevocably, politicized. I would hope that our vote today can help to resolve this issue before the specialized agencies do, indeed, become politicized.

Mr. Speaker, I regret that we are forced to consider the witholding of funds. The denial of assessed and voluntary funds would deal a very severe blow to the good work of United Nations specialized agencies, and it is highly regrettable that the PLO is placing the WHO in this position. The United States has just begun a dialogue with the Palestine Liberation Organization. This resolution sends the strongest possible message that the United States will not play the PLO game at the United Nations.

Mr. Speaker, I reserve the balance of my time.

Mr. YATRON. Mr. Speaker, I yield such time as he may consume to the sponsor of the bill, the distinguished gentleman from California [Mr. LANTOS].

Mr. LANTOS. Mr. Speaker, I first would like to thank my friend and colleague for yielding.

Mr. Speaker, at the outset I would like to pay tribute first to Chairman YATRON for bringing this issue before his subcommittee so expeditiously, and to the ranking Republican, the gentleman from Nebraska [Mr. BEREUTER], my good friend, and also an original cosponsor of the legislation.

Also to the gentleman from California [Mr. DYMALLY] and the gentlewoman from Maine [Mrs. SNOWE] for expediting the legislation and also to the distinguished Republican ranking member of the full committee, the gentleman from Michigan [Mr. BROOMFIELD], and the gentleman from Florida [Mr. FASCELL], the chairman of the full committee.

Mr. Speaker, I want to express my special appreciation to Congressman GILMAN for his steadfast support of this legislation.

Mr. Speaker, this is an object lesson in how successful we can be when we work on a bipartisan basis and when we work together, the Congress and the administration.

My legislation not only enjoys broad bipartisan support, Democrats and Republicans across the entire political spectrum favor this bill; but Secretary of State Jim Baker has emphatically voiced administration support for the position as well.

I want to take the time to pay tribute to our new Secretary of State for courageously and eloquently stating the case.

Mr. Speaker, the United Nations was established about half a century ago as an international organization of sovereign states. Now it is obvious that whatever the PLO is, it is not a sovereign state. There are long-recognized international legal criteria that have clearly established what is and what is not a state.

□ 1410

There is not the slightest doubt that the PLO does not fit those criteria. It is not a legally constituted government. It is not effectively in control of territory. In fact, PLO representatives do not even reside in the territory they claim as their state. They reside in Tunis. The PLO does not govern the territory it claims, and it is clearly not sovereign on their territory.

By action, our Government has made it clear that the United States cannot and will not condone the sincere effort by the PLO to turn the United Nations and the affiliated agencies into a meaningless debating body by granting full membership as a state to any organization or group except sovereign nations fully recognized as such under international law.

The victory last week at Geneva was a major victory both for international law and for those nations that were ready to stand up to principles. Our Government has made it clear, and my legislation makes it clear that politicizing the United Nations affiliated agencies, the World Health Organization, the International Labor Organization, the Food and Agriculture Organization, or UNESCO are utterly unacceptable.

I think it is important to underscore, Mr. Speaker, that the World Health Organization makes enormously important contributions to the health of millions of people on this planet. The World Health Organization improves the quality of life in many parts of the world, particularly in less developed portions of the globe. Every year the World Health Organization helps tens of millions of children and tens of millions of adults in less developed countries.

Now the nation which has played the key role in the World Health Organization is the United States of America. We provide about one-quarter of the budget of WHO, and through our leadership in the field of medicine and public health, we have been the mainstay of the World Health Organization. I think it is extremely important that our work continue, that the activities of the World Health Organization expand rather than be curtailed.

Admitting the PLO to full membership as a state, the World Health Organization would have made a horrendous mistake, and I want to salute all of the countries that voted not to allow the WHO to become politicized. As my friend from Nebraska indicated, the battle is not over, the PLO has served notice that it will try to politicize other important affiliated organizations of the United Nations. This legislation will see to it that the member states of those affiliated organizations will know in advance that their actions will have consequences, and if they play the PLO game of allowing to become politicized puppets in an attempt to undermine the work of those useful organizations, the United States will withhold their financial contributions to those organizations.

In conclusion, Mr. Speaker, let me just suggest that the United States and their friends prevail every single time we have a bipartisan approach here in the House and the Senate, and we are able to work cooperatively with the administration. That is what happened here. This is a day of great victory for Republicans and for Democrats, for the Congress and for the administration and for the health and quality of life of hundreds of millions of people throughout the world. I want to thank all of my colleagues for their support of this legislation.

Mr. BEREUTER. Mr. Speaker, that was an excellent statement by my colleague the gentleman from California.

Mr. Speaker, I yield 5 minutes to the gentleman from New York [Mr. GILMAN], who has been very involved in activities on this issue himself.

Mr. GILMAN. Mr. Speaker, I thank the gentleman from Nebraska for yielding and for his support and I rise in strong support of H.R. 2145 and commend the gentleman from California [Mr. LANTOS], for the expeditious drafting of this important legislation and for the advocacy. Last week, under the leadership of the distinguished gentleman from Pennsylvania [Mr. YATRON] our Subcommittee on Human Rights and International Organiza-

tions held a hearing on this issue, and thereafter our Subcommittee on International Operations held a similar hearing and its chairman, the gentleman from California [Mr. DYMALLY] waived jurisdiction.

The issue of the Palestine Liberation Organization seeking membership in the United Nations specialized agencies is of grave concern to all of us who monitor developments in the Middle East.

The executive branch and the Congress have been united in opposition to the PLO joining the World Health Organization or any agency of the United Nations. Mr. Arafat must recognize that this ploy does nothing to advance the peace process.

Acceptance of the PLO as a member state would be extremely harmful to the productive work of the many agencies of the United Nations system.

Actually, the PLO's self-declared "Palestinian State" does not qualify for membership consideration. International law clearly requires that in order for an entity to be considered a nation, it must exercise effective governmental control over the population and territory it claims as its own. The PLO has neither an effective government, nor control over the territory and populations it claims.

The World Health Organization permits membership only to states. The PLO has no capacity to implement WHO resolutions addressed to member states, nor to carry out WHO-promoted health programs.

The Palestine Liberation Organization has put the World Health Organization in a compromising position. Technical specialized agencies such as the WHO should not be in the business of asserting statehood status on behalf of any organization. Issues such as this polarize and politicize organizations, reducing their credibility and effectiveness. It is far more important for the WHO to deal with such health considerations as controlling the spread of AIDS, the immunization of children, and other life and death issues than to serve as a political battleground for issues which should be more properly addressed in other forums.

Mr. Speaker, the timing of this legislation is appropriate, since other agencies of the United Nations may soon be voting on whether or not the PLO gains full state privileges.

Accordingly, Mr. Speaker, I urge the unanimous passage of H.R. 2145, so that we may send the strongest possible signal to member nations of the World Health Organization that the PLO's unilateral declaration of statehood does not deserve the encouragement and stamp of approval that full membership in the U.N. agency would represent.

Mr. YATRON. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. BEREUTER. Mr. Speaker, I yield 2 minutes to the gentleman from California [Mr. LAGOMARSINO].

Mr. LAGOMARSINO. Mr. Speaker, I rise in strong support of H.R. 2145, the bill to prohibit U.S. contributions to the United Nations if full membership as a state is granted to any organization or group that does not have the internationally recognized attributes of statehood.

This measure, which I cosponsored and which passed the Foreign Affairs Committee with only one member dissenting puts on record our opposition of admission of the PLO, as a "state," to the World Health Organization, the United Nations or any U.N. affiliate organization. Should the United Nations or one of its affiliates decide to admit the PLO, as a state, the President would be required to withhold our assessed and voluntary contributions to the organization. Already, this measure and the support it received in the Foreign Affairs Committee has been influential in prompting the WHO to delay for 1 year, consideration of the PLO's application for membership.

The PLO is not a state. It is not a sovereign government. Therefore, quite clearly and logically, it should not be a member of any U.N. organization as a "state." This move by the PLO and its allies is a crude attempt to complicate the already complex situation in the Middle East and derail current efforts to seriously and fairly address the Palestinian question and the situation in the West Bank and Gaza Strip. I believe that the PLO is unable to meet all of the principles and requirements of the U.N. charter, therefore it should not even be considered. The PLO is not the elected representative of all the Palestinian people. To upgrade the PLO to "state" status, gives Palestinian and Arab hard-liners the formal recognition they covet at the expense of Israel, serious negotiations and ultimately the Palestinian people. Upgrading the PLO will not improve the situation facing the Palestinians—it will worsen it by complicating the current dialog and peace process and increasing the chances that these efforts could fail. Clearly, allowing PLO admission as a state gives the PLO a propaganda victory but gives the Palestinian people nothing but further trouble. Palestinian statehood is something for the principals in the Middle East, including Israel, to decide—not the United Nations

This measure does not bar the PLO from participating in the United Nations and its affiliates. While I do not support the PLO's status as an "observer" in the United Nations, it was granted observer credentials through a democratic process in the General Assembly and does participate in the United Nations and its associated organizations. While primarily focusing on the PLO, this measure would also correctly apply to the Marxist SWAPO and is justifiable for similar reasons.

We should not pay for PLO deceptions and obstacles to peace. Therefore, this bill correctly requires the United States to withhold contributions to any U.N. organization that admits the PLO as a state. This is not a U.N. bashing measure. By allowing the transfer of any withheld funds to our own Agency for International Development and the State Department, we would continue our commitment to development and fighting poverty—we would continue to support the principles of the United Nations and its organizations without becoming a tool of PLO chicanery.

I strongly urge my colleagues to join me in supporting H.R. 2145.

□ 1420

Mr. BEREUTER. Mr. Speaker, I thank the gentleman from California [Mr. LAGOMARSINO] for his excellent statement.

Mr. Speaker, I yield 3 minutes to the gentleman from Florida [Mr. JAMES].

Mr. JAMES. Mr. Speaker, I rise today to express my full support for passage of H.R. 2145, a bill to prohibit U.S. contributions to the United Nations or any of its affiliated organizations if full membership as a state is granted to any organization or group that does not have the internationally recognized attributes of statehood.

This legislation, introduced just a few weeks ago, was an important immediate response to the Palestinian Liberation Organization's recent efforts to obtain full membership in the World Health Organization, the U.N. agency that sponsors public health programs in the Third World. Of greater concern that goes beyond this particular action of the PLO is the organization's self-proclaimed "Palestinian state." On the PLO's application to join the World Health Organization there is an illustration of the newly proclaimed Palestinian state that depicts all the land of the current state of Israel, pre-1967 and post-1967.

As Secretary Baker has adamantly stated, such political actions have no place in the work of international organizations that are charged with the nonpartisan humanitarian responsibilities of working to improve the public health of millions of impoverished people.

Late last week, delegates to the World Health Organization voted to defer the PLO's application for a year rather than risk action by the United States to halt its contribution to the agency. This action, which I believe presents a clear picture of internation-

al opposition to the PLO's moves in this direction, is certainly to be applauded.

Although temporarily defeated, this effort of the PLO is clearly interfering in the Middle East peace process. The United States is hopeful of and working toward a peaceful resolution of the conflict between Israel and the Palestinians. The PLO's application for membership in the World Health Organization is detrimental in this regard. That is why I am fully supporting H.R. 2145, the bill before us today. I believe it is an important and appropriate expression of the United States' commitment to achieving peace in the Middle East through appropriation actions.

Mr. BEREUTER. Mr. Speaker, I thank the gentleman from Florida [Mr. JAMES] for his excellent statement, and I yield myself such time as I may consume.

Mr. Speaker, I would like now to urge all of my colleagues to give a strong vote of support for the legislation before the body to indicate to the PLO that the U.S. Government, the executive branch and the Congress of the United States, is very much opposed to PLO membership in the specialized agencies of the United Nations.

Mr. WYDEN. Mr. Speaker, both the administration and this Congress can take credit for denying the Palestinian Liberation Organization membership in the World Health Organization. Had the PLO obtained backdoor admission to the United Nations by joining the WHO, this would have immensely complicated efforts to achieve a negotiated peace in the Middle East.

I commend Secretary of State Baker for realizing the seriousness of the PLO's membership request and threatening to cut off all U.S. aid to the WHO. And I commend those in this Congress who worked behind the scenes to send the message that no further contributions to WHO would be forthcoming if the PLO joined that organization.

Ironically, international politics should be far from the concern of the WHO, which has done so much good over the years in safeguarding the health of so many people. The legitimate agenda for the WHO should be AIDS, malaria, chemical warfare and other threats to world health. But the WHO, a technical support organization of the United Nations, cannot become involved in the complex politics of the Middle East without completely undermining its efficacy.

By accepting the application of the PLO for membership, this U.N. agency would have effectively recognized Palestine as a state. Although the United States currently conducts negotiations with the PLO, we reject the PLO's claim that it constitutes a state. Admission to the WHO would have advanced the PLO's claims to statehood in a reprehensible manner.

By using the WHO to push for illegitimate political gains, the PLO bears responsibility for politicizing a truly essential U.N. agency devoted to improving the health of the world's peoples. Such politicization can only divide and discredit an international organization that has so much important nonpolitical work to do.

Ms. SNOWE. Mr. Speaker, I rise in support of H.R. 2145.

This bill comes before the House at a critical time. Although the danger of the PLO's imminent entrance into the World Health Organization has lessened, the question remains on the WHO's long term agenda. Futhermore, the PLO is now shifting its efforts to other U.N. organizations where it believes it has a better chance for short-term success. For these reasons, it is important that we act quickly to provide the administration the legislative authority it will need to cut off U.S. contributions to any U.N. organization that admits the PLO as a full member state.

Last week the World Health Organization barely turned back the PLO's effort for full membership on a series of votes that culminated in an unprecedented secret ballot on the question. The result was not a full defeat of the PLO's application on the grounds of its clear illegality under the U.N. Charter. The WHO merely deferred action for a year. The PLO fought against the deferral, and has vowed to continue its efforts for full membership of U.N. specialized agencies. In fact, the PLO has already submitted as application for membership of UNESCO, which may be considered in the coming weeks.

I am pleased by one clause in the deferral, which directs the Secretary General of the WHO to study and report on the legal implications of the application. Such a study, if honestly conducted, can only come to one conclusion. I felt earlier that the Secretary General of both WHO and the full United Nations should have taken a more principled and public position on such a clearly political and illegitimate application. I look forward to their public position on this issue when it next arises.

Even this measured success at WHO was possible only because of the expected passage of this legislation. If we fail to approve this bill today we will be telling the United Nations that the U.S. Congress does not care if the PLO succeeds in its campaign for full membership of U.N. organizations. If we fail to pass this bill we will deny Secretary Baker the clout and legislative authority he needs to implement the administration's firm policy on this question.

Organizations in the U.N. system must recognize that they must make a choice. They can undermine their own credibility and violate the U.N. Charter by admitting the PLO, which does not have even the most rudimentary attributes of statehood. If they take this action, they must know that the United States will feel under no obligation to continue to provide a quarter of their budgets.

It would be unfortunate if effective U.S. withdrawal from some U.N. specialized agencies becomes necessary. Any U.N. organization, however, derives its value directly from the willingness of its member states to treat it seriously and respect its principles. In its efforts, the PLO has demonstrated that it cares more about using specialized U.N. agenices as political tools than allowing them to continue their important technical work in a variety of fields.

After passage of this legislation, the United Nations and the PLO will have a clear choice. They can either have the continued financial support and full presence of the world's greatest power, or they can play politics and undermine the U.N. system by approving a fraudulent application for membership. This legislation eliminates any illusions that they can have both.

I urge my colleagues to support this bill.

Mrs. LOWEY of New York. Mr. Chairman, as a cosponsor, I rise in strong support of H.R. 2145, legislation to deny U.S. Government funding to any United Nations agency that grants the Palestine Liberation Organization full membership as a state.

The PLO, simply put, is not a state. It meets none of the internationally recognized legal criteria that are required to achieve statehood. And lacking statehood, the PLO should not be admitted to any international organizations affiliated with the United Nations. Such an action would make a mockery of the United Nations and contribute to a politicization of international organizations that desperately need to devote themselves to important causes around the globe.

It remains true that the PLO has, as one of its chief goals, the destruction of the existing State of Israel and its replacement with a state of Palestine. However, the PLO cannot achieve statehood simply by declaring itself an independent state. Nor can that claim ever be recognized as legitimate. The State of Israel rightfully occupies its current position among world nations, and its survival as a free and independent nation is of the utmost importance.

The fact remains that the PLO is a terrorist organization committed in its charter to the violent destruction of Israel. It has provoked the ongoing unrest in the Gaza Strip and the West Bank. And it has acted to intimidate and harass moderate Arab leaders within and outside of Israel, thereby blocking constructive action to achieve peace between Israel and its Arab neighbors. To admit the PLO membership in international organizations of the United Nation would be tantamount to an endorsement of terrorism and an endorsement of ongoing violence and warfare throughout the Middle East.

Mr. Speaker, I would like to commend Secretary of State Baker for his strong and immediate condemnation of any effort to admit the PLO to membership in international organizations. This legislation is fully consistent with the statements made by Secretary Baker and amounts to an endorsement of the administration stand on this issue.

Mr. Speaker, there are now many constructive avenues being pursued to achieve peace in the Middle East. However, recognition of the PLO as a full member of U.N. agencies is not one of them. This is a counterproductive step that willl end credence and support to the forces of violence and hatred.

I urge my colleagues to support H.R. 2145. It will send a message that we do not approve of the politicization of the work of U.N. agencies. It also sends the message that we do not recognize the legitimacy of the PLO's efforts to destroy the sovereign State of Israel. The United States must do everything possi-

ble to ensure that Israel remains strong, free and secure.

Mr. FEIGHAN. Mr. Speaker, I want to commend the sponsor of the bill, Mr. Lantos of California, for this leadership on this issue and for the chairman of Subcommittee on Human Rights, Mr. YATRON and our full committee chairman, Mr. FASCELL for allowing us to consider this bill in such an expeditious matter.

I strongly supported Secretary Baker's call putting all U.N. agencies on notice that the United States will withdraw our funding from any U.N. organization that admits the PLO as a full member. I am pleased to see that for the moment, the precipitating incident—the application of the Palestinian Liberation Organization for full membership in the World Health Organization—has been tabled by the membership of that organization.

I was pleased to see the statement by Hiroshi Nakajima, Director-General of the World Health Organization, indicating that the PLO was ineligible for membership in the organization and that it was "most inappropriate" for the PLO to target the World Health Organization for its first attempt at getting recognition. I view the PLO's effort as a new kind of political terrorism aimed at achieving a status at the United Nations that the PLO has been unable to achieve through violence against Israel and against United States citizens.

Finally, I think we need to look no further than the PLO's application itself to see the reason for taking this action today. The PLO's request came on letterhead stamped with a physical representation of the self-proclaimed state of Palestine which included all of Israel, pre-1967 and post-1967.

The point should be clear that no one will impose a settlement on the parties in the Middle East—not the United States, nor the Soviet Union, not the PLO, not the United Nations. Parties who are serious about seeking peace in the Middle East realize that the ultimate resolution of this problem will be the product of a negotiated settlement, not by unilateral acts. The PLO's attempts to gain member status in U.N. organizations undermine the peace process and threaten the potential for progress that we have been making. This legislation indicates that the United States will not tolerate these ploys and I urge my colleagues to support it.

Mr. BEREUTER. Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore (Mr. THOMAS A. LUKEN). All time has expired.

The question is on the motion offered by the gentleman from Pennsylvania [Mr. YATRON] that the House suspend the rules and pass the bill, H.R. 2145, as amended.

The question was taken.

Mr. LANTOS. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to clause 5 of rule I and the Chair's prior announcement, further proceedings on this motion will be postponed.

GENERAL LEAVE

Mr. YATRON. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks on the bill just considered.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

THE PRESIDENTIAL ELECTION IN PANAMA

Mr. FASCELL. Mr. Speaker, I move to suspend the rules and agree to the concurent resolution (H. Con. Res. 122) concerning the May 7, 1989, Presidential election in Panama, as amended.

The Clerk read as follows:

H. CON. RES. 122

Whereas the United States supports the aspirations of the Panamanian people for democracy;

Whereas the democratic aspirations of the people of Panama have been thwarted by the reprehensible actions of General Manuel Antonio Noriega and his supporters;

Whereas General Noriega and his supporters have committed fraud and have manipulated the results of the May 7, 1989, Presidential election;

Whereas despite these deplorable efforts to thwart the will of the Panamanian people, all credible Panamanian and international observers have recognized Guillermo Endara as the indisputable winner of the election;

Whereas on May 10, 1989, armed thugs acting on behalf of General Noriega attacked and severely beat Guillermo Endara, his Vice Presidential running mates, Ricardo Arias Calderon and Guillermo Ford, and their supporters;

Whereas on May 10, 1989, nine journalists from the international media were expelled from Panama; and

Whereas on May 11, 1989, the President outlined United States policy concerning the crisis in Panama, detailing a series of steps which focus on protecting the lives and well-being of United States citizens and reiterating that the United States will carry out its obligations and enforce its treaty rights in Panama under the Panama Canal treaties: Now, therefore, be it

Resolved by the House of Representatives (the Senate concurring), That the Congress—

(1) condemns the actions taken by General Manuel Antonio Noriega to thwart the will of the people of Panama by systematically attempting to undermine the electoral process and by refusing to acknowledge Guillermo Endara as the clear winner of the May 7th election;

(2) condemns the violent attack by armed thugs acting on behalf of General Noriega on Guillermo Endara, Ricardo Arias Calderon, Guillermo Ford, and their supporters on May 10, 1989;

(3) condemns Panama's expulsion of nine international journalists on May 10, 1989;

(4) calls on General Noriega and the Panamanian Defense Forces to honor the will of the Panamanian people as expressed in the election of May 7, 1989, by recognizing Guillermo Endara as the victorious candidate for President of Panama;

(5) calls upon General Noriega and the Panamanian Defense Forces to respect the internationally recognized human rights of the Panamanian people including the right to freedom of speech, assembly, and the press;

(6) calls on the world community of democratic nations and especially the democracies of the Western Hemisphere to rebuke the actions of General Noriega and calls on the President to consult with the democracies of the hemisphere in developing a common effort to urge General Noriega and his supporters to honor the clear results of the election of May 7, 1989; and

(7) supports the careful and prudent policy steps taken by the President on May 11, 1989, as an appropriate and measured response to the crisis in Panama and expresses the desire of the Congress to work with the President to determine the future course of action for United States foreign policy in Panama.

The SPEAKER pro tempore. Is a second demanded?

Mr. BROOMFIELD. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from Florida [Mr. FASCELL] will be recognized for 20 minutes, and the gentleman from Michigan [Mr. BROOMFIELD] will be recognized for 20 minutes.

The Chair recognizes the gentleman from Florida [Mr. FASCELL].

Mr. FASCELL. Mr. Speaker, a photograph often can sum up an event and maybe even portray it more graphically than any learned treatise. I believe such is the case with regard to the photos and the video tapes of the brutality of General Noriega's thugs against the victors in Panama's May 7 election. These pictures testify to the violence and corruption of that regime, and at the same time they reveal the courage and the tenacity of those fighting for democracy in Panama.

This resolution seeks to support those people in Panama who are fighting and struggling for a democratic way of life. It expresses the sense of Congress with respect to the events in Panama by condemning General Noriega for his violence against his own people and for his efforts to thwart the popular will by subverting the election. The resolution calls for the General and the Panamanian defense forces to honor the results of the election and to respect the internationally recognized rights of the Panamanian people. It calls upon the world community of democratic nations, and especially the Western Hemisphere, to rebuke Noriega's actions, and it calls upon President Bush to consult with democracies in the hemisphere to develop a common effort to urge General Noriega and his supporters to honor the clear results of the election. I am

pleased to say that the President has already undertaken to do that.

Finally, the resolution expresses the support of Congress for the careful and prudent steps the President has taken as a measured response to the crisis in Panama, and it expresses the desire of Congress to continue to work with the President to determine the future course of U.S. policy.

Mr. Speaker, I want to commend President Bush for the action he has taken here in carrying out the commitment that he made at the start of his administration that he would work with the Congress to forge a bipartisan policy. In this particular case as in others that have been before us, the President has been good on his word. He met with the Congress, he got opinions from the Congress, he incorporated in his own actions some of the advice he received from the Congress, and we in the leadership were pleased to work with the President to formulate this policy, to shape an effective policy in support of the rights of the Panamanian people.

So, Mr. Speaker, I hope that all of our colleagues will unanimously support this resolution, because it is important for us to continue to express our position on issues in which we believe strongly and to support the values that many people valiantly struggle for. I believe that our unanimous voice, the voice of the Congress and of the administration, is not lost on other governments and other peoples around the world. It makes significant impact, Mr. Speaker, both on the thinking of people and of their actions. Sometimes it is not always obvious that it occurs, and sometimes the time differential is such that we might not even be sure of the relationship.

□ 1430

However, Mr. Speaker, experience has taught us on the Committee on Foreign Affairs and in Congress that there is a direct relationship to the actions and the expressions of the American people, which in this case, I believe, we are all united as represented here in the Congress of the United States in our unified statement and our unified action with President Bush to show where the United States stands on these kinds of issues. I would hope, and I am sure, that it will be helpful in energizing other democracies and other countries to take similar stands and perhaps bring about a major change in the situation in Panama.

Mr. Speaker, a photograph often can sum up an event or even an era more effectively than a learned treatise. Such is the case with the photos and video tapes of the brutality of General Noriega's thugs against the victors in Panama's May 7 election. Those pictures testify to the corruption and violence of the Noriega regime. At the same time they reveal the courage and tenacity of those fighting for democracy in Panama.

This resolution expresses the sense of Congress with respect to Panama. It condemns Noriega for his violence against his own people and for his efforts to thwart the popular will by subverting the election. The resolution calls on Noriega and the Panamanian defense forces to honor the results of the May 7 election and to respect the internationally recognized rights of the Panamanian people.

The resolution calls on the world community of democratic nations and especially the Western Hemisphere democracies to rebuke Noriega's actions and calls on President Bush to consult with hemisphere democracies to develop a common effort to urge Noriega and his supporters to honor the clear results of May 7 election.

Finally the resolution expresses Congress' support for the careful and prudent steps President Bush has taken as a measured response to the Panama crisis and expresses Congress' desire to continue to work with the President to determine the future course of United States foreign policy regarding Panama.

Mr. Speaker, I want to commend the President for the way he has approached developing United States policy toward Panama. He has backed up his inaugural pledge to work with Congress in shaping a bipartisan foreign policy. In this instance he consulted fully with the Congress. He listened and then acted. That is the way it should work and the best way to build broad support for Presidential initiatives.

This resolution lends timely support to the President's policy toward Panama. It shows clearly that the Congress and the President, and indeed all American people, are united in our outrage at what has transpired in Panama and our determination to work with our democratic neighbors to shape an effective policy in support of the Panamanian people's struggle for democracy.

Mr. Speaker, I call the attention of the House to a thoughtful editorial on the Panama situation which appeared in the Miami Herald on May 13, 1989:

APPROPRIATE RESPONSE

President Bush has heeded the voices of reason in responding to the Panamanian crisis. Bowing to Latin American concerns, he stopped short of ordering a direct military intervention, and on Thursday issued a stern warning instead. He dispatched 2,000 combat troops to beef up the 10,000-strong U.S. military contingent in the Canal Zone, ordered American families living off-base in Panama to move-on-base, and recalled U.S. Ambassador Arthur Davis for consultations.

This response, firm but measured, was appropriate. It sends a clear message to Gen. Manuel Antonio Noriega that the United States is ready to defend its interests in the Canal Zone while respecting the Panamanian people's sovereignty. It also gives the time-honored tradition of Latin American solidarity an opportunity to exert its moral and political force.

Latin American solidarity will be decisive in resolving the crisis. General Noriega has sought it since two U.S. grand juries indicted him on drug-trafficking charges in March 1988. Now—owing in no small part to Mr. Bush's prudent response—that solidarity is firmly on Washington's side. At its helm are two of the region's most charismatic presidents: Venezuela's Carlos Andres Perez and Peru's Alan Garcia.

Both Messrs. Perez and Garcia have denounced General Noriega and called upon the Organization of American States to isolate him. Ricardo Arias Calderone, Panama's opposition vice-presidential candidate, says he hopes that their action will result in a decision to quarantine the dictator, much as Nicaraguan dictator Anastasio Somoza was quarantined in 1979. That concerted action helped to precipitate his downfall.

Already Mexico has recalled its ambassador for consultations. Costa Rica has called the election's nullifaction a betrayal, while Argentine Foreign Minister Dante Caputo said it was "incredible and unacceptable." Colombia and Guatemala also are expected to make similar statements.

General Noriega allowed the elections, hoping that he could rig them and thus legitimize his illegitimate regime. Instead, his own forces' excesses boomeranged on him. If, as is hoped, this new equation causes disaffected elements in his own Panama Defense Forces to topple him, Mr. Bush's response will have been crucial to that end.

Mr. BROOMFIELD. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I want to join the gentleman from Florida [Mr. FASCELL], the chairman of the Committee on Foreign Affairs, in expressing strong support for this resolution which condemns the action taken by General Noriega to thwart the will of the Panamanian people as expressed by the May 7, 1989, election.

It is clear that Noriega is out of control. Last week a group of his army thugs violently attacked a peaceful opposition march with steel pipes and baseball bats, seriously injuring the opposition Presidential candidate and almost killing the Vice Presidential candidate.

Noriega's puppet electoral tribunal declared the election null and void, but only after nearly 3 days of deafening silence. The regime had been so overwhelmingly defeated that it was impossible to doctor the results to guarantee Noriega's hand-picked candidate as the winner.

There is no question in anyone's mind that Noriega's regime is illegitimate. It rules neither with the consent of the governed nor by the force of moral authority. In fact, on Sunday in churches across Panama, hundreds of thousands of Panamanians raptly listened to a message by the Roman Catholic bishops which denounced last week's violence and assailed Noriega's right to hold power through fraud.

Mr. Speaker, I would like to note that this resolution also puts the Congress on the record in strong support of the President's recently announced policy objectives toward Panama. Last week, President Bush outlined a series of steps aimed at safeguarding the lives of American citizens, and protecting and enforcing United States obligations and rights under the Panama Canal Treaties. The President's actions reflect a balanced and measured response to the crisis.

I am pleased by the decision of the Organization of American States [OAS] to convene an extraordinary session tomorrow regarding the crisis in Panama. I am hopeful that a majority of the member states will see fit to issue a resolution denouncing the actions of Noriega and calling upon him to step down in the best interests of Panama and all the Western Hemisphere democracies.

Make no mistake about it, Noriega must go. Let there be no equivocation on that fact. The Panamanian people have demanded it by voting in overwhelming numbers against the dictator. The United States has demanded it through the measured but unambiguous steps implemented by the President. The Latin American democracies meet tomorrow to determine whether to send a similar signal. It is time for Noriega to listen to the message that is being broadcast to him loud and clear.

Finally, I would like to compliment the leadership on both sides of the aisle in working with the President to forge a united, bipartisan policy with regard to the crisis in Panama. This is U.S. foreign policy working at its best.

Mr. FASCELL. Mr. Speaker, I reserve the balance of my time.

Mr. BROOMFIELD. Mr. Speaker, I yield such time as he may consume to the gentleman from California [Mr. LAGOMARSINO], the ranking member of the Subcommittee on Western Hemisphere Affairs, and he also was a member of the President's observer delegation to Panama just recently. No other person can speak any more firsthand about that situation.

Mr. LAGOMARSINO. Mr. Speaker, President Bush asked me to serve as a member of the Presidential delegation to observe the elections in Panama on May 7. We were led by Representative JOHN MURTHA, as chairman of the delegation, and I wish to commend his able, sensitive, and constrictive leadership.

Observing the elections in Panama, I was shocked by the shameless manipulation of the process by General Noriega, before, during, and after. In brief, he committed world class fraud. I should add, I was not surprised. However, Noriega's reputation for corruption, abuse of power, and illegal narcotics activities has been well documented for years. His callous disregard for the wishes of the Panamanian people merit our strongest condemnation.

The tragic events of last week only served to add injury to insult as Noriega-backed thugs so called dignity battalion members attacked and wounded the opposition party candidates for president and vice president.

The day after the election, just before the start of opposition demonstrations I saw dignity batallion thugs, complete with clubs being loaded on a clearly marked Panama defense force bus.

The tragic events in Panama demand that we act immediately in condemning the violence and the actions of the Noriega regime in voiding the election results. It is also imperative that we strongly reaffirm our obligations and rights under the Panama Canal treaties to maintain a secure, open, neutral canal and to protect American citizens living and working in Panama.

President Bush has adopted a prudent and measured response in his statement of policy on Panama. The pressure has been increased on Noriega to leave power, and the meeting this week of the OAS offers a further opportunity to demonstrate a cohesive policy with our allies on pressuring Noriega's departure from power.

Noriega's total contempt for the desires of the Panamanian people for a democratic government, free of corruption and abuse, must be strongly and continuously denounced.

It is imperative that the United States and its allies join together in a show of strength and support for the brave opposition leaders who have put their lives on the line some losing them in opposing the Noriega regime and those who have been brutally beaten and harassed.

I believe we in the Congress must work closely with the administration in support of the President's comprehensive, unified policy to pressure Noriega out of power.

I urge my colleagues to give their unanimous support to this resolution and to join the effort to counter the disastrous rule of General Noriega in Panama.

Mr. FASCELL. Mr. Speaker, I yield 4 minutes to the distinguished gentleman from Ohio [Mr. TRAFICANT].

Mr. TRAFICANT. Mr. Speaker, I want to commend the gentleman from Florida [Mr. FASCELL]. He has been a leader, and he has set the tone for America's policies which emanate from the House in support of foreign policy. Many times his advice and counsel is well taken by the administration, and usually, when they follow his advice, they do pretty well.

Mr. Speaker, I support this resolution although I do not think it is enough. I think we can condemn all these practices, and we certainly have done that, and we should support our President today who has taken some stand. Furthermore, Mr. Speaker, I say to my colleagues, "He's looking better every day," and that is coming from a Democrat.

Mr. Speaker, we have spent millions and millions of dollars in Nicaragua, and they do not have jet plane, and they have got young kids with real bellies, not because they have too much food, but because they do not have any, and we are worried about exporting communism and violence. I say that the area of concern for America is in Panama, and we have a fellow down there by the name of Noriega who has been indicted for smuggling drugs into America.

This is not a whisper or a rumor. We have documented evidence that he is one of those drug kingpins that is wrecking the streets of America and poisoning the future of our youth. Noriega is a cancer that must be cut out.

□ 1440

Now, this resolution is fine and it is a first step, but I would like to see this President go a little further. I would like to see him abrogate that treaty and take that Panama Canal back because of its strategic importance, No. 1, and No. 2, I would like to see President Bush put his foot down and send the Marines to Panama and grab Noriega and bring him back for trial, where he belongs.

Everybody says, "Gee, you're going to be so hard," and that sounds real good. I will tell you what, it is not the message to Panama or to Nicaragua or the world or to all the drug traders, we need a message to America that says we are going to do something in Washington other than talk and say no. That is where we are today.

We have got a nation with cities we cannot control. We have got people like Noriega who are setting policy for America from the street up. A drug policy out of control.

I commend this resolution. I hope to God that President Bush continues with his courage and as a Democrat who has opposed many of the economic measures from the other side, I like some of things President Bush is doing, and I say this on the House floor. If he takes a strong stand on trade in America and stops the giveaway and if he goes after bums like Noriega, we will have a President who will earn his salt.

So I stand here in support of this resolution. I support this chairman. I also ask him to take a look at my area from northeast Ohio that has lost all its jobs, and declare it a foreign country so I can get some aid; some money and jobs, but I would like to see us take that canal back, that Panama Canal back, and I would like to see us

go and get this bum, Noriega, and put him in jail where he belongs.

Mr. BROOMFIELD. Mr. Speaker, I yield 3 minutes to the gentleman from New York [Mr. GILMAN].

Mr. GILMAN. Mr. Speaker, I thank the gentleman for yielding me this time.

Mr. Speaker, I am pleased to rise in strong support of House Concurrent Resolution 122, concerning the May 7, 1989, Presidential election in Panama.

I would like to commend the leadership of our committee, the distinguished chairman, the gentleman from Florida [Mr. FASCELL], and the ranking minority member, the gentleman from Michigan [Mr. BROOMFIELD], as well as the House leadership for expeditiously permitting consideration of this measure.

The people of the United States stand allied behind the people of Panama in support of their aspirations for true democracy. For years, Noriega has thwarted all opposition in his quest for power marked by viciousness, corruption, violence and brutality

The state of affairs in Panama has eroded to such a great degree that not only are freedom and democracy in peril, but so are the precious lives of the many Americans, as well as the Panamanians who are committed to protecting our shared values in the Western Hemisphere.

The crisis began 12 months ago when an associate of General Noriega charged that the general was involved in drug trafficking and had arranged the assassination of political opponents. It further deteriorated last year when our Nation attempted to oust the general, who had been indicted by two grand juries in Florida on Federal drug trafficking charges.

The May 7, 1989 election represented an opportunity for the Panamanian people to exert their electoral will. Unfortunately, General Noriega did all in his power to once again crush all opposition and to subvert the election of the opposition. On May 10, 1989, armed thugs acting on behalf of General Noriega attacked and severely beat Guillermo Endara, the winner of the Presidential election, as well as his highest ranking subordinates, Ricardo Arias Calderon and Guillermo Ford.

On May 11, 1989, President Bush took several significant steps to protect the lives and well-being of American citizens living in Panama, as well as reiterating that the United States will carry out of its obligations and we enforce its treaty rights in Panama under the Panama Canal treaties.

Accordingly, Mr. Speaker, I urge full support of this important resolution, which applauds the careful and prudent steps taken by President Bush and which expresses the desire of the Congress to work with the President to determine the future course of action for our Nation's foreign policy in Panama.

Mr. BROOMFIELD. Mr. Speaker, I yield 2 minutes to the gentleman from Kentucky [Mr. HOPKINS].

Mr. HOPKINS. Mr. Speaker, I thank the gentleman for yielding me this time.

Mr. Speaker, I rise in support of this resolution and commend President Bush for the precise, deliberate manner in which he has acted to build a national consensus and consolidate international support for our efforts to promote freedom and democracy in Panama.

There is a right way and a wrong way for the President to exercise leadership and carry-out his constitutional duties, and clearly, this is it.

The orderly process from which effective and prudent American policy has evolved in this instance should serve as a model to guide us in the future. And toward that goal, I would submit we have an opportunity this year to codify what the Panama experience has shown us.

We can do that by adopting the changes which I and others in this body and in the Senate propose to make to the War Powers Resolution.

While no one can argue that the President's actions warrant the invocation of the War Powers Resolution, his willingness to consult with Congress is fully consistent with both the letter and spirit of the reforms we advocate.

Defenders of the status quo will argue that the Panama situation proves no changes are needed, that the present system works.

They ignore the fact that the War Powers Resolution, as it stands, has not been implemented or invoked by former Presidents or by Congress on 19 of the 20 times U.S. troops have been committed since the law was enacted in 1973.

We must also realize that future Presidents may not share George Bush's appreciation of the importance of consultation in developing foreign policy.

The legislation I have introduced to amend the War Powers Resolution provides a flexible framework for the President to consult with the senior leadership of Congress in times of crisis—and a prompt, effective process for the exercise of legislative injunction where serious disagreements exists.

I support the resolution before us and I strongly urge my colleagues to support it and join me in codifying this shinning example of prudent policymaking by working to reform the War Powers Resolution.

Mr. BROOMFIELD. Mr. Speaker, I yield 3 minutes to the distinguished gentleman from New York [Mr. SOLOMON], who was a member of the Foreign Affairs Committee and is now a member of the Rules Committee.

Mr. SOLOMON. Mr. Speaker, I thank the gentleman, my former ranking member, for yielding me this time.

Mr. Speaker, I support this resolution because it provides congressional support for the initiatives which President Bush has undertaken in defense of United States interests in Panama. Such support is a very important element in bringing any crisis of this kind to a positive resolution.

But allow me, Mr. Speaker, to cast some doubt on how this is going to end up. Nearly 12 years have passed since the Panama Canal Treaties were signed. It was no secret to anyone at the time that these treaties were entered into with an unelected, military regime. And in the 12 years since then, we have watched the Panamanian military regime, which was authoritarian to begin with, move down the path toward becoming totalitarian—without apology.

It is ironic to discover that the terms of the Panama Canal Treaty, which deals specifically with the modalities of turning the canal over to Panama, empowers the authorities in Panama, to detain or arrest United States citizens on certain specific charges. Note first the use of the word "authorities." This suggests that the military regime and police forces in Panama can hardly be dignified with the term "Government."

Note second the crimes for which Americans can be detained by the Panamanian authorities: murder, rape, robbery with violence, drug trafficking, and crimes against the security of the Panamanian state.

Now listen to how those last two crimes are defined in the implementation language for the treaty; Drug trafficking means "the unlawful sale, exchange, or transfer for gain of marijuana, hashish, heroin, cocaine, amphetamines, barbiturates, or LSD;" crimes against the security of the state mean "espionage, sabotage, or terrorism directed against the constituted powers or authorities of the Republic of Panama, with the purpose of overthrowing them."

Mr. Speaker, if these two things do not describe the Noriega regime I don't know what does. Noriega is the leading drug trafficker of the Western Hemisphere; he has also overthrown the duly constituted civilian Government of Panama, which had been a fledgling experiment in democracy over the past several years since the treaties were signed.

Let us wake up and smell the coffee around here. The Panama Canal will never be turned over to the likes of Noriega and his ilk. If Americans can be held accountable for such crimes as these, let's hold the Panamanian militarists and drug runners to the same standard. We can do no less.

□ 1450

Mr. BROOMFIELD. Mr. Speaker, I yield 3 minutes to the gentleman from Pennsylvania [Mr. COUGHLIN], who is also a member of the President's observer delegation to Panama.

Mr. FASCELL. Mr. Speaker, I yield 1 minute to the gentleman from Pennsylvania [Mr. COUGHLIN].

Mr. COUGHLIN. Mr. Speaker, I rise today to express my very strong support for the measure before us to condemn Gen. Manuel Noriega's theft of the Panamanian elections.

As vice chairman of the Appropriating Committee for the Panaman Canal as well as of the Select Committee on Narcotics Abuse and Control, I was one of 14 members of the official delegation sent by President Bush to observe elections in Panama on May 7. I can testify firsthand to the extreme irregularities that occurred during the election process, and to the disgraceful outright pirating of the elections by Noriega when it became clear that the opposition would still win in a landslide despite widespread vote manipulation by the regime.

Mr. Speaker, reports of specific incidents of vote fraud and intimidation have already circulated widely, and I will not review them all now. I would like to take one moment, however, to mention a few incidents that members of the delegation, ably headed by our colleague JACK MURTHA, and I observed.

Noriega employed a number of tools in trying to steal the election. He manipulated voter registration lists to disenfranchise opposition supporters and to list deceased voters who would vote for Noriega's candidates. We talked to a number of Panamanians who were denied the right to vote due to treachery. One favorite trick employed by Noriega was the giving away of free food in poorer rural areas thought to support the opposition coalition. When these Panamanians came to collect food from Noriega's agents, their identity cards were punched. Later at the voting stations, however, these individuals learned that their identity cards had been punched in the same way they were punched after voters cast their ballots to preclude repeat voting. Because they had accepted the free food and had their identity cards punched, election officials denied these Panamanians access to the polls.

Another favorite vote-padding ploy of Noriega's involved voting by the Panama Defense Forces he commands. Because they were supposedly stationed too far from their homes of record, military personnel were allowed to vote at any polling station without having their names appear on the voter lists. They were also allowed to move to the front of the line at voting stations. This allowed soldiers to vote repeatedly, and in fact some members of our delegation reported seeing the same soldiers voting at more than one voting place. One group of women had been issued fresh fatigues for the day, which nicely complemented their high heels and nail polish. Despite the fact that none of them could tell the name of the military unit to which they were assigned, they were allowed to vote in the same fashion as the rest of the military—specifically, early and often.

Despite these measures, intimidation by the military—at one location, ALAN MOLLOHAN and I inspired a Panamanian soldier to chamber a shell in his shotgun when we got too inquisitive—and the virtual shutdown of any idependent media through which the opposition could speak to the voters, Panamanians waited in the broiling Sun for hours to cast their ballots for the opposition. We talked to one man who had walked 16 hours to get to his polling station. And we met the daughter of one of Noriega's Vice Presidential candidates who was working for the opposition and against her own father, because she wanted her children raised in a democracy.

When it became clear that Noriega could not win despite the apparent manipulation of tens of thousands of votes, he ordered his goons to steal ballots and tally sheets at regional election offices and tried to substitute fake tallies. When ALAN MOLLOHAN and I tried to visit an election center in Panama City on election night to watch the results being tabulated, we were refused entry by members of the Panama defense forces. Already it was clear to Noriega that the results overwhelmingly favored the opposition. We did manage to look through a window to see the results of some of the initial tallies—tallies that I believe are to this day the only official, genuine results available. At five different counting tables for which we saw results, the opposition led Noriega's candidates by a total of 906 votes to 309.

When Noriega realized that the vote count, even allowing for his fraud, would not provide him with a victory, he annulled the elections. In his arrogance, he even had the gall to accuse our delegation of responsibility for ruining them.

Three days later, when the opposition marched to protest the election's annulment, Noriega met them with brutality. Opposition leader Guillermo Endara, the rightful President-elect, was clubbed by Noriega's goons and wound up in a hospital with a huge gash in his scalp. Second Vice President-elect Guillermo Ford watched in horror as his bodyguards were shot, one execution style, by plainclothes members of the PDF and local thugs of Noriega's so-called dignity battalions, before he too suffered a vicious beating. Our Ambassador to Panama, Arthur Davis, yesterday stated unequivocally that Guillermo Ford was the victim of an assassination attempt that day.

Mr. Speaker, the House of Representatives should go on record today formally condemning the blatant fraud, the outrageous brutality, and the unforgivable usurpation of the peoples' wishes carried out by the dictator Noriega in recent days. This is especially important in light of the emergency meeting by the Organization of American States set for tomorrow on this matter.

Finally, Mr. Speaker, I would like to commend President Bush on his response to this outrage. He has been careful to work with both the Congress and our friends in Latin America in an effort to bring effective pressure to bear on the Noriega regime, while taking prudent, measured steps to help ensure the safety of Americans in Panama. This resolution will complement his efforts. Both it and the President's recent actions should be supported by all Members of this body.

Mr. BROOMFIELD. Mr. Speaker, I yield 2 minutes to my colleague, the gentleman from Michigan [Mr. SCHUETTE].

Mr. SCHUETTE. Mr. Speaker, I thank the gentleman for yielding me this time.

Mr. Speaker, I commend the gentleman from Michigan [Mr. BROOMFIELD] for his leadership on this resolution, and certainly the work of the chairman, the gentleman from Florida [Mr. FASCELL]; as well, I strongly support this resolution pending before this House of Representatives.

Mr. Speaker, this resolution is but a first step in a coordinated approach of Congress working in conjunction with the executive branch and supporting freedom and democracy in Panama. This resolution condemns the activities of General Noriega from drug running to the thievery of the election results of May 7, and calls on General Noriega to permit the basic constitutional rights and guarantees of the Panamanian people and for other civilized nations to stand with the Panamanian people.

As to the future of Panama, the sad truth is that mere words or resolutions may not resolve the crisis. President Bush has acted decisively and correctly in sending in additional American forces to protect American citizens and American property. It is important for us all to remember, my colleagues, that, treaty or no treaty, America has vital national security interests in the Panama Canal that cannot be jeopardized, and that General Noriega is a thug, a drug-runner who peddles death.

Mr. Speaker, I hope that this resolution is but a first step in providing General Noriega with a one-way ticket

to a ride out of Panama and Central America.

Mr. FASCELL. Mr. Speaker, I yield such time as he may consume to the gentleman from Florida [Mr. JAMES].

Mr. JAMES. Mr. Speaker, the recent atrocities committed by the coward Noriega cannot and will not be tolerated. His actions were and continue to be a gross and flagrant violation of not only the human rights, but the political rights of an entire nation.

The people of Panama have spoken. Noriega thwarts their will. His ordered attack on the duly elected President and Vice President of Panama must be met with strength. The United States of America has an unwavering commitment to democracy and human rights in Panama and, indeed, the world over. And the safety of the more than 40,000 Americans living in the Canal Zone is of paramount concern. We have a duty to ensure their well-being. Noriega and his goon squad thugs beware: If one American is harmed, in any way, you will face the wrath of the United States. And understand that we will take whatever action is necessary to protect and carry out our Canal Treaty rights and obligations. Noriega's cowardly sabre rattling will be met with strength, and force, if necessary. President Bush's swift response was a well-measured action that will protect vital American interests while assisting the Panamanian people's quest for democracy. But if one American citizen suffers or if Noriega continues to ignore and deny the will of the Panamanian people, the President can and will initiate bolder action, and he will do so with the support of the U.S. Congress and the American people.

Mr. FEIGHAN. Mr. Speaker, I want to add my strong support for House Concurrent Resolution 122, the resolution condemning the actions of Gen. Manuel Noriega in stealing the recent Presidential election and derailing the true wishes of the Panamanian people.

The U.S. State Department has indicated that there was substantial evidence of fraud and that Panamanians had voted overwhelmingly for opposition candidates. These charges were echoed by other international observers as well as Panama's Roman Catholic Church.

The United States has a broad range of interests at stake in Panama. I have been particularly concerned about General Noriega's role in making Panama a major thoroughfare of the drug trade. His continued hold on power in Panama means a continued flow of cocaine and marijuana to the streets of this country.

I support the measured and appropriate response taken by President Bush. Beyond that, we should realize that Noriega, an indicted drug-smuggling dictator, represents a threat not just to the United States, but to the Western Hemisphere. The Bush administration appears willing to accord our policy with the policies of our neighbors in the region and I applaud that approach.

If the United States acts in support of free and fair elections, it will have the support of our democratic allies. If we act unilaterally to protect our strategic and economic interests, we can expect to be isolated in the region. The United States should continue to uphold our obligations under the Panama Canal Treaty and work for a hemispheric diplomatic initiative designed to force General Noriega to cede power and respect the will of the Panamanian electorate.

Mr. CONTE. Mr. Speaker, deceit, corruption and murder are nothing new for Manuel Noriega. His dismissal of President Eric Arturo Delvalle in 1986, his notorious dealings in narcotics, and the unspeakably brutal killing of Hugo Spadafora in 1984, were already evidence of how little humanity he possesses. But the events of last week are the most glaring example of how he has treated Panama throughout his career.

Unable to steal the elections, and unsatisfied with a blatantly illegal annulment of Panama's clear choice of Guillermo Endara as President, he—according to United States Ambassador Arthur Davis—sent out his goons to murder the opposition's Vice Presidential candidate, Guillermo Ford.

President Bush has acted wisely and with restraint in response to these outrages. He has carefully sought the support of Latin American leaders, and has been prudent in his actions to protect American lives and treaty rights in Panama. He has the full support of this Member and, I trust, the full support of this Congress.

General Noriega's actions in the last week prove yet again how little respect he has for the will of his country's citizens, and for the opinion of civilized people everywhere. This resolution is a strong statement of our support for the citizens of Panama and our disgust at Noriega's actions. I support it, and I hope it will be one more step toward the end of Noriega's rule in Panama.

Mr. LAUGHLIN. Mr. Speaker, today I rise in support of House Concurrent Resolution 122, a resolution to condemn Noriega's actions in the Panamanian elections. I want to also express my support of President Bush's decision to dispatch more than 1,800 additional United States troops to Panama to help safeguard American lives there and add to the diplomatic pressure on Noriega to give up his dictator's power. I think anyone who has seen the news accounts of the violence that has erupted in the streets of Panama since Noriega declared the May 7 Presidential election results null and void can get a pretty clear idea of what General Noriega is all about. General Noriega is acting as a thug and a dictator and his refusal to run a legitimate government is quite evident. His handling of the election results were wrought with fraud and if Noriega continues in power, the United States ought to take the position that this violates the Panama Canal Treaty and we should abrogate the treaty and retain the Panama Canal.

Since August 15, 1914, the official date of its opening, the Panama Canal has served world trade virtually without interruption. Through this year, a total of 677,521 vessels of all types have passed through the canal. Canal traffic and tolls revenue during fiscal year 1988 increased moderately with the total transit revenue being approximately $397 million. However, pursuant to the Executive order of April 8, 1988, regulations prohibiting direct or indirect payments to the Noriega regime were implemented and the Commission withheld payment of some $54.8 million during 1988. This political crisis produced major challenges with regard to freedom of movement, procedural guarantees, and personal harassment for Americans and Panamanians alike. The situation worsened when the Noriega regime refused to honor treaty mandated procedural guarantees within the Panamanian criminal and administrative court systems.

Political unrest began in Panama in 1987 and since then, the Panama Canal has remained our only bargaining tool with the Noriega regime short of outright military force. Americans have an invested interest in what happens in Panama and to law abiding Panamanians. We must be realistic about the grave implications Noriega's dictatorship would cause the United States. When we consider the countermeasures imposed by the Noriega regime, it is apparent that the welfare of United States Government employees and their dependents living in Panama is at stake as is the well-being of Panamanian citizen employees of the Panama Canal Commission. Perhaps most importantly for the future, the continuing political crisis prevents economic recovery and thereby presents a potential threat which we have long held is best served by political stability and economic strength in that region.

That is why it is imperative that lawmakers on both sides of the aisle support this resolution and the President's handling of the situation in Panama. Therefore, I urge my colleagues to vote in favor of this resolution.

Mrs. LLOYD. Mr. Speaker, I rise in support of House Concurrent Resolution 22 to condemn Gen. Manuel Noriega's actions during the recent Panamanian elections. This resolution will send the message that the House of Representatives and the American people are outraged by the actions of General Noriega and that the President's response to those actions have our support.

As we are all aware, last Sunday the Panamanian people were given the opportunity to express their opinion regarding the strong-arm rule of General Noriega. With the whole world watching the Panamanian people voted overwhelmingly against the general and the candidate he backed for the Presidency. According to international observers, exit polls showed Guillermo Endara, the opposition candidate, winning by a margin of 3 to 1. The results could be interpreted in only one manner: The people of Panama wanted to liberate their government from the autocratic principles imposed upon it by the rule of Noriega and his drug smuggling cronies and restore in their government democratic principles and a respect for the rule of law.

Rather than respect the wishes of the people he claims to represent, Noriega ordered the brutal and violent attack of Endara and his running mate, which resulted in the death of one of their body guards, and nullified the results of last Sunday's balloting. The horrific images of the opposition candidates being viciously assaulted with lead pipes by

pro-Noriega paramilitary forces while members of the Panamanian defense forces passively looked on, graphically illustrated for the whole world the repugnant character of the Noriega regime.

In consultation with our Latin American friends, President Bush responded to the outlaw actions of Noriega in a measured and appropriate manner by moving dependents of United States military personnel into secure areas of Panama, bringing United States Ambassador, Arthur Davis, back to Washington for consultations, continuing the economic sanctions imposed by President Reagan on Panama last April, calling for regional action against Panama, notifying Panama that the United States intends to carry out its obligations and enforce its rights under the Panama Canal treaties, and sending approximately 2,000 United States troops to Panama to protect the lives of American citizens. I support the actions taken by President Bush and endorse his efforts to promote democracy and civilian rule in Panama.

The current chaos in Panama was posed imminent danger to the approximately 51,300 United States citizens who reside in that country. It is a very tense and unpleasant situation where, as I mentioned, the Noriega regime is resorting to or encouraging violence. President Bush has an obligation to the safety and security of United States citizens in Panama and, in my judgment, made the correct decision in deploying troops.

The resolution before us today condemns General Noriega for undermining the electoral process in Panama, and condemns his supporter attack on opposition leaders. It calls for Noriega to recognize Guillermo Endara as the winner of the Presidential election, and finally, expresses support for the measured steps taken by President Bush in response to the crisis in Panama.

As President Bush stated,

If we fail to send a clear signal when democracy is imperiled, the enemies of constitutional government will become more dangerous. And that's why events in Panama place an enormous responsibility on all nations in the democratic community. Efforts to overturn constitutional regimes or steal elections are not acceptable.

By passing this resolution, the House of Representatives will send a message of support for U.S. policy in Panama and the Panamanian people's struggle for democracy. I urge my colleagues to support House Concurrent Resolution 122.

Mr. FASCELL. Mr. Speaker, I yield back the balance of my time.

Mr. BROOMFIELD. Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore (Mr. THOMAS A. LUKEN). The question is on the motion offered by the gentleman from Florida [Mr. FASCELL] that the House suspend the rules and agree to the concurrent resolution, House Concurrent Resolution 122, as amended.

The question was taken.

Mr. FASCELL. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to clause 5 of rule I and the Chair's prior announcement, further proceedings on this motion will be postponed.

1500

GENERAL LEAVE

Mr. FASCELL. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to extend their remarks on House Concurrent Resolution 122, the concurrent resolution just considered.

The SPEAKER pro tempore (Mr. THOMAS A. LUKEN). Is there objection to the request of the gentleman from Florida?

There was no objection.

BRIEFING ON SITUATION IN PANAMA

(Mr. FASCELL asked and was given permission to address the House for 1 minute.)

Mr. FASCELL. Mr. Speaker, I simply want to announce to my colleagues that in room 2172, under the sponsorship of the Foreign Affairs Committee, we will get an update on the situation in Panama. It is for Members only.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. Debate has been concluded on all motions to suspend the rules.

Pursuant to clause 5, rule I, the Chair will now put the question on each motion to suspend the rules on which further proceedings were postponed earlier today, in the order in which that motion was entertained.

Votes will be taken in the following order:

H. Con. Res. 63 by the yeas and nays;

H.R. 2145 by the yeas and nays; and

H. Con. Res. 122 by the yeas and nays.

The Chair will reduce to 5 minutes the time for any electronic vote after the first such vote in this series.

CONDEMNING CONTINUING VIOLENCE AND THE IMPOSITION OF MARTIAL LAW IN TIBET

The SPEAKER pro tempore. The pending business is the question of suspending the rules and agreeing to the concurrent resolution, House Concurrent Resolution 63, as amended.

The Clerk read the title of the concurrent resolution.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from New York [Mr. SOLARZ] that the House suspend the rules and agree to the concurrent resolution, House Concurrent Resolution 63, as amended, on which the yeas and nays are ordered.

The vote was taken by electronic device, and there were—yeas 408, nays 1, answered "present" 1, not voting 24, as follows:

□ 1522

So (two-thirds having voted in favor thereof) the rules were suspended and the concurrent resolution, as amended, was agreed to.

The result of the vote was announced as above recorded.

The title of the concurrent resolution was amended so as to read: "A concurrent resolution condemning continuing violence against unarmed Tibetan demonstrators and the imposition of martial law in Tibet, and calling for a peaceful resolution of the situation in Tibet."

A motion to reconsider was laid on the table.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore (Mr. THOMAS A. LUKEN). Pursuant to the provisions of clause 5, rule I, the Chair announces that he will reduce to a minimum of 5 minutes the period of time within which a vote by electronic device may be taken on each additional motion to suspend the rules on which the Chair has postponed further proceedings.

PROHIBITING UNITED STATES CONTRIBUTIONS TO THE UNITED NATIONS UNDER CERTAIN CONDITIONS

The SPEAKER pro tempore. The pending business is the question of suspending the rules and passing the bill, H.R. 2145, as amended.

The Clerk read the title of the bill.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Pennsylvania [Mr. YATRON] that the House suspend the rules and pass the bill, H.R. 2145, as amended, on which the yeas and nays are ordered.

The vote was taken by electronic device, and there were—yeas 396, nays 6, answered "present" 11, not voting 21, as follows:

The Clerk announced the following pair:

On this vote:

Mr. Martin of Illinois and Mr. Florio for, with Mr. Conyers against.

Messrs. MILLER of California, BATES, ALEXANDER, and STARK changed their vote from "yea" to "present."

So (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

The result of the vote was announced as above recorded.

The title of the bill was amended so as to read: "A bill to provide for the withholding of United States contributions to the United Nations, any specialized agency of the United Nations, or any organization affiliated with the United Nations if membership as a state is granted to the Palestine Liberation Organization or any other entity that does not have the internationally-recognized attributes of statehood."

A motion to reconsider was laid on the table.

THE PRESIDENTIAL ELECTION IN PANAMA

The SPEAKER pro tempore (Mr. THOMAS A. LUKEN). The pending business is the question of suspending the rules and agreeing to the concurrent resolution, House Concurrent Resolution 122, as amended.

The Clerk read the title of the concurrent resolution.

The question is on the motion offered by the gentleman from Florida [Mr. FASCELL] that the House suspend the rules and agree to the concurrent resolution, House Concurrent Resolution 122, as amended, on which the yeas and nays are ordered.

The vote was taken by electronic device and there were—yeas 413, nays 0, not voting 21, as follows:

So (two-thirds having voted in favor thereof) the rules were suspended and the concurrent resolution, as amended, was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF H.R. 643, MINERAL LEASING ACT AMENDMENT RELATING TO OIL SHALE CLAIMS

Mr. BEILENSON, from the Committee on Rules, submitted a privileged report (Rept. No. 101-53) on the resolution (H. Res. 155) providing for the consideration of the bill (H,R. 643) to amend section 37 of the Mineral Leasing Act relating to oil shale claims, and which was referred to the House Calendar and ordered to be printed.

REMOVAL OF NAME OF MEMBER AS COSPONSOR OF H.R. 586

Mr. LEWIS of Georgia. Mr. Speaker, I ask unanimous consent to have my name removed as a cosponsor of H.R. 486.

The SPEAKER pro tempore (Mr. THOMAS A. LUKEN). Is there objection to the request of the gentleman from Georgia?

There was no objection.

PARLIAMENTARY INQUIRIES

Mr. WALKER. Mr. Speaker, I have a parliamentary inquiry.

The SPEAKER pro tempore. The gentleman will state it.

Mr. WALKER. Mr. Speaker it is my understanding that in the course of the day today, or perhaps later on today, there will be a report filed from the Committee on Banking, Finance and Urban Affairs with regard to the FSLIC bill. Can the Chair, first of all, tell me whether that report has been filed?

The SPEAKER pro tempore. The report has just been filed.

Mr. WALKER. The report has been filed.

Mr. Speaker, it is my understanding that the language in that report differs markedly from the language as reported from the Committee on Banking, Finance and Urban Affairs, that in fact substantive sections of the bill have been changed unilaterally by the chairman, and that is reflected in the report before the House in the new language as defined by the chairman rather than the language as reported from the committee.

Mr. Speaker, can the Chair tell me whether or not a point of order rests against the filing of that report under those kinds of circumstances?

The SPEAKER pro tempore. Under these circumstances, the normal time to question the validity of a committee report is when the bill comes up for consideration in the House or at a hearing before the Committee on Rules.

Mr. WALKER. Mr. Speaker, if I understand correctly then, this question could be raised about the change of the language before the Committee on Rules, or should a rule be adopted with regard to consideration of the bill, a point of order would rest against consideration of the bill on the House floor given the fact that language was changed subsequent to committee action; is that correct?

The SPEAKER pro tempore. If the bill was improperly reported, the gentleman from Pennsylvania [Mr. WALKER] is correct.

HIGH SCHOOL RESERVE OFFICER TRAINING CORPS RECOGNITION DAY

Mr. SAWYER. Mr. Speaker, I ask unanimous consent that the Committee on Post Office and Civil Service be discharged from further consideration of the Senate joint resolution (S.J. Res. 58) to designate May 17, 1989, as "High School Reserve Officer Training Corps Recognition Day," and ask for its immediate consideration.

The Clerk read the title of the Senate joint resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio?

Mr. RIDGE. Mr. Speaker, reserving the right to object, I simply want to recognize the work of our colleague, the gentleman from New Mexico [Mr. RICHARDSON], who is the chief sponsor of House Joint Resolution 123.

Mr. RICHARDSON. Mr. Speaker, the resolution we are considering today, Senate Joint Resolution 58, would designate May 17, 1989, as "High School Reserve Officer Training Corps Recognition Day." In 1916 the Congress authorized the establishment of high school divisions of the reserve officer training corps providing a valuable and unique learning opportunity for hundreds of thousand of students. Today there are 1,495 Junior Reserve Officer Training Corps [JROTC] located in 46 States and, as part of the Department of Defense dependent schools, in the Carribean, Pacific, Asia, and Europe. Hundreds of high schools around the Nation offer JROTC programs that concentrate on developing in their participants the desirable qualities of leadership, citizenship, teamwork, and individual initiative.

In my home State of New Mexico there are currently 18 JROTC programs in high schools across the State. In the Third Congressional District which I represent there are JROTC programs in Santa Fe, Espanola, and Ft. Wingate. The communities of Penasco, Las Vegas, Taos, and Pojoaque are also very interested in including JROTC programs in their curriculum. The high school JROTC is a proven success in New Mexico and an integral part of the State's education system.

This year we celebrate the 73d anniversary of the establishment of high school divisions of the Reserve Officer Training Corps. I introduced this resolution to bring national attentional to a near quarter million young men and women across the Nation who proudly participate in the program. I believe it is appropriate to acknowledge and honor the contributions of the High School Reserve Officer Training Corps, its cadets and instructors, both past and present. I urge my colleagues to support this resolution.

Mr. RIDGE. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio?

There was no objection.

The Clerk read the Senate joint resolution, as follows:

S.J. RES. 58

Whereas in 1916 the Congress authorized the establishment of high school divisions of the Reserve Officer Training Corps;

Whereas hundreds of high schools across the United States, and United States operated high schools abroad, offer High School Reserve Officer Training Corps programs of the various military services;

Whereas High School Reserve Officer Training Corps programs have provided a valuable and unique learning opportunity for hundreds of thousands of high school students for almost four generations;

Whereas the programs of instruction for High School Reserve Officer Training Corps units concentrate on the development of desirable traits in its participants, such as good citizenship, leadership, teamwork, individual initiative, and pride and respect for the United States, its flag, laws, and Constitution;

Whereas the High School Reserve Officer Training Corps programs, being highly sucessful in developing desirable traits in its participants have made a valuable contribution to the United States and to the education of the youth of our Nation;

Whereas it is appropriate to acknowledge and honor the contribution of the High School Reserve Officer Training Corps, and its cadets and instructors, both past and present; and

Whereas May 17, 1989, marks the seventy-third anniversary of the authorization of the High School Reserve Officer Training Corps; Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America and in Congress assembled, That May 17, 1989, is hereby designated as "High School Reserve Officer Training Corps Recognition Day". The President is authorized and requested to issue a proclamation calling upon the people of the United States to observe such day with appropriate ceremonies and activities.

The Senate joint resolution was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

□ 1550

GENERAL LEAVE

Mr. SAWYER. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on Senate Joint Resolution 58, the Senate joint resolution just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio?

There was no objection.

ANNUAL REPORT OF THE NATIONAL SCIENCE FOUNDATION, FISCAL YEAR 1988—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

The SPEAKER pro tempore (Mr. TRAFICANT) laid before the House the following message from the United States; which was read and, together with the accompanying papers, without objection, referred to the Committee on Science, Space, and Technology.

(For message, see proceedings of the Senate of today, Tuesday, May 16, 1989.)

ANNUAL REPORT OF THE NATIONAL ENDOWMENT FOR THE ARTS AND THE NATIONAL COUNCIL ON THE ARTS, FISCAL YEAR 1988—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

The SPEAKER pro tempore laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, without objection, referred to the Committee on Education and Labor.

(For message, see proceedings of the Senate of today, Tuesday, May 16, 1989.)

RULES AND POLICY FOR CONSIDERING PRIVATE BILLS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Connecticut, Mr. MORRISON is recognized for 5 minutes.

Mr. MORRISON of Connecticut. Mr. Speaker, on April 5, 1989, the Subcommittee on Immigration, Refugees, and International Law adopted its rules of procedure for consideration of private immigration bills and the full Judiciary Committee adopted the rules April 25, 1989.

The subcommittee would like to summarize for you the rules and policy which will govern consideration of private bills in the 101st Congress. The rules and statement are very similar to last Congress and are enclosed.

THE RULES

I. NATURE OF THE BILL

A private immigration bill is a remedy available to assist aliens with unusual problems and where "extreme hardship" to a United States citizen or permanent resident alien can be demonstrated. The Subcommittee serves as a "court of equity" in weighing the merits of each individual bill in determining whether there should be an exception to the general law.

The introduction of a private bill does not stay deportation and it has not since 1971—when there were some 7,000 bills introduced. At that time, the Rules were changed to require a showing of "extreme hardship" when the beneficiaries had no legal status. A decision on a "Rule 4" case is subject to a formal meeting of the Subcommittee and favorable action results in a request for a report from the Immigration and Naturalization which may stay deportation in accordance with a Committee Agreement with the Immigration and Naturalization Service. Last Congress there were 294 bills introduced and 21 enacted into law.

II. RULES OF PROCEDURE AND STATEMENT OF POLICY

The Subcommittee Rules outline procedures and documentation required in pursuing a private bill, and the Statement of Policy sets forth the precedents of the Committee in considering various types of bills—adoption, citizenship, and waivers of exclusion. Precedents of the Congress are one of the factors in the consideration of private bills along with the hardship criteria. While the Subcommittee is not bound by precedent, it rarely deviates from its precedents when handling private immigration bills.

A private bill commences with a letter from the Member to the Chairman of the Subcommittee outlining the facts of the case, and a fully documented file serves the best interest of the Member, as well as the beneficiary. All administrative avenues need to be pursued prior to Subcommittee scheduling.

We offer advisory opinions on cases and how they relate to Subcommittee guidelines and possible precedents. Additionaly, the Subcommittee staff is available at any time for discussions of possible private legislation (phone no. 5-5727).

We hope you will take this opportunity to review the Rules and Statement of Policy. Please do not hesitate to consult with us on any case which may come to your attention.

LAMAR SMITH,
Ranking Minority Member.
BRUCE A. MORRISON,
Chairman.

RULES OF PROCEDURE OF THE SUBCOMMITTEE ON IMMIGRATION REFUGESS AND INTERNATIONAL LAW

1. All requests for consideration of a private bill shall commence with a letter directed to the Chairman of the Subcommittee from the author of such bill outlining relevant facts of the case and attaching thereto all pertinent data. Documentation provided to the Subcommittee will only be accepted if submitted by the author of such bill. The following shall be submitted in triplicate:

(a) Date and place of birth of all beneficiaries. Address and telephone number in the United States.

(b) Dates of all entries (legal and illegal) and departures from the United States and type of visas for admission. Consulate where the beneficiary obtained a visa for entry to the United States; or where the beneficiary shall seek a visa.

(c) Status of any proceedings with the INS and whether any non-immigrant or immigrant petitions have been filed on the beneficiary's behalf.

(d) Name, address, and telephone number of interested parties in the United States.

(e) Names, address, dates and places of birth of all close relatives in the United States and abroad and their immigration status.

(f) Occupations, recent employment record and salary of beneficiaries.

(g) Copies of all communications to and from INS or the State Department, including copy of an I-94, an Order to Show Cause and any other relevant information.

(h) A copy and summary of all litigation relating to the beneficiary's case.

(i) Requests for consideration of a bill shall be accompanied by a statement by the beneficiary that he or she desires the relief sought by the bill and waiving the Freedom of Information Act and Privacy Act.

The information above represents the minimum requirements for Subcommittee consideration. Pertinent data about the case and an explanation of the extreme hardship to the beneficiary or United States citizen must also accompany a request for processing of the private bill.

2. Each private bill shall provide that the beneficiaries must apply for the benefits of the enacted law within two years of notification of the passage of the private law.

3. No bill shall be scheduled until all administrative remedies are exhausted, including suspension of deportation, asylum, labor certification, and court proceedings.

4. The introduction of a private bill does not stay the deportation of aliens illegally in the United States or who have overstayed the terms of their visa. The Committee shall not intervene in any such deportation proceedings and it will not address any communications to the Attorney General to request stays of deportation on behalf of beneficiaries of private bills, except as indicated in Rule 5.

5. The Subcommittee shall entertain consideration of a request for a departmental report upon receipt of a letter from the author of the bill. In the case of beneficiaries who are in the United States, including those in parole status or asylee status, a determination on the request shall be subject to debate at a formal meeting of the request shall be subject to debate at a formal meeting of the Subcommittee and only those cases designed to prevent extreme hardship to the beneficiary or a U.S. citizen will merit a request for a report. The Immigration and Naturalization Service may honor a rquest for a report by staying deportation until final action is taken on the legislation.

6. The Subcommittee shall request reports on private bills from other appropriate Federal agencies or Departments and shall await receipt of such reports before taking final action.

7. Testimony at private bill hearings shall not be received from any person other than the author of the private bill. All requests to testify shall be addressed in writing to the Chairman of the Subcommittee.

8. A notice of meeting date shall be sent to the authors of all legislation which is scheduled.

9. A quorum of the Subcommittee shall consist of two Members for the purpose of holding hearings on private bills.

10. Action on legislation shall not be deferred on more than one occasion due to nonappearance of the author.

11. Each bill in the following categories which may be proposed for consideration of the Subcommittee shall be subject to a point of order unless its consideration is agreed to by a two-thirds vote of the Subcommittee.

(a) Bills not previously listed on an agenda for a meeting and those bills not in compliance with these Rules concerning the filing of documentation.

(b) Bills concerning beneficiaries who are receiving medical treatment, where documentation as to the availability of similar medical treatment in the beneficiaries home country has not been submitted.

(c) Bills concerning foreign medical graduates who have not passed the Foreign Medical Graduate Examination in the Medical Sciences (FMGEMS) and satisfied (or are exempt from) the two year foreign residence requirement.

(d) Bills relating to a waiver of the naturalization laws, including bills seeking expeditious citizenship for national, international, or Olympic competition.

(e) Bills on behalf of aliens and their derivatives seeking legalization under P.L. 99-603.

12. The Subcommittee shall not take any further action on legislation which has been tabled by the full Committee.

STATEMENT OF POLICY

On April 5, 1989, the Subcommittee adopted as an addendum to its Rules of Procedure a Statement of Policy on private immigration bills which is set forth below.

The Subcommittee on Immigration, Refugees, and International Law has jurisdiction over all aspects of immigration law. In considering private immigration bills, the Subcommittee reviews cases which are of such an extraordinary nature that an exception to the law is needed. In fairness to those immigrants who are awaiting legal immigration, it is the policy of the Subcommittee generally to act favorably on only those private bills which meet certain precedents.

This policy statement will set forth the types of legislation which fall within the general parameters of favorable action and the criteria for reviewing certain categories of bills.

A. Adoption

Existing law provides for the immigration of foreign born adopted children if the adoption takes place while the child is

under the age of 16 and (1) the child is an "orphan" as defined by immigration law or (2) the child has resided with the adopted parents two years. Those cases where the Subcommittee has favorable precedents are when the child is of a young age and there has been a long-standing parent-child relationship. In support of any private bill relating to adoption, the following must accompany the request for Subcommittee action:

(1) Home-study on the home of the prospective parents.

(2) Evidence of support of child—cancelled checks, letters, clothing.

(3) Statement detailing ages and occupation of natural parents and brothers and sisters.

(4) Communications with the Immigration and Naturalization Service regarding applicable U.S. adoption laws.

B. Doctors and Nurses

The Immigration and Nationality Act provides for the admission of foreign medical graduates if the doctor or nurse has passed certain exams required prior to seeking immigration. A doctor must pass the Foreign Medical Graduate Examination in the Medical Sciences (FMGEMS) which is given extensively throughout the world and a nurse must pass the Commission on Graduates of Foreign Nursing Schools Exams (CGFNS).

Any alien seeking immigration must also have a job offer certified by the Department of Labor indicating there will be no displacement of U.S. labor.

In the past several years, the Subcommittee has experienced a deluge of bills introduced on behalf of foreign medical graduates. The legislative history relating to this group indicates many doctors enter the United States as non-immigrants with the clear intention of remaining permanently. Legislation enacted in 1976 and 1977 sought to tighten the law requiring the return of such doctors to their home country; and recent legislation in 1981 generously grandfathered certain doctors for admission as permanent residence because of their length of time in the U.S. It is the Subcommittee's opinion the 1981 amendments to the Immigration and Nationality Act was the final chapter in a long and arduous struggle to provide equity to certain foreign medical graduates.

The Subcommittee is also dismayed to find that doctors who are beneficiaries of private laws often swiftly seek more lucrative employment upon gaining permanent residence, thereby leaving medically under served areas without any medical assistance. Because of these experiences, the Subcommittee intends to look with very little favor on doctor bills. Further, if a bill on behalf of a doctor or nurse is pursued, the following is required before scheduling will occur:

(1) Passage of the Foreign Medical Graduate Examination in the Medical Sciences (FMGEMS) for doctors, and the Commission on Graduates of Foreign Nursing School Exam (CGFNS).

(2) Employment by the doctor or the nurse in a health manpower shortage area, or a recommendation by a U.S. Government Agency indicating the doctor or nurse's services are needed. It is the Subcommittee's desire that the beneficiary show substantial community ties over a long period of time. Extensive periods of employment would give the Subcommittee some assurance there is every likelihood the doctor or nurse would remain employed in the area and provide medical services.

(3) Waiver of the two-year foreign residence requirement (this applies to all exchange visitors).

(4) Documentation as to efforts the institution has made to recruit U.S. citizens for the position. Such information shall include salary levels of other doctors or nurses on staff and an explanation as to recruitment techniques on employment of the beneficiary.

(5) Copies of annual affidavits executed by participants in foreign medical graduate exchange programs.

Legislation approved by the Subcommittee on behalf of doctors shall provide for suspension of deportation during an interim period while a doctor is serving in a community and permit adjustment of status to permanent residence upon completion of the designated time period.

C. Drugs and Criminal Activity

The Subcommittee has few precedents for waiving grounds of exclusion relating to criminal activity. In the event such a bill is pursued, the following documents where available will be required:

(1) Complete transcripts of court proceedings relating to the conviction.

(2) All other records relating to offenses, including state, and local police records.

(3) Waiver of Privacy Act and Freedom of Information Act by the beneficiary.

(4) An affidavit (notarized) from the beneficiary describing his criminal record in full.

It is the intent of the Subcommittee that all available information be submitted to the Subcommittee. The Subcommittee will conduct its own investigation with appropriate government agencies.

It is also the Subcommittee's desire to review testimony and affidavits relating to the beneficiary's behavior after any criminal offense. Such information is helpful in making a determination as to whether legislation will serve the best interests of the community. In this regard, letters of reference, bank records, and employment records are particularly helpful.

D. Medical Cases

The Subcommittee shall be reluctant to schedule bills on behalf of persons who enter the United States on nonimmigrant visas or who are paroled for the purpose of seeking medical treatment. This type of visa is available to accommodate persons seeking advanced medical treatment which may be available only in the United States. Many cases have come to the attention of the Subcommittee where the medical visa is used to enter the U.S., and shortly thereafter, the person seeks permanent immigration. This type of activity undermines the intent of the medical visa; and flagrant abuses may seriously jeopardize its availability for those whose only recourse is treatment in the United States.

The Subcommittee's reluctance to schedule such bills is based on the premise that persons may seek all available medical assistance while in the United States, but upon completion of any medical treatment the purpose of the visa expires and the alien must return home.

The Subcommittee also notes the increasing number of private bills in similar cases whereby the beneficiary seeks relief solely on the basis of the need for medical treatment on ailments which were precedent or developed after arrival in the U.S. It is therefore the policy of the Subcommittee in such cases that advisory opinions be sought by the author from such organizations as the World Health Organization and the Pan American Health Organization as well as the various country representatives of where the beneficiary resides or is a native as to the availability of medical treatment for such physical ailments.

E. Deferred Action Cases

The Subcommittee shall be reluctant to schedule any bills on behalf of aliens who are in "deferred" status. It is the Subcommittee's understanding that the Immigration and Naturalization Service reserves the conferral of such status to cases of a particularly compelling nature. In view of INS action in this regard, the Subcommittee does not see any need for legislative action.

F. Investors

Recent public legislation enacted on behalf of investors provided relief for persons who were able to establish their qualification for a nonpreference visa prior to June 1978.

The Subcommittee has studied the many cases relating to investors and has found many beneficiaries did not sufficiently acquaint themselves with the law prior to making an investment and operated under illusions with respect to qualifying for immigration.

It is the Subcommittee's opinion that most investors who entered the United States after the June 1978 date were aware that immigrant visas would not be available in the foreseeable future, and there are no precedents for enactment of a private law solely based on a person's investment in the United States.

In the event a Member wishes to pursue this type of bill, the following is required: tax records, contracts, bank statements, and other pertinent information relating to the investment.

G. Waiver of Exclusions

1. Health

All bills waiving the grounds of exclusion for mental or physical infirmities will require the posting of a bond. The Subcommittee notes there are few precedents for cases in this category. In order to obtain the best possible information, the Subcommittee will require all medical records as well as information from the state and/or federal government concerning possible public charge aspects of the case.

2. Draft Dodgers

There are few precedents for favorable action on behalf of draft dodgers, and it shall be the Subcommittee's policy to continue to view such bills unsympathetically.

3. Fraud

The Subcommittee has been extremely reluctant to act favorably on cases involving visa fraud, and it shall be the policy of the Subcommittee to adhere closely to precedents in this category.

H. Naturalization

The Subcommittee shall require any bill relating to expediting naturalization be accompanied by evidence indicating such action would be in the national interest, as opposed to personal gain. There are few precedents for favorable action on bills waiving any naturalization requirements or granting posthumous or honorary citizenship. It is the Subcommittee's intent generally to view unfavorably legislation in this area and notes more appropriate mechanisms for rewarding individuals may be in the form of honoraria, medals, awards, statues, etc.

The Subcommittee is extremely concerned by the continued requests to expedite citizenship on behalf of athletes seeking competition in national, international, or Olympic games. The Subcommittee does not condone bestowal of U.S. citizenship through an Act of Congress solely on the basis of a person's athletic ability or other personal qualities, while fully qualified individuals must adhere to statutory as well as administrative timeframes for naturalization. Therefore, the Subcommittee has requested that the national and international competitive groups review their rules governing citizenship qualifiers in lieu of Congressional action.

The Subcommittee also notes there are few instances of favorable action on behalf of individuals who renounce U.S. citizenship, and the policy of the Subcommittee shall be to adhere to precedents in this category.

I. Legalization

In view of recent Congressional action legalizing the status of aliens who entered the United States prior to January 1, 1982, the Subcommittee shall require that those eligible for benefits under P.L. 99-603, "The Information Reform and Control Act of 1986", pursue administrative relief. Additionally, the Subcommittee notes that legalized beneficiaries may exercise the same petitioning rights as all other immigrants upon granting of permanent residence, and that Congress did not provide derivative benefits to accrue outside normal immigration levels. Consistent with legislative intent, the Subcommittee shall be reluctant to consider special exceptions from the general law unless there are extraordinary and compelling circumstances.

J. Bills Tabled in a Previous Congress

Commenting on requests for reconsideration of legislation, Thomas Jefferson noted the right of reconsideration is not "a right to waste the time of the House in repeated agitations of the same question, so that it shall never know when a question is done with . . ."

The Subcommittee has been confronted with an increasing number of requests for reconsideration of private bills which have been tabled by the full Committee in previous Congresses. It has been the experience of the Subcommittee that each bill is given sufficient review during the meetings of the Subcommittee and the authors are afforded ample time to present the merits of the case. Repetitious consideration of these cases operates to the detriment of other private bills which are pending and reflects poorly on the integrity of the private bill process. For these reasons, the Subcommittee will be reluctant to reverse or reconsider its prior action absent new evidence or information that was not available or could not have been obtained by the author at the time of actual consideration by the Subcommittee.

K. Timeframe for Obtaining Relief Upon Enactment of a Private Law

The Subcommittee has monitored the situations concerning the applications for relief by beneficiaries of private immigration laws and expresses its concern that in many cases the subjects of private bills do not exercise their petition for relief after enactment in a timely manner.

Certain cases have come to the Subcommittee's attention whereby relief after enactment of a private law was not sought until 10 years thereafter, and other cases the Subcommittee is dismayed to learn that beneficiaries have not sought immediate relief.

In view of the lengthy deliberations by the Subcommittee on each bill processed under its jurisdiction, it appears incumbent upon the Subcommittee to assure that the beneficiaries of such bills apply themselves in a diligent manner and seek relief as expeditiously as possible upon enactment.

GROWING FINANCIAL PROBLEMS OF FEDERAL HOUSING ADMINISTRATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California [Mr. DREIER] is recognized for 5 minutes.

Mr. DREIER of California. Mr. Speaker, I want to take a few moments to talk about a rather sensitive issue, one which those of us on the Banking Committee often look at as being sacrosanct, one which we should not really even discuss, because if we bring it up we are often considered opponents, and that is specifically the Federal Housing Administration.

Mr. Speaker, there have been several press reports recently on two General Accounting Office [GAO] studies which analyze the Federal Housing Administration's [FHA] growing financial problems. I am concerned with these reports because there are several bills pending before the Housing Subcommittee which would greatly expand FHA for the very well-intended purpose—and I underscore the fact that it is a very well-intended purpose, Mr. Speaker—of alleviating the housing affordability problem at little cost. Before we proceed with these proposals, however, we must determine the true cost of the Federal Housing Administration.

The first GAO study is a financial audit of FHA for fiscal year 1987. Prior to the study, no financial audit had ever been done of FHA—and I underscore that again, prior to the study on the fiscal year 1987, no independent study had ever been done on FHA.

The audit found that, using generally accepted accounting principles, GAP accounting, FHA's reserves are $1.9 billion less than what FHA had reported. GAO adjusted FHA's equity down from $3.1 billion to $1.2 billion. The Mutual Mortgage Insurance Fund known as MMIF, which covers FHA's single family lending program, was lowered by $600 million. The GAO audit also concluded that FHA added $643 million to the Federal deficit. FHA is a cost to the American taxpayers because, when FHA experienced a cash shortage, it withdrew money from the U.S. Treasury by cashing in Government securities before they matured.

GAO, Mr. Speaker, is expected to release its audit for fiscal year 1988 in a few months. FHA has already reported a $368.7 million loss for the MMIF for 1988. Losses are expected to continue over the next few years as the large volume of FHA insured loans originated in 1986 and 1987 enter the peak of the default cycle. The GAO study points out that most foreclosures occur 2 or 3 years after the homes are purchased.

As FHA's losses grow, I am concerned that we may be facing another bailout of a Federal insurance program. Before we blindly expand these programs, more information is needed to balance proper social policy with fiscal responsibility. For example, a second GAO study released 2 weeks ago shows that more than 25 percent of the FHA insured loans with less than a 5-percent downpayment in the 1981 and 1982 policy years, went into default. This type of foreclosure rate is a financial disaster for FHA and we must consider whether we want to expand the availability of these very low downpayment loans, particularly if we combine the low downpayment with very high loan amounts. We also need to consider whether we are helping families when as many as 1-in-4 homebuyers could potentially lose their homes.

This is a very serious issue, Mr. Speaker, and I believe that as we look at the involvement of the Federal Government in the savings and loan crisis we must also do everything that we possibly can to avert a potential crisis in this area.

Mr. Speaker, I submit for the RECORD two newpaper articles which more fully discuss the GAO studies, and I urge further consideration of this growing problem.

[From the Washington Post, May 6, 1989]

FHA SUFFERS FIRST LOSS ON ITS SINGLE-FAMILY HOME INSURANCE FUND

(By Ann Mariano)

The Federal Housing Administration added $643 million to the federal deficit last year, partly because of the first-ever loss it suffered in the single-family house insurance fund that has helped millions of Americans buy homes, the General Accounting Office reported this week.

To cover its cash shortage, the FHA withdrew money from the U.S. Treasury by cashing in government securities before they matured, thereby increasing the $165 billion federal budget deficit.

Losses in the insurance fund are expected to continue over the next two years as the record number of Americans who bought homes in the boom years of 1986 and 1987 enter the period when financially pressed homeowners are most likely to stop making their mortgage payments. Experience has shown that most foreclosures occur two or three years after the homes are purchased, according to the GAO.

In response to a congressional request, the GAO used the private mortgage industry's accounting standards when it examined FHA's records.

As a result, officials had to cut $1.9 billion off the figure first reported as the government's total equity in the four insurance funds administered by the FHA.

The single-family insurance fund alone had built up an equity of $3.4 billion by Sept. 30, 1987, but the change in accounting methods as well as losses in other FHA funds reduced the total.

The FHA does not record a loss until a lender forecloses on a home and files an insurance claim, sometimes as much as a year after a homeowner begins to miss monthly mortgage payments.

Private insurance companies, in contrast, begin recording losses on their books at the time owners stop making payments, giving a more accurate picture of a company's financial condition, the report said.

The GAO's findings were documented in two reports issued this week. One contained an audit of the FHA's financial position as of Sept. 30, 1987. The GAO is supposed to audit the insurance program every three years. But in 1981 and 1984, the accounting office said, an audit was impossible because of "significant accounting and reporting changes needed, and * * * deficiencies in FHA's accounting systems and financial records." GAO investigators are examining FHA's fiscal 1988 records.

The second report contained information requested by the Senate Banking, Housing and Urban Affairs Committee, which asked the GAO to evaluate the FHA's financial condition and its potential impact on the federal budget.

The committee also asked the GAO to apply accounting principles used by private companies to the FHA and to compare FHA's rules with the requirements some states place on private mortgage insurance companies.

Among the FHA's most persistent problems are high foreclosure and default rates among homeowners in the southwestern and western states.

About 25 percent of the $205 billion in FHA insurance in force on Sept. 30, 1987, covers property in these states, where economic problems "continue to be a cause for concern," the GAO said.

The single-family insurance fund has been robust in the past and has often refunded a portion of the premiums to buyers who paid off their mortgages without defaulting.

But that began to change in late 1987, when the fund began paying out more in claims on foreclosed properties than it collected in premiums.

Both HUD and Price Waterhouse, a public accounting firm hired by the GAO to examine FHA records, concluded that the single-family fund is financially sound and will stay that way under "probable future economic conditions."

Price Waterhouse said, however, that results of "an economic stress test" showed the insurance fund "would barely survive" if the real estate markets in the Southwest and West worsened. The test also showed that the fund would become insolvent in the event of a 10-year national depression with home prices declining 45 percent within five years, according to the report.

The FHA, a part of the Department of Housing and Urban Development, was established in 1934 to help create a stable mortgage market and home financing system. It insures more than 40 types of properties through its four insurance funds.

By far the largest of the four is the Mutual Mortgage Insurance fund, which covers single-family homes and has been a major factor in the huge growth in homeownership since World War II.

The other funds provide insurance for a variety of specialized projects and "high-risk" borrowers who otherwise could not get insurance. Some of these programs routinely are money losers.

The GAO auditors warned of another potential problem for the single-family home insurance fund. Average home prices continue to rise throughout much of the country, outstripping the congressionally set limit on the size of a mortgage FHA can insure.

As a result, fewer affluent buyers can qualify for FHA insurance, pushing more and more low-risk borrowers out of FHA range. The GAO said borrowers with large mortgages default less frequently, because of "more stringent loan-to-value requirements or other factors."

If these lower-risk borrowers can no longer get FHA insurance, it said, "then FHA may increasingly find itself insuring more risky borrowers" and facing higher claim rates.

On the plus side, FHA insurance issued from 1979 through 1987 shows "more favorable loan-to-value ratios," the report said. Loans are considered safer and the borrowers less likely to default when mortgages are smaller than the appraised values of the property.

Most of the GAOs findings are "basically things we know already," said John Ambrogne, director of the FHA's budget division. "We're watching the claim structure closly" as large numbers of mortgages reach the period when defaults are most likely.

"The fact [that the FHA is healthy] remains uncontested," and no one should interpret the GAO report as meaning the insurance fund is unsound, the budget director said.

Ambrogne said FHA does not use private industry's accounting methods because they are not generally used by government agencies and Office of Management and Budget and Treasury department officials will not permit the FHA to use them.

Gregory T. Barmore, vice president of the Mortgage Insurance Companies of America, a trade association, said a GAO finding that more than a quarter of the loans were made to borrowers' who made down payments of less than 5 percent of the property value "substantiates the fact that ultra-low down payments lead to foreclosure rates that are financial disasters to FHA programs and represent tragedies to one out of four minimum down payment home buyers."

Noting that several legislative proposals now in Congress would permit some home buyers to make even smaller down payments, Barmore questioned whether "FHA is really helping home buyers when 25 or more out of 100 lose their homes."

[From the National Thrift News, May 8, 1989]

LOSSES EXPECTED AT FEDERAL HOUSING ADMINISTRATION IN COMING YEARS

(By Dona DeZube)

WASHINGTON.—The Government Accounting Office, in its first-ever audit of the Federal Housing Administration, says it expects FHA will post losses for last year, this year, and next year.

And it has adjusted FHA's equity down to $1.2 billion, from $3.1 billion.

The losses of the three years will be due to the large number of mortgages insured by the agency in 1986 and 1987 and the shape to the standard mortgage insurance loss curve, GAO says.

Since the largest volume of losses on any book of mortgage insurance business usually occurs between the second the fifth years, the large volume of the 1986 and 1987 books of business began hitting the high loss years in 1988.

The size of any losses, however, will depend in part on how much business FHA takes in, because FHA accounts on a cash basis, recording premiums as they are collected and losses as they occur.

Each year, FHA weighs the premiums taken in against the losses paid out. "The net outflows depend on how many more premiums you can sell," said Roger Stoltz, a GAO auditor.

Even if FHA used the same accrual accounting methods as private insurers, there still would be no perfect method for predicting future losses.

"The problem with this whole thing is you are using historical data to project future losses. You're going to go through periods where you make money and periods where you lose money, but overall, you should break even in the long run."

The FHA has a net worth of $1.2 billion, assets of $12 billion and liabilities of $10.7 billion, according to the audit.

With $227 billion of insurance in force, the government fund is operating with a 252 to 1 ratio of insurance in force to capital. "That is a rather narrow margin of reserves, considering most states require capital of 25 to 1," says Mr. Stoltz.

Prior to the audit, and a corresponding briefing report, FHA held an unadjusted $3.1 billion in equity, according to the GAO.

The $3.1 billion, pared down by over 60 audit adjustments that sliced $1.9 billion from the agency's books, slipped to $1.2 billion when GAO completed the FHA balance sheet, which covers the fiscal year ending in September 1987.

GAO expects to complete a balance sheet and income statement for FY 1988 by July of this year.

The three largest adjustments to FHA equity were a $1.1 billion recognition of additional future losses, $172 million in additional costs for disposition of real estate owned, and $178 million for losses on single- and multi-family loans currently in default.

FHA could have disagreed with the audit, but didn't.

"They sort of swallowed hard and accepted the adjustments," says Mr. Stoltz.

GAO has attempted audits of FHA in the past, but had never been able to complete a balance sheet before now. "We've gone in every three years and it has been unauditable, a financial shambles," says Mr. Stoltz.

Congress became interested in the financial health of FHA last year after the agency reported what is believed to be its first-ever loss.

And, while FHA had a backstop in 1987 of $6.6 billion in non-marketable Treasury securities, the agency was forced to draw down securities out of the amount ahead of schedule last year.

"They had to withdraw $643 million ahead of the planned maturity in order to pay their losses," Mr. Stoltz says. The withdrawal caught the eye of former Sen. William Proxmire, who asked GAO to report on the outflow.

□ 1600

FSX AGREEMENT WITH JAPAN SHOULD BE REJECTED

(Mrs. BENTLEY asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. BENTLEY. Mr. Speaker, in an article in the Washington Post today the General Accounting Office report criticizing the FSX jet fighter deal with Japan is written about, and it points out that in this declassified report the GAO says that the United States is superior to Japan in the composite technology needed to produce a light, but strong, wing made of plastics, and is probably ahead in radar technology.

Mr. Speaker, these are the two areas in which the administration officials said the United States could gain technology from Japan by going ahead with the FSX deal.

The article also points out that critics have denounced the deal as a giveaway of United States aeronautics technology that will enable the Japanese to develop their own civilian aircraft industry. It points out, from the Assistant Comptroller General, that our preliminary observations are that overall the United States has superior composite technology and appears to be ahead in radar development. In the report, the GAO called the Japanese design for an FSX wing made of composites a high-risk strategy that was rejected by the United States after tests in the 1970's because of costs and risks. Even if Japan succeeds, the GAO continues, the design presents potential problems that could overcome the advantage of reduced weight.

Mr. Speaker, I hope our colleagues, and I hope the other body, will reject the FSX agreement with Japan.

INTRODUCTION OF SENSE-OF-CONGRESS RESOLUTION CALLING FOR ELIMINATION OF URBAN-RURAL DIFFERENTIAL IN MEDICARE PAYMENTS TO HOSPITALS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from South Carolina [Mr. TALLON] is recognized for 5 minutes.

Mr. TALLON. Mr. Speaker, I am pleased to join with over 50 original cosponsors in introducing a sense of the Congress resolution calling for the elimination of the Urban-Rural Differential in Medicare Payments to Hospitals during the 101st Congress.

Today, Senator TOM HARKIN is introducing a companion Senate bill with over 16 cosponsors. This bill has the support of not only health care organizations, but agricultural groups as well. The National Rural Health Association, Communicating for Agriculture Movement, and the American Agriculture Movement all have endorsed this bill.

It is time that Congress acknowledged the fact that the urban-rural differential is not just bad Medicare health care policy; it is discrimination against rural citizens. My resolution calls on the appropriate committees in Congress to take action on the various legislative proposals to eliminate the differential.

The differential is an inequity that many of us have fought since its inception in 1984 under the new Medicare Prospective Payment System (PPS). The terms urban and rural are just too narrow to be the basis of a cost reimbursement system for Medicare; recent statistics have proven this.

Under PPS, Medicare pays rural hospitals 36 percent less than urban hospitals. The Department of Health and Human Services reported that in 1986, urban hospitals made a 10.82 percent profit margin on PPS patients, while rural hospitals lost an average of 0.69 percent. Is it any wonder that by 1987 nonmetropolitan hospitals were closing at a rate two to one over urban areas?

While the original idea behind the urban-rural differential was that health care in rural areas is cheaper to provide than in urban areas, several significant factors were not counted in when formulating the PPS system.

Generally, rural hospitals have less paying patients to cover the losses incurred from the Government-sponsored patient. In South Carolina, Medicare reimbursements represent a larger percentage of hospital revenue. Typically Medicare payments are more than 50 percent of small, rural hospital total revenues. It is a fact that, overall, rural hospitals care for a larger proportion of sicker, elderly, and indigent patients than their urban counterparts.

The payment disparity under Medicare, coupled with growing numbers of uninsured and underinsured patients, seriously undermines the ability of rural hospitals to compete in the marketplace.

In addition, the current PPS system does not adequately reflect the diverse nature of rural America. A hospital in South Carolina which is 50 miles away from an urban facility faces a much different set of circumstances than a sole provider in North Dakota which is 150 miles away from another facility.

The rural South faces a different set of health demographics than the rural Mid-West or rural New England. In fact, the only thing that these areas have in common is wholesale discrimination under the Medicare payment system.

As a member of the House Agriculture Committee, I am angered that this federally imposed health statute has now become yet another issue that separates rural America from the rest of America.

As a member of the Subcommittee on Conservation, Credit, and Rural Development, I feel frustrated that Congress has not yet addressed this issue which is such an integral part of this Nation's rural economy.

When I talk with constituents from the Sixth District of South Carolina about economic development we invariably end up talking about the crisis facing their community because of the threatened closure of a local hospital. And I don't just hear it from physicians and hospital administrators; I hear it from local government officials, the larger industries in the district, small rural businesses, and farmers.

It is an inequity that affects every level in a rural community. Medicare should no longer operate under such an obvious inequity.

Through the efforts of the Rural Health Care Coalition, the differential has been reduced somewhat over the past few years by creative legislative maneuvering. It is time that the Ways and Means and Energy and Commerce committees work to eliminate the urban-rural differential directly and with haste.

While I am pleased to see that these committees have made progress through hearings to address the rural health care crisis, I won't be satisfied until the urban-rural differential is eliminated completely. I think the cosponsorship of this resolution proves that this is a sentiment is being heard throughout Congress.

Rural health care is in a State crisis. We on the Federal level cannot expect the States and local communities to address the crisis without first realizing the failure of the Federal Medicare commitment to rural health care providers. We owe it to rural Americans to end this discrimination.

AMENDING THE ANIMAL WELFARE ACT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from North Carolina [Mr. ROSE] is recognized for 5 minutes.

Mr. ROSE. Mr. Speaker, today I and 11 cosponsors are introducing a bill amending section 19 of the Animal Welfare Act to give individuals standing to sue for enforcement of the act.

This bill correcting a severe legal problem is not something new, Mr. Speaker. In the 100th Congress, the identical bill as H.R. 1770. It got 68 cosponsors—not bad for a bill which rubs against the trend, both in the courts and in the Congress, to diminish rather than expand standing to sue.

Mr. Speaker, courts have decreed that because citizens or animal protection organizations don't own the animals they want to protect, they can't sue. So, Mr. Speaker, we have to ask this—if the animals can't sue on their own behalf, and if people can't sue on their behalf, who can?

Mr. Speaker, because this bill affects both the judicial system and the Department of Agriculture, in the 100th Congress it was referred to Judiciary's Subcommittee on Administrative Law and Agriculture's Subcommittee on De-

partment Operations. Chairman BARNEY FRANK of the Administrative Law Subcommittee saw its importance, and held a hearing on it last year. I urge Members to review the printed hearing, and to note Chairman FRANK told opponents of this bill that, "if the record of enforcement stays at a low level, then you are going to be seeing this (bill) again."

We are not going to get the enforcement of the Animal Welfare Act we demanded when we adopted toughening amendments in 1985 until we grant standing to sue on behalf of animals.

As a matter of fact, we should note that here we are, more than 3 years after those amendments became law, and we have yet to see the first word of them in regulations. That should tell us something about the absence of desire to enforce animal protection decreed by Congress.

Why? Mr. Speaker, the Agriculture Department knuckles under to OMB's delaying dictates calling for draft upon draft of proposed regs, but OMB obeys the researchers, and stalls and stalls the approval of a single word of them.

The constitutional provision that tells us the President "shall take care that the Laws be faithfully executed" is a joke to the pliant plodders in Agriculture and the wheeler-dealers of OMB. We ourselves are not entirely without fault for allowing this to go on year after year, without calling the administration to account on it, but we can do something corrective about it by approving standing to sue.

Mr. Speaker, our amendment would not expand the coverage of the Animal Welfare Act in any way. It now protects, or should protect, animals used in research, experimentation, exhibition and air and surface transportation. It prohibits animal fighting ventures, and does not apply to farm animals.

Our amendment just adds a "citizen suit" provision, modeled on more than a dozen provisions in Federal environmental laws, and we ask for it because up to now the courts have said that people who want to protect animals in laboratories, regardless of obvious violations of law and regulations, can't sue.

Under it, a citizen could sue one and only one entity—the Agriculture Department. A laboratory could not be sued. A university could not be sued. A research facility could not be sued.

Only the Department could be sued, to require it to enforce the Animal Welfare Act, and we can give chapter and verse on why that is necessary.

But to prevent unreasonable, frivolous suits, Mr. Speaker, the bill has a provision allowing the court to make the bringer of the suit pay all of the costs of the litigation—attorney fees, expert witness fees, any other expenses—if the court decides the suit was frivolous, if it was unreasonable, if it was without foundation.

Mr. Speaker, while I am on this subject, I'd like to mention a case most, if not all of us, are familiar with—the Silver Spring monkeys case, because it inspired the standing to sue effort. It began in 1981, when police seized 17 monkeys in a Silver Spring research laboratory, and charged the operator of the lab with animal cruelty. It was cruelty beyond description, documented in photos, and by expert witnesses.

The lab was operating under an NIH grant, and, despite its proximity to NIH and the Department of Agriculture, nobody from either agency had discovered the cruelty and other violations which were obvious to anyone walking into the room where the animals were caged. NIH, under pressure from Congress, rescinded the grant, and officials there like to tell us that the operator of the lab was not convicted.

Mr. Speaker, he was convicted of animal cruelty twice—one before a judge, and, after appealing for a jury trial, again before a jury. The Maryland Court of Appeals dismissed the convictions on the far-fetched premise that since the operator was using Federal funds, he couldn't be convicted of State cruelty charges.

Since 1981, some of the monkeys have died. Some—those not used in the research project—were accepted by the San Diego Zoo. Eight remain at the Delta Regional Primate Center in Louisiana, despite the wishes of hundred and hundreds of Members of the House and Senate, who, over the past several Congresses, have cosponsored legislation and cosigned letters to Health and Human Services Secretaries and to NIH officials, calling for their relocation to an animal sanctuary in Texas.

Mr. Speaker, in the last Congress 134 of us in the House and 8 Senators cosponsored the legislation to relocate them to Primarily Primates, Inc., the sanctuary, where they could live out the rest of their time in an atmosphere of resocialization—something NIH promised Congress would happen at the Delta Regional Primate Center—but which has not happened.

Moorpark College in California, a school which specializes in training people to work with animals, would also like to have the eight remaining monkeys. It has checked the monkeys and offered to take them but NIH won't allow that relocation either.

NIH always claims spuriously that the monkeys still belong to the owners of the Silver Spring lab, despite a letter NIH received years ago, saying that the firm relinquishes all claims.

Now, what does NIH want to do with the monkeys, Mr. Speaker?

Despite promises Members of the House and Senate have in their files from MIH saying NIH will not perform any further invasive procedures on the monkeys, it has announced that it wants to resume the experiments on three of them.

NIH says it wants to insert electrodes in the brains of the three, purportedly to complete the experiments begun so long ago, and then it wants to kill them.

Congressional protest, and a court action in Louisiana, has blocked this, at least temporarily, but standing to sue is a big issue.

Mr. Speaker, there's not an iota of scientific good that will come from resuming the experiments started so long ago in Silver Spring. No, Mr. Speaker, this is a case of bureaucratic intransigence, plain and simple.

What we have is the adamant obstinacy of the bureaucrats who run NIH, spurred on by the research community's grant grabbers. They can't admit that laboratory horror shops exist. The just will not bring themselves to say to the millions of Americans who are involved in animal protection that yes, finally, the remaining Silver Spring monkeys can go to a sanctuary, Mr. Speaker. No, they want to say that they taught the animal lovers who really runs the show—showed the animal lovers that despite everything they tried to do on behalf of the Silver Spring monkeys, they died with electrodes in their brains.

And, if the judicial process now getting underway in Louisiana ends up by denying standing, by denying the monkeys the protection of the courts, the bureaucrats may win and the animal lovers may lose.

Mr. Speaker, it's a power play, plain and simple on the part of NIH and the researchers, and the monkeys are the pawns. But, if the grant grabbers and the bosses of NIH end up winning, if they end up having the last laugh they want so badly, well, they won't won't be laughing long.

If they prevail, and kill the monkeys, they're are going to see a wave of opposition they won't be able to contain. And they ought to know that—after all, their adamant obstinacy starting in 1981 in Silver Spring, and running through the 1980's right to today, has caused hundreds and hundreds of thousands of people to join animal protection organizations. Mr. Speaker, they're going to see opposition like they've never seen before.

Mr. Speaker, research is going to go on. When I testified before Chairman Frank's subcommittee last September, I said, and I'm quoting:

As a matter of fact, medical research is extremely important and I know and believe that animals will have to be used in future research to make great advances.

But the fact remains that the U.S. Department of Agriculture, and it admits to this, it admits that it has not properly enforced the Animal Welfare Act.

The Animal and Plant Inspection Service says Congress does not give it enough money to enforce the Animal Welfare Act.

Mr. Speaker, during the hearing, Chairman FRANK drew a "yes, sir," from the agency's Director when he asked him if he got what he asked for. He just hadn't asked for enough money.

This year's funding is $6,197,000. The 1990 budget request is $7,567,000—a $1,370,000 increase, but the budget request ought to be $12 to $14 million. Mr. Speaker, the Department has an obligation to enforce the act, and part of that obligation is requesting the funds to enforce it.

The low request is just another indication of the need for a standing to sue bill. But there is another reason to support this bill—it is cost effective. Mr. Speaker, researchers say that they cannot produce good results when animals don't receive the care they need. So, we end up with results that don't make a contribution because of ill, mistreated animals as subjects of experiments.

Mr. Speaker, fairly regularly, someone at NIH who is incensed over its leaders attitude about animal care, discloses what has come to be called an "attack" plan against supporters of animal protection. Back in September 1987, a top-level meeting was held at NIH that produced a memo from the Director of In-

tramural Research to other directors suggesting such an attack against the animal protection organizations.

The memo said "although it is important that we continue to work toward 'having our house in order,' we must realize that by making this our major focus, we tacitly accept the premise of the animal rights' movement and play into their hands."

Mr. Speaker, isn't it almost incomprehensible that these high officials don't realize that the more they get their house in order—the more humanely and less wastefully they run their labs—the better off they and the cause of research will be? Maybe they do, Mr. Speaker, but maybe they would rather fight than do what is right, because that would be admitting what they have been doing, and are now doing now, is wrong.

The memo says that they should focus on the diseases that generate public interest—AIDS for example, and lobby the Congress against animal protection groups interests.

Mr. Speaker, a 100th Congress continuing resolution report specifically points out that "because an animal model has not yet been found that mirrors human AIDS and HIV infection, AIDS research efforts have been complicated and slowed." But they're not coming over from NIH and telling us that, Mr. Speaker, they're coming over and telling us about their chimpanzee management plan, which takes millions that are supposed to go for AIDS research and gets spent on a chimpanzee breeding program that has little likelihood of working, according to experts on chimpanzees.

Their memo goes on, Mr. Speaker, to discuss front groups that NIH would direct and supervise and fund behind the scenes, in what looks to me like a series of illegal activities.

You have to wonder, Mr. Speaker, why these highly educated people would think along the lines they do when it comes to dealing with the animal protection situation?

Don't they know the law says they can't use appropriated funds to try to influence Congress? Don't they know that none can be used by a contract holder to influence Congress? Don't they see how counterproductive the attack method is to their own objectives?

Mr. Speaker, this issue isn't going to go away. Our mail tells us that, but our hearts tell us that also. Let's support humaneness.

CAPT. GEORGE BARRY LOCKHART

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Mississippi [Mr. MONTGOMERY] is recognized for 5 minutes.

Mr. MONTGOMERY. Mr. Speaker, on Monday I attended funeral services for Air Force Capt. George Barry Lockhart, who was shot down over Hanoi while on a bombing mission on December 21, 1972. His remains were returned to the United States by the Vietnamese last year.

It was thought that Captain Lockhart was killed in the crash, and indeed, his status was changed several years ago from MIA to killed-in-action. But no services were ever held. I know his family is relieved to finally bring him home.

I want to share with my colleagues the obituary of this brave young man who gave his life in service to this country.

CAPT. GEORGE BARRY LOCKHART

Barry Lockhart was born February 17, 1947, in Tucson, Arizona. After attendance at a number of primary and secondary schools, he graduated from Hammond High School, Alexandria, Virginia, in 1965. While there he served as Vice-President and President of his class and lettered in three sports.

After high school he received an appointment to the United States Air Force Academy from which he graduated and was commissioned a 2d Lt. USAF, in June 1969. In addition to academic pursuits he participated in a varsity sport and commenced flying training.

Following graduation from the academy, Barry went to flight training at Columbus AFB, Mississippi, where he met and married Kathryn Hutchinson. After receiving his Pilot wings he went on to B-52 training at Castle AFB, California, and then to the Strategic Air Command base at Blytheville, Arkansas. While on temporary duty from that base he completed a combat tour flying from Utapao RTAB, Thailand, and was then assigned a second tour, flying from Andersen, AFB, Guam. During "Linebacker II", one of the final combat missions of the Vietnam conflict, on 21 December 1972, Captain Lockhart's B-52 stratofortress was hit by surface-to-air missiles and crashed just north of Hanoi. Only one crew member was known to have survived.

Captain Lockhart was 25 years old when he was listed as missing-in-action. He had completed 102 combat missions flying in B-52 aircraft. His military decorations include: the Distinguished Flying Cross, The Air Medal, with four oak leaf clusters, and the Purple Heart. He was a member of the St. Andrews United Methodist Church and the Army Navy Country Club.

Captain Lockhart is survived by his parents Colonel and Mrs. George M. Lockhart, USAF (Retired), of Alexandria; his former wife, Mrs. Kathryn Elliot of Englewood, Colorado: his brother Robert, wife Ruth and their son Barry of Alexandria, Virginia.

TRIBUTE TO JAMES G. O'HARA

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Michigan [Mr. FORD] is recognized for 5 minutes.

Mr. FORD of Michigan. Mr. Speaker, I rise today on this special order that has been requested by a number of the friends and former colleagues of the late James G. O'Hara, who served with us may years with distinction.

Before recognizing the people who would like to speak here today, I would like to put in the RECORD a sort of frame of reference by putting into the RECORD Jim O'Hara's biography as it would be written, and will be written, in the books, and then we will hear from the literally dozens of people who have sent statements and who will speak today how this person described in this biography came through and was perceived, particularly during the years that he served here. There are a number of people like former President Gerald Ford, former Speaker Tip O'Neill, who put it much better than I can, and I will see that their statements are in the RECORD as well as many other distinguished Americans who at one time or another came in contact with Jim O'Hara in his professional and political life.

Jim was the oldest of three children, born November 8, 1925, here in Washington, DC. His family moved to Detroit in 1939, and he graduated from the University of Detroit High School in 1943. As a child and a teenager, Jim loved baseball and later basketball and remained a great fan of both sports for his entire life, taking great pleasure in taking his own children to their first games.

He loved his parents and his sister and brother, and the family members took care of each other through many crises.

An often-retold story about him as a teenager reflected on his later life. In order to make some money one summer, he tried to sell ice cream from a cart. His venture lasted only a few days because he gave away so much ice cream to the poor children that he could not hope to turn a profit, and the experience left him sad and he wished he could do something more to help.

With his parents' permission, he left and joined the U.S. Army and became a paratrooper. He was sent to the Pacific with the 11th Airborne Division in 1944 and fought in the invasion of the Philippines and subsequent allied campaign there. He entered Japan immediately after the surrender and served in the occupation forces until honorably discharged in 1946. Jim was always an enlisted man and left the service with the rank of sergeant. I will say parenthetically that one of the services offered a kind of an honorary reserve commission when he came here, and his response was that unless he could have his old rank back, he was not interested and, of course, they did not have sergeants in that group here in the 1950's.

When he returned from the war, he entered the University of Michigan, but there his studies were interrupted by a long life-threatening battle with tuberculosis. He not only survived but he made the best of the tough circumstances, because he met a nurse while he was in the hospital at the University of Michigan, Susan Puskas, who became his wife and the mother of their seven children.

Their family was well under way when Jim graduated from the University of Michigan Law School in 1955, but by then he had heard of a Father Clement Kern, a person who everybody that I know who had the great honor in their lifetime to meet would certainly nominate for sainthood, who was fighting battles constantly for the

poor people on the near west side of the city of Detroit.

□ 1610

He operated out of Holy Trinity Catholic Church, and to this day functions are continuing in his name for poor people.

Jim hooked up with Father Clement Kern, and that was his first opportunity to really exercise his new-found legal skills on the side of the poor and the people who needed the help the most. He represented indigent clients, and even successfully took several appeals to higher courts, including going to the sixth circuit court of appeals. One of the messages we have today is from a longtime friend of Jim's and ours who serves on that court. He won in that sixth circuit one of the early important search-and-seizure cases that still is precedent.

He became involved in Macomb County Democratic politics and was chairman of the active Shelby Township Democratic Club in 1957.

From there he decided to run for Congress from Michigan's Seventh District in 1958. That was a hectic campaign and it was the first time I heard of a fellow named O'Hara. And after two recounts, Jim was declared to be the winner by five votes in the primary election.

There is a little side story, Mr. Speaker, about that. Jim liked to kid me, until very recently, about the fact that if I had been a better lawyer in 1958, he never would have been here, because I was one of the lawyers on the other side in those recounts, and I never had the opportunity to look back at an effort that left me disappointed and feel so happy that I was, indeed, disappointed in the outcome of that particular fiasco, two recounts because we were really doing everything we could to keep Jim from winning that primary. He won it, and then went on to win the seat which he held for many years, and from that seat he served in this Congress and made a name for himself in a number of ways.

I will add the rest of the details here into the RECORD so that I can leave time for other speakers.

Jim O'Hara was many things to many people. But I like to remember him best as a man of extraordinary compassion for his fellow man—and especially those of the working class. For the ordinary people of our country he had a special affinity and understanding.

I am happy that I had some small role in the renaming last week of the important Service Contract Act as the McNamara-O'Hara Service Contract Act. A directive to this effect was issued last week by Labor Secretary Elizabeth Dole, who said about the late Congressman in a letter to his widow, Sue:

His tireless efforts in the Congress to improve the welfare of American workers took many forms, but the Service Contract Act stands as a monument to his dedication and an example of his legislative skill.

Jim had discovered that workers under a contract with the Federal Government for the delivery of mails were being paid considerably below the prevailing wage for such work. He learned as well that prevailing wage laws with respect to Government contracts—and there were many in addition to mail delivery contracts—did not apply to service contracts.

His concern and consternation led to passage of the Service Contract Act. It was pure O'Hara, who worked out the legislation with the late Senator Patrick V. McNamara of Michigan.

Make no mistake. Jim's agenda was pro labor. And, no matter how unpopular an issue, he remained true to his principles.

He was especially known for his very own brand of developing skillful and effective legislative strategies. He was a master parliamentarian whose skill was always in demand. And this certainly was why he was picked as chairman of the Democratic Party's Rules Commission from 1969 to 1972. He used his superb knowledge of House rules to help steer through landmark legislation, including key portions of the Civil Rights Act of 1964.

Jim's dedication to liberal principles was legend in this Chamber. He was a founding member of the Democratic Study Group and served as its chairman.

Mr. Speaker, it would take me a full day to summarize the many virtues of this fine and honorable man who was taken from us much too soon.

I think his character is summed up very well, however, in the following few paragraphs for one of our former colleagues, John Brademas, who is now president of New York University, and who at my request offered these comments:

Jim O'Hara and I came to Congress together in 1959 and for 18 years sat alongside one another on the House Education and Labor Committee where we became not only political allies but close friends as well.

Jim was unquestionably one of the ablest and most effective legislators I have ever known. He was a person of uncommon intelligence and impeccable integrity.

He brought zest and exuberance and a keen sense of humor to everything he did.

As every one who served with him in Congress will attest, he was a parliamentarian without rival.

Beyond all this, his service in Congress was motivated by a deep commitment to the concept of justice.

I extend my profound sympathy to his widow, Sue, and his entire family.

Mr. Speaker, I would like to insert as well the following remarks from our former colleague Frank Thompson in his eulogy at Jim's funeral:

Jim O'Hara was a man of enormous courage. This manifested itself all through his congressional service. Can you imagine what kind of courage it took to stand up to convictions time and time again at great political risk when you won your seat by only five votes? Jim never wavered on principles, however, and his vote margins in subsequent elections grew and grew.

I best remember Jim for his devotion to working men and women—their pay and benefits and the education of their children.

I remember him, too, for his magnificent legislative skills. When other members were about to go to the floor with difficult legislation, they invariably sought the advice of Jim O'Hara rather than those who fancied themselves as parliamentarians. He was right in advance—not just on Monday morning.

After he left Congress and joined the Washington law firm of Patton, Boggs & Blow, Jim and I remained close friends. And I can tell you that to the practice of law he took the same high standards and abiding integrity that so characterized his service in Congress.

I know it can be safely said that Jim O'Hara made a difference.

But Mr. Speaker, let me just make a few personal observations.

We set aside this time to pay tribute to Jim, who for almost two decades served here from Michigan's 12th Congressional District. It is altogether fitting and proper that we do this, because few men in our time have given so much of themselves and their talents for the benefit of the institution we have the honor to serve in, and the purposes for which it gives us the chance to serve.

Jim was many things to many people, but I like to remember him best as a man of extraordinary compassion for his fellow man. Sometimes people used to unkindly lump him in with the bleeding heart liberals that worried all the time about the poor folks. In the finest sense of the word, when anyone hurt in this country and Jim found out about it, he was the kind of person who would bleed with them, and seriously consider doing what he could to make their life better.

He was standing boldly here for civil rights legislation when it was not too popular in his almost all white suburban district, and he was a leader among all of us from Michigan and took more flak than the rest of us, took a lot of flak that some of us should have taken because we voted right along with Jim. But after all, he was the leader.

He was also a leader of the reforms of this institution, and I think less than fondly about some of the reforms. When I first came here, I followed Jim's leadership when we railed against the fact that chairmen could be so autocratic that they could unilaterally decide what was going to get into their committee and what was going to get out of their committee, and that was it. The gentleman from

Michigan [Mr. DINGELL], Chairman JOHN, said that was a great era. But we joined in and followed Jim's lead to democratize this place and to make the chairmen more answerable to the Members of the body. Serving as a chairman, one might long for the good old days, but the fact is that I think it has improved the institution greatly, and it has made the chairmen, all of them, I think more responsible to the membership than they once were.

Jim's name is on a lot of legislation, but the kind of legislation we find Jim on almost invariably had at its base something for people that they could not do for themselves, guaranteeing decent wages and working conditions. He was the first one of us to go to California and march with Cesar Chavez when he heard of the terrible and shabby conditions that confronted the migrant workers. And again, Jim blazed a path for me. He worked on the plight of the migrant workers for sometime, and then, as his responsibilities for higher education became more pressing, he and other members of the committee created a subcommittee on the committee and transferred that one little bit of Jim's effort over to me, and the growers have been looking for who is responsible for that ever since. But I took a bill that Jim had been working on and we were fortunate enough to pass it in 1974, and have been fortunate enough to keep them from repealing it ever since. But it was the first time that the Congress had, since the Eisenhower days, successfully done anything to relieve the conditions of the migrant workers.

One of the communications I have is from Sargent Shriver, and as Members read in the RECORD what Sargent Shriver says, they will note that he recalls the great influence Jim had in creating things like legal services programs to provide legal services to the poorest among us, and take their problems from the streets into the courts where they could be disposed of in the same manner as wealthier people disposed of their problems.

One of the ranking Republicans who was on the committee when I came, and I was surprised when I saw it, but it is typical of former Members, who I cannot ever remember voting with Jim, remembered him fondly as a good legislator and a sincere legislator, and a person with whom it was a pleasure to work.

And as Members read Jerry Ford's comments, it might come as a shock to some of the newer Members to hear Jerry Ford recall the kindnesses from Jim when Jerry was the minority leader here in the House.

All of us who were here and served with Jim know that he was without peer in understanding the operative rules of this House. Some of us got lazy in our early years, as a matter of fact, because instead of studying the rule book, it was always easier to ask O'Hara. And I do not want to embarrass anybody that has been in the position in the past, but I once had an experience of going with a proposed amendment to the Parliamentarians and being told that it was not going to be in order. And I said, but Jim O'Hara thinks it is in order. "Well, we will look at it overnight." By the next morning, my amendment was in order. Now I do not say that in any way at all to denigrate the very valuable work they performed and the professional way in which they do it, but it sticks in my mind as an illustration of the great respect that the people in this institution had for Jim's skill with the rules.

He was not a sharpie. We do not remember him as somebody who pulled something off slick. We remember him as somebody who used the rules to reach a result, democratically arrived at and democratically done, and in Jim's own way that was a democratically with a capital "D."

He was never ashamed of his party, never ashamed of the fact that he befriended people on the other side of the aisle as well. But there was never any doubt about James G. O'Hara's political party.

The biography and messages from former colleagues and friends follows:

BIOGRAPHY OF JAMES G. O'HARA

Jim O'Hara was the oldest of three children, born November 8, 1925 in Washington, D.C. His family moved to Detroit in 1939, and he graduated from the University of Detroit High School in 1943.

As a child and teenager, he loved baseball and later basketball and remained a great fan of both sports for his entire life, taking great pleasure in taking his own children to their first games. He loved his parents and his sister and brother and the family members took great care of each other through many crises. An often retold story about him as a teenager reflected on his later life. In order to make some money one summer, he tried to sell ice cream from a cart but the venture lasted only a few days because he gave so much ice cream away to poor children that he could not hope to turn a profit. The experience left him sad and wishing he could do something more to help.

With his parents' permission, he joined the U.S. Army in late 1943 and became a paratrooper. He was sent to the Pacific with the 11th Airborne Division in 1944 and fought in the invasion of the Philippines and the subsequent allied campaign there. He entered Japan immediately after the surrender and served in the occupation until honorably discharged in 1946. He was always an enlisted man and left the service with the rank of sergeant.

When he returned from the war he entered the University of Michigan, but his studies there were interrupted by a long life-threatening battle with tuberculosis. He not only survived, he married a nurse who cared for him there in U-M Hospital, Susan Puskas.

Their family was well underway when Jim graduated from University of Michigan law school in 1955. He had heard of a Father Clement Kern who was fighting battles for the poor of Detroit from Holy Trinity Catholic Church, and he went to volunteer his help. There he represented indigent clients and even successfully took several appeals to higher courts including the 6th circuit, where he won one of the important early cases on search and seizure.

He became involved in Macomb County Democratic politics and was Chairman of the active Shelby Township Democratic Club in 1957. From there he decided to run for Congress from Michigan's 7th district in 1958.

The campaign was hectic and after two recounts was declared the winner by five votes in the primary. He won the general election in November, the first Democrat in the twentieth century to represent that district.

Jim arrived in 1959 and immediately joined both the Committee on Education and Labor and the then fledgling Democratic Study Group. One of his earliest tasks in the latter was to research an obscure parliamentary point. He did so, and so began a career that would make him a leading authority on the rules and their tactical uses. By 1960 he had used his new skill to force a vote by the full House on the child labor issue. Although he lost, he would never stop his desire for reform and progress and never stop using the rules to make life uncomfortable for his opponents.

His DSG membership gave him a useful forum to fight for his views on civil rights, and in 1960 he was a leading proponent of a major Voting Rights title, which the House passed as an amendment to the Civil Rights Act of 1960. It angered him that the provision was dropped in the Senate but five years later it would form the core of the Voting Rights Act.

He was a leading force on many landmark labor, civil rights and education legislation in the early sixties. The Manpower Retraining Act of 1962, a bill to promote retraining of displaced workers was one of his early accomplishments. He worked day and night on the Civil Rights Act of 1964, even coming in to the Justice Department one weekend to work with Robert Kennedy to draft portions of the Act, most notably Title VI, which forbids discrimination in institutions receiving federal money.

In those days he also was active in the adoption of the 21-day rule which prevented the House Rules Committee from bottling up legislation for longer than three weeks. By 1965, he was the driving force behind the O'Hara-McNamara Act which forbade government contractors from paying less than prevailing wages in contracts for services. He was very active in support of the Voting Rights Act, the beginnings of the student aid programs we know so well today and increases in the minimum wage.

By the mid-sixties, Jim and Susan had seven children, all in school, with active lives and interests, and problems too. They had to deal with such problems as hemophilia and epilepsy with several of the children. On several occasions they had to keep a vigil at the hospital while a child's life hung in the balance. Even calmer times could be punctuated by a sudden need for visits to far away doctors or hospitals for specialized treatment. For Jim, his family came first and the House sometimes had to do without him for a short while so that he could meet that first obligation.

In the House, his endeavors continued to bear fruit. In the late sixties, he spent six years working on the House Interior Committee where he was most proud of the work he did to create the Sleeping Bear Dunes National Lakeshore along Lake Michigan in the lower peninsula of Michi-

gan. He became the Chairman of the DSG in 1967 and was a leading influence on that organization's decision to try to reinvigorate the Democratic Caucus as an instrument of reform in the House. He understood the Caucus rules and how they could be used to bring reform. When the Caucus reformed the seniority system to what we have today, it used the formulation he devised. The Caucus was also an instrument of reform in the House, and he was a prominent leader when the Caucus forced changes in the House which we today take for granted. Before the reforms, most committee markups were held in secret and crucial votes in the Committee of the Whole were not recorded. These practices were ended in the seventies, in large part thanks to his vision and parliamentary skill.

Throughout the late sixties, he constantly pushed to get America moving toward a better future. He held hearings which caught the nation's ear and led to changes it needed. He was appalled when he discovered that airlines forced stewardesses to "retire" at 32 years of age because they were thought to be no longer appealing enough for the male business traveler. His "stewardess" hearings got serious nationwide attention and formed the underpinnings in the public mind for federal legislation against age discrimination and later sex discrimination. He took up the cause of the migrant farm workers and was the first prominent public official to go to California and march with Cesar Chavez and the UFW. The hearings he conducted called national attention to the disgraceful plight of the migrant workers.

He pushed through the Metal and non-Metallic Mine Safety Act of 1966, as he and others reacted with horror at the shameful recurrence of mine disasters. The introduction of federal regulation to the field of mine safety has drastically reduced mine accidents. It was also a mine story, this one about radioactive exposure of workers in uranium mines, that led him to sponsor a comprehensive bill which he called the Occupational Safety and Health Act (OSHA). He was the original sponsor of that landmark legislation to protect all Americans on the job.

His fields of interest were not limited to labor, education, civil rights and reform. With a foresight that seems haunting from the vantage point of today, he introduced legislation to require airport X-ray of all luggage for weapons or bombs. The bill attracted wildly negative editorial comment nationwide and never went anywhere, unfortunately. And on a lighter note, (literally), he proposed to make the Stars and Stripes Forever into our national march, a measure which has since been adopted.

In the late sixties, he took up a new hobby, sailboat racing. For the rest of his life racing his various boats would be his purest joy. Like so much else he did, it was originally a family outing idea. He raced classes where he could take several children with him at once but after a bizarre accident on the Bay in 1970, he decided he needed a safer boat and his quest led him to a fast, Olympic class, two-man racing keel boat called the International Tempest, which had among its many fine attributes, an indestructible design and construction.

He started out losing but with the help of his faithful crew, son Tom O'Hara, he persevered to become a champion. Four times Chesapeake Bay Yacht Racing Association Champion, five times Severn Sailing Association Champion and, in 1982, North American Champion of the Tempest Class. Along the way, he won countless trophies for victories in individual races and regattas. He even journeyed to Europe for the Tempest Worlds on three occasions and did well in numerous races.

In 1970, he mounted a campaign for House Majority Leader. Although he ran a spirited race, he was defeated in the first round of balloting. Of course, the position was eventually won by the Honorable Hale Boggs.

After that defeat, however, he continued an active career in the Education and Labor Committee. He played a very active role in the Higher Education Amendments of 1972 and the leading role, as Chairman of the Subcommittee, in the Higher Education Amendments of 1975. These bills overhauled, reworked, restructured, and coordinated federal aid to higher education, both to students and to colleges. The federal programs in higher education we know today were structured and coordinated in those laws. He was most proud of the College Work Study Program which he devised and pushed through to subsidize jobs for students who wished to work their way through college. He was also influential in the enactments of Title IX, the famous provision which required equal treatment for women in college athletics.

Throughout the period beginning with the 1968 presidential campaign and running through the 1980 campaign, Jim O'Hara was one of the leading figures in the reform of rules in the Democratic Party. After leading the Humphrey forces in the Credentials Committee in 1968, he had too close a view of that disastrous convention. Afterwards, he chaired the O'Hara Commission from 1969–72 and the Rules Committee of the 1972 Co-Parliamentarian of the 1976 convention. In these posts he led the party into the modern age of conventions and helped ensure that minority views would always be fairly heard and voted on, hopefully precluding another convention like 1968. After the 1976 convention, he served as Chief Justice of the Judicial Council of the Party and, later was the rules advisor to the Kennedy campaign in 1980.

After 18 years in the House, he decided to run for the Senate seat from which Michigan's Senator Phil Hart had decided to retire. Despite a spirited campaign, he finished third in the Democratic primary. This brought his career in Congress to an end. One of his final acts was the consolidation of his papers for the Bentley Library at the University of Michigan.

In January, 1977, he began his career as an attorney with Patton, Boggs and Blow. He became known as one of the most respected and effective attorneys and lobbyists in Washington. He enjoyed the work and the people at Patton, Boggs and Blow and he remained there until he died.

He remained very active in public affairs. He was first a member and later Chairman for two years of the Minimum Wage Study Commission from 1979–81. The Commission concluded that the minimum wage did not cause unemployment and should be raised. In an unplanned but fitting tribute, the House passed an increase in the minimum wage the week he died.

His last political crusade concluded only days before he fell into his final illness. He was a decisive force in the campaign to elect Ron Brown as Chairman of the Democratic National Committee, the first black to chair either major national party's national committee. It was a fitting conclusion to a life dedicated to civil rights.

James G. O'Hara died on the night of March 13, 1989 and was buried with full military honors in Arlington National Cemetery on March 17, 1989, St. Patrick's Day.

Remarks of Hon. Thomas P. O'Neill, Jr.

Mr. Speaker, it is with great fondness, and a sense of saddness that I speak today on the passing of my dear friend Jim O'Hara, I know that many, many of my colleagues share my fond memories of Jim as a good friend, exceptional legislator and remarkable person.

Jim and I served together for many years and I always admired his tireless efforts on behalf of those less fortunate than most of us, Jim was instrumental in legislation that improved the quality of life, education and standard of living for millions of Americans, not just those in the 12th district of Michigan, but millions of Americans.

Jim was a champion of civil rights, of labor, but most of all, the family. My heart goes out to his loving wife Susan and their children, for I can feel only but a bit of the loss that they share. Jim was a fine husband, father, and American. His loss will be felt by many, but I hope they take comfort in the legacy of honor and accomplishment that Jim left for everyone. Mr. Speaker, America lost a fine son.

Former President Ford's Remarks Regarding Congressman Jim O'Hara

Mr. Speaker, Congressman Jim O'Hara was a long time, dear friend and an outstanding member of the U.S. House of Representatives from Michigan during most of the years that I served in the Congress.

Although we represented different political parties and had partisan views that frequently clashed, I had the highest respect for Jim's integrity and ability. He was a hard working, thorough and responsible member of the Committee on Education and Labor. In floor debate, Jim O'Hara was most effective because of his knowledge of the issues and his articulate presentation.

Congressman Jim O'Hara always represented his District, the State of Michigan and the Nation with the highest honor and dedication.

I will forever be grateful for Jim O'Hara's many personal kindnesses, while I was House Republican Leader and in the White House. I treasured his friendship.

Remarks of Hon. Martha W. Griffiths, Lieutenant Governor, State of Michigan

I am pleased to join with the Michigan Congressional Delegation in this special tribute to a former friend and distinguished colleague.

Jim O'Hara was an outstanding public servant and one of Michigan's finest. He served in Congress believing that government was an instrument to be used in improving people's lives. His imprint, today, is on major legislation enacted during the 60's and 70's that improved the lot of the American worker and raised the standard of living for all Americans.

Jim was a hardworking lawmaker and persuasive leader. His word was trusted and his judgment respected. He also was loved by the people of his district, who knew that he was in public life not for what he could get out of it, but for the good he could contribute.

I am proud to have served in the House with Jim during a turbulent and exciting period in our nation's history. Undeniably, the quality of his leadershiup helped shape

a fairer and more compassionate society. He will be remembered for his many accomplishments, which continue to ensure Americans a life of greater opportunity and contribution.

REMARKS OF HON. SARGENT SHRIVER

Jim O'Hara was truly an "unsung hero" of the United States Congress. That's because he didn't seek praise for himself, nor did he search for positions of power from which he could dominate others. Instead, Jim O'Hara figured out how best to get constructive action regardless of who received the credit. He was superb in achieving profound improvements in our Government, improvements which are still benefitting millions of Americans.

Most of all, I personally remember his stalwart support for all of the specific programs which made up the famous "War Against Poverty" initiated by Lyndon Johnson. It was legislators like Jim O'Hara who made possible the creation and continuation even to this day of such valuable new initiatives as Head Start, the Job Corps, Legal Services For The Poor, VISTA, Neighborhood Health Centers, Upward Bound, etc., etc. Without him, and his fellow activists, none of these creative and still existing initiatives would be with us today.

In addition to these specific programs, Jim could be accurately described as a "programmatic Democrat", a legislator who believed that government existed to promote the common wealth and owed a special sensitivity to the needs of the poorest, the least well educated, the elderly, the sick, and the newcomer longing to be free. So, it was Jim who with Hugh Carey of New York produced the new formula which made it possible for the Federal Government to assist public schools and parochial schools with special and other non-curricula help. Their formula overcame the age-old barrier preventing any nationwide assistance through the Federal government to the schools of America. Millions of students and thousands and thousands of families owe a deep debt to Hugh Carey and Jim O'Hara for this imaginative and profound contribution. Jim served also on the Higher Education Subcommittee of the Congress. He was one of the first who recognized the plight of migrant workers and ultimately succeeded in gaining help for them.

His accomplishments in Congress could be listed one after another for several pages. Very few people ever achieve so much while at the same time making so many friends and alienating practically no one at all. Jim was a true gentleman, compassionate, intelligent, dedicated lawmaker, a true believer in his religion which inspired his life and his work.

There never will be enough Jim O'Haras in this world. No wonder we all miss him so deeply and mourn his passage; but, then, we can all rejoice in the certainty that he is already where he wanted to be, in Heaven with his Maker and his Friend.

REMARKS OF BARBARA FRUSH

Mr. Ford, thank you very much for the opportunity to speak on behalf of my dear friend, Jim O'Hara.

Jim O'Hara was a special man. He was, in fact, the finest man I have ever met. He was my teacher, my employer, but, most important, he was my friend.

When I came to work for Jim O'Hara over 25 years ago, I was just out of school. Aside from the political courses I had taken, I was ignorant to the workings of the Congress. I guess by the O'Hara standard, we all were. However, during most of the exciting years that followed, Jim O'Hara would come back to the office after hours on the floor and explain all that happened that day and why. We sometimes felt that he told us more than we would ever need to know, but we were wrong. On various occasions, he would call the office and have staff members come to the Gallery to view historical debate on controversial issues. It mattered to him that we learned and grew. And grew we did. We grew to love and respect this man we referred to as our "leader", our "skipper" because of his love for sailing.

When in 1976 he left the Congress—not by choice—we cried as we pulled the door closed on our office for the final time. But true to the O'Hara tradition, we remained in constant contact and formed the "First Friday Club" that met intermittently over the last 13 years to continue our learning from Jim O'Hara. He called us his extended family. And this was quite an honor because his family was the most important thing in his life. He and his beautiful bride, Sue (as he referred to her), and their children have allowed us to remain an important part of their lives.

Jim O'Hara was a special man. He could laugh at his mistakes, find humor in tough situations, lick envelopes and fold letters when work got backed up in the office and always be there when you needed him. He was no more than a phone call away no matter how busy he was. I loved Jim O'Hara and I will miss him tremendously.

He was a great politician, statesman and caring human being. He certainly left his mark on the many lives he touched.

NEW YORK UNIVERSITY,
New York, NY, April 17, 1989.

MR. TOM JOYCE,
Cannon House Office Building,
Washington, DC.

DEAR TOM: Here, in response to the letter to me of April 7 from John Dingell and Bill Ford, is a statement about Jim O'Hara for inclusion in the Special Order they are arranging.

I am very grateful to have been asked to add my own tribute, which follows:

JIm O'Hara and I came to Congress at the same time, served alongside one another for eighteen years on the House Committee on Education and Labor and were political allies and fast friends.

Jim O'Hara was without question one of the finest persons in terms of intelligence and integrity whom I have ever known in public life. He was as well a warm and engaging human being.

Beyond all this, he was a brilliant legislator, without rival in the House of Representatives as a parliamentarian and, still more to the point, a person who was deeply dedicated in his service in the House to seeking social justice and opening the doors of opportunity for all the people of our country.

To his widow, Sue, and their children, one of whom, Ray, worked with great distinction as a member of my staff when I served as House Majority Whip, I extend my deepest sympathy on their great loss.

Sincerely,

JOHN BRADEMAS.

BETHESDA, MD, *April 17, 1989.*

MR. SPEAKER: It was my pleasure to have served with Jim O'Hara in the House for twelve years on the Education and Labor Committee. We were good friends even though we differed on many issues.

In his quiet way, Jim was an effective legislator. When he lost he did not sulk. When he won, he did not gloat. He fought hard for his views but respected the right of others to differ. He was a very likeable person and I consider it a privilege to have known him.

WILLIAM H. AYRES.

REMARKS OF CHARLES S. JOELSON

It is about twenty years since I retired from the House to become a judge, but my memories of Jim O'Hara are still fresh and clear. Paradoxically, the reason why he is so well remembered is that he was so modest, thoughtful and able that he did not need to resort to flamboyance or showboating to be noticed. His erudition and unassuming personality made him respected and admired by colleagues of both political parties. He was brilliant parliamentary tactition, and I benefited from his wise counsel on many occasions. He personified the word "gentleman" and I was saddened to hear of his passing.

ASSOCIATION OF JESUIT COLLEGES AND UNIVERSITIES,
Washington, DC, April 11, 1989.

MRS. SUSAN O'HARA,
Alexandria, VA.

DEAR MRS. O'HARA: While I remember well the occasions in which Jim and the higher education community met to argue the merits of various bills, we never had the opportunity to meet you. I hope, however, that you accept these remarks in the spirit that all meetings with Jim exhibited: thoughtful consideration.

I last saw Jim shortly before Christmas last year, walking in the Longworth building, and we stopped and chatted about things past. It was not new to him that there was little change in the problems and activities of post-secondary education; it was worth a chuckle. Jim seemed well and he talked about his work at Patton, Boggs & Blow as interesting and fulfilling. And that his family was growing.

I shall pass on to you one memory: a letter Jim has written to me on October 7, 1975. Jim Harrison tells me that neither he (Harrison) nor his staff wrote it for him. It concerns the fact that my association—well, you'll see from the text, but realize that your husband had a good sense of humor:

"I think I will be able to get over the shock of discovering that we are not in total accord on all student aid matters, but when you are in disagreement with O'Hara and with most of Dupont Circle, you may well be doing something right."

I hardly may mean much to you out of context, but I love the expression. I shall keep Jim in my prayers, and also you and the family who must suffer from his loss.

Respectfully,

JOSEPH KANE,
Vice President.

REMARKS OF LLOYD MEADS

We thank Congressman William D. Ford and John Dingell for taking this special order so that the colleagues and former colleagues of Jim O'Hara can express our sentiment for the record and for the O'Hara family.

I express my sympathy and that of my wife Mary to Sue O'Hara and to the fine young men and women of the O'Hara family. These young people are the living legend of Jim and Sue and they will continue the family name in fine tradition.

Jim O'Hara was a legislators' Legislator. He was, in my view, one of the best, if not the best, legislative strategist and tactician in a city which is famous for legislative strategists.

I have had the good fortune to work with him on legislative problems both as a member and later as a lobbyist. I have also had the misfortune of opposing him on legislative matters. Believe me—with him is better.

Jim approach each legislative challenge with the zest of an avid fisherman in pursuit of a rainbow trout. Nothing pleased him more than to plot different strategies and test them on his fellow strategists. The more difficult the task the more enthused he became.

As a legislator Jim turned this talent to the love of his legislative life—education. The Higher Education Act and education funding were both enhanced because of his legislative prowess. As a lobbyist, Jim turned that same skill to the advantage of his clients and those of his law firm. He is missed in the Congress and he will be missed by his partners at Patton, Boggs and Blow.

In this era of skepticism about politicians, Jim O'Hara's public life stands as a beacon. He and Sue raised and educated a large family solely on his congressional salary. I'm certain they often wondered from where the next tuition was coming. Somehow they always managed. Only in the later years after he had established a successful law practice was there any respite from economic pressure. Despite this, Jim O'Hara always conducted himself so as to be absolutely above reproach.

But Jim O'Hara's greatest gift—the gift of himself—he gave to his family. Jim was a great family person. As his son Roy pointed out in his eulogy, Jm invented activities for his family. He loved to sail—not just because he was a fierce competitior—but because it was an activity he could share with his children. He loved to travel, but you seldom saw him travel without at least one other member of the O'Hara family present.

What Jim O'Hara gave to his family is being returned. Through them Jim continues to improve the society, to effect legislation, to educate, to compete and to care about other human beings.

The world is already a better place because he lived, but because he gave himself to his family, he will continue to give through them.

REMARKS OF JOHN B. SWAINSON, GOVERNOR OF MICHIGAN, 1961-62

Jim O'Hara was a person that I admired. We first met in the 1958 campaign. I was a candidate for Lt. Governor while he was a candidate for Congress. He exhibited the qualities that, at the time, were those admired by all. He was a family man, a lawyer, a man tested in battle and sensitive to the world he lived in, while aspiring to make it better. His advertising during that campagin was exceptional. It showed imagination and struck exactly the right note for a first time candidate. It recognized that which had gone before, while introducing a note of individuality. Can anyone forget the signs that simply said "WHO?" and then at exactly the right time revealed that it was "Williams, O'Hara, and Hart" that were seeking your vote?

Upon his election, and throughout his career as a Congressman representing the 7th District of Michigan, he demonstrated that he had those qualities that characterized that first campaign; imagination and substance.

It was my good fortune as Governor of Michigan to work with Jim O'Hara, and to depend on his judgment in many matters as they affected the citizens of our state.

It was with great sadness that I learned of the demise of my friend James O'Hara, and we all have been diminished with his passing.

NATIONAL ASSOCIATION OF ATTORNEYS GENERAL,
Washington, DC, April 18, 1989.

Mrs. SUE O'HARA,
Alexandria, VA.

DEAR MRS. O'HARA: I became acquainted with your husband in 1975 when I represented COFHE in the development of the Higher Education Act Amendments of 1976. It was a time when members of Congress and the higher education community were grappling with how to bring to pass a national commitment to equal educational opportunity. It was a time of debate (some might say wars) over issues such as access to higher education and choice among institutions. It was a time when the implications of demographic changes in the population and limited federal funding were just being perceived.

Chairman O'Hara's job was not only to help fashion but to steer this important legislation through the legislative maze. He did both with skill, with patience, and with the determination to make a difference. There are thousands of students who have graduated from college in the last decade who are the beneficiaries of your husband's determination. Some are in their twenties but many are older and were able to start new lives through Jim's efforts.

It is a legacy to be very proud of—I was honored to know Jim O'Hara and will miss him.

Sincerely,

CHRISTINE T. MILLIKEN,
Executive Director and General Counsel.

THE COMMITTEE FOR EDUCATION FUNDING,
Washington, DC, April 5, 1989.

Hon. WILLIAM D. FORD, M.C.
House of Representatives, Washington, DC.

DEAR MR. CHAIRMAN: It is my understanding that you have organized a Special Order in memory of Jim O'Hara, your close colleague in the Michigan Delegation, and on the Committee on Education and Labor.

I have, of course, met Jim O'Hara in the course of my duties as Executive Director of the Committee for Education Funding, but I have not had the delight of working as closely with him as did my predecessor Charlie Lee.

But it would be impossible to work for CEF without knowing the enormous debt this organization, and the education community which it serves, owe to Jim O'Hara for his wisdom in advice and courage in leadership in the first days and years of CEF's existence.

There are Congressional Heroes a plenty with whom CEF has worked in our continuing uphill battle to seek adequate national investment in education. But the memories of our oldest members go back again and again to the parliamentary and organization advice an embattled CEF got from Mr. O'Hara in those first years when the very idea of a floor amendment adding money to an appropriations bill was considered absurd, and without historical precedent. Jim O'Hara had read the rules many only talked about, and he helped the education community read them, too—to the benefit of millions of Americans seeking an education.

His departure is a great sorrow to all of us—including many like myself, who knew of him primarily by reputation. He will not be forgotten.

Sincerely,

SUSAN FROST,
Executive Director.

EAST DETROIT, MI,
April 8, 1989.

SUE O'HARA,
Alexandria, VA.

DEAR SUE: I am proud of my association with Jim O'Hara.

Jim O'Hara taught me that public service is a desirable and honorable profession.

Twenty-five years ago, Jim O'Hara took an impressionable, young man and instilled many of his values in him. Being that man and after 12 years of my own public service career, I am proud of those values.

I owe Jim O'Hara a lot.

Sincerely,

LEO R. LALONDE.

AMERICAN COUNCIL ON EDUCATION,
Washington, DC, April 6, 1989.

Hon. WILLIAM D. FORD,
House of Representatives, Washington, DC.

DEAR BILL: I understand you are organizing a Special Order in memory of Jim O'Hara. His loss is sorely felt in the higher education world, where he is still admired for his leadership of the House Postsecondary Education Subcommittee.

As Chairman he set new standards for committee hearings, conducting wide-ranging seminars with a variety of experts to probe the problems of higher education. The resulting legislation strengthened the foundation for the nation's current commitment to equal educational opportunity.

He never lost interest in the issues after leaving Congress, and in recent years we often sought his excellent advice on how to deal with legislative and political problems. Besides, it was always great to talk with him, and he obviously enjoyed the exchange. We will all miss him.

Sincerely,

CHARLES B. SAUNDERS, JR.,
Senior Vice President.

MIDWESTERN UNIVERSITIES ALLIANCE,
Washington, DC, April 10, 1989.

Mrs. SUSAN O'HARA,
Alexandria, VA.

DEAR MRS. O'HARA: Congressman O'Hara was a breath of fresh air in the U.S. Congress and also outside of it after he retired. I was very sorry to hear that he had passed away.

Regretfully, I never knew Mr. O'Hara personally but I am a political junkie and your husband knew more ways to manipulate the legislative process than anyone before or since. It was a pleasure to watch him at work. Let me add that not the least of the Congressman's achievements was exposing the higher education community to the wit and audacity of Jim Harrison. Jim was my link to your husband and he was and is a joy.

We will all miss the Congressman. I regret that his passing is the occasion for this communication.

Sincerely,

NEWTON O. CATTELL,
Director.

ROCKVILLE, MD, *April 7, 1989.*

SUSAN O'HARA,
Alexandria, VA.

DEAR MRS. O'HARA: Jim O'Hara was all you could want in a man, a Democrat or a Member of Congress!

He was thoughtful, brilliant actually, compassionate and vigorous. A few people have these characteristics, too; Jim was also genuine, tolerant and suffering as he sought care for humans in need.

I remember his brilliance in leading his party, whether in exhorting the masses to do better or in leading us out of inextricable parliamentary morasses. He had the entire range of talents.

Maybe his chief strength, to me who sometimes held different approaches, was his great ability to sit as friends, argue issues on their merits—and never carry any negative sentiments over to the next issue.

I grew up with Hubert Humphrey; he was like that, too. Each is a truly great American!

Sincerely,

HOWARD E. HOLCOMB.

ADVOCACY INSTITUTE,
Washington, DC, April 10, 1989.

Hon. WILLIAM D. FORD,
Washington, DC.

DEAR MR. CHAIRMAN: Dick Warden told me about the special order scheduled for our friend and mentor Jim O'Hara whose untimely passing came when I was in Israel.

I started to work with Jim when I was a lobbyist for the Industrial Union Department, AFL-CIO, and he was Chairman of the Democratic Study Group. He helped teach, by example, and avoiding short cuts, the importance of knowing the rules and procedures of the House. A generation of progressive lobbyists who worked for an end to poverty, decent jobs at a living wage, and civil rights became more effective as a result. I would leave meetings with my colleagues—the late Jack Beidler (another prime teacher of procedure), Jane O'Grady, Arnold Mayer, Jack Sheehan, Dick Warden, Ken Young and others—and tell my wife "O'Hara is our most valuable player".

Jim had other talents that weren't always fully appreciated. He hunted for talent among younger legislators and found it. Sure, they should be committed to the liberal agenda, but they also had to be serious legislators, neither posturers not showboats, with a strong sense of caring about the institution of the House. Jim was always a House man. So a relative junior Don Fraser was tapped to lead the DSG with distinction after Jim's term was up.

I turned to Jim after his office-holding days were over. He was relaxed, but he always responded with a wise approach when I gave him a parliamentary or procedural problem that had us public interest lobbyists stumped.

My favorite Jim O'Hara story is one day a week before Chirstmas, I stopped in to see Jim and the office crew. Jim was beaming. He had just called a constituent to tell him that the immigration problem was taken care of. There would be no problems about citizenship. A new American would be secure in his liberty. Jim's emotion of helping an American stay here shone through.

Sincerely yours,

DAVID COHEN,
Codirector.

MICHIGAN HOUSE OF REPRESENTATIVES,
Lansing, MI, April 6, 1989.

DEAR SUE AND FAMILY: Please accept my heartfelt sympathy on the loss of your husband and father.

James G. O'Hara was a dedicated and caring individual who brought much into the lives of people throughout this country. He brought love and caring to his family. He brought loyalty and support to his friends. He brought a keen insight and success to his Party. He brought true, thoughtful and dedicated representation to the people he so ably represented in the United States Congress for eighteen years.

My association with Jim O'Hara began as a constituent when I was a high school senior. Even then he took the time to listen to my concerns and ideas. I quickly grew into a strong supporter of the man I was proud to call my Congressman. The hours I spent as a volunteer and staff member for Jim O'Hara brought me much more than I could ever have contributed. Jim demonstrated over and over his concern for his constituency and gave me the chance to learn close at hand the value of a true statesman.

In the last few years, we didn't get to speak or see each other as often as I would have liked. But in each of our conversations, he continued to be my teacher and, I'm proud to say, my friend.

Know that there are many of us who share your sense of loss. We'll miss Jim O'Hara dearly.

Sincerely,

NICK CIARAMITARO,
State Representative.

AMERICAN FEDERATION OF LABOR
AND CONGRESS OF INDUSTRIAL
ORGANIZATIONS,
Washington, DC, April 10, 1989.

Hon. WILLIAM D. FORD,
House of Representatives, Washington, DC.

DEAR BILL: As you know, I became a lobbyist for the AFL-CIO at the same time you became a member of the House of Representatives—the 89th Congress.

In those early and heady days of the Great Society, I sometimes wondered why the federation felt it had to pay me to voice its views on Capital Hill. I assumed that organized labor and its friends in Congress and the Administration could, and would, win every issue they took to the floor.

Jim O'Hara taught me that there is, and was, a lot more to passing bills in the House than simply counting to 218. He taught me to both respect and understand the legislative process—and for that, I always will be grateful. He was kind enough to frequently invite me to a sandwich lunch in his office while he showed me how to research precedents and how to use the rules. Time and again, when House members sought his parliamentary knowledge, he permitted me to help in crafting amendments and substitutes.

Jim O'Hara was considered a strong and consistent labor supporter. He was—from start to finish. He supported labor in the context of making sure that government served the needs of people who were unable to secure these needs for themselves. He believed that government is the servant of the people—not its enemy.

As a member of the Education and Labor Committee, Jim worked closely with former Rep. Elmer Holland in drafting, and enacting, what—in those days—were called manpower laws. He played a major role in passing the Manpower Development and Training Act, the Emergency Employment Act, CETA and many others. His role in winning the McNamara-O'Hara Service Contract Act is a matter of record. But, to my mind, his important contributions often are forgotten in such areas as civil rights, education, and poverty.

Jim O'Hara didn't often make headlines because he did not fit the media's image of a Member of Congress. He was not flamboyant and he didn't seek out the TV cameras. He was content to work at his craft as a politician and he was one of the very best. He knew the importance of governing, he recognized the value of good legislation and he thrived on accomplishments.

In Congress and out, Jim O'Hara brought understanding, respect and honor to our form of government and the democratic process he loved so much.

Sincerely,

KENNETH YOUNG,
Executive Assistant to the President.

AMERICAN FEDERATION OF LABOR
AND CONGRESS OF INDUSTRIAL
ORGANIZATIONS,
Washington, DC, April 5, 1989.

Hon. WILLIAM D. FORD,
House of Representatives, Washington, DC.

DEAR BILL: I think I knew Jim O'Hara almost from the time he first came to Washington. And the respect, admiration and affection that I developed for him back in those early days not only remained but intensified down through the years.

I met him first during my days as a labor writer, and I found him a man of high principle and devotion to those causes in which we both believed—the causes involving the poor, the young, the elderly, the disadvantaged.

Later I had the privilege of serving as his administrative assistant, and I learned that there was no difference between the man I had observed from the outside and the one I worked with intimately on the inside.

Jim O'Hara was a gifted legislator, a superb tactician, a skilled negotiator, a parliamentary expert, a man who deeply loved the House of Representatives which he regarded, quite properly, as the institution most representative of the American people and most responsive to their needs.

I never knew a legislator who devoted more time and energy to his constituents than did Jim O'Hara. He took seriously his responsibilities under our democratic form of government, and it was a rare weekend, indeed, that didn't find him back in his District in Michigan, meeting with the people for whom he spoke on Capitol Hill.

Yet even with the enormous demands placed on his time by the hours he spent in Committee, on the House floor, handling constituent problems in Washington and performing his duties back in the District, Jim somehow managed to carve out quality time to spend with Sue and the children, because they were at the core of his life.

The word "family" had a special meaning to Jim, and it showed forth most clearly in the way he treated those of us in his office—those, he insisted, who worked "with" him, not "for" him. His capacity for familial love was large enough to embrace all of his congressional staff, making us equal members of the Clan O'Hara.

Jim O'Hara was my friend, my colleague, my teacher, my boss—and in that order. I count it a rare privilege to have known, worked for, and loved the man—and I will

miss his warm and gentle spirit all the days of my life.

Sincerely,

EUGENE C. ZACK,
Assistant Editor, AFL-CIO News.

CHEVY CHASE, MD, *April 3, 1989.*

SUSAN P. O'HARA,
Alexandria, VA.

DEAR MRS. O'HARA: I came to work in Washington, D.C. as an intern on the House Education and Labor minority staff in 1973. Your husband was the chairman of the Subcommittee on Postsecondary Education at the time. As a novice on the Hill, I had a chance to watch Chairman O'Hara deal with the business of the committee. I was amazed at his willingness to stop and explain the importance and the history of an issue to me, a novice staffer on the Republican staff.

What struck me at the time was his courtesy and sense of fair play as the committee dealt with partisan issues and debates that touched deeply held values and beliefs. He provided strong leadership on issues of education and civil rights at a time when no one was sure what the federal role should be in those fields. Our nation is a better place because of his commitment.

The passage of time has not reduced my respect for the skill and sense of humanity he brought to a complicated job. My current work as a lobbyist and consultant keeps me in touch with the same issues we dealt with in 1973.

Each of us hopes to leave a legacy that lives on in the lives and work of others. There is no doubt about the importance of his work in Congress. On a smaller scale, I am a better and wiser person because of Jim O'Hara.

Sincerely,

JOHN B. LEE.

ASSOCIATION OF AMERICAN UNIVERSITIES,
Washington, DC, April 5, 1989.

MRS. SUSAN O'HARA,
Alexandria, VA.

DEAR MRS. O'HARA: Not many people have the chance to make as large a contribution to their country as Jim O'Hara did, and fewer still use that chance as effectively as he. Millions of young Americans are in his debt, their lives enriched by the opportunities he was instrumental in providing them. Those of us who were fortunate to work with him will always have his example of the possibilities that are opened by a life of public service.

I know I speak for the member presidents of this Association when I say that we are saddened by his death as we were enriched by his life. It is a fine thing to be able to say about any man.

Sincerely,

ROBERT M. ROSENZWEIG.

INTERNATIONAL UNION, UNITED AUTOMOBILE, AEROSPACE & AGRICULTURE IMPLEMENT WORKERS OF AMERICA—UAW,
Washington, DC, April 5, 1989.

Hon. BILL FORD,
House of Representatives, Washington, DC.

DEAR BILL, I understand that you and John Dingell are cooperating in a special order in the House on April 11 so that Members may pay their respects to the memory of our friend, Jim O'Hara. I appreciate the opportunity to share with you and John some of my thoughts about Jim.

I came to Washington as a journalist in 1961 under the auspices of the American Political Science Association Congressional Fellowship Program and the first Member of Congress I knew well was Jim O'Hara. Jim was in just his second term then, but already he had earned a reputation in some quarters, including among APSA Congressional Fellows. I was told the place to go—the place where a young man should go if he wanted to learn about the legislative process was to the office of James G. O'Hara. I did: I negotiated a spot in Jim's office where I worked for three months as a "Fellow" in 1962.

It was a marvelous three months; not only was the O'Hara office a good place to learn by observing and participating, but Jim was a great teacher who was himself in the process of picking up the "tools of the legislator's trade". He was bright, energetic and enthusiastic, a committed liberal who had great sensitivity to the needs of workers, minorities and the public interest. Over his career in the House, he became a great legislator, whose knowledge of the arcane rules and procedures of the House became almost legendary inside and outside the House.

About a year after my APSA stint in the O'Hara office, Jim's AA, Don Baker, took another position, and Jim asked me if I would accept the job. I was working in the office of the late Senator Lee Metcalf of Montana at the time, but I decided to return to the O'Hara office.

I spent four years as Jim's AA. It was the most stimulating and educational experience of my life. At the time, I thought I would be going back to journalism, but that four-year experience convinced me that the legislative process was where I wanted to be—either on the inside or working with it from the outside. What made me realize that was my experience with Jim.

It is difficult for me to convey in words how important that opportunity—the opportunity to work closely with a great liberal legislator—was for me. He taught me what was to become a life's work. He was generous to a fault, and the most important commodity he had to give to a young and eager AA was his time and his willingness to explain. He gave it generously to me, and I will forever be grateful.

But even more, I am grateful to have worked with one of the great ones. If ever a legislator could be called a "House man", that was Jim.

A few weeks before he passed away, Ken Young of the AFL-CIO and I had lunch with him. It was terrific. We talked about the "old days", about the House and about his current "project"— the election of Ron Brown, his law firm colleague, as Chairman of the Democratic National Committee.

It was the old Jim O'Hara, plotting strategy, figuring out how to nail down the votes, how to outmaneuver the other candidates seeking that job. It was the liberal Democrat at work doing what he thought at that point in time was the most important thing he could be doing.

That was the Jim O'Hara I knew. I shall miss him very much.

Thanks for giving me this opportunity.

Sincerely,

DICK WARDEN,
Legislative Director.

THE ASSOCIATION OF URBAN UNIVERSITIES,
Washington, DC, April 4, 1989.

Hon. WILLIAM D. FORD,
House Office Building, Washington, DC.

DEAR BILL: Thank you for taking the time and investing the energy and thoughtfulness needed to organize this Special Order in the memory of our friend, Jim O'Hara.

This three-member family shared, at one time or another, the privilege and the joyful experience of working for Jim O'Hara. We worked on the Hill for most of our years in Washington, and we worked only for people we liked and respected. But there was a special something about Jim O'Hara and about working for him which we would like to share with you on this occasion.

To being with, Jim O'Hara was quintessentially a legislator—a maker of laws, a competent, careful practitioner of the legislative process as the best way of discovering and serving the public interest. When drafting a bill, O'Hara was never receptive to advice about "sending a message". He believed—and on a couple of occasions said—that laws were intended to prescribe action, and that if you wanted to send messages, you called Western Union. He had endless patience with the complex and tedious process of putting the right words on paper when he sought to draft legislation. He had no patience at all with the notion that the law was a press release or a set of symbolic exhortations, to be carried out to the extent the Executive Branch happened to feel like it. In short, Jim O'Hara, having taken an oath to uphold and defend the Constitution of the United States, also read the Constitution focussing especially on Article I, where he discovered the duties and powers of the Congress neatly spelled out. He spent 20 years carrying out his share of those duties with honor, compassion and, we believe, with real distinction.

You know, better than most, the long list of enactments which show the imprint of Jim O'Hara—seminal legislation relating to farm labor, occupational safety, civil rights, and education. We are sure that others who write you on this occasion will list them.

Closest, perhaps to his heart was his role in discovering that the Bacon-Davis/Walsh-Healy principle that the United States ought not to contract for the employment of construction and production workers under substandard conditions did not apply to service workers—to the poorest paid, least organized, most exploited of the Federal Government's second-remove employees. He (not staff or lobbyists) wrote the bill which brought those service workers under that same protection. On the day before Jim was put to rest, the Secretary of Labor issued a Proclamation renaming that legislation the McNamara-O'Hara Service Contracts Act.

His legislative interests were broad and ran deep, but they had one thing in common. His concerns were for those least able to protect their own interests—for the farm worker, for the service worker, for the high school student unable to dream of going on to college because of the cost, for the American deprived of a decent wage, the right to vote, the right to count and to be counted.

But as much a hallmark of his career as his compassion for those most in need was his commitment to due process in the making of the law. If there was a theme for which his career will longest be remembered, we think it was his unquestioning support of the principle that the Congress was created to enact the laws, that each

Member of either House was entitled to the fullest possible share in that process, that the rules of procedure were there to facilitate the majority's ability to decide, and to protect the single Member's right to call received wisdom into question. We have watched him preside over Subcommittee markups and afford to those with whom he contended, and those for whom he contended the same expert advice on how each could protect their procedural rights. We saw him do the same—sometimes at great personal and political cost, at Democratic National Conventions where he served, formally and informally, as a Parliamentarian. He had a deep understanding of the fact that Justice resides in the details of procedure—and he clung to that belief in a time when it was unfashionable—as, in some quarters, it is today.

Jim O'Hara served his country in battle, in the practice of law, in the joyful pursuit of the political process, and, above all, in the honorable, decent, principled service of the people as a Member of the House of their Representatives. It is a cliche that a public servant "left public service as poor as he entered it." Not so with Jim O'Hara. He was enriched by and during his service. He left it richer by several children, by a handful of Presidential pens used to sign bills into law, by a thousand former colleagues, staff members, lobbyists and constituents who sincerely mourned his passing. And the House, the Republic and the people of this country were enriched by his career, too.

Best regards,

JIM, ARDYCE, AND SARAH HARRISON.

NATIONAL ASSOCIATION OF STATE UNIVERSITIES AND LAND-GRANT COLLEGES,
Washington, DC, April 5, 1989.

MRS. SUSAN O'HARA,
Alexandria, VA

DEAR MRS. O'HARA: About a dozen years ago, just after the Chairman had returned from the House. I found myself in a small caucus in a hearing room with him and a few others exchanging witticisms and wisdom unique to those moments of a lobbyist with a witness waiting to testify and also waiting for the committee to return from a vote on the floor. One of my colleagues suggested a breakfast meeting toward a useful purpose the following week. I replied that I was not free that particular morning, since I had to attend a service in memory of my father on the anniversary of the day he had died some 10 or more years before.

My colleague looked puzzled so I explained that in that corner of the world in which I grew up birthdays were for children to celebrate. After the celebration was along the lines I had just mentioned. The reason had been explained to me when I was perhaps eight years old.

My grandfather had said that a man's life is like a ship's journey. While we are pleased to see it commence with flags and bunting flying and bands playing and a great deal of hope, the fact is the beginning of the journey was full of apprehension and trepidation. No one knew if the ship was worthy of its task. Would it withstand storms at sea, pirates that might attach it, navigational errors, shortage of proper food and water, even perhaps a mutiny within.

But when a ship was seen from the lookout on shore approaching safe harbor that was a time of great celebration. Even if the sails were somewhat tattered, even if strong beams of lumber were split or scarred, even if there were burns from battles, even if the entire ship looked somewhat the worse for wear, its arrival into port was a victory over time and experience. It had met its challenge. It had done its duty. It now could come home to peace. So, too, with a complete man's life.

I remember Jim O'Hara listening intently to this tale, as he did so remarkably well when he counseled those who were creating a new education appropriations lobby on how to use the House of Representatives' special nature and rules to achieve our goals or when younger colleagues caught him as he was leaving the House floor and sought advice on a bill, on an amendment, on almost anything to do with the nature of the legislative process. Or when witnesses appeared before him during his chairmanships of subcommittees. Jim O'Hara with his head sort of cocked, one eye a little more than the other, and quizzical smile on his face listened to my disquisition. He did not comment. I suspected that the legend resonated within his warm Irish soul.

For many of us he had a very special gift of strength. Lobbyists would cross any other Member before crossing him, and yet, ironically, I never heard a story of anyone hurt by Jim O'Hara. He enjoyed irony and teaching and helping all at the same time.

I remember well going to him very formally while I was still very much a novice in the business and the Davis-Bacon Act was up for amendment. As a representative of research universities I had been sent to reason over the impact of proposed O'Hara amendments that would require universities to pay graduate students salaries comparable to scientists doing identical work in the community.

Mr. O'Hara listened, again with a smile, as I laid out my torturous but, I hoped, reasonable argument. Then he said, "Jerry, I'm going to do what you ask me, but I want you to know it's not because of your argument, despite its length. The fact is I want to get this bill through and I don't want you people involved. You fellows in higher education rarely can get anything done, but you really have the gift for screwing things up." He leaned back and laughed. As I remember, I did, too, but probably for a different reason. He could help, chide and keep things in balance—all at the same time.

While not an intimate of Mr. O'Hara I considered it a special privilege to work with him and, when opportunities presented themselves, to support what he sought to achieve. He remains for many of us an enviable human being who took joy in describing his most recent boating extravaganza on the continent, the limitless demands of a recent client, or a triumph of legislative skill on the House floor.

He loved his family, his friends, his life, and enjoyed them all. For many of us who insist on believing that the values of Jim O'Hara are worth pursuing whatever the scorecard of a particular day says, he will remain a leader of integrity, a rare and joyful man.

I wish that you may take much joy and comfort from the memory of Jim O'Hara.

Sincerely yours,

JEROLD ROSCHWALB,
Director, Government Relations.

GEORGETOWN UNIVERSITY,
Washington, DC, April 4, 1989.

MS. SUE O'HARA,
Alexandria, VA.

DEAR MS. O'HARA: When we think of all of the people on Capitol Hill who have helped higher education over the years, Jim O'Hara comes to mind as one of the most outstanding individuals to ever hold the chairman's seat of Postsecondary Education. He particularly appreciated the unique needs of the universities in the District of Columbia and was a constant advocate of legislation designed to support the education system in the most effective manner possible.

Mr. O'Hara was a public servant in the truest and best sense of the word. There are inummerable people in this country who have benefited from the policies affected by Mr. O'Hara. How many people received food or housing or the learning necessary to provide for a family?

As in the parable of the Sheep and Goats, Jim may ask the Lord when did he feed, clothe or provide for the Lord. And He will answer, when you did it to the least of these you did it to me. Enter into the Kingdom prepared for you from the beginning of time.

It was an honor knowing Jim and we hope his vision is never forgotten.

Peace,

T. BYRON COLLINS, S.J.,
WILLIAM L. GEORGE, S.J.

CONSORTIUM ON FINANCING HIGHER EDUCATION,
Cambridge, MA, March 31, 1989.

MRS. SUSAN P. O'HARA,
Alexandria, VA.

DEAR MRS. O'HARA: Back in 1975, when our fledgling organization consisted of two professional staff (of which I was one), one secretary, a typewriter, and an empty filing cabinet, we came to Washington for the first time to present to Congress a new plan to revamp the federal student aid programs. Among the higher education groups we were, as Tom Wolanin described us in his book *Congress and the Colleges*, "the new kid on the block," and we weren't very sophisticated about the ins and outs of Washington and the political process. Your late husband was, of course, the venerable chairman of the Postsecondary Education Committee. Jim Harrison was staff director and the late Bill Gaul was counsel to the full committee.

Those years were challenging times and terrific fun for all of us, but Jim O'Hara stands out in my memory as someone larger than the process itself. I shall always recall his sense of fairness and decency and his willingness to listen to our point of view.

Just last week I was attending a Congressionally sponsored symposium on an issue that goes back to when your late husband was committee chairman: the possibility of colleges and universities being given permission (again) to lend directly to students under the Guaranteed Student Loan Program, and I was reminded of a quip your husband made at a hearing many years ago that still makes me smile.

He said he knew of a guy in Washington (or maybe it was Michigan) who owned a pizza joint, and on the wall he had hung a sign that said: "If you want us to cash your check, then go ask the bank to deliver your pizza." Jim used this colorful image to illuminate the point that colleges and universities should stick to teaching while banks should do the lending. I shall always remember that story and the way in which it personifies Jim's ability to cut through the complexities of the issue at hand and make his point with a sense of humor.

All of us who knew Jim were saddened to hear of his untimely passing but for generations of young people his good works will

continue on. I, for one, will always remember him for his wisdom, good humor, and grace under pressure as watchdog for the students of this country.

Sincerely,

THEODORE L. BRACKEN,
Director of Federal Relations.

WASHINGTON, DC, *March 31, 1989.*

Mrs. SUSAN O'HARA,
Alexandria, VA.

DEAR MRS. O'HARA: I write to extend condolences to you and your family on Jim's passing.

I came to know Jim during the years I worked across from him on the other side of the table—as a minority staffer for the Senate Education Subcommittee. The senior Senators on that subcommittee to whom I was responsible are now all gone—Jack Javits (my immediate boss), Win Prouty, Peter Dominick. However, I think I can speak for them—and myself—in attesting to the high regard in which Jim was held and the appreciation for his integrity, intelligence and steadiness of purpose. Your loss is shared.

With warm regard,

Sincerely,

ROY H. MILLENSON.

NATIONAL ASSOCIATION OF STUDENT FINANCIAL AID ADMINISTRATORS,
Washington, DC, April 2, 1989.

Mrs. SUSAN O'HARA,
Alexandria, VA.

DEAR MRS. O'HARA: William Ellery Channing once wrote "the greatest man is he who chooses the right with invincible resolution; who resists the sorest temptation from within and without; who bears the heaviest burdens cheerfully; who is calmest in storms, and most fearless under menace and frowns; and whose reliance on truth, on virtue, and on God is most unfaltering."

Your late husband, James G. O'Hara was truly such a man. Throughout his public service career, he devoted himself to working for the betterment of others. He unselfishly championed many legislative initiatives which have helped millions of Americans to obtain a better education, and to become productive citizens in our society. He toiled unrelentingly to improve conditions and standards for the working men and women in our nation, and he helped to foster better understanding and cooperation between the United States and the International Labor Organization.

His unfaltering belief in fairness and equal opportunity helped advance the Civil Rights Act of 1964, the Educational Amendments of 1976, and the recommendations brought forth from the Federal Mimimum Wage Study Commission in 1981. But most important were his personal qualities of concern, caring, and compassion for others. He always took time to listen and to help the underrepresented to gain a chair at the table.

As a newcomer to Washington in 1975, he patiently led me through my first reauthorization and quietly taught me the process. He became a friend and a confidant, and for that I will always be grateful. Similarly, the members of the National Association of Student Financial Aid Administrators and the students they served will forever be indebted to him for his untiring support for the federal student assistance programs. Indeed, Jim's leadership, wisdom, and honor will sorely be missed by all of us, but his greatness will live on for generations to come because of his many accomplishments on behalf of others.

Our sincerest expession of sympathy to you and your family, and our heartfelt thanks for your support of Jim's efforts on our behalf.

With Deepest Sympathy,

DALLAS MARTIN,
President.

REMARKS OF ROBERT TAFT, JR.

I had the pleasure of serving with Jim O'Hara on the House Education and Labor Committee for two years when I first came to the House. While we often lined up differently on particular issues, he became a good friend, continued to be one after I moved to the Senate, and even more so after we had each left the Congress but continued to work together on legislation. His quick perception and ready wit made it a pleasure to work with him. I particularly enjoyed our meetings in House-Senate legislative conferences on manpower training legislation. Jim always had the well being of working Americans very much at heart. He served the Nation and his district with honor and distinction.

REMARKS OF PHILIP E. RUPPE

Mr. Speaker, I would like to take this occasion to express the affection and esteem my wife Loret and I held for our friend and colleague Jim O'Hara. We were shocked and saddened by his death, knowing that he will be missed by literally thousands of Michigan citizens whom he served so ably.

I first met Jim when I entered the 90th Congress and remember him as an articulate, dedicated member of the Committee on Education and Labor. No member of Congress was more committed to improving the health, safety and financial well being of working Americans. As a Michigan representative, he understood the importance of our state's auto industry and was invariably a leader in our delegation when it came to advocating legislation and regulation that was critical to that industry.

Jim was a strong, partisan Democrat but that made political dialogue with him more fun and a real challenge. Jim was an articular speaker, who knew the facts and for me and others on our side of the aisle, it meant we had to bone up on the issues, sharpen our debating skills and really get to work. In debate, Jim was always formidable but at the same time he was gracious, he was always ready with a touch of humor to lighten the debate and it was a real pleasure to exchange ideas with him.

I had occasion to visit with Jim on number of occasions since his retirement from Congress. Jim mentioned how much he had enjoyed the Congress and his associations there but he invariably expressed pleasure with the new friends and the new relationships he had developed in private practice. Above all he was delighted to have more time to spend with his wonderful family who had been central to his life throughout his entire career.

REMARKS OF PATSY T. MINK, FORMER MEMBER OF CONGRESS

I am deeply saddened to learn of the death of our former colleague James G. O'Hara of Michigan.

It was my honor and pleasure to have served with him during my tenure in the United States House of Representatives. For 12 years we were colleagues in the House Committee on Education and Labor where Jim amassed a record of significant achievements. Jim distinguished himself as Chair of the Special Subcommittee on Education and of the Postsecondary Education Subcommittee. His leadership in areas of manpower training and vocational education is still recognized as important contributions to our Nation's efforts to meet the demands of technology.

He was considered the Committee's expert on labor and helped forge many of the most progressive labor legislation with a relentless tenacity and commitment to the cause of working people. If there was a single champion of the philosophy of labor and the spirit of collective bargaining it was Jim O'Hara. He was their protector.

I served with Jim on House Committee on Interior and Insular Affairs as well. He gave great strength to efforts to save our Nation's precious resources and to extend support to the territories and to Native Americans. I shall always remember his support of the people in the Pacific especially the Trust Territory of the Pacific Islands.

In 1973 we were both elected by the whole House to represent the Committee on Education and Labor on the newly created House Budget Committee, the first attempt on the part of the House to exert control over the committees authorization process and to establish clear priorities in spending.

Jim gained a reputation for his special skills in legislative procedure and because of this mastery was selected to serve as Chair of the Rules Reform Commission of the Democratic Party after the tumultuous 1968 Democratic National Convention. I served on that commission as well and can give testimony to his dedication. As Chair of this commission Jim gave his greatest service to the Democratic Party. His efforts helped immensely to heal and bind the deeply divided elements of the Democratic Party. His insights and understanding of the implications of change and the need for reform were key to the successful outcome of his commission recommendations.

Jim was admired and respected by all who had the privilege of working with him. He was a tutor and friend to new members who were quick to appreciate that Jim O'Hara was a special kind of person. He loved the House of Representatives as an institution and he worked to preserve its place as an instrument of service to the people of America. And he transmitted that spirit to all who served with him.

UNITED FOOD AND COMMERCIAL WORKERS INTERNATIONAL UNION,
Washington, DC, April 14, 1989.

Hon. WILLIAM D. FORD,
Hon. JOHN D. DINGELL,
House of Representatives, Washington, DC.

DEAR BILL AND JOHN: I feel honored in your allowing me to participate in your special order commemorating the great works of Jim O'Hara.

I worked closely with Jim for many years on legislation affecting workers and other people of moderate economic means. Jim not only was a giant among legislators in wanting to help these men and women, but he was also great in his ability to accomplish this great goal. Jim's knowledge of the House rules and House procedures was legendary. He brought many campaigns to victory that seemed otherwise doomed.

Jim O'Hara's service on the House Education and Labor Committee was extremely important to the working men and women of this country. No piece of legislation affecting workers passed during his terms of office without his strong support. Millions

of American workers and their families, who have never heard Jim's name, today benefit from his hard work, dedication and wisdom.

I am proud to have been able to work with Jim. I glory in the fact that he was a friend of mine. Like you, I miss him.

Best regards.

Sincerely yours,

ARNOLD MAYER,
International Vice President, Director, Public Affairs Department.

ROCKVILLE, MD, *April* 20, 1989.

Mrs. JAMES O'HARA,
Cannon House Office Building, Washington, DC.

DEAR SUE: It was my great pleasure to meet and work with Jim during the 88th and 89th Congresses.

I naturally gravitated toward this man who shared my views and represented the same type of suburban community as I.

We worked together on many projects where I marvelled at his leadership ability and detailed knowledge of the House Rules.

I join with all who honor him for his years of public service and share with you the loss of his continued presence with us.

Very sincerely,

CARLTON R. SICKLES.

U.S. COURT OF APPEALS
FOR THE SIXTH CIRCUIT,
Cincinnati, OH, April 13, 1989.

Hon. JOHN D. DINGELL,
Hon. WILLIAM D. FORD,
House of Representatives, Washington, DC.

DEAR JOHN AND BILL: I am happy to join in paying tribute to our mutual friend, Jim O'Hara. Peg and I remember him as one of the most progressive and effective congressmen in our lifetime.

We extend our sympathy to Sue.

Very sincerely,

GEORGE EDWARDS.

LANSING, MI,
April 20, 1989.

Hon. JOHN DINGELL,
House of Representatives,
Washington, DC.

DEAR JOHN: Please find below my statement in regard to Jim O'Hara. I hope this is sufficient for your needs. Should you need anything further, please do not hesitate to call me.

Thank you for including me.

"Jim O'Hara was a man for all people. Compassion, humility and great humor were his trademarks. Michigan has lost a great son—I have lost a great friend."

PATTI KNOX,
Michigan Liquor Control Commission.

STATEMENT BY FORMER REPRESENTATIVE JAMES R. JONES OF OKLAHOMA

It is truly a sad occasion to commemorate the passing of Jim O'Hara because Jim possessed so much vigor and zest for life and politics that it is hard to believe he is still not with us.

Jim O'Hara was one of those select few who serve in Congress who is respected for his intellect and integrity by Members on both sides of the political aisle. When Jim O'Hara spoke on an issue, his colleagues listened. His words often changed minds because his colleagues knew that he had done his homework well.

There is no one who served in the House of Representatives in the post-World War II era who fought harder or more effectively for working people in this country than Jim O'Hara. I remember well when I was in the White House in the Johnson Administration how tenaciously Jim O'Hara battled for workers rights and how courageously he fought for those most vulnerable in our society—the children and elderly. Jim O'Hara was clearly one of the most important people in the success of the Great Society.

I had the privilege of knowing Jim both as a fellow member of the House of Representatives and in the private practice of law. In both capacities, he was a very tough competitor on behalf of his constituents or clients, but he was also always fair and honorable.

All of us who have had the pleasure of working with and knowing Jim O'Hara are the better for it. He touched our lives in a very special way and we shall miss him deeply. Olivia and I extend our sympathies to Sue and all of Jim's family.

TRIBUTE TO JAMES O'HARA FROM FORMER REP. MARIO BIAGGI

I wish to join in paying tribute to a dear friend, a leading legislator and a great American Jim O'Hara. I had the good fortune of having served with Jim on the Education and Labor Committee and more specifically on the Post Secondary Education Subcommittee. Jim O'Hara through his subcommittee chairmanship produced some of the most important legislation ever on behalf of higher education. The hallmark of the legislation that Jim O'Hara was responsible for was its strong commitment to expanding the opportunity for a higher education to those previously denied. Jim O'Hara did not want higher education to be a luxury reserved for the rich and his leadership helped to open the doors to millions of students to lead a better life.

This distinguished gentleman from Michigan was a genuine pleasure to have known and worked with. He was often a quiet man, but he did many powerfully good things for people. He often operated effectively behind the scenes—but there was little doubt that he was a major player in the final analysis in those areas of legislation where he specialized.

In the years after Jim O'Hara left the House he remained a familiar face in Washington. Many of us had the opportunity to see Jim and some like myself still sought his counsel on subsequent higher education amendments. Jim was always accessible both as a subcommittee chairman and later as an attorney. Yet what I will best remember about Jim was the leadership he provided to education and the guidance and wisdom he shared with those of us who served on his subcommittee. Jim O'Hara was a man of class, dignity and unusual effectiveness. He will be missed. I commend my good friend the gentleman from Michigan Bill Ford for allowing us the opportunity to pay tribute to Jim O'Hara.

STATE OF MICHIGAN,
DEPARTMENT OF EDUCATION,
Lansing, MI, May 3, 1989.

Hon. WILLIAM D. FORD,
Member of Congress, Cannon House Office Building, Washington, DC.

DEAR CONGRESSMAN FORD: The State of Michigan and the education community in particular mourn the passing of former Congressman James G. O'Hara. His caring and committed dedication to the students of Michigan—from HeadStart programs through postgraduate studies—was unmatched.

I was honored to know Jim O'Hara as a neighbor in our hometown of Utica, a tireless campaigner for just causes, a loyal friend, and a committed leader. Twelfth Congressional District constituents felt comfort and pride in knowing that their Congressman knew the House rules perhaps better than any other sitting Member of his time, and used them to benefit people and issues often neglected by deliberative bodies.

His support of federal aid to education was unflinching, even though his suburban district during the early years of Title I and other federal K-12 initiatives was not a significant beneficiary. And his support for education also translated down to the local level where he never failed to support a millage campaign. The school lunch and student financial aid programs also benefited greatly by his diligence. He patiently taught many of his local community and school officials the "ins and outs" of national politics and federal social programs, leaving as a legacy a cadre of outstanding leaders unparalleled throughout Michigan.

The Jim O'Haras cross our paths all too infrequently. I recall our times together and joint efforts with great fondness and respect. The Nation and Michigan have lost an invaluble resource.

I appreciate the opportunity to share my thoughts with you and Congressman O'Hara's family and former colleagues.

Sincerely,

DONALD L. BEMIS.

REMARKS OF FORMER CONGRESSMAN PHIL M. LANDRUM OF GEORGIA

Jim O'Hara was the epitome of calm competence always prepared to present his view of issues without rancor, with dignity and thoroughness that demanded respect. I was more often, than not, on opposite sides to him on legislative views about Education and Labor, but nevertheless developed a warm personal friendship and respect for him and his professional achievements.

Jim was just a good man who served his constituents with distinction and all who knew him admired him.

STATEMENT OF THE HONORABLE LEON F. PANETTA

I am pleased to join with my colleagues to pay tribute to Jim O'Hara the distinguished gentleman who represented Macomb County, MI from 1959 until 1977. While my tenure in Congress did not overlap with Jim's, many of his accomplishments remain a part of the House today. His keen knowledge of the nuts and bolts of legislating led to great strides in the legislative process. In addition, his attention to the needs and concerns of labor resulted in passage of a number of important laws including, the Manpower Development Training Act, the McNamara-O'Hara Service Contract Act, the Higher Education Act, the Elementary and Secondary Education Act and the Occupational Safety and Health Act.

One of Jim's proudest moments most surely was his appointment to the post of Parliamentarian for the 1972 Democratic National Convention and his continued involvement in following conventions. This honor was a tribute to his unsurpassed understanding of parliamentary proceedings and his dedication to the ideals of the Democratic Party.

After leaving Congress, Jim made his home in Washington and continued his involvement in the fast-paced world of politics and government. A champion of education and employment opportunities, Jim never

lost his zeal for promoting programs to help people help themselves. This is legacy that he leaves us in Congress.

I am especially affected by Jim's involvement in the creation of the Budget Committee. At its inception the Budget Committee was a source of some controversy. Jim fought to allow this body to remain as independent as possible. It is partly through his contributions that we have a system today that I believe serves the purpose that was intended by Jim O'Hara and his colleagues and in turn serves the institution.

While we are certainly saddened by Jim's death, we can find solace in the lasting contributions that he made to the institution of Congress and to the Democratic Party. His dedication to helping the poor and less fortunate should stand as a reminder to all of us of our responsibilities as lawmakers. I wish to express my deepest sympathies to Jim's widow and his children and grandchildren. You can all be proud of the accomplishments and contributions of Jim O'Hara.

REMARKS BY CONGRESSMAN DENNIS M. HERTEL

Mr. Speaker, Congress has set aside today to memorialize a colleague and friend whose impact as a Member of the U.S. House of Representatives has affected our entire Nation. As a pioneer in the field of civil rights, an advocate of the rights of working men and women and a fighter for the health and safety of our workforce, Jim has made a significant contribution to the quality of life of all Americans.

Jim O'Hara was elected to Congress in 1958 at the age of 32 by a margin of five votes. After three recounts in a 3 month period it was conceded that he won the election to represent Michigan's 12th Congressional District. He was the first Democrat to win that seat since 1895. He served with honor and distinction for 18 years.

His keen knowledge of the law won him the title of Mr. Parliamentarian and for many years served in that capacity at the Democratic National Conventions, Democratic caucuses and wherever there was a need for interpreting Robert's rules of Order.

Jim served his constituents with dedication and concern and was particularly devoted to the youth of our Nation. He fought vigorously to include them under the minimum wage law. His efforts to promote higher education opportunities for young people was abiding and intense. He always found time to coach and counsel hundreds of young people to whom he became an important father image.

In honoring Jim O'Hara today, we pay our respects to a man of great integrity, compassion, and distinction. Those of us who knew him well, enjoyed his wit and humor. We feel that we benefitted from his wisdom, knowledge and friendship and we feel fortunate to have known him. Jim is a man of good will who worked hard to improve the quality of life for the less fortunate.

Today, as I join his many friends and colleagues in honoring his memory, I know we are better men and women because of the example he set for us.

GROSSMONT COLLEGE,
El Cajon, CA, April 28, 1989.

Congressman WILLIAM FORD,
House of Representatives, Washington, DC.

Why does James G. O'Hara's passing touch us so, and why do we grieve so deeply? Because he was more than a legislator who cared about equality and equal opportunity for all and the problems of working people. The embodiment of wisdom and excellence, he was a model of what a life well lived can be, and we grieve his untimely passing.

As a legislator and as a lawyer, he was infinitely kind and encouraging of our best efforts. His great charm and humor created bridges of understanding among diverse groups.

This country is a fairer and kinder place, and an infinite number of Americans have better lives because James G. O'Hara lived and worked here. He lives on in the thousands of lives he touched like a pebble falling into still waters.

MILDRED S. MCAULEY,
Past President, National Association of Student Financial Aid Administrators.

THE CALIFORNIA STATE UNIVERSITY,
April 27, 1989.

Mrs. SUSAN P. O'HARA,
Arlington, VA.

DEAR MRS. O'HARA: The California State University was fortunate in being able to retain the services of Mr. James G. O'Hara, Esq., of Patton, Boggs & Blow in 1984 and 1985 to serve as an advocate on our behalf in Washington, D.C. Frankly, we could not have had any better representation. Mr. O'Hara possessed a deep personal commitment to the ideals of American higher education. He strove to insure that Thomas Jefferson's belief in education was a viable option for all residents of this Nation without respect to economic or social standing. The Founding Fathers would be proud to witness the enthusiasm and zeal brought to bear by this gentle man from Michigan.

As a special consultant for the California State University, Mr. James O'Hara negotiated a superb breakthrough in the Pell Grant formulae. Without his intervention and without his close rapport with members of Congress, such as Bill Ford, Bill Natcher and Paul Simon, I know that Reauthorization of the Higher Education Act would have been a treacherous challenge. Thousands of young people are benefiting and more will benefit from the skillful work that Jim did on our behalf. His knowledge of the complex sea of issues, his insight into Congressional processes and his understanding of the concerns of higher education, especially public higher education, were only exceeded by his passion for fairness. Although Mr. O'Hara was retained by The California State University, his real client was the student whose economic, social, and educational background was disadvantaged. As a former member of Congress, he continued to be an advocate for the advancement of the United States through an educated populace.

The result of his work in functioning as a consultant for The California State University was a boost for all of higher education. Indeed, Sheldon Steinbach of the American Council for Education, Allan Ostar of the American Association of State Colleges and Universities and Joe Murphy of the City University of New York told me on several occasions that the best thing that ever happened for higher education in years was our retaining Jim O'Hara. Having such acclamation from several quarters of the higher education community is a much-deserved compliment.

It was an honor to be associated with a man driven by high ideals for our pluralistic democracy. An excerpt from the writings of Thomas Jefferson captures the essence of the belief held and practiced by James G. O'Hara:

"Enlighten the people generally and tyranny and oppressions of both mind and body will vanish like evil spirits at the dawn of day."

In contemporary times, President Lyndon B. Johnson continued to stress the importance of education in American life:

"At the desk where I sit, I have learned one great truth. The answer to all our national problems—the answer for all the problems of the world—comes down to a single word. That word is 'education'."

The actions of Jim O'Hara moves us many steps closer toward the sentiments expressed by our national leadership since the founding of this Nation. For this, the higher education community is most grateful. I am convinced that the visions held by President John F. Kennedy and President Lyndon Johnson were one and the same as the vision of Congressman James G. O'Hara. His role in achieving legislation which was supportive of their policy goals cannot be overlooked.

Even though the formal consultancy ended in 1985, the friendship with Jim O'Hara continued. Mr. James G. O'Hara glows in my memory as a fine gentleman who strove for fairness and full educational opportunity. I admired him enormously and shall miss his optimism.

Respectfully,

W. ANN REYNOLDS,
Chancellor.

Mr. FORD of Michigan. Mr. Speaker, I yield to the gentleman from Kansas [Mr. ROBERTS].

□ 1620

Mr. ROBERTS. I thank the gentleman for yielding.

Mr. Speaker, it is a privilege and an honor to join my colleagues in this special order in behalf of our mutual friend and colleague, Jim O'Hara. I thank my colleagues from Michigan for reserving this most appropriate time and for providing this House with his biography if you will.

Mr. Speaker, I only wish all of the Members of this House could have joined those of us who attended the services for Jim, held at the St. Louis Catholic Church in Alexandria, only blocks away from the O'Hara home. As the Reverend John Elliott pointed out, family, friends, colleagues, all present, celebrated Jim's life, his contributions and achievements on St. Patrick's Day. St. Patrick's Day no less for an Irishman named O'Hara. And, it was a beautiful day and service tempered by our sense of personal loss and sharing that loss with Susan and the O'Hara family.

Jim's longtime friend and colleague Frank Thompson and his law firm partner Thomas Boggs gave special and comforting eulogies. Both men reflected on Jim's many accomplishments and honors but it was Jim the man that they highlighted and he was in our hearts—his smile, that twinkle and spark in his eyes, sense of humor, love of family, life at its fullest, and yes a bit of politics thrown in. As a

matter of fact, partisan politics for Jim was a fierce partisan in the finest sense of the word, always for the underdog.

I did not serve with Jim in this House. And, I must admit after listening to the many legislative initiatives this man championed so effectively, doubtlessly I may have voted to recommit many of the banners he waved so proudly but that is not the point. You see, Jim O'Hara and I were neighbors for over 15 years. And, it is the special beauty of this body, this House, this public service that we were good friends despite the so-called aisle that separated us by party.

Jim was on the sidelines sending in plays as a most effective lobbyist by the time I ran for Congress in 1980. But, one of the first contributions to this so-called conservative Republican from Kansas came from Jim. Come to think of it, this news might still be classified as top secret by the O'Hara family, but Jim told me, "Pat, you know the Republican Party sure needs a few good men in its ranks and you are one of the few that I know." Ah, that sense of humor.

And, I remember the time we were crossing the Wilson Bridge on the way to work—separate cars. I looked over to discover Jim shaking his finger at me, and shouting something, red faced, upset. I found out soon enough. I had just bought a new foreign automobile and that sure didn't set well with the man from Michigan who has had at least 50 Chrysler products parked in front of his home during the past decade—all with "Michigan Blue" bumper stickers.

My colleague, Mr. FROST, tells us that good fences make good neighbors. No. Not so. Not so with all of the friends who are privileged to call the O'Hara neighbors. Mary and Bridgette who were babysitters with the wild and woolly Roberts bunch. New found respect to young Neal O'Hara, at least I think it was Neal, who gave this aging basketball player a bloody nose on the local playground. Special love and thanks to Susan, what a dear woman, whose home and yard are the pride and talk of Hollin Hills. Susan even taught Mrs. Roberts patience when it comes to trees, flowers, and shrubs, and working with God's creation.

Mr. Speaker, we have indeed lost a friend, a colleague, and in the case of the Roberts family, a good neighbor but as we heard in Jim's service, "We shall be with the Lord unceasingly" and Jim is there. We also heard, "The Lord is my shepherd, there is nothing I shall want," and in my humble opinion, Jim O'Hara did not want for anything.

As a final commendation following Jim's service, a dixieland band played "Nearer by God to Thee" and "When the Saints Go Marching In" bringing both smiles and tears and joy and sorrow. It was Jim's request, fitting his unique character and love of life. And, later at the O'Hara home well into the warm and special St. Patrick's Day afternoon, with friends, family, and the band played on—as will Jim's memory in our hearts and minds.

Mr. FORD of Michigan. Mr. Speaker, I yield to the gentlewoman from Louisiana [Mrs. BOGGS].

Mrs. BOGGS. I thank the gentleman for yielding.

Mr. Speaker, I am very grateful to the gentlemen from Michigan [Mr. DINGELL] and [Mr. FORD] for the opportunity to pay tribute to the life and accomplishments of Jim O'Hara, a true son of this House, as you have heard, who revered its history, mastered its rules, and enjoyed its spirit and the actuality of its camaraderie and friendship.

Mr. Speaker, I was privileged to know Jim as my husband Hale's colleague, as my own colleague and as my son's law partner.

Mr. Speaker, when I read Tom's eulogy that the gentleman from Kansas [Mr. ROBERTS] just referred to, delivered at Jim's funeral service, I was struck by the fact that my son was influenced by many of the qualities in Jim's beautiful character that Jim had found inspiring in Hale's character.

To illustrate, Mr. Speaker, I read excerpts now from Jim's remarks at the special ceremony in Hale's memory, and excerpts from Tom's eulogy of Jim at this funeral.

Mr. Speaker, Mr. O'Hara said:

Life seems filled these days with senseless tragedy, and I count the untimely death of Hale Boggs as one such tragedy. To pass from this life after we have completed our earthly mission is one thing. To have lived life to its full, and to have served to the extent of our capacities over a long period of years robs death of some of its bitterness. But to be struck down in the prime, as Hale Boggs was—while there were still challenges to be met and mastered, and while there were new directions into which he could have led our party and our Government—this, Mr. Speaker, makes the loss so tragic.

Hale Boggs was a great Democrat, a man who served his party with distinction. He was an outstanding Member of the House of Representatives, and he served this body with equal distinction as a Member and as the majority leader. Forceful, articulate, courageous, Hale Boggs brought to the House a dedication to the process of government that these challenging times demand.

Most of all, Mr. Speaker, Hale Boggs was my friend. There is special comradeship which we share in this body—a comradeship born of the knowledge that we serve the Republic in the same way that our forebearers have served in this body for nearly two centuries. All of us value that shared experience. But with Hale Boggs, my relationship was closer than that. It was a friendship which I valued; and it is as a friend, as well as a distinguished leader, that Hale Boggs will be missed by this Member.

And then, Mr. Speaker, I would like to quote from Tom's eulogy of Jim:

I first met Jim in the mid-1960's—a time when this country was divided by prejudice and hatred—a time when Congress was center stage—the trilogy of public accommodations, voting rights, and open housing were the scripts. My heroes were legislators who, in spite of great political risk and personal ridicule, led this country toward racial peace. Jim O'Hara quietly, effectively, and unassumedly was one of those leaders.

In the early 1970's, shortly after the Nixon election, I served on a four-member drafting subcommittee of the Democratic Charter Commission with Jim and learned one of the most valuable lessons of my life. Jim taught me that although policy and procedure are different, if you master the rules, you master the game. No one knew the rules better than Jim, and no one but Jim could teach the importance of the rules.

When Jim joined the firm in 1977, many of my partners were skeptical that politician could become lawyer. Could a committee chairman with a large staff become a daily practitioner? Could the sought after become the seeker? The doubt did not last long. Soon the firm became billed as "the influential lawyer/lobby firm" of Patton, Boggs & Blow. The press gave me undue credit. The pros hired us because of Jim's expertise. The effective legislator became the effective legislative strategist. No one in Washington could give better advice on whether a goal could be accomplished and, if so, how.

□ 1630

Jim was a man of many talents: intelligence, persistence, persuasiveness, a strong sports enthusiast and a sports participant, golf and sailing, a man of wit. Jim O'Hara was a leader and a teacher. Jim loved his country, his Democratic Party, his partners, associates and staff, his labor buddies, his former colleagues, and they loved him.

I can assure his wife, Susan, that this Member was one of these, but Tom finished by saying most of all, Jim loved his family. There was not a day that went by when one of the family had not dropped by the office, or when Jim was not talking about them, and Susan and all of the children, I do indeed join in those remarks. He did love his family so much, and I know that that love surrounds all family members now and will be with each member all the days of their life.

Tom concluded by saying, "We are all going to miss him. Jim O'Hara was a class act."

Mr. FORD of Michigan. Mr. Speaker, I yield such time as he may consume to the gentleman from Michigan [Mr. DINGELL].

Mr. DINGELL. Mr. Speaker, I thank the gentleman for yielding time to me and commend my dear friend and colleague, the gentleman from Michigan [Mr. FORD] for his well-stated remarks and for his hard work in making possible this special order for our dear and beloved deceased former colleague, Jim O'Hara.

It is important for all Members who served with Jim to recognize not only his great efforts here in Congress but

also his distinguished service and his accomplishments on behalf of so many things that are important.

It is with great sorrow that I extend the condolences of my wife, Deborah, and I to his dear wife, Susan, and his family who are here today.

There are many things that could be said and will be said about Jim O'Hara. He was visionary. He knew what the country needed and did what he could to bring it about. He sought to help people and bring about good, and he did so with great vigor and effectiveness.

One of the things that I recall most particularly about Jim O'Hara was the unique character that he had, the extraordinary courage that he showed and his love and his affection for his friends.

One of the issues that divides this bed from time to time is the subject of redistricting. On one occasion, as my colleague, the gentleman from Michigan [Mr. FORD] will recall, the threat was made that a certain individual was going to divide Mr. O'Hara's district into two parts, one of which would be a part for that individual, who served at that time in the legislature in the State of Michigan, where he had considerable influence. Mr. O'Hara advised him that he could go right ahead and do that because the effort was to divide the district, served so well by Jim O'Hara, into two. This would create a district for this particular individual and gerrymandering out another for the dear and beloved former colleague of ours, Mr. Lucien Nedzi. Again, Jim O'Hara told the individual in question, "Go ahead, you divide the district into two any way you choose, you file in one, and you will be running against me, not against Lucien Nedzi." As the story goes, Jim O'Hara, BILL FORD and I, and all the others who served thereafter, for many years, worked together in great friendship and harmony.

I served with Jim for his entire 18 years in the House, where he served Michiganians from Macomb and the surrounding counties in Michigan's 12th District. Jim was not only a superb legislator and colleague, but also a good friend. Needless to say, like all his legion of friends, I was deeply saddened to hear of his death. Michigan and this Nation has lost a great public servant and a decent and caring individual.

Two things come to mind when I think about my time in Congress with Jim O'Hara: his love and care for all people and his tenacious skill as a legislator.

Jim virtually dedicated his life to the fair and equitable treatment of his fellow man. This is particularly evident in the legislation he supported throughout his career in Congress. Jim was one of the great advocates of President Johnson's Great Society Programs including the monumental Civil Rights Act of 1964. In fact, he worked with the Justice Department and actually drafted portions of the Civil Rights Act of 1964. He also created the Manpower Retraining Act of 1962, which helped displaced workers stave off unemployment and receive the necessary training to start again. As my colleague, Mr. FORD, mentioned in his comments, Jim enabled workers to receive fair wages through the O'Hara-McNamara act, which prohibited government contractors from paying less than the prevailing wages in contracts for services. He also vigorously supported the Voting Rights Act, student work-study programs, and equitable increases in the minimum wage.

Upon his arrival to Congress, Jim O'Hara was elected to the Democratic Study Group, where he developed an acute sense for parliamentary procedure and gradually earned the reputation as an expert in the use of House rules. Many times Jim, while serving on the Education and Labor Committee, used his expertise to push initiatives on the House floor concerning important labor and education legislation. Jim also was the driving force behind the 21-day rule, which prevented the Rules Committee from stalling legislation for more than a 3-week period.

When Jim was elected chairman of the Democratic Study Group in the late sixties, he successfully rekindled the Democratic Caucus; Understanding the caucus could be used as a vehicle for reform in the House. His keen insight of the future implications of these reforms lead to several necessary changes in the House rules, which today are regarded as accepted practice of the House. The caucus used Jim's designs to reshape the seniority system in the House. Jim also used his parliamentary skill to alter the practice of closed committee markups and opened them for unrestricted public viewing. He also modified a ruling in the Committee of the Whole to require recorded votes.

Through all these reforms and legislative initiatives, Jim O'Hara never lost sight of the needs and concerns of his fellow man. I will always remember Jim for his dedication and perseverance for progressive reform and his deep commitment to equality for all. We all stand to learn from this important legacy that James G. O'Hara has left us.

Mr. Speaker, the memory of Jim will long be with me and is one which all Members hold very dear. He is one of the great public servants and a decent and caring human being, whose character is exemplified in the great love and affection and warm relationship that he had with his family, with whom he held such a close and a dear relationship. He is a man that I had occasion to know, to respect and love for many years. His memory will always be green in my heart and I believe in the hearts of all who loved him.

Mr. FORD of Michigan. Mr. Speaker, I yield to the gentleman from Michigan [Mr. LEVIN].

Mr. LEVIN of Michigan. Mr. Speaker, there is no greater tribute to a departed colleague than the expression that I might describe it as it is, all of his former colleagues, and we have seen some of that already today, and there is so much more.

I have always been struck by the fierce affection and loyalty of Jim's colleagues toward him, and I think it was for a variety of reasons, friendship, and also because Jim was considered a model legislator. He was concerned. He was compassionate. He was collegial, and he had the highest integrity. What more could one ask of a legislator? He cared about the process, and I think I met Jim when he was working on the Committee on Rules within the Democratic Party. He also cared about policy, and so many legislative achievements that came out of this House bear the imprint of Jim O'Hara—Medicare and Medicaid and clean air and clean water. He cared about his community, the community he represented, and he also cared so much about the country.

I remember so well in the 1968 Presidential campaign, the intensity of Jim O'Hara. I was the State chair at the time. I was quietly supporting a different candidate than Jim O'Hara. He, no matter how intense he was, always combined it with decency. I think one of the great losses of the loss of Hubert Humphrey in the 1968 Presidential campaign was that it snuffed out an even larger opportunity for Jim O'Hara to serve this Nation. There were so many people who were involved with that campaign. There was no one who bore a greater load of the work and of the effort in the dream than Jim O'Hara. I had a chance afterward in that campaign to work with Jim and other Members of this House. I also, in recent times, worked with Jim on the election of a new chair at the National Committee, and I can remember Jim talking to me on the telephone, more in a whisper than in a full voice, but the intensity, the dedication, the commitment were there as if he had full voice.

The Detroit Free Press editorialized about Jim O'Hara, and I would like to read just a bit of that. This was the editorial of March 16, 1989:

Jim O'Hara viewed politics as a high calling, and he governs his life in Congress accordingly. As a member of the U.S. House of Representatives for 18 years, Representative O'Hara played a vital role in many of the key environmental and social programs enacted during the 1960s. His strangely detached 1976 Senate campaign tended to obscure, rather than to embellish, his solid record of achievement in the House. He was a patient, methodological legislator of genuine substance. Jim O'Hara was a successful legislator because he was a man of principle and yet a man who knew how to compromise to achieve an important result. He listened to people; he had a strong talent for pulling ideas and people together.

And I close with this excerpt from the editorial because it rings so true.

The U.S. House of Representatives, we keep being told these days, is not an attractive or rewarding place in which to carve out a long career as it once was. That is a shame. Jim O'Hara's service to his country and to his State is a reminder of what a contribution a good legislator can make. Jim O'Hara has been out of the public eye and out of the State for a dozen years, but his

service deserves to be remembered and celebrated now in his death.

So Susan and the seven kids, they were kids to Jim always.

Indeed, his service deserves to be remembered and indeed celebrated, and we join together in saying to Jim that he is remembered and saying to Jim and his family, "Jim, you indeed, your life is celebrated."

□ 1640

Mr. SMITH of Iowa. Mr. Speaker, will the gentleman yield?

Mr. FORD of Michigan. I yield to the gentleman from Iowa, who was sworn in on the same day as Jim O'Hara when they started their careers here.

Mr. SMITH of Iowa. Mr. Speaker, I thank the gentleman from Michigan [Mr. FORD] for yielding to me.

What the gentleman said is true. Jim O'Hara and I were sworn in to Congress on the same day in January, 1959. We later served on the education and labor committee for 2 years together.

Jim O'Hara was one of those Members who was important to this institution. This House is made up of 435 Members. It is like any other institution that would be composed of 435 members; some do a lot of work, and some are more visible than others. Jim was one of those who really accomplished a lot. His imprint is on a lot of education legislation. He knew the bills. He worked hard in subcommittees, and he rendered great service in that regard.

We also served together for several years on a caucus committee of rules to reform the rules of the caucus and of the House of Representatives. They were finally adopted in, I believe, 1973, and some of them, I think, were adopted in 1971.

Jim was a technican. He was good at helping to draft rules, and he was an excellent member of that 11-member rules committee. On those reforms that we hear so much about today, a lot of people think they only went into effect after Watergate, but that is not so; they were put into effect 2 years before that. They were implemented at a later time.

Jim O'Hara deserves all the accolades I have heard here today, and I do not need to repeat them. I will say that I certainly was saddened and shocked both when I heard that he was afflicted with a terminal illness. Jim was the kind of a good person that should have been permitted, it seems to me, if ever anyone was permitted, to live a fuller and a longer life than he was given.

Jim O'Hara made a contribution to this House, he made a contribution to his State and to his Nation, and I am sure that everybody would join in saying that our heart goes out to Jim O'Hara and his family.

Mr. CARR. Mr. Speaker, will the gentleman yield?

Mr. FORD of Michigan. I yield to the gentleman from Michigan.

Mr. CARR. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, I rise in deepest sympathy at the passing of our good friend, Jim O'Hara. I want to extend warm sympathies to the family. They shared with us a man who was a giant.

When I was first elected in 1974 and had the privilege of serving with Jim in the House for only 2 years, I can recall, coming as a new Member from Michigan, that Jim O'Hara was a role model for us. He got me off to a good start, not only on the issues but, I think, principally by his example, by his integrity, by the manner in which he carried himself, and by the care and concern he had not only for the people he served but for the people he served with.

Although we only served together a short time, I really got to know Jim OHara well in his career as a distinguished Washington attorney. We worked together on a large number of issues, and I was impressed by the quality of Jim's mind. He clearly was one of the best strategic thinkers in the political sense that this House had had in recent times, and he used those talents as he served clients as a Washington attorney.

We became friends, and he was my friend. We played golf together. I began to learn the deeper Jim O'Hara, not just the one I had known when I was a freshman Member of Congress and he was my senior mentor. We shared private time together, and I can tell the Members that even though we did not know each all that long and did not serve together for a long time at all, I am going to miss Jim.

I can recall the very last phone conversation I had with him after his illness was determined but before he had gone to the hospital for the last time. He was full of vigor. He was a fighter. He was a fighter, whether it was for legislation or for his own life.

Mr. Speaker, I will always remember that conversation. I will always remember some of the things he said to me then, and I am going to miss Jim O'Hara for as long as I live.

Mr. Speaker, I rise today to join my colleagues in remembering one of the great Members of this Congress, a man I was privileged to know and honor to call a friend, the Honorable James G. O'Hara.

Jim O'Hara is best described as both a fighter and a leader. The former because he never gave up the fight. If he couldn't win the battle this time, he knew that he'd have another chance—or that he would find the time and place to make the opportunity happen. And he was a leader because he had the foresight to champion causes long before they became the hot item on the hit parade. He fought for them out of personal conviction and honest emotion. It wasn't the popular thing to do with Jim, it was the right thing to do.

The battles he led in Congress certainly knew no boundaries. They included civil rights, children's rights, women's rights, higher education, the environment and even air safety. But of all the changes in the way we do things that can be attributed to Jim O'Hara it is probably the changes that govern the way this institution operates that were most significant and far reaching. His reforms of procedure have made the House a more open, representative and honest institution.

So I suppose the best eulogy that can be given any person is that they made a difference. And Jim O'Hara certainly did that. He suffered a few defeats along the way, but each one hardened his resolve and made him a stronger and more determined individual.

I am honored to have known him. And it is an honor to be able to pay tribute to him in this institution which bears his mark as much as any other that came before him or will follow him.

Mr. STOKES. Mr. Speaker, will the gentleman yield?

Mr. FORD of Michigan. I yield to the gentleman from Ohio.

Mr. STOKES. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, I want to commend the gentleman from Michigan [Mr. FORD] for taking this special order and permitting us an opportunity to speak on this special order on behalf of our deceased friend and colleague, Jim O'Hara.

Mr. Speaker, I recall meeting Jim O'Hara shortly after coming to the House in 1969. Jim at that time was Chairman of the Democratic Study Group, which is one of the first groups I joined upon coming to the House. I also came to know him immediately upon coming to the House because the first committee to which I was assigned was the Committee on Education and Labor on which Jim also served.

My association with him in both capacities not only gave me a chance to know him but also to work with him on many issues. I both respected and admired Jim O'Hara. He was dedicated to liberal causes. He was tenacious and aggressive on behalf of the protections and guarantees of the United States Constitution, and he was unfaltering in his fight for civil rights, equal educational and employment rights, and democratic reform of the House of Representatives.

More than that, Jim was an expert in the parliamentary procedures of the House. In those days many of the legislative battles on the floor in which we were engaged were often won due to Jim's skill at parliamentary maneuvers. In those days we spent a lot of time strategizing on legislation affecting funding programs for education, which is an area in which Jim always took a leadership role. Under his leadership millions of dollars were

often added to education programs through our coalition on funding for education.

Many Members of the House, Mr. Speaker, availed themselves of Jim's knowledge of the rules of the House, and he was always accommodating. As I look back over the last 20 years, Jim O'Hara stands out as the Member who not only knew the rules of the House better than any other Member but possessed the skill of utilizing those rules for legislative advantage.

He left an extraordinary record of legislative achievement in the House, some of it landmark legislation.

I recall that just before he left the House I had a long conversation with Jim at a time when he and I were discussing our children and their college educations. He was a very committed and very dedicated father. Last year I had occasion to hire a young man just out of law school as a legislative assistant. That young man turned out to be Jim O'Hara's youngest son, Neal O'Hara. I think it is a fitting tribute to the lasting memory of Jim O'Hara in the halls of Congress to know that his son is here continuing the dedication of his father to legislative achievement.

Neal O'Hara reminds me a great deal of his father, who left a legacy of excellence to his son as a legislator, lawyer, and lobbyist.

Mr. Speaker, those of us who served with Jim O'Hara will remember him with respect and admiration. He was a credit to the legal profession, to the Congress, and to this Nation. I extent my condolences to his loving family.

□ 1650

Mr. FORD of Michigan. Mr. Speaker, I yield to the gentleman from Detroit [Mr. HERTEL].

Mr. HERTEL. Mr. Speaker, I have a formal statement for the RECORD that I would like to submit, but I would like to talk about what Jim taught me. We have heard about many of the honors that he received and many of the wonderful achievements that he was able to accomplish in his career in the Congress, but throughout his whole life the most important thing to him was his family. He leaves that with all of us. That was what was most important considering all of the other heavy responsibilities that he had, and that is what he was proudest of, his family. I think by example, by his interest, by his love, he taught us that on a daily basis.

So what better can be said about a man than that he cared about his family, that he had a sense of humor about his world and about himself and that he cared and extended those feelings to his neighborhood and his State and his country and through that caring he was able to improve the lives of people of this country. I think that is the highest accomplishment that a Member of this House, a citizen of this country, can have, and that certainly was what Jim accomplished and left all of us.

Mr. Speaker, Congress has set aside today to memorialize a colleague and friend whose impact as a Member of the U.S. House of Representatives has affected our entire Nation. As a pioneer in the field of civil rights, an advocate of the rights of working men and women and a fighter for the health and safety of our workforce, Jim has made a significant contribution to the quality of life of all Americans.

Jim O'Hara was elected to Congress in 1958 at the age of 32 by a margin of five votes. After three recounts in a 3-month period it was conceded that he won the election to represent Michigan's 12th Congressional District. He was the first Democrat to win that seat since 1895. He served with honor and distinction for 18 years.

His keen knowledge of the law won him the title of Mr. Parliamentarian and for many years served in that capacity at the Democratic National Conventions, Democratic caucuses and wherever there was a need for interpreting Robert's Rules of Order.

Jim served his constituents with dedication and concern and was particularly devoted to the youth of our Nation. He fought vigorously to include them under the minimum wage law. His efforts to promote higher education opportunities for young people was abiding and intense. He always found time to coach and counsel hundreds of young people to whom he became an important father image.

In honoring Jim O'Hara today, we pay our respects to a man of great integrity, compassion, and distinction. Those of us who knew him well, enjoyed his wit and humor. We feel that we benefited from his wisdom, knowledge, and friendship and we feel fortunate to have known him. Jim was a man of good will who worked hard to improve the quality of life for the less fortunate.

Today, as I join his many friends and colleagues in honoring his memory, I know we are better men and women because of the example he set for us.

Mr. FORD of Michigan. Mr. Speaker, I yield to the gentleman from Michigan [Mr. BONIOR].

Mr. BONIOR. Mr. Speaker, let me first acknowledge my dear friend, the gentleman from Michigan [Mr. FORD], for his warm friendship that he shared with Jim O'Hara, that he shares with all of us, and thank him for taking out this special order.

Mr. Speaker, I rise to pay tribute to Jim O'Hara. As I think everybody knows, he was not only well loved in this institution, and greatly respected here, but he was dearly beloved at home. Many of the Members that are currently with us in this Congress speak fondly of, not only his skills on substance, but, of course, his parliamentary skills which really few Members in this body can approach. His popularity back home in Michigan is indeed legendary. In my travels throughout my congressional district for the past 13 years, people would always ask me, "How's Jim doing?" "How's he been?" "What's he up to?" "Give him my best regards."

Mr. Speaker, that was a constant refrain that I heard from my constituents for the past 13 years. It was one of the greatest privileges of my political life to succeed him in representing the 12th Congressional District in Michigan.

As my colleagues know, all of us feel a certain sense of awe when we get here. This is sort of a special place with a lot of special people. However, Mr. Speaker, it is even made more awesome especially when we hear from the people that we are serving that the guy we are succeeding was really a special person, and a great person and someone who had the deepest respect of everybody here.

Mr. Speaker, Jim O'Hara knew how to play the game on the floor and in committee. He was a master at the rules, and of course on substance he was genuine. I guess that is a good word.

The working people of this country and of my district have never had a better friend, with maybe one exception, the gentleman from Michigan [Mr. FORD]; but never had a better friend in this Congress than Jim O'Hara. He served with distinction for two decades, tumultuous decades, the 1960's–1970's, and he was right at the front of the class on civil rights issues, and that was not easy for him. It was easy for him internally. It was easy for him the person. But people should understand that it was not always easy for him politically, but he was there.

Mr. Speaker, he was there on education issues. He was a leader in education, and he fought hard for the antipoverty programs that were sent up here through the 1960's.

He also was a guiding light on reform for this institution. He opened this place up, and I guess that is probably the hardest thing for people out in Michigan, or California or Florida to understand because this institution to a large extent until recently, until television, was really sort of a question mark or a vague idea in people's minds, but Jim opened this place up, and he gave lots of people an opportunity to participate and to give.

As was said after he left the Congress, he was active in many, many things, but he loved to sail. I am sure that has been talked about, and he loved to do it with his family and with his children.

I guess the other thing that I would like to say about Jim is how unpretentious he really was. He did not have a false air about him. He just went about, and he did his thing, and he did it without fanfare, he did it without a big entourage of people following him. He did it by himself, and he did it, did it from the heart and from the gut,

and I guess my colleagues knew it when he said something to them in a meeting, or if he made a speech, that it was genuine, and I think that is an attribute we need a lot more of in politics.

Mr. Speaker, I was talking to Bill Ross, one of his law partners, and he was commenting to me at one time about when a commander had made arrangements for a military escort to greet Jim, and, when Jim got wind of that, he said, "No, no, no, they won't do that stuff for me."

Mr. Speaker, Jim O'Hara often went around his own district unescorted by aides to meetings, to give speeches, and he did it well, and he did it with style, class. I remember the first time I knew of Jim was back in that first campaign he won by five votes because I happened to live on the street of his main opponent, Joe Mihalic, so of course the whole neighborhood and everybody was for Joe Mihalic but I remember the signs that Jim O'Hara had plastered all over the district, and it was just a simple word, "Who," with a question mark, and then, shortly before the campaign, they changed the signs in the middle of the night, and there were names of Sopo Williams, Phil Hart, and Jim O'Hara written on the new signs that went up. It was clever. It caught people's attention.

Mr. Speaker, Jim, as my colleagues know and as may have been indicated already, and I think the gentleman from Michigan [Mr. HERTEL] said it very well, that one cannot speak more highly of a person than to talk about how he or she treats their family or the relationship with their family, but Jim has a wonderful family, and by the mid-1960's Jim and Susan had seven children, all in school, all active lives and interests.

Mr. Speaker, they had problems, too. Somebody may have mentioned that some of them had to deal with hemophilia and epilepsy, and on several occasions they had to keep a vigil at the hospital while a child's life hung in the balance. That was his priority. He made the family and the children his priority, even over this institution, which many of us can learn from.

Mr. Speaker, the other memory I have of him, and they are very fond memories; one was in 1972. I was running for State representative, and Jim had that very difficult race in 1972, as I did, barely won, but I happened to find out that I won over my Republican opponent by a very narrow margin very early in the evening, before midnight, but I remember sitting up with Jim and his staff in this old house, and we were all lying around sleeping on the floor waiting for the results from St. Clair County to come in.

□ 1700

That was the northern end of the district, presumed to be Republican. Frankly, everyone thought it was curtains when the county vote came in from St. Clair that it would be all over and Jim would have lost, but he won St. Clair County.

I think he would be proud to hear me say today that I carried St. Clair County ever since I have been in the Congress, since I followed him. Not only have I carried it, but quite frankly, I carried it as strongly and in some instances stronger than Macomb County; so thanks, Jim, for setting my base for me.

When I first got here in 1976-77 it just so happened that Jim's son, Brendan, was running for State representative out here in Virginia. I remember one of the first things that my staff volunteered to do, along with me, was to go out and man the polls for Brendan.

Jim often came back to my district and campaigned personally for me, coming to my fundraisers and doing the things you have to do to help someone get elected to Congress and get reelected. Just before he passed away, I remember the campaign in August of last year. He spoke at a rally in Macomb County in which we had 10,000 people. He was one of the main speakers before Mike Dukakis came and spoke to the throngs of working people, educators and students there. You knew something was wrong then. I did not quite know what it was, but he could barely speak. Later I learned that was one of the first signs that he was having any difficulty. He was rasping and hoarse, but he gave a fiery speech that rallied the troops. It turned out to be a very productive event.

I have been told recently by someone very close that one of the things that I guess Jim regretted somewhat was that there were, as in many political districts across the country, internal feuds and that somehow in our district we were not quite capable of putting these feuds behind us. After Jim died, I made an effort to do that and had discussions with some of the principals involved. I think he would be pleased to know that I think we have buried that past.

He was a very special person and he has a very special family.

I guess he would be particularly proud of the fact that we are able to be doing some of the things, good things that Jim has done over the years in his new endeavors.

I just wish them the best, his wife, Susan, the very best. Anytime that we here as friends and colleagues can be of help to the family in any way, they should feel free to call upon us, because we have the utmost love and respect, not only for Jim, but for his children and for his wife, Susan.

Mr. Speaker, in conclusion, let me just say that it is with deep fondness that we will always remember him and his spirit. His spirit will live for a long time with the people that I represent. He represented so many good things. He represented really what the working people of Macomb and St. Clair Counties were all about, family, work, good play on the lake, good education, the ability to buy a home, all those wonderful values that have become almost political cliches in the last few years. He really was there at the founding of what they all meant in terms of the post-World War II development in our country. For that we will always be grateful for his participation in the life of this great land.

Mr. Speaker, I rise to pay tirbute to a great man, my predecessor in Congress from Michigan's 12th District, Jim O'Hara, who passed away last night.

As we all know, Jim was well-loved and greatly respected in the Halls of Congress. Many current Members count themselves fortunate to have been among Jim's close friends.

His popularity back home in Michigan is legendary. In my travels around the 12th District, even a decade-and-a-half after he left Congress, people still often ask me bout Jim O'Hara and send their best regards.

It was one of the greatest privileges of my political life to succeed him here representing the people of the 12th Congressional District of Michigan. All of us feel a certain sense of awe when we first come to Congress to serve the people who have elected us. For me, that sense of pride and responsibility was even greater because I followed in the footsteps of Jim O'Hara.

Jim served with enormous distinction for nearly two decades in Congress. He championed landmark civil rights, labor, education and antipoverty legislation during the 1960's. He was a guiding light behind the reforms that opened up this institution, enabling it to become a truly more democratic body.

The working people of our Nation have never had a better friend than Jim O'Hara.

After leaving Congress, Jim continued to be active in national affairs. We worked closely together on many issues over the years, and I was always impressed by his unwavering dedication to his State and Nation.

[From the Port Huron Times Herald, March 15, 1989]

EX-AREA REPRESENTATIVE O'HARA DEAD AT 63

ALEXANDRIA, VA.—Former U.S. Rep. James G. O'Hara was known as a friend of working people when he represented the Blue Water Area.

The longtime lawmaker for Michigan's 12th District, who became a lobbyist, died Monday of cancer. He was 63.

"The working people of our nation have never had a better friend than Jim O'Hara," said U.S. Rep. David E. Bonior, D-Mount Clemens, who succeeded O'Hara.

"His popularity back home in Michigan is legendary. In my travels around the 12th District, even a decade and a half after he left Congress, people still often ask me about Jim O'Hara and send their best regards."

O'Hara was elected to the House in 1958 and served until 1976 when he ran unsuccessfully for the Democratic nomination for the U.S. Senate against Donald Riegle.

"Jim served with enormous distinction," Bonior said. "He championed landmark civil rights labor, education and anti-poverty legislation during the 1960s.

"He was a guiding light behind the reforms that opened up this institution, enabling it to become a truly more democratic body."

After his defeat, O'Hara worked in Washington as a corporate lawyer and lobbyist. Among his clients was the General Motors Corp.

Longtime friend John Bruff, Macomb County Circuit Court judge, said O'Hara's cancer was diagnosed last fall and he continued to work until about a month ago.

O'Hara, formerly of Utica, visited Bruff last fall while campaigning for Michael Dukakis, the former Democratic presidential nominee.

He is survived by his wife, Susan, of Alexandria, and their seven children.

Bruff, who managed Mr. O'Hara's campaigns and worked on his district staff, described him as a devout Catholic who was dedicated to his family.

Funeral services will be held Friday in Alexandria.

[From the Macomb Daily, Mar. 15, 1989]

EX-CONGRESSMAN DIES OF LUNG CANCER

(By Chad Selweski)

James O'Hara, who represented much of Macomb County in Congress for 18 years, died late Monday night of lung cancer, after being admitted to a Washington, D.C., hospital nearly a month ago.

O'Hara, 63, served as the 12th District U.S. representative from 1958 to 1976, the year he unsuccessfully sought a U.S. Senate seat. A liberal Democrat, O'Hara served for many years on the House Education and Labor Committee and championed health, education and environmental issues.

"For me, it was a special personal loss," said former local Congressman Lucien Nedzi, a longtime friend. "I had lunch with him about four weeks ago and he looked fine. His spirits were good."

O'Hara was admitted to George Washington University Hospital Feb. 17 and was listed in critical condition at the beginning of March.

Since losing the 1976 Senate Democratic primary to Donald Riegle, O'Hara had worked as an attorney and lobbyist for Patton, Boggs & Blow, a Washington, D.C., law firm.

Formerly of Utica, O'Hara was given serious consideration for a Cabinet post—particularly Secretary of Education—in late 1976 by President-elect Jimmy Carter. Ironically, three years later, he was a deputy campaign manager for Sen. Edward Kennedy's losing presidential run against Carter.

"I think the people of Macomb County will remember him best as a voice for the working men and women," said Macomb County Circuit Judge John Bruff, a political associate of O'Hara's for 30 years.

Bruff, who served as chairman of the 12th District Democrats for 14 years, said O'Hara's congressional career was highlighted by his role in winning federal funding to build Macomb County's sewer systems, which led to the cleanup of the Clinton River and the preservation of Lake St. Clair.

Nedzi, whose district included a portion of Macomb County, said O'Hara was a "master" of congressional rules and procedures, using them to full advantage to advance legislation he favored.

A loyal Democrat to the end, O'Hara campaigned last October in Macomb County for presidential nominee Michael Dukakis.

He was a graduate of the University of Michigan and the U-M Law School. He was a World War II veteran who saw action in the Pacific theater as a U.S. Army paratrooper.

O'Hara is survived by his wife, Susan, and their seven children.

Funeral services are being handled by the Demaine Funeral Home in Alexandria, a Virginia suburb of Washington, D.C. A service will be held Friday at 11:30 a.m. and burial will follow at Arlington National Cemetery.

JAMES O'HARA DIES AT 63, IN U.S. HOUSE 18 YEARS

(By Jeanne May)

James G. O'Hara—"Mr. Macomb County Democrat" and a U.S. representative from Michigan from 1958 to 1978—died Monday at George Washington University Medical Center in Washington.

He was 63 and had lung cancer.

"He was a representative of the working people," Macomb County Circuit Judge John Bruff said Tuesday. "His slogan for his first campaign was 'For Full Employment.'

". . . He also was one of the congressional architects of the Great Society programs, Medicaid, Medicare, the civil rights bills, the environmental bills, the Clean Air Act, the Clean Water Act.

"and for Macomb County, he saw to getting the grants, so for the sewer systems that were built in the '60s and the '70s, we received our proper money. The Clinton River and St. Clair Lake were cleaned up, and municipalities no longer dumped sewage into the Clinton River."

Bruff was his campaign manager and district representative.

Lt. Gov. Martha Griffiths served in the U.S. House with O'Hara.

"What I really remember him for was his ability to get along with all the other congressmen and his ability, once he got to doing something, to get it through Congress," she said. "If he decided on an amendment to a bill, he could usually get it through the committee and get it through on the floor of Congress. He was quite effective."

O'Hara's 18 years in Congress ended when he quit to make a race for the U.S. Senate and lost in the primary to Donald Riegle.

O'Hara began his political career in 1958, running for Congress from the old 7th District, which included Macomb County and five counties in the Thumb. After two recounts of the ballots, he was declared the winner by five votes, becoming the first Democrat to represent the Thumb counties in Congress since 1895.

During his years in Congress, his home was in Utica, but after his defeat by Riegle, he stayed in Washington, working as a lawyer and lobbyist with the law firm of Patton, Boggs & Blow.

O'Hara was born in Washington, D.C., and lived there until he was 13, when he moved to Detroit. He was a combat paratrooper in the Pacific during World War II and earned bachelor's and law degrees from the University of Michigan. He practiced law in Detroit before going to Congress.

He began his political career as an extreme liberal, but gradually became more conservative, especially after a stiff threat from an anti-busing candidate in his 1972 race. But he remained strongly pro-labor and a champion of public education programs to the end of his years in Congress.

Survivors include his wife, Susan Puskas O'Hara; sons, Ray, Thomas, Patrick, Brendan and Neal; daughters; Mary and Brigid; a sister, and a brother.

The funeral mass will be at 11:30 a.m. Friday at St. Louis Catholic Church in Alexandria, Va. Burial with military honors will be at 1 p.m. in Arlington National Cemetery.

The family suggests memorial contributions to the Annual Sharing of the Green, Most Holy Trinity Catholic Church, 1050 Porter St., Detroit 48226.

Funeral arrangement are by the Demaine Funeral Home, 520 S. Washington St., Alexandria 22314.

Mr. FORD of Michigan. Mr. Speaker, I yield to the gentleman from Pennsylvania [Mr. GAYDOS].

Mr. GAYDOS. Mr. Speaker, I want to thank my good friend, BILLIE FORD, and commend him for taking this time.

If I run over, Mr. Speaker, I have an hour myself coming up and I would like to continue on this very important subject matter.

Let me say this on behalf of the gentleman from Michigan, and I am going to be presumptuous and speak on behalf of my good friend, BILL FORD, and say that when I came here he and I and GUS HAWKINS probably are the only ones left of that original group. When I talk about that original group, I am talking about people like Edie Green from Oregon, Lucien Nedzi of Michigan, Johnny Dent, Dan Daniel, and even Bill Thompson, our friend over the years, and GUS HAWKINS who is now the full committee chairman and probably the next one in succession of course, is our good friend, BILL FORD. There was John Brademas, now up at one of the universities in New York, and Lloyd Meeds and, of course, in that group, Jim O'Hara.

I would probably have to say from personal experience and personal opinion on my part that when I joined the committee some 21-odd years ago that of that group, and that includes my good friend, BILL FORD, Jim O'Hara was probably the one that responded first to an incoming freshman. There was no self-aggrandizement on his part, just the fact that he had a sensitivity to a freshman. I came from particularly the Pittsburgh area and was thrust upon the Education and Labor Committee. I think Jim O'Hara in that big heart of his probably felt this kid needed some help and he was there to give it and many times unsolicited on my part, because at that time, it is not true today, but at that time when you were a freshman, you were truly a freshman and you did not have an opportunity to speak out. You did not get recognized too often. On committee business, you were down in the lower echelon. That is how it was

then. Things have changed since then. Changed drastically, but if you can visualize that situation, again if I may go back and say being thrust on the Education and Labor Committee and then to have someone like Jim O'Hara who at that time had very high standing and good reputation to come over to you and say, "Look, I welcome you to the committee. I want to help you. You are from a laboring area."

Along the lines I was talking about, Mr. Speaker, let me say this. He was quite a man, quite an individual, a principled man who took time and had an authentic desire to want to respond to a new man on the committee. That to me exemplifies Jim O'Hara. You can get all his accomplishments as a very adept and accomplished parliamentarian, you can get into many things that Jim has done in the labor area per se, along with the educators of our country, all the initiatives that he demonstrated nationally and in national politics, all those things you can consider and they are all meritorious. They all should be made a part of the RECORD.

I want to say this, that I think the measure of a man starts with how he treats his fellow members on a committee, particularly the new incoming members.

I have to say this that Jim was there and I found Jim after awhile being what is exemplified to me as a true family man, a good person.

□ 1710

Members can call upon all of their own experience to conclude as to whether or not the character of a man meets their approval, and that is: Is he honest? Is he good? Is he sincere in what he does?

Members will want to use their own common experience and common sense in applying those principles that they have inculcated into themselves when they make that considered judgment of a man, of a person, like Jim O'Hara, and I did that. I tried to apply those principles, and the conclusion was quite obvious that here is a man, not a hint of scandal at any time in any manner, a good family man, and one who would listen, and listened sincerely, listened not just superfluously on the surface but sincerely listened. That is the Jim O'Hara I was exposed to in the beginning. That is the Jim O'Hara I lived with during his remaining time on the committee. That is the Jim O'Hara I knew when he was working on the Hill and had occasion now and then to come and explain something to me. It was the same Jim O'Hara the time way back 21 years ago up until the time of his untimely passing.

Mr. Speaker, in conclusion, I want to say this to the family, and I know some of them are here today: You can be rightfully proud, rightfully proud that he was a member of the family or the clan, any way you want to describe it, and I know his children can rightfully be proud, because later on as they progress in life they are going to find our just what the sincere attitude and the feeling and reputation was that Jim had among his colleagues, and that would be us on the Committee on Education and Labor, because we were the closest, BILL FORD, Thompson, me, all the group at that time, so we say it: You can rest assured that it was based upon facts.

In final conclusion, I wish to extend my deepest, sincerest personal sympathy to the O'Hara clan and the family, the relatives and all those who have known Jim as I have.

Mr. FORD of Michigan. Mr. Speaker, I yield to the gentleman from New York [Mr. SCHEUER].

Mr. SCHEUER. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, I feel a mixture of sadness and love at this somewhat painful occasion, bidding goodbye to Jim O'Hara.

I came in in 1965 in the glorious 89th Congress with BILLY FORD, Patsy Mink, Lloyd Meeds, and Bill Hathaway. We were young freshmen pups then, but we were fortunate to have several truly great luminaries on the Committee on Education and Labor, all of whom took us under their wing, apparently liked us, groomed us, advised us, counseled us, babied us, hand-held us, and it was truly an exhilarating experience.

Frank Thompson, John Brademas, and, of course, Jim O'Hara were three true luminaries each in his own way, and working with those men and serving with those men and enjoying their friendship and encouragement and support, enjoying their guidance and counseling was a truly remarkable experience for a freshman Congressman 24 years ago. All three of them obeyed today's rules and traditions rather than those current in 1965. All three of them tried to help us along, help us to do our thing, helped us to express ourselves and make a mark.

Jim O'Hara was a true, true, true friend. I think the one thing one could say of all of us, BILLY FORD, Patsy Mink, Bill Hathaway, Lloyd Meeds, myself was that we all loved Jim O'Hara. We venerated him. He was our role model. He was our teacher. He was our friend. We miss him deeply.

I have the most marvelous memories of the 89th Congress under Lyndon Johnson's stewardship. The country, of course, was under Lyndon Johnson's stewardship. This was the time of the great explosion of liberal legislation, and legislative proposals were coming up here thick and fast. Most of them, an awful lot of them, it seems, went to the Committee on Education and Labor, because Lyndon Johnson had a passion for education. He was a teacher from the banks of the Pedernales River, and a lot of marvelous legislative proposals came up, the Elementary and Secondary Education Act, vocational acts, and BILLY and I worked hard on title I of ESEA and title III, and through all of our work and our joy and excitement, there was Jim O'Hara present by our side, helping us, guiding us, giving us a nudge, a shove, pointing us in the right direction and always saying in those exciting days of 1965 and 1966, "Jim, BILLY, remember, it is not always going to be like this." He was telling us that those exhilarating days of the 89th Congress were not forever and that sooner or later things would simmer down, and the Congress would lose that momentum, that force-feeding that came from 1600 Pennsylvania Avenue, and things would revert to normal. He said it, and intellectually I believed him, but I am not sure whether in my heart I wanted to believe him or did believe him, but, of course, he was right, and things were not always like that exhilarating 89th Congress.

To compare the powerful, surging forces of leadership from the White House then to what we have today is a sad and painful thing to do.

I extend my sympathy to members of his family, to his wife, his kids. The kids will grow in knowledge and appreciation and understanding of the extraordinary role that their dad played in his remarkable congressional career. He was looked on as a leader of impeccable morals, honor, integrity, and sagacity. He never lost his sense of humor.

I have never, in all the years I knew him, ever heard him utter a word in anger or exasperation or disappointment or chagrin. With all of the trials and tribulations that came to Jim, both in the House and off the House, I never once saw him lose his cool or saw him lose his easy, relaxed, friendly half-quizzical, half-humorous demeanor. He was a legislative craftsman, and he was a truly great human being. He was one of the all-time greats in my lexicon, and I miss him truly and deeply, and I commiserate with his wife and kids.

The kids, especially, will know and grow and achieve an increasing understanding over the years as to the truly great renaissance man their father was. He was a true creature of the House, and he represented this House at its best, at its true peak of excellence. We miss him, and we mourn his passing.

Mr. FORD of Michigan. Mr. Speaker, I yield to the gentleman from California [Mr. ANDERSON].

Mr. ANDERSON. Mr. Speaker, I was deeply saddened to learn about the passing of a good friend and former colleague, James Grant O'Hara on

March 13, 1989. A Michigan Democrat of the 12th District, Jim served in the House of Representatives from 1959 to 1977. He is remembered as a skillful legislator who was often called upon by his colleagues to help maneuver bills around pitfalls in the House. Jim will be greatly missed.

James Grant O'Hara was born in Washington, DC, but moved to Detroit at the age of 13. He graduated from the University of Michigan, where he also received his law degree. During World War II, Jim served his country in the Army's 11th Airborne Division in New Guinea and the Philippines.

His first successful election to Congress in 1959 was an astounding Democratic feat. After winning by five votes and two recounts, Jim became the first Democrat since 1895 to represent the Thumb region north of Detroit.

Throughout his career, Jim was a strong and vocal advocate for labor rights. His support on labor issues gained him friends among the leaders of organized labor and enabled him to develop effective legislation on a variety of issues.

Jim earned many positions and responsibilities during his 18 years of service to his country and constituents. He served as the chairman of the House Subcommittees on Agricultural Labor, and Postsecondary Education. He was also a member of the House Committee on the Interior, the House Budget Committee, and the Joint Committee on Congressional Operations in the international arena. He was a congressional adviser to the United States delegation to the International Labor Organization, and a member of the United States-Japan Interparliamentary Exchange Program.

A visible influence Jim had in Congress was being a founding member of the Democratic Study Group and he served as its chairman during the 90th Congress, during 1967 and 1968. He was also chairman of the Democratic Party's Rules Commission from 1969 through 1972 and was one of the party's leading authorities on national convention rules.

Jim made an impact on the civil rights movement by helping to draft key portions of title VI of the Civil Rights Act of 1964. He also led a movement in the Democratic Caucus to overhaul the seniority system in the early 1970's.

After almost two decades in the U.S. House of Representatives, Jim became a lobbyist and continued his law practice with the firm of Patton, Boggs & Blow here in Washington, DC, until his recent passing.

As Petrarch said in 1350, "A good death does honor to a whole life" and today I want to honor the memory of a public servant who was well liked and respected and whom will be sorely missed, James Grant O'Hara. My wife, Lee, and I extend our deepest sympathies to Jim's wife, Susan, and his five sons, Ray, Thomas, Patrick, Brendan, and Neal, and his two daughters, Mary and Brigid.

Mr. FOLEY. Mr. Speaker, I am honored to join today to pay tribute to our former colleague Jim O'Hara.

Jim dedicated his life to the fight for a just and fair society, to strengthening our institutions and to speaking out for the rights and dignity of all people. Among the many people who owe so much to Jim O'Hara are the millions who have never heard of him but who have benefited from his commitment. During his 18 years as a Member of the House, he was a constant and compelling advocate for civil rights and for the causes of the unfortunate and disadvantaged. He fought for a better world and he believed passionately that Govenment could be an instrument of that improvement.

His accomplishments in every area of public policy are proof of the success of his efforts. In the early 1960's, he was a leading force on landmark labor and education legislation, including the Manpower Retraining Act of 1962, which promoted retraining of displaced workers, and the Civil Rights Act of 1964. He was active in support of the Voting Rights Act, student aid programs and increases in the minimum wage. He was an early voice in the fight against age and sex discrimination. He was instrumental in the introduction of Federal regulation to the field of mine safety and was the original sponsor of the Occupational Safety and Health Act [OSHA] to protect Americans on the job.

Many of us had the pleasure to serve with—and learn from—Jim and all Members of the House have felt his influence. He was an early advocate in the effort to reform and democratize House procedures. He championed reforms that opened committee proceedings to public scrutiny, that increased Member accountability for votes in the Committee of the Whole and that gave junior Members more influence in drafting legislation. He recognized, of course, that these reforms would facilitate the substantive reforms he promoted. But he also recognized that open, democratic procedures could reinvigorate and strengthen the House as an institution. We may at times take these reforms for granted, but we should recognize that our ability to legislate in an open and constructive way is in large measure a consequence of Jim O'Hara's skill and vision.

Jim's dedication to this House was surpassed only by his love for and devotion to his family. His wife Susan, his seven children and grandchildren take enormous pride in this man of tremendous integrity, commitment, and dignity.

After he left the House, Jim remained active in public affairs. He continued his efforts on behalf of the young and old, the disadvantaged and destitute and to move America toward a better future. For those of us who are heir to that vision, there is much to do. Our efforts are testimony to Jim's memory and his deeds.

Mr. BROOKS. Mr. Speaker, I want to take this opportunity to join my colleagues in expressing our sense of deep sadness at the death of our beloved friend and former colleague, James Grant O'Hara. His death on March 12 marked the passing of an outstanding public citizen and Democratic leader.

Congressman O'Hara served in the House of Representatives with distinction and dedication. He brought compassion and understanding to deliberations in this Chamber.

It was my distinct privilege to serve with Congressman O'Hara from 1959 to 1977. In addition to service on the Education and Labor Committee, he was also a member of the House Interior Committee, the House Budget Committee, and the Joint Committee on Congressional Operations, on which I served as chairman. The people of Michigan's 12th District can be proud of the record of service he established and the fine representation he gave to his district and to his country.

The people of his district always knew that they had a friend in Washington with whom they could work on any project of importance to the State of Michigan.

I want to express my deepest sympathy to his wife, Susan; his five sons: Ray, Thomas, Patrick, Brenden, and Neal; and to his two daughters: Mary and Brigid.

Mr. UDALL. Mr. Speaker, it is with great sadness that I join in mourning the death of our friend and former colleague, Jim O'Hara.

It was my good fortune to become acquainted with Jim during our service on committee assignments and on behalf of the Democratic Study Group, where Jim was one of the leaders. He was a thoughtful and conscientious Member who was a delight to watch when it came to legislative tactics, and he helped lead us to more than one victory during the civil rights revolution.

Jim served his constituents of Michigan's 12th District well. And they loved him in return. The affection was real and it was sincere, and it was a measure of the man that was held by those who sent him to this Chamber.

Jim was in the front lines in this House during the successful battles for labor, education, and antipoverty legislation. And above all, he dearly championed the American family.

I'm sorry that Jim is gone. He was a good and decent man, and I was proud to be his friend.

My deepest sympathy goes to Jim's wife, Susan, and all the O'Hara children.

Mr. MOAKLEY. Mr. Speaker, I thank the gentleman for yielding, and commend him for affording Members this opportunity to mourn the death of a respected colleague and a dear friend.

Jim O'Hara was one of the most able Members I ever worked with. A professional legislator, he was skilled in parliamentary tactics and knowledgeable about the detailed contents of legislation on which he worked. He was unfailingly courteous to his colleagues, and always interested in helping them.

His career in the House lasted 18 years, spanning the decisive period during which the House became a more open and democratic institution, an effort in which Jim was an acknowledged and effective leader.

History will judge his career largely on his formidable contributions as a senior member, and important subcommittee chairman, on the

Committee on Education and Labor. He was a real leader on education, training, and civil rights matters.

As a member of the Interior Committee, also, he was a leader of the environmental movement, before that movement got a name.

Most of us in the House, however, may most remember his contributions as a leader and chairman of the Democratic Study Group. In that role, he worked to make the House more open. He was an active participant in the revolution that ended the sad chapter of the Rules Committee's history, in which it was known as the "graveyard of legislation."

When he arrived in Congress, Jim was startled to discover that no recorded votes could be obtained in the Committee of the Whole, and he worked closely with his friend, Tip O'Neill, to assure that the important questions decided in the amendment process would be decided on the record.

In 1976, Jim ran for the Senate seat vacated by the retirement of his close friend, Phil Hart. When he did not succeed, he moved on to a career as a lobbyist, and demonstrated that the professional can be practiced with honor and integrity.

Even after his retirement from public office, he remained an active participant in community and political affairs. Only days before his final illness came on, he was successful in his campaign to elect Ron Brown as Democratic Party chairman.

On March 13, Jim died after a brief illness, and was buried on St. Patrick's Day at Arlington.

Mr. Speaker, all of us will miss Jim, and extend our deepest sympathy to his family.

Mr. DE LA GARZA. Mr. Speaker, today we pay tribute to our late colleague Jim O'Hara, and it is with great sadness that I rise to speak.

A man of friendliness, enthusiasm, and cooperation, Jim O'Hara employed his engaging personality to gain support for the causes in which he believed and for programs which would assist the people of his district. He was a man who often spoke of his great sense of gratitude for the privilege of serving the country he loved. In this, I believe, rested the heart of his personal and political commitment, and to this end he devoted his tremendous energy and vision which so characterized all his efforts in public service.

His passing has taken from me a friend, from the citizens of Michigan a dedicated representative, and from the people of our country a great statesman. May God let the light of His countenance shine upon him and give him peace.

Mr. KILDEE. Mr. Speaker, I rise today with great sadness and respect in honoring the late Congressman from Michigan's 12th Congressional District, the Honorable James G. O'Hara. Throughout his lifetime of public service, Jim O'Hara faithfully represented the people of his district, as well as the State of Michigan and all Americans. I have the privilege of representing many of the same people whom he represented.

During the tumultuous 1960's, Jim held fast to his ideals and beliefs as he championed new legislation in civil rights, labor, education, and poverty relief. It was his strong belief in human dignity which propelled his legislative efforts throughout that challenging time. His reputation as a legislative tactician combined with his legal expertise gained at the University of Michigan Law School and while practicing law in Wayne and Macomb Counties, gained him the respect of his colleagues as a leader and consensus builder. Jim had a clear and concise understanding of the legislative process, and he used this knowledge to pursue a progressive agenda aimed at helping all people.

Jim's greatest accomplishments were made during his tenure on the House Education and Labor Committee. He fought hard to develop the Headstart Program in its early days, and he was one of the original proponents of a comprehensive day care program. The community college system owes a great debt to Jim, as he was instrumental in developing community college institutions to benefit the working men and women of America who could not afford to send their children away to school. Jim's keen sense of the struggles of the working class led him to defend their dignity and promote a better future for their children through low-cost higher education. Many of the same things that he fought long and hard for during his time in Congress are still at issue in the 101st Congress, and I am a beneficiary of that political heritage which he so skillfully brought to his actions and deeds.

Beyond his great accomplishments which earned him enormous respect in this body as a legislator, Jim also had a wonderful family whom he loved dearly. While he realized the need for public service to promote a better life for all people, Jim believed in the value and importance of family. He fulfilled this belief through a lifetime commitment to his wife and children. I'd like to take this opportunity to extend my deepest condolences to his family, his wife Susan, and his seven children Ray, Tom, Pat, Brendan, Mary, Brigid, and Neal, who loved him dearly and will miss him greatly. He ably demonstrated that one can be a warm and loving husband and father while serving in an elected public office.

I'd also like to take this opportunity to extend my condolences to Susianna Puskas, Jim's mother-in-law, who lives on a family farm in Burton, MI, in my district. Mrs. Puskas, at 94 years young, is still an active member of her community.

Jim O'Hara will be greatly missed not only by his family, but by all of his friends and colleagues here in Washington and at home in Michigan. Today as we eulogize this great man, truly the greatest tribute we can pay to his lifetime of public service is by continuing the struggles for human dignity of which he was such a courageous champion.

Mr. BROOMFIELD. Mr. Speaker, I would like to take this opportunity to express my profound sorrow at the death of my good friend, Jim O'Hara.

Jim and I were both elected to the House in the late 1950's, and we served together until Jim resigned to run for the Senate in 1976. While we were on opposite political sides of the aisle I always found him to be a warm and engaging personality, a fine legislator, and dedicated to the people of the great State of Michigan.

Jim was instrumental in the writing and passage of the historic 1964 Civil Rights Act, which was a major step in guaranteeing equal rights for all Americans. He was also a lifelong friend of the working man.

I would like to join my colleagues in expressing my sincere condolences to Jim's family, especially to his wife, Susan, his sister, Sally, and his five sons and two daughters.

I salute Jim O'Hara, a good friend, and a servant of the people.

Mr. COELHO. Mr. Speaker, although I never had the honor of serving in the House of Representatives with Jim O'Hara, we did have occasion to work together, first during my days as a staff person for Congressman Bernie Sisk, and later when Mr. O'Hara joined the firm of Patton, Boggs & Blow.

While many of my colleagues may initially be reminded of Mr. O'Hara's distinguished contributions to the efforts of organized labor, he was also a skilled practitioner of effective legislative strategies in a variety of other areas, including complex western water issues. As a former member of the House Interior Committee, Mr. O'Hara's assistance on reclamation issues was extremely valuable to me and to the rest of my colleagues who are involved in the complicated and controversial area of water rights.

Mr. O'Hara's commitment to western water is only one area in which he earned my respect and admiration. His 18 years in the House followed a liberal, prolabor agenda, and as one of the founding members of the Democratic Study Group, he led the movement in the Democratic caucus to overhaul the seniority system in the 1970's. He helped draft key portions of title VI of the Civil Rights Act of 1964, and more recently, is admired for his work as chairman of the Federal Minimum Wage Study Commission.

Mr. O'Hara had many friends in and out of the House of Representatives, and as a husband, and father of seven children, he will be missed by many. His family should be comforted in knowing, however, that this man, through his unselfish commitment to public service, touched the lives of thousands of individuals. His legacy is felt today—not only in the House; not only in his State of Michigan—but by many who never knew of him or of his work on their behalf. I feel fortunate to have known such a committed and effective public servant.

Mr. ANNUNZIO. Mr. Speaker, I rise to join with the distinguished chairman of the House Post Office and Civil Service Committee, the Honorable WILLIAM D. FORD, in paying tribute to our former colleague, James O'Hara who died on March 13.

Congressman O'Hara was a highly respected Member of Congress for his legislative abilities, and was a champion for improving the lives of the working men and women in America. He ably represented his constituents in the 12th Congressional District of Michigan, from 1959 through 1976.

Before coming to Congress, Congressman O'Hara served our country with distinction as a member of the 511th Parachute Infantry Regiment during World War II. He received his law degree from the University of Michigan in 1955, and practiced law in Detroit.

Elected to the 86th Congress in 1958, Congressman O'Hara compiled an outstanding

record of achievement as chairman of the Subcommittee on Farm Labor and the Subcommittee on Postsecondary Education of the House Education and Labor Committee. During his career in Congress, he also served as a member of the House Interior Committee, the Joint Committee on Congressional Operations, and the House Budget Committee. He was a founding member of the Democratic Study Group, and also served as the chairman of this group during the 90th Congress.

After leaving Congress in 1976 to run for the Senate, he continued his legal career with the firm of Patton, Boggs & Blow. Continuing his unwavering commitment to labor, he also served as chairman of the Federal Minimun Wage Study Commission from 1979 through 1981.

Congressman O'Hara was a fine legislator, who devoted his life to the service of our country.

Mrs. Annunzio and I extend our deepest sympathy to his wife, Susan, and the other members of his family who survive him.

Mr. HOYER. Mr. Speaker, many of us were deeply saddened with the passing in March of a former Member of this House, James G. O'Hara.

Probably only half of the Members in the House today served with Jim O'Hara during his 18 years here. I am one of those who never had the pleasure of serving with Jim. Still he was well known by the vast majority of us. Though he was outside the House, I enjoyed working with Jim over the years. He is remembered so fondly by so many of us because, first he was a great person, and second, he had been a great Member of Congress and a parliamentary expert.

Ten years after he left the House, Jim O'Hara was still highly regarded for his legislative and parliamentary ability and for the contributions he made to education and labor issues in the 1960's and 1970's. He was particularly in the vanguard in putting some of the important Great Society education programs together.

It should be remembered that Jim was among the original members of the Budget Committee, a group that made the budget process work.

For all his contributions to national issues and legislation, Jim O'Hara should also be remembered for his service to the people of Michigan. In his years in the House, he was a true representative of the people of the 12th Congressional District and their views. Through years of turmoil and tranquility, as his suburban district grew, Jim O'Hara spoke for the people of Michigan, and Congress listened and acted accordingly. None of us can hope for a greater legacy.

I join my colleagues in sending my sympathies to Jim's wife Susan and their six children.

Mr. BLILEY. Mr. Speaker, I rise to express my sorrow at the passing of Jim O'Hara and to extend my condolences and best wishes to his family. Jim O'Hara's career was marked by distinguished service to his constituents, to his State, and to his Nation.

Jim served as a distinguished Member of the House of Representatives from 1959 until his retirement in 1977. As a member of the House Education and Labor Committee and a chairman of the Subcommittee on Farm Labor, 1971–72, and the Subcommittee on Post Secondary Education, 1973–77, Jim built a record of accomplishment that any Member would be proud of. His accomplishments included authorship of the Higher Education Amendments of 1976 and the Guaranteed Student Loan Amendments of 1976.

I would like to focus my brief comments on Jim's career after he left the House, however. Unlike many of those who rise to honor Jim, I did not have the privilege of serving with him in the House of Representatives. My dealings with him were in his post-congressional career as a partner in the law firm of Patton, Boggs & Blow. Jim was one of the most effective and principled individuals I have had the privilege of dealing with during my service in the Congress. He was effective for his clients not so much because of the influence he could exert, but because Members of this body knew that Jim O'Hara would give it to them straight. He represented his clients well, but he never asked this Member to do anything on behalf of a client that he would not have wanted someone to ask him to do. He recognized the value of trust and would always make sure you were aware of both sides of any issue.

Jim's service did not begin and end with his clients. He was always available to offer advice and counsel on issues and made his great reservoir of knowledge available to Members of the institution to which he gave 18 years of his life. If someone were to ask the hallmarks of effective representation before the Congress, we would be well served to point to Jim O'Hara as a model of how to do it right.

He will be missed not only by his family and friends, but by this Member, this institution, and his Nation as well.

Mr. CRANE. Mr. Speaker, the death of our former colleague James O'Hara of Michigan, turned off a smile that for the last 30 years had brightened this Chamber and Washington.

But Jim O'Hara was more than just a friend. He was a dedicated servant to the citizens of this country for over a decade and a half in this Chamber until his retirement. During that period of service in the House, he became a leading expert on higher education while devoting his energies to the workings of the House Education and Labor Committee.

Jim O'Hara cared for people.

He fought so vigorously in behalf of the rights of migrant workers that the Labor and Education Committee created a new subcommittee to aid and defend those workers, and Jim O'Hara was named as chairman of the subcommittee.

He worked hard on employment and training legislation designed to assist lower income Americans improve their lot.

He was a true champion to the cause of higher education and his contributions in that area were innumerable.

Although he was not a member of the Judiciary Committee, he took an active and leading role in battles for civil rights and voting rights legislation.

One of his many legislative skills was his knowledge of the rules of the House. Jim was an outstanding parliamentarian. He learned the rules and he knew how to use them. He was probably as knowledgeable as any Member in his time in the use of House rules.

His ability to absorb the rules of an organization and to use that knowledge in a parliamentary manner was recognized by the leaders of his political party. He served as chairman of the Commission on Rules of the Democratic National Committee from 1969 to 1972, and was chairman of the Committee on Rules as well as Parliamentarian of the Democratic National Convention in 1972.

Jim O'Hara was a friend of labor who got along well with management. He had the capacity to deal with all kinds—those from the left and the right as well as those from the North and South.

Jim O'Hara's contributions to his country were not confined to those years he served here with us. During World War II, he was a paratrooper, serving as an enlisted man in the 511th Parachute Infantry Regiment in New Guinea, the Philippines, and Japan.

Jim O'Hara will be remembered as a friend who served his country and his fellow man. And Jim O'Hara will be missed by all of us who were fortunate enough to know him.

Mr. HORTON. Mr. Speaker, I rise today to join my colleagues in paying tribute to Jim O'Hara who passed away recently. Jim was a close friend and an exceptional colleague who served in this body with distinction from 1959 to 1977.

As a member of the House Education and Labor Committee, Jim was one of the strongest proponents for the working class that this body has ever known. Jim worked tirelessly to improve working conditions, as well as wage levels. He continued his work on behalf of American workers after leaving the House through his service as president of the Federal Minimum Wage Study Committee.

Mr. Speaker, the working people of this Nation, indeed all of us, have lost a dear friend with the death of Jim O'Hara. He was an honest and hard working Member who could always be counted on for sound and judicious counsel.

My wife Nancy and I would like to extend our condolences to Jim's wife Susan and their seven children. Our prayers are with all of you.

Mr. CLAY. Mr. Speaker, today we take time to remember our former colleague from Michigan's 12th District the late Honorable James G. O'Hara. Congressman O'Hara's life and work truly personified the meaning of public service. Today, I welcome the opportunity to pay tribute to this great American who left us just a few weeks ago.

Jim O'Hara must be remembered for displaying a deep commitment and dedication toward all his endeavors. During his 18 years in Congress, he served on the House Committee on Education and Labor and earned a reputation as a powerful champion of labor. An indefatigable spokesman for working people, Jim O'Hara continued his efforts as Chairman of the Federal Minimum Wage Study Commission after he left Congress.

An ardent advocate of civil rights legislation, Congressman O'Hara espoused the cause of racial equality and equal opportunities. Congressman O'Hara helped to write title VI of the Civil Rights Act of 1964. As chairman of

the Democratic Study Group in the 1960's, he agitated for the passage of fair housing and other civil rights legislation and he was not shy in his condemnation of those who opposed these initiatives.

Throughout his lifetime, James O'Hara demonstrated an unfaltering commitment to civil rights and staunchly defended the interests of working Americans. Even after he left Congress, Representative O'Hara maintained his commitment to public service. Most recently, he worked with organized labor in Ron Brown's campaign for chairman of the Democratic National Committee.

Strength, determination, and dedication, these were the character traits of James O'Hara. Congressman O'Hara was a greatly talented and very successful legislator. I am deeply saddened by his passing, but I know that his memory will serve as an inspiration to us as we face the challenges ahead.

Mr. MAZZOLI. Mr. Speaker, I am pleased to join with so many Members of the House, past and present, in paying tribute to our late friend from Michigan's 12th District, Jim O'Hara.

Jim was an expert parliamentarian, with extensive knowledge of the legislative process. His skills were widely recognized and respected—and often relied upon heavily—as when he served with distinction as parliamentarian of the 1972 Democratic National Convention.

In formulating strategy for successful passage of a bill, Jim's knowledge and understanding of the intricacies of government were indispensable. And, he was a very kind and helpful "instructor" to many young freshman House Members in need of guidance on the complexities of legislative procedure.

I was honored to have served and worked closely with him on the House Education and Labor Committee for my first two terms here in the House. We enjoyed many successes together on the committee. Jim was a good friend to me and, like everyone who had the privilege of knowing Jim O'Hara, we will miss him.

Mr. WEISS. Mr. Speaker, this March, the country suffered a tremendous loss with the passing of Jim O'Hara, a wise and caring leader both in and out of Congress. Jim O'Hara will be sorely missed by not only his former colleagues in the House, but by citizens across the Nation. He was a dedicated public servant and a man with an unswerving commitment to the highest principles.

Though I began my tenure in Congress after Jim O'Hara had left Congress and begun work in the private sector on behalf of various labor and education groups, I had the privilege of working with him during my service on the Education and Labor Committee. Reliable, trustworthy, and always straightforward, he more than lived up to his reputation of intelligence and integrity over the course of my association with him.

A consistent theme runs through Jim O'Hara's diverse range of legislative accomplishments: He was never afraid to champion causes many others were afraid to take on. During his 18 years in Congress, he was a stalwart in the battle for fair wages, a key player in the passage of legislation to expand Federal financial support for education, and a vocal advocate of civil rights. His subsequent outstanding work as chairman of the Federal Minimum Wage Commission from 1979 to 1981 provided a vital framework from which to consider a fair and appropriate minimum wage.

Jim O'Hara's former constitutents in Michigan's 12th District, his colleagues, and millions of Americans directly benefited from his work. I want to express my profound sorrow at his passing and extend my deepest sympathy to his family.

Mr. HENRY. Mr. Speaker, Michigan has produced a number of Members of Congress whose vision and effectiveness carried far beyond the boundaries of our State and the boundaries of these walls. One was Arthur Vandenberg, from my own Fifth District. Another was Philip Hart. And surely another was James G. O'Hara, whose memory we honor today.

I did not have the privilege of serving with Jim O'Hara, although I am proud to be one of his successors on the Education and Labor Committee. But I knew about him—as a man of passion and commitment to his ideals during one of the most turbulent periods in American history. He helped shape our land for the better. And that's how I remember him.

There was no mistaking his political courage. When the feelings of his political comrades-in-arms might have led him to do otherwise, he strongly supported United States involvement in the Vietnam war. Some say the price he paid was his defeat for House majority leader. When the feelings of his Michigan constituency might have led him to do otherwise, he fought for civil rights legislation. And some say the price he paid was his defeat in his campaign for the U.S. Senate.

His interests and energies were vast. He was deeply involved in legislation ranging from the Sleeping Bear Dunes National Park to the repeal of mandatory retirement age for airline stewardesses to designating Sousa's "Stars and Stripes Forever" as the national march. He helped shape the election apparatus of his party. He played as hard and as well as he worked—and in his later years the teenaged paratrooper of World War II became a champion sailboat racer.

There was no mistaking his love for his family. Jim married the nurse who cared for him during a period of illness. He and Susan had seven children, and as parents they had to deal with such problems as hemophilia and epilepsy. During happy times, you would find them out at the ball park or on his boats. They were secure in his love. And they will tell you, "For Jim, family came first and the House sometimes had to do without him for a short while so that he could meet that first obligation."

In a day in our land when integrity and decency seem to be in short supply, Jim O'Hara was a man whose priorities were right, whose light spread to every part of his world.

Mr. MINETTA. Mr. Speaker, I rise with immense respect and great sorrow, to honor an outstanding and honorable colleague, James G. O'Hara.

I mourn for the vision and dedication which this Nation has lost in his passing. He was a worthy companion and I will miss him very much.

He was held in the highest esteem by his colleagues, and deservedly so. During his tenure in Congress, we were all touched by his dedication, determination, and vision. We all progressed through his leadership in areas of labor and education.

We were all inspired by his strong beliefs and integrity. He represented both his district and the Nation well.

Even after his departure from the House of Representatives, he continued to serve the Nation. Just recently, James O'Hara's presence could be felt. He was the chair of the Federal Minimum Wage Study Commission from 1979 to 1981. His work on that Commission resulted in a thorough and positive assessment of the minimum wage which concluded that the minimum wage did not contribute to unemployment and should be raised. And, last month, the House of Representatives did just that.

His dedication to a strong defense posture has served our Nation well. And will serve us for years to come. His legacy will be long remembered.

The number of his accomplishments which made our defense stronger and our country safer for Americans, or which simply made life better through any of his numerous other successes, are indeed legion. I cannot begin to list them all; understandably so, considering that this man spent much of his life serving the people of this country.

James O'Hara was a great asset to this body. The fuel which energized him was not glory, power, or gain, but a sincere desire to serve his constitutents and this Nation to the best of his ability. And his best is truly the epitome of public service.

He will be greatly missed as a colleague, as a dedicated legislator, and as a good, good friend.

I extend my sympathy to his wife, Susan, and to his family.

GENERAL LEAVE

Mr. FORD of Michigan. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the subject of my special order today.

The SPEAKER pro tempore (Mr. TRAFICANT). Is there objection to the request of the gentleman from Michigan?

There was no objection.

□ 1720

SLEPAK PRINCIPLES ACT

The SPEAKER pro tempore (Mr. TRAFICANT). Under a previous order of the House, the gentleman from Washington [Mr. MILLER] is recognized for 60 minutes.

Mr. MILLER of Washington. Mr. Speaker, there are signs of change in the Soviet Union: steps toward respect for human and property rights. It is in our interest to encourage these steps, because a nation which respects the rights of its own citizens will more

likely respect the rights of other nations' citizens. And if history is any guide, a nation which appreciates the role of the individual citizen will more likely appreciate the role of private business. That is why today, with Representative LARRY SMITH and 18 of our colleagues, I am introducing the Slepak Principles Act which sets up 7 guiding principles for United States companies operating in the Soviet Union.

Vladimir Slepak, a founding member of the original Helsinki Monitoring Group, dedicated to observing Soviet compliance with the Helsinki Final Act of 1975, first proposed these principles. It is his hope that they will help promote pluralism and freedom. Our legislation is an attempt to turn his hope into reality.

Briefly, these are the seven Slepak principles for Americans businesses doing business in the Soviet Union: First, refuse to use materials made by forced labor; second, seek to safeguard Soviet employees prone to dismissal based upon politics, religion, ethnic background, or union activities; third, decline to use structures previously used for religious activities; fourth, strive to ensure that methods of production do not unnecessarily risk harm to the surrounding environment; fifth seek to ensure that they do not provide goods or services critical to the Soviet military; sixth strive to use independent businesses when looking for potential partners in business in the Soviet Union; and seventh, decline to participate in untied loans to the Soviet Union.

Our bill encourages companies to conduct business in a manner beneficial to both long-term commercial interests and human rights. Our bill does not prohibit United States companies from conducting business in the Soviet Union. Basically this bill does three things:

First, it asks companies to voluntarily abide by the principles when conducting business in the Soviet Union;

Second, it requires the State Department to submit an annual report on whether or not U.S. companies comply with the principles;

Finally, 2 years after enactment of the bill, companies not adhering to the principles would lose some export marketing support. This means U.S. Government officials could not assist nonadhering companies in selling goods, services, or technologies in a foreign market. An example of this would be a United States Government official could not assist a noncomplying firm in arranging an appointment with a Soviet official. In other words, noncomplying firms could still do business in the Soviet Union, they just would't have the United States Government's assistance.

The U.S. Gvernment would still protect U.S. business in a trade dispute. And loss of export marketing support would not prohibit providing general export information or generally available informational publications such as Overseas Business Reports, Foreign Economic Trends and Business America.

Why is there such a need for these principles now? There are 177 businesses operating in the Soviet Union today, and 13 joint ventures registered with the United States Commerce Department. We hope and expect that in the future there will be more. Recently the American Trade Consortium negotiated a framework agreement with the Soviet Government which could lead to as many as 25 new joint ventures and involve United States investment between $5 and $10 billion. United States-Soviet bilateral trade totaled $1.6 billion in 1987 and will undoubtedly grow.

In the past we have had a multipronged effort in supporting human rights and openness in the Soviet Union. At the same time that we have worked with the Soviet Union on arms control and security issues, we have also continually brought up issues such as human rights. Our increasing official contact with the Soviet Union has been matched by increasingly frequent cultural exchanges. There also the relationship was benefited by placing all issues—human rights, trade, arms control, regional conflicts—squarely on the table.

Now, with the hope of more business contact with the Soviet Union, American businesses can also contribute to the new openness in our relations. This contact will have an ever increasing impact on the Soviet people. By conducting their business in accordance with Slepak principles, businesses will help contribute to glasnost and perestroika in the Soviet Union, thus ensuring a better business climate in the future.

Should U.S. companies agree to abide by the Slepak principles? I believe they should for the simple reason that it makes smart business sense to follow the seven guidelines. For example, by following the principle on striving to work with independent businesses such as cooperatives, United States businesses will be appealing to the very market in which they are trying to establish themselves in—the Soviet consumers. John Goodchild, president of the communications company, the Weightman Group, points out in an article on the Slepak, principles in the Wall Street Journal: "* * * if we're going to the Soviet Union to make a profit, we ought to lay the groundwork for something enduring."

Soviet consumers are not getting the goods and services they want from the state-run economy. It is clear by recent elections that consumers are fed up with the largest employer and business in the Soviet Union. United States firms working with cooperatives will be working with the independent Soviet businesses which hold the hope of providing goods and services the Soviet citizens cannot get now.

Similarly, by providing a safer workplace which ensures workers' rights, for example, United States companies in the Soviet Union will gain a number of benefits. Because of the favorable conditions in their workplace, U.S. businesses will attract a higher quality of employee than their competitors. In addition, there will be less turnover at these companies. Thus, those companies following the principles will reduce their costs of doing business.

But most of all, businesses will abide by the Slepak principles because they recognize that by contributing to a more democratic, more open Soviet Union, they will be ensuring a larger, more stable market in which to operate.

United States policy in pushing for human rights and openness in the Soviet Union has brought some success. We cannot take full credit for all the positive changes that have been occurring in the Soviet Union. But neither can we ignore our consistent and persistent efforts in pushing those changes. Now that we are on the road to success, we should not diminish our efforts.

As we recognize the Soviets for their constructive changes by taking steps such as holding a human rights conference in Moscow, does it not also make sense to ask our companies to voluntarily abide by a set of ethical principles—to do voluntarily in the Soviet Union what they are required by law to do here in the United States? The Soviet Union, itself, has agreed in the Helsinki Final Act, the Madrid and Vienna Concluding Documents, and the Universal Declaration on Human Rights and other agreements, to abide my many of the guidelines we set forth.

In the past our policy of pushing for human rights was a defensive one. We sought to help those already in trouble—the imprisoned, the persecuted, and the abandoned souls of the Soviet gulag. Now with the first improvements in the Soviet Union, we can use a more positive strategy of pushing for actual democratic rights. In addition to helping those who want to leave the Soviet Union, we can also help make life better for those wishing to stay in their country.

The possibilities for expanded trade opens up the prospect for exciting new contact with the people of the Soviet Union. Our legislation does not seek to constrict that prospect; it seeks to make that prospect more beneficial.

Mr. SMITH of Florida. Mr. Speaker, I am proud to join Representative JOHN MILLER in introducing the Slepak Principles Act. I want to extend my sincere gratitude to Congress-

man MILLER, and commend him for his leadership on this issue. He has displayed unusual vision and careful foresight about the potential for democratic changes within the Soviet Union.

It is clear to the world that the Soviet Union is a country undergoing dramatic changes. The arrival of General Secretary Gorbachev has shaken up the status quo within the Soviet Union in an unprecedented manner. Concepts such as perestrioka and glasnost are no longer only Soviet pipe dreams; they are practical principles which are changing the way the Soviets view themselves, their political system, and their role in the world order. The question is no longer "is change taking place," but "how extensive will the changes be and are they for real."

This period of change in the Soviet Union is also a foreign policy opportunity for the United States. For years a cornerstone of American foreign policy vis-a-vis the Soviet Union has been to foster democratic institutions and practices in that country. Primarily, we have been focused on pressing the Soviet leadership to extend fundamental rights to all Soviet citizens—right such as freedom of emigration, freedom of religion, and freedom of speech.

There is a legal, as well as a moral basis for these traditional policy objectives. As signitors to numerous international treaties, including the Helsinki Final Act, the Madrid and Vienna Concluding Documents, and the Universal Declaration of Human Rights, the Soviet Government is obliged to allow its citizenry basic, fundamental freedoms, such as those mentioned above. Yet, we all know that these rights and so many others have historically been denied to the Soviet people.

The United States must exploit this rare opportunity to bring about democratic changes in the country recognized as the leader of the Communist world. The Slepak Principles Act does just this. It requires American business concerns in the Soviet Union to conduct business ventures in accordance with a set of democratic principles while at the same time prohibiting American firms from perpetuating current oppressive Soviet labor and business practices.

Specifically, the bill calls for American firms engaged in business in the Soviet Union to: First, refrain from producing or providing services that benefit the Soviet Military Establishment; second, refrain from using goods produced by forced labor; third, safeguard Soviet employees prone to dismissal for ethnic or religious reasons; fourth, decline to participate in a commercial transaction if the place of work is a Soviet-confiscated religious edifice; fifth, ensure that working conditions are humane and safe for workers; sixth, refrain from making untied loans to the Soviet Government; and seventh, attempt to engage in joint ventures with private cooperatives rather than institutions connected with the Soviet State.

While the future of United States-Soviet relations is unclear, it is clear that the Soviet Union is in the process of rethinking both its domestic and foreign policies. One manifestation of this change in thinking is the increased business opportunities for Americans in the Soviet Union. Case in point: The American Trade Consortium recently negotiated a framework agreement with the Soviet Government which could lead to as many as 25 new joint ventures and involve a United States investment of between $5 and $10 billion.

The Soviets need American capital and ingenuity to achieve their political objectives. It is morally imperative that the United States use this opening to promote our own interests. This is exactly what the Slepak Principles Act does and I urge all of my colleagues to cosponsor this important legislation.

□ 1740

GENERAL LEAVE

Mr. MILLER of Washington. Mr. Speaker, I ask unanimous consent that all members have 5 legislative days within which to revise and extend their remarks and include therein extraneous material on this special order.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Washington.

There was no objection.

□ 1730

A CLOSER LOOK AT THE VRA MYTHS

The SPEAKER pro tempore (Mr. TRAFICANT). Under previous order of the House the gentleman from Pennsylvania [Mr. GAYDOS] is recognized for 60 minutes.

Mr. GAYDOS. Mr. Speaker, a majority of this body—231 Members representing 38 States at last count—believe that America's steel industry is still too fragile, and that its future depends on the passage of H.R. 904—the extension of the Steel Import Stabilization Act for another 5 years.

The Steel Import Stabilization Act, which was part of the 1984 trade bill, put into place one of the most effective tools we have had for curbing steel imports into this country. That tool is the Voluntary Restraint Agreement [VRA].

To date, we have VRA's with 19 countries and the European Community, and the mechanism has been successful. In 1984, when we made the VRA's a part of our trade policy, steel imports had reached an annual level of 26.4 percent.

In 1987, after 3 years of the VRA Program, imports fell to 21.3 percent, and last year, to 20.3 percent. But, more importantly, the American steel industry closed some old plants, modernized some others, and doubled its productivity while operating at nearly full capacity.

Now, we need to extend the program for another 5 years. There are those who say the industry is strong enough to stand on its own feet without a helping hand from Government.

Well, those of us who know the industry say its not time yet. But, before I go into that, let me give you some history on the industry and its problems in the past 15 years.

During the 1970's and early 1980's, many Americans faced hard times, but life for the steel industry and its workers was especially harsh. Since 1974, hundreds of thousands of workers became unemployed as two in three jobs disappeared when more than 25 U.S. steel firms went bankrupt. And those whose jobs didn't disappear took pay cuts. Today, steelworkers work for 90 percent of the wages they were making in 1982. And that's not even figuring in inflation.

Entire communities and regions in the 39 States that house the steel industry that were once vital and thriving have been deserted as the unemployed steelworkers fled to other parts of the country to look for work.

In my district alone, there were 5,000 people employed by USX Corp. coke works plant in Clairton in 1970. Today, only 1,450 workers work in that plant.

Just a few weeks ago, USX announced that 100 entry-level jobs at the plant were available. More than 2,200 individuals waited in line for hours in hopes of landing one of those jobs.

One of those, Eric Kessler of Clairton, said he thought his chances of winning a job were as slim as his chances of winning the State lottery. But at least, he didn't "have to kick up a buck" to apply.

Getting one of those jobs would enable unemployed Bill Rochelle to buy the finer things in life—like new shoes for his children and a hat for his wife.

We know why our steel industry fell into a slump. Simply put, steel was not being traded fairly. Other countries' steel industries were and are owned or subsidized by their governments. Those steelmakers did not have to make a profit to stay in business.

And in order to gain even bigger shares of the American market, they dumped steel at below-cost prices. In 1980, steel imports made up 16.3 percent share of the U.S. market. Four short years later, imports claimed 26.4 percent.

As I mentioned earlier, our response to this crisis was passage of the Steel Import Stabilization Act which required voluntary restraint agreements with most steel-producing countries.

The VRA's expire this September, and they must be renewed so that the American steel industry can continue to recover. During the recent flurry of information on whether or not the VRA's ought to be extended, a report published by the Stern Group, an international trade advisory firm has come to my attention.

In stating their case against renewing the VRA's, they argue that the American steel industry is healthy

after 26 years of exceptional trade protection. They say that extending the VRA's will make it much harder for U.S. manufacturers to increase exports in the 1990's and will keep prices higher in the United States than abroad.

Mr. Speaker, I have here an analysis of the Stern Group's report by the law firm of Dewey, Ballantine, Bushby, Palmer & Wood, and I ask that it be printed in its entirety as an addendum to my remarks.

Coincidentally, the author of this comprehensive and well-organized report, Holly Glenn, happens to be a former resident of my district.

Ms. Glenn makes the following point:

The Stern Group Report really doesn't contain any analysis on the effects of the VRA's as the analysis stops at 1985, even though data for the years that the VRA's were in place is readily available.

Their argument that the VRA's affected supply doesn't make sense as the VRA quotas were not even filled in 1987 or 1988.

The primary reason that the Stern Group report is incorrect is that it ignores events and factors other than the VRA's which have had an impact on steel trade and steel prices such as the world-wide steel shortage and higher steel prices abroad.

The analysis fails to explain observed steel market behavior, and draws conclusion based on an overly simplistic and inaccurate depiction of the determinants of steel prices.

The prices selected by the Stern Group are not market prices at all. They do not show what consumers in any market paid for steel.

Rather, they represent revenues per ton for all steel products, based on a cost model, corrected for various outside events and discounting.

The report says nothing about the effect of import protection in general, the effects of the VRA's in particular, and the consumer costs of import protection.

It should not be used as the basis for policy decisions which will affect the condition and international competitiveness of one of our key industries.

I would also like to clarify other misstatements that need to be put in the proper context.

Myth No. 1: The VRA's have made American steelmakers fat and happy.

The fact is that the American steel industry is only beginning to regain its health, and the VRA's have been crucial to the ongoing recovery. Because of the industry's stability over the past 5 years, steel companies have been able to borrow money at lower interest rates and make long-term commitments to creditors in order to modernize facilities by improving and expanding continuous casting machinery and hot rolling mills.

The steel industry, however, has a long way to go. Steelmakers have only begun to recover and earn back some of the $12 billion they lost through the mid-1980's. And while sales are up, they are still lower then they were in 1984.

The gains of the last 2 years can hardly be called a complete comeback. Fifteen percent of domestic steelmaking capacity still is in chapter 11. New investment on sustained losses of $3 and $5 billion annually is needed if the domestic steel industry is to match the competitiveness of its leading foreign competitors.

A football coach doesn't tell his team that has managed to come from behind but is still losing by 10 points in the fourth quarter to relax and not worry. There's a lot more work that needs to be done.

Myth No. 2: The VRA's have resulted in higher prices for steel users.

The fact is that steel prices have gone up in the last 2 years. And, while critics of the VRA extension have jumped to the conclusion that VRAs are responsible, they conveniently leave out the fact that during the first 2 years of the VRA's, steel prices actually fell.

According to Putnam, Hayes & Bartlett, an economic research firm, domestic steel prices have gone down in real terms by 9 percent since the start of the VRA's. So today, even with moderate increases, the price for steel is virtually the same as it was in 1981.

So what made the price of steel go up? The Congressional Research Service, in reports issued in both 1988 and 1989, concludes that market forces around the world—strong demand and the decline in the dollar rather than VRA's—have caused the price increases. CRS also reported that VRA countries are not filling their quotas so the VRA's could not have caused steel prices to increase as non-VRA countries increased their U.S. exports to help alleviate the problem.

In spite of price increases in 1987 and 1988, U.S. steel is now much less expensive than steel produced in other countries. For example, the price for United States-produced cold rolled sheet is cheaper by about $200 per ton when compared to Japanese-produced cold rolled sheet.

Another reason for higher prices is increasing demand for steel worldwide, according to the book "Steel And The State." In fact, the demand is close to the all-time high reached in 1979.

The Soviet bloc, especially, has shown a strong demand for steel at the same time that other countries, such as Korea and Taiwan, have closed some of their steelmill capacity while they expand. Because of the shortage, some countries aren't exporting much steel but are instead hoarding it for the future.

Critics also argue that the VRA's result in small steel users paying even more for their steel. The fact is, whether or not the VRA program is continued into the 1990's, the market will be broken up into at least the two broad buyer groups with the large buyers having more market power.

Ironically, the critics don't mention that prices for other metals that are not included in the VRA's have increased much more—making steel an undeniable bargain.

In the last 2 years, the price of copper has increased by more than 150 percent, and the price of aluminum also more than doubled.

Myth No. 3: VRA's discriminate against countries that trade fairly.

The fact is that steel is traded neither freely nor fairly on the world market. We and perhaps a select few other countries are free traders. All the other foreign steel industries have been, are, and in all likelihood, will continue to be state-owned or state-supported. Regardless of the trade policy the United States chooses to adopt, the foreign markets will continue to be subsidized and heavily protected.

Many people say all we need is a level playing field in order to compete. The real question is: "Are we playing on the same field?" I think that level is irrelevant here. I am not even sure we're playing the same game. The rest of the world is playing soccer, and we're throwing them a football.

Between 1980 and 1985, national governments within the European Community provided over $35 billion in subsidies to their steel producers, most of which consisted of aid for continued operation.

Since 1985, governments have granted major subsidies to steel producers in Venezuela, Argentina, Belgium, Turkey, and other countries. Numerous countervailing duty investigations have been conducted in steel by the U.S. Department of Commerce.

The Department has made over 70 affirmative findings of subsidization in steel since 1980 against countries ranging from Argentina to Zimbabwe. Dozens of other cases were settled before a determination was made.

No one can argue that subsidies aren't still predominant in other countries. For example, Italy's state-owned steel producer, Finsider, which hasn't even broken even in over 15 years, is currently seeking an additional $5.8 billion in dollars to see them through 1990 after receiving more than $1.5 billion since 1970 in operating and restructuring aid.

A secret World Bank study completed in 1988 found that the Mexican Government supported its steel industry with direct budgetary transfers of $75 million to $100 million each year. In September 1986, the Government

assumed $883 million of the debt of state-owned Sidermex.

In West Germany, the Government won approval from the European Community Commission to grant $161 million to the ailing producer, Saarstahl, for 1986 and 1987. The Federal Government and the Saar State Government also acquired a 76-percent interest in the firm and pledged to cover debts of $324.8 million.

Since the 1960's, the ailing Spanish steel industry has received many Government aid injections. In 1987, the European Community Commission granted approval for the Spanish Government to provide $1.8 billion to its steel industry for restructuring, after receiving another $4.3 billion in subsidies in 1983.

While this list is illustrative, it is by no means comprehensive. There are too many other examples to single them out individually. And there's no sign that these massive subsidizations will end.

Myth No. 4: Other countries are opening their steel markets.

The fact is that even with the VRA's, the United States has continued to be the most open market in the world.

The European Community has consistently held steel import penetration to under 13 percent since 1978, and until the shortage in the world market, Japan restricted imports to 6 percent by using various informal trade barriers.

Other countries use a variety of measures to close their markets. Some use high tariffs, but most rely on nontariff barriers, such as quality tests, to close the door.

Myth No. 5: Only the American steel industry wants to see the VRA program renewed.

The fact is that steel consumers as well as manufacturers support renewing the VRA's. At last count, more than 200 steel consumers and almost 400 industry suppliers have taken a long-term perspective and have joined the efforts to extend the VRA program.

The Office of the U.S. Trade Representative has received comments from all industries affected by renewal of the VRA's, and an overwhelming majority—92 percent—have indicated their support for extending the program as compared to only 6 percent opposed.

State legislatures and Governors in 10 States have passed pro-VRA resolutions, and I have received dozens of letters from a wide variety of people who are pressing for extension of the VRA's.

As we all know, President Bush promised to renew the VRA program in some form in a letter days before his election last November to my colleague from Pennsylvania, Senator HEINZ. Some people are calling that letter a campaign promise made in a moment of desperation. I'd like to think not, and I hope that the President keeps his word as a few weeks ago, Secretary of Commerce Robert Mosbacher indicated the administration plans to continue the VRA's.

The VRA program will give America a bargaining chip with foreign governments to negotiate a long-term international trade agreement that bans unfair trading practices in steel.

The VRA's are not a permanent solution in dealing with the unfair trading practices of other countries. I believe the President must forge ahead and negotiate a fair, feasible, and enforceable international trade agreement on steel.

In the meantime, we need to continue the VRA's to prevent the unfair trading practices of foreign governments from destroying any more of our country's steel industry.

I strongly urge my colleagues to join me in supporting the extension of the VRA program by cosponsoring H.R. 904.

□ 1800

At this time I yield to the gentleman from Ohio [Mr. TRAFICANT], my good friend and colleague, and a member of the Steel Caucus and a leader in this area.

The SPEAKER pro tempore. Without objection, the gentleman from Pennsylvania [Mr. GAYDOS] will assume the chair.

There was no objection.

Mr. TRAFICANT. Mr. Speaker, I want to start out by saying that I do not normally speak in special orders. I do so tonight because the fellow that was down here speaking is the chairman of the Congressional Steel Caucus, the gentleman from Pennsylvania [Mr. GAYDOS].

Mr. Speaker, I represent the Youngstown, OH, area. We lost 55,000 steel jobs averaging $12 and $15 an hour, and, if it were not for the efforts of guys, and fellows and leaders like the gentleman from Pennsylvania [Mr. GAYDOS], we would never be coming back, and we are starting to come back.

The only thing I would like to say is that the voluntary restraint agreement is not only needed and continues to be needed in this country; I would like to see us go a step further. I would like to see mandatory restraint agreements because I do not believe America can defend itself with styrofoam.

Mr. Speaker, I will only take a minute to say that I really appreciate the efforts of the many men and women in Congress who have preceded me and serve here in leadership, such as the gentleman from Pennsylvania [Mr. GAYDOS], who have helped my area that has probably been hit the hardest. So I just take this minute to thank the chairman of the Congressional Steel Caucus, and I am still going to hold him to an invitation to our area to not only meet with our steelworkers, but see some of the hazards that they face in the workplace, and his legislation protects them and gives them notification of the hazards in the workplace.

The SPEAKER pro tempore. (Mr. GAYDOS). Without objection, the gentleman from Ohio [Mr. TRAFICANT] will resume the chair.

There was no objection.

Mr. GAYDOS. Mr. Speaker, I want to thank the gentleman from Ohio [Mr. TRAFICANT], my colleague, for what he has done over the years. I have to reemphasize the fact that, if it were not for Members like him, possibly some of the warning observations would not be made, and the situation would continue to deteriorate, and we would find ourselves with a complete lack of responsibility.

The gentleman from Ohio [Mr. TRAFICANT] has served us well, and he serves the caucus well and the House well, his constituents and mine. He has served them well by being the watchdog in this very, very sensitive area.

Mr. Speaker, as I mentioned before, I would like to get into presenting an analysis of the Stern Group study, and I think it is very important. So, in analyzing the Stern Group report I want to start off by saying that recently the Stern Group, representing some U.S. steel-consuming manufacturers, published a study entitled "Rebuilding American Manufacturing in the 1990's: The Case Against Steel VRA's." The Stern Group proposes that the Voluntary Restraint Agreements should not be renewed. Unfortunately, while an analysis of the issue of VRA renewal from the point of view of steel consumers would be an important contribution to the general debate, the Stern Group report does not provide the kind of analysis required.

The Stern Group report does not contain any analysis of the effects, positive or negative, of the VRA Program. Instead, the analysis is based on data solely from the pre-VRA period. However, this analysis leads the Stern Group to conclude that an extension of the VRA's would be detrimental to U.S. steel-consuming industries.

The Stern Group's report states that the steel industry has received protection from imports for 20 years, which has reduced the quantity of imported steel into the U.S. market and raised steel prices to U.S. consumers. Because the current VRA's are a form of import protection, they are alleged to have also led to restricted supplies—shortages—and higher prices. The Stern report further argues that historically higher U.S. steel prices have eroded the competitiveness of steel-

consuming goods in the international marketplace over the past 20 years.

While import protection may lead to a reduction in supply and an elevation of prices,[1] there are a number of problems in finding empirical support for this hypothesis as it applies to the U.S. steel market during the period of the VRA's.

THE ISSUE OF PROTECTION FROM IMPORTS

Leaving aside dynamic considerations, and accepting for the moment the validity of the Stern Group's static framework, the report's assumption that 20 years of protection has harmed steel consumers is based on the allegation that effective protection from steel imports into the U.S. market existed over the 1969–85 period. However, the historical record on this issue is more a documentation of failed measures than it is of successful import-restricting policies having the effects now being attributed to them.

A system of voluntary restraints was reasonably effective in limiting imports in 1969 through 1971. These restraints were renegotiated in 1972, but by 1973 and 1974 the world steel shortage, combined with U.S. price controls, led to imports below the allowed levels, indicating that the restraints were no longer binding. Consequently, the restraints were allowed to lapse.

There were no import restraints on carbon steel between 1974 and 1978.

In 1978, a trigger price mechanism [TPM 1] was put in place, but this was an early-warning import monitoring system, not a functioning system of import protection in the United States. The first TPM operated from April 1978 to March 1980. While TPM 1 appeared initially to produce an abatement of import pressure, it ultimately failed to halt an influx of dumped steel from Europe in late 1979 and early 1980, resulting in the collapse of the system. A second TPM [TPM 2] was introduced in October 1980, but it, too, failed within a year. A massive influx of dumped and subsidized imports began in the spring of 1981, and between March and December of that year, monthly import penetration increased dramatically from 12 percent to nearly 23 percent.

In 1982 a system of voluntary restraints covering a limited range of products was negotiated with the EC; however, during this period—1982–85—there were neither restraints on many EC steel products, nor on imports from other countries. Imports of these exempted EC products, as well as imports from these exempted countries grew at an extremely rapid rate. This flood of non-VRA imports sent the U.S. import penetration ratio soaring above 25 percent. Not until 1986, when the present comprehensive system of VRA's became fully effective, did import penetration begin to decline.

Thus, over the 17-year period from 1969 to 1985, there was effective import protection for the carbon steel industry in at most 5 of those years, 1969–72 and 1985. In 2 other years—1979 and 1980—there was some partially effective import monitoring, but these years also saw major import surges and material injury to the U.S. steel industry.[2] Only in 1985 were there comprehensive restrictions covering about 80 percent of total steel imports into the United States. There was no comprehensive system of effective import protection for the steel industry during any time prior to 1985. Hence, the Stern Group is grossly incorrect in asserting that the steel industry benefited from "20 years of protection." Consequently, the analysis which follows from that premise is unfounded.

Even if the claim of "20 years of protection" were granted to be true, the Stern Group's evidence that import volumes were reduced and U.S. steel prices were elevated as a result of protection is of doubtful validity, at best.

In both absolute and relative terms, imports rose throughout the period of the alleged import protection. Table 1 presents absolute U.S. import volumes and import penetration ratios over the 1973 to 1988 span. What is clear from this data is the fact that the various pre-VRA protective measures had little effect, and certainly no sustained effect, on imports into the United States. The first TPM may have helped to hold down U.S. imports and their penetration of the U.S. market for a period of approximately 16 months between April 1978 and the late summer of 1979. Similarly TPM 2 may have restrained imports for approximately 7 months between the fall of 1980 and the spring of 1981. After these periods, however, with the unraveling of TPM 1 and TPM 2, imports and import penetration rose almost steadily until the effective establishment of the present VRA system in 1986. Thus, the evidence does not support the hypothesis that import protection led to a reduction in imports prior to 1985. This failure is not surprising, given the weakness and intermittence of the protective measures in place during that period.

TABLE 1.—U.S. IMPORT VOLUMES AND IMPORTS AS A SHARE OF APPARENT CONSUMPTION

Year	Imports (millions of net tons)	Import penetration (percent)	Effective protection
1973	15.15	12.4	No.
1974	15.97	13.4	No.
1975	12.01	13.4	No.
1976	14.28	14.2	No.
1977	19.31	17.7	No.
1978	21.13	18.1	Partial; TPM 1 (Apr.–Dec).
1979	17.52	15.3	Partial; TPM 1 collapses.
1980	15.49	16.4	Partial; TPM 2 (Oct-Dec).
1981	19.90	19.0	Partial; TPM 2 collapses.
1982	16.66	21.8	No.
1983	17.07	20.3	No.
1984	26.17	26.6	VRAs not yet in place.
1985	24.28	25.2	Partial; VRAs not yet in place.
1986	20.69	23.0	Yes, VRAs in place.
1987	20.41	21.3	Yes, VRAs; quotas unfilled.
1988	20.89	20.2	Do.

THE ISSUE OF STEEL PRICES

The evidence on steel prices prior to the 1984–85 VRA's also casts doubt on the conclusions of the Stern Group's analysis. The Stern Group attempts to show that United States steel prices were raised above Japanese and German home market steel prices by using data from the World Steel Dynamics Price/Cost Model. The prices selected by the Stern Group are not market prices at all. They do not show what consumers in any market paid for steel. Rather, they represent revenues per ton for all steel products, based on a cost model, corrected for various exogenous events and discounting. The Price/Cost Model composite price does show a fairly consistent differential between United States prices and Japanese and German home market prices, and it is from this differential that the Stern Group's estimates of "consumer cost of protection" are derived. However, other World Steel Dynamics [WSD] price data do not show such a consistent differential. A comparison of WSD carbon steel list price composites shows that U.S. prices were only above overseas home market prices—stated in U.S. dollars—about half of the time between 1973 and 1980. From 1981 to 1985 the unsustainably high value of the U.S. dollar caused U.S. steel prices to remain above overseas prices—stated in U.S. dollars. Now prices in the United States market are substantially below prices prevailing in many markets abroad, and dramatically below prices in Japan.

An examination of steel prices over the past 20 years—as opposed to modeled prices—does not support sweeping conclusions either to the effect that U.S. prices were consistently above or below overseas steel prices. In individual product lines prices were both above and below comparable foreign prices at various points in time. That foreign home market prices were actually often substantially above U.S. prices is underscored by the numerous affirmative antidumping determinations by the Commerce Department

[1] This conclusion relies on an otherwise static market (i.e., the introduction of import restraints is assumed to be the only exogenous change), as well as the assumptions that demand for imports is not perfectly inelastic (Edm < 0, since demand elasticities are negative) and that the supply of the domestic good is not perfectly elastic (Es < ϕO).

[2] The U.S. International Trade Commission found that U.S. producers of a variety of steel mill products, including wire rod, oil country tubular goods, pipe and tube, and cold-rolled sheet, were injured by reason of dumped and/or subsidized imports in these years.

based on price-to-price comparisons during this period.[3]

It is clear that any conclusions about comparative prices depend more on the data series selected for comparison, and less on the presumed effects of import protection, which was, in any event, nonexistent for most of the period under scrutiny.

Further, even if the Stern Group's choice of data and interpretation of history were granted to be correct, which it is not, counterintuitive results may follow. A simple, two-element comparison of import protection and price levels—as employed by the Stern Group—leads to the incongruous conclusion that more import protection spells lower prices—exactly the opposite of the Stern Group's argument. Specifically, since import protection abroad has been more effective in limiting imports than import protection has in the United States, the lower overseas prices found by the Stern Group can be seen as a direct result of that greater protection. Clearly, this is an unsound, if ironic, conclusion. It does serve to illustrate that overly simplistic comparisons cannot substitute for thorough analysis.

The foregoing demonstrates that steel markets in the pre-VRA period did not witness the events alleged by the Stern Group. Import protection was intermittent, at best; total imports were rarely restricted; and U.S. prices were not consistently elevated above prices in other major markets.

THE ISSUE OF THE EFFECTS OF CURRENT VRA'S

The Stern analysis stops at 1985, despite the fact that the data for 1986, 1987, and 1988—the period of effective VRA's—is readily available. Had the Stern Group extended its analysis to include the VRA period itself, it would not have found any evidence to support its hypotheses. In fact, the behavior of steel markets since the inception of the present VRA system reveals inconsistencies which make it difficult to sort out the effects of the VRA's on import volumes and prices. The evidence on the effects of the VRA Program on domestic supply and prices is quite mixed. The evidence does not point clearly to the conclusion that VRA's have led to higher prices in the U.S. market.

It is very difficult to draw conclusive causal links between the VRA's and changes in the steel market. Confounding the claim that the VRA's, as a form of import restraint, have restricted supplies is the evidence on VRA quota fulfillment. In 1987 and 1988 a number of VRA countries did not fill their quotas for exports to the U.S. market. Preliminary data for the first three-quarters of 1988 indicate that only 62 percent of the overall VRA quota was filled. Major suppliers such as Japan and Korea only filled 54 percent of their quotas; and other significant suppliers such as Brazil and the European Community fell well short of filling theirs.

While import share has fallen, the VRA's do not appear to have been a major factor restricting imports to the U.S. market in 1987 and 1988. There were other factors operating in the marketplace—principally high demand and attractive prices abroad—that caused foreign producers to limit their exports to the United States.

Just as the evidence on import restraint is mixed, so is the evidence concerning price movements during the VRA period. Since the VRA's have been in effect, prices have both fallen—in 1985 and 1986 when quotas were generally filled—and risen—in 1987 and 1988 when quotas were generally unfilled. Thus, it is difficult to conclude that the VRA's have been the sole cause of recent price increases. If VRA's are attributed to be the cause of the 1987 and 1988 price increases, then they also must be identified as the cause of the 1985-86 price decreases.[4] In all, domestic steel prices have declined 9% in real terms since the VRA's were instituted. Steel prices today are only higher when compared to the very recent past (1986), when they were severely depressed. These findings run counter to the Stern Group's contention that import restraints unambiguously raise prices.

In addition, even if the Stern methodology of comparing adjusted revenues per ton across countries were valid, an extension of the Stern Group calculation through August 1988—the last month for which the "World Steel Dynamics Price/Cost" data are available—shows an interesting result. Between January 1986 and August 1988 United States steel prices were significantly below Japanese home market steel prices. The differential was large enough to cause United States steel consumers to save $15.5 billion over their Japanese competitors. This savings occurred during the VRA period, and, if the Stern Group methodology were accepted at face value, presumably could be attributed to the effects of the VRAs.

OTHER INFLUENCES ON THE STEEL MARKET

The facts prove that the Stern analysis is incorrect in its designation of the VRA's as the cause of shortages and elevated prices in the U.S. market. The primary reasons why the Stern analysis is incorrect is that it ignores events and factors other than the VRA's which have had an impact on steel trade and steel prices. The Stern analysis assumes that all observable changes in the steel market can be attributed to the effects of import protection. Its most obvious omission is the failure to account for the effects of changes in demand—both domestic and overseas—on the quantities traded and the prices at which trades occur. This omission calls into question the Stern Group's use of a static framework to anlayze the effects of import protection.

Further evidence that there are other important factors influencing steel trade can be found in price trends overseas. The Stern Group suggests that VRA's are limiting exports to the United States and driving up U.S. prices. By the same logic, then, the limitation on exports should mean that more steel is freed up to serve markets outside the United States, thereby increasing supplies to those markets. If that were happening, all else being equal, then those additional supplies should be driving down prices in markets outside the United States. However, a look at overseas prices—expressed in home currencies to avoid exchange rate-induced distortions—shows exactly the opposite trend. Prices overseas, particularly in Europe, have been rising, and rising faster than U.S. prices.[5] This finding bolsters the suggestion that there are influences on the international steel market which outweigh the effects of the VRAs.

THE PRESENT CONDITION OF STEEL CONSUMERS

Because the assumptions of the Stern Group's analysis have no basis in observable facts, its conclusions about steel consumers' competitiveness are simple assertions. The Stern Group claims that because, historically, prices have been higher in the United States than in Japan or Germany, United States producers of steel-consuming goods have been at a cost disadvantage vis-a-vis their Japanese and German competitors. Further, the report claims that these U.S. firms' export performance has been hampered by this cost differential.

Even if the Stern analysis were meaningful, it is not clear that U.S.

[3] A price-to-price dumping margin is calculated by comparing the price of foreign steel in its home market with the U.S. price of the foreign-produced steel. Domestic prices of U.S.-produced steel are not relevant for the margin calculation. However, because steel is a commodity product, it can be inferred that the price of imported steel is at or near the price of domestically-produced steel. Thus, if the foreign producer's home market price is substantially above its U.S. price, it can be inferred that the home market price of the foreign producer is also above the price of U.S.-produced steel.

[4] Indeed, the argument has been made by Mr. Charles Blum (of International Advisory Services) that the VRA's have a current price-depressing effect because overseas producers' desires to maintain their allotted VRA quotas causes them to ignore high demand abroad and to ship more than they otherwise would have to the United States in order to preserve market share. Moreover, VRA's, having kept more U.S. production in place, and having been an inducement to investment in more productive steel facilities in the United States, are likely to have had a price-depressing effect on the domestic supply side of the market.

[5] When the comparison is made in a common currency, which is the valid basis for comparison, the rate of escalation of overseas prices is even more pronounced.

producers of steel-intensive goods have been disadvantaged by rising U.S. steep prices in late 1987 and 1988—particularly since those prices are lower than those paid by their foreign competitors. Presently, U.S. manufacturing industries are experiencing an export boom. Exports of steel-consuming goods, especially machinery and equipment, have risen substantially. In order to meet this strong demand for their products, steel consumers have had to buy more imputs, and in the process, have bid up input prices. Steel is just one of these many inputs. The Stern Group ignores the fact that demand for steel mill products is derived from the demand for steel-consuming goods. Steel mills base their production decisions on their perception of demand for their products. In a period of strong and rising demand for steel-consuming goods, such as at present, steel consumers increase their purchases of steel mill products and drive up steel prices. Hence, steel prices rise when production and exports of steel-consuming goods rise; that is, the markets move in tandem, rather than in opposite directions.

In fact, while steel prices have been bid up—in nominal terms—over the past 2 years, the gains achieved have been quite modest, especially in comparison to the price increases witnessed in other metals, where there are no VRA's. Aluminum, which is used by many of the same manufacturers that use steel, has experienced dramatic price increases since early 1987—up more than 100 percent. Metal markets worldwide have been booming for more than 2 years, and the rate of increase in nonferrous metals prices has vastly outstripped the gains in steel prices, and U.S. steel prices, in particular.

The Stern Group's analysis implies that rising steel prices spell misfortune for steel-consuming industries. However, the analysis fails to recognize that the business cycle plays an important part in the fortunes of steel producer and steel consumers alike. Steel prices are bid up by eager consumers, and those higher steel prices are indicative of good times for both steel producers and steel consumers. Consequently, no conclusion about U.S. steel-consumers' competitiveness can be drawn from the simple observation that steel prices have been rising. Similarly, the VRA Program cannot be indicted merely on the basis of coincidental market changes.

CONCLUSION

The Stern Group's analysis fails to explain observed steel market behavior, and draws conclusions based on an overly simplistic and inaccurate depiction of the determinants of steel prices. It can say nothing about the effect of import protection in general, the effects of the VRA's in particular, and the consumer costs of import protection. It should not be used as the basis for policy decisions which will affect the condition and international competitiveness of one of our key industries.

□ 1830

GENERAL LEAVE

Mr. GAYDOS. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks and include extraneous material on the subject of my special order tonight.

The SPEAKER pro tempore (Mr. TRAFICANT). Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

TAX ASPECTS OF MERGERS AND ACQUISITIONS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California [Mr. Cox] is recognized for 15 minutes.

Mr. COX. Mr. Speaker, today the House Ways and Means Committee began 3 days of important hearings on the tax aspects of mergers and acquisitions. The purpose of these hearings was to determine whether or not leveraged buyouts, mergers, and acquisitions are bad things which should be deterred or eliminated.

It was my privilege, as the chairman of the House Republican Task Force on Capital Markets, to be the lead-off witness in these hearings. And it was not just in that capacity that I appeared. For 8 years, I was myself a corporate finance practitioner, advising individual investors, investment bankers, and companies engaged in mergers and acquisitions, public offerings, tender offers, and leveraged buyouts.

I have also taught a course at Harvard Business School entitled "Tax Factors in Business Decisions." The focus of that course was very much on the subject matter of today's hearings.

During the past 2 decades, I have not only observed carefully the development of America's capital markets, but I have participated in those markets as the founder of a business which sold shares to venture capital investors.

From each of these perspectives—as a teacher, corporate lawyer, and entrepreneur—I have been continually impressed with the efficiency of America's capital markets in pooling the resources of millions of individuals in order to create new jobs, new products, new wealth, and a higher standard of living for the people of our country.

Frankly, America's capital markets are the envy of the world. The Tokyo Stock Exchange pales in comparison to America's many markets in New York, Boston, Philadelphia, Chicago, Denver, San Francisco, and Los Angeles, to name only a few.

Before I came to the Congress, I worked as legal counsel to President Reagan in the White House. One of my most interesting assignments was to assist the President in responding to questions from Izvestia, the Soviet Union's second largest newspaper, about the precipitous drop in the United States stock market in 1987. I recommended that the President respond to the millions of Russians who would read his answer by explaining what a stock market is, how it works, and what it does—because of course, the Soviet Union does not have a stock market. The President's response did just that. He pointed out that through our stock market, anyone who has a business idea can have access to the investment capital necessary to pursue it. As a result, President Reagan noted, Americans enjoy such things as personal computers, car telephones, and compact disc stereos, and the standard of living in the U.S. is more than three times that of people living in Communist countries.

It is not idle talk to focus on the very essentials of what free and open capital markets really do for us, because most of the proposals now before the Ways and Means Committee would substitute the judgment of the Federal Government for the judgment of investors in the capital markets. In so doing, these proposals would make the markets less free and less efficient, thereby reducing investment, job creation, and the wealth of the American people.

It has been argued that leveraged buyouts, mergers, and acquisitions are bad things which should be deterred or eliminated. To accomplish this objective, the Ways and Means Committee is considering: eliminating the deductibility of interest on takeover indebtedness; eliminating the deductibility of interest on debt that the Federal Government determines is not in the public interest; the establishment by the Federal Government of a so-called normative debt-to-equity ratio for U.S. business, and the imposition of a penalty tax on companies with a different ratio; a 25-percent penalty tax on compensation earned in connection with leveraged buyouts; a 50-percent penalty tax on specialists in mergers and acquisitions for compensation determined by Federal regulators to be excessive; a penalty tax on acquisitions, whether of stock or assets, if the value of the acquisition is over $50 million; and the elimination of tax deducations presently available to employee stock ownership plans.

The obvious intent of all of these proposals is, if you will, rather hostile to tender offers—not to mention leveraged buyouts and similar transactions.

This hostility is without solid foundations. Perhaps just as importantly, even if the hostility were legitimate, the proper means of regulating the Nation's Capital markets is through the securities laws, not through the back door using our tax laws.

In this connection, I can't help but draw attention to the statement by the Ways and Means Committee issued in its public announcement of these hearings that "the revenue impact, if any, of the * * * options—being considered here today—is unknown." In other words, the purpose of all of these proposals is not to provide ways and means for the operation of the Federal Government, but rather to penalize, deter or do away with leveraged buyouts, mergers and acquisitions. If that is the purpose of this Congress, we would all be better off to achieve that purpose directly—rather than through ham-fisted attempts to manipulate the financial returns from these transactions.

That leveraged buyouts, mergers and acquisitions should be done away with or deterred, however, is a wrong-headed assumption in the first place.

One frequent refrain, for example, is that the substitution of debt for equity deprives the Treasury of income tax revenue. On this subject, I have been particularly interested to note the disagreement between two of my Harvard colleagues: Bill Andrews, who was my tax professor 12 years ago; and Michael Jensen, with whom I served on the faculty of the Harvard Business School.

Professor Andrews, in his testimony before the Senate Finance Committee, asserted that the government's tax take "is virtually sure to be far less" after an LBO. Like many academics, he attempts to prove the truth of this statement in theory, rather than by relying on data from the real world. Professor Jensen, on the other hand, in his testimony before this committee, cited empirical studies which show that the Andrews subsidy argument ignores three important factors:

First, while LBO's typically reduce a firm's corporate income tax immediately after the transaction, they also generate large offsetting revenue increases in the form of capital gains taxes paid by pre-buyout shareholders who are forced to realize all of the gain on their holdings.

Second, the so-called subsidy argument also ignores the empirical evidence that after an LBO, a company's tax payments typically return to the pre-buyout level by the third year.

Finally, Professor Jensen observes, there are always substantial income tax payments by the buyout firm creditors who receive the interest payments and must treat them as ordinary taxable income.

As a result, Professor Jensen concludes, in the case of an average buyout with a price of $500 million, the net effect on Treasury tax revenues is to increase them by approximately $110 million.

For those of you who would prefer to look at the U.S. Government's income statement rather than empirical studies by Harvard professors, I should point out that the LBO era has been one of substantially increased Federal revenues from the corporate income tax. Beginning with 1983, the first year of the recovery, through the current fiscal year, it is estimated that revenue from corporate income taxes will have increased by more than $69 billion. That's a 189-percent increase. During the same time period, revenue from individual income taxes increased 47 percent.

Another spectre often raised in connection with leveraged buyouts is that jobs are lost when the new owners are forced to lay off workers in order to meet debt service requirements. This is a strange sort of flat-earth view of the economy, since the purpose of post-buyout management is to increase profitability by cutting costs, in the process making the company more efficient and more competitive. Does anyone seriously argue that less efficient companies with higher overhead make America more competitive internationally? If all of this leveraged buyout activity of recent years really had a materially adverse affect on employment, one would hardly expect to see America continuing with the longest peacetime economic expansion in our history, with the percentage of our population employed at an all-time high, and with the unemployment rate at a 15-year low.

In a study soon to be released by the National Bureau of Economic Research, Professors Brown and Medoff report that, "contrary to * * * public press coverage * * *, we find that wages generally grow faster following acquisitions * * *. We also find employment grows faster."

The truth is that, beneath the thin veneer of concern for the continued efficient operation of our capital markets, there is a barely disguised contempt—or perhaps instead, jealousy—for those men and women who presently earn substantial incomes by virtue of their participation in acquisitions. The provisions in several of the proposals before this committee that would penalize large mergers and acquisitions, but permit smaller ones, offer ample evidence of this emotional anti-wealth bias. Indeed, the triumph of populism over sound economics is most evident in those proposals that would impose tax penalties on so-called "excessive" compensation of those who work on leveraged buyout transactions.

One of the first things that all of us learn about capital markets is that they fluctuate. We have had down markets in the past, and we will have them in the future. When I first began as a corporate finance practitioner, the public offering market was all but dead. Year after year there was drought in the markets—and investment banking was not a very popular occupation for graduating MBAs. In those years, a peanut farmer from Georgia was urging this committee to impose penalty taxes on so-called windfall profits in the energy industry.

Today, when the oil patch is hurting and Wall Street is in robust good health, many of the same people who brought us the ill-conceived windfall profits tax are urging these latest regulatory attacks on our economy. The attacks, however, ignore the fundamental relationship of risk and reward.

In fact, the small entrepreneur with a dream has no chance in America if the largest transactions are made uneconomical or are outlawed. The venture capital funds and institutional investors who might finance a very risky enterprise will do so only so long as there is at least some chance of spectacular reward. When discounted for risk, the spectacular reward is of course much more modest, and that is what distinguishes the ground floor or the mezzanine from the penthouse. Take away the spectacular rewards in those relatively few but always high-profile transactions, and you will eliminate the very incentives that make our free enterprise system work.

Let me offer a personal example. A health care company that I myself incorporated, and then brought through several rounds of venture capital financing and two public offerings, was eventually acquired by a large New York Stock Exchange company. That onetime start-up venture now serves thousands of patients, and is worth in excess of $100 million; the individual investors have become multi-millionaires. That is not a typical case, but it illustrates the fallacy of attempting to discriminate against large transactions in a misguided effort to help the small entrepreneur.

Every single one of the entrepreneurs that I represented, and every one of the public offerings, mergers and acquisitions—and, yes, leveraged buyouts—that I handled, was undertaken in the hope of spectacular financial success. Those who bought common stock hoped that someday soon they might realize upon their investment through any number of means, including selling their shares in a tender offer, having their company acquired by a larger firm, or simply selling their shares in the public market to someone else who might generate his or her return in one of these ways.

By attacking debt financing of mergers and acquisitions, Mr. Speaker, we would be attacking those potential sources of investor return. That means that there will be fewer investors, and likewise fewer entrepreneurs who succeed in turning their dreams into reality.

I don't need to tell any of you that the most direct result of all of this would be fewer new jobs, fewer new products, and a decline in the wealth of the American people.

If we really wish to improve the workings of America's capital markets, we will choose not to make debt financing less attractive for American business. Instead, we will seek to make equity investment just as attractive as debt, by eliminating the double taxation of dividends and reducing the rate of tax on capital gains. As you know, Mr. Speaker, reducing the capital gains tax would generate a huge increase in Federal revenues which would serve to offset any static revenue losses from a shareholder dividend credit. Restoring the intended economic benefits of equity ownership in this way would go far to eliminating the current disparity between asset values and share prices that is the principal attraction to arbitrageurs engaged in leveraged buyouts. It would address the real issue of how to make America more competitive by encouraging increased investment, savings, job creation, and wealth creation—instead of hobbling America's competitive position by increased taxation and regulation of our capital markets and the American men and women who participate in them.

□ 1840

A HISTORY OF THE SAVINGS AND LOAN LEGISLATION

The SPEAKER pro tempore (Mr. TRAFICANT). Under previous order of the House the gentleman from New York [Mr. SCHUMER] is recognized for 60 minutes.

Mr. SCHUMER. I thank the Speaker.

Mr. Speaker, it is my honor to be here today as not only a member of the Committee on the Judiciary but as a member of the Committee on Banking, Finance and Urban Affairs to talk a little bit about the S&L crisis and the bill that is coming before us.

Mr. Speaker, in a few weeks this House will be dealing with, on this floor, perhaps one of the most major pieces of financial legislation to come before it since World War II, and that is the S&L bill.

We all know we have a crisis in many parts of this country because of the problems in the thrift industry. I thought I would share a few moments with my colleagues just to try to give some historical background as to what happened.

Mr. Speaker, I can say that when we get into this issue there is going to be blame; there is going to be plenty of blame to go around. There is no question about that.

But I think a historical perspective and understanding as to what happened will help us understand not only why the crisis occurred but what we must do in the future to prevent it from happening again.

Mr. Speaker, in the 1930's we did something in this country that was probably the second greatest invention of the New Deal.

We created the deposit insurance.

Previous to that, Mr. Speaker, the economic history of this country was punctuated by dramatic valleys and dramatic upturns mainly because people lost faith in their financial institutions.

The things were called panics, and they literally were; rumors spread that banks or thrifts were illiquid and people would run, line up—we have all seen the pictures and the movies—line up around the block to try to get their money out. The bank would collapse, the institutions with loans would then collapse and sure enough the economy would not be far behind.

Our economy suffered great ups and downs. And in a bipartisan effort both President Hoover and President Roosevelt created the Federal deposit insurance which said to the average person that, "If you put your money in a thrift you are guaranteed up to a certain amount by Uncle Sam." That has been a great invention. It has saved thousands, millions, tens of millions of families hardship because the business cycles that were so characteristic of our economy before 1933 were muted at the very least.

The kind of unemployment, depression and all the other things that would ensue were no longer there.

We did a second thing in the 1930's; what we did was we created a special thrift industry which, with legislation added on in the forties and fifties and sixties, had a very special mission. The thrift industry was given certain advantages to fulfill that special mission which was the housing of America, the building of homes.

Sure enough, if you look at the statistics in 1940 and then look at the statistics in 1960 and again in 1980, it was a remarkably successful experiment.

□ 1850

These thrifts were given a little better interest rate, but they were limited in where they could put their money, and they put it into home mortgages, and they helped tens of millions of American families fulfill the American dream, the ownership of a home at relatively cheap interest rates.

Well, what happened? Things were going along so well, what changed? Well, a couple of things changed, Mr. Speaker, but most important of all, the economy became far more sophisticated. In the mid and late 1970's some of our financial geniuses found ways of allowing people to invest money and get a Federal, indirectly, a Federal guarantee at the prevailing rate of interest rather than the 5½ percent that the thrifts were offering, or for that matter, the 5¼ percent the banks were offering, and they put the money into those money market funds, and in the late 1970's when interest rates soared, the amount of money that flew out of the thrift industry was dramatic. Something like $200 billion over the course of several years, as many investors said they would rather have a money market fund which after all is just large CD's instead of having their money getting only 5½ percent of a thrift.

The thrifts began to suffer, and through no fault of their own, they clamored for change. They said, "We need a way out, we cannot sit here while money market funds are giving 17 percent and we are only being allowed to get 5½ on deposits," so quite naturally the Congress in 1980 said the interest rates would be deregulated and that thrifts could be given to garner on their deposits whatever amount of the prevailing rate of interest was over a period of time.

Sure enough, the thrifts began getting 8, 9, 10, 11, 12, 13 percent for their deposits, but that left them, and by the way, I would say in that legislation in 1980 I was not here. I came to Congress in 1981, but to look at the debate, it is amazingly shortsighted and something that this body and the other body and the White House and all of America has done over and over again, we have legislated in terms of financial matters to deal with an immediate problem, and we have not looked at what other problems might be created as we solved the immediate problem. We have not looked at the dramatic effect that those changes would bring into our economy.

Well, this was a classic, the thrifts. Sure enough, stopped the disintermediation, the money flowing out of them, but instead they faced a new crisis. The new crisis was that while, to keep their deposits, they were charging 10, 11, 12 or giving 10, 11, 12 percent, on the other side of their balance sheet, their portfolio had mortgages, 30 years, 20 years, at only 5 or 6 percent or 4 percent, and every week as they were paying 13 percent but only bringing in 4 or 5 percent that lost more money, and again they came to Washington and clamored and they clamored and they said, "Look, one of our balance sheets is deregulated, let us just deregulate the other side," and my colleagues, at this point in time, is then the crisis that is now upon Amer-

icans was born, because we did it. The Congress, the President, deregulation was the mania, and the view was, let thrifts invest their money in anything they choose to. After all, they could no longer do with only making a 4- or 5-percent return, let me try some riskier things which naturally created a higher, higher rate of return successful.

One big problem, this was not the free market. When the regulators came before the Committee on Banking, Finance and Urban Affairs in 1981 and 1982 and then 1983 and 1984, and they said, "We must deregulate," when the administration, the Ronald Reagan administration, said we have to deregulate, they were taking a doctrine that was created for other parts of the economy and grafting it onto this part of the economy where deregulation made no sense, and for one very simple reason, the reason I gave at the beginning, which is that all of these investments were federally insured. That meant, very simply, that if an institution was allowed to invest in risky things and they lost, Uncle Sam would be there to pick up the tab, not to the officers of the thrift as is commonly thought or the stockholders as is commonly thought today, but to the depositors.

Mr. Speaker, if Members look at the greatest mistake made by this country that has brought this crisis upon America, it was the manic ideological and illogical deregulation that occurred in 1982 and 1983 and 1984. The deregulation meant something very, very funny. It meant that if someone should decide to open a thrift and another aspect of deregulation was to allow as many people as wanted, whether they had experience or not, whether they had capital or not, whether they had anything else, but to allow as many people as they wanted to get these thrift charters, and then invest in what they wanted.

Now we all know in the general marketplace there is discipline. If I wished to invest money in, or let us not take me because I cannot do that or will not do that in my profession, but if someone wanted to, we have to be very careful these days, Mr. Speaker, but if someone wanted to invest money in, let us say, risky real estate ventures, what would normally happen? They would either have their own money at stake, and many do, and of course, then if they lose the money, it is not Uncle Sam's problem, they lose it; or they go to the market for money. The market is the sternest and severe disciplinarian of all. The market says, "Okay, this is a risky investment, I am not going to put up the money unless you do A, B, C, D or I will only put up this money if you pay 20 percent, but not with a thrift," because the thrift money came in independent of the investments they made for the very reason that they were federally insured. So if John Doe or Jane Roe put money in a thrift, they did not have to look at what investments the thrift was making because they knew no matter what investments the thrift made that as long as they put in less than that amount, now $100,000, Uncle Sam would guarantee the money.

It is amazing, Mr. Speaker, what we let do, this administration and the regulators and Congress went along, no question about it, but what we did under the guise of deregulation. We allowed these federally insured institutions to invest in the wildest and craziest schemes, and little did we know at that point that we would have to pay the piper, even though it would have been obvious to somebody to really see it if these investments failed.

So, my colleagues, what is the lesson that we can learn from this crisis? Very simply, that while deregulation may make sense, I tend to think it does in some areas and not in other areas, but it may make sense in certain parts of the economy, it makes no sense, and it is almost a logical contradiction to say let us deregulate and let us allow the Federal Government to insure the mess that is made by those who are now given this new and unfettered freedom, and the thrift bill that has passed the Committee on Banking, Finance and Urban Affairs attempts to deal with that problem in two ways.

First, it says that, and foremost, it says that institutions must have capital. It says that if institutions are going to be federally insured and are going to make investments, they must risk their own money first. Gone will be the days that a thrift owner or management can just go to the depositors, take their money and invest it.

□ 1900

What they say is that "if you are going to get a hundred dollars of depositors' money, you have better have $6 of your own, and if you lose money, you lose those first $6 before anything else is lost."

When people have their own money at stake, they are a lot more careful than when they are gambling with other people's money. The capital requirements in the bill passed by the Banking Committee are tough, tougher than those that were passed by the other body, tougher even, many would argue, on one of them at least, than those that the President proposed.

Let me say to my colleagues that we can be proud of this bill because it has those tough standards. But I would hasten to add that to dilute those standards at a time when we are paying $100 billion and flushing it down the sink hole makes very little sense, although flush it we must, because we have a legal obligation to pay those depositories whose banks are now insolvent. But if we are going to do that, to dilute those standards makes very little sense.

Then we do a second thing. We say regulatorily that the institutions that are there will have much stricter governance. I will just give a few examples and later, as the debate unfolds when we reach the floor, I will give more. We used to say that the States could regulate these institutions, but the Federal Government would ensure them. How asinine. Most States were careful. Texas, Louisiana, Oklahoma, California, and Florida were not, and that is where the mess is, because the State regulators figured, "Oh, I can be nice and friendly to my thrifts in my State." And who is going to pick up the pieces? The insurer, the Federal Government.

But that will happen no more. We now give the insurer the power to go to an individual institution and say, "Look, Mac, you are doing risky things. If you don't stop, we will pull your insurance and the institution will collapse." And we also take the regulatory structure and put it in the Treasury Department, which makes sense as well, because we do not want to have this industry free of budget and other constraints and rather than being just out there so political considerations can govern.

It is a horrible thing that we have to bring this bill to the floor, Mr. Speaker; it is a horrible thing because we are spending $100 billion today that we could have spent on other much more worthy causes, or $100 billion we might have used to reduce the deficit. We have no choice there at all. As much as everyone says, "I am not going to vote for that bill; I don't want to spend that $100 billion," that is not the answer. That is the easy thing to do, I suppose, but that just simply means that every depositor who did not get paid can come in and sue the Federal Government and get the money that way, and the cost will be so much the greater.

But if we are going to do that, we must make sure that the mistakes of the early 1980's, the mistakes of deregulation, the mistakes that the administration and the regulators heralded and Congress went along with, do not happen again. We must tell people, "Put your money where your mouth is. If you want to do risky things, put your own money up, and certain risky things you cannot do."

That is at least one Member's interpretation of the crisis. Again let me say there are going to be all sorts of potshots taken on the floor of this body as to who is to blame. There is a long historical explanation. The bottom line is that we have got to fix what happened, and this bill does a good job.

Mr. FRANK. Mr. Speaker, will the gentleman yield?

Mr. SCHUMER. I am happy to yield to the gentleman from Massachusetts.

Mr. FRANK. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, I want to pay tribute to the work the gentleman has done on the bill that is going to be coming to the floor soon. He has been recognized as one of the leaders in fighting for stronger standards, and in his criticisms of the deregulation that has gone on, he is correct in saying that our primary job is to fix things.

Our friend, the gentleman from Minnesota [Mr. VENTO], planned to be with us, but things ran later than had been anticipated. As the gentleman from Minnesota said, if we would try to fix things, we have got to look at what the problem has been. Part of what I think we have to do is to deal with the myth that is, I think, one of the greatest acts of hypocrisy I have seen, in which some of the most conservative and right wing forces in this society, precisely those who have been the advocates of meaningless deregulation, are now complaining that the Democratic House somehow did not prevent all these errors over which they presided. It is almost as if they are writing on the mirror down there at the White House: "Stop us before we deregulate again." They somehow cannot help themselves.

The gentleman from New York has correctly pointed out that the regulators were the ones in charge. He noted correctly that Congress went along with this deregulation during 6 of the 8 years in which the situation was deteriorating, or during 6 of the 7 years, because by the last year there was widespread recognition. But then we had a divided Congress. We had a Democratic House, and we had a Republican Senate, and our ability to take on the administration was weakened. But let us be very clear. We can listen to Edwin Gray, to whom I think some credit is due as a regulator. I was critical of him before, and I acknowledge now that he had some important points to make that were being ignored. But they were being ignored, first and foremost by people in the Reagan administration. He has chronicled how he asked David Stockman and Donald Regan, the Director of the Office of Management and Budget and the Secretary of the Treasury, to allow him to hire more bank examiners so they could deal with precisely the kind of looseness the gentleman from New York has talked about.

In those areas where State-chartered institutions were using a Federal insurance guarantee on improvident loans, he could not look at some of these, and if they had been examined, they would not have stood up. Some of these were not sophisticated misjudgments; they were blatant misjudgments. But the Republican Reagan administration, in its theory of what I think was mindless deregulation, refused to allow Mr. Gray to hire people to examine the books, even though that would have come at no cost to the Federal budget because those examiners would have been paid for by the fees paid by the banks.

We have had reference made elsewhere to a bill that was defeated in this House a few years ago and later passed in amended form when there was a request for some authority for the Federal Government to require savings and loans to put more money into their insurance fund for a 15-year period. It was cut back to a 5-year period, and I regret to say that a majority of our colleagues did not do the right thing at that time, as the gentleman from New York pointed out.

But I am shocked to see this portrayed somehow as a partisan issue. Majorities on both sides of the aisle voted the position that the savings and loan industry preferred over that of the regulators in that one instance. The gentleman from Georgia, who is now the minority whip, voted for the weaker form. We are not all perfect and we do not all have the ability to know everything that goes on, but it is just a bizarre distortion to make that a case where somehow the regulators were dying to do the right thing and Congress would not let them do it.

The Reagan administration is the group that took credit during 8 years for defying the efforts of Congress to shackle them. They took credit for that. This one thing was a clear disaster, and all of a sudden that was a shared responsibility.

Mr. Speaker, I will ask the gentleman from New York this question, because he is a very diligent member of the Banking Committee and is as well informed on these issues as any Member of the House. He has pointed out the problems of the insurance and the State charters. Can the gentleman recall at anytime during the previous 8 years, before we got this bill from President Bush, when the Reagan administration, through any of its entities, came and asked us to change any of the things that he talked about?

We know they asked for more premium authority. I agree with that one. But when it came to trying to restrain the State-chartered thrifts from using Federal insurance and put some restrictions on that, can he think of anything they asked us to do that we did not do?

Mr. SCHUMER. Mr. Speaker, I will say to the gentleman that I cannot recall a single instance. In fact, the number of times I was called upon by the regulators to allow further deregulation and to allow the thrifts and banks in other areas to get into even more wild and crazy schemes was numerous. And I remember in the Garn-St Germain bill that a former colleague of ours who is now the Governor of Louisiana, Buddy Roemer, put in an amendment that said, "Don't allow the thrifts into these risky activities," and it was defeated 22 to 20 only because the administration opposed that amendment while a majority of us on our side of the aisle supported that amendment.

Mr. Speaker, I yield further to the gentleman from Massachusetts.

Mr. FRANK. Mr. Speaker, I thank the gentleman for yielding further to me, because he makes another good point. In the bill that just came forward through the leadership of the gentleman and the chairman of the full committee, our colleague, the gentleman from Texas [Mr. GONZALEZ], and the gentleman from Minnesota [Mr. VENTO], who put an excellent statement in the RECORD, the important issues are addressed. The gentleman from Minnesota [Mr. VENTO] was talking about this conservative effort to blame the House somehow for this S&L crisis, and this is what he said in his statement:

> In a revisionist view of history, unparalleled since Khrushchev denounced Stalin, these regulators are now seeking to portray themselves as the modern day Horatios, standing on the bridge of sound thrift policies against the unreasonable horde of deregulation.
>
> Unfortunately, the facts do not bear out that contention.

□ 1910

However, Mr. Speaker, these gentlemen led the fight for tougher capital standards, and on key rollcalls, when the Bush administration was asking the House Committee on Banking, Finance and Urban Affairs to provide tough standards, we had a pretty partisan breakdown. An overwhelming majority of Democrats voted for the tough standards. A majority of the Republicans in one case, and half in another case, voted to weaken the standards.

Mr. Speaker, I am not suggesting that the gentleman from New York and the gentleman from Minnesota are not saying this is partisan. We never put it in this context, but we have been, all of us, appalled to find people trying to reinvent history, and in fact this is a example, not necessarily of the error of deregulation, but of the dangers of the excessive deregulation and of deregulation carried to a ludicrous extreme.

So, Mr. Speaker, I am going to have to leave now, and I appreciate the gentleman from New York [Mr. SCHUMER] taking the lead, but I want to say, Mr. Speaker, that no one has got a better record than he has compiled, not just in this past few months, but over the 8½ years that we have served together here while fighting the excesses of deregulation and this notion that some-

how this was the House when the Reagan administration controlled the Secretary of the Treasury, the Comptroller of the Currency, the FDIC, the Federal Savings and Loan Insurance Corporation, Federal Home Loan Bank Board, the Federal Reserve Board, when every one of these regulators was in the hands of the Republicans, when the Senate was for 6 years in the hands of the Republicans. To say that somehow the Democratic House in this one area was able to exercise a mastery is the kind of creative accounting that the S&L's used and got us in the trouble in the first place.

So, Mr. Speaker, I salute the gentleman from New York [Mr. SCHUMER] for his work.

Mr. SCHUMER. Mr. Speaker, first I thank the gentleman from Massachusetts [Mr. FRANK] for his kind words. Needless to say, he has been a leader in this issue, as he is in so many other issues in terms of getting the Congress to do the right thing, and I very much appreciate his participating in this order.

Mr. Speaker, I just underscore the points of the gentleman from Massachusetts [Mr. FRANK]. To try to make this a partisan issue is to turn history on its head. Everyone in this area made mistakes. There is no question about that. Every generic group made mistakes, but fundamentally, when one examines the record, the ideological and headlong deregulation, some say "Oh, nothing wrong with deregulation."

Mr. Speaker, we need adequate supervision, but, as the gentleman from Massachusetts [Mr. FRANK] pointed out, there was a lot of opposition from those who wanted deregulation to any kind of supervision that had teeth. But it was the headlong rush into deregulation that brought us to this crisis.

Let us constructively learn from the mistakes that were made, and let us finally, once and for all, say that whatever our party, whatever our views on other issues, that this is not a Democratic or Republican, a liberal or conservative issue. It is an issue of plain common sense.

It is easy to play with other people's money. One is much more careful when playing with their own.

Mr. VENTO. Mr. Speaker, I would like to commend my colleagues from New York and Massachusetts for sponsoring this special order on the savings and loan [S&L] thrift crisis. It is timely and sets the proper stage for the deliberations that the full House will soon begin on the S&L bailout legislation.

Mr. Speaker, questions have been appropriately raised by many of our constituents about the cause and responsibility for the state of our S&L industry and the Federal Savings and Loan Insurance Fund. People have asked; "What happened?" "Who was in charge?" and more appropriately, "Has someone been asleep at the helm for the decade of the eighties?"

In an uncharacteristic display of generosity, some colleagues from the other side of the aisle and the Senate wish to share the wealth of blame. "There is more than enough blame to go around," these folks magnanimously say "now is the time for solutions, not finger pointing." I would agree with my colleagues that it is the time for solutions. In fact solutions were long overdue before the November 1988 election. We cannot however implement sound solutions if we ignore the misguided Reagan and Bush policies that led us to our current quagmire.

While our House colleagues are seeking mutual and bipartisan guilt, some former Republican regulators are seeking to wash their hands of the entire crisis. In a revisionist view of history, unparalleled since Khrushchev denounced Stalin, these regulators are now seeking to portray themselves as the modern day Horatios, standing on the bridge of sound thrift policies against the unreasonable horde of deregulation.

Unfortunately, the fact do not bear out that contention. Time and time again, Congress has had to intervene to end the turmoil and dislocation of administration led deregulation efforts. Congress has had to act to establish certainty and competition in a marketplace disrupted by piecemeal initiatives. We did it with the airline industry, we did it with trucking and rail deregulation. We are now acting in response to financial and thrift deregulation.

I want to point out to my colleagues that it was the regulators who did not respond or use existing authority to rein in expanded State chartered direct investment activities when the serious problems arose. It was the Republican regulators who equated deregulation with inadeqate oversight and reduced examination. It was those same regulators who lowered capital requirements to 3 percent, much of it intangible capital based on the regulators own special brand of accounting.

Mr. Speaker, the legislation approved by the House Banking Committee is a sound legislative proposal that sets a responsible policy course for resolving the current thrift crisis and a solid foundation for a more secure thrift industry. However, the legislation itself is certainly a broad condemnation of lax regulatory supervision that has occurred in this decade of the eighties.

In order to insure that today's crisis is not repeated, H.R. 1278 sharply limits regulatory flexibility. Congress, not the regulators, establishes the tough new minimum capital standards. We establish the criteria that the regulators must consider in granting any exemptions. Congress, not the regulators, refocus the function of our thrifts to its traditional home lending role.

Mr. Speaker, many of my colleagues and I would have preferred a more flexibile approach. But history has shown us that blind faith at the altar of deregulation has an unacceptable price that many Americans do not deserve but now are asked to pay. Regulatory flexibility carries a big responsibility. When that responsibility is not properly utilized, there is surely a price to be paid.

Congress must today fill the vacuum of judgment that has existed with the Reagan/Bush Administration's management of financial institutions when produced the thrift crisis. We may not be able to predict the future, but surely we can read the history of the 1980's, when the regulators failed to regulate; accountants failed to count; thrift directors failed to direct; and the laws and policies were abused and misused at a great expense to the Federal savings deposit system and the American taxpayer.

The lesson to be gained here is one of vigilance for the regulators and the willingness to face up to their task. Regulators have had the tools to do their job. Today we are working to improve those tools and resources but this legislation will not pour into the regulators the quart of common sense that has been so lacking in the past decade. This legislation will hopefully prove fail-safe to the folly of the deregulation litany and pattern of sorry conduct that produced this S&L crisis.

GENERAL LEAVE

Mr. SCHUMER. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the subject of my special order tonight.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

TO PROVIDE FOR IMPROVED HOUSING AND SERVICES TO THE ELDERLY AND HANDICAPPED INDIVIDUALS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California [Mr. ROYBAL] is recognized for 5 minutes.

Mr. ROYBAL. Mr. Speaker, today, I am introducing a bill, "Housing for the Frail Elderly Act of 1989," to be referred to the House Banking Subcommittee on Housing and Consumer Interests. This legislation is intended to respond to the increasing need to comprehensively deal with the needs of the frail elderly living in federally subsidized housing.

This legislation begins to develop the link from housing to services, by removing barriers which keep existing services from being linked to elderly housing. This legislation keeps in perspective the tremendous budget restraints we are faced with and still addresses the needs of the frail elderly.

On Monday, May 4, 1989, the Select Committee on Aging held a hearing to discuss this topic. Experts in the field presented data and findings on the operation of housing and service programs. Ray Struyk with the Urban Institute, presented data on evaluation of congregate service programs, urging a tight targeting of the programs for the desired cost-effectiveness. Mr. Struyk also presented recommendations for the legislation for housing for the frail elderly. Robert Katz, di-

rector of the University of Illinois Housing and Research Center, presented data on the needs of the frail elderly and comparative data on housing and services programs as opposed to nursing home costs. Stephen Somers presented information on the Robert Wood Johnson Foundation Program to work with States to develop congregate housing service models. Richard Ladd, with the Oregon Senior Service Program, reported on the use of Medicaid waivers to service the elderly in their homes, to keep them independent and allow them dignified lives and to reduce the cost of nursing home care in the State.

In 1985, the elderly represented approximately 11.5 percent of the population, and by 2030, when the baby-boom generation reaches 65, they will represent 21 percent of the population. In addition, persons 85 and over, who are at greater risk of needing and using services are the fastest growing population group.

In 1985, nursing home care cost this Nation $36 billion, $19 billion in public funds. By 2030 the aging population will nearly double, and the cost will rise as well.

If this Nation does not develop a comprehensive approach to long-term care for the elderly, the Nation's budget will cripple the Government. The frail elderly are those elderly who are in need of services to remain independent. For most elderly this means one meal a day or transportation. Without these services an elderly person remains vulnerable in independent housing or inappropriately placed in a nursing home. It is estimated that one-quarter to one-third of the elderly in nursing homes are inappropriately placed, and that approximately the same percentage of elderly in independent living arrangements are in need of some services to remain safe and independent.

This legislation addresses the critically needed improvements of existing elderly housing programs and responds to the needs of the frail elderly who are aging in place. As our elderly population continues to age, we must seek out and respond to cost effective, and dignified solutions. These solutions do exist. We have done studies; we have sponsored demonstration programs; we know what works, and what needs to be done.

In developing this program we explored a wide variety of potential solutions. We examined programs under the jurisdiction of the Department of HHS; title XX, Medicaid and Medicare, Older Americans Act, especially title III; and the Departments of HUD and Agriculture, Farmers Home Administration, housing programs which had a majority of elderly residents. While I will have more to say later with respect to a comprehensive long-term care program, this legislation responds to the existence of service programs and housing program and enhances links between them.

The "Housing for the Frail Elderly" legislation has three main elements which respond to the current regulation of federally subsidized housing.

First, this legislation allows service coordinators as an eligible expense in elderly and handicapped housing, or housing with predominately elderly residents. Current law prohibits management costs from including a person trained in identifying necessary services and locating appropriate existing services. This has forced caring managers to hide costs, or attempt to add service coordination to their already overburdened management schedules. Many elderly projects have no service coordination because it is not allowed or because they do not have the time. Elderly housing facilities generally range from 30 to 100 units. Often, managers are responsible for up to six buildings. These people are neither trained nor prepared to care for their increasingly aging residents.

Second, in response to the need for linking services with congregate living facilities, the legislation creates an allowable expense of 15 percent of the cost of services which will be used to leverage local, State, and private financing for 85 percent of the service provision.

Service provision not only takes advantage of economies of scale provided by congregate settings, but it also provides an alternative to the financially burdensome nursing home care which cost the National Government $19 billion a year. One of the main causes of premature placement in institutions is the nonexistence of Federal programs linking housing and services.

The Federal Government now provides for independent housing programs and full skilled nursing care facilities. A major part of the housing spectrum is excluded. By linking Federal housing programs with existing service programs, the national agenda will be moving in the right direction.

Finally, construction cost containment requirements and shortsighted planning have left many elderly housing buildings inappropriately suited for the needs of the frail elderly. The "Frail Elderly Housing Legislation", encourages design flexibility, prohibits cost containment measures which can prevent service delivery, and encourages design plans to reflect service provision. This bill also permits renovations which make housing more appropriate for the frail elderly and handicapped. Renovations include: lower counters, grab bars in bathrooms, wider doors for wheel chairs, common areas, and dining spaces.

I feel that this legislation is a sound proposal for addressing the needs of many frail elderly. It is my hope that Congress will begin to understand the link between housing and the long-term care system.

RULES OF THE COMMITTEE ON BANKING, FINANCE AND URBAN AFFAIRS OF THE 101ST CONGRESS

Mr. GONZALEZ. Mr. Speaker, I submit for printing in the CONGRESSIONAL RECORD the rules of the Committee on Banking, Finance and Urban Affairs for the 101st Congress, as follows:

RULES OF THE COMMITTEE ON BANKING, FINANCE AND URBAN AFFAIRS OF THE U.S. HOUSE OF REPRESENTATIVES, 100TH CONGRESS, 1987-88

RULE NO 1—GENERAL PROVISIONS

(a) The Rules of the House are the rules of the committees and subcommittees so far as applicable, except that a motion to recess from day to day, and a motion to dispense with the first reading (in full) of a bill or resolution, if printed copies are available, are nondebatable motions of high privilege in committee and subcommittees. Each subcommittee of the committee is a part of the committee, and is subject to the authority and direction of the committee and to its rules so far as applicable.

(b) The committee is authorized at any time to conduct such investigations and studies as it may consider necessary or appropriate in the exercise of its responsibilities under rule X of House Rules and (subject to the adoption of expense resolutions as required by rule XI, clause 5 of the House Rules) to incur expenses (including travel expenses) in connection herewith. The ranking minority member of the full committee or the relevant subcommittee shall be notified in advance at such times as any committee funds are expended for investigations and studies involving international travel.

(c) The committee is authorized to have printed and bound testimony and other data presented at hearings held by the committee. All costs of stenographic services and transcripts in connection with any meeting or hearing of the committee shall be paid from the contingent fund of the House.

(d) The committee shall submit to the House, not later than January 2 of each odd-numbered year, a report on the activities of the committee under rules X and XI of House Rules during the Congress ending at noon on January 3 of such year.

(e) The committee's rules shall be published in the Congressional Record not later than 30 days after the Congress convenes in each odd-numbered year.

RULE NO. 2—REGULAR AND SPECIAL MEETINGS: OPEN COMMITTEE MEETINGS

(a) Regular meetings of the committee shall be held on the first Tuesday of each month while the Congress is in session. When the chairman believes that the committee will not be considering any bill or resolution before the full committee and that there is no other business to be transacted at a regular meeting, he will give each member of the committee, as far in advance of the day of the regular meeting as the circumstances makes practicable, a written notice to that effect and no committee meeting shall be held on that day.

(b) The chairman may call and convene, as he considers necessary, additional meetings of the committee for the consideration

of any bill or resolution pending before the committee or for the conduct of other committee business. The committee shall meet for such purpose pursuant to that call of the chairman.

(c) If at least three members of the committee desire that a special meeting of the committee be called by the chairman, those members may file in the offices of the committee their written request to the chairman for that special meeting. Such request shall specify the measure or matter to be considered. Immediately upon the filing of the request, the clerk of the committee shall notify the chairman of the filing of the request. If, within 3 calendar days after the filing of the request, the chairman does not call the requested special meeting to be held within 7 calendar days after the filing of the request, a majority of the members of the Committee may file in the offices of the committee their written notice that a special meeting of the committee will be held specifying the date and hour thereof, and the measure or matter to be considered at that special meeting. The committee shall meet on that date and hour. Immediately upon the filing of the notice, the clerk of the committee shall notify all members of the committee that such meeting will be held and inform them of its date and hour and the measure or matter to be considered; and only the measure or matter specified in that notice may be considered at that special meeting.

(d) If the chairman of the committee or subcommittee is not present at any meeting of the committee or subcommittee the ranking member of the majority party on the committee or subcommittee who is present shall preside at that meeting.

(e) The committee may not sit, without special leave, while the House is reading a measure for amendment under the 5-minute rule.

(f)(1) Each meeting for the transaction of business, including the markup of legislation, of the committee or each subcommittee thereof shall be open to the public except when the committee or subcommittee, in open session and with a majority present, determines by roll call vote that all or part of the remainder of the meeting on that day be closed to the public: Provided, however, that no person other than members of the committee and such congressional staff and such departmental representatives as they may authorize shall be present at any business or markup session which has been closed to the public. This paragraph does not apply to open committee hearings which are provided for by subparagraph (2) of this paragraph, or to any meeting that relates solely to internal budget or personnel matters.

(2) Each hearing conducted by the committee or each subcommittee thereof shall be open to the public except when the committee or subcommittee, in open session and with a majority present, determines by roll call vote that all or part of the remainder of that hearing on that day shall be closed to the public because disclosure of testimony, evidence, or other matters to be considered would endanger the national security or would violate any law or rule of the House of Representatives. Notwithstanding the requirements of the preceding sentence, a majority of those present, there being in attendance the requisite number required under the Rules of the Committee to be present for the purpose of taking testimony, (A) may vote to close the hearing for the sole purpose of discussing whether testimony or evidence to be received would endanger the national security or violate subparagraph (g)(5) of Rule 7; or (B) may vote to close the hearing, as provided in subparagraph (g)(5) of Rule 7. The committee or subcommittee may, by the same procedures specified in this paragraph, vote to close one subsequent day of hearing.

(g) No person other than a Member of Congress, committee staff, or a person from a Member's staff when that Member has an amendment under consideration, may walk in or be seated at the rostrum area of the Committee unless the chairman, the chairman of the subcommittee, or a majority of the committee determines otherwise.

RULE NO. 3—RECORDS AND ROLLCALLS

(a) There shall be kept in writing a record of the proceedings of the committee and of each subcommittee, including a record of the votes of any question on which a roll call is demanded. The result of each such roll call vote shall be made available by the committee for inspection by the public at reasonable times in the offices of the committee. Information so available for public inspection shall include a description of the amendment, motion, order or other proposition and the name of each member voting for and each member voting against such amendment, motion, order, or proposition, and whether by proxy or in person, and the names of those members present, but not voting. A record vote may be demanded by any three of the members present or, in the apparent absence of a quorum, by any one member.

(b) All committee hearings, records, data, charts, and files shall be kept separate and distinct from the congressional office records of the member serving as chairman of the committee; and such records shall be the property of the House and all members of the House shall have access thereto.

RULE NO. 4—PROXIES

(a) No vote by any member of the committee of any of its subcommittees with respect to any measure may be cast by proxy unless a proxy authorization is given in writing by the member desiring to cast a proxy, which authorization shall assert that the member is absent on official business or is absent due to personal illness and is thus unable to be present at the meeting of the committee or subcommittee and shall be limited to a specific measure or matter and any amendments or motions pertaining thereto. Each proxy to be effective shall be signed by the member assigning his/her vote and shall contain the date and time of the day that the proxy is signed. No proxy shall be voted on a motion to adjourn or shall be counted to make a quorum or be voted unless a quorum is present.

(b) Proxies shall be in the following form:

Hon. ,

House of Representatives, Washington, DC.

DEAR : I will be absent on official business/due to personal illness and thus unable to be present at the meeting of the committee or subcommittee. I hereby authorize you to vote in my place and stead in the consideration of and any amendments or motions pertaining thereto. The official business that necessitates my absence is .

_____,
Member of Congress.

Executed this the day of , 19 at the time of p.m./a.m.

RULE NO. 5—POWER TO SIT AND ACT, SUBPENA POWER

(a) For the purpose of carrying out any of its functions and duties under House Rules X and XI, the committee, or any subcommittee thereof, is authorized—

(1) to sit and act at such times and places within the United States, whether the House is in session, has recessed, or has adjourned, and to hold hearings; and

(2) To require, by subpena or otherwise, the attendance and testimony of such witnesses and the production of such books, records, correspondence, memorandums, papers, and documents as it deems necessary. Any subpena issued to carry out the authority of this paragraph shall be issued in accordance with the procedures specified in subparagraph (b)(1). The chairman of the committee or any member designated by the chairman may administer oaths to any witness.

(b)(1) Any subpena issued to carry out any investigation or activity, or any series of investigations or activities, described in (a) shall be issued by the committee, upon the recommendation of a subcommittee or upon the committee's initiative, and any such subpena may only be authorized by a majority of the members of the committee voting, a majority being present. The power to authorize and issue subpenas under this subparagraph may be delegated to the chairman of the committee pursuant to such limitations as the committee may prescribe. Authorized subpenas shall be signed by the chairman of the Committee or by any member designated by the committee.

(2) Compliance with any subpena issued by the committee under this subparagraph may be enforced only as authorized or directed by the House.

(c) Each witness who has been subpenaed upon the completion of his testimony before the committee or any subcommittee, may report to the office of counsel of the committee, and there sign appropriate vouchers for travel allowances and attendance fees. If hearings are held in cities other than Washington, D.C., the witness may contact the counsel of the committee, or his representative, prior to leaving the hearing room.

RULE NO. 6—QUORUMS

A majority of the members of the full committee or subcommittee shall constitute a quorum of the full committee or subcommittee for the reporting of a measure or recommendation; Provided, that the number of members constituting a quorum for the taking of any action other than the reporting of a measure or recommendation shall be one-third of the members of the committee or subcommittee, and any two members shall constitute a quorum for the purpose of taking testimony and receiving evidence.

RULE NO. 7—HEARING PROCEDURES

(a) The chairman, in the case of hearings to be conducted by the committee, and the appropriate subcommittee chairman, in the case of hearings to be conducted by a subcommittee, shall make public announcement of the date, place, and subject matter at least one week before the commencement of that hearing unless that committee determines that there is good cause to begin such hearing at an earlier date. In the latter event the chairman or the subcommittee chairman whichever the case may be shall make such public announcement at the earliest possible date. The clerk of the committee shall promptly notify all members of the committee; the Daily Digest; Chief Clerk,

Official Reporters to House Committee and the committee scheduling service of the House Information System as soon as possible after such public announcement is made.

(b) Each witness who is to appear before the committee or a subcommittee shall file with the clerk of the committee, at least 24 hours in advance of his appearance, 100 copies of his proposed testimony if the appearance is before a subcommittee, and 175 copies of his proposed testimony if the appearance is before the committee, and the witness may be required to limit his oral presentation to a summary of his statement. This requirement may be waived by the Chairman of the Committee or appropriate subcommittee, after consultation with the appropriate ranking minority member, when it is deemed by said Chairman to be in the best interest of the committee or subcommittee. This requirement shall not be mandatory if a witness is given less than seven days' notice prior to a hearing.

(c) When any hearing is conducted by the committee or any subcommittee upon any measure or matter, the minority party members on the committee shall be entitled, upon request to the chairman by a majority of those minority members before the completion of such hearing, to call witnesses selected by the minority to testify with respect to that measure or matter during at least one day of hearing thereon.

(d) Upon announcement of a hearing, the Clerk and Staff Director shall cause to be prepared a concise summary of the subject matter (including legislative reports and other materials) under consideration which shall be made available immediately to all members of the committee. In addition, upon announcement of a hearing and subsequently as they are received, the chairman shall make available to the members of the committee any official reports from departments and agencies on such matter.

(e) All other members of the committee may have the privilege of sitting with any subcommittee during its hearings or deliberations and may participate in such hearings or deliberations after members of the subcommittee have been given an opportunity to participate, but no such member who is not a member of the subcommittee shall vote on any matter before such subcommittee.

(f) Committee members may question witnesses only when they have been recognized by the chairman for that purpose, and only for a 5-minute period until all members present have had an opportunity to question a witness. The 5-minute period for questioning a witness by any one member can be extended only with the unanimous consent of all members present. The questioning of witnesses in both the full and subcommittee hearings shall be initiated by the chairman, followed by the ranking minority party member and all other members alternating between the majority and minority. In recognizing members to question witnesses in this fashion, the chairman shall take into consideration the ratio of the majority to minority members present and shall establish the order of recognition for questioning in such a manner as not to disadvantage the members of the committee.

(g) The following additional rules shall apply to investigative hearings:

(1) The chairman at any investigative hearing shall announce in an opening statement the subject of the investigation.

(2) A copy of the committee rules and clause 2 of rule XI of the House Rules shall be made available to each witness.

(3) Witnesses at investigative hearings may be accompanied by their own counsel for the purpose of advising them concerning their constitutional rights.

(4) The chairman may punish breaches of order and decorum, and of professional ethics on the part of counsel, by censure and exclusion from the hearings; and the committee may cite the offender to the House for contempt.

(5) If the committee determines that evidence or testimony at an investigative hearing may tend to defame, degrade, or incriminate any person it shall—

(A) receive such evidence or testimony in executive session;

(B) afford such person an opportunity voluntarily to appear as a witness; and

(C) receive and dispose of requests from such person to subpena additional witnesses.

(6) Except as provided in subparagraph (5), the chairman shall receive and the committee shall dispose of requests to subpena additional witnesses.

(7) No evidence or testimony taken in executive session may be released or used in pubic session without the consent of the committee.

(8) In the discretion of the committee, witnesses may submit brief and pertinent sworn statements in writing for inclusion in the record. The committee is the sole judge of the pertinency of testimony and evidence adduced at its hearing.

(9) A witness may review and photostat a copy of his or her testimony given at a public session, or if given at an executive session, when authorized by the committee.

RULE NO. 8—PROCEDURES FOR REPORTING BILLS AND RESOLUTIONS

(a)(1) It shall be the duty of the chairman of the committee to report or cause to be reported promptly to the House any measure approved by the committee and to take cause to be taken necessary steps to bring the matter to a vote.

(2) In any event, the report of the committee on a measure which has been approved by the committee shall be filed within 7 calendar days (exclusive of days on which the House is not in session) after the day on which there has been filed with the clerk of the committee a written request, signed by a majority of the members of the committee, for the reporting of that measure. Upon the filing of any such request, the clerk of the committee shall transmit immediately to the chairman of the committee notice of the filing of that request.

(b)(1) No measure or recommendation shall be reported from the committee unless a majority of the committee was actually present.

(2) With respect to each record vote by the committee to report any bill or resolution, the name of each member voting for and voting against the motion to report, and whether by proxy or in person and the names of those members present but not voting, and the names of those members absent, shall be included in the committee report.

(c) The report of the committee on a measure which has been approved by the committee shall include—

(1) the oversight findings and recommendations required pursuant to clause 2(b)(1) of rule X of the House separately set out and clearly identified;

(2) the statement required by section 308(a) of the Congressional Budget Act of 1974 separately set out and clearly identified, if the measure provides new budget authority or new or increased tax expenditures;

(3) the estimate and comparison prepared by the Director of the Congressional Budget Office under section 403 of such act, separately set out an clearly identified, whenever the Director (if timely submitted prior to the filing of the report) has submitted such estimate and comparison to the committee; and

(4) a summary of the oversight findings and recommendations made by the Committee on Government Operations under clause 4(c)(2) of rule X of the House separately set out and clearly identified whenever such findings and recommendations have been submitted to the committee in a timely fashion to allow an opportunity to consider such findings and recommendations during the committee's deliberations on the measure.

(d) Each report of the committee on each bill or joint resolution of a public character reported by the committee shall contain a detailed analytical statement as to whether the enactment of such bill or joint resolution into law may have an inflationary impact on prices and costs in the operation of the national economy.

(e) If, at the time of approval of any measure, matter or any report or submission to be made to the House or to the Committee on the Budget under subclauses (g), (h), and (i) of clause 4 of rule X of the Rules of the House of Representatives by the committee, any member of the committee gives notice of intention to file supplemental, minority, or additional views, that member shall be entitled to not less than 3 calendar days (excluding Saturdays, Sundays, and legal holidays) in which to file such views, in writing and signed by that member, with the clerk of the committee. All such views so filed by one or more members of the committee shall be included within, and shall be part of, the report filed by the committee with respect to that measure or matter. No report shall be filed until the chairman has consulted with the ranking minority member of the committee and the chairman of the subcommittee from which the legislation emanated or would have emanated. The report of the committee upon that measure or matter shall be printed in a single volume which—

(1) shall include all supplemental, minority, or additional views which have been submitted by the time of the filing of the report, and

(2) shall bear upon its cover a recital that any such supplemental, minority, or additional views and any material submitted under subdivisions (3) and (4) of subparagraph (c) are included as part of the report. This subparagraph does not preclude—

(A) the immediate filing or printing of a committee report unless timely requests for the opportunity to file supplemental, minority, or additional views has been made as provided by this subparagraph; or

(B) the filing by any such committee of any supplemental report upon any measure or matter which may be required for the correction of any technical error in a previous report made by that committee upon that measure or matter.

(f) If hearings have been held on any such measure or matter so reported, the committee shall make every reasonable effort to have such hearings printed and available for distribution to the Members of the House prior to the consideration of such measure or matter in the House. This subparagraph shall not apply to—

(1) any measure for the declaration of war, or the declaration of a national emergency, by the Congress; or

(2) any decision, determination, or action by a Government agency which would become, or continue to be, effective unless disapproved or otherwise invalidated by one or both Houses of Congress. For the purposes of the preceding sentence, a Government agency includes any department, agency, establishment, wholly owned Government corporation, or instrumentality of the Federal Government or the government of the District of Columbia.

RULE NO. 9—OVERSIGHT SUBCOMMITTEE

(a) In order to assist the House in:

(1) its analysis, appraisal, and evaluation of (A) the application, administration, execution, and effectiveness of the laws enacted by the Congress, or (B) conditions and circumstances which may indicate the necessity or desirability of enacting new or additional legislation, and

(2) its formulation, consideration, and enactment of such modification or changes in those laws, and of such additional legislation, as may be necessary or appropriate, there shall be established in conformity with Rule 15 an Oversight Subcommittee.

(b) The Oversight Subcommittee shall review and study, on a continuing basis, the application, administration, execution, and effectiveness of those laws, or parts of laws, the subject matter of which is within the jurisdiction of the committee, and the organization and operation of the Federal agencies and entities which have responsibility in or for the administration and execution thereof, in order to determine whether such laws and the programs thereunder are being implemented and carried out in accordance with the intent of the Congress and whether such programs should be continued, curtailed, or eliminated. In addition, the Oversight Subcommittee shall review and study any conditions or circumstances which may indicate the necessity or desirability of enacting new or additional legislation within the jurisdiction of the committee (whether or not any bill or resolution has been introduced with respect thereto), and shall on a continuing basis undertake furture research and forecasting on matters within the jurisdiction of the committee. The Oversight Subcommittee shall in no way limit the responsibility of the subcommittees from carrying out their oversight responsibilities.

(c) The Oversight Subcommittee shall review and study on a continuing basis the impact or probable impact of tax policies affecting subjects within the jurisdiction of the committee.

RULE NO. 10—REVIEW OF CONTINUING PROGRAMS: BUDGET ACT PROVISIONS

(a) The committee shall, in its consideration of all bills and joint resolutions of a public character within its jurisdiction, insure that appropriations for continuing programs and activities of the Federal Government and the District of Columbia government will be made annually to the maximum extent feasible and consistent with the nature, requirements, and objectives of the programs and activities involved. For the purposes of this paragraph a Government agency includes the organizational units of government listed in clause 7(c) of rule XIII of the House Rules.

(b) The committee shall review, from time to time, each continuing program within its jurisdiction for which appropriations are not made annually in order to ascertain whether such program could be modified so that appropriations therefore would be made annually.

(c) The committee shall, on or about March 15 of each year, submit to the Committee on the Budget (1) its views and estimates with respect to all matters to be set forth in the concurrent resolution on the budget for the ensuing fiscal year which are within its jurisdiction or functions, and (2) an estimate of the total amounts of new budget authority, and budget outlays resulting therefrom, to be provided or authorized in all bills and resolutions within its jurisdiction which it intends to be effective during that fiscal year.

(d) As soon as practicable after a concurrent resolution on the budget for any fiscal year is agreed to, the committee (after consulting with the appropriate committee or committees of the Senate) shall subdivide any allocations made to it in the joint explanatory statement accompanying the conference report on such resolution, and promptly report such subdivisions to the House, in the manner provided by section 302 of the Congressional Budget Act of 1974.

(e) Whenever the committee is directed in a concurrent resolution on the budget to determine and recommend changes in laws, bills, or resolutions under the reconciliation process it shall promptly make such determination and recommendations, and report a reconciliation bill or resolution (or both) to the House or submit such recommendations to the Committee on the Budget in accordance with the Congressional Budget Act of 1974.

RULE NO. 11—BROADCASTING OF COMMITTEE HEARINGS

(Any meeting or hearing that is open to the public may be covered in whole or in part by radio or television or still photography, subject to the requirements of rule XI, clause 3 of the Rules of the House of Representatives. At all such meetings or proceedings, coverage by radio, television or still photography will be allowed unless specifically forbidden by a record vote of the committee or subcommittee. The chairman of the committee or of a subcommittee shall determine, in the chairman's discretion, the number of television and still cameras permitted in a hearing or meeting room. The coverage of any hearing or other proceeding of the committee or any subcommittee thereof by television, radio, or still photography shall be under the direct supervision of the chairman of the committee, the subcommittee chairman, other member of the committee presiding at such hearing or other proceeding and, for good cause, may be terminated by him/her.

RULE NO. 12—COMMITTEE AND SUBCOMMITTEE BUDGETS

(a) The chairman, in consultation with the majority members of the committee shall, for each session of the Congress, prepare a preliminary budget. Such budget shall include necessary amounts for staff personnel for necessary travel, investigation, and other expenses of the full committee, and after consultation with the minority membership, the chairman shall include amounts budgeted to the minority members for staff personnel to be under the direction and supervision of the minority, travel expenses of minority members and staff, and minority office expenses. All travel expenses of minority members and staff shall be paid for out of the amounts so set aside and budgeted.

(b)(1) The chairman of each subcommittee, in consultation with the majority members thereof, shall prepare a budget to include funds for staff, travel, investigations, and miscellaneous expenses as may be required for the work of the subcommittee.

(2) The chairman of each subcommittee shall control the funds provided for in the subcommittee budget.

(c) The chairman shall combine the proposals of each subcommittee with the preliminary budget of the full committee into a consolidated committee budget, and shall present the same to the committee for its approval. The chairman shall then take all action necessary to bring about its approval by the Committee on House Administration and by the House.

(d) Authorization for the payment of additional or unforeseen committee and subcommittee expenses may be procured by one or more additional expense resolutions processed in the same manner as set out herein.

(e) The chairman, the ranking minority member of the full committee, or any chairman of a subcommittee may initiate necessary travel requests as provided in Rule 14 within the limits of their portion of the consolidated budget as approved by the House, and the chairman may execute necessary vouchers therefor.

RULE NO. 13—COMMITTEE AND SUBCOMMITTEE STAFF

(a) The professional and clerical staff assigned to the minority shall be appointed and their remuneration determined in such manner as the minority members of the committee shall determine within the budget approved for such purposes by the committee; provided, however, that no minority staff person shall be compensated at a rate which exceeds that paid his or her majority party staff counterpart.

(b) The professional and clerical employees of the committee not assigned to a subcommittee or to the minority under the above provision shall be appointed, and may be removed, and their remuneration determined by the chairman in consultation with and with the approval of the majority members of the committee within the budget approved for such purposes by the committee.

(c) The professional and clerical staff assigned to the minority shall be under the general supervision and direction of the minority members of the committee who may delegate such authority as they determine appropriate.

(d) The professional and clerical staff of the committee not assigned to a subcommittee or to the minority shall be under the general supervision and direction of the chairman, who shall establish and assign the duties and responsibilities of such staff members and delegate such authority as he determines appropriate.

(e) It is intended that the skills and experience of all members of the committee staff be available to all members of the committee.

(f)(1) The chairman of each standing subcommittee of this committee is authorized to appoint one staff member who shall serve at the pleasure of the subcommittee chairman.

(2) The ranking minority member of each standing subcommittee on this committee is authorized to appoint one staff person who shall serve at the pleasure of the ranking minority party member.

(3) The staff members appointed pursuant to the provisions of subparagraphs (1) and (2) shall be compensated at a rate determined by the subcommittee chairman not to exceed 75 per centum of the maximum es-

tablished in paragraph (c) of clause 6 of rule XI, provided, however, a staff person appointed by a ranking minority member shall be compensated at a rate not to exceed that paid his or her majority party staff counterpart.

(4) Subparagraphs (1), (2) and (3) shall apply to eight subcommittees only, and no member shall appoint more than one person pursuant to the above provisions.

(5) The staff positions made available to the subcommittee chairmen and ranking minority party members pursuant to subparagraphs (1) and (2) shall be made available from the staff positions provided under clause 6 of House Rule XI unless such staff positions are made available pursuant to a primary or additional expense resolution.

(6) Except as provided by the above provisions, the professional and clerical members of the subcommittee staffs shall be appointed, and may be removed, and their remuneration determined by the subcommittee chairman in consultation with and with the approval of a majority of the majority members of the subcommittee, and with the approval of a majority of the majority members of the full committee, within the budget approved for the subcommittee.

(7) The professional and clerical staff of a subcommittee shall be under the supervision and direction of the chairman of that subcommittee.

RULE NO. 14—TRAVEL OF MEMBERS AND STAFF

(a) Consistent with the primary expense resolution and such addition expense resolution as may have been approved, the provisions of this rule shall govern travel of committee members and staff. Travel to be reimbursed from funds set aside for the full committee for any member or any staff member shall be paid only upon the prior authorization of the chairman. Travel may be authorized by the chairman for any member and any staff member in connection with the attendence at hearings conducted by the committee or any subcommittee thereof and meetings, conferences, and investigations which involve activities or subject matter under the general jurisdiction of the committee. Before such authorization is given there shall be submitted to the chairman in writing the following:

(1) The purpose of travel;

(2) The dates during which the travel is to be made and the date or dates of the event for which the travel is being made;

(3) The location of the event for which the travel is being made;

(4) The names of members and staff seeking authorization.

(b) In the case of travel of members and staff of a subcommittee to hearings, meetings, conferences, and investigations involving activities or subject matter under the legislative assignment of such subcommittee to be paid for out of funds allocated to such subcommittee, prior to authorization must be obtained from the subcommittee chairman, the ranking minority member of the full committee whenever minority staff is involved, and the chairman of the full committee. Such prior authorization shall be given by the Chairman only upon representation by the applicable chairman of the subcommittee in writing setting forth those items enumerated in (1), (2), (3), and (4) of paragraph (a) and in addition thereto setting forth that subcommittee funds are available to cover the expenses of the person or persons being authorized by the subcommittee chairman to undertake the travel and that there has been compliance where applicable with Rule 12 of the committee.

(c)(1) In the case of travel outside the United States of members and staff of the committee or of a subcommittee for the purpose of conducting hearings, investigations, studies, or attending meetings and conferences involving activities or subject matter under the legislative assignment of the committee or pertinent subcommittee, prior authorization must be obtained from the chairman, or, in the case of a subcommittee from the subcommittee chairman and the chairman. Before such authorization is given, there shall be submitted to the chairman in writing, a request for such authorization. Each request, which shall be filed in a manner that allows for a reasonable period of time for review before such travel is scheduled to begin, shall include the following:

(A) the purpose of the travel;

(B) the dates during which the travel will occur;

(C) the names of the countries to be visited and the length of time to be spent in each;

(D) an agenda of anticipated activities for each country for which travel is authorized together with a description of the purpose to be served and the areas of committee jurisdiction involved; and

(E) the names of members and staff for whom authorization is sought.

(2) Requests for travel outside the United States may be initiated by the chairman of the full committee, the ranking minority member of the full committee, or the chairman of a subcommittee (except that individuals may submit a request to the chairman for the purpose of attending a conference or meeting).

(3) At the conclusion of any hearing, investigation, study, meeting or conference for which travel outside the United States has been authorized pursuant to this rule, each subcommittee (members and staff attending meetings or conferences) shall submit a written report to the chairman covering the activities and other pertinent observations or information gained as a result of such travel.

(d) Members and staff of the committee performing authorized travel on official business shall be governed by applicable laws, resolutions, or regulations of the House and the Committee on House Administration pertaining to such travel.

RULE NO. 15—NUMBER AND JURISDICTION OF SUBCOMMITTEES

(a) There shall be eight standing subcommittees as follows: Subcommittee on Housing and Community Development; Subcommittee on Financial Institutions Supervision, Regulation and Insurance; Subcommittee on International Development, Finance, Trade, and Monetary Policy; Subcommittee on Domestic Monetary Policy; Subcommittee on General Oversight and Investigations; Subcommittee on Economic Stabilization; Subcommittee on Consumer Affairs and Coinage; and Subcommittee on Policy Research and Insurance. All proposed legislation and other matters related to the subcommittees listed under standing subcommittees named below shall be referred to such subcommittees respectively. In carrying out any of the jurisdiction specified in the following paragraphs, each subcommittee, to the extent it deems appropriate, may examine the impact of any aspect of such jurisdiction on employment.

(b) Subcommittee on Financial Institutions Supervision, Regulation and Insurance.

(1) The jurisdiction of the Subcommittee on Financial Institutions Supervision, Regulation and Insurance extends to all agencies which directly or indirectly exercise supervisory or regulatory authority in connection with, or provide deposit or other insurance for, financial or other institutions, the establishment of interest rate ceilings on deposits, and all auxiliary matters affecting or arising in connection with the Federal Deposit Insurance Corporation, the Federal Savings and Loan Insurance Corporation, the National Credit Union Share Insurance Fund, the Federal Home Loan Bank Board, the Federal Reserve Board and System, the National Credit Union Administration, and the Comptroller of the Currency, together with those activities and operations of any other agency or department which relate to both domestic or foreign financial institutions.

(2) Further, jurisdiction extends to and includes with respect to financial institutions and the department and agencies which regulate or supervise them, all activities relating to and arising in connection with the matters of chartering, branching, mergers and acquisitions, consolidations, and conversions.

(c) Subcommittee on Housing and Community Development.

(1) The jurisdiction of the Subcommittee on Housing and Community Development extends to all matters relating to housing and mortgage credit (except programs administered by the Veterans' Administration), including mortgage and loan insurance pursuant to the National Housing Act; FHA mortgage interest rates; rural housing; housing assistance programs; secondary mortgage market programs and all other activities of FNMA, GNMA, and FHLMC; private mortgage insurance; housing construction and design standards; housing-related energy conservation; housing research and demonstration programs; financial and technical assistance for nonprofit housing sponsors; counseling and technical assistance; regulation of the housing industry (including landlord-tenant relations); real estate lending powers of financial institutions (including regulation of settlement costs); and interest charges for members of the Federal Home Loan Bank System.

(2) The jurisdiction of the subcommittee further extends to matters relating to community development and community planning, training and research, including community development block grants; urban renewal; model cities; rehabilitation loans and grants; neighborhood facilities grants; open space land and urban beautification grants; water and sewer facilities grants; public facilities loans; national, urban or community development banks; advance acquisition of land programs; new communities assistance programs; national urban growth policies; comprehensive planning (including land use and areawide programs); community development training and fellowships; urban research and technologies; and regulation of interstate land sales.

(3) Also, the jurisdiction of the subcommittee includes FHA property improvement loans under title I of the National Housing Act which can be used to finance the preservation of historic structures; community development block grant funds authorized under title I of the 1974 Housing Act which can be used to finance the acquisition and preservation of historic properties; and sec-

tion 701 comprehensive planning grants to public bodies which can be used to finance surveys of historic sites and structures.

(d) Subcommittee on Consumer Affairs and Coinage.

(1) The jurisdiction of the Subcommittee on Consumer Affairs and Coinage shall include all matters relating to consumer credit, including those matters in the Consumer Credit Protection Act dealing with truth in lending, extortionate credit transactions, restrictions on garnishments, fair credit reporting, equal credit opportunity, debt collection practices, and electronic funds transfers. The jurisdiction shall further include creditor remedies and debtor defense, Federal aspects of the Uniform Consumer Credit Code, credit and debit cards and the preemption of State usury laws.

(2) The jurisdiction of the subcommittee shall further extend to the following:

(A) All matters relating to consumer access to financial services and the advertisement and promotion of financial services, other than the Home Mortgage Disclosure Act and the Community Reinvestment Act;

(B) The terms and rules of disclosure of financial services;

(C) Consumer access to savings accounts and checking accounts;

(D) Other consumer accounts in financial institutions; and

(E) Lifeline banking and government check cashing.

(3) The jurisdiction of the subcommittee shall further extend to matters relating to the price of consumer goods, services and commodities, the rationing of consumer products, and hoarding.

(4) Further, the jurisdiction of the subcommittee extends to all matters relating to coins, coinage, currency and medals, including commemorative coins and medals, proof and mint sets and other special coins, the Coinage Act of 1965, gold and silver, including coinage thereof (but not the par value of gold), gold medals, counterfeiting, currency denominations and design, the distribution of coins, and the operations and activities of the Bureau of the Mint and the Bureau of Engraving and Printing.

(5) The Subcommittee shall not schedule a hearing on any commemorative medal or commemorative coin legislation unless the legislation is cosponsored by at least 218 Members of the House.

(6) In considering legislation authorizing Congressional gold medals, the subcommittee shall apply the following standards:

(A) The recipient shall be a natural person;

(B) The recipient shall have performed an achievement that has an impact on American history and culture that is likely to be recognized as a major achievement in the recipient's field long after the achievement;

(C) The recipient shall not have received a medal previously for the same or substantially the same achievement;

(D) The recipient shall be living or, if deceased, shall have been deceased for not less than 5 years and not more than 25 years; and

(E) The achievements were performed in the recipient's field of endeavor, and represent either a lifetime of continuous superior achievements or a single achievement so significant that the recipient is recognized and acclaimed by others in the same field, as evidenced by the recipient having received the highest honors in the field.

(e) Subcommittee on Domestic Monetary Policy.

(1) The jurisdiction of the Subcommittee on Domestic Monetary Policy extends to all matters relating to monetary policy and agencies which directly or indirectly affect monetary policy, including the effect of such policy and other financial actions on interest rates, allocation of credit, and the structure and functioning of domestic and foreign financial institutions.

(2) Further, the jurisdiction of the Subcommittee on Domestic Monetary Policy extends to all private foundations and charitable trusts.

(f) Subcommittee on General Oversight and Investigations.

(1) The Subcommittee on General Oversight and Investigations shall assist the House Committee on Banking, Finance and Urban Affairs in appraising the administration of the laws and regulations under the jurisdiction of the committee and present such recommendations as deemed necessary to the appropriate subcommittee(s) of the committee.

(2) Further, the subcommittee shall exercise continuing oversight of the execution by the administrative agencies concerning any of the laws the subject matter of which reside within the jurisdiction of the committee and shall study all pertinent reports, documents and data pertinent to the jurisdiction of the committee and make the necessary recommendations or reports thereon to the appropriate subcommittee(s) of the committee.

(3) Further, the subcommittee shall have full jurisdiction over the Renegotiation Act of 1951, as amended.

(g) Subcommittee on Economic Stabilization.

(1) The jurisdiction of the Subcommittee on Economic Stabilization shall extend to all matters relating to financial aid to all sectors and elements within the economy, all matters relating to economic stabilization, and all defense production matters as contained in the Defense Production Act of 1950, as amended, and all related matters thereto.

(2) Further, the jurisdiction of the subcommittee shall extend to international investment policies, both as they relate to U.S. investments for trade purposes by citizens of the United States and investments made by all foreign entities in the United States.

(3) Further, the subcommittee shall have jurisdiction over the Urban Development Action Grant program and Enterprise Zone programs.

(h) Subcommittee on International Development, Finance, Trade and Monetary Policy.

(1) The jurisdiction of the subcommittee extends to all matters relating to all multilateral development lending institutions, including activities of the National Advisory Council on International Monetary and Financial Policies as related thereto; and monetary and financial developments as they relate to the activities and objectives of such institutions.

(2) Further, the subcommittee shall have jurisdiction over all matters within the jurisdiction of the committee relating to international trade, including but not limited to the activities of the Export-Import Bank.

(3) Further, the subcommittee shall have jurisdiction over the International Monetary Fund, its permanent and temporary agencies, and all matters related thereto.

(i) Subcommittee on Policy Research and Insurance.

(1) The subcommittee shall assist the House Committee on Banking, Finance and Urban Affairs in studying the long-term economic, social, and environmental impact of the policies under the jurisdiction of the committee and make recommendations as deemed necessary to the appropriate subcommittee(s).

(2) The subcommittee shall examine the impact of the policies and programs under the jurisdiction of the committee as they affect urban, rural, national and world growth, including but not limited to the following areas: population; the environment; education and social programs; crime; community services; and personal economic security and mobility. The subcommittee shall also examine the long-range impact of new technology on the matters under the committee's jurisdiction.

(3) The legislative jurisdiction of the subcommittee extends to all matters pertaining to insurance within the committee's jurisdication, including crime insurance, fire insurance, and flood insurance and related land use controls, but excludes federal deposit insurance, mortgage and loan insurance, title insurance, and the authority of financial institutions to engage in insurance activities. The legislative jurisdiction of the subcommittee further extends to all activities of the Federal Agricultural Mortgage Corporation and secondary markets issues related to the Federal Agricultural Mortgage Corporation.

(j) The Committee may provide for such additional subcommittees as determined to be appropriate; Provided, however, that such additional subcommittees are approved by a majority of the majority members on the Committee.

(k) A member serving as chairman of any subcommittee on this committee shall not also serve as the chairman of a subcommittee on any other full committee or select committee with legislative jurisdiction; Provided, however, that this provision shall not apply to a member serving as subcommittee chairman on the Budget Committee; House Administration Committee; Joint Committees; Standards of Official Conduct Committee; or House Recording Committee.

RULE NO. 16—POWERS AND DUTIES OF SUBCOMMITTEES

(a) Each subcommittee is authorized to meet, hold hearings, receive evidence, and report to the full committee on all matters referred to it or under its jurisdiction. Subcommittee chairmen shall set dates for hearings and meetings of their respective subcommittees after consultation with the chairman and other subcommittees chairmen and with a view toward avoiding simultaneous scheduling of full committee and subcommittee meetings or hearings whenever possible.

(b) Whenever a subcommittee has ordered a bill, resolution, or other matter to be reported to the committee, the chairman of the subcommittee reporting the bill, resolution, or matter to the full committee, or any member authorized by the subcommittee to do so, may report such bill, resolution, or matter to the committee. It shall be the duty of the chairman of the subcommittee to report or cause to be reported promptly such bill, resolution, or matter, and to take steps or cause to be taken the necessary steps to bring such bill, resolution, or matter to a vote.

(c) No bill or joint resolution approved by a subcommittee shall be considered by the committee unless such measure, as approved, has been made available to all members at least two calendar days prior to the

meeting, accompanied by a section-by-section analysis of such measure. The provision of this paragraph may be suspended by the committee by a two-thirds vote or by the chairman, with the concurrence of the ranking minority member of the full committee.

(d) All committee or subcommittee reports printed pursuant to legislative study or investigation and not approved by a majority vote of the committee or subcommittee, as appropriate shall contain the following disclaimer on the cover of such report:

"This report has not been officially adopted by the Committee on Banking, Finance and Urban Affairs (or pertinent subcommittee thereof) and may not therefore necessarily reflect the views of its members."

(e) Bills, resolutions, or other matters favorably reported by a subcommittee shall automatically be placed on the agenda of the committee as of the time they are reported and shall be considered by the full committee in the order in which they were reported unless the chairman after consultation with the ranking minority member and appropriate subcommittee chairman, otherwise directs; Provided, that no bill reported by the subcommittee shall be considered by the full committee unless each member has been provided with reasonable time prior to the meeting to analyze such bill, together with a comparison with present law and a section-by-section analysis of the proposed change, and a section-by-section justification.

(f) No bill or joint resolution may be considered by a subcommittee unless such measure has been made available to all members at least two calendar days prior to the meeting, accompanied by a section-by-section analysis of such measure. The provision of this paragraph may be waived following consultation with the appropriate ranking minority member.

RULE NO. 17—REFERRAL OF LEGISLATION TO SUBCOMMITTEES

(a) Each bill, resolution, investigation, or other matter which relates to a subject listed under the jurisdiction of any subcommittee named in Rule 15 referred to or initiated by the full committee shall be referreed to all subcommittees of appropriate jurisdiction within 2 weeks unless, by majority vote of the majority members of the full committee, consideration is to be by the full committee.

(b) Referral to a subcommittee shall not be made until 3 days shall have elapsed after written notification of such proposed referral to all subcommittee chairmen, at which time such proposed referral shall be made unless one or more subcommittee chairmen shall have given written notice to the chairman of the full committee and to the chairman of each subcommittee that he intends to question such proposed referral to the next regularly scheduled meeting of the committee, or at a special meeting of the committee called for that purpose at which time referral shall be made by the majority members of the committee. All bills shall be referred under this rule to the subcommittees of proper jurisdiction without regard to whether the author is or is not a member of the subcommittees. A bill, resolution, or other matter referred to a subcommittee in accordance with this rule may be recalled therefrom at any time by a vote of the majority members of the committee for the committee's direct consideration or for reference to another subcommittee.

(c) Committee reports shall be filed at such time as the committee shall determine with reasonable time allowed for members to file supplemental, individual, dissenting or other views.

(d) In carrying out this Rule with respect to any matter, the chairman may refer the matter simultaneously to two or more subcommittees, consistent with Rule 15, for concurrent consideration or for consideration in sequence (subject to appropriate time limitations in the case of any subcommittee after the first), or divide the matter into two or more parts (reflecting different subjects and jurisdictions) and refer each such part to a different subcommittee, or refer the matter to a special ad hoc committee appointed by the chairman (from the members of the subcommittees having legislative jurisdiction) for the specific purpose of considering that matter and reporting to the full committee thereon, or make such other provisions as may be considered appropriate.

RULE NO. 18—SIZES AND PARTY RATIOS ON SUBCOMMITTEES AND CONFERENCE COMMITTEES

(a) To the extent that the number of subcommittees and their party ratios permit, the size of all subcommittees shall be established so that the majority party members of the committee have an equal number of subcommittee assignments; Provided, however, that a member may waive his or her right to an equal number of subcommittee assignments on the committee; and provided further, that the majority party members may limit the number of subcommittee assignments of the chairman and the subcommittee chairmen and the minority party members may limit the number of subcommittee assignments of ranking minority party members in order to equalize committee workloads.

(b) Following shall be the sizes and majority/minority ratios for subcommittees:

(1) Subcommittee on Housing and Community Development: Total—45. Majority—27. Minority—18.

(2) Subcommittee on Financial Institutions Supervision, Regulation and Insurance: Total—47. Majority—28. Minority—19.

(3) Subcommittee on International Development, Finance, Trade, and Monetary Policy: Total—25. Majority—15. Minority—10.

(4) Subcommittee on Domestic Monetary Policy: Total—8. Majority—5. Minority—3.

(5) Subcommittee on General Oversight and Investigations: Total—13. Majority—8. Minority—5.

(6) Subcommittee on Economic Stablilization: Total—15. Majority—9. Minority—6.

(7) Subcommittee on Consumer Affairs and Coinage: Total—16. Majority—10. Minority—6.

(8) Subcommittee on Policy Research and Insurance: Total—9. Majority—6. Minority—3.

RULE NO. 19—COMMITTEE RECORDS MAINTAINED AT THE NATIONAL ARCHIVES

The records of the committee at the National Archives and Records Administration shall be made available for public use in accordance with rule XXXVI of the Rules of the House of Representatives. The chairman shall notify the ranking minority member of any decision, pursuant to clause 3(b)(3) or clause 4(b) of the rule, to withhold a record otherwise available, and the matter shall be presented to the committee for a determination on the written request of any member of the committee.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mrs. MYERS of Kansas (at the request of Mr. MITCHEL), for today and the balance of the week, on account of a death in the family.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. PAXON) to revise and extend their remarks and include extraneous material:)

Mr. HASTERT, for 60 minutes, on May 24.

Mr. MILLER of Washington, for 60 minutes, today.

Mr. DREIER of California, for 5 minutes, today.

Mr. COX, for 15 minutes, today.

(The following Members (at the request of Mr. HARRIS) to revise and extend their remarks and include extraneous material:)

Mr. TALLON, for 5 minutes, today.

Mr. ROSE, for 5 minutes, today.

Mr. MONTGOMERY, for 5 minutes, today.

Mr. ANNUNZIO, for 5 minutes, today.

Mr. HUGHES, for 60 minutes, on May 17.

Mr. WISE, for 60 minutes, on May 17, 18, 24 and 25.

(The following Member (at the request of Mr. FORD of Michigan) to revise and extend his remarks and include extraneous material:)

Mr. ROYBAL, for 5 minutes, today.

(The following Members (at the request of Mr. GAYDOS) to revise and extend their remarks and include extraneous material:)

Mr. ECKART, for 60 minutes, on May 23.

Mr. HOYER, for 60 minutes, on May 23.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

(The following Members (at the request of Mr. PAXON) and to include extraneous matter:)

Mr. FIELDS.

Mr. MICHEL.

Mr. HEFLEY.

Mr. CONTE.

Mr. FISH in three instances.

Mr. SOLOMON.

Mr. STANGELAND.

Mr. ARCHER in four instances.

Mr. EMERSON.

Mr. GEKAS.

Mr. BEREUTER in two instances.

Mr. SHAYS.

Mr. NIELSON of Utah.

Mr. LAGOMARSINO.
Mr. FRENZEL.
Mr. BUECHNER.
Mr. HOPKINS.
Mr. DANNEMEYER.
Ms. SCHNEIDER.
Mr. BOEHLERT.

(The following Members (at the request of Mr. HARRIS) and to include extraneous matter:)

Mr. TORRES.

JOINT RESOLUTION PRESENTED TO THE PRESIDENT

Mr. ANNUNZIO, from the Committee on House Administration, reported that that committee did on this day present to the President for his approval, a joint resolution of the House of the following title:

H.J. Res. 247. Joint Resolution designating May 29, 1989, as the "National Day of Remembrance for the Victims of the U.S.S. *Iowa*".

ADJOURNMENT

Mr. SCHUMER. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 7 o'clock and 14 minutes p.m.), under its previous order, the House adjourned until Wednesday, May 17, 1989, at 12 noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speakers table and referred as follows:

1192. A letter from the Acting Director, Defense Security Assistance Agency, transmitting notice of the Department of the Navy's proposed letter(s) of offer and acceptance [LOA] to Portugal for defense articles estimated to cost $50 million or more, pursuant to 10 U.S.C. 118; to the Committee on Armed Services.

1193. A letter from the Acting Director, Defense Security Assistance Agency, transmitting notice of the Department of the Army's proposed letter(s) of offer and acceptance [LOA] to Norway for defense articles estimated to cost $50 million or more, pursuant to 10 U.S.C. 118; to the Committee on Armed Services.

1194. A letter from the Acting Director, Defense Security Assistance Agency, transmitting notice of the Department of the Navy's proposed letter(s) of offer and acceptance [LOA] to the NATO Seasparrow Consortium for defense articles estimated to cost $50 million or more, pursuant to 10 U.S.C. 118; to the Committee on Armed Services.

1195. A letter from the Acting Director, Defense Security Assistance Agency, transmitting notice of the Department of the Air Force's proposed letter(s) of offer and acceptance [LOA] to Portugal for defense articles estimated to cost $50 million or more, pursuant to 10 U.S.C. 118; to the Committee on Armed Services.

1196. A letter from the Secretary of Education, transmitting a copy of Final Regulations—Chapter 1—Migrant Education Coordination Program for State Educational Agencies, pursuant to 20 U.S.C. 1232(d)(1); to the Committee on Education and Labor.

1197. A letter from the Acting Director, Defense Security Assistance Agency, transmitting notice of the Department of the Air Force's proposed letter(s) of offer and acceptance [LOA] to the Netherlands for defense articles and services estimated to cost $116 million, pursuant to 22 U.S.C. 2776(a); to the Committee on Foreign Affairs.

1198. A letter from the Acting Director, Defense Security Assistance Agency, transmitting notice of the Department of the Army's proposed letter(s) of offer and acceptance [LOA] to Norway for defense articles and services estimated to cost $14 million or more (Transmittal No. 89-11), pursuant to 22 U.S.C. 2776(b); to the Committee on Foreign Affairs.

1199. A letter from the Acting Director, Defense Security Assistance Agency, transmitting notice of the Department of the Navy's proposed letter(s) of offer and acceptance [LOA] to Portugal for defense articles and services estimated to cost $99 million (Transmittal No. 89-19), pursuant to 22 U.S.C. 2776(b); to the Committee on Foreign Affairs.

1200. A letter from the Acting Director, Defense Security Assistance Agency, transmitting notice of the Department of the Air Force's proposed letter(s) of offer and acceptance [LOA] to Portugal for defense articles and services estimated to cost $300 million (Transmittal No. 89-08), pursuant to 22 U.S.C. 2776(b); to the Committee on Foreign Affairs.

1201. A letter from the Acting Director, Defense Security Assistance Agency, transmitting notice that Greece and Norway are added to the NATO Seasparrow Consortium as prospective purchasers of the RIM-7M Seasparrow missile (Transmittal No. 89-10), pursuant to 22 U.S.C. 2776(b); to the Committee on Foreign Affairs.

1202. A letter from the Assistant Secretary of State for Legislative Affairs, transmitting copies of the original report of political contributions by Edward N. Ney, of New York, Ambassador Extraordinary and Plenipotentiary-designate to Canada, and members of his family, pursuant to 22 U.S.C. 3944(b)(2); to the Committee on Foreign Affairs.

1203. A letter from the Assistant Secretary (Policy, Budget, and Administration), Department of Interior, transmitting the Department's annual report on actions taken to increase competition for contracts, pursuant to 41 U.S.C. 419; to the Committee on Government Operations.

1204. A letter from the Secretary of the Interior, transmitting the 1988 annual report on research and demonstration projects in alternative coal mining technologies, pursuant to 30 U.S.C. 1328(d); to the Committee on Interior and Insular Affairs.

1205. A letter from the Secretary of Commerce, transmitting a draft of proposed legislation to amend the Magnuson Fishery Conservation and Management Act, as amended, to authorize appropriations for fiscal years 1990, 1991, and 1992 and for other purposes, pursuant to 31 U.S.C. 1110; to the Committee on Merchant Marine and Fisheries.

1206. A letter from the Secretary of the Veterans Administration, transmitting a draft of proposed legislation to amend title 38, United States Code, and other provisions of law, to improve the administration of veterans' health care benefits and personnel management in the Department of Veterans' Affairs, and for other purposes; to the Committee on Veterans' Affairs.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. ANDERSON: Committee on Public Works and Transportation. H.R. 968. A bill to provide for the federal reimbursement of local noise abatement funds; with an amendment (Rept. 101-51). Referred to the Committee of the Whole House on the State of the Union.

Mr. ANDERSON: Committee on Public Works and Transportation. H.R. 838. A bill to authorize the Secretary of Transportation to release restrictions on the use of certain property conveyed to the Peninsula Airport Commission for airport purposes; with an amendment (Rept. 101-52). Referred to the Committee of the Whole House on the State of the Union.

Mr. GORDON: Committee on Rules. House Resolution 155. Resolution providing for the consideration of the bill H.R. 643, a bill to amend section 37 of the Mineral Leasing Act relating to oil shale claims, and for other purposes (Rept. 101-53). Referred to the House Calendar.

Mr. BROOKS: Committee on the Judiciary. H.R. 1662. A bill to amend the United Nations Participation Act of 1945 to carry out obligations of the Untied States under the United Nations Charter and other international agreements pertaining to the protection of human rights by providing a civil action for recovery from persons engaging in torture, and for other purposes; with amendments (Rept. 101-55, Pt. 1). Ordered to be printed.

REPORTED BILLS SEQUENTIALLY REFERRED

Under clause 5 of rule X, bills and reports were delivered to the Clerk for printing, and bills referred as follows:

Mr. GONZALEZ: Committee on Banking, Finance and Urban Affairs. H.R. 1278. A bill to reform, recapitalize, and consolidate the Federal deposit insurance system, to enhance the regulatory and enforcement powers of Federal financial institutions regulatory agencies, and for other purposes; with an amendment; referred to the Committees on the Judiciary and Ways and Means for a period ending not later than May 25, 1989, for consideration of such provisions of the bill and amendment as fall within the jurisdictions of those committees pursuant to clause 1 (m) and (v), rule X, respectively (Rept. 101-54, Pt. 1). Ordered to be printed.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. SOLARZ (for himself and Mr. LEACH of Iowa):

H.R. 2344. A bill to authorize the transfer to the Republic of the Philippines of two excess naval vessels; to the Committee on Foreign Affairs.

By Mr. ROSE (for himself Mr. TRAFICANT, Mr. WILSON, Mr. HAYES of Illinois, Mr. KLECZKA, Mr. MANTON, Mr. LANTOS, Mr. RAVENEL, Mr. JACOBS, Mr. KOLTER, Mr. BENNETT, and Mr. TORRES):

H.R. 2345. A bill to amend section 19 of the Animal Welfare Act (7 U.S.C. 2149); jointly to the Committee on Agriculture and the Judiciary.

By Mr. CLAY (for himself Mr. GILLMOR, and Mr. FROST):

H.R. 2346. A bill to authorize appropriations for the American Folklife Center for fiscal years 1990, 1991, and 1992; to the Committee on House Administration.

By Mr. WHITTEN

H.R. 2347. A bill making supplemental appropriations for the unfunded authorization to fight the war on drugs for the fiscal year ending September 30, 1989, and for other purposes; to the Committee on Appropriations.

By Mr. ARCHER:

H.R. 2348. A bill to amend title II of the Social Security Act to eliminate the retirement earnings test at ages above retirement age, to increase accordingly the delayed retirement credit rate, to exclude accordingly certain earnings in postretirement years from benefit computations, to prohibit retroactive entitlement to reduced benefits before retirement age, and to authorize for 5 years approriations of resulting revenue increases to the Federal Old-Age and Survivors Insurance Trust Fund; to the Committee on Ways and Means.

H.R. 2349. A bill to amend the Social Security Act to improve review procedures—particularly those involved in the disability determination process—under the OASDI, SSI, and Medicare Programs by making such procedures more cost effective and by providing greater equity and efficiency for claimants and beneficiaries; to the Committee on Ways and Means.

By Mr. BUECHNER (for himself and Mr. HAYES of Louisiana):

H.R. 2350. A bill to amend the Internal Revenue Code of 1986 to provide a refundable child care credit to parents for dependents under age 6, including parents who choose to remain at home with their children, and to provide tax incentives for employer-provided child care assistance; to authorize the President to make awards for the implementation of model child care projects; to provide for a study on barriers to the accessibility of liability insurance for employer-provided child care; and to establish a clearinghouse on child care services; jointly, to the Committee on Ways and Means and Education and Labor.

By Mr. CONTE (for himself, Mr. MCDADE, Mr. SKELTON, and Mr. IRELAND):

H.R. 2351. A bill to amend the Small Business Act to provide assistance to women business enterprises, and for other purposes; to the Committee on Small Business.

By Mr. DARDEN (for himself, Mr. KOSTMAYER, and Mr. LEHMAN of California):

H.R. 2352. A bill entitled the "Nevada Wilderness Protection Act of 1989"; jointly, to the Committee on Interior and Insular Affairs and Agriculture.

By Mr. DORGAN of North Dakota (for himself, Mr. BROWN of Colorado, Mr. GLICKMAN, Mr. BROWN of California, Mr. TAUKE, Mr. DONALD E. LUKENS, Mr. COLEMAN of Missouri, Mr. DURBIN, Mr. KASTENMEIER, Mr. PENNY, Mr. JOHNSON of South Dakota, Mr. BEREUTER, Mr. STENHOLM, Mr. WHITTAKER, Mr. EMERSON, Mr. SLATTERY, Mr. AKAKA, Mr. ROBERTS, Mr. EVANS, Mr. MADIGAN, Mr. WEBER, Mr. GRANDY, Mr. JONTZ, Mr. TALLON, Mr. CAMPBELL of Colorado, Mr. LIGHTFOOT, Mr. SKELTON, Mr. VOLKMER, Mr. HATCHER, Mr. LEATH of Texas, Mr. COMBEST, Mrs. MARTIN of Illinois, Mrs. SMITH of Nebraska, Mr. DE LA GARZA, Mr. CHAPMAN, Mr. FLIPPO, Mr. ESPY, Mr. MARLENEE, Mr. WILSON, Mr. ENGLISH, Mr. SMITH of Texas, Mr. GUNDERSON, Mr. DENNY SMITH, Mr. MATSUI, Mr. MCCLOSKEY, Mr. STANGELAND, Mr. PETRI, Mr. HERGER, Mr. HALL of Texas, Mr. FRENZEL, and Mr. COELHO):

H.R. 2353. A bill to amend the Internal Revenue Code of 1986 to allow nonexempt farmer cooperatives to elect patronage-sourced treatment for certain gains and losses; to the Committee on Ways and Means.

By Mr. DORGAN of North Dakota (for himself, Mr. JOHNSON of South Dakota, Mr. SABO, Mr. PENNY, Mr. STANGELAND, Mr. CARR, Mr. TRAXLER, and Mr. SIKORSKI):

H.R. 2354. A bill to amend the Internal Revenue Code of 1986 to deny the deduction for interest on indebtedness incurred in certain takeovers of major airlines; to the Committee on Ways and Means.

By Mr. DOWNEY:

H.R. 2355. A bill to authorize the review of certain injury determinations under the countervailing duty and antidumping duty laws; to the Committee on Ways and Means.

By Mr. FASCELL (for himself (by request), Mr. BROOMFIELD, Mr. ROSTENKOWSKI, and Mr. ARCHER):

H.R. 2356. A bill in support of the people and nation of Poland, and to amend the Trade Act of 1974 and the Foreign Assistance Act of 1961; jointly, to the Committees on Ways and Means and Foreign Affairs.

By Mr. FRENZEL:

H.R. 2357. A bill to amend the Library Services and Construction Act to establish a program to promote the distribution of reading materials to child care providers; to the Committee on Education and Labor.

By Mr. FROST (for himself, Mr. COELHO, Mr. CLAY, Mr. SYNAR, Mr. GLICKMAN, Mr. LEACH of Iowa, and Mr. FRENZEL):

H.R. 2358. A bill to authorize appropriations for fiscal years 1990 and 1991 for the Civic Achievement Award Program in honor of the Office of Speaker of the House of Representatives, and for other purposes; to the Committee on House Administration.

By Mr. GOODLING (for himself, Mr. ATKINS, Mr. BAKER, Mr. FAWELL, Mr. GIBBONS, Mr. LAGOMARSINO, Mr. OWENS of New York, Mr. RINALDO, and Mr. WALKER):

H.R. 2359. A bill to amend title 18, United States Code, to prohibit transfer of firearms to, or possession of a firearm by, a person convicted of a drug crime, and to provide enhanced penalties for possession of a firearm during a drug crime; to the Committee on the Judiciary.

By Mr. HOLLOWAY:

H.R. 2360. A bill to redesignate May 30 of each year as Memorial Day; to the Committee on Post Office and Civil Service.

By Mr. LANCASTER (for himself and Mr. KASICH):

H.R. 2361. A bill to amend title 10, United States Code, to establish additional requirements for, and to grant additional authority to, the inspector general of the Department of Defense; to the Committee on Armed Services.

H.R. 2362. A bill to amend title 10, United States Code, to establish auditors general in the military departments; to the Committee on Armed Services.

By Mr. LENT (for himself, Mr. DOWNEY, Mr. MCGRATH, Mr. MRAZEK, Mr. HOCHBRUECKNER, Mr. MANTON, and Mr. SCHEUER):

H.R. 2363. A bill to amend title VI of the Communications Act of 1934 to guarantee the rights of cable television subscribers to receive local broadcast stations and local professional sports events, and for other purposes; to the Committee on Energy and Commerce.

By Mr. THOMAS A. LUKEN:

H.R. 2364. A bill to amend the Rail Passenger Service Act to authorize appropriations for the National Railroad Passenger Corporation, and for other purposes; to the Committee on Energy and Commerce.

By Mr. MCCURDY (for himself, Mr. LEWIS of Florida, Mr. VALENTINE, and Mr. MCNULTY):

H.R. 2365. A bill to improve airport security by providing additional funding for research on, and evaluation of, explosives detection equipment; jointly, to the Committees on Public Works and Transportation and Science, Space, and Technology.

By Mr. MILLER of Washington (for himself, Mr. SMITH of Florida, Mr. ACKERMAN, Mr. SCHIFF, Mr. CARPER, Mr. RICHARDSON, Mr. HYDE, Mr. WYDEN, Mr. WEBER, Mr. LENT, Mr. PETRI, Mr. PRICE, Mr. BERMAN, Mr. GINGRICH, Mr. KYL, Mr. KOLBE, Mr. GRAY, Mr. OWENS OF UTAH, Mr. GILMAN, Mr. LAGOMARSINO, Mr. LEVINE OF CALIFORNIA, Mr. SKAGGS, AND Mr. DELAY):

H.R. 2366. A bill to encourage trade which promotes liberalization inside the Soviet

Union and the Baltic States; to the Committee on Foreign Affairs.

By Mr. MORRISON of Connecticut:

H.R. 2367. A bill to suspend temporarily the duty on Ciprofloxacin and Nimodipine; to the Committee on Ways and Means.

H.R. 2368. A bill to amend title II of the Social Security Act to protect the benefit levels of individuals becoming eligible for benefits in or after 1979 by eliminating the disparity—resulting from changes made in 1977 in the benefit computation formula—between those levels and the benefit levels of persons who became eligible for benefits before 1979; and to remove the ceiling on the amount of an individual's income which can be taken into accounting in computing his or her benefits and in determining his or her liability for Social Security taxes; to the Committee on Ways and Means.

By Mr. MORRISON of Connecticut (for himself, Mr. DOWNEY, and Mrs. KENNELLY):

H.R. 2369. A bill to amend the Federal Unemployment Tax Act with respect to the provisions of State law required by such act; to the Committee on Ways and Means.

By Mr. DREIER of California:

H.R. 2370. A bill to amend the Internal Revenue Code of 1986 to restore the preferential treatment of capital gains, and to provide for the indexing of the basis of certain assets; to the Committee on Ways and Means.

By Mr. OWENS of Utah:

H.R. 2371. A bill to require that all Federal research, development, testing, and evaluation of the medical aspects of the use of biological agents in the development of defenses against biological warfare be conducted through the National Institutes of Health, and for other purposes; to the Committee on Energy and Commerce.

By Mr. OWENS of Utah (for himself, Mr. HANSEN, Mrs. SCHROEDER, Mr. SKAGGS, Mr. RICHARDSON, Mr. BILBRAY, and Mrs. VUCANOVICH):

H.R. 2372. A bill to provide jurisdiction and procedures for claims for compassionate payments for injuries due to exposure to radiation from nuclear testing; to the Committee on the Judiciary.

By Mr. PENNY (for himself and Mr. STAGGERS):

H.R. 2373. A bill to amend the Head Start Act to increase enrollment and to provide child care services for children enrolled in Head Start programs; and to delay the indexing of income tax rates and personal exemption; jointly, to the Committees on Education and Labor and Ways and Means.

By Mr. RANGEL (for himself, Mr. COUGHLIN, Mr. GUARINI, Mr. GILMAN, Mr. ORTIZ, Mr. BROOKS, Mr. TOWNS, Mrs. COLLINS, Mr. SCHEUER, Mr. BRENNAN, and Mr. FAUNTROY):

H.R. 2374. A bill to amend title I of the Omnibus Crime Control and Safe Streets Act of 1968 to authorize grants to States for projects to demonstrate innovative alternatives to the incarceration of nonviolent adult offenders; to the Committee on the Judiciary.

By Mr. RICHARDSON (for himself, Mr. CAMPBELL of Colorado, and Mr. JOHNSON of South Dakota):

H.R. 2375. A bill to establish the Indian Development Finance Corporation, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. ROYBAL:

H.R. 2376. A bill to provide for improved housing and services to elderly and handicapped individuals; to the Committee on Banking, Finance and Urban Affairs.

By Mrs. SCHROEDER (for herself and Mr. MARTIN of New York) (both by request):

H.R. 2377. A bill to authorize appropriations for civil defense programs for fiscal years 1990 and 1991; to the Committee on Armed Services.

By Mr. SMITH of Florida (for himself, Mr. FISH, Mr. HUGHES, Mr. HYDE):

H.R. 2378. A bill to amend title 28, United States Code, to permit the district courts of the United States to enjoin, suspend, or restrain certain State ad valorem property taxes on interstate gas transmission property, and for other purposes; to the Committee on the Judiciary.

By Mr. SOLOMON:

H.R. 2379. A bill to amend the Clean Air Act to protect against interstate transport of pollutants, to control existing and new sources of acid deposition, and for other purposes; to the Committee on Energy and Commerce.

By Mr. STUMP (for himself, Mr. DYMALLY, Mr. UDALL, Mr. GARCIA, Mr. KANJORSKI, and Mr. DE LUGO):

H.R. 2380. A bill to provide that ZIP Code boundaries may be redrawn so that they do not cross the boundaries of any unit of general local government; to the Committee on Post Office and Civil Service.

By Mr. WISE:

H.R. 2381. A bill to amend title 44, United States Code, to reform the information dissemination policy functions of the Director of the Office of Management and Budget, and for other purposes; to the Committee on Government Operations.

By Mr. WYDEN:

H.R. 2382. A bill to authorize the Secretary of Health and Human Services to make grants to nonprofit organizations and State and local housing agencies for establishing demonstration projects to assist low-income families in paying rental housing security deposits; to the Committee on Banking, Finance and Urban Affairs.

DELETIONS OF SPONSORS FROM PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, sponsors were deleted from public bills and resolutions as follows:

H.R. 586: Mr. LEWIS of Georgia.

AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

H.R. 2072

By Mr. GEKAS:

—At the appropriate place in the title relating to general provisions, insert the following new section:

SEC. . (a) IN GENERAL.—Section 1151(k)(1) of the Tax Reform Act of 1986 (relating to effective dates for section 89 nondiscrimination rules) is amended to read as follows:

"(1) IN GENERAL.—The amendments made by this section shall apply to years beginning after December 31, 1989.".

(b) CONFORMING AMENDMENTS.—(1) Section 1151(k)(4) of such Act is amended by striking "December 31, 1988" and inserting "December 31, 1989".

(2) Section 3021(c) of the Technical and Miscellaneous Revene Act of 1988 is amended—

(A) in paragraph (2), by striking "January 1, 1989" and inserting "January 1, 1990";

(B) in paragraph (2), by striking "December 31, 1988" each place it appears and inserting "December 31, 1989"; and

(C) in paragraph (3), by striking "1989" and inserting "1990".

—At the appropriate place in the title relating to general provisions, insert the following new section:

SEC. . Section 1151 of the Tax Reform Act of 1986 and the amendments made by such section (relating to section 89 nondiscrimination rules) are hereby repealed, and the Internal Revenue Code of 1986 shall be applied and administered as if such section and amendments had never been enacted.

EXTENSIONS OF REMARKS

COL. NICK ROWE: A FINAL SALUTE

HON. WILLIAM E. DANNEMEYER
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 16, 1989

Mr. DANNEMEYER. Mr. Speaker, Col. James John Nicholas Rowe was gunned down in Quezon City, outside Manila, the Philippines, on April 21, 1989. Serving as ground forces director for the joint United States military advisory group headquarters, he was targeted for assassination by the new people's army, a Communist terrorist group dedicated to destroying democracy in the Philippines and killing Americans equally dedicated to stopping them.

Col. Nick Rowe was an American hero in every sense of the word. After surviving 5 years as a prisoner of the Vietcong, he continued to battle the forces of atheistic communism in every endeavor of his military career. After retiring from the Army in 1974, he returned in 1981 to organize the Survival, Evasion, Resistance, and Escape—or SERE—Program to train those in every branch of service most prone to be taken prisoner by enemy forces.

Shortly after developing the SERE Program, he became involved once again in the battle against Communist insurgents, this time in the Philippines. He acknowledged that he was a prime target for a hit by these thugs. Unguarded and unarmed—for reasons yet unknown—he was killed-in-action en route to his duty station.

I am indebted to a friend and ally, Mr. R.D. Patrick Mahoney, formerly on the staff of our late colleague Larry McDonald of Georgia, for sharing his knowledge and insight on Nick Rowe. Mr. Mahoney is currently executive director of the Coalition for Sound Money, with which I am associated, and I have the utmost respect for his courage, talents, and commitment to freedom. He knew Colonel Rowe from the time of Rowe's escape from the Vietcong and he himself served in the Southeast Asia theater from 1966 to 1970. He would later serve as Colonel Rowe's instructor on communism for the SERE Program at Camp Mackall, situated near Fort Bragg, NC.

After attending memorial services for Colonel Rowe at Fort Bragg, Mr. Mahoney—simply Patrick to his many friends—was privileged to assist Sfc. Chris Myrick who accompanied the remains of Colonel Rowe to Washington, DC for interment at Arlington National Cemetery. Sergeant Myrick was part of a special forces team including Lt. Col. Fred Jelinek and Maj. Sid Morgan, all of whom rendered invaluable assistance to Nick Rowe's family during this ordeal. In addition, the special forces chapter of Washington, DC hosted visiting special forces members from across the Nation for the final tribute and burial of Col. Nick Rowe.

I commend the following submission to my colleagues: Eulogy for Colonel Rowe by Brig. Gen. David J. Baratto delivered at the ceremony at Fort Bragg; front page article from the April 28, 1989 issue of the Fayetteville [NC] Times; editorial by retired Col. Harry Summers in the Washington Times of April 28, 1989; and a special tribute, "In Grateful Memory of Colonel James N. Rowe," from the John F. Kennedy Memorial Chapel services at Fort Bragg on April 27, 1989.

I pray that all of us still able to breathe the air of freedom will give thanks to those like Nick Rowe who have given their tomorrows so that we might have our todays.

EULOGY FOR COL. JAMES ROWE

(By Brig. Gen. David J. Baratto)

Colonel James "Nick" Rowe was born in McAllen, Texas, on 8 February 1938. He died in the service of his country in Quezon City in the Philippines. He gave all that mortality could give—his strength, his loyalty, his wisdom, and his love.

He needs no eulogy from me or from any other man. He has written his own history and historians will write about his contributions for decades to come. The words I speak today are not mine—they are the echoes of the scores of soldiers he touched with his gentle hands—they are the words etched in the heart of every soldier who wears the Green Beret.

You see, I did not know Nick Rowe—as a person. I knew him as an institution and, in that respect, I knew him intimately. We all knew him intimately.

Some of us knew from the day when he was only 6 years old and he promised to visit West Point to attend his brother's graduation. His brother died 3 months before graduation, but Nick had made his first of many difficult and selfless commitments and Nick would follow through. At 6 years of age, he took his place in that long grey line. And from that day forward, he would march a steady step to the thundering drumroll of those hallowed words: duty, honor, country.

A few of us knew him as an artillery officer who was not satisfied with standing back from the fray. Although attracted to the infantry, neither was his preference to fight the battle with a frontal charge. In his own words from an oral history interview taken before he departed the SWCS for the Philippines, Nick recounts the following—"I took a different route from most and came into special forces—I had made a decision then that as far as I was concerned, I had found what I wanted in the military, and I simply had to find a way to stay with it." I had my own set of heroes and all of a sudden, I had an opportunity to become a part of it—he was much more than just a part of it.

All of us knew him for his long ordeal as a prisoner of war in Vietnam, finally escaping on his fourth attempt while being led to what was intended to be his place of execution. While most of us would have checked out of the net right then and there, Nick didn't. Only a short rest break and than a continued march to impart his hard won lessons learned to his fellow soldiers.

Nick was a soldier of undaunting courage.

In a letter Nick wrote on the 17th of April to one of his many friends at Fort Bragg, he said: "Their targeting instructions [the NPA's] are for an officer involved in the counter-insurgency effort. I'm either No. 2 or No. 3 on their list and have taken the actions available to me to at least make it more difficult for them. The question is merely when will they give the instructions?"

He never swayed from his duty.

He died unquestioning, uncomplaining, with faith in his heart, and hope in the last words he wrote—the hope that right would prevail and that the oppressed would be liberated.

Once, when he was asked about some of the thoughts he had while in captivity, he remembered asking himself, "Lord, why me?" And the answer was simply—because—he recalled the Book of Job and its message that the Lord only tests those he loves and knew the Lord must really love him. On that day he adopted a new philosophy: You take it a day at a time and you say it will get better—and it will. This too will get better. Nick will never have to face again the leg irons, the gaunt faces of those oppressed, the ringing sound of shots fired in anger.

Nick Rowe was more than a soldier, a leader, a husband and a father. He was an institution who embodied the ideals of duty, honor, country and the value of human dignity and freedom. His light will shine on every battlefield where U.S. soldiers are asked to trod and his light will guide those soldiers during their darkest hours from taps to the next reveille. Tomorrow there will be a reveille and with the same faith that Nick gave us, things will get better.

[From the Fayetteville (NC) Times, Apr. 28, 1989]

800 ATTEND FORT BRAGG MEMORIAL FOR ROWE

(By Henry Cuningham)

Army Col. James N. "Nick" Rowe, a former prisoner of war who was assassinated last week in the Philippines, was eulogized Thursday at Fort Bragg as "a soldier of undaunted courage."

"He needs no eulogy from any other man," said Brig. Gen. David J. Baratto, commanding general of Fort Bragg's John F. Kennedy Special Warfare Center and School. "He has written his own history."

Fort Bragg officials estimated that 800 mourners attended the service inside John F. Kennedy Memorial Chapel or listened by loudspeakers outside on Ardennes Street. Among mourners was Gen. James J. Lindsay, commander-in-chief of U.S. Special Operations Command at MacDill Air Force Base, Fla.

"He was an institution who embodied the ideals of duty, honor, country," Baratto said of Rowe.

The 51-year-old former Fort Bragg officer was killed April 21 when assassins sprayed his vehicle with bullets while he was on his way to work as ground forces director for the Joint U.S. Military Advisory Group headquarters near Manila. Communist

rebels on Saturday claimed responsibility, the Associated Press reported.

Rowe wrote a letter shortly before his death in which he said he believed himself to be second or third on a list of assassination targets, Baratto said in his eulogy.

"The question is merely when they will give the instructions," Baratto quoted Rowe as writing. "He died unquestioning, uncomplaining, with faith in his heart."

In the early 1980s, Rowe developed the JFK Center's SERE (Survival, Evasion, Resistance and Escape) course for soldiers with a high risk of capture. The program continues as he envisioned, school officials said.

He chronicled his experience as a Viet Cong prisoner of war from 1963 to 1968 in his 1971 book "Five Years to Freedom." Rowe wrote that he was subjected to torture, solitary confinement, food deprivation and medical neglect. He made three unsuccessful escape attempts during 62 months of captivity before he finally escaped.

Rowe said of his captivity, "The Lord only tests those he loves," according to Baratto.

"He knew at that time the Lord really loved him," Baratto said.

Rowe's body was not at the Fort Bragg ceremony, but was on view Thursday afternoon at Fayetteville's Rogers and Breece Funeral Home, post officials said.

He will be buried at Arlington National Cemetery, Va., in a ceremony at 2 p.m. Monday, Fort Bragg officials said.

"His light will shine on every battlefield where U.S. soldiers trod," Baratto said.

Maj. Paul Barkey, JFK Center chaplain, described Rowe as "a Christian, a man of committed faith" and "equally at home whether speaking with presidents or privates."

"He knew the price of freedom," Barkey said. "He was prepared to make that full sacrifice."

Rowe, a native of McAllen, Texas, "never lost those small-town Texas values that were part of his early life," Barkey said. He was taunted by his captors, but never lost faith in his country, the chaplain said.

"Col. Rowe epitomized the professionalism of special forces," Brig. Gen. James A. Guest, commanding general of the Fort Bragg-based 1st Special Operations Command, said after the service. "He was the embodiment of the American soldier.

Retired Cols. Joseph G. Cincotti, Robert Mountel and David L. Pemberton discussed their memories of Rowe with reporters after the service.

"He could have taken one million other paths, but he chose to come back (into the Army after captivity)," Cincotti said. "We don't have many heroes, but Nick was one of the true heroes."

Mountel said Rowe was "one of the few people who truly understood the business of special operations."

"He put survival first," Pemberton said. "Escape was last. He wanted to translate our special operations skills into something the whole Army could use."

Rowe graduated from the U.S. Military Academy in 1960. His first assignment was with 7th Special Forces Group (Airborne) at Fort Bragg in 1961, officials said. He left Fort Bragg to study the Chinese language and returned to Fort Bragg in 1962 and served as executive officer of a special forces "A" detachment, officials said.

He escaped from captivity in 1968 as he was being taken to be executed when his guards were startled by U.S. helicopters. The helicopter crews identified him as an American from the air only because of his beard.

Rowe worked on the Army's POW/MIA program, resigned his Army officer's commission in 1974, ran unsuccessfully for state office in his native Texas and returned to active duty in 1981.

His last assignment at Fort Bragg was commander of the JFK Center's 1st Special Warfare Training Battalion (Airborne).

Rowe left Fort Bragg in early 1988 for language training at Monterey, Calif., prior to his assignment in the Philippines, officials said.

TRIBUTE TO A GENUINE HERO

(By Harry Summers)

This week the remains of a genuine American hero will be returned to the United States for burial at Arlington National Cemetery. Gunned down in the streets of a Manila suburb by a cowardly Filipino assassin. Lt. Col. John Nicholas "Nick" Rowe died as he had lived—as a soldier in the service of the people of the United States of America.

Survived by his wife, M. Susan Whifford Rowe, and four children: Deborah, 16, Christina, 6, Stephen, 2, and Brian, 5 months, Nick spent most of his 51 years under the colors. Born and raised in McAllen, Texas, in the lower Rio Grande valley, he entered the United States Military Academy at West Point in 1956 and graduated in 1960, the year John F. Kennedy was elected to the presidency.

Mr. Kennedy's inaugural pledge to "pay any price, bear any burden, meet any hardship, support any friend, oppose any foe, to assure the survival and success of liberty" became the watchwords by which Nick was to live his life. Originally commissioned in the artillery, Nick soon transferred to the outfit much admired by President Kennedy, the "Green Berets" of the Army Special Forces. In 1963, he found himself with a Special Forces "A" Team at Tan Phu on the Camau Peninsula in the southernmost reaches of Vietnam's Mekong Delta. It was to be a long stay.

On a combat operation with his Vietnamese counterparts, Nick was captured by the Viet Cong on Oct. 29, 1963. He would spend the next five years in captivity. Marking his death, American network television programs broadcast stock footage of American POWs in Hanoi, but such photographs had little to do with Nick Rowe. He was a prisoner not of the North Vietnamese but of the Viet Cong, held not in Hanoi but hundreds of miles away at the other end of Vietnam in a series of primitive jungle prisons in the U Minh forest near the Gulf of Siam.

Nick Rowe was one of the few Americans ever to escape from communist imprisonment. On Dec. 26, 1968, while his captors were evading U.S. air strikes near the prison camp, he knocked his guard unconscious and was able to signal a Huey helicopter from the U.S. 1st Air Cavalry Division, then operating in the area.

After his rescue and return to the United States, Col. Rowe wrote "Five Years to Freedom," a harrowing account of that experience. "Pay any price, bear any burden, meet any hardship" had taken on a grim meaning. "The fungus infection . . . covered most of my body." he noted at one point in his prison diary. "My fingernails had been eaten away . . . and I had only three toenails remaining."

But even worse than the physical anguish was the mental duress. At one point his guards told him, "It is fortunate for us that the peace-and-justice-loving friends of the South Vietnamese Front for National Liberation in America have provided us with information which leads us to believe you have lied to us," and then proceeded to confront him with intimate details of his family and military background that he had carefully concealed. Only his escape soon thereafter prevented the punishment that his captors assured him was certain to follow.

"Dissent was a part of American life," Col. Rowe noted, "but to support the enemy at the expense of another American was inconceivable. There was no other place the VC could have gotten some of that information except from the United States and I suddenly felt very sick."

In 1971, I reviewed "Five Years to Freedom" for the Kansas City Star and received an autographed copy from Col. Rowe with the words "to one who understands." It was high praise, but almost 20 years later I am not sure I do understand.

I do not understand the American traitors who betrayed Col. Rowe to the enemy. If there is a righteous God, there surely must be a special place reserved for them in hell. And I am not sure I understand why Col. Rowe, having sacrificed more than most Americans ever conceive in their worst nightmares, was willing to go once more into the breach.

At first he wasn't sure either. He resigned from active duty in 1974 and returned to Texas. But in 1981, he volunteered to return to active duty, for he saw it as his duty to pass on those skills he had learned at so high a price to a future generation of warriors. Assigned as chief of the Survival, Evasion, Resistance and Escape Division of the U.S. Army's John F. Kennedy Special Warfare Center at Fort Bragg, N.C., Col. Rowe was a particularly effective instructor.

Finally, I'm not sure I understand why he was sent to the Philippines to assist a nation whose main scam in recent years seems to have been the extortion of as much money as possible from the United States in exchange for allowing us to provide protection. But Col. Rowe would surely have answered that he wasn't there to serve those ingrates. He was there (as he was there in Vietnam) to serve the people of the United States whose elected representatives had sent him into harm's way.

In the course of his career, Lt. Col. John Nicholas Rowe won the Combat Infantryman's Badge, the Silver Star, the Legion of Merit, two Bronze Stars, the Meritorious Service medal and two Purple Hearts for wounds received in action. He also won the admiration and respect of all who knew him.

Mark his passage well; you may not see his like again.

IN GRATEFUL MEMORY OF COL. JAMES N. ROWE

Colonel James N. Rowe was born in McAllen, Texas, February 8, 1938. He graduated from McAllen High School in 1956 and entered the United States Military Academy at West Point that same year. He graduated from West Point in 1960 and was commissioned a second lieutenant in field artillery.

As a new lieutenant, he graduated from the Army's Airborne School and Ranger School, both at Fort Benning. In 1961 he

completed the Field Artillery Officers Basic Course at Fort Sill, Oklahoma.

His first assignment was with the 7th Special Forces Group (Airborne) at Fort Bragg, North Carolina, in 1961. He attended the Defense Language Institute in Monterey, California where he studied Chinese Manderin. He graduated in 1962 and returned to the 7th Special Forces Group to serve as the assistant group adjutant, and later as executive officer of a Special Forces A-Detachment.

Colonel Rowe graduated from the U.S. Army Unconventional Warfare School at Fort Bragg in 1962. He then trained as a military free-fall parachutist. In July 1963, he deployed to South Vietnam with Special Forces A-Detachment A-23 and was captured in a firefight by the Viet Cong October 29, 1963.

While in captivity, Colonel Rowe was subjected to torture, solitary confinement, food deprivation and medical neglect. For 62 months he endured these inhuman conditions and made three attempts to escape his captors. His will to survive carried him through the physical and mental torture that eventually killed three of his fellow POWs. He was in grave danger at all times; two other POWs, who like himself had successfully resisted the indoctrination efforts of the Viet Cong, had been executed.

The disclosure of his Special Forces training background in 1968 resulted in his finally being marked for execution. At the time of his fourth and final escape attempt Colonel Rowe was being transported to his execution when his guards were surprised by American helicopter gunships. In the chaos, Colonel Rowe managed to escape from the Viet Cong patrol. He was spotted from the air and identified as an American only because of his beard.

Colonel Rowe emerged from his experience as an authentic American hero, as a man who maintained his faith in God and country during the most trying of circumstances.

Following the Vietnam War, Colonel Rowe was assigned to the Army General Staff, Office of the Assistant Chief of Staff for Intelligence, and later to the Adjutant General's Office to work on the Army POW/MIA program.

After an assignment to the Defense Intelligence Agency, Colonel Rowe resigned his commission as a major in 1974 and entered the political arena, where he ran for State Office in his home state of Texas.

Colonel Rowe was recalled to active military duty in 1981 and was promoted to Lieutenant Colonel. He returned to Fort Bragg, where he created the Survival, Evasion, Resistance and Escape course for personnel serving in duty positions with a high risk of capture. His program standardized the Army's survival instruction by providing a rigorous, realistic, yet safe training environment where soldiers could learn how to avoid capture or to survive capture and return home with honor. The program continues as he envisioned to this day.

Colonel Rowe's last assignment at Fort Bragg was as the battalion commander of the 1st Special Warfare Training Battalion (Airborne) at the U.S. Army John F. Kennedy Special Warfare Center and School. He departed Fort Bragg in early 1988 for language training in Monterey, California prior to his assignment as ground forces director for the Joint U.S. Military Advisory Group in the Philippines.

Colonel Rowe's awards and decorations included the Silver Star, the Legion of Merit, the Bronze Star with oak leaf cluster, the Purple Heart with oak leaf cluster, the Meritorious Service Medal, the Vietnam Service Medal with eight campaign stars, the Combat Infantrymen Badge, Master Parachutist Badge, Ranger Tab, Special Forces Tab and Vietnamese Parachutist Badge.

His civilian awards included the American Patriot Award, which was awarded by the Freedom Foundation at Valley Forge in 1969. He was also awarded the Order of Demolay, Legion of Honor in 1972, and was twice named by the Jaycees as one of the "Outstanding Young Men of America."

As an author, Colonel Rowe published three works: The Southeast Asia Survival Journal, published by the Department of the Air Force, and two novels, The Judas Squad and Five Years to Freedom. The latter work chronicled his life and experiences in captivity during the Vietnam War.

As a speaker, Colonel Rowe gave more than 300 lectures to civilian audiences since 1969. He had also spoken at nearly every major military installation in the United States, spreading his inspirational message of faith and preservation under adverse circumstances. He also addressed the British Army General Staff College in Camberly, England, as well as the U.S. Department of State and the House Armed Services Committee of the U.S. Congress.

Colonel Rowe's distinguished career of civil and military service to the nation was characterized by unwavering devotion to duty, a high sense of honor and courage and deep love of his country.

SPECIAL FORCES PRAYER

Almighty God, Who art the Author of liberty and the Champion of the oppressed, hear our prayer.

We, the men of Special Forces, acknowledge our dependence upon Thee in the preservation of human freedom.

Go with us as we seek to defend the defenseless and to free the enslaved.

May we ever remember that our nation, whose motto is "In God We Trust," expects that we shall acquit ourselves with honor, that we may never bring shame upon our faith, our families, or our fellow men.

Grant us wisdom from Thy mind, courage from Thine heart, strenth from Thine arm, and protection by Thine hand.

It is for Thee that we do battle, and to Thee belongs the victor's crown.

For Thine is the kingdom, and the power and glory, forever.

LEGISLATION TO CURB THE LEVERAGED TAKEOVERS OF OUR MAJOR AIRLINES

HON. BYRON L. DORGAN

OF NORTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 16, 1989

Mr. DORGAN of North Dakota. Mr. Speaker, I am introducing today for myself and my colleagues legislation that would attempt to discourage hostile takeovers and leveraged buyouts in the airline industry.

I feel that hostile takeovers and LBO's generally are weakening our country and are not in the public interest, and I have introduced legislation to respond to the problem in a more general way in all industries.

But today I am specifically introducing legislation that focuses on the major airlines and the airline industry because I fear that putting major airlines in America "in play" in this game of speculation as practiced by the fast buck artists will seriously damage airline companies that so many people rely on for their transportation needs.

Northwest Airlines specifically has been the subject of takeover discussions in recent months. Projections show that those who would want to buy Northwest assets would do so by heavily leveraging the company. It would, according to experts, result in adding $300 million dollars a year to the company's costs just to pay the interest on the debt acquired for the takeover. While Northwest has been profitable in the past, if you add $300 million dollars in interest costs to that company, it's going to put enormous financial pressure on the company to cut back on less densely populated routes, increase ticket prices, and do a range of other things that will diminish airline service. In many instances up in the northern Great Plains—North Dakota, Montana, and other areas—Northwest is the only carrier providing airline service.

To put major airline companies in the middle of this speculation game is dangerous and counter to the public interest. If somebody wants to buy an airline company, let them buy it using equity financing. But to saddle one of the airline companies with enormous debt so that some speculator can make money taking the company apart, I think makes no sense at all.

I wouldn't feel the need to introduce this legislation if I had any inkling that the Department of Justice and Department of Transportation would act responsibly in the face of a merger or an LBO of a major airline. In fact, the record on both counts is a record of virtual incompetence. The Department of Transportation has a responsibility to see to it that the fitness of an air carrier to serve is not impaired by something like an LBO. But frankly, the Department of Transportation—like virtually every other agency during the past 8-year administration and, I expect, the current one—behaves as if it is brain dead on these issues. It simply does nothing seriously to respond to the public interest on these issues. That's why I feel I have to introduce this type of legislation.

Let me make one other observation about these hostile takeovers in general. Those who support such activities say that hostile takeovers represent the takeover of underperforming companies and turn them into better companies. Well the record shows that's not the case. Prof. Lewis Lowenstein, in a study, demonstrated that the targets of these takeovers have largely been companies performing slightly above average before the takeover and performing below average after the takeover. This is not, as Professor Lowenstein puts it, the "princess kissing the toad and turning him into a prince." Rather, in some instances, it's turning a prince into a toad.

In some cases, these wealth wars don't have much impact on the American citizen, but with companies like airlines it's different. And I think it's time to tell the speculators that we won't allow them to take apart our transportation companies in order to make a quick buck if it will have a dramatically negative

impact on the customers those airlines serve. That's why I've introduced my bill for discussion here in Congress.

The highlights of the bill are as follows:

First, interest deductions are denied where indebtedness exceeding $100,000,000 is incurred for stock acquisition in a major airline and where the stock acquisition is accomplished pursuant to a hostile offer, with indebtedness consisting of junk bonds or where the debt/equity ratio of the target company following the transaction is greather than 1 to 1 and such ratio is increased 50 percent or more as a result of the change.

My legislation broadly defines junk bonds. For this purpose, prohibited junk bonds include any corporate obligation that: First, is subordinated either to the claims of trade creditors or to a substantial amount of the corporation's unsecured debt; or second, at the time of issuance the yield to maturity is in excess of 135 percent of the applicable Federal rate; or third, has a below-investment-grade rating from a nationally recognized rating agency; or fourth, has other equity features.

I urge every Member to help protect our Nation's airways by cosponsoring this legislation. Congress cannot afford to ignore the costs associated with hostile mergers and leveraged buyouts that threaten the economic stability of our major commercial airlines, in exchange for exorbitant short-term profits gained by corporate raiders.

The full text of the bill follows:

H.R. —

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. DENIAL OF DEDUCTION FOR INTEREST ON INDEBTEDNESS INCURRED TO ACQUIRE STOCK IN CERTAIN TAKEOVERS OF MAJOR AIRLINES.

(a) IN GENERAL.—Part IX of subchapter B of chapter 1 of the Internal Revenue Code of 1986 (relating to items not deductible) is amended by adding at the end thereof the following new section:

"SEC. 2801. INTEREST ON INDEBTEDNESS INCURRED TO ACQUIRE STOCK IN CERTAIN TAKEOVERS OF MAJOR AIRLINES.

"(a) GENERAL RULE.—No deduction shall be allowed under this chapter for interest on indebtedness incurred or continued by a corporation (hereinafter in this section referred to as the 'issuing corporation') to acquire or carry the stock of any major airline if such stock is acquired as part of a covered ownership change.

"(b) COVERED OWNERSHIP CHANGE.—

"(1) IN GENERAL.—The term 'covered ownership change' means any ownership change (as defined in section 382(g)) if—

"(A)(i) a significant portion of the stock acquisition resulting in such change is pursuant to a hostile offer,

"(ii) any indebtedness incurred by the issuing corporation to make such acquisitions consists of junk bonds, or

"(iii) the ratio of debt to equity (as defined in section 279(c)(2)) of the issuing corporation immediately after the ownership change is greater than 1 to 1 and increased by at least 50 percent as a result of the ownership change, and

"(B) the amount of indebtedness incurred by the issuing corporation to make such acquisitions exceeds $100,000,000.

"(2) HOSTILE OFFER.—

"(A) IN GENERAL.—For purposes of paragraph (1), the term 'hostile offer' means any offer to acquire stock of a corporation if a majority of the independent members of the board of directors of such corporation disapproves such offer.

"(B) REVOCATION OF DISAPPROVAL.—An offer shall not be treated as a hostile offer if—

"(i) a majority of the independent members of the board of directors of such corporation revokes such disapproval, and

"(ii) no stock is acquired pursuant to such offer before such revocation.

"(c) INDEPENDENT DIRECTORS.—For purposes of this paragraph, a member of a board of directors shall be treated as independent if such member is not, and was not at any time during the 1-year period ending on the date of his approval or disapproval of the offer, an officer or employee of the target corporation.

"(c) MAJOR AIRLINE.—For purposes of this section, the term 'major airline' means—

"(1) any corporation which is treated by the Department of Transportation as a major airline, and

"(2) any corporation which is a member of an affiliated group (as defined in section 1504) which includes a corporation described in paragraph (1).

"(d) JUNK BOND DEFINED.—For purposes of this section—

"(1) IN GENERAL.—The term 'junk bond' means any obligation of a corporation evidenced by a bond, debenture, note, or certificate, or other evidence of indebtedness, if such obligations meets the requirements of one of the subparagraphs of paragraph (2).

"(2) REQUIREMENTS.—

"(A) SUBORDINATION.—An obligation meets the requirements of this subparagraph if principal or interest with respect to such obligation is—

"(i) subordinated to the claims of trade creditors of the issuing corporation generally, or

"(ii) subordinated to the payment of any substantial amount of unsecured indebtedness, either outstanding or subsequently issued, of the issuing corporation.

"(B) RATING IS BELOW INVESTMENT GRADE.—An obligation meets the requirements of this subparagraph if such obligation bears, at the time of its issue, a rating from any nationally recognized rating agency and such rating is below that agency's rating for investment grade obligations.

"(C) HIGH YIELD TO MATURITY.—An obligation meets the requirements of this subparagraph if such obligation, at the time of its issue, has a yield to maturity of more than 135 percent of the applicable Federal rate with respect to such obligation.

"(D) OTHER EQUITY FEATURES.—An obligation meets the requirements of this subparagraph if—

"(i) such obligation is by its terms at any time convertible into or exchangeable or redeemable for any property other than cash at the option of any person or otherwise;

"(ii) such obligation is part of an investment unit or other arrrangement which includes, in addition to such obligation, an equity interst in any entity or an option to acquire, directly or indirectly, an equity interest in any entity, or

"(iii) the amount of, or due date for, any payment of principal or interest with respect to such obligation is, under the terms of such obligation, contingent.

"(e) AFFILIATED GROUPS.—All members of an affiliated group of corporations which includes the issuing corporation shall be treated in the aggregate, pursuant to regulations prescribed by the Secretary, as the issuing corporation. For purposes of the preceding sentence, the term 'affiliated group' has the meaning given to such term by section 1504(a) (determined without regard to the exceptions contained in section 1504(b))."

(b) CLERICAL AMENDMENT.—The table of sections for such part IX is amended by adding at the end thereof the following new item:

"Sec. 2801. Interest on indebtedness incurred to acquire stock in certain takeovers of major airlines."

(c) EFFECTIVE DATE.—The amendments made by this section shall apply to indebtedness incurred after May 16, 1989.

POLISH SINGERS ALLIANCE OF AMERICA CELEBRATES 100TH ANNIVERSARY

HON. HENRY J. NOWAK

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 16, 1989

Mr. NOWAK. Mr. Speaker, I would like to congratulate the Polish Singers Alliance of America, which will be celebrating its 100th Anniversary May 25 through May 28 at an International Centennial Convention.

This is the 42d International Convention which is being hosted by District IX of Buffalo, NY, but will be held in Hamilton, Ontario, Canada for the first time in the history of the organization. I would like to thank Miss Adeline Wujcikowski of Buffalo, NY, for bringing to my attention the following history of the organization and express my hope the alliance's successful cultural enrichment activities will continue for centuries to come.

HISTORY OF THE POLISH SINGERS ALLIANCE OF AMERICA

The Polish Singers Alliance of America is primarily composed of Americans of Polish ancestry who are proud of its achievements to promote and instill Polish Song upon the lips and into the hearts of their countrymen in North America and Canada. This organization was banded together to grow and flourish because a seed implanted in the minds of men who loved Polish song and music through letters from relatives of their native land Poland.

The first organizational meeting was held in Chicago, Illinois on June 11, 1888 in the school auditorium of the Holy Trinity Parish. A committee of five, most of whom were from the Chopin Choir in Chicago, Illinois, were appointed and were to write and submit a constitution for the new-found organization. The purpose as outlined in the constitution are:

(a) to spread and maintain Polish and American Song.

(b) to uphold in America and Canada with the help of Polish Song, a sincere love for the land of our forefathers.

(c) to acquaint not only the Polish but also the American public with the works of Polish composers.

December 4, 1888 marks the important date in the history of the organization because this day the name "Zwiazek Spiewakow Polskich w Ameryce" (Polish Singers Alliance of America) was officially adopted

on a motion by Father D. Majer of St. Paul, Minnesota.

The first Convention was held in May 13, 1889 in Chicago, Illinois. At this convention the first officers of the National Headquarters were elected Konstanty Mallek the first president and Anthony Malled the first Choral Director. The National Body Headquarters were for the first twelve years in Milwaukee, Wisconsin. The choruses who were represented at this first convention were Chopin Singing Society of Chicago, Illinois; Harmonia Singing Society of Milwaukee, Wisconsin; and Harmonia S.S. of La Salle, Illinois. The time elapsed between conventions at that time varied from annually to tri-annually. Presently all International Conventions are held every three years.

Our motto "Gora Piesn (Hail to the Song) and our greeting of "Kolego and Kolezanko" were two items that have been sanctioned at the fifth convention which was held in Chicago, Illinois.

The increase of member choirs has been so prolific that in May 1913 they were divided into geographic districts which still exist till this day. The New York District #7 has the most choir members and they formed their own group known as the United Polish Singers. After some years, that is in 1928, these two groups with sincere recommendation and cooperation of the executive board were reconciled and became one organization as it still is today—Polish Singers Alliance of America.

The organization has been decorated with the following honors. The Gold Cross of Merit from the Republic of Poland—General Haller Medal; Medal of Honor from the United Alliance of Singers and Musicians in Poland and many others.

The Singers Alliance has had an official printed newsletter which is mailed to its choir members. During its 100 year existence it published the "Ziarno", Czas, "Harmonia", "Gora Piesn", "Przeglad Spiewadzy", and presently the "Sinters Bulletin" which is a quarterly publication being mailed to all members of the Polish Singers Alliance of America.

International Conventions were held in the 100 years of the Alliance's existence in Chicago, Illinois; Milwaukee, Wisconsin; Delaware; Buffalo, New York; Syracuse, New York; Utica, New York and New York, New York. The concerts and contests at the convention have played a very important part. The contests were first inaugurated in 1902. Competition is very keen among all choral groups. There are three categories of competition: Mixed choruses, Male Choruses and Female Choruses. At the concert each one of the groups appears with renditions and the finale is a joint effort of all the singers numbering up to 1000 voices who render several selections which have been selected by the National Choral Director.

Choruses participating in the contest receive trophys or plaques plus certificates. Only songs of Polish composers may be performed for the competition. The most coveted award is Perpetual Travelling Trophy which was introduced and funded in 1934 by His Eminence August Hlond Primate of Poland. At the convention in New York, New York the first chorus to win this trophy with the highest scored points was a male chorus Kolko Filaretow #105. In 1937 second chorus to receive the Cardinal August Hlond Trophy was a female chorus Lutnia #119 from Utica, New York. Both Choruses were from District VI, Syracuse, New York.

The songs that are sung by the choirs are usually obtained from the library of the National Headquarters. The first song printed for distribution was "Piesn Filaretow". The music library of the National Headquarters has in its possession thousands of different songs, several of these have been written by our past National Choral Directors and donated to the Library. Among volumes of songs there are also orchestral scores, and operettas which were donated by many of the choruses or individuals who have the Polish song and culture at heart.

Members of the Polish Singers Alliance may be honored with the highest award that the Alliance can bestow them "Honorary Membership" for outstanding achievements for the organization they are members of. Members for this honor must be nominees from their chorus and are presented to the National Convention where the "Kapitula" composed of the National President, general secretary, and National Choral director together with presidents of each District evaluate these nominees and then present to the convention delegates for acceptance.

There are other awards given to members for their participation, devotion to their individual group and special achievements. These are in form of medals, for 10 years of service and faithfulness a Bronze Medal: 15 years a Silver Medal and for 25 years a Gold Medal.

It was at the 28th International Convention which took place in New York City that the National Headquarters were decided upon to move to New York from Chicago, Illinois. The headquarters is located at 180 Second Ave., New York, N.Y. in the Polish Alliance Building known as the Dom Zwiazkowy.

Mr. Eugene Pilis is the twelfth president of the Polish Singers Alliance of America. Other officers are Vice President Bernice Gruszka and Mikolaj Strzalkowski; General Secretary—Barbara Blyskal; Treasurer Stephen J. Smith; General Choral Director Anthony Kazmierczak; Librarian Walter Witkowicki and Assistant Librarian—Vincent Rendenna.

Joseph F. Czechlewski is an Honorary President—he held the office of president for more than a quarter of a century. We also have an Honorary General Secretary—Mr. Walter Falencki and an Honorary General Choral Director—Theodore M. Niedzielski who entered eternity this past year.

The National Singers Alliance has a membership of approximately 1,550 singers with 48 Choruses belonging from the United States and Canada. Our vast library has at present 48 catalogues of music for the mixed, male and female and childrens choirs.

Presently there are six active districts which are located in:

District 1—Chicago, Illinois.
District 3—Cleveland, Ohio.
District 4—Detroit, Michigan.
District 6—Syracuse, New York.
District 7—New York, New York.
District 9—Buffalo, New York.

The Polish Singers Alliance of America organized in 1889 is celebrating its Centennial Anniversary in May 1989 at the International Centennial Convention which is the 42nd such convention to be held. This very auspicious convention is being hosted by District IX and for the first time in the History of the Alliance held in Hamilton, Ontario, Canada. Convention sessions will convene May 25, 1989 at the Hamilton Place, 116 King St., Hamilton, Ontario, Canada. District IX hosting this convention is composed of seven choral groups namely: Chopin Singing Society #219; Echo Singing Society Inc. #228; Kalina Singing Society #221; Polish Singing Circle Inc. #221; I.J. Paderewski Singing Society #275; St. Hyacinth's Men's Choir #317; and Symfonia Singing Society #291, Hamilton, Ontario, Canada. President of District IX is Kolega Thaddeus J. Zolkiewicz. Chairman of the Pre-Convention Committee is Kolega John Paul.

Aside from business which will be held May 25 and 26th—there are on the agenda the International Competition on Saturday, May 27, 1989 and the Concert and closing of the convention with a Banquet Sunday, May 28, 1989.

There are many struggles that confronted the Polish Singers Alliance of America during its 100 years, but despite all this each member of the organization is filled with pride when the organization is mentioned. The mainstay of the organization is the perseverance and the dedication of its members.

NASA CHIEF RETIRES

HON. ROBERT A. ROE

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 16, 1989

Mr. ROE. Mr. Speaker, Dr. James Fletcher, Administrator of the National Aeronautics and Space Administration, retired on April 8, 1989. Dr. Fletcher has held the post of NASA Administrator on two separate occasions. He served as the agency's fourth Administrator from April 1971 to May 1977 and then became the seventh head of the agency in May 1986.

When President Reagan tapped Dr. Fletcher for the top NASA position in 1986, he needed a man of both experience and resourcefulness. James Fletcher qualified on both counts.

The task facing NASA's new chief was formidable. The Nation and the agency were grappling with the space shuttle *Challenger* accident that had occurred just 3 months before in January. Jim Fletcher's job was nothing short of keeping America's faith in the future of its space program.

Dr. Fletcher's strong spirit and steady hand guided NASA through the arduous work of redesigning the space shuttle program. This entailed numerous separate and complicated initiatives. The first of these was to oversee the redesign of the solid rocket motor which was the direct cause of the *Challenger* accident.

At the same time, Jim Fletcher set about reorganizing the space shuttle management structure in order to centralize control of the program. His objective was to ensure clear, uninhibited communication through the entire complex of command.

The *Challenger* accident also precipitated a complete assessment of both safety procedures and management structure throughout the agency. Under Jim Fletcher's leadership, NASA created a separate safety organization within the agency with a reporting system that guarantees anonymity. In addition, he guided the reorganization of the agency's topmost level of management.

In an effort to guarantee America's assured access to space at all times, Dr. Fletcher reinstituted a mixed fleet strategy. This plan incorporates the use of expendable launch vehicles for missions that do not require human intervention, and divests us from reliance on any one single launch system.

While Jim Fletcher's wisdom was helping to transform and tighten the internal operations of NASA, his persuasive arguments helped to earn both Presidential and congressional approval to construct a replacement for the *Challenger* orbiter, and also to begin development of an advanced solid rocket motor.

Dr. Fletcher's energy, expertise, and management skills enabled him to accomplish all of these things and many more. He was able to keep other NASA programs moving forward, meeting their deadlines, and maintaining momentum. Of particular significance during this time was the important advance negotiated in the space station initiative. Under Jim Fletcher's guidance, America reached final agreement with its international partners for the space station's development and operation.

Although the American public probably knows Dr. Fletcher primarily through his work with the Nation's Space Program, Dr. Fletcher has also had a varied and distinguished career in the private sector.

After receiving a B.A. degree in physics from Columbia University in 1940, he became a special research associate at Harvard University's Cruft Laboratory. From there, he went to Princeton University to become an instructor. Upon earning a Ph.D. in physics from the California Institute of Technology in 1948, he joined the Hughes Aircraft Co., at age 29. After 6 years at Hughes, there were several more years of entrepreneurial work in the space field culminating in the systems vice president position at Aerojet General Corp.

In 1964, Dr. Fletcher moved from industry to academia when he became the president of the Universtiy of Utah, a post he held for 7 years. It was from this position that Jim Fletcher moved to NASA for the first time to serve 6 years as the agency's fourth Administrator.

As a research scientist, Dr. Fletcher has developed patents in sonar devices and missile guidance systems. He has been associated with the President's Science Advisory Committee, 9 years as a member of subcommittees and 4 years as a member of the committee itself, and has served on several Presidential task forces and many government-industry committees.

He is a fellow of the Institute of Electrical and Electronics Engineers, the American Institute of Aeronautics and Astronautics, the American Academy of Arts and Sciences, the American Astronautical Society, and was elected to the National Academy of Engineering. He was a recipient of the first Distinguished Alumni Award of the California Institute of Technology and holds honorary doctorates from several colleges and universities.

When Jim Fletcher left NASA in 1977, he accepted the William K. Whiteford professorship of energy resources and technology at the University of Pittsburgh. He was at Pittsburgh when President Reagan asked him to return to NASA for a second term, the one from which he has just retired.

The Nation and the Nation's Space Program are indebted to Dr. Fletcher for his willingness, his caring, and his conscientious decision to take on what may have been the single most difficult job in the Nation at the time.

I know that my colleagues in the House of Representatives join me in thanking Jim Fletcher for a job well done. He is a noted scientist, a dedicated educator, and a civil servant whom we are most proud and privileged to have had on our side.

IN COMMEMORATION OF RETIRED FEDERAL EMPLOYEES WEEK

HON. CONSTANCE A. MORELLA

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 16, 1989

Mrs. MORELLA. Mr. Speaker, the week of May 21 to 27 has been designated as "Retired Federal Employees Week." I am pleased to take this opportunity to recognize the significant contributions made by retired Federal employees to our Nation, as Maryland NARFE members prepare for their 29th biennial convention in Frederick, MD.

As a member of the Committee on Post Office and Civil Service and as the representative in Congress of 25,000 Federal retirees, I have had the privilege of working to address the specific concerns of Federal employees and retirees. They are a special group of outstanding individuals who have given so much to their country in so many areas of service. The Governor of the State of Maryland, the Honorable William Donald Schaefer, has issued a proclamation to commend the observance of Retired Federal Employees Week. In the proclamation, the Governor truly expresses the essense of their contributions:

> The glory and the promise of our great Nation has been nurtured and enhanced as a direct result of the tremendous contributions of our retired Federal employees, who devoted a greater part of their lives to striving to make our cherished system of government work—and work well. * * * It is vital that we never forget the outstanding employees whose noble efforts and impressive careers in public service truly helped to strengthen the very fabric of our democratic society. * * *

I urge my colleagues to join me in recognizing these distinguished individuals who have contributed so much to our Nation, and I wish great success to the participants in the NARFE convention in Frederick, MD.

IMPORTS OF DIGITAL PROCESSING UNITS

HON. BILL ARCHER

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 16, 1989

Mr. ARCHER. Mr. Speaker, I recently introduced a miscellaneous tariff bill, H.R. 1869, which is identical to a bill I sponsored last year, H.R. 4493.

This bill restores a standard of equitable customs treatment to one of America's most competitive industries, the computer industry. It also corrects a situation where, due to an unintended intersection of administration decisions in 1987, several companies in this important industry were subjected to what was effective retroactive taxation.

H.R. 1869 addresses a customs classification matter regarding so-called "motherboards," which may generally be considered to be populated circuit boards that are the main board of the processing unit of a personal computer and other automated data processing machines. For years, American motherboard importers had been bringing them into the United States and the Customs Service had been liquidating them as "parts of accounting, computing and other data processing machines under former Tariff Schedule [TSUS] item 676.52. Beginning in January 1986, as a result of the United States-Japan-Canada Computer Parts Agreement, tariffs on this item (changed at that time to TSUS item 676.54) were reduced to a zero duty rate.

In order to understand the intricacies of the motherboard issue, it is important to follow carefully the sequence of several major events which were happening in parallel.

During January 1986, Intel Corp. received notice from the Customs Service that its motherboard imports should be classified as "unfinished ADP (automated data processing) machines" under TSUS item 676.15, at a tariff rate of 3.9 percent. Intel requested a clarification of this inconsistency in classification from the Customs Service that month, initiating a year and a half of consideration by the Customs Service of what the proper classification should be.

When such clarifications are sought by an importer, the practice of the Customs Service is not to inform other importers of the same products about the pending clarification requests. There are sound reasons for this practice. First, the discussions are akin to an IRS tax matter, that is, private. In addition, such clarifications and more formal classification ruling requests frequently involve unannounced products, where an importer may be uncertain as to what the proper classification should be. Disclosure to competitors would undermine the competitiveness of the importer who requested the ruling. In this case, however, due to the extended length of time it required for Customs to rule on the Intel request, several major inequities arose.

Customs responded to Intel on July 2, 1987—18 months after Intel's original request. Customs ruled that the proper classification of motherboards should be under "unfinished ADP machines," TSUS item 676.15. This decision, in my opinion and that of the industry, violated Customs procedures under the "established and uniform practice" provisions of the Customs regulations.

During the course of discussions between representatives of the U.S. computer industry and the Reagan administration, the industry provided evidence showing that the Customs Service had been routinely liquidating motherboard entries well into 1987 under TSUS

items 676.52 and 676.54. The industry documented that almost 500 shipments of 1,700,000 motherboards during the 4-year period 1984–87 had been liquidated under these TSUS items. Compounding this situation, two other elements of the July 2 decision created substantial inequities for U.S. companies.

First, companies have a right to expect consistency and uniformity in Customs treatment of their imports. That is a principle well established in U.S. customs law. Due to the classification history I have earlier referred to, Intel and other U.S. motherboard importers relied on the consistency of prior Customs treatment. Since tariff rates had been reduced to zero with implementation of the United States-Japan-Canada Computer Parts Agreement, they had every right to base their business investment decisions on this pattern of treatment. There is considerable evidence that they did so, through manufacturing and product purchasing decisions.

A second element of the July 2 ruling proved to be even more perverse for American companies. The Customs Service decided to make its decision effective retroactively to the date when Intel originally requested the clarification, 18 months previously, and to apply the decision to all unliquidated motherboard imports by all U.S. companies. Recalling that Customs practice is not to inform other importers of a pending ruling or clarification request, the July 2 ruling came as a major surprise to U.S. computer companies.

Normally, such developments would raise significant concerns for any importer, and this in its own right would be sufficient cause for importers to protest the Customs decision.

However, as I mentioned previously, events were happening on a parallel track which compound these inequities to a much greater extent. As my colleagues in the House know, the Reagan administration became convinced that the Japanese Government had been violating the terms of another, bilateral, agreement—the United States-Japan Semiconductor Agreement. On Mary 31, 1987, the U.S. Trade Representative's office announced in the Federal Register its intent to place $300 million of sanctions on the Japanese for failure to live up to the terms of the agreement.

Administration practice when announcing intent to impose sanctions is to publish a list of candidate categories of imports to TSUS item number, and to request public comment. USTR followed that practice in the March 31, 1987, Federal Register notice. That notice requested public comments, among other items, on "the degree to which increased duties might have an adverse effect on U.S. consumers of the products concerned." Among the list of candidate TSUS numbers was item 676.15. At no place in the USTR notice was there any indication that motherboards were on the list of proposed items because of a changed classification.

The actions of the U.S. computer industry in response to this Federal Register notice is instructive. USTR conducted public hearings on the candidate sanctionable TSUS categories, and the Computer and Business Equipment Manufacturers Association's testimony did not address TSUS item 676.15.

There was simply no way that the U.S. computer industry could have known about Customs discussion with Intel. Since USTR in its Federal Register notice did not explicitly state that motherboards were intended to be included in the proposed sanctions categories, the computer industry was unaware that motherboards would be drawn into the sanctions as a result of the retroactive Customs decision 3 months later. The only company which knew of the request was Intel itself, and since Intel was not importing motherboards from Japan, there was no reason for them to comment on item 676.15 in the sanctions list.

The sanctions were imposed on April 17, 1987, and item 676.15 was on the list. Two and a half months later, when Customs made its retroactive decision on the Intel matter, the effect was to subject all unliquidated imports of motherboards from Japan to the sanctions. Our understanding is that the lion's share of the burden of this inequitable set of circumstances fell on IBM, despite President Reagan's statement that the final sanctions had been imposed in such a way as not to harm U.S. consumers. As it happens, IBM had in effect a contract with Matsushita to import motherboards during a period when they were ramping up production at their Austin plant.

Mr. Speaker, I do not doubt the sincerity of the Customs Service in making what it considered to be a correct ruling on the Intel request. However, due to the time it took Customs to decide on the matter, the fact that no other companies knew about the pending ruling, the fact that the sanctions were announced during the 18-month pendency of the Intel request, and the fact that the Customs decision was applied retroactively, four major inequities arose from these unique circumstances:

First. U.S. motherboard importers had justifiably based major business decisions on a prior pattern of Customs Service classification treatment, a pattern that was overturned by the Intel decision in contravention of Customs regulations.

Second. U.S. computer companies who were unaware of the Intel request found their imports subjected retroactively to the Customs decision.

Third. Because the Japanese sanctions were imposed during the 18-month pendency of the Intel request, and motherboards were later subjected to the sanctions due to the retroactive Customs decision, a major unjustified cost was imposed on IBM.

Fourth. Intel, has been forced to post duties throughout the 18-month pendency of its clarification request, a substantial inequity for the company.

The first thing my bill would do is to address the inequities caused by this series of events between January 16, 1986, and July 2, 1987. My bill would grant duty relief for all unliquidated motherboard imports during that period. However, the U.S. industry faced other inequities which my bill addresses.

Immediately after the facts of the July 2 decision became known, the Computer and Business Equipment Manufacturers Association and the American Electronics Association immediately requested that the Treasury Department overturn at least the retroactive application of the Intel decision. Treasury, did not agree to overturn retroactive application of the Customs decision. It did so, in part, on the basis of a Court of International Trade Ruling which held that Customs decisions are effective on the date of ruling request. In January 1988, the U.S. Court of Appeals, in the National Corn Growers Association, removed that basis.

One of the questions Treasury agreed to address was whether the July 2 decision by Customs had violated the "established and uniform practice" provisions of Customs regulations. The industry put together the impressive data, to which I have referred above, regarding Customs treatment between 1984 and 1987, but it took Treasury until early December 1987, before it relayed its decision that an "established and uniform practice" had not existed, despite the overwhelming evidence presented by the industry to the contrary.

Several other important things happened during the 6-month period between the July 2 ruling and the end of 1987. One of these was that USTR announced that they were partially suspending the Japanese sanctions, including some of the affected motherboard imports, since the Japanese had halted dumping and third country dumping of semiconductors. Effective November 11, 1987, the only motherboards continuing to be affected by the sanctions were certain high performance boards and those which are used in laptop computers.

Meanwhile, American computer companies considered other business options, including domestic assembly and changing their foreign sources of supply for motherboards. Such decisions are not made lightly, Mr. Speaker. They entail considerable investment of money and other resources. Finding alternate suppliers, for example, is not as simple as walking into a local computer store on the street and buying motherboards. Qualifying new suppliers is a complex and lengthy process, and it took the U.S. companies about 6 months to develop new sources of supply.

Throughout the entire 6-month period, indeed even today, the July 2 decision by Customs has remained in effect. The inequities caused during this period have included:

First. Treasury had based its decision not to grant relief for the original industry request on a court ruling which was subsequently overturned by a higher court in January 1988.

Second. The industry had every right to believe in the correctness of its documented data on the "established and uniform practice" issue.

Third. The Customs decision would affect all motherboard imports during a period when it took time and considerable investment to develop new sources of supply.

H.R. 1869 addresses these inequities as well by making the effective date of the Customs decision January 1, 1988. All unliquidated entries of motherboard imports prior to that date would be liquidated at a zero duty rate, consistent with prior Customs treatment.

Further, H.R. 1869 does not attack the classification substance of the Customs Service decision on the Intel request. Beginning January 1, 1988, the Customs Service decision would go into effect. This bill neither endorses nor challenges the correctness of that deci-

sion—it simply allows the decision to become effective on January 1, 1988. Delaying the effective date in this way is also consistent with the decision of the appelate court in the National Corn Growers Association case. It is the simplest, most straightforward way to grant relief.

Two questions arose last year during the Ways and Means consideration of the identical bill, H.R. 4493. The first question was whether this bill would represent a revenue loss. While it is true that the CBO estimate on the cost of this bill was $33 million, I believe that figure to be wrong. The International Trade Commission has confirmed through the Treasury Department that revenues were not included for this item in its 1987 budget projections. Neither had any of the funds been earmarked for any program.

During the Ways and Means Trade Subcommittee markup, USTR expressed concern that adoption of this bill would harm the integrity of the United States sanctions against Japan, and against the integrity of the sanctions process itself. I disagree strongly with both of these concerns. Regarding the integrity of the current sanctions, USTR has not been able to show any explicit language in the March 31, 1987, Federal Register notice indicating motherboards were intended to be included in a sanctionable category. Neither have they been able to demonstrate that any company other than Intel—which was not affected by the sanctions—was given any notice of the change in classification and the potential for severe impact in their operations. Unless the administration can present evidence on either of these points to the contrary, we should not share this concern about the current sanctions. Further, H.R. 1869 does not overturn those sanctions which remain in place today.

USTR's expressed concern about the integrity of the sanctions process itself arose from their contention that adopting the approach in this bill would create a dangerous precedent for the sanctions process—that it would pave the way for any affected importers to petition for relief once sanctions had been imposed. I believe that concern can be addressed easily through committee report language. I will ensure that the committee report language on this bill clearly documents that this should not be considered a precedential case for avoiding the impact of legitimate and intended sanctions. In addition, should the same bizarre set of circumstances ever recur again, we should grant relief.

Mr. Speaker, H.R. 1869 redresses several of the inequities which I have discussed. According to a recent Computer and Business Equipment Manufactures Association report, the U.S. computer industry contributed $3 billion to the U.S. balance of trade in 1988.

Maintaining equity and consistency in customs treatment is essential to sound business planning. H.R. 1869 simply restores balance and equity to one of this country's most competitive industries.

DETECTING THE FUNDAMENTALS OF THE BUSH ADMINISTRATION FOREIGN POLICY

HON. DOUG BEREUTER

OF NEBRASKA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 16, 1989

Mr. BEREUTER. Mr. Speaker, in recent weeks it has appeared that disarmament, both nuclear and conventional, has been on the fast track. Scarcely a day goes by that some new initiative has not been put forward by the Soviet Union. At times it has appeared that discussions with our friends and allies no longer focus on what is needed to deter the potential Soviet aggression but, rather, on how rapidly the West should respond by dismantling its existing defensive forces.

While there is reason to be pleased at the current thaw in East-West relations, it also is necessary to maintain some perspective. Arms control is not an end in itself. On the contrary, any arms control regime must serve the national security interests of all parties involved. Any reduction of forces, unilateral or collective, must be undertaken with great caution lest we undermine the peace and freedom we all prize so highly.

Thus far, President Bush and Secretary of State James Baker have demonstrated a commendable restraint in responding to Mr. Gorbachev's "peace offensive." While the West Germans have anxiously sought to halt the long-planned modernization of short-range nuclear weapons, the Bush administration has sought to continue the planned modernization so long as it is in the national interest to do so.

Mr. Speaker, a recent editorial in the Omaha World Herald explored the challenges facing the Bush administration in its effort to preserve a strong and united NATO. The World Herald rightly praised the administration, concluding that "the times call for the kind of patient, cooperative approach to foreign policy that the words of Bush and Baker seem to embody." I commend this insightful editorial to my colleagues.

[From the Omaha World Herald, May 13, 1989]

OUTLINES OF A FOREIGN POLICY

U.S.-West German disagreements over the modernization of NATO short-range nuclear weapons provide what some people believe is a glimpse of the future—a Europe that is less NATO-oriented at a time the Soviet bloc becomes less confrontational. That is one of the realities that make developing a foreign policy one of the bigger challenges confronting the administration of George Bush.

More outlines of the Bush foreign policy emerged this week in Moscow, where Secretary of State James Baker met with the Soviet foreign minister, and in College Station, Texas, where Bush made a major foreign policy speech. The administration's approach, with its open skies proposal and the possibility of better trade relations, came off as deliberate and statesmanlike.

Strategic arms talks are on. The Soviets are continuing to promise unilateral cuts of some other types of weapons. And Bush Friday set out the goal of having a friendship that has "no season of suspicion, no chill of distrust."

The U.S. military role in Europe since World War II was founded on sound and farseeing policies that created NATO and the Marshall Plan. It is a tribute to those policies that they were—and continue to be—successful.

The very success of U.S. foreign policy helped create prosperous and powerful competitors of the United States in Western Europe and around the Pacific—countries that are strong enough economically to challenge the United States in some areas, as Japan has done in foreign aid. Now the European Economic Community and Japan are showing signs of wanting to translate their economic power into political power.

West German Chancellor Helmut Kohl, who has brought pressure for U.S.-Soviet talks to eliminate short-range missiles, symbolizes the more independent-minded Free World leaders. Kohl, a longtime conservative ally of the United States, recently dragged his feet on the investigation of West German involvement in providing Libya with facilities for a chemical weapons factory. Now he is straining hard against the U.S. position of modernizing short-range nuclear missiles.

The idea that the Cold War may be ending is popular in West Germany. Some people are even talking about political union with East Germany.

But previous thaws in East-West relations ended after a few years. Although the day may come when NATO is no longer needed and the Soviet presence in Eastern Europe no longer constitutes a threat to the West, it would be premature to say that the day has arrived. The times call for the kind of patient, cooperative approach to foreign policy that the words of Bush and Baker seemed to embody.

RURAL HEALTH CARE

HON. JIM SLATTERY

OF KANSAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 16, 1989

Mr. SLATTERY. Mr. Speaker, I am pleased to speak today about a serious problem affecting access to and delivery of health care in rural America.

People in rural areas pay the same premiums for Medicare as people in urban areas, but the current Medicare reimbursement system unfairly discriminates against rural hospitals.

As a result, many rural hospitals are struggling to stay open and small towns are in jeopardy of losing critical health care services.

Congress must rectify the disparity in the current Medicare reimbursement system. We should remove the rural-urban payment differential and we should provide rural hospitals with the necessary options to allow them to assess their future in a stable environment.

I have introduced H.R. 1270 which would allow small rural hospitals the option to return to cost-based reimbursement. This will provide temporary relief to some hospitals which are in trouble. We should pursue every option possible which will ensure access to quality health care for rural Americans.

THE TIMBER INDUSTRY: IMAGE AND REALITY

HON. AL SWIFT

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 16, 1989

Mr. SWIFT. Mr. Speaker, there is a crisis in the northwest forests. The publicly owned timber is the battleground. The spotted owl is the focus of the dispute, and the combatants are the environmental organizations of America and the small wood products industry of the Northwest.

The issues are enormously complex but, in fact, are easily oversimplified. Representing one of the major areas in which this crisis has emerged I have found that, in all honesty, the environmentalists' or preservationists' side seems to have much easier access to telling its side of the story than has the small industry.

Perhaps that is because in the popular mind it is a battle between environmental protection and huge timber barons. Most of the large private holders—those that have any right to be considered a timber baron—have their own sources of timber and are not as directly affected by the crisis at hand.

On the other hand, those that are affected employ anywhere from a handful to, in a very few instances, as many as 400 employees. They are essentially small companies with very limited access to public relations expertise. I find the view of the industry misunderstood, distorted, and inaccurate.

I recently received a letter from a manager of a mill in my district who, in typically blunt language, said a number of things that need to be heard.

I would like to include a portion in the CONGRESSIONAL RECORD dealing with the image of this industry and of its adversaries on the issues that surround the spotted owl.

The letter is by Mr. Dave Buse of Everett, WA:

The preservationists are portrayed as little persons against the timber barons, timber barons who want to rape the land and move on to new ground. This portrayal is not true. First, the three largest preservationist groups in the nation have combined budgets of $100 million. And, this year, they have targeted the forest products industry with an "ancient forest alliance". Their goal is to put us out of business.

And who are we? They portray our side in black tin hats, caulked boots with snoose cans in our back pockets, our "lawn mowers" mowing through the valleys from the river's edge up the slopes to the mountaintops with no regard for the land. In their view, our only god is the almighty dollar. And, we understand, this year they intend to knock us off. We, the "timber barons". Good riddance.

This is such a mistaken portrayal. Who are we? Our industry is made up of hundreds of thousands of people who have no great wealth, who live on what they earn and who earn that living doing the jobs that are necessary to provide wood products for our nation.

We are the second largest industry in the Pacific Northwest, though we contribute to the prosperity of an entire region of this nation. And yet we are small businesses, largely existing in small communities up the rivers and in the mountains of our country. We have no national base. We have no national membership on which to draw funds. We have no sophisticated public relations capability as do our adversaries.

Yet, how can they feel good about putting over one hundred thousand people out of work, making ghost towns out of thriving little communities, ruining people's retirement and investments in their houses in these towns? How could they feel good about the family disruptions, about the alcoholism, spouse and child abuse, the poverty and the suicides that demonstrably follow the trail of bad times, lost jobs, and destroyed economies?

These, our jobs, have also been our way of life for generations. For some of us, it's all we know or want. This is our chosen life, out and far away from the pollution, hustle, crime, and tension of city life.

All of this could be gone? As we gear up to fight for our very survival, we wonder: How could they feel good about that?

TRIBUTE TO DETECTIVE DAVID MANDRELL

HON. BOB CLEMENT

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 16, 1989

Mr. CLEMENT. Mr. Speaker, I want to take this opportunity to recognize the supreme sacrifice made by law enforcement officers throughout our Nation in the line of duty.

Yesterday we marked the eighth annual observance of the National Peace Officers' Memorial Day service, to honor law enforcement officers who gave their lives in service to their communities and Nation during 1988.

I would like to recognize a detective who lost his life in my home district.

Detective David Mandrell had been employed by the Sumner County, TN Sheriff's Department since February 1, 1977. On June 28, 1988, while working undercover on a cattle rustling investigation, Detective Mandrell was brutally murdered in rural Robertson County, TN.

A dedicated individual, with a true appreciation of life, Detective Mandrell made the supreme sacrifice working to preserve the quality of life for the citizens he served.

Shot down in the line of duty, Detective Mandrell exhibited the courage and dedication shown by police officers each and every day, in cities and small towns throughout our Nation. Too often their deeds go unnoticed, their courage unrecognized and their sacrifice unseen.

Today I want to pay tribute to the heroic men and women who serve as law enforcement officers. And I want to remember a man who gave his life serving his community in an effort to make a difference.

Detective David Mandrell is not here today, but if he were I believe he would encourage each of us to support our law enforcement officers. I believe David Mandrell would also ask us to pause for just a moment the next time we see a police officer—pause for just a moment to tell them—"Thank-you for the job you do."

I am told that Detective Mandrell would have been a little embarassed to be called a hero. But that is exactly what he is, an American hero. So are the thousands and thousands of men and women who serve and protect us each day. And on that point I am told Detective Mandrell would be in complete agreement.

I was honored to attend the National Police Officers' Memorial Day service. David Mandrell was one of the slain officers who was honored. His wife Carolyn and daughters Jill and Jan were there. So was the spirit of Detective Mandrell and his comrades who made the supreme sacrifice for the communities and Nation they served.

No words I write can replace husbands and fathers or fill the void in the hearts of loved ones left behind. But, I do hope my words can inspire others to appreciate the role brave law enforcement officers play in all of our lives.

Officer Mandrell, I salute you.

A TRIBUTE TO PEEKSKILL COMMUNITY HOSPITAL: 100 YEARS OF SERVICE

HON. HAMILTON FISH, JR.

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 16, 1989

Mr. FISH. Mr. Speaker, I take this opportunity to honor the Peekskill Community Hospital, which, on Saturday, May 20 celebrates its 100th anniversary with a centennial rededication ceremony marking its years of service to the community.

Peekskill Community Hospital has compiled an enviable record of achievement as it approaches its second century of caring. Since its founding in 1889 by a group of women concerned with the welfare of the community, the "Helping Hand Hospital," as it was first known, operated for 77 years on Lower South Street, near the Peekskill Railroad Station. The hospital cared for early farmers, men on the railroad, waterfront laborers, ironworkers, stone masons, and immigrants from all nationalities who settled in the Mid-Hudson Valley River town.

The hospital moved in 1966 to its present address in a new facility at 1980 Crompond Road, boasting a certified bed capacity of 114, an intensive care and a maternity unit, an emergency suite, three operating rooms, modern radiology and laboratory departments, and a cheerful coffee and gift shop for visitors. Today, the hospital is staffed by 175 physicians, 570 employees and an auxiliary whose members total over 500. Governed by the board of directors, the hospital provides outstanding care in its mission to the community, remaining open 24-hours-a-day, with excellent medical care minutes from home.

In 1978, the addition of a new pavilion offered space for the emergency room, the radiology department, and the intensive care unit. During the past decade capital improvements focused on the acquisition of medical equipment integrating the excellence of the medical staff with the latest state-of-the-art technology.

As the hospital completes its modernization program on the anniversary of its centennial year, new targets and goals for renovation are being set. Confronted with the rapid population expansion in northen Westchester and Putnam counties, Peekskill Community Hospital faces the challenge of providing expert medical care to an increasingly sophisticated patient market. Emergency visits have grown to 22,397 in 1987, from 16,372, 15 years ago, a 38-percent increase. Diagnostic imaging, including mammography, and cardiopulmonary procedures have doubled in the last 5 years. Five hundred babies were born in the Peekskill Hospital maternity department in 1987.

This challenge, too, will be met, as have the many challenges during the first 100 years of the hospital's existence. We all are dedicated to the continued success of this outstanding community institution. Accordingly, on this occasion of the Perkskill Community Hospital centennial, I take this opportunity to commend this splendid community institution for its record of accomplishment and devoted service. As the hospital enters its second century of caring, all of us extend our best wishes for continued prosperity and the completion of its great mission of providing medical care to the community.

A SALUTE TO OUR ARMED FORCES, ARMED FORCES WEEK 1989, ARMY DAYS 1989

HON. BARBARA BOXER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 16, 1989

Mrs. BOXER. Mr. Speaker, Armed Forces Week 1989 is being celebrated in the San Francisco Bay area May 16 through 21 with band concerts, parades, opening ceremonies at an Oakland A's game and support of the "Bay to Breakers" race.

These festivities are designed to keep our basic surrounding communities aware of the importance of a defense and an understanding of the need for mutual support between the various military communities and the civilian community.

This celebration acknowledges the contributions of the Army, Navy, Air Force, Marines, and Coast Guard and their historic connections with the citizens of the San Francisco area.

On June 3 and June 4, Army Days 1989 will be celebrated by the 6th U.S. Army. It is designed to provide the public with an opportunity to become better acquainted with its Army. Headquartered at the Presidio of San Francisco, the 6th Army has supported the citizens of the Bay area in times of war and peace. Army days focuses on the theme "When we were needed, we were there."

I salute the men and women of our Armed Forces for their devotion to the services of their country. I urge citizens of the San Francisco Bay area to take advantage of this opportunity to know more about our Armed Forces and to honor the men and women who serve their country by participation in these celebrations.

THE ROLE OF THE U.S. EMBASSY IN THE BAHAMAS IN INTERNATIONAL NARCOTICS CONTROL

HON. MERVYN M. DYMALLY

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 16, 1989

Mr. DYMALLY. Mr. Speaker, as a result of a recent visit to the Bahamas, I had submitted a report to the Secretary of State and the chairman of the Foreign Affairs Committee on "The Role of the U.S. Embassy in the Bahamas in International Narcotics Control".

Because of its importance, however, I now deem it timely and appropriate to bring these findings and observations to the immediate attention of my colleagues:

THE ROLE OF THE U.S. EMBASSY IN THE BAHAMAS IN INTERNATIONAL NARCOTICS CONTROL

(By Hon. Mervyn M. Dymally of California)

The Staff Director of the Subcommittee on International Operations of the Foreign Affairs Committee and I visited the Bahamas on April 27 through April 30, 1989. As a consequence, the following observations were made about the role of the U.S. Embassy there in international narcotics control:

1. The Caribbean and particularly the Bahamas is a popular transhipment point for illegal drugs destined for the United States. Any significant curb, therefore, in this activity must place emphasis on appropriate controls in and around the Bahamas. Air transportation is becoming the favorite form of drug transportation.

2. The State Department, the Department of Defense, the U.S. Coast Guard, and the U.S. Drug Enforcement Administration operate in conjunction with Bahamian authorities and resources in programs and activities of interdiction.

3. It is, however, extremely difficult to enforce the law against drug trafficking. There are 700 islands, with only 29 of them inhabited and more than 2,000 cays and dry rocks scattered over 100,000 square miles that constitute the Bahamas. It is difficult to devise plans for the effective surveillance of so many scattered and isolated islands and islets with airstrips conveniently located for planes with drugs to land and unload drug cargoes. The 750 members of the Bahamian Defense Force (RBDF) and the 1,600 members of the police force are forced to patrol and control 73 private and public airstrips and 110 small boat marinas. Increasingly, drug traffickers are air-dropping drug shipments to vessels at sea thereby increasing law enforcement difficulties.

4. As a result of joint U.S.-Bahamian interdiction operations in the Bahamas in 1988, 10.7 metric tons of cocaine, 13.25 metric tons of marijuana, 20 aircraft, 9 vessels and 17 weapons were seized.

5. Additionally, joint undercover narcotics investigations have been conducted by U.S. and Bahamian enforcement agencies.

6. There is great need for the ratification of the Mutual Legal Assistance Treaty (MLAT) by the U.S. Senate. This will remove one of the very important obstacles to future investigations and prosecutions. This failure to ratify the treaty has further reinforced the belief on the part of some Bahamian officials that the U.S. is not really serious about the drug war.

7. In spite of the above, however, cooperative investigations have led to the arrest, trial, conviction and punishment of several persons.

8. Accusations have been made about the very slow pace of the criminal justice system in the Bahamas with the implication that Bahamian officials are harboring and protecting drug criminals.

9. It is of significance that the Bahamas has the third oldest parliamentary tradition in the British Commonwealth. The system of jurisprudence in the Bahamas is based upon that of the United Kingdom and not that of the United States. This system can be traced back to Magna Carta and English Common Law with no grand jury system but with an institutionalized and formalized process of appeal including that to the Privy Council. The whole process therefore, is seemingly more deliberative than that of the United States. This is not normally understood by decision makers in the U.S. The attempts to have Nigel Bowe extradited is a case in point.

10. Quite contrary to the perception of many in the United States, including some U.S. Congressmen, the Bahamian Government has taken the position that it spends more on narcotics enforcement per capita and shoulders a disproportionate share of the burden than does the United States.

11. There is an additional perception of lukewarm responses on the part of the U.S. Government about the reception of specified proposals on the part of the Bahamian Government for joint U.S.-Bahamian interdicting strategy.

12. The Bahamas is not, because of its per capita income, eligible to receive aid from USAID or any other foreign assistance agency of the United States. It should be noted, however, that this income is skewed and is far from being equitably distributed. There are, as a consequence, pockets of poverty throughout these islands. The Bahamas, therefore, is in need of significant assistance in resources from the United States in order to fight the drug war effectively. This lack of resources has hampered the efforts of the Bahamian Government in developing a national drug information/intelligence coordination center. Additional aid will enable the Bahamian Government to be more actively involved in facilitating the solution of the drug problem. The Bahamian Government seemingly wants to play its own role and not have the United States play it for them.

13. It is of particular significance that in February of 1989, the Government of the Bahamas and the Government of the United States signed a bilateral agreement on the control of narcotic drugs and psychotropic substances. On that occasion, U.S. Ambassador Carol Boyd Hallet indicated that the Bahamas had demonstrated an "unusually fine level of cooperation" and that no other country in the world does as much as the Bahamas in cooperative efforts to stop drug traffickers. A press release issued by the U.S. Embassy in Nassau on March 22, 1989 indicated that the Government of the Bahamas is anything but "duplicitous in the forthright manner in which it has consistently, positively and productively cooperated in anti-narcotics programs. Cooperation between the Government of the United States and the Government of the Commonwealth of the Bahamas on narcotics matters is excellent. The range of joint operations, undercover investigations, and other cooperative efforts is unparalleled."

14. On April 26, 1989, a number of persons, including three non-Bahamians, were arrested and 1190 pounds of cocaine seized by the Bahamian police at Governor's Harbour, Eleuthera. This incident revived interest in a negative perception thought to be current among some U.S. Congressmen who claim that all drug seizures were made by joint efforts and that no marijuana or cocaine was seized by Bahamian law officers on their own initiative. On the contrary, Mr. Paul Adderley, Minister of National Security, indicated that the incident was by no means atypical of the self-initiative of the Bahamian police in drug law enforcement. Mr. Adderley additionally stated that in 1987, of the 22,380 pounds of cocaine seized in the Bahamas, 11,982 pounds were seized by Bahamian law officers acting unilaterally. In 1988, of the 20,557 pounds of cocaine seized, 6,177 pounds were seized as a direct result of Bahamian action and 14,379 pounds by various forms of joint actions. Already, from January 1, 1989, to March 31, 1989, 4,217 pounds of cocaine have been seized, including 1,818 pounds seized by Bahamian police. This difference between perception and reality could have a significant impact on the role of the U.S. Congress in the process of certification as it affects the Bahamas.

NATIONAL POLICE WEEK: A SALUTE TO THE NATION'S HEROES

HON. SHERWOOD L. BOEHLERT

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 16, 1989

Mr. BOEHLERT. Mr. Speaker, "heroes"—in this day and age, it seems to be a word that has almost been forgotten. Turn on the evening news, high crime and drug violence seem to be taking the life from our towns and cities. Our heroes have rode off into the sunset. But, as so often it is, what you need most, is usually right under your nose. Just go downtown to your average community and there's your hero—out patrolling the beat—the police officer.

Mr. Speaker, May 14 to 20, 1989, is National Police Week, time we set aside each year to demonstrate our support for the approximately 500,000 law enforcement officers who risk their lives every hour of every day for our protection.

The life of a Congressman may be considered by some to be a high pressure job. But when I consider all the weight we place on each and every individual who serves in the police ranks, frankly I'm amazed. Every single minute of the day, police men and women are out there protecting our lives and our possessions from those that wish to do us harm. With all the responsibility we place on those brave individuals, it's a sad fact, that not until we are threatened does their work receive notice. I guess Joe Friday said it best, "It comes with the territory."

Our law officers deserve this week of recognition and our support—now more than ever.

I rise today, not only to bring attention to the efforts of law enforcement personnel, but to applaud the efforts underway to build the National Law Enforcement Officers Memorial. The memorial, created by a unanimous act of Congress, will serve as a constant reminder to the sacrifices that law enforcement personnel make every day to protect our welfare. Located in Washington, DC, the memorial is scheduled to be dedicated in the fall of 1989.

Judiciary Square, a prominent federally owned park in the Nation's Capital, has been selected and approved as the site for the memorial. The design will include the name of officers killed in the line of duty. It's a small tribute to the selfless and dedicated service they have provided to the Nation.

I commend the efforts going on during National Police Week and the construction of the National Police Officers Memorial. To those men and women who serve in the ranks as police officers, I salute your pride and dedication. The example you set is truly what the word "hero" is all about.

PRESIDENT BUSH'S ANTI-CRIME PROPOSALS

HON. LAWRENCE COUGHLIN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 16, 1989

Mr. COUGHLIN. Mr. Speaker, as vice-chairman of the Select Committee on Narcotics Abuse and Control, I want to congratulate President Bush on his anticrime proposals presented yesterday.

In the words of the President, he is seeking new law to punish criminals, new agents to arrest them, new prosecutors to convict them and new prisons to hold them.

The President called for minimum 10-year sentences for crimes involving firearms, curtailing plea bargains on gun charges, and the death penalty for murder for hire.

The President called for 300 new FBI agents, 150 new U.S. marshals and 375 new agents of the Bureau of Alcohol, Tobacco and Firearms.

To prosecute criminals, he called for an increase in funds to support 1,600 more positions in U.S. Attorneys offices. To hold those convicted, he called for 24,000 new Federal prison spaces.

The President has taken the lead in proposing a dramatic new program to combat crime.

Consistent with this and with suggestions of Director Bennett of the Office of National Drug Control Policy, Chairman RANGEL of the Select Narcotics Committee and I are today introducing legislation providing for the development of alternative incarceration for nonviolent offenders.

This legislation both helps to provide the additional spaces needed for incarceration and helps to relieve the pressure on overcrowded facilities for violent offenders. Placing nonviolent offenders in alternative sites with counseling and training can help reduce the incidence of repeat offenders and relieve our overcrowded prison system.

I commend to my colleagues both President Bush's program and our compatible legislation for alternative incarceration.

SECURITY DEPOSIT LOAN FUNDS LEND A HELPING HAND TO HOMELESS AND LOW-INCOME FAMILIES

HON. RON WYDEN

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 16, 1989

Mr. WYDEN. Mr. Speaker, as more is learned about the homeless, experts have found that many homeless people have jobs, with good prospects to afford modest rents, but they can never save enough money to pay for the required security deposits on rental housing. Meanwhile, these working people—many with families—are forced to scramble for shelter, reduced to living in their cars or tents in modern-day "Hoovervilles."

It is our national shame that working families should be so stripped of their dignity and the chance to provide decent homes for themselves. But we can begin to turn this crisis around with just a modest investment in self-sufficiency, by helping these families with loans for the small amounts of cash they need to get themselves back on their feet and into a better place to live.

Today I am introducing legislation which will establish locally administered security deposit loan funds to help low and moderate income tenants pay for rental security and utility deposits.

Here's how the security deposit loan funds will work: Local community agencies will be provided with the needed capital to establish the funds on a demonstration basis. These agencies will use the money to make no- or low-interest loans to eligible borrowers.

By keeping the loan fund administration at the local level, the program will be flexible enough to encourage versatility and experimentation with what program design works best in the community. While not intended to be profitable, administering agencies will be encouraged to keep losses at a minimum.

The legislation does provide some guidelines, however, to ensure successful lender-borrower relationships. First, borrowers will have to show an ability to meet monthly rental payments. Second, they will have to prove that they can save from their income, by providing at least 20 percent of the total security deposit from their own funds. Finally, loan administrators will have to offer financial counseling to the loan recipients.

There are successful models for this type of approach. Security deposit loan funds have been established in Reno, NV, and in Keene, NH. These groups have been successful at assisting families to obtain rental housing. There are few outright defaults. And borrowers have been able to find decent, permanent housing that they can afford.

There's no doubt that the shortage of low-cost housing has led to an increase in homelessness among the working poor, and in the number of people living in substandard housing. The problem is worsened by the high security deposits, often equal to two months' rent in advance, required by many landlords.

In addition to security deposits, potential tenants often have to pay deposits to utility

companies. Together, these two forms of deposits serve as "barriers to entry" to affordable housing. These barriers are too difficult for many families to overcome when they are struggling just to meet current expenses and day-to-day needs.

Removing these barriers would benefit both the tenants and the communities in which they live. The tenant's family could move from its current living situation—be it a shelter, transitional housing, or substandard housing—into a better environment. The community benefits because homeless families are moved from temporary shelters into permanent housing, thereby freeing up more shelter space for the needy.

There is a precedent in Federal policy for removing barriers to entry in housing. After all, the FHA and VA insurance programs basically remove the down-payment barriers on home purchases for middle-income households. The security deposit loan fund which I am proposing simply removes the barriers to renting for low-income households.

For many people faced with a housing crisis, this approach is far more appropriate and cost effective than the types of assistance provided by homeless shelters and transitional housing programs. In lending a hand with a small cash loan, we'd be restoring their sense of dignity by showing our faith in their ability to make better lives for themselves.

I urge my colleagues to support this legislation, which gives low-income families the same opportunities we offer to middle-income families—some lending assistance to help them to improve their living standards as they strive to achieve the American dream.

PROPER TAX TREATMENT FOR CAPITAL GAINS DERIVED FROM FARMER COOPERATIVE ASSET SALES

HON. BYRON L. DORGAN

OF NORTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 16, 1989

Mr. DORGAN of North Dakota. Mr. Speaker, today, 49 House Members join me in introducing legislation to allow nonexempt farmer cooperatives to elect patronage-sourced treatment for certain gains or losses.

In recent years, there have been an increasing number of disputes between some farmer cooperatives and the Internal Revenue Service over the proper Federal income treatment of gain or loss resulting from the sale of assets used by cooperatives in their patronage operations. The issue in controversy is whether gains or losses from such dispositions should be considered to be derived from patronage or nonpatronage sources. This distinction is important because gain from patronage sources is eligible to be distributed to patrons as a patronage dividend which is deductible to a cooperative—and taxable to the patron.

Over the years, agricultural cooperatives have taken different approaches toward the classification of the gain or loss from the sale of assets from a patronage operation. Some cooperatives, relying on a general standard adopted by the Internal Revenue Service and the courts, have treated this gain or loss as patronage sourced on the ground that the assets sold actually facilitated the marketing, purchasing or service activities of the cooperatives. Other cooperatives, have treated the gain or loss from the sale of assets used in the patronage operation as nonpatronage sourced in reliance of an example found in Treasury regulation section 1.1382-3(c)(2) and the IRS's current administrative position that capital gains—or gains treated as capital gains under I.R.C. section 1231—are automatically nonpatronage sourced.

Cooperatives that have treated the gain or loss as patronaged sourced on the basis that such assets actually facilitated the marketing, purchasing, or service activities of the cooperatives have faced repeated challenges from the IRS, notwithstanding that our courts have consistently applied an actually facilitates test to distinguish patronage versus nonpatronage income.

This legislation is intended to provide cooperatives with a mechanism for avoiding the uncertainties that exist in this area. In general, cooperative would be permitted to elect ordinary patronage sourced treatment for its gain or loss realized upon disposition of any asset, provided that the asset was used by the organization to facilitiate the conduct of business with or for its patrons.

I ask you to join us as a cosponsor of this bill to assist our rural cooperatives.

A summary and the text of the bill follows:

SECTION-BY-SECTION ANALYSIS

Paragraph 1. *In General.* Cooperatives may elect patronage sourced treatment for gain or loss from the sale or other disposition of any asset, provided that the asset in question was used by the organization to facilitate the conduct of business done with or for patrons. The election would apply to all assets including depreciable section 1231 assets as well as stock or any other ownership or financial interest in another entity. Under the election, the gain or loss resulting from the asset sale would be treated as ordinary.

Paragraph 2. *Allocation.* Where an asset has been used for both patronage and nonpatronage purposes, the election to treat gain or loss from the sale of that asset as patronage sourced applies only to the amount of the gain or loss allocable to the patronage use. A cooperative may use any reasonable method for making allocations of income or expenses between patronage and nonpatronage operations.

Paragraph 3. *Period of Election.* The statutory election would be available generally with respect to taxable years beginning after 1988 and, unless revoked by the cooperative, for all taxable years subsequent to the first taxable year for which the election is made. An election which is made with respect to a taxable year beginning before 1990 would, if the election so provided apply also to prior taxable years of the electing cooperative. An electing cooperative can at any time revoke its election effective for taxable years beginning after the date on which the revocation notice was duly filed with the IRS.

Paragraph 4. *Election After Revocation.* If the cooperative revokes the election, it must wait at least three taxable years before making another election.

Paragraph 5. *No Inference.* No inference will be drawn from the legislation regarding the proper application of existing law relating to the classification of income or loss from asset dispositions by nonelecting cooperatives.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) section 1388 of the Internal Revenue Code of 1986 is amended by adding at the end thereof the following new subsection:

"(k) TREATMENT OF GAINS OR LOSSES ON THE DISPOSITION OF CERTAIN ASSETS.—For purposes of this title, in the case of any organization to which part I of this subchapter applies—

"(1) IN GENERAL.—An organization may elect to treat gain or loss from the sale or other disposition of any asset (including stock or any other ownership or financial interest in another entity) as ordinary income or loss and to include such gain or loss in net earnings of the organization from business done with or for patrons, if such asset was used by the organization to facilitate the conduct of business done with or for patrons.

"(2) ALLOCATION.—An election under paragraph (1) shall not apply to gain or loss on the sale or other disposition of any asset to the extent that such asset was used for purposes other than to facilitate the conduct of business done with or for patrons. For purposes of this paragraph, the extent of such use may be determined on the basis of any reasonable method for making allocations of income or expense between patronage and nonpatronage operations.

"(3) PERIODS OF ELECTION.—An election under paragraph (1) shall apply to the taxable year for which made and all subsequent taxable years unless revoked by the organization. Any such revocation shall be effective for taxable years beginning after the date on which notice of the revocation is filed with the Secretary.

"(4) ELECTION AFTER REVOCATION.—If an organization has made an election under paragraph (1) and such election has been revoked under paragraph (2), such organization shall not be eligible to make an election under paragraph (1) for any taxable year before its 3rd taxable year which begins after the 1st taxable year for which such revocation is effective, unless the Secretary consents to such election.

"(5) NO INFERENCE.—Nothing in this subsection shall be construed to infer that a change in the law is intended for organizations not having in effect an election under paragraph (1). Any gain or loss from the sale or other disposition of any asset by such organization shall be treated as if this subsection had not been enacted."

"(b)(1) Except as provided in paragraph (2), the amendment made by subsection (a) shall apply to taxable years beginning after December 31, 1988.

"(2) If the organization makes an election under section 1388(k)(1) of the Internal Revenue Code of 1986 (as added by subsection (a)) with its return for a taxable year beginning before January 1, 1990, and such election provides that such organization elects to take the benefits of this paragraph, the amendment made by subsection (a) shall also apply to all taxable years beginning before January 1, 1990, and the election under such section 1388(k)(1) shall also be effective for all such taxable years.

TRIBUTE TO NATHANIEL CLIFFORD JONES, JR.

HON. HENRY J. NOWAK

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 16, 1989

Mr. NOWAK. Mr. Speaker, I would like to take this opportunity to express the sorrow and sense of loss which we in western New York have experienced following the tragic death of Nathaniel Clifford Jones, Jr., a seaman apprentice who served on the U.S.S. *Iowa*. He was one of the 47 men who lost their lives on April 19 when an accident occurred in one of the ship's massive gun turrets.

In tribute to this young man, I would like to insert the following news article which appeared in the Buffalo News on April 27. Also included is an obituary from the memorial service.

On behalf of my fellow citizens in western New York, I also would like to extend our condolences to the family of Nathaniel Clifford Jones, Jr. We grieve with them.

MOURNERS BID FAREWELL TO VICTIM OF "IOWA" BLAST

(By Gene Warner)

They called him Junie, short for Junior. And above all else, they remember the smile on his face and his ability to make others laugh.

Whether he was in the halls of Lackawanna High School, on the football field, serving as a day-camp counselor at Friendship House or spending time with his family, Nathaniel C. Jones Jr. always did his best to keep things loose, to leave others with smiles on their faces.

"I've known Junie practically all his life," said Barbara Fears, a youth services director at Friendship House in Lackawanna, "Junie was such a personable and likable young man. When he came up to you when you were feeling a little depressed, he would always say something comical and make you feel better."

That's the Nathaniel Jones that others remembered today, the day friends and family honored him during funeral services in Mount Olive Baptist Church, 72 Wasson Ave., Lackawanna, before burial in Arlington (Va.) National Cemetery.

Jones, 21, was the lone Western New Yorker, one of 47 Americans, killed last week in the explosion aboard the USS *Iowa*.

William Bilowus, now the high school principal in Lackawanna, remembered having to chase Jones from the school's hallways more than a few times.

"I always remember that face," Bilowus said. "He was such a good-natured kid. No matter what you said to him, he always had a smile on his face, and he was always respectful. He always said, 'Yes, sir or 'No, sir.' "

As a seaman apprentice, Jones was proud to wear the Navy uniform.

Last Christmas, when he came home for the last time to visit family and friends, Jones, in full uniform, walked into the school's physical education office to say hello to Bill Pukalo, his former football coach.

"Mr. P.," he said, with a smile. "I'm going to take care of you. I'm going to give you an Iowa hat. This is the biggest and baddest ship in the Navy."

"He was really enthused about the Navy," Pukalo recalled Wednesday. "I think it was an ideal thing for him. It was the right direction for him. I think the discipline helped him."

Jones, No. 71, was a second-string defensive end and special-teams player on the talented Lackawanna football team that went to the Rich Stadium sectional playoffs in 1985.

Not the most gifted player, Jones was great at keeping his teammates loose and getting them going, whenever they were uptight or things were't going well for the team, the coach said.

Although he wasn't a football star or a great student, Jones got along well with authority figures. And he wasn't shy about lobbying for what he wanted.

"Hey, coach, you know I had a good practice today," he often told Pukalo. "I think I ought to be in the lineup this week.

After a couple of years as a junior counselor at the Friendship House summer camp, he made sure Ms. Fears knew about his goals for the next summer: "Miss Fears, you know I'm a little more mature now," he told her. "Are you going to pick me as a senior counselor this year?"

She did, and it proved to be a wise choice, as he worked well with the younger kids and always took the initiative in keeping them active.

"If I needed somebody to do something, I could always count on Junie," Ms. Fears said. "I don't recall anybody ever getting mad at him. If he was around, he'd have you laughing."

Like Coach Pukalo, Ms. Fears noticed a difference in Jones when he came home last Christmas.

"Junie, the service must have done something good for you, because you seem a lot more mature," she told him.

He laughed, as always, and said it was true.

"He just liked to keep you laughing," said his godmother, Eula Royster. "He was a center of attention. He never wanted to be sad. He always wanted everything to be jolly."

That's how everybody's trying to remember Jones today, as his family and friends deal with the loss.

Wednesday, as students and staff members at Lackawanna High School observed a moment of silence in Jones' memory, Bilowus told them:

"His name and his smiling face will be remembered in the halls of Lackawanna High School for a long time."

OBITUARY

Nathaniel Clifford Jones Jr. was born to Nathaniel C. Jones and Georgian Wright on 10 August 1967 in the City of Lackawanna, New York.

He confessed to Christ at an early age and was baptized at St. Mark's A.M.E. Zion Church, in the City of Lackawanna, New York, under the pastorship of Reverend Rudolph L. Wells. At the age of seven, he came under the love and tutelege of his stepfather, Lawrence J. Davis.

Nathaniel (Juney) attended public schools in Lackawanna and in Buffalo, New York. He was a sports enthusiast and a swimmer for Bennett High School, then transferred to Lackawanna High School, where he was a member of their varsity football team in 1985 and 1986. He graduated from Lackawanna High School in June 1987.

Nathaniel's other activities included scouting and fishing. As one of three children, Nathaniel is remembered as a friendly, happy person, who adored his mother, constantly teased his sisters, and who would brave any weather elements to visit his grandparents.

In July 1988, Nathaniel fulfilled his dream by enlisting in the Navy. He was proud to have joined six other family members into the Armed Forces as sailors. After Basic and Advanced training, he was assigned as a crew member of the USS *Iowa* (BB-61).

On 19 April 1989, God held muster on board the USS *Iowa* (BB-61). Nathaniel Jr. and forty-six of his shipmates answered, "Here Sir" and were called home to serve duty with God.

He is survived by his mother: Georgian Davis; father: Nathaniel Jones Sr., Stepfather: Lawrence J. Davis, three sisters: Rhoda James, Natalie Jones, and Lauren J. Davis; maternal grandmother: Bernice Wright of Lackawanna, NY; paternal grandparents: William and Cora Jones of Buffalo, NY; Godparents: Mr. and Mrs. James Royster of Buffalo, NY; four great aunts, two great uncles, seven uncles, and a host of other relatives and friends.

SALUTE TO "WILLIE" AND LILLIAN SHAPIRO FOR THEIR GREAT SERVICE TO CONGREGATION ADAS ISRAEL OF PASSAIC, NJ

HON. ROBERT A. ROE

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 16, 1989

Mr. ROE. Mr. Speaker, it is with the greatest pride and admiration that I rise today to salute two outstanding spiritual and civic leaders from my Eighth Congressional District in New Jersey whose dedicated and tireless efforts on behalf of their synagogue and their community have touched countless numbers of people in the greater northern New Jersey area.

I am speaking of William "Willie" Shapiro, executive director of Adas Israel Synagogue of Passaic, NJ, for the past 23 years, and his devoted wife, Lillian. For their many years of outstanding service to their synagogue Adas Israel and to their community, Willie and Lillian Shapiro will be the focus of a special tribute to be held Sunday, May 21, 1989, at Congregation Adas Israel.

Mr. Speaker, I am certain this event will be a great source of pride to rabbi emeritus, Dr. Leon Katz; to Rabbi Dr. Solomon F. Rybak, and to tribute chairman Dr. Ivan Nelson, who has been leading the vigorous effort to make this event a great success. I know, too, that no one will be more proud than William and Lillian's lovely family; their daughters, Beverly Ontell and Deina Shapiro; their son-in-law, Marc Ontell; their two lovely granddaughters, Nicole and Shari Ontell, and Willie's two devoted brothers, Abe and Irving Shapiro.

William Shapiro came to Passaic from Russo-Poland in May 1925 with his widowed mother, Anna, and her new husband, Joseph Shapiro. He grew up in Passaic, attending local schools and eventually graduating Passaic High School. His deep involvement with the Jewish community in Passaic goes back nearly a half century to 1940 when he was

elected financial secretary of Congregation Chevra Thilim, at that time one of the most prestigious Orthodox congregations in Passaic.

Eight years later, at the time of the establishment of the State of Israel, William Shapiro, through his dedicated efforts, was instrumental in the founding of the Keyman Organization, which raised funds for the United Jewish Campaign of the Jewish Community Council, the predecessor of the current Jewish Federation. In October 1950, William Shapiro married Lillian Klugerman, of Brooklyn, NY.

Mr. Speaker, it was in 1966 that William Shapiro was appointed executive director of Congregation Adas Israel, and he has been working with selfless dedication ever since to assure the well-being of this outstanding house of worship and its devoted congregation. At the same time, he continues to be deeply involved in other organizations, serving as secretary for Congregation Chevra Thilim, the Passaic-Clifton chapter of Mizrachi, the Vaad Hakohol of Passaic Clifton and the Passaic Hebrew Independent Benevolent Association, of which he is past president. In addition, he is a member of the National Board of Mizrachi and belongs to B'nai B'rith, Beth Israel Hospital in Passaic and the Daughters of Miriam in Clifton.

While her husband was dedicating himself to these many endeavors, Lillian Shapiro was establishing her own proud record of accomplishments. She is past president of the Adas Israel Sisterhood and serves as the organization's financial secretary. She is also a member of the Yeshiva University Woman's Organization, the Simon Wiesenthal Center, Shaare Zedek Hospital in Jerusalem, and American Red Magen David for Israel. She also served as treasurer of the Hillel Academy PTA for many years.

Mr. Speaker, the great work done by William and Lillian Shapiro has brought them recognition on many occasions. William was honored by Congregation Chevra Thilim in 1959, by Mizrachi-Hapoel Hamizrachi of Passaic-Clifton in 1963, by Yeshiva University in 1964 and again in 1985, by Bonds for Israel, the Jewish National Fund and by the local chapter of the National Conference of Synagogue Youth. William Shapiro also received the Hillel Academy Adopt a Scholar Award in 1976, and Lillian Shapiro received the same award in 1984. Together, William and Lillian Shapiro received the Tomchay Torah Award from Hillel Academy at its 1987 Melava Malka.

But William and Lillian Shapiro have not only earned awards. More importantly, they have earned the love, admiration and respect of the countless numbers of people whose lives they have touched for the past four decades. And so, Mr. Speaker, it is with this sense of admiration that I invite you and our colleagues to join me in paying tribute to two great spiritual and community leaders and outstanding human beings who have made their community, State and Nation a better place to live, William Shapiro executive director of Congregation Adas Israel of Passaic, NJ, and his devoted wife, Lillian Shapiro.

SOCIAL SECURITY PROCEDURAL IMPROVEMENT ACT OF 1989

HON. BILL ARCHER

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 16, 1989

Mr. ARCHER. Mr. Speaker, today I am introducing H.R. 2349, the Social Security Procedural Improvements Act of 1989, a bill I have introduced in the past two Congresses. It is apparent that the Social Security appeals process needs to be streamlined in order to make it more responsive to the public and to ensure greater uniformity in a national program.

Essentially this is the same bill I introduced in 1987. I am pleased to report that one provision—requiring "interim payments" for certain cases pending more than 90 days at the Appeals Council—has been deleted. I am pleased because my provision to pay certain cases, which had been allowed by an administrative law judge and subsequently were selected for review by the Secretary, became law on November 10, 1988, as part of Public Law 100–647. I anticipate that few payments actually will be made, because I expect that management will focus more attention to ensure these reviews are done in a timely fashion.

I am convinced that the three main provisions of this bill are still necessary. Those three provisions would: First, liberalize the criteria under which the Secretary of Health and Human Services could federalize State agencies which make disability determinations for Social Security; Second, eliminate the Appeals Council and the review performed by it; and third, create a Social Security Court, a proposal first advanced by my colleague JAKE PICKLE.

When I introduced this bill in 1987, I described in some detail why the issue of "acquiescence" was central to the issue of a Social Security Court. In brief, "acquiescence" requires that the Secretary of HHS accept an appeals court decision within that circuit as a precedent—unless, of course, the Secretary is successful in appealing the decision. Those who advocated acquiescence during the development of the 1984 disabiliity amendments were concerned about the need for subsequent plaintiffs to relitigate the same issue within a circuit, because the Secretary had not accepted the initial decision as a precedent. This was a justifiable concern, certainly in view of the numbers of pending disability cases. Nevertheless, at that time I warned of the implications for the retirement and survivor programs.

I'd like to provide an update on the types of acquiescence rulings I described in my remarks in 1987. Since January 1988, the Secretary of Health and Human Services acquiesced in just over a half-dozen cases. Only two of the seven cases involved disability issues, continuing the trend I noted in 1987. At that time only 5 of 26 acquiescence rulings involved disability issues. Two of the current seven cases involved the SSI Program, and another the handling of the offset provisions in the case of dual entitlement to titles II and XVI benefits.

The most significant aspect of these acquiescence rulings, in my view, is that the Secretary limited acquiescence to the specific circuit in six of the seven cases. For SSI purposes, for example, that means that the definition of inmate of a public institution will differ in the eighth circuit from all others. Adding to the problem, the seven States in the eighth circuit belong in four different regions of the Social Security Administration, specifically, Kansas City, Denver, Chicago, and Dallas. The staff in those offices, who perform the quality review function, may be challenged to remember that a differing standard applies to those fragmented cases.

Substantively, I found the most egregious Appeals Court ruling to be that of the seventh circuit in McDonald versus Bowen. The issue did involve disability, but was not one I had ever viewed as involving the level of subjectivity or judgment which invites court reviews. The law clearly requires that a disability last or be expected to last at least 12 months. Ida McDonald returned to work in the seventh month before her application had been approved. The circuit order found her eligibile for a trial work period. In my view, the clear intent of the law is to grant a trial work period only to those who met the 12 months test, or are expected to meet that test when the case is allowed. Neither expectation was apparent in this case, and the court circumvented the obvious durational requirement of the law.

I remain convinced that a Social Security Court would bring a refreshing level of expertise to these cases and re-establish national uniformity in a program which is developing untenable, unadministerable fusions.

At the end of fiscal 1988, the Social Security Administration still had some 50,000 pending court cases. I fear the further fragmentation of basic evidentiary requirements in the Social Security system. It is for these reasons that I urge my colleagues to consider the merits of a Social Security Court. In this context, the bill further provides that all appeals from this court would be channeled to the U.S. Court of Appeals for the Federal Circuit, again eliminating the potential for multiple and contradictory court decisions on a variety of highly technical program issues. I think it is important to note that the intent of this provision is not so much to stifle legal interpretation of statutory and regulatory requirements as to quantify those interpretations, so that the issues and costs can be resolved more speedily by the administration and Congress. The bill contains an adequate transitional period and mechanism to process pipeline cases, so those applicants caught in the transition should not be affected adversely.

Now, let me turn to the bill's other two major provisions. First, it permits the Secretary of HHS to federalize State agencies at any time "to assure the effective, equitable and uniform administration of the program." This differs from current law which obligates the Secretary to show that the State agency has substantially failed to make decisions in accord with laws and regulations.

The purpose of this provision is not only to avoid future differences in policy interpretation, but also to assure that the Secretary has the authority to federalize the disability deter-

mination process whenever federalization would better serve the program.

The States were initially given this responsibility because of their closer links to the medical community—from which reports would be needed—and because of the State link with vocational rehabilitation. Both rationales have been overtaken by program history and are no longer as relevant as the ensuring of effective, equitable, and uniform national administration of the disability program.

Let me assure you that this bill provides for fair and equitable treatment of the State employees who may be federalized. The disability determination process requires their continued expertise, and this bill provides an orderly and fair transition to Federal employment, with protections to ensure pay, leave, and pension benefits reasonably equivalent to Federal employees of comparable status.

As an aside, let me explain that SSA already absorbs the State agencies' costs, including retirement contributions for these employees, so federalizing certain State agencies can be done in a cost-effective manner.

Second, it eliminates the Appeals Council, and the review performed by it, which is the third and final administrative appeal. This provision is intended to streamline the entire appeals process by eliminating a paper review of the decisions of adminstrative law judges. I believe applicants will benefit by quicker access to the new Social Security Court.

The Social Security Administration estimated some initial overlapping administrative costs in the transitional period, but from the second year the elimination of the Appeals Council balances the costs of the Social Security Court.

Personally, I believe national uniformity would produce slight program savings and more accurate payments, as well as administrative savings, when compared to the current practice of administering divergent standards among different circuit courts.

I commend these measures to all of my colleagues, and urge those on the Ways and Means Committee to consider H.R. 2349 as expeditiously as possible.

SOCIAL SECURITY: A FATHER'S WORRY

HON. JIM SLATTERY

OF KANSAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 16, 1989

Mr. SLATTERY. Mr. Speaker, on Thursday, May 18, 1989, I will chair a House Budget Committee Task Force on Economic Policy, Projections, and Revenues, which will focus on the current policy of spending money from the Social Security trust fund surplus for current government operations.

I believe that the public is unaware of this practice. Using trust fund money masks the true Federal deficit and creates a false sense of optimism about the availability of Social Security funds when the baby boom generation retires beginning in 2015.

The Kansas City Times, on May 15, 1989, published an excellent article concerning the Government's spending policies and use of the Social Security trust fund to pay for current expenses.

I would like to submit for the RECORD this article, authored by Robert Unger, and I urge all my colleagues to review it.

The public has a right to know that funds they think are being tucked away to meet future Social Security obligations are being spent. If this practice is not stopped, the next generation will simply collect a fist full of IOU's from the Social Security trust fund.

[From the Kansas City Times, May 15, 1989]

SOCIAL SECURITY: A FATHER'S WORRY

(By Robert Unger)

The Middletons span four generations. There's Grandma Opal, 85, and long retired. There's Bill, 50, and his wife, Connie, working every day. Then there are the four kids, 17 to 28, just getting started. And, of course, Bill's two grandkids.

Together they tell the story of Social Security in America: In a single family, they are the promise made, the promise kept, and the promise about to be broken.

Grandma Opal came of age as Social Security was born in the 1930s. By now, she says, she's gotten back thousands of dollars more than she ever paid in.

Bill's an optimist. He figures he's going to live a long time, long enough to enjoy all that he's paid in. Maybe even a little more.

Then there are the children and grandchildren.

"It doesn't look so good for them, does it?" Bill asked, knowing the answer all too well. "With the politicians dipping into it, the plan is doomed to fail."

As benefits representative for United Auto Workers Local 31 at the General Motors Fairfax assembly plant, he knows what most other Americans don't know and don't really want to know: There is no Social Security trust fund, at least as most of us or any of the nation's bankers think of a trust fund. There is no money waiting for Bill Middleton, except in the future paychecks of his children's generation. And if there is none for him, there certainly is none for them.

In the dark annals of American governmental deception, none looms blacker than the myth of the Social Security trust fund. If asked, most Americans would say that trust fund is growing every day, building more greenbacks through interest and paycheck contributions toward each citizen's retirement day.

They think that way because that's what their leaders have told them. When the law was revised in 1983, for instance, Sen. Bob Dole of Kansas was at the forefront, announcing that the system was "now sound well into the next century."

In fact, by Webster's definition, pedding the ideas of a genuine Social Security trust fund is peddling a lie. Jim Blum, chief of the budget analysis division of the Congressional Budget Office, explained.

"The trust funds really are only accounting conventions to keep track of the numbers. These aren't trust funds in the normal sense of the word," Blum said. "I don't know why we call them trust funds. I guess the aim is to deliberately mislead the public."

On paper, there is a trust fund, and it is accumulating a surplus. In point of fact, that surplus money is immediately traded to the federal government for non-negotiable bonds, and the money is spent on other government activities. So the best the trust fund has, Blum said, is a stack of IOUs' from the U.S. Treasury.

"We are building up IOUs in the Social Security trust fund that will come due in future years. The question is, how do we pay for those IOUs in the year 2010 and 2015?"

In principle, the Treasury will return that money to the Social Security trust fund when the trust fund needs it. In reality, the Treasury has virtually no money, ever, except what it is collecting in taxes.

REFORMS BROUGHT PROMISES

So what does that mean to the Middletons? It means there will be no money for Bill's retirement check in 2015 unless the Middleton kids pay higher taxes of one variety or the other in 2015 to provide that retirement check.

But what about all the pledges of long-term solvency by Dole and others after Social Security's reform legislation in 1983?

They were technically correct, explained one economists, in the same sense that a man might tell his wife he's putting money in the vacation fund every month, while quietly "borrowing" it to play pool with the boys. Eventually he must try to squeeze a trip to Yellowstone out of the August paycheck. The family vacation fund would show a fine Aug. 1 balance on paper—and be empty.

Jeffrey Sachs, professor of economics at Harvard University, summarized the long-term effect of the 1983 reforms this way:

"The simple fact is that before the 1983 Social Security fund's needs in 2015 (when the flood of baby boomers will be retiring) would have had to be paid out of current revenues (tax collections) in 2015," he said. "After the tax increases, the Social Security fund's needs in 2015 will still have to be paid out of current revenues in 2015. You just can't double count that (trust fund) money. It is already being spent to pay for current operations of the government."

So what, exactly, did the Social Security tax increases in 1984, plus all the rate increases since, really achieve? Sometimes, in a fit of candor, lawmakers tell us clearly and concisely.

Rep. Leon Panetta, a California Democrat who is chairman of the House Budget Committee, said in a recent interview: "I think most Americans would agree that they did not anticipate that by enacting that (Social Security) reform they were basically enacting a blank check for other government spending. We implemented those reforms on the basis that we would secure the Social Security system, that we should protect from bankruptcy.

"So we created this huge Social Security surplus by virtue of (Social Security) tax increases. And now what we're seeing is a situation where, through the back door, we are using that money to basically pay other bills. So, yes, it is. It is a cover for basically meeting needs that were not intended by the (Social Security) tax."

The money did, indeed, come in handy back then. That Social Security tax increase, which fell hardest on poorer taxpayers, was really the second major tax revision of the early 1980s. The first had been a tax cut for the more wealthy taxpayers. Taken together, the two actions produced a transfer of taxes from the rich to the poor.

THE CHILDREN'S CHOICES

In the end, Bill Middleton's children will have only four choices in 2015.

"When it comes time to spend that money owed to the trust fund, the taxpayers in the

year 2015 can raise their own taxes to pay Social Security benefits, reduce other government spending, reduce programs or benefits, or roll it over," explained Robert Reischauer, director of the Congressional Budget Office.

"Roll it over" is a polite term for what we are doing now. It means Bill Middleton's kids can borrow even more money—and turn the ballooning debt and the worsening problem over to Bill's grandchildren.

Of course, all that could change if something extraordinary happened. Runaway inflation, for all its other havoc, could help pay off those trust fund IOUs with cheap dollars. Or something could happen to make Bill's children's generation extraordinarily more productive—and, herefore, far more wealthy—than their parents. Hence all the talk among economists about the importance of America investing in its future, through investments in schools, technology and research to provide a foundation for increased productivity.

"But America isn't using that public money to invest in its future," said Benjamin M. Friedman, author and professor of economics at Harvard University. "We're spending it on current consumption. We are spending it on ourselves."

Panetta thinks that that mentality—enjoy today; forget about the future—is all part of a psychology that has gripped Washington in recent years.

"Instead of confronting these problems, you basically postpone them to another generation and another time, and hope that by the time you reach that point, somehow the problem will have disappeared," he said.

In Washington they have an antiseptic name for this arrangement that Panetta admits is little less than a massive deception. They call it "masking," as in the phrase, "The Social Security surplus is masking the true size of the budget deficit."

In fiscal year 1990, which begins Oct. 1, 1989, the Social Security trust fund will be masking $68 billion of the deficit. By 1994 it could mask as much as $117 billion, by then bringing the total extent of the ongoing "mask" to roughly $618 billion.

Nor is Social Security the only trust fund. The Medicare trust fund will "mask" $20 billion this year, and military and civilian retirement trust funds an additional $36 billion.

Then there are the surpluses in the highway and airport funds (about $3 billion) and the unemployment fund (about $9 billion), also providing a "mask."

Altogether, as things are going now, the use of various government trust funds will have "masked" about $1.4 trillion by the end of 1994, every penny of it an IOU to be paid back down the road by Bill Middleton's kids and grandkids.

During that time, the great trust fund deception undoubtedly will continue, producing two very different numbers:

The Official Deficit. This one is virtually certain to be touted by politicians because, according to Congressional Budget Office projections, it will be going down. From $159 billion in 1989, it will fall slowly to $130 billion by 1994.

The Real Deficit. This one, likely to be mentioned far less often by politicians, starts with the official budget deficit and then adds the stack of trust fund IOUs accumulated as those surpluses are spent as quickly as they arrive. That real deficit, according to the budget office, will climb from $281 billion in 1989 to $309 billion in 1994.

In the final analysis, there is nothing at all wrong with politicians quoting the lower and more palatable official deficit figure to the folks back home. However, to avoid Webster's second definition of "lie," they should throw in one crucial phrase:

The official deficit numbers assume that the trust funds, for Social Security and the rest, simply no longer exist.

A TRIBUTE TO PAT SLOVEK, A FORMER CONGRESSIONAL AIDE

HON. JOEL HEFLEY

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 16, 1989

Mr. HEFLEY. Mr. Speaker, I recently received the sad news of the death of a longtime congressional staff member and a native of Colorado, Florence J. (Pat) Slovek.

Pat has a long and successful career of public service, having served in the U.S. House of Representatives, the U.S. Senate, and the administration of President Ford from 1963 until her retirement 2 years ago. Most recently, she was the office manager and personal secretary of our former colleague from Colorado, Ken Kramer. Pat spent the majority of her career here in the House; she loved this institution and was a hard-working dedicated employee, who was admired and respected by both Members and staff. I know that everyone who had occasion to work with her was impressed with her abilities and her overwhelming desire to help others.

Pat will be deeply missed by her family, her friends, and the Capitol Hill community. Those who knew her will always hold fond memories of her with the knowledge that she was truly an exceptional person.

I extend my deepest sympathies to Pat's family and at this time would like to have included in the RECORD a copy of the May 14, 1989 obituary which appeared in the Washington Post.

The article follows:

[FROM THE WASHINGTON POST, MAY 14, 1989]

FLORENCE JOSEPHINE (Pat) SLOVEK, OFFICE MANAGER AND SECRETARY

Florence Josephine (Pat) Slovek, 67, a retired office manager and personal secretary to former representative Kenneth Kramer (R-Colo.), died May 12 at Alexandria Hospital. She had cancer.

Mrs. Slovek, who lived in Alexandria, was born in Fort Collins, Colo., and attended a business college in Denver. She moved to the Washington area in the early 1960s and in 1963 joined the staff of then-representative Donald G. Brotzman (R-Colo.). She was his office manager and personal secretary until 1975.

She also had worked for several other members of Congress and was employed by the Office of Manpower and Reserve at the Pentagon. She worked for Kramer from 1979 until she retired in 1987.

Mrs. Slovek had been a member of Blessed Sacrament Catholic Church in Alexandria.

Her marriage to John Slovek ended in divorce.

Survivors include five children, Patricia Fox of Alexandria, Joan Stearns of Aurora, Colo., John Slovek of Johnstown, Colo., Gary Slovek of Longmont, Colo., and Mike Slovek of Aurora; two sisters, Ida Maye O'Hanion of Golden, Colo., and Loretta Jacoe of Boulder, Colo.; and four grandchildren.

TREES AND THE GREENHOUSE EFFECT

HON. AL SWIFT

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 16, 1989

Mr. SWIFT. Mr. Speaker, I wish to include at this point in the CONGRESSIONAL RECORD an essay drawn from a letter from Dave Buse, an executive in a family-run sawmill—one of the few that remain in what was once almost exclusively a mill town named Everett, WA. The entire wood products industry in the Pacific Northwest is now threatened by controversy over the survival of the spotted owl and the preservation of what has been called "ancient forest."

What I see on the front page of our newspapers and on the news is a picture of a cute spotted owl. The cutlines say the spotted owl is endangered. But I do not see pictures of battered wives, abused kids, families in line for welfare in our newspapers. But, how do you picture the effects of over one hundred thousand lost jobs. We are not used to thinking of human being endangered.

"But wait," cry the preservationists. "Think of our environment", they cry. "This justifies the sacrifice of jobs and communities. Think of the environment! Think of the greenhouse effect!"

But, that is what we are doing, thinking about the environment. Open your minds for a moment and just listen to these facts:

(1) Trees are a renewable resource to be used and replaced by new, viable forests which can be used again. Unlike gas, oil, and coal that are mined and gone, the trees are to be replanted again and again forever.

(2) Everybody knows that trees grow. Must people under that trees can be replanted. But most people do not realize that more trees are planted then are cut by the forest industry.

(3) As to the greenhouse effect, it is true that if you cut trees and do not replace them—as they are said to be doing in the Amazon for example—it becomes "mining the forest" and it definitely does add to the greenhouse effect. It is also true that if you cut trees and replace them with towns and streets and houses you contribute to the greenhouse effect—certainly you don't help provide habitat for the spotted owl.

But to state that cutting timber, especially old growth, is adding to the greenhouse effect is simply wrong, provided that the areas cut are replanted and managed to a viable stand for timber.

(4) Here's a little science. A tree takes carbon dioxide from the atmosphere when it is growing and when it is developing with fiber. When it stops growing, it stops taking carbon dioxide out of the atmosphere. And when it dies and rots, it puts carbon dioxide back into the atmosphere.

Therefore, what is the biggest possible help forest can make to the greenhouse effect? They can make their greatest contribution to combating the greenhouse effect if we keep our forest young and growing. How do we do that? By harvesting those forests at their maturity to make the wood products that we need and then replanting

those areas so that a new, thriving young forest develops.

(5) What you would want to avoid if you are concerned about the greenhouse effect is an old, rotting, dying forest that is contributing to the greenhouse effect.

(6) Let me take it a step further. If we cut a tree and use it for a house, table or book, carbon that contributes to the greenhouse effect is locked up in the product, not freed into the air. If that tree is cut into firewood and burned, it puts an equal amount of carbon into the air as it took out—it's neutral. If that heat replaces heat from gas, oil or coal that comes from the earth, then it is again helping the greenhouse effect by substituting the amount of carbon that would be added to the atmosphere by burying these other products.

By growing trees for harvest and use, therefore, we help this world overcome the greenhouse effect.

In that context, how can we be made out to wear the black hats?

The forest products industry is working under strict guidelines on stream side buffer zones, road building regulations, and other regulations that protect the environment. We plant more trees than we cut. We help the greenhouse effect. In the energy field, that is known as "a renewable resource" and is highly valued by the environmental community.
